NARRATIVE INSPECTION REPORT

GENERAL REMARKS

On January 15, 2004 I conducted an inspection of the Mill Shoals/Marshall dump site. I was accompanied by Danny January of the Egyptian Health Department. The initial inspection was conducted on October 10, 2003 at which time apparent violations included open dumping & open burning. More than 1,880 cubic yards of waste were estimated during the October 10, 2003 inspection.

Fourteen areas of apparent violations, as well as scattered waste, were observed at the dump site. The scattered waste included, but was not limited to, 31 apparently abandoned vehicles estimated to be approximately 258 cubic yards ([4.5'x5'x10'] x31 vehicles) in size, 11.5 partially deteriorated &/or demolished mobile homes estimated to be approximately 1,533 cubic yards ([8'x10'x35']x11.5) in size, two bases of mobile homes, metal, demolition debris, a hot water heater, a tire, 3 appliances, broken glass, broken porcelain, furniture & general refuse. The fourteen areas of apparent violations have been designated as Area A – Area N. Among the waste in Area A were a variety of metal, demolition wood, shingles, a tub, & general refuse. Area A was estimated to be approximately 3 cubic yards (17.5'x10'x.5') in size. Refuse observed in Area B were foam padding, an appliance, insulation, demolition debris, 2

The waste in Area C included, but was not limited to, clothing, vehicle parts, an appliance, broken glass, 5 hot water heaters, a variety of metal, a furnace, 2 microwaves, 3 bath tubs, 2 vehicles, 6 tires, demolition debris, ash, a truck bed & general refuse. Waste at the southern end of Area C was situated in water. Area C was estimated to be approximately 750 cubic yards (180'x37.5'x3') in size. Among the debris in Area D were vehicle parts, the type of metal roof typically present on a mobile home, demolition debris, glass, clothes & general refuse. Area D was estimated to be approximately 6 cubic yards (10'x32.5'x.5') in size. Waste in Area E included, but was not limited to, a variety of metals, demolition debris, a mattress, 2 tires, cooking pots, ash & general refuse. Some of the debris in Area E, including pieces of metal, were scorched. Area E was estimated to be approximately 16 cubic yards (25'x35'x.5') in size. Area F consisted of metal & demolition debris. Area F was estimated to be approximately 19 cubic yards (25'x10'x2') in size. Area G was a burn pile containing ash, demolition wood, metal & insulation. Area G was estimated to be approximately .5 cubic yards (5'x5'x.5') in size. Among the refuse in Area H were demolition debris, a television, plastics, insulation, a box spring & metal. Area H was estimated to be approximately 5 cubic yards (12.5'x10'x1') in size. Waste in Area I consisted of a variety of metal, a furnace, furniture, 2 appliances & 5 lawnmowers. Area I was estimated to be approximately 13 cubic yards (35'x10'x1') in size. Area J was the base of a mobile home, furniture, clothes, 2 tires, carpeting & general refuse. Area J was estimated to be approximately 17 cubic yards (30'x10'x1.5') in size. Waste in Area K included, but was not limited to, demolition debris, metal, 2 sewing machines & 7 lawnmowers. Area K was estimated to be approximately 19 cubic yards (35'x10'x1.5') in size. Area L was a burn pile containing demolition debris, metal, plastic, insulation & ash. Area L was estimated to be approximately 1 cubic yard (7.5'x5'x1') in size. Area M was another burn pile with ash, demolition debris & metal. Area M was estimated to be approximately

1 cubic yard (10'x5'x.5') in size. Area N consisted of demolition debris. Area N was estimated to be approximately 1 cubic yard (10'x7.5'x.5') in size.

During the inspection, a man arrived at the site. He did not wish to give his name, but said he is a local citizen. He said it was his understanding that a man by the name of John Adams had either just purchased the property on which this site is located or is on the verge of buying it. He indicated Mr. Adams is an upstanding contractor & if he does buy it, he is certain Mr. Adams would clean it up. After my inquiry, the unidentified man agreed to give my business card to Mr. Adams.

The following apparent violations were observed at the Mill Shoals/Marshall dump site:

Line #1, #2 & #8: Cause, threaten or allow air pollution in Illinois. Cause or allow open burning. Cause or allow the open dumping of any waste in a manner which results in any of the following occurrences at the dump site: open burning. It was apparent that open burning had occurred in Area G, Area L & Area M. This is due to the typical indicators such as pyramid shaped piles, a dense amount of ash & blackened refuse in the central portions of the piles & the amount of blackened refuse & charred ground decreasing as the outer perimeter of each pile is approached.

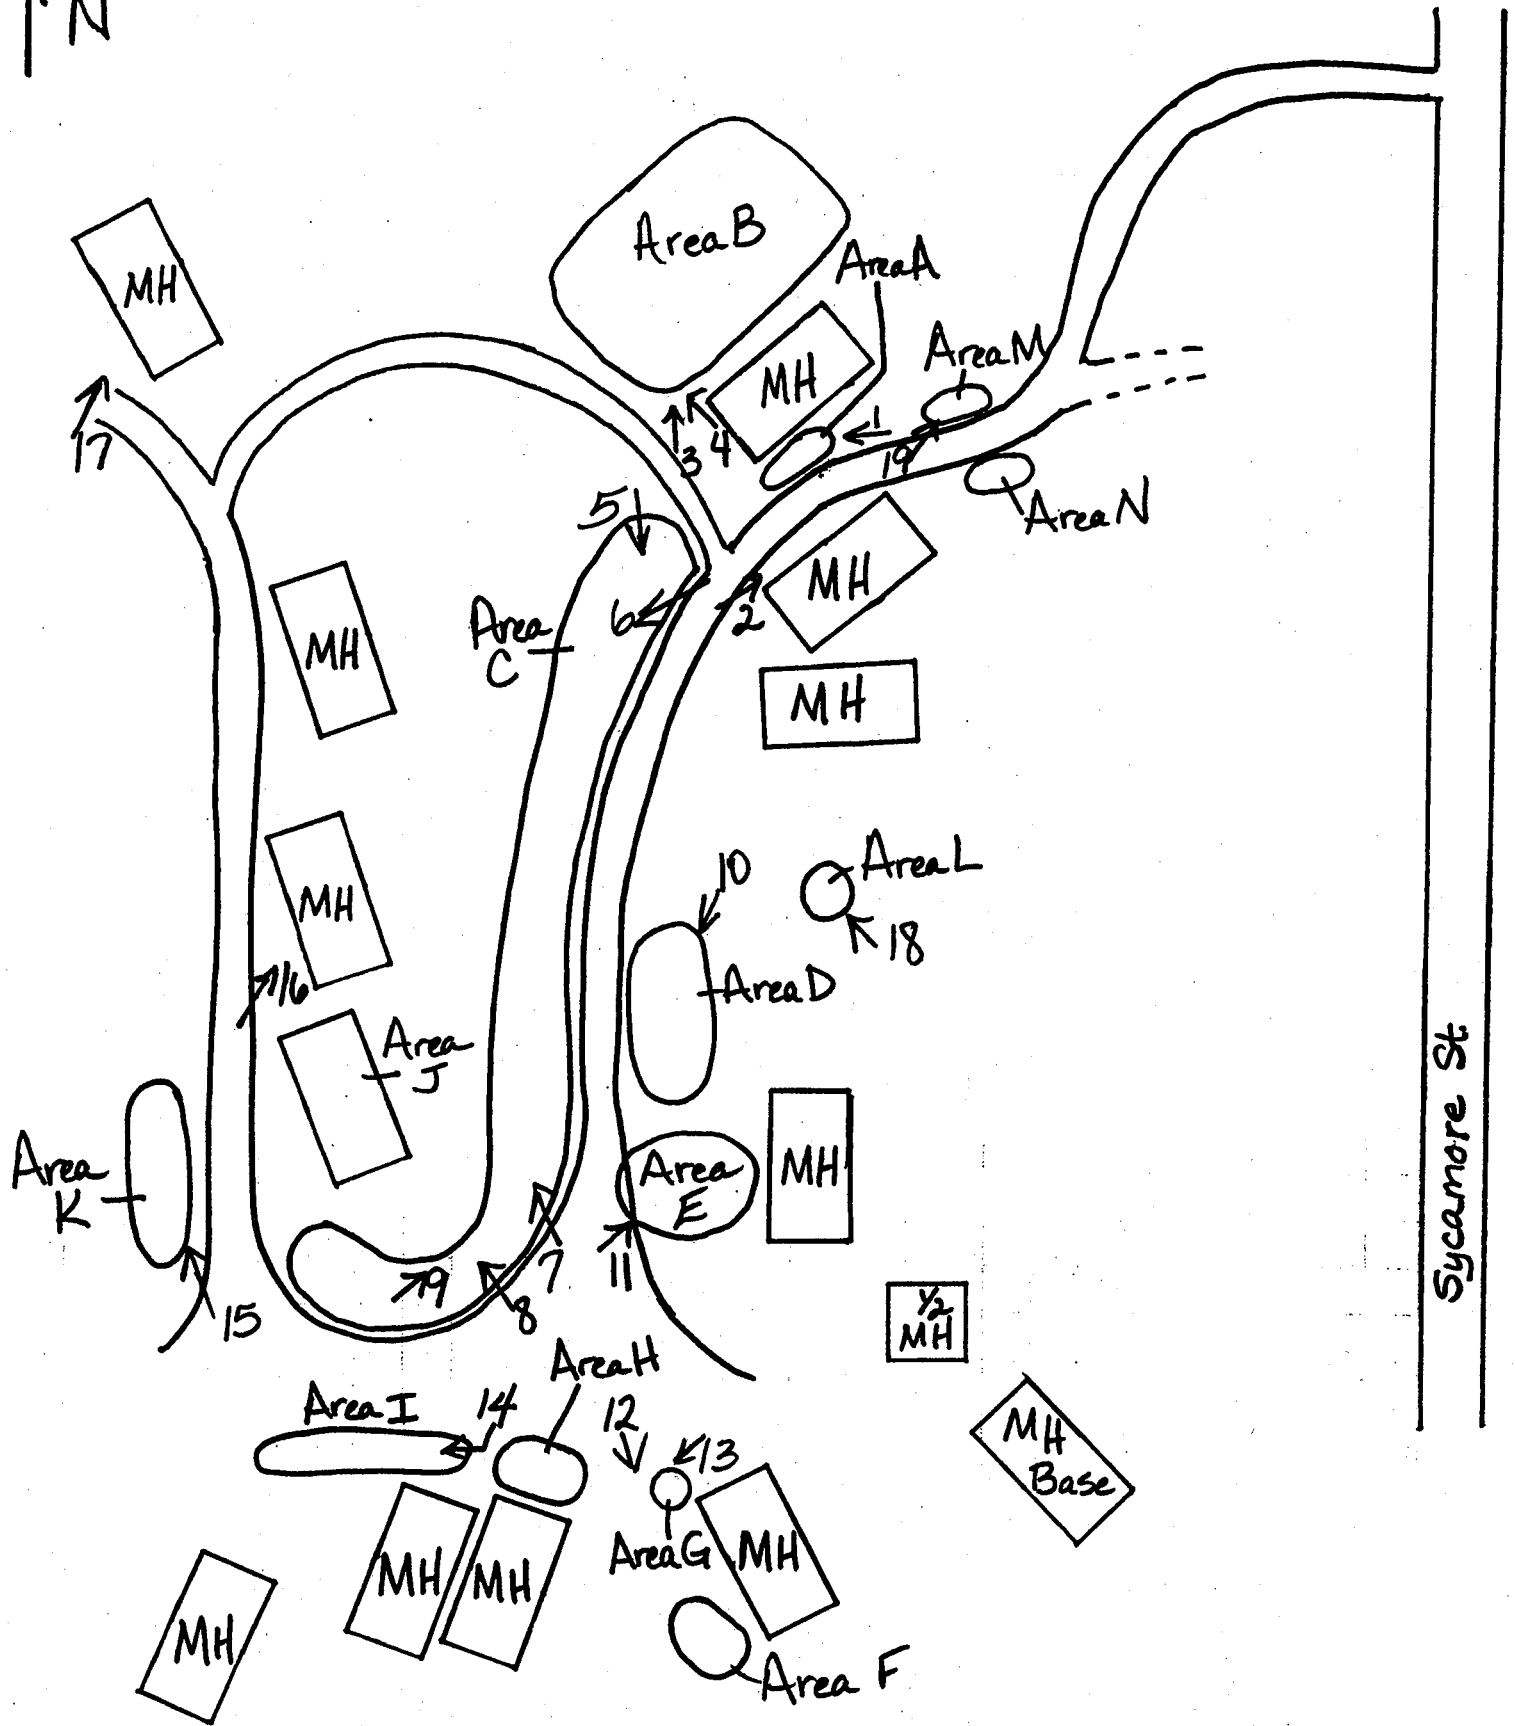

Line #3, #4 & #8: Cause, threaten or allow water pollution in Illinois. Create a water pollution hazard. Cause or allow the open dumping of any waste in a manner which results in any of the following occurrences at the dump site: deposition of waste in standing or flowing waters. A variety of waste was observed in water in the south end of Area C.

Line #5, #8 & #9: Cause or allow open dumping. Cause or allow the open dumping of any waste in a manner which results in any of the following

occurrences at the dump site: litter; deposition of general construction or demolition debris. Cause or allow the open dumping of any used or waste tire. A variety of waste was observed in Areas A-N, as well as scattered throughout the site. Most of the areas contained demolition debris. Tires were observed in Area C, Area E, Area J & scattered.

Line #6, #7 & #10: Conduct any waste-storage, waste-treatment or waste-disposal operation: without a permit; in violation of any Regulations or Standards adopted by the Board. Dispose, treat, store or abandon any waste or transport any waste into the state at/to sites not meeting requirements of the Act and Regulations. Failure to submit an application for a permit to develop & operate a landfill. Agency files do not reflect that there has been a permit applied for or issued by the IEPA which would allow the development for and/or operation of waste activities at this site, thus not fulfilling requirements of the Act & Regulations. Due to the quantity of uninhabitable mobile homes, appliances, demolitions debris, & other waste, it is apparent waste has been brought from elsewhere to this site.
