Inspection Report Narrative

This site was inspected on May 21, 2010 between 2:25 p.m. and 2:55 p.m. by Laurie Rasmus (author of this report), representing the Macon County Environmental Management Department. Weather conditions at the time of the inspection were cloudy skies, 17 mph east winds and an air temperature near 72 degrees Fahrenheit. Significant rain events had occurred in the past few days. Eleven photographs were taken and no samples were collected. No persons were observed on the property. Dale Pugsley was interviewed on May 21, 2010 during a telephone conversation prior to the inspection.

General Information/Site History

The property is in the Blue Mound Township of Macon County at 6357 S. Memorial Dr., Blue Mound, Illinois. The initial inspection of March 26, 2010 was conducted in response to a complaint of open dumping and open burning. The initial inspection cited violations for open dumping waste, construction and demolition waste and waste tires. Open burning violations were also cited. An Administrative Citation Warning Notice (ACWN) was issued on April 6, 2010.

This inspection of May 21, 2010 was to determine compliance with the Act and Regulations and in response to a second complaint that was received on May 14, 2010 of open dumping and open burning.

Property Ownership

The rural, property of approximately two acres is owned by Dale Pugsley who resides off site. This information was obtained from the Macon County Supervisor of Assessments Office and through an interview with Dale Pugsley.

Pre-Inspection Findings

At 1:36 p.m. on May 21, 2010, I telephoned Dale Pugsley. I explained to Mr. Pugsley that I would be conducting a follow-up inspection to determine compliance at the site. I asked Mr. Pugsley if work had been completed at the site and if the site was prepared for a follow-up inspection. Mr. Pugsley said that the site had been cleaned-up and was ready for inspection. I began to review the legal issues surrounding open

dumping and open burning. Mr. Pugsley said that he understood the prohibitions and the allowance to burn landscape waste that was generated from the site. I mentioned that I had received a complaint that he was open burning at the site on May 14, 2010. Mr. Pugsley replied that he was burning brush that day and stated the allowance to burn landscape waste generated from the site.

Inspection Findings

On May 21, 2010 at 2:25 p.m., I arrived at the above referenced site and parked in the eastern section of the parcel. I walked to Area A where I had previously observed open dumping and open burning during the initial inspection. The majority of waste and material that was present in the area during the initial inspection had been removed (photos 1-2). Waste items present in Area A included but were not limited to: rusty steel straps and wires, asphalt chunks, bricks and charred dimensional lumber pieces. Tire impressions were through the area.

Walking west, I observed a second area, Area B (photos 3-6), which appeared to be a point of open dumping and open burning. During the initial inspection in March, this area did not have the appearance of being an area of an open dump or where open burning had occurred. An observation of the area included but was not limited to: charred dimensional lumber, a melted plastic trash can lid, charred ceramic tile, metal electrical pieces that were rusted and charred, metal castors with rubber wheels that appeared to be burned, crib pieces that were partially burned, a rusty aerosol can and ceiling tile pieces. The area was approximately thirty feet in diameter and no more than two feet high at its highest point. Along the northern edge of Area B, a tank and its stand were lying on the ground along with a plastic bucket and a black case (photo 7).

To the northeast, in Area C, the accumulation of eighteen waste tires that was observed during the March inspection appeared to be undisturbed (photo 8-9). A number of the tires contained an accumulation of water. The tires were without rims. Other items that were present in Area C included but were not limited to: two lawn rolling units, a plastic bucket, stacked dimensional lumber and a pallet.

Returning to the east, I walked through Area A (photo 10) and into the center section of the parcel (photo 11). I returned to my vehicle on the lane in the eastern section of the parcel, concluded the inspection and drove from the property.
