Public Comment for Jim Domiano

=====

EPA Administrator Debra Shore summed it up in 2023: “The Waukegan community has been burdened for too long by the effects of improper coal ash disposal.”

Entombing the coal ash deposits is an insufficient remedy, it is not permanent, and it does not return that land to the people of Waukegan to use as they see fit. Increasing bad weather due to global warming will accelerate the deterioration of the site.

Business owners and residents of Waukegan are tired of NRG’s inaction. Every day the problem is not addressed is an addition day of our groundwater potentially being polluted and our citizens being made ill. Stop the delays and get it done.

JIM DOMIANO

Vice President & General Manager
