BOARD ADOPTS AMENDMENTS TO 35 ILL. ADM CODE 501 MANAGEMENT OF LIVESTOCK WASTES, R90-7

On June 20, 1991, the Board adopted by a 7-0 vote (Opinion and Order of the Board by Board Member R.C. Flegal; Board Member Joan Anderson concurring) a Final Opinion and Order in R90-7, Amendments to 35 Ill. Adm. Code 501 Agriculture-Related Pollution (Management of Livestock Wastes).

The amendments modify existing regulatory provisions dealing with the siting of new livestock management facilities, and livestock waste-handling facilities. New livestock management facilities and waste-handling facilities are prohibited from locating within 1/2 mile of a populated area or within 1/4 mile of a non-farm residence, unless located within a designated Agricultural Area, or the facility undergoes expansion or complies within local zoning requirements, as specified in the amendments.

The amendments also allow for expanded use of vegetative filters for the treatment of livestock waste generated at small-to medium-sized facilities.

The amendments further establish requirements for the field application of livestock wastes. Operators are required to practice odor control methods so as not to cause air pollution. The amendments are designed to reduce the potential for odors which constitute air pollution with minimum disruption of farming practices.

On June 11, 1991, the Joint Committee on Administrative Rules ("JCAR") issued a certification of no objection to the proposed amendments. JCAR had no questions or problems with the amendments, therefore, the amendments were adopted by the Board in the same form as the Second Notice version of the amendments.

Copies of the Opinion adopted amendments are available from the Clerk of the Board at (312) 814-3620. Questions concerning these amendments may be directed to Michelle Dresdow at (815) 753-0947.

BOARD SENDS PROPOSED GROUNDWATER PROTECTION RULES TO A SECOND FIRST NOTICE

On June 20, 1991, the Board adopted a Second First Notice in R89-5, Groundwater Protection: Regulations for Existing and New Activities Within Setback Zones and Regulated Recharge Areas (35 Ill. Adm. Code 601, 615, 616, and 617). The proposed amendments contain groundwater monitoring requirements for surface impoundments, pesticide storage and handling units, road oil storage and handling units, and de-icing agent storage and handling units; general closure and post-closure requirements for land treatment units, surface impoundments, pesticide storage and handling units, and fertilizer storage and handling units; and other regulations pertaining to landfills, surface impoundments, waste piles, underground storage tanks, pesticide storage and handling units, fertilizer storage and handling units, road oil storage and handling units, and de-icing agent storage and handling units.

The Board adopted the Opinion and Order by a 7-0 vote (Opinion and Order of the Board by Board Member R.C. Flegal; Board Members J. Anderson and B. Forcade concurred).

Once the proposed rules are published in the Illinois Register, a 45 day comment period will begin. Persons wishing to comment should call the hearing officer, Michelle Dresdow, at 815-753,0947, to obtain a copy of the service list of persons who should receive the written comments in addition to the Board.

PUBLIC WATER SUPPLIES RESTRICTED STATUS AND CRITICAL REVIEW LISTS
