Letter from the Chairman

While many of you know the Pollution Control Board's role in adjudicating contested cases, the Board also plays a very significant part in administrative rulemaking. Under the Environmental Protection Act, the Board establishes environmental regulations that help restore, protect, and improve the quality of our state's environment. This is a very important responsibility, and the Board expects a full schedule of rulemaking during calendar year 2004.

The Board's semi-annual regulatory agenda recently appeared in the Illinois Register (28 Ill. Reg. 1459). It may also be viewed on and downloaded from the Board's Web site at <http://www.ipcb.state.il.us/Archive/dscgi/dx.py/View/Collection-487>. Although the summaries below form only part of the Board's expected activity, they help indicate the wide range of our rulemaking.

Since the Board adopted Tiered Approach to Corrective Action Objectives (TACO) rules in 1997, implementation has demonstrated the need for updates and clarifications. Under docket R04-22/23, the Board has scheduled two hearings on a proposal to amend these provisions: in Chicago on March 15, and in Bloomington on May 25. The TACO standards affect people and entities throughout the state, and this proposal has already generated strong interest.

Also, the Board anticipates that the Illinois Environmental Protection Agency, by the summer of this year, will propose rules governing the land application of sewage sludge. The Board expects these rules to address matters including pollutant limits, pathogen reduction requirements, and vector control measures applicable to this process. Once the Agency files this proposal, the Board will conduct hearings required by the Environmental Protection Act.

Finally, the Board is now actively moving forward with a proposal amending its procedural rules to allow for electronic filing through the Board's "Clerk's Office On-Line" (COOL). This change would almost certainly reduce the use of paper and help parties reduce the expense and effort of filing in Board proceedings. The Board expects to file this proposal before the end of spring.

While the Board will certainly continue to decide contested cases, these and other rulemakings will be a large and significant part of our workload. We invite you to participate in these proceedings and assist us in making sound environmental policy for our state.

Sincerely,

A handwritten signature in black ink that reads "J. Philip Novak". The signature is written in a cursive style with a large initial "J".

J. Philip Novak
Chairman

Federal Update

United States Environmental Protection Agency Proposes Amendments to the Standards of Performance for New Stationary Sources and Emission Guidelines for Commercial or Industrial Solid Waste Incineration Units Under the Clean Air Act

On February 17, 2004 (69 Fed. Reg. 7390), the United States Environmental Protection Agency (USEPA) proposed amendments to the standards of performance for new stationary sources and emission guidelines for existing sources: commercial or industrial solid waste incineration units.

The USEPA specifically solicits public comment on definitions of “solid waste,” “commercial and industrial waste,” and “commercial and industrial solid waste incineration unit,” for purposes of new source performance standards and emission guidelines for commercial and industrial solid waste incineration (CISWI) units under section 129 of the Clean Air Act.

The rulemaking is based on amendments adopted by USEPA on December 1, 2000 (65 Fed. Reg. 75337), for CISWI units. To end a challenge in federal court, after promulgation of the final CISWI rule, USEPA accepted a voluntary remand, without vacature. Because the final CISWI rule was not vacated, its requirements remain in effect during the remand. Also, subsequent to promulgation of the final CISWI rule, USEPA granted a petition for reconsideration related to the definitions of “solid waste” and “commercial and industrial waste.” This notice provides for additional proceedings related to these definitions, consistent with USEPA's grant of the earlier petition for reconsideration.

Comments must be received on or before March 18, 2004 and should be sent to: Air and Radiation Docket and Information Center (6102T), Attention, Docket ID No. OAR-2003-0119, U.S. EPA, 1200 Pennsylvania Avenue, NW., Washington, DC 20460.

For further information contact Fred Porter at (919) 541-5251, Emission Standards Division (C439-01), U.S. Environmental Protection Agency, Research Triangle Park, NC 27711.

If any amendments to the Illinois air rules become necessary, the Board would expect the Illinois Environmental Protection Agency to propose amendments using the Clean Air Act “fast-track” procedures at Section 28.5 of the Environmental Protection Act (415 ILCS 5/28.5 (2002)).

Environmental Register – February 2004

United States Department of Justice Requests Public Comment on Amended Consent Decree in Federal Court Action Under the Comprehensive Environmental Response, Compensation and Liability Act Concerning Johns Manville Waukegan Disposal Site

On February 20, 2004 (69 Fed. Reg. 7982), the United States Department of Justice published notice that on February 11, 2004, a proposed First Amended Consent Decree (Amended Decree) in United States and People of the State of Illinois, ex rel. Madigan v. Manville Sales Corporation, Civil Action No. 88C 630, was lodged with the United States District Court for the Northern District of Illinois.

In this action, the United States asserted claims under 42 U.S.C. 9606 and 9607 to require Manville Sales Corporation, now known as Johns Manville, to perform certain response actions and to reimburse response costs incurred by the United States. These response costs and actions relate to releases and threatened releases of hazardous substances at the Johns Manville Waukegan Disposal Area in Waukegan, Illinois (the "Site"). The State of Illinois intervened in the action, which was resolved in March of 1988, through entry of a Consent Decree. Johns Manville agreed to perform a remedial action that the United States Environmental Protection Agency (USEPA) selected in a Record of Decision dated June 30, 1987. During construction of the remedy required under the 1988 Decree, USEPA issued two Explanations of Significant Differences approving changes to certain aspects of the remedy. The Amended Decree provides for implementation of these changes.

Requirements modified or added by the Amended Decree include: (1) requirements for cleanup of additional on-site areas where asbestos was discovered after entry of the 1988 Consent Decree; (2) revised design specifications for cover materials required in certain areas of the site; (3) provisions requiring excavation or capping of contaminated sediments in the Industrial Canal and closure of other on-site landfill areas and wastewater treatment system units used in Johns Manville's operations at the Site until 1998; (4) provisions restricting land use to prevent interference with the integrity or protectiveness of the remedy; and (5) provisions requiring that any subsequent conveyances of property at the Site be subject to environmental easements and restrictive covenants. The Amended Decree also updates various provisions of the Consent Decree to reflect more closely language of USEPA's RD/RA Model Consent Decree.

The Department of Justice will receive public comment on the Amended Decree until March 21, 2004. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, P.O. Box 7611, U.S. Department of Justice, Washington, DC 20044-7611, and should refer to United States v. Manville Sales Corporation, D.J. Ref. 90-11-1-7B.

The Amended Decree may be examined at the Office of the United States Attorney, 219 South Dearborn Street, Chicago, Illinois 60604, and at USEPA Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604. During the public comment period, the Amended Decree, may also be examined on the following Department of Justice Web site: <http://www.usdoj.gov/enrd/open.html>.

Rule Update

Board Adopts Second Notice Opinion and Order in Proposed Amendments to: Public Participation Rules In 35 Ill. Adm. Code 309 NPDES Permits And Permitting Procedures (R03-19)

On February 19, 2004, the Board adopted a second notice opinion and order in Proposed Amendments to: Public Participation Rules In 35 Ill. Adm. Code 309 NPDES Permits And Permitting Procedures (R03-19). The Board has sent the rulemaking, pursuant to the Illinois Administrative Procedure Act (5 ILCS 100/1-1 *et seq.* (2002)), to the Joint Committee on Administrative Rules (JCAR) for its review and approval. The proposed amendments will be considered at the March 23, 2004 JCAR meeting. The Board made two substantive changes to the proposal it adopted for first notice on September 4, 2003 (published in the *Illinois Register* at 27 Ill. Reg. 14765 (September 19, 2003)).

The second notice proposal incorporates suggestions from testimony and public comments generated during the first notice comment period and at the third public hearings held in this rulemaking on November 19, 2003. Testifiers

Environmental Register – February 2004

and commenters included: the proponents (Environmental Law and Policy Center of the Midwest, the Illinois Chapter of the Sierra Club, and the Prairie Rivers Network), Illinois Environmental Protection Agency (IEPA), Illinois Environmental Regulatory Group (IERG), Illinois American Water Company (IAWC), Illinois Coal Association (IAC), and the Illinois Association of Wastewater Agencies (IAWA). The issues raised in comments and at the hearing during first notice focused primarily on language in three Sections: 309.113(a)(5), 309.120, and 309.143.

The first substantive change made by the Board was generated by comments on Section 309.120. The participants in this rulemaking identified subsection 309.120(a) (4) as being confusing. The proponents agreed that this subsection could be deleted. In response to these comments, the Board deleted the proposed subsection 309.120(a)(4). Additional comments on this Section from ICA, IERG, and IAWA focused on the concern that reopening a comment period could delay the issuance of a permit, and questioned whether or not the IEPA will reopen the public comment period after an applicant submits additional information. The proponents also requested that the Board add some additional language to clarify the IEPA's authority to reopen a comment period. However, the Board stated in its opinion that the proposed language in the rules already states the criteria the IEPA will use in determining whether or not to reopen the comment period, and that if the submission of additional information from an applicant results in a permit which is not the logical outgrowth of the draft permit, IEPA will reopen the comment period pursuant to Section 309.120(a)(1)-(3).

The other substantive change to the rules was made in Section 309.143(a). In their comments ICA, IAWA, and IERG requested that the Board include federal language to explain an excursion or violation of a water quality standard. The Proponents agreed to the addition of the language. The Board added additional language from 40 CFR 122.44(d)(1)(i) to the proposed language at 309.143(a).

In Section 309.113(a)(5) IEPA asked that the Board strike the provision requiring a summary of changes for reissued permits. IAWA and IERG also asked that this requirement be dropped, stating that it might be too burdensome for the IEPA to comply with and still issue permits in a timely manner. The Proponents of the rulemaking commented that the language asks only for a summary of changes, not an itemized listing, and that in cases of numerous changes the IEPA could simply note that much of the permit has changed and advise the public to review the old and new permit. The Board did not make any changes to the language in Section 309.113(a)(5), finding that the proposed language clearly calls for a summary of the permit changes, and is not intended to require a detailed listing of all modifications.

The purpose of this rulemaking is to clarify rules for issuance of NPDES permits by the IEPA, including provisions for public participation. The proposal codifies the IEPA's existing practice when reviewing and issuing NPDES permits, requires additional information in NPDES permit fact sheets prepared for the public by IEPA, identifies when the public comment period can be reopened, requires control of pollutants and pollutant parameters that may potentially violate water quality standards, and requires reports adequate to determine compliance with monitoring requirements. The Board's rulemaking is based on the proposal filed by the Environmental Law and Policy Center of the Midwest, Illinois Chapter of the Sierra Club, Prairie Rivers Network, and 225 citizen petitioners (collectively "the proponents") on January 13, 2003.

Copies of the Board's opinion and order in R03-19 may be obtained by calling Dorothy Gunn at 312-814-3620, or by downloading copies from the Board's Web site at www.ipcb.state.il.us.

Chicago and Springfield, Illinois

Adjusted Standards

AS 04-1 In the Matter of: Petition of Crownline Boats, Inc. for an Adjusted Standard from 35 Ill. Adm. Code 215.301 – The Board accepted for hearing this Franklin County facility’s petition for an adjusted standard from the volatile organic material limitations. The Board granted petitioner’s motions for expedited review and for permission for attorney Dale A. Guariglia to appear *pro hac vice*. 4-0
Air

Administrative Citations

AC 04-19 IEPA v. Christopher Coleman – The Board granted complainant’s motion to reconsider, vacated the Board’s December 18, 2003 order and dismissed this administrative citation, and closed the docket. 4-0

AC 04-26 IEPA v. Charles Flick – The Board found that this Union County respondent violated Section 21(p)(1), (p)(3), and (p)(7) of the Act (415 ILCS 5/21(p)(1), (p)(3), (p)(7) (2002)), and ordered respondent to pay a civil penalty of \$4,500. 4-0

AC 04-28 IEPA v. American Disposal Services of Illinois, Inc. and David Bryant – The Board found that these Livingston County respondents violated Section 21(o)(12) of the Act (415 ILCS 5/21(o)(12) (2002)), and ordered respondents to pay a civil penalty of \$500. 4-0

AC 04-29 IEPA v. Charles Parker – The Board granted complainant’s motion for voluntary dismissal of this administrative citation involving a Logan County facility. 4-0

AC 04-30 IEPA v. Larry Lord – The Board found that this Marshall County respondent violated Section 21(p)(1) and (p)(7) of the Act (415 ILCS 5/21(p)(1), (p)(7) (2002)), and ordered respondent to pay a civil penalty of \$3,000. 4-0

AC 04-32 IEPA v. Rosemary Pehm – The Board accepted for hearing this petition for review of an administrative citation against this Marshall County respondent. 4-0

AC 04-34 IEPA v. Troy Williamson and Swords Vaneer & Lumber Company – The Board accepted for hearing two petitions for review of an administrative citation against these Henry County respondents. 4-0

AC 04-39 County of Jackson v. Edward Tow – The Board accepted for hearing this petition for review of an administrative citation against this Jackson County respondent. 4-0

Environmental Register – February 2004

Decisions

PCB 02-162	<u>People of the State of Illinois v. Fox Valley Dry Wall, Inc.</u> – The Board directed the parties to file with the Clerk information clarifying the authority on which the Board may rely in ordering payment of fees and costs to the specified fund in the stipulation by March 8, 2004.	4-0 L-E

RESTRICTED STATUS LIST

In order to comply with 35 Illinois Administrative Code Section 306.401, Illinois Pollution Control Board Regulations, the Illinois EPA has prepared the following list of facilities which are on Restricted Status. Restricted Status is defined as the Agency determination that a sewer or lift station has reached hydraulic capacity or that a sewage treatment plant has reached design capacity, such that additional sewer connection permits may no longer be issued without causing a violation of the Act or Regulations. Please note that the list is continually being revised to reflect the current situation. Therefore, if you have any questions on the capability of a treatment facility or transport system, please contact this Agency for a final determination. This listing reflects the status as of December 31, 2003.

Facility names followed by an asterisk (*) indicates that construction is underway to ultimately alleviate problems, which resulted in imposition of Restricted Status. Facilities followed by a double asterisk (**) are additions to the list.

<u>FACILITY NAME</u>	<u>RESPONSIBLE AUTHORITY</u>	<u>COUNTY</u>	<u>REMAINING CAPACITY</u>
Bonnie Brae Forest Manor SD STP	Bonnie Brae Forest Manor SD	Will	0

CRITICAL REVIEW LIST

In order to comply with 35 Illinois Administrative Code Section 306.401, Illinois Pollution Control Board Regulations, the Illinois Environmental Protection Agency has prepared the following list of facilities which are on Critical Review. Critical Review as defined as the Agency determination that a sewer or lift station is approaching hydraulic capacity or that a sewage treatment plant is approaching design capacity such that additional sewer connection permit applications will require close scrutiny to determine whether issuance would result in a violation of the Act or Regulations. Please note that these lists are continually being revised to reflect the current situation. Therefore, if you have any questions on the capability of a treatment facility or transport system, please contact the Agency for a final determination. This listing reflects the status as of December 31, 2003.

Facility names followed by a double asterisk (**) are additions to the list.

FACILITY <u>NAME</u>	RESPONSIBLE <u>AUTHORITY</u>	<u>COUNTY</u>	REMAINING <u>CAPACITY</u>	PE ADDED SINCE <u>LAST LIST</u>
