To: Illinois Pollution Control Board and Gov. Pritzker's Office
From: Bill and Kay Ahaus, Trenton, Illinois

The importance of holding all vehicles to clean standards is needed not just in the larger northern cities of our state, but also downstate here in Madison, St. Claire and Clinton counties.

Int the 20 years we've resided here, our air quality has deteriorated to a notable extent. All sources that pollute air quality should be held accountable to a standard that allows breathable air. Clean vehicle standards are an essential part of cleaning up our air.

With alternative electric trucks and buses now available, there can be no reason to continue to allow dirty diesel and fossil fueled vehicles on our roads.

Please pass the highest vehicle standards.

Thank you.

Bill and Kay Ahaus
