RECEIVED  
DEC 05 2003  
IEPA-DLPC

A complaint follow-up investigation was conducted at this site on November 10, 2003. No one else was at the site during this investigation. The weather was mostly cloudy and 45°F.

Many of the abandoned vehicles previously observed on this site had been removed. However, there were eight abandoned cars in the west part of the site and one abandoned gasoline truck in the east part of the site. The vehicles were in bad disrepair and missing parts necessary for operation. Most of the vehicles were surrounded by tall weeds. None of the abandoned vehicles had current license plates. The abandoned cars are shown in photographs 1078055001~11102003-003, 1078055001~11102003-004, and 1078055001~11102003-006. The abandoned gasoline truck is shown in photographs 1078055001~11102003-010, 1078055001~11102003-011 and 1078055001~11102003-013. Also on-site were two pickup trucks and a backhoe. These were not visibly disabled and were not apparently abandoned.

A refrigerator that still had its doors on it was observed in the west area of site. This refrigerator is shown in photograph 1078055001~11102003-005.

There were numerous pieces of scrap metal around the edges of the site. While some scrap metal was sorted and on racks, most of it was in piles or scattered on the ground. The scrap metal is shown in photographs 1078055001~11102003-001, 1078055001~11102003-002, 1078055001~11102003-003, 1078055001~11102003-004, 1078055001~11102003-005, 1078055001~11102003-006, 1078055001~11102003-012, 1078055001~11102003-013, 1078055001~11102003-014, and 1078055001~11102003-015.

In addition to the disorganized piles of scrap metal, there were organized piles of metal building parts and, in one area, a rack with sorted metal building parts. The sorted, organized metal building parts were not considered to be disposed of at this site.

Many of the drums that were investigated by the State of Illinois in June 1998 were still at the site during this inspection. Drums are shown in photographs 1078055001~11102003-007, 1078055001~11102003-008 and 1078055001~11102003-009. There were also small metal tanks and used tires at this location and shown in the above-listed photographs. I shook the drums that remained at the site. There were no free liquids that I heard sloshing in any of the drums. The open drum that is shown lying on its side in photograph 1078055001~11102003-007 contained what appeared to be soil. None of the other drums had the stoppers that the Agency had put in the punched holes in the tops of the drums. There were no hydrocarbon odors noted in the area of any of the drums.

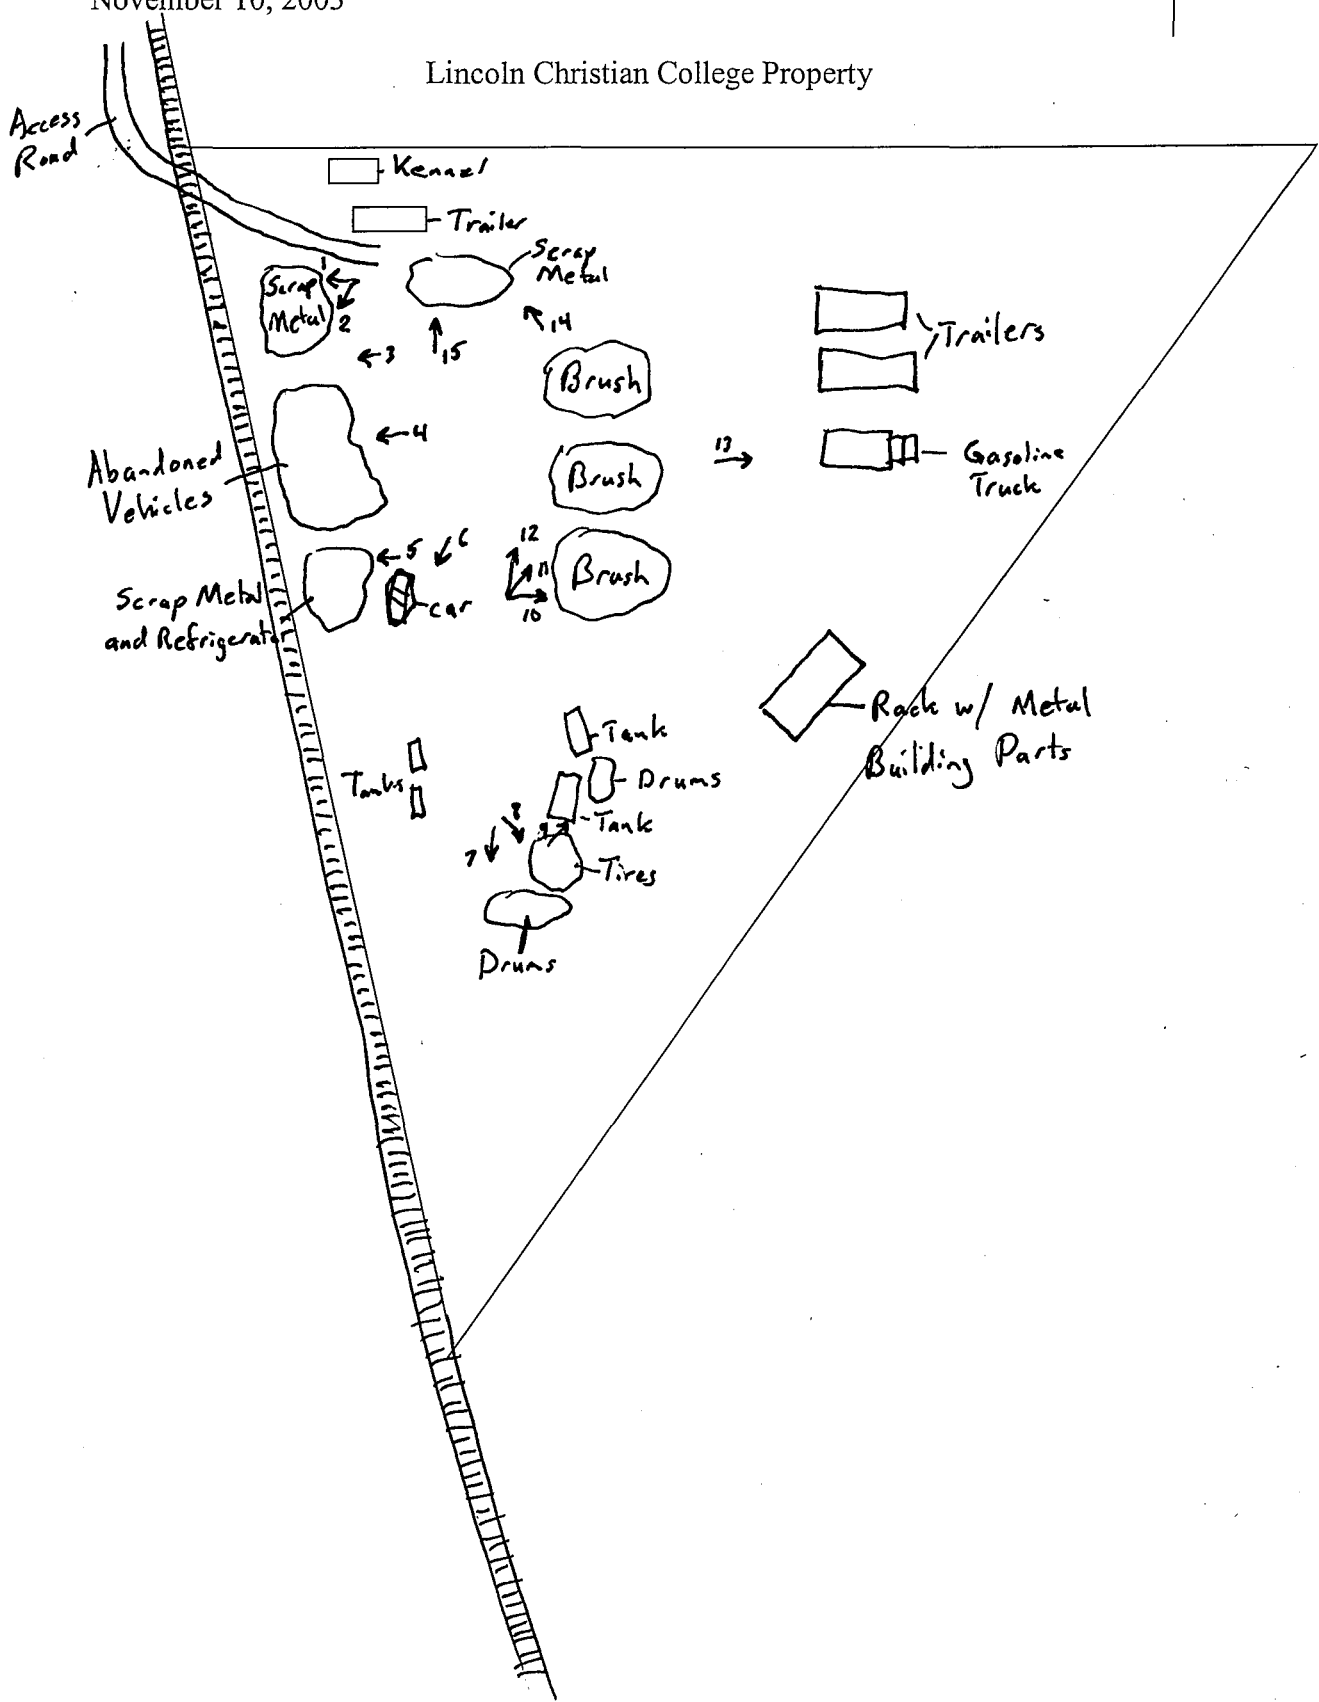

There were three large brush piles on this site. The brush piles are shown in photographs 1078055001~11102003-010, 1078055001~11102003-011, and 1078055001~11102003-012. Identifiable branches of yew (*Taxus* sp.), tree-of-heaven (*Ailanthus altissima*), ginkgo (*Ginkgo biloba*), and northern catalpa (*Catalpa speciosa*) were observed in the piles. These species were not found growing at this site. No large tree-clearing effort was apparent at this property. Since this landscape waste was not generated at this site and this site is not provided or supervised by a unit of local government, burning of this waste at this site is prohibited.

The apparent violations observed are marked on the attached checklist.
