John Therriault

Dear Therriault,

As an Illinois resident, I am concerned about water quality and the future of the waterways in my community and Lake Michigan. In particular, I am concerned about the coal ash pits in Waukegan that sit right next to Lake Michigan and have a history of contamination.

Coal combustion waste is a serious public health threat that has and continues to jeopardize my community: I ask that stronger protections be put in place.

I urge the IEPA to strengthen these proposed rules and to prevent coal combustion waste from continuing to damage the waters used by citizens of Illinois. These power companies with coal ash ponds must be held accountable and demonstrate the financial means to clean them up so communities are not left with the responsibility and the price tag. Should companies close their coal plants, they must be required to take care of the coal ash waste so that there can be future opportunities for reuse of these sites.

Thank you.

Sincerely,

Nancy Gronlund

Dear Therriault,

As a resident of Illinois, I am very concerned about water quality and the future of the waterways in my community and Lake Michigan. In particular, I am alarmed by the coal ash pits in Waukegan that sit right next to Lake Michigan. These pits have a history of contamination.

Coal combustion waste is a serious public health threat that has, and continues to jeopardize my community. We expect stronger protections be put in place immediately in light of the high risk of pollution.

I strongly urge the IEPA to strengthen these proposed rules and to prevent coal combustion waste from continuing to damage the waters used by citizens of Illinois. These power companies with coal ash ponds must be held accountable and demonstrate the financial means to clean them up so communities are not left with the responsibility and the price tag. Should companies close their coal plants they must be required to take care of the coal ash waste so that there can be future opportunities for reuse of these sites.

Dear Therriault,

As a resident of Illinois, I am concerned about water quality and the future of the waterways in my community and Lake Michigan. In particular, I am concerned about the coal ash pits in Waukegan that sit right next to Lake Michigan and have a history of contamination.

We are spending millions to clean up Lake Michigan. Storing coal ash piles are an irresponsible way to protect our natural resources, not to mention our need and mandate to protect public health.

Coal combustion waste is a serious public health threat that has and continues to jeopardize my community and I ask that stronger protections be put in place.

I urge the IEPA to strengthen these proposed rules and to prevent coal combustion waste from continuing to damage the waters used by citizens of Illinois. These power companies with coal ash ponds must be held accountable and demonstrate the financial means to clean them up so communities are not left with the responsibility and the price tag. May 17, 2014

John Therriault

Dear Therriault,

As a resident of Illinois, I am concerned about water quality and the future of the waterways in my community and Lake Michigan. In particular, I am concerned about the coal ash pits in Waukegan that sit right next to Lake Michigan and have a history of contamination.

Coal combustion waste is a serious public health threat that has and continues to jeopardize my community and I ask that stronger protections be put in place.

I urge the IEPA to strengthen these proposed rules and to prevent coal combustion waste from continuing to damage the waters used by citizens of Illinois. These power companies with coal ash ponds must be held accountable and demonstrate the financial means to clean them up so communities are not left with the responsibility and the price tag. Should companies close their coal plants they must be required to take care of the coal ash waste so that there can be future opportunities for reuse of these sites.

Sincerely,

Patricia Michaels

Should companies close their coal plants they must be required to take care of the coal ash waste so that there can be future opportunities for reuse of these sites.

Given what has happened in North Carolina with coal ash I am disturbed to hear just how many coal ash ponds there are in Illinois and that 2 of them are in my county. How can this be tolerated? We know from experiences in other states how toxic this stuff is. Why should there be ANY coal ash ponds? If the producers can't safely dispose of the stuff, then they should not be able to produce it. And, by the way,

what is going on with that Koch pile in Chicago.

No one should have to live in proximity to something like that. Get rid of all of it.

Sincerely,
