Thank you for your First Notice which recognizes that the Chicago Area Waterways (CAWS) and Lower Des Plaines River are being used for recreational purposes. I support Illinois EPA's proposal to require disinfection at MWRD sewage plants, and to protect aquatic life in these waters from thermal pollution.

The Chicago River has been a pathway for pathogens for too long! Running through the heart of the Chicago Region the river has long been denied some of the basic goals of the Clean Water Act namely that all waters should be "drinkable, swimmable and fishable." Failure to disinfect sewage from all Metropolitan Water Reclamation District (MWRD) treatment plants put both people and wildlife at risk of becoming ill.

The Chicago Area Waterways and Lower Des Plaines River are important Illinois resources. As you move forward with the rulemaking process, I urge you to require MWRD to disinfect the sewage it discharges to these waterways.

Sincerely,

Mr. Adam Eiden
131 Winddance Dr

Running through the heart of the Chicago Region the river has long been denied some of the basic goals of the Clean Water Act namely that all waters should be "drinkable, swimmable and fishable." Failure to disinfect sewage from all Metropolitan Water Reclamation District (MWRD) treatment plants put both people and wildlife at risk of becoming ill.

The river is a long changing living peice of the world. That special thing that makes life sustaniable for many years for to come. The fastest way to ruin something is to do too much of one thing. Right now it is the most important part of life and the way things are going it could be gone in an instant.

Please take important steps for human and animal existance and please don't fail us. We all will be here longer than the stinking factory farm. One day you will realize the evil you brought to the world and supporting easy ways to do things is not always best!

Please stand up to the big company to eliminate harmful by products from them. We all will stand behind you to do so.

The Chicago Area Waterways and Lower Des Plaines River are important Illinois resources. As you move forward with the rulemaking process, I urge you to require MWRD to disinfect the sewage it discharges to these waterways.

Sincerely,
