Subject: [External] Coal Ash Rulemaking
Date: Saturday, August 8, 2020 3:28:48 PM

It is imperative to improve the safety standards of coal ash storage to protect our waterways and health.

Proper storage and clean -up are needed, but ultimately we need to avoid creating the product in the first place.

This continuing degradation of our supportive environment amounts to a folly called ecocide. Ecocide hurts us all. Our values and priorities must change.

Sincerely, Carla
