**METROPOLITAN WATER RECLAMATION DISTRICT OF
GREATER CHICAGO'S PRE-FILED QUESTIONS TO
CARL ADAMS AND ROBIN GARIBAY**

1. On Page 11 of your report concerning Financial and Environmental Impact for Disinfection, what is the design flow that was used to evaluate the financial and environmental impact for disinfection?
2. In your professional opinion, how would the cost and impact increase if the treated flow were 100 times greater?
3. How would the chemical usage increase if the treated flow were 100 times greater?
4. In your report, you state that one of the reasons to choose a closed-circuit cooling tower for lowering the temperature is that an open-circuit cooling tower has the potential for fouling. Do you think that this potential for fouling still exists if the treated wastewater is disinfected before the cooling, as shown in Figure 6, Bacteria, DO and Temperature Treatment?

Electronic Filing - Received, Clerk's Office, August 25, 2008

5. If fouling occurs, does that mean that bacteria will be discharged to the CAWS with the treated wastewater?

Dated: August 25, 2008

Respectfully submitted,
