RULEMAKING UPDATE

BOARD PROPOSES SDWA UPDATE (R91-3)

On March 11, 1992, the Board proposed to update the Safe Drinking Water Act (SDWA) rules to include USEPA amendments which appeared in the Federal Register between July 1, 1990 and January 31, 1992.

The SDWA rules are mandated by Section 17.5 of the Act and are based on 40 CFR 141 and 143. They are located in the Board's rules in 35 Ill. Adm. Code 611 governing public water supplies.

Most of this Update concerns the USEPA "Phase II" rules from the January 30, 1991, Federal Register. This involves the adoption of "revised MCL's" for some eight inorganic contaminants, ten organic contaminants and fourteen pesticides and PCBs. Accompanying these revised MCLs is a major overhaul of the monitoring and reporting requirements.

Also included in this update is approval for additional uses of the "MMO-MUG" test for microbial contamination. One USEPA approval occurred on January 8, 1991. The Board has also proposed to include the additional approvals from the January 15, 1992, Federal Register.

The proposal will appear in the Illinois Register in the near future. To be added to the mailing list, contact Morton Dorothy at 217/333-5575.

BOARD DETERMINES NO EcIS IS NECESSARY IN STAGE II GASOLINE VAPOR RECOVERY RULES, R91-30

On March 11, 1992, the Board determined that an Economic Impact Study is not necessary for the Stage II gasoline vapor recovery rules proceeding. The proposed rules are intended to regulate the installation and operation of systems for gasoline vapor recovery of emissions from the fueling of motor vehicles. Pursuant to Section 182(b)(3) of the Clean Air Act, as amended in 1990 (CAAA), Illinois is to submit these regulations as a revision to its State implementation plan (SIP) by November 15, 1992. This proposal is directed at both Illinois non-attainment areas. These include the Chicago area counties of Cook, DuPage, Kane, Lake, McHenry, and Will, as well as Oswego township in Kendall County and Aux Sable and Goose Lake Townships in Grundy County; and the Metro-East area, consisting of Madison, Monroe, and St. Clair Counties.

The Board considered comments filed by the Illinois Environmental Protection Agency and the Department of Energy and Natural Resources (DENR) that cost information has already been included in the proposal, and that preparation of an EcIS would duplicate the efforts that DENR has already expended. The Board determined that no EcIS is necessary, stating that the

presentation of economic information at hearing and in comments in this proceeding should be sufficient for the Board's consideration of the economic impact of the proposed rule. The Board noted that it may change its determination pursuant to Section 27 of the Environmental Protection Act, if the proposal is substantially modified or if information in the record indicates that an economic impact study would be advisable.

Persons interested in the proposal should contact the hearing officer, Michelle C. Dresdow, at (815) 753-0947 for further information.

BOARD SENDS PROPOSAL IN RACT EXPANSION FOR THE CHICAGO AREA TO FIRST NOTICE, R91-28

On March 11, 1992, the Board sent the Illinois Environmental Protection Agency's proposal to first notice. The proposal is intended to expand the geographical applicability of reasonably available control technology (RACT) regulations to certain stationary sources of volatile organic material (VOM) in Goose Lake and Aux Sable Townships in Grundy County, Illinois, and to Oswego Township in Kendall County, Illinois. On July 25, 1991, the Board adopted revisions to the State implementation plan (SIP) to make it consistent with the existing Federal implementation plan (FIP) in docket R91-7. The revised SIP contains a complete set of RACT regulations applying to stationary VOM sources located in the six Chicago area counties of Cook, Lake, DuPage, Kane, McHenry, and Will. However, the RACT regulations do not include Aux Sable and Goose Lake Townships in Grundy County and Oswego Township in Kendall County. The Agency believes that because these townships have now been included within the Chicago area boundaries designated by USEPA as nonattainment for ozone, they also must be included in the SIP.

Pursuant to a provision of the Clean Air Act Amendments (CAAA)(42 USC §7511a(c) and a(b)(2)), Illinois is to submit regulations changing the applicability of parts 215 and 218 as a revision to its SIP by November 15, 1992.

The Board emphasized that in sending this proposal to first notice, it adopts no substantive position on the merits of the proposal. The Board believes that publishing the proposal at this time will maximize the opportunity for public comment on the proposal, and allow for greater opportunity for amendments to be adopted within the CAAA deadline.

As a reminder, a hearing has been set by the hearing officer for:

TUESDAY MAY 12, 1992
11:00 a.m.
Oswego Law Enforcement Center
Community Room
3525 Route 34
(Across from Fox Bend Golf Course)
Oswego, IL

Those interested in further information on this proceeding should contact the Michelle C. Dresdow, Hearing Officer, at (815) 753-0947.

SECOND NOTICE IN R91-35

On March 11, 1992, the Board adopted for second notice the PM-10 statewide episode regulations. The proposal prescribes state-wide limits for emission of particulate matter with an aerodynamic diameter less than or equal to a nominal 10 micrometers (known as PM-10).

These rules are a portion of the State implementation plan for PM-10 and the Board has certified these rules as federally required. The annual PM-10 standard is set at a level of 50 micrograms per cubic meter, in the form of an annual arithmetic mean. In addition, the proposal adopts 600 micrograms of PM-10 per cubic meter as a 24-hour average, as the significant harm level. Questions concerning this rulemaking should be addressed to the hearing officer, Marie E. Tipsord, 100 W. Randolph, Suite 11-500, Chicago, IL 60601 (312) 814-4925.

BOARD CLOSES DOCKET IN R91-25

On March 11, 1992, the Board voted 7-0 to close the docket in R91-25, Amendments to Noise Regulations.

On November 25 and 26, 1991, the Board held inquiry hearings in this matter. After the close of the public comment period, the Agency informally informed the Board that due to the limited resources of the noise program, it is unable to present a proposal to the Board at this time. Because there is no proponent in this matter to carry it forward, the Board will close this docket. Any person presenting a noise proposal to the Board should consider incorporating all or part of the record from R91-25. The Board wishes to thank those who participated at the hearings and those who submitted comments.

BOARD AND STAFF ACTIVITIES

On March 3, 1992, Board Member Bill Forcade spoke to the members of a Chicago-Kent Law School course on Scientific Analysis of Environmental Problems. The topic was "Environmental Health Decisions in Illinois."

Board Member Forcade gave an update on the Board to the members of the Chicago Bar Association Environmental Law Committee on February 4, 1992.
