Complainant
V
Horizon Construction Group, Inc
Respondent

PCB 2023 - 014
Supplementary Material

1. The ILEPA is incompetent and included a picture of a concrete truck clearly, at best, doing a secondary prohibited rinse on the ground in front of the washout receptacle. Most people think concrete is the reason for the law, not the water. Is a massive problem.

Date: 6/23/2022	Site Location: Springs at Lily Cache Creek
Photo By: Ryan Gibbons	
County: Will-S.Cook	
Comments: Concrete washout in use	

Electronic Filing: Received, Clerk's Office 01/03/2023

2. Respondent has yet to provide access to the SWPPP book for public review after the request was made in May, prior to the ILEPA report.
3. The affirmative defenses provided by respondent contain many knowingly false statements by a representative of someone who signed and is bound by a NPDES required SWPPP certification
4. The defenses knowingly omit the pictures of a series of violations committed after the report of compliance from an incompetent implementor
5. Both the ILEPA report and responses to complaint omit serious violations related to required SWPPP signage and intimidation by Billy, who now has a strain of Cannabis named after him
6. Additional fines and or criminal charges should apply for each violation of the SWPPP certification made by the permit holders representative I am only allowed to speak with.
7. Does openly violating federal law and then lawyering up relieve one of their NPDES Permit requirements?
8. The ILEPA should be stripped of their permitting authority
