CRANE PACKING COMPANY)
(CRYSTAL LAKE PLANT))
v.) PCB 72-132
ENVIRONMENTAL PROTECTION AGENCY)

ORDER OF THE BOARD (by Mr. Kissel):

Based upon the variance petitions of Crane Packing and the recommendation of the Agency, Crane is hereby granted a variance from Rules 202, 501, 502 and 504 of the Pollution Control Board Regulations governing Asbestos Emissions, R71-16, for its Morton Grove and Crystal Lake plants, until October 31, 1972, subject to the following conditions:

1. Crane shall obtain the appropriate permits from the Agency for all new equipment and for such modifications as it shall make to its present equipment.

2. Crane shall submit monthly progress reports to the Agency until the above-described control equipment is installed and operating, at which time Crane shall submit a final report to the Agency within thirty (30) days after the described control equipment is operable.

3. Within forty-five (45) days of the date of the grant of this variance, Crane shall report to the Board and the Agency on the economic feasibility of performing a stack test on emissions from the fabric dust collector after installation. Based upon such report, the Board reserves the right to order such tests as it finds necessary.

4. Crane shall file with the Agency a performance bond or such other security as the Agency may deem appropriate in the sum of \$48,000 to guarantee installation and performance of its control equipment in compliance with this order.

5. Crane shall not operate above the current production level as described in the petition until the completion of the proposed control project.

6. Failure of Crane to adhere to the conditions of this variance shall be grounds for revocation of the variance.

I, Christan L. Moffett, Clerk of the Pollution Control Board, certify that the Board approved the above Order this 17th day of May, 1972, by a vote of 4-0.
