Illinois Environmental Protection Agency
Narrative Inspection Report

Site #: 1010255005

Date: October 17, 2008

County: Lawrence

Inspector: G.E. Steele & B. Gher

Subject: St. Francisville/Codgill, Terry

This site was visited as the result of a complaint. Bob Gher, Ambraw Valley Solid Waste, accompanied me on this inspection. The property is located on the southeast corner of Eighth and Johnson Streets in St. Francisville. The lot measures about 50 yards. A home is located on the lot. According to County records, the home covers about 1100 sq. feet. A majority of the rest of the property contained wastes, including metal wastes. Other wastes included construction/demolition debris, and tires. Indications of open burning were also seen. The house appeared abandoned. The newspaper box contained several newspapers. The newest one was from October 18, 2007. A trailer containing a metal shed was parked on the west central part of the site. It had a valid registration sticker. No other vehicle or trailer on the site was observed with valid registration. Due to the tall grass under and adjacent to this trailer, it did not appear to have been moved for some time. Items were thrown haphazardly throughout the property with very little resemblance to order observed. A boat was seen on the north side of the house. Fresh and decomposing leaf litter upside the boat was thick enough that a maple tree sapling was growing inside of it. Evidence of open burning of wood and tires was seen on the north central part of the site. It measured approximately 4 yds. x 3 yds. Indicators that the waste had been burned here (charred ground underneath, concentric rings of wire from the tire seals) was seen. All of the metal wastes were exposed to the elements. Weeds and brush were growing immediately adjacent, and some times through the wastes. Windows were broken, or doors were open or missing on the vehicle seen here. A dead tree had fallen on some of the metal waste. Vehicles were seen almost totally overgrown by vegetation. Trees

were observed growing through the wastes.

The following conditions, which constitute open dumping, were observed:

Line 1, 2, 3. Causing Air Pollution: cause or allow open burning; cause , threaten or allow air pollution:
Evidence of onsite open burning was seen in the north central part of the site.

Line 5. Cause or allow open dumping: Metal wastes, tires and other debris were scattered covering most of this piece of property. The materials, including vehicle interiors, were exposed to the elements. Weeds, tall grass, and trees were growing adjacent to, or in, the accumulations of metal waste. The materials were not in use, not usable in their current condition, and were not being protected for future use. These materials were not being removed on a regular basis, as some items were nearly overgrown by vegetation. Vehicles and trailers were seen with their tires sinking into the dirt; they had been there that long.

Line 6, 7, 10. Conducting a waste disposal operation without a permit, disposing of wastes at a site that does not meet Act requirements. Failure to submit a permit application: Wastes have been brought in from off-site. These included highway warning markers, commercial shelving, oil field pipe and military shipping containers. A review of Regional records does not show that a permit was applied for nor issued.

Line 8(1) and (3). Open dumping allowing litter and open burning: The metal wastes at this location are very unsightly. The materials are not in use, useable in their current condition and not being protected for future use. They include vehicles, shipping containers, pipe, shelving, motors, appliances, sinks and other wastes. Open burning had occurred on the north central part of the site. The ground was charred underneath the ash. Concentric tire beads were observed had been burned.

Line 9. Cause or allow the open dumping of a used tire: Over 20 waste tires, primarily on rim, were scattered in the western yard of this house.

The only people we spoke to during this inspection were neighbors, who talked of how unsightly the site was.

Records of the Lawrence County Courthouse show the property is owned by the Gilbert and Mary Codgill estate, William A. Codgill the executor, at P.O. Box 52, 903 Main Street, Lawrenceville, IL, 62460.
