NOTICE OF ADOPTED AMENDMENTS

- 1) At Section 211.493, the Board added a definition of “antifouling sealer/tie coat.”
- 2) At Section 211.2200, the Board amended the definition of “extreme high-gloss coating” by amending the gloss level.

The Board’s opinion and order adopting these rules addresses changes made by the Board in proceeding from first notice to final adoption. *See Reasonably Available Control Technology (RACT) for Volatile Organic Material Emissions from Group II and Group IV Consumer & Commercial Products: Proposed Amendments to 35 Ill. Adm. Code 211, 218, and 219, R11-23 (July 21, 2011).* Copies of the Board’s opinions and orders may be requested from the Clerk at the address listed in #8 above or by calling 312-814-3620. Please refer to docket number R11-23 in your request. The Board’s opinion and order is also available through the Board’s Web site (www.ipcb.state.il.us).

- 12) Have all the changes agreed upon by the agency and JCAR been made as indicated in the agreements letter issued by JCAR? Yes.
- 13) Will these amendments replace emergency amendments currently in effect? No.
- 14) Are there any amendments pending on this Part? No.
- 15) Summary and Purpose of Amendments: The Agency proposed amendments to satisfy Illinois’ obligation to submit a State Implementation Plan (SIP) addressing sources of volatile organic material (VOM) emissions in areas designated as nonattainment with respect to the National Ambient Air Quality Standard (NAAQS) for ozone. Nonattainment designations trigger Clean Air Act (CAA) requirements to adopt regulations that reduce emissions sufficiently to demonstrate attainment of the standard.

The Agency states that the CAA requires states to revise SIPs to include reasonably available control technology (RACT) for sources of VOM emissions covered by a control techniques guideline (CTG) issued between November 15, 1990, and the date of attainment. The Agency reports that USEPA issued final CTGs for Group II Consumer and Commercial Products on October 5, 2006 and for Group IV Consumer and Commercial Products on October 7, 2008. USEPA required submission of SIP revisions responding to the CTGs within one year.

Responding to the CTGs, the Agency proposed amendments to the VOM regulations, which the Board adopted in docket R10-8 and R10-20 in 2010. The Agency submitted the adopted rules to the USEPA on July 29, 2010, and requested that USEPA approve them as amendments to Illinois’ SIP. USEPA determined that the adopted revisions were

ILLINOIS REGISTER

POLLUTION CONTROL BOARD

NOTICE OF ADOPTED AMENDMENTS

insufficient and that USEPA would not approve them without additional amendments. The Agency's proposal addressed the issues specified by USEPA and proposed additional changes to clarify and simplify some provisions.

According to the Agency, Illinois is required to submit these SIP revisions before the USEPA can re-designate the Chicago and Metro East nonattainment areas to attainment of the 1997 ozone NAAQS. The Agency submitted an attainment demonstration for the Metro East nonattainment area on July 2, 2007, and for the Chicago nonattainment area on March 19, 2009. The Agency stresses that these areas cannot be re-designated unless and until the it submits USEPA's required amendments as SIP revisions and USEPA approves such revisions.

In Part 211, the Agency originally proposed to add 6 new definitions and amend 1 existing definition for terms employed in Parts 218 and 219. As noted above under #11, the Board has responded to the Agency by adding a definition of one other term and amending one other existing definition.

- 16) Information and questions regarding these adopted amendments shall be directed to:
