 ILLINOIS ENVIRONMENTAL )  
 PROTECTION AGENCY, )  
 )  
 Respondent. )

SUPPLEMENTAL STATEMENT (by J.D. Dumelle):

This case revolves on the Petitioner's program of transferring the outlet for a street drainage inlet from the 30" combined sewer to the 48" storm sewer.

An inspection of Petitioner's Exhibit 8C shows what appears to be another existing street inlet just west of the manhole at the intersection of Main and Hickory streets. If this inlet could also be reconnected to the 48" storm sewer and disconnected from the 30" combined sewer then downstream basement backups might be relieved, at least in part.

There may be other street drainage inlets along Main Street north of Hickory Street that could also be reconnected to the storm sewer and removed from the combined sewer. The Village of Lombard should check this low cost possibility of reducing damage and danger from basement backups in this area.
