ILLINOIS ENVIRONMENTAL PROTECTION AGENCY MEMORANDUM

DATE: April 13, 2009

TO: DLPC / Division File

FROM: Paul Eisenbrandt, DLPC/FOS Springfield Region

SUBJECT: LPC #0010650031 – Adams County
Quincy/Blicks Construction Co. Inc.
FOS File

INSPECTION DATE: March 17, 2009

The purpose of this memorandum is to serve as the Narrative Inspection Report Document of a March 17, 2009 inspection of the above referenced site. Blicks Construction Co. Inc. is managed by Mr. C. John Blickhan and operates on property owned by The Blickhan Family Corporation, Inc. (See attached corporation file detail reports for information about these two corporations.)

While performing the inspection, open dumping and open burning of on-site generated construction and demolition debris (i.e. a construction trailer) was observed. Also, fill material that does not meet the definition of clean construction and demolition debris in accordance with Section 3.160(b) was observed in the Construction Fill Area.

This inspection took place from approximately 11:20 am to 12:10 pm, and twelve digital photographs were taken. The weather at the time of the inspection was sunny and about 74°F with a 5 mph wind from the south. Mr. C. John Blickhan (owner) and Ms. Lori Graupman (office staff) were interviewed during the inspection.

Photograph 001 shows three inoperable vehicles observed in the material storage yard. These vehicles should be fixed or properly recycled.

Photograph 002 shows an office desk and a charred scrap metal debris pile. The charred waste was observed on the construction fill area. Mr. Blickhan should be well aware that open burning of waste, other than landscape waste, is prohibited in the State of Illinois.

Photograph 003 shows plywood, floor tile, glass, steel, fiberglass, melted plastic, electrical wire and ash were among the charred debris observed at Blicks Construction fill area. Mr. Blickhan claimed on April 13, 2009, during a phone conversation with the inspector, a wind storm had destroyed the construction office trailer. Mr. Blickhan stated he had pulled the partially destroyed construction trailer over and set it on fire so he could recycle the metals. The fire was used as a method to separate the recyclable metals from the non-recyclable debris contained in the construction trailer. Mr. Blickhan claimed he knew he could not burn on the landfill but did not know he could not burn on the adjacent property. He asked the inspector "How else would

you separate the materials.” The inspector reminded Mr. Blickhan that landscape waste, which grew on the property, is the only thing that can be open burned at this site.

Photograph 004 shows a debris pile containing mostly of scrap metal. Mr. Blickhan stated during the April 13, 2009 phone conversation that the waste had been all cleaned up.

Photographs 005 and 006 show charred debris that includes fiberglass insulation, an aluminum can, foam, wires, electrical hardware, rusty metal, melted plastic, and miscellaneous wastes.

Photographs 007 shows a 55-gallon drum full of concrete which cannot be used as fill.

Photograph 008 shows rusty anchor tabs protruding from a concrete slab and several sections of crushed rusty metal culverts. This material cannot be used as fill.

Photographs 009 and 010 show mangled pieces of rebar and concrete with rebar attached. This material does not meet the definition of clean construction and demolition debris in accordance with Section 3.160(b). Photographs 007 through 010 were taken along the northern fill boundary. The demolition waste and must be disposed of properly.

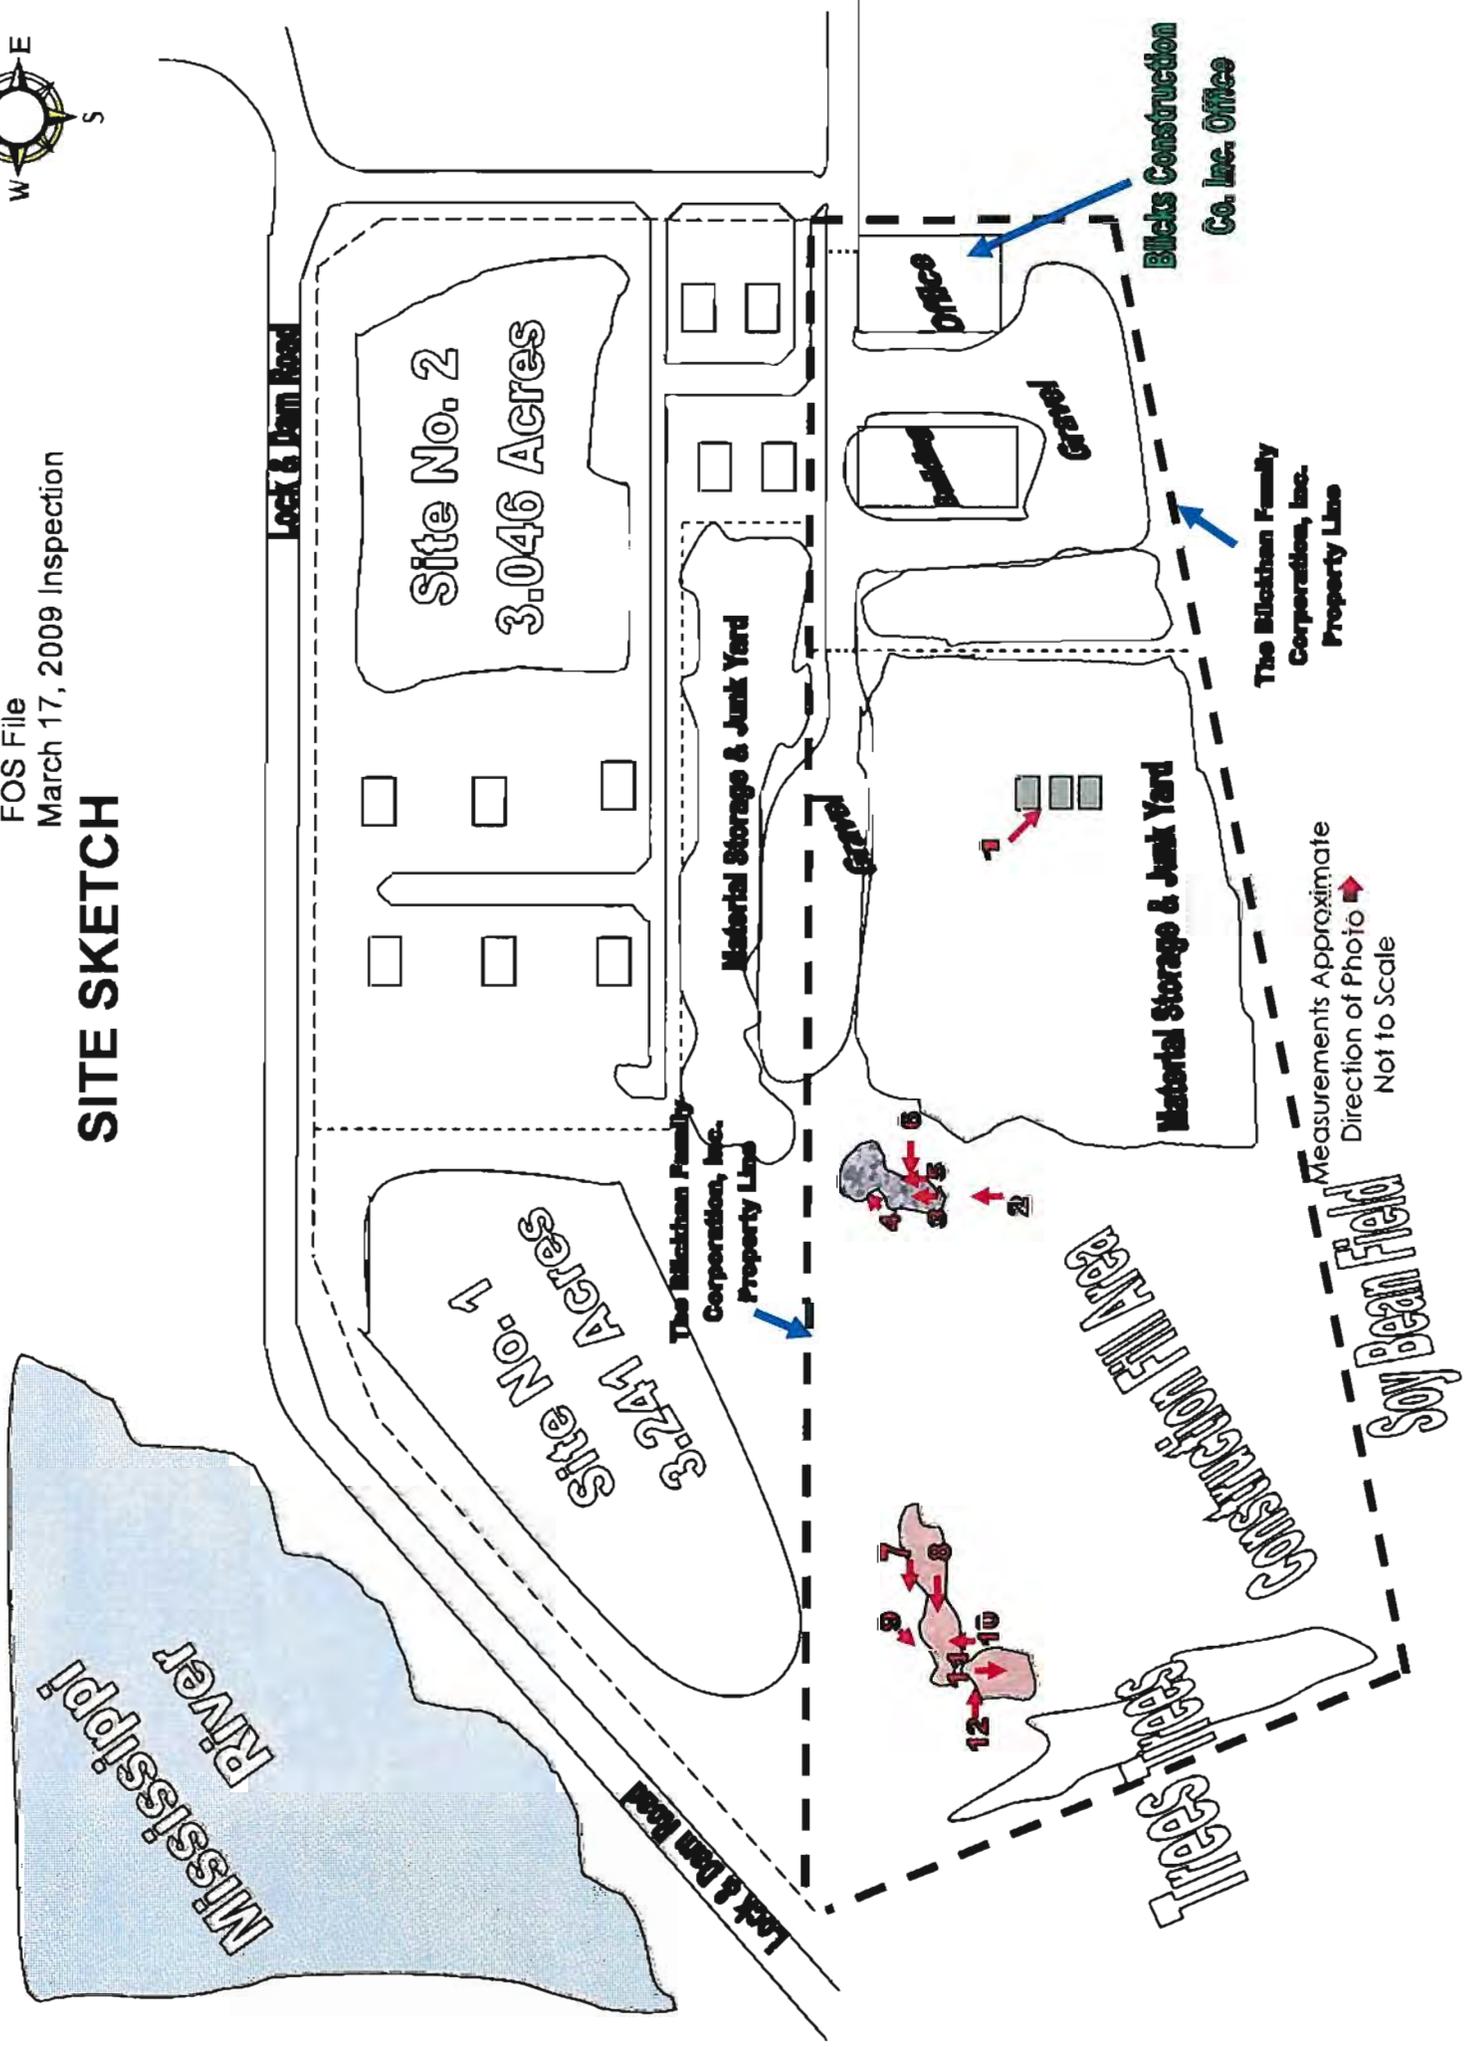

Photographs 011 and 012 show red brick and mortar debris dumped along the western edge of the fill boundary. Photograph 011 shows the surface water has been stained red. Photograph 012 shows plastic debris intermixed with the material used as fill. The plastic sheeting must be removed and properly disposed.

The apparent violations concerning open dumping, open burning, and deposition of general construction or demolition debris observed at Blicks Construction are indicated on the attached Open Dump Inspection Checklist. A site sketch and digital photographs accompany this narrative.
