AREAS AND ITEMS INSPECTED <input type="checkbox"/> CONTINUED ON NEXT PAGE		37. NARRATIVE <p>Mr. Tang of the CWRP Sewer Control group contacted the undersigned to explain that he had received a citizen's complaint from Mr. Raisutis. He said that Mr. Raisutis reported seeing a greater number than usual of large, dead Carp floating down the center of the Cal Sag Channel over the previous weekend. (6/18-6/19/2005)</p> <p>The undersigned PCO responded to the location of the complaint, met with, and interviewed Mr. Raisutis. He said that he had seen approximately 10-20 dead fish in the last 2 days. Nothing else had appeared abnormal. No dead small fish was observed; only large, dead Carp. No unusual colors or odors were detected in the channel. Nothing else appeared to be out of the ordinary.</p> <p>The PCO inspected the channel from its bank with Mr. Raisutis; no dead fish or other abnormalities were observed during the inspection. The PCO explained to him that the waterway is regularly monitored for water quality under the District's Ambient Water Quality Program, and speculated that in all likelihood the fish had died due to natural causes. The PCO also told Mr. Raisutis that the District's Aquatic Biology Unit would be informed of his observations, and that the IWD Marine and Monitoring Unit (M&M) will give special attention to his complaint during their regular patrols and monitoring of the waterway. He said that he just wanted to alert us that a possibly serious abnormal situation that may be beginning.</p> <p>The PCO contacted District fish specialist, Sam Denison, and informed him of the complaint. He explained that this was the first he had heard of dead Carp in the area but would give it his attention. He also speculated that more likely than not, the deaths were due to natural causes. The recent severe dry weather has stressed the entire ecosystem. He appreciated the notification.</p> <p>The PCO contacted S. Sopcak-Phelan, Ken Johnson, and A. Wilczak of the M&M Unit. All said they had received no reports from their crews of dead fish. All said they would direct the monitoring crews to pay special attention to the problem and report their observations.</p> <p>No further action was taken; the area will be kept under surveillance.</p>
