

## POLLUTION CONTROL BOARD

## NOTICE OF PROPOSED AMENDMENTS

- 1) Heading of the Part: Standards for the Management of Specific Hazardous Waste and Specific Types of Hazardous Waste Management Facilities
- 2) Code Citation: 35 Ill. Adm. Code 726
- 3) 

|                         |                         |
|-------------------------|-------------------------|
| <u>Section Numbers:</u> | <u>Proposed Action:</u> |
| 726.200                 | Amend                   |
| 726.APPENDIX E          | Amend                   |
- 4) Statutory Authority: 415 ILCS 5/7.2, 22.4, and 27
- 5) A Complete Description of the Subjects and Issues Involved: The amendments to Part 726 are a single segment of the docket R13-15 rulemaking that also affects 35 Ill. Adm. Code 703, 704, 720, 722, 724, 725, 727, 728, and 738, each of which is covered by a separate notice in this issue of the *Illinois Register*. To save space, a more detailed description of the subjects and issues involved in the docket R13-15 rulemaking in this issue of the *Illinois Register* only in the answer to question 5 in the Notice of Adopted Amendments for 35 Ill. Adm. Code 703. A comprehensive description is contained in the Board's opinion and order of June 20, 2013, proposing amendments in docket R13-15, which opinion and order is available from the address below.

RECEIVED  
CLERK'S OFFICE  
JUL 03 2013  
STATE OF ILLINOIS  
Pollution Control Board

Specifically, the amendments to Part 726 implement corrections suggested by USEPA and make corrections that the Board has determined are needed. The Board's opinion and order of June 20, 2013 in docket R13-15 discusses the more substantial corrections made in the text. Tables that appear in that opinion and order list all of the various corrections and amendments included in this proceeding. Persons interested in the details of those corrections and amendments should refer to the June 20, 2013 opinion and order in docket R13-15.

Section 22.4 of the Environmental Protection Act [415 ILCS 5/22.4] provides that Section 5-35 of the Administrative Procedure Act [5 ILCS 100/5-35] does not apply to this rulemaking. Because this rulemaking is not subject to Section 5-35 of the APA, it is not subject to First Notice or to Second Notice review by the Joint Committee on Administrative Rules (JCAR).

- 6) Published studies or reports, and sources of underlying data, used to compose this rulemaking: None
- 7) Will this rulemaking replace any emergency rulemaking currently in effect? No

## POLLUTION CONTROL BOARD

## NOTICE OF PROPOSED AMENDMENTS

- 8) Does this rulemaking contain an automatic repeal date? No
- 9) Does this rulemaking contain incorporations by reference? No. The centralized location of all incorporations by reference for the purposes of all of the Illinois hazardous waste and underground injection control regulations, including Part 726, is 35 Ill. Adm. Code 720.111.
- 10) Statement of Statewide Policy Objectives: This rulemaking does not create or enlarge a State mandate, as defined in Section 3(b) of the State Mandates Act. [30 ILCS 805/3(b) (2010)].
- 11) Are there any other rulemakings pending on this Part? No
- 12) Time, Place and Manner in which interested persons may comment on this rulemaking: The Board will accept written public comment on this proposal for a period of 45 days after the date of this publication. Comments should reference docket R13-15 and be addressed to:

John T. Therriault, Assistant Clerk  
Illinois Pollution Control Board  
State of Illinois Center, Suite 11-500  
100 W. Randolph St.  
Chicago, IL 60601

Please direct inquiries to the following person and reference docket R13-15:

Michael J. McCambridge  
Staff Attorney  
Illinois Pollution Control Board  
100 W. Randolph 11-500  
Chicago, IL 60601

Phone: 312/814-6924

## POLLUTION CONTROL BOARD

## NOTICE OF PROPOSED AMENDMENTS

13) Initial regulatory flexibility analysis:

- A) Types of small businesses, small municipalities, and not-for-profit corporations affected: This rulemaking may affect those small businesses, small municipalities, and not-for-profit corporations that generate, transport, treat, store, or dispose of hazardous waste. These proposed amendments do not create or enlarge a State mandate, as defined in Section 3(b) of the State Mandates Act. [30 ILCS 805/3(b) (2010)].
- B) Reporting, bookkeeping or other procedures required for compliance: The existing rules and proposed amendments require extensive reporting, bookkeeping and other procedures, including the preparation of manifests and annual reports, waste analyses and maintenance of operating records. These proposed amendments do not create or enlarge a State mandate, as defined in Section 3(b) of the State Mandates Act. [30 ILCS 805/3(b) (2010)].
- C) Types of Professional skills necessary for compliance: Compliance with the existing rules and proposed amendments may require the services of an attorney, certified public accountant, chemist, and registered professional engineer. These proposed amendments do not create or enlarge a State mandate, as defined in Section 3(b) of the State Mandates Act. [30 ILCS 805/3(b) (2010)].

14) Regulatory Agenda on which this rulemaking was summarized: December 2012

The full text of the Proposed Amendments begins on the next page:

~~NOTICE OF PROPOSED AMENDMENTS~~

TITLE 35: ENVIRONMENTAL PROTECTION  
SUBTITLE G: WASTE DISPOSAL  
CHAPTER I: POLLUTION CONTROL BOARD  
SUBCHAPTER c: HAZARDOUS WASTE OPERATING REQUIREMENTS

PART 726  
STANDARDS FOR THE MANAGEMENT OF SPECIFIC HAZARDOUS WASTE AND  
SPECIFIC TYPES OF HAZARDOUS WASTE MANAGEMENT FACILITIES

SUBPART A: GENERAL

Section  
726.102      Electronic Reporting

SUBPART C: RECYCLABLE MATERIALS USED IN A  
MANNER CONSTITUTING DISPOSAL

Section  
726.120      Applicability  
726.121      Standards Applicable to Generators and Transporters of Materials Used in a  
Manner that Constitutes Disposal  
726.122      Standards Applicable to Storers, Who Are Not the Ultimate Users, of Materials  
that Are To Be Used in a manner that Constitutes Disposal  
726.123      Standards Applicable to Users of Materials that Are Used in a Manner that  
Constitutes Disposal

SUBPART D: HAZARDOUS WASTE BURNED FOR ENERGY RECOVERY

Section  
726.130      Applicability (Repealed)  
726.131      Prohibitions (Repealed)  
726.132      Standards applicable to generators of hazardous waste fuel (Repealed)  
726.133      Standards applicable to transporters of hazardous waste fuel (Repealed)  
726.134      Standards applicable to marketers of hazardous waste fuel (Repealed)  
726.135      Standards applicable to burners of hazardous waste fuel (Repealed)  
726.136      Conditional exemption for spent materials and by-products exhibiting a  
characteristic of hazardous waste (Repealed)

SUBPART E: USED OIL BURNED FOR ENERGY RECOVERY

~~NOTICE OF PROPOSED AMENDMENTS~~

|         |  |
|---------|--|
| Section |  |
| 726.140 | Applicability (Repealed)   |
| 726.141 | Prohibitions (Repealed)  |
| 726.142 | Standards applicable to generators of used oil burned for energy recovery (Repealed) |
| 726.143 | Standards applicable to marketers of used oil burned for energy recovery (Repealed)  |
| 726.144 | Standards applicable to burners of used oil burned for energy recovery (Repealed)    |

SUBPART F: RECYCLABLE MATERIALS UTILIZED FOR  
PRECIOUS METAL RECOVERY

|         |                                |
|---------|--------------------------------|
| Section |                                |
| 726.170 | Applicability and Requirements |

SUBPART G: SPENT LEAD-ACID BATTERIES BEING RECLAIMED

|         |                                |
|---------|--------------------------------|
| Section |                                |
| 726.180 | Applicability and Requirements |

SUBPART H: HAZARDOUS WASTE BURNED IN BOILERS  
AND INDUSTRIAL FURNACES

|         |   |
|---------|---|
| Section |   |
| 726.200 | Applicability                                       |
| 726.201 | Management Prior to Burning                         |
| 726.202 | Permit Standards for Burners                        |
| 726.203 | Interim Status Standards for Burners                |
| 726.204 | Standards to Control Organic Emissions              |
| 726.205 | Standards to Control PM                             |
| 726.206 | Standards to Control Metals Emissions               |
| 726.207 | Standards to Control HCl and Chlorine Gas Emissions |
| 726.208 | Small Quantity On-Site Burner Exemption             |
| 726.209 | Low Risk Waste Exemption                            |
| 726.210 | Waiver of DRE Trial Burn for Boilers                |
| 726.211 | Standards for Direct Transfer                       |
| 726.212 | Regulation of Residues                              |
| 726.219 | Extensions of Time                                  |

SUBPART M: MILITARY MUNITIONS

~~NOTICE OF PROPOSED AMENDMENTS~~

|         |  |
|---------|--|
| Section |  |
| 726.300 | Applicability  |
| 726.301 | Definitions  |
| 726.302 | Definition of Solid Waste  |
| 726.303 | Standards Applicable to the Transportation of Solid Waste Military Munitions   |
| 726.304 | Standards Applicable to Emergency Responses                                    |
| 726.305 | Standards Applicable to the Storage of Solid Waste Military Munitions          |
| 726.306 | Standards Applicable to the Treatment and Disposal of Waste Military Munitions |

SUBPART N: CONDITIONAL EXEMPTION FOR LOW-LEVEL MIXED WASTE  
STORAGE, TREATMENT, TRANSPORTATION AND DISPOSAL

|                |  |

SUBPART H: HAZARDOUS WASTE BURNED IN BOILERS  
AND INDUSTRIAL FURNACES

**Section 726.200 Applicability**

- a) The regulations of this Subpart H apply to hazardous waste burned or processed in a boiler or industrial furnace (BIF) (as defined in 35 Ill. Adm. Code 720.110) irrespective of the purpose of burning or processing, except as provided by subsections (b), (c), (d), (g), and (h) of this Section. In this Subpart H, the term "burn" means burning for energy recovery or destruction or processing for materials recovery or as an ingredient. The emissions standards of Sections 726.204, 726.205, 726.206, and 726.207 apply to facilities operating under interim status or under a RCRA permit, as specified in Sections 726.202 and 726.203.
- b) Integration of the MACT standards.
  - 1) Except as provided by subsections (b)(2), (b)(3), and (b)(4) of this Section, the standards of this Part do not apply to a new hazardous waste boiler or industrial furnace unit that becomes subject to RCRA permit requirements after October 12, 2005; or no longer apply when an owner or operator of an existing hazardous waste boiler or industrial furnace unit demonstrates compliance with the maximum achievable control technology (MACT) requirements of federal subpart EEE of 40 CFR 63 (National Emission Standards for Hazardous Air Pollutants from Hazardous Waste Combustors), incorporated by reference in 35 Ill. Adm. Code 720.111(b), by conducting a comprehensive performance test and submitting to the Agency a Notification of Compliance, pursuant to 40 CFR 63.1207(j) (What are the performance testing requirements?) and 63.1210(d) (What are the notification requirements?), documenting compliance with the requirements of federal subpart EEE of 40 CFR 63. Nevertheless, even after this demonstration of compliance with the MACT standards, RCRA permit conditions that were based on the standards of this Part will continue to be in effect until they are removed from the permit or the permit is terminated or revoked, unless the permit expressly provides otherwise.

NOTICE OF PROPOSED AMENDMENTS

- 2) The following standards continue to apply:
  - A) If an owner or operator elects to comply with 35 Ill. Adm. Code 703.320(a)(1)(A) to minimize emissions of toxic compounds from startup, shutdown, and malfunction events, Section 726.202(e)(1), requiring operations in accordance with the operating requirements specified in the permit at all times that hazardous waste is in the unit, and Section 726.202(e)(2)(C), requiring compliance with the emission standards and operating requirements, during startup and shutdown if hazardous waste is in the combustion chamber, except for particular hazardous wastes. These provisions apply only during startup, shutdown, and malfunction events;
  - B) The closure requirements of Sections 726.202(e)(11) and 726.203(l);
  - C) The standards for direct transfer of Section 726.211;
  - D) The standards for regulation of residues of Section 726.212; and
  - E) The applicable requirements of Subparts A through H, BB, and CC of 35 Ill. Adm. Code 724 and 725.
  
- 3) The owner or operator of a boiler or hydrochloric acid production furnace that is an area source under 40 CFR 63.2, incorporated by reference in 35 Ill. Adm. Code 720.111(b) (as 40 CFR 63), that has not elected to comply with the emission standards of 40 CFR 63.1216, 63.1217, and 63.1218, incorporated by reference in 35 Ill. Adm. Code 720.111(b) (as subpart EEE of 40 CFR 63), for particulate matter, semivolatile and low volatile metals, and total chlorine, also remains subject to the following requirements of this Part:
  - A) Section 726.205 (Standards to Control PM);
  - B) Section 726.206 (Standards to Control Metals Emissions); and
  - C) Section 726.207 (Standards to Control HCl and Chlorine Gas Emissions).

**NOTICE OF PROPOSED AMENDMENTS**

- 4) The particulate matter standard of Section 726.205 remains in effect for a boiler that elects to comply with the alternative to the particulate matter standard under 40 CFR 63.1216(e) and 63.1218, each incorporated by reference in 35 Ill. Adm. Code 720.111(b) (as subpart EEE of 40 CFR 63).

BOARD NOTE: Sections 9.1 and 39.5 of the Environmental Protection Act [415 ILCS 5/9.1 and 39.5] make the federal MACT standards directly applicable to entities in Illinois and authorize the Agency to issue permits based on the federal standards. In adopting this subsection (b), USEPA stated as follows (at 64 Fed Reg. 52828, 52975 (November 30, 1999)):

Under [the approach adopted by USEPA as a] final rule, MACT air emissions and related operating requirements are to be included in title V permits; RCRA permits will continue to be required for all other aspects of the combustion unit and the facility that are governed by RCRA (e.g., corrective action, general facility standards, other combustor-specific concerns such as materials handling, risk-based emissions limits and operating requirements, as appropriate, and other hazardous waste management units).

- c) The following hazardous wastes and facilities are not subject to regulation pursuant to this Subpart H:
  - 1) Used oil burned for energy recovery that is also a hazardous waste solely because it exhibits a characteristic of hazardous waste identified in Subpart C of 35 Ill. Adm. Code 721. Such used oil is subject to regulation pursuant to 35 Ill. Adm. Code 739, rather than this Subpart H;
  - 2) Gas recovered from hazardous or solid waste landfills, when such gas is burned for energy recovery;
  - 3) Hazardous wastes that are exempt from regulation pursuant to 35 Ill. Adm. Code 721.104 and 721.106(a)(3)(C) and (a)(3)(D) and hazardous wastes that are subject to the special requirements for conditionally exempt small quantity generators pursuant to 35 Ill. Adm. Code 721.105; and
  - 4) Coke ovens, if the only hazardous waste burned is USEPA hazardous waste no. K087 decanter tank tar sludge from coking operations.
- d) Owners and operators of smelting, melting, and refining furnaces (including

**NOTICE OF PROPOSED AMENDMENTS**

pyrometallurgical devices, such as cupolas, sintering machines, roasters, and foundry furnaces, but not including cement kilns, aggregate kilns, or halogen acid furnaces burning hazardous waste) that process hazardous waste solely for metal recovery are conditionally exempt from regulation pursuant to this Subpart H, except for Sections 726.201 and 726.212.

- 1) To be exempt from Sections 726.202 through 726.211, an owner or operator of a metal recovery furnace or mercury recovery furnace must comply with the following requirements, except that an owner or operator of a lead or a nickel-chromium recovery furnace or a metal recovery furnace that burns baghouse bags used to capture metallic dust emitted by steel manufacturing must comply with the requirements of subsection (d)(3) of this Section, and an owner or operator of a lead recovery furnace that is subject to regulation under the Secondary Lead Smelting NESHAP of federal subpart X of 40 CFR 63 (National Emission Standards for Hazardous Air Pollutants from Secondary Lead Smelting) must comply with the requirements of subsection (h) of this Section:
  - A) Provide a one-time written notice to the Agency indicating the following:
    - i) The owner or operator claims exemption pursuant to this subsection (d);
    - ii) The hazardous waste is burned solely for metal recovery consistent with the provisions of subsection (d)(2) of this Section;
    - iii) The hazardous waste contains recoverable levels of metals; and
    - iv) The owner or operator will comply with the sampling and analysis and recordkeeping requirements of this subsection (d);
  - B) Sample and analyze the hazardous waste and other feedstocks as necessary to comply with the requirements of this subsection (d) by using appropriate methods; and
  - C) Maintain at the facility for at least three years records to document

~~NOTICE OF PROPOSED AMENDMENTS~~

compliance with the provisions of this subsection (d), including limits on levels of toxic organic constituents and Btu value of the waste and levels of recoverable metals in the hazardous waste compared to normal non-hazardous waste feedstocks.

- 2) A hazardous waste meeting either of the following criteria is not processed solely for metal recovery:
  - A) The hazardous waste has a total concentration of organic compounds listed in Appendix H to 35 Ill. Adm. Code 721 exceeding 500 ppm by weight, as fired, and so is considered to be burned for destruction. The concentration of organic compounds in a waste as-generated may be reduced to the 500 ppm limit by bona fide treatment that removes or destroys organic constituents. Blending for dilution to meet the 500 ppm limit is prohibited, and documentation that the waste has not been impermissibly diluted must be retained in the records required by subsection (d)(1)(C) of this Section; or
  - B) The hazardous waste has a heating value of 5,000 Btu/lb or more, as-fired, and is so considered to be burned as fuel. The heating value of a waste as-generated may be reduced to below the 5,000 Btu/lb limit by bona fide treatment that removes or destroys organic constituents. Blending for dilution to meet the 5,000 Btu/lb limit is prohibited and documentation that the waste has not been impermissibly diluted must be retained in the records required by subsection (d)(1)(C) of this Section.
- 3) To be exempt from Sections 726.202 through 726.211, an owner or operator of a lead, nickel-chromium, or mercury recovery furnace, except for an owner or operator of a lead recovery furnace that is subject to regulation pursuant to the Secondary Lead Smelting NESHAP of subpart X of 40 CFR 63, or a metal recovery furnace that burns baghouse bags used to capture metallic dusts emitted by steel manufacturing must provide a one-time written notice to the Agency identifying each hazardous waste burned and specifying whether the owner or operator claims an exemption for each waste pursuant to this subsection (d)(3) or subsection (d)(1) of this Section. The owner or operator must comply with the requirements of subsection (d)(1) of this Section for those wastes claimed to be exempt pursuant to that subsection and must comply with the following

**NOTICE OF PROPOSED AMENDMENTS**

requirements for those wastes claimed to be exempt pursuant to this subsection (d)(3):

- A) The hazardous wastes listed in Appendices K, L, and M of this Part and baghouse bags used to capture metallic dusts emitted by steel manufacturing are exempt from the requirements of subsection (d)(1) of this Section, provided the following are true:
  - i) A waste listed in Appendix K of this Part must contain recoverable levels of lead, a waste listed in Appendix L of this Part must contain recoverable levels of nickel or chromium, a waste listed in Appendix M of this Part must contain recoverable levels of mercury and contain less than 500 ppm of Appendix H to 35 Ill. Adm. Code 721 organic constituents, and baghouse bags used to capture metallic dusts emitted by steel manufacturing must contain recoverable levels of metal;
  - ii) The waste does not exhibit the toxicity characteristic of 35 Ill. Adm. Code 721.124 for an organic constituent;
  - iii) The waste is not a hazardous waste listed in Subpart D of 35 Ill. Adm. Code 721 because it is listed for an organic constituent, as identified in Appendix G of 35 Ill. Adm. Code 721; and
  - iv) The owner or operator certifies in the one-time notice that hazardous waste is burned pursuant to the provisions of subsection (d)(3) of this Section and that sampling and analysis will be conducted or other information will be obtained as necessary to ensure continued compliance with these requirements. Sampling and analysis must be conducted according to subsection (d)(1)(B) of this Section, and records to document compliance with subsection (d)(3) of this Section must be kept for at least three years.
- B) The Agency may decide, on a case-by-case basis, that the toxic organic constituents in a material listed in Appendix K, Appendix L, or Appendix M of this Part that contains a total concentration of more than 500 ppm toxic organic compounds listed in Appendix H

~~NOTICE OF PROPOSED AMENDMENTS~~

to 35 Ill. Adm. Code 721 may pose a hazard to human health and the environment when burned in a metal recovery furnace exempt from the requirements of this Subpart H. Under these circumstances, after adequate notice and opportunity for comment, the metal recovery furnace will become subject to the requirements of this Subpart H when burning that material. In making the hazard determination, the Agency must consider the following factors:

- i) The concentration and toxicity of organic constituents in the material;
  - ii) The level of destruction of toxic organic constituents provided by the furnace; and
  - iii) Whether the acceptable ambient levels established in Appendix D or E of this Part will be exceeded for any toxic organic compound that may be emitted based on dispersion modeling to predict the maximum annual average off-site ground level concentration.
- e) The standards for direct transfer operations pursuant to Section 726.211 apply only to facilities subject to the permit standards of Section 726.202 or the interim status standards of Section 726.203.
- f) The management standards for residues pursuant to Section 726.212 apply to any BIF burning hazardous waste.
- g) Owners and operators of smelting, melting, and refining furnaces (including pyrometallurgical devices such as cupolas, sintering machines, roasters, and foundry furnaces) that process hazardous waste for recovery of economically significant amounts of the precious metals gold, silver, platinum, palladium, iridium, osmium, rhodium, ruthenium, or any combination of these metals are conditionally exempt from regulation pursuant to this Subpart H, except for Section 726.212. To be exempt from Sections 726.202 through 726.211, an owner or operator must do the following:
- 1) Provide a one-time written notice to the Agency indicating the following:
    - A) The owner or operator claims exemption pursuant to this Section,

~~NOTICE OF PROPOSED AMENDMENTS~~

- B) The hazardous waste is burned for legitimate recovery of precious metal, and
  - C) The owner or operator will comply with the sampling and analysis and recordkeeping requirements of this Section;
- 2) Sample and analyze the hazardous waste, as necessary, to document that the waste is burned for recovery of economically significant amounts of the metals and that the treatment recovers economically significant amounts of precious metal; and
- 3) Maintain, at the facility for at least three years, records to document that all hazardous wastes burned are burned for recovery of economically significant amounts of precious metal.
- h) An owner or operator of a lead recovery furnace that processes hazardous waste for recovery of lead and which is subject to regulation pursuant to the Secondary Lead Smelting NESHAP of subpart X of 40 CFR 63, is conditionally exempt from regulation pursuant to this Subpart H, except for Section 726.201. To become exempt, an owner or operator must provide a one-time notice to the Agency identifying each hazardous waste burned and specifying that the owner or operator claims an exemption pursuant to this subsection (h). The notice also must state that the waste burned has a total concentration of non-metal compounds listed in Appendix H to 35 Ill. Adm. Code 721 of less than 500 ppm by weight, as fired and as provided in subsection (d)(2)(A) of this Section, or is listed in Appendix K to this Part.
- i) Abbreviations and definitions. The following definitions and abbreviations are used in this Subpart H:
- "APCS" means air pollution control system.
  - "BIF" means boiler or industrial furnace.
  - "Carcinogenic metals" means arsenic, beryllium, cadmium, and chromium.
  - "CO" means carbon monoxide.

NOTICE OF PROPOSED AMENDMENTS

“TESH” means terrain-adjusted effective stack height (in meters).

“Tier I.” See Section 726.206(b).

“Tier II.” See Section 726.206(c).

“Tier III.” See Section 726.206(d).

“Toxicity equivalence” is estimated, pursuant to Section 726.204(e), using section 4.0 (Procedures for Estimating the Toxicity Equivalence of Chlorinated Dibenzo-p-Dioxin and Dibenzofuran Congeners) in appendix IX to 40 CFR 266 (Methods Manual for Compliance with the BIF Regulations), incorporated by reference in 35 Ill. Adm. Code 720.111(b) (see Appendix I of this Part).

“mg” means microgram.

164  
 165 SUBPART H: HAZARDOUS WASTE BURNED IN BOILERS  
 166 AND INDUSTRIAL FURNACES  
 167

168 **Section 726.200 Applicability**  
 169

- 170 a) The regulations of this Subpart H apply to hazardous waste burned or processed  
 171 in a boiler or industrial furnace (BIF) (as defined in 35 Ill. Adm. Code 720.110)  
 172 irrespective of the purpose of burning or processing, except as provided by

173 subsections (b), (c), (d), (g), and (h) of this Section. In this Subpart H, the term  
 174 "burn" means burning for energy recovery or destruction or processing for  
 175 materials recovery or as an ingredient. The emissions standards of Sections  
 176 726.204, 726.205, 726.206, and 726.207 apply to facilities operating under  
 177 interim status or under a RCRA permit, as specified in Sections 726.202 and  
 178 726.203.

179  
 180 b) Integration of the MACT standards.

181  
 182 1) Except as provided by subsections(b)(2), (b)(3), and (b)(4) of this Section,  
 183 the standards of this Part do not apply to a new hazardous waste boiler or  
 184 industrial furnace unit that becomes subject to RCRA permit requirements  
 185 after October 12, 2005; or no longer apply when an owner or operator of  
 186 an existing hazardous waste boiler or industrial furnace unit demonstrates  
 187 compliance with the maximum achievable control technology (MACT)  
 188 requirements of federal subpart EEE of 40 CFR 63 (National Emission  
 189 Standards for Hazardous Air Pollutants from Hazardous Waste  
 190 Combustors), incorporated by reference in 35 Ill. Adm. Code 720.111(b),  
 191 by conducting a comprehensive performance test and submitting to the  
 192 Agency a Notification of Compliance, pursuant to 40 CFR 63.1207(j)  
 193 (What are the performance testing requirements?) and 63.1210(d) (What  
 194 are the notification requirements?), documenting compliance with the  
 195 requirements of federal subpart EEE of 40 CFR 63. Nevertheless, even  
 196 after this demonstration of compliance with the MACT standards, RCRA  
 197 permit conditions that were based on the standards of this Part will  
 198 continue to be in effect until they are removed from the permit or the  
 199 permit is terminated or revoked, unless the permit expressly provides  
 200 otherwise.

201  
 202 2) The following standards continue to apply:

203  
 204 A) If an owner or operator elects to comply with 35 Ill. Adm. Code  
 205 703.320(a)(1)(A) to minimize emissions of toxic compounds from  
 206 startup, shutdown, and malfunction events, Section 726.202(e)(1),  
 207 requiring operations in accordance with the operating requirements  
 208 specified in the permit at all times that hazardous waste is in the  
 209 unit, and Section 726.202(e)(2)(C), requiring compliance with the  
 210 emission standards and operating requirements, during startup and  
 211 shutdown if hazardous waste is in the combustion chamber, except  
 212 for particular hazardous wastes. These provisions apply only  
 213 during startup, shutdown, and malfunction events;

214  
 215 B) The closure requirements of Sections 726.202(e)(11) and

216 726.203(1);

- 217
- 218 C) The standards for direct transfer of Section 726.211;
- 219
- 220 D) The standards for regulation of residues of Section 726.212; and
- 221
- 222 E) The applicable requirements of Subparts A through H, BB, and CC
- 223 of 35 Ill. Adm. Code 724 and 725.
- 224
- 225 3) The owner or operator of a boiler or hydrochloric acid production furnace
- 226 that is an area source under 40 CFR 63.2, incorporated by reference in 35
- 227 Ill. Adm. Code 720.111(b) (as 40 CFR 63), that has not elected to comply
- 228 with the emission standards of 40 CFR 63.1216, 63.1217, and 63.1218,
- 229 incorporated by reference in 35 Ill. Adm. Code 720.111(b) (as subpart
- 230 EEE of 40 CFR 63), for particulate matter, semivolatile and low volatile
- 231 metals, and total chlorine, also remains subject to the following
- 232 requirements of this Part:
- 233
- 234 A) Section 726.205 (Standards to Control PM);
- 235
- 236 B) Section 726.206 (Standards to Control Metals Emissions); and
- 237
- 238 C) Section 726.207 (Standards to Control HCl and Chlorine Gas
- 239 Emissions).
- 240
- 241 4) The particulate matter standard of Section 726.205 remains in effect for a
- 242 boiler that elects to comply with the alternative to the particulate matter
- 243 standard under 40 CFR 63.1216(e) and 63.1218, each incorporated by
- 244 reference in 35 Ill. Adm. Code 720.111(b) (as subpart EEE of 40 CFR 63).
- 245

246 BOARD NOTE: Sections 9.1 and 39.5 of the Environmental Protection Act [415

247 ILCS 5/9.1 and 39.5] make the federal MACT standards directly applicable to

248 entities in Illinois and authorize the Agency to issue permits based on the federal

249 standards. In adopting this subsection (b), USEPA stated as follows (at 64 Fed

250 Reg. 52828, 52975 (November 30, 1999)):

251

252 Under [the approach adopted by USEPA as a] final rule, MACT air

253 emissions and related operating requirements are to be included in title V

254 permits; RCRA permits will continue to be required for all other aspects of

255 the combustion unit and the facility that are governed by RCRA (e.g.,

256 corrective action, general facility standards, other combustor-specific

257 concerns such as materials handling, risk-based emissions limits and

258 operating requirements, as appropriate, and other hazardous waste

259 management units).

- c) The following hazardous wastes and facilities are not subject to regulation pursuant to this Subpart H:
  - 1) Used oil burned for energy recovery that is also a hazardous waste solely because it exhibits a characteristic of hazardous waste identified in Subpart C of 35 Ill. Adm. Code 721. Such used oil is subject to regulation pursuant to 35 Ill. Adm. Code 739, rather than this Subpart H;
  - 2) Gas recovered from hazardous or solid waste landfills, when such gas is burned for energy recovery;
  - 3) Hazardous wastes that are exempt from regulation pursuant to 35 Ill. Adm. Code 721.104 and 721.106(a)(3)(C) and (a)(3)(D) and hazardous wastes that are subject to the special requirements for conditionally exempt small quantity generators pursuant to 35 Ill. Adm. Code 721.105; and
  - 4) Coke ovens, if the only hazardous waste burned is USEPA hazardous waste no. K087 decanter tank tar sludge from coking operations.
  
- d) Owners and operators of smelting, melting, and refining furnaces (including pyrometallurgical devices, such as cupolas, sintering machines, roasters, and foundry furnaces, but not including cement kilns, aggregate kilns, or halogen acid furnaces burning hazardous waste) that process hazardous waste solely for metal recovery are conditionally exempt from regulation pursuant to this Subpart H, except for Sections 726.201 and 726.212.
  - 1) To be exempt from Sections 726.202 through 726.211, an owner or operator of a metal recovery furnace or mercury recovery furnace must comply with the following requirements, except that an owner or operator of a lead or a nickel-chromium recovery furnace or a metal recovery furnace that burns baghouse bags used to capture metallic dust emitted by steel manufacturing must comply with the requirements of subsection (d)(3) of this Section, and an owner or operator of a lead recovery furnace that is subject to regulation under the Secondary Lead Smelting NESHAP of federal subpart X of 40 CFR 63 (National Emission Standards for Hazardous Air Pollutants from Secondary Lead Smelting) must comply with the requirements of subsection (h) of this Section:
    - A) Provide a one-time written notice to the Agency indicating the following:

- 302 i) The owner or operator claims exemption pursuant to this  
303 subsection (d);  
304
- 305 ii) The hazardous waste is burned solely for metal recovery  
306 consistent with the provisions of subsection (d)(2) of this  
307 Section;  
308
- 309 iii) The hazardous waste contains recoverable levels of metals;  
310 and  
311
- 312 iv) The owner or operator will comply with the sampling and  
313 analysis and recordkeeping requirements of this subsection  
314 (d);  
315
- 316 B) Sample and analyze the hazardous waste and other feedstocks as  
317 necessary to comply with the requirements of this subsection (d)  
318 by using appropriate methods; and  
319
- 320 C) Maintain at the facility for at least three years records to document  
321 compliance with the provisions of this subsection (d), including  
322 limits on levels of toxic organic constituents and Btu value of the  
323 waste and levels of recoverable metals in the hazardous waste  
324 compared to normal non-hazardous waste feedstocks.  
325
- 326 2) A hazardous waste meeting either of the following criteria is not processed  
327 solely for metal recovery:  
328
- 329 A) The hazardous waste has a total concentration of organic  
330 compounds listed in Appendix H to 35 Ill. Adm. Code 721  
331 exceeding 500 ppm by weight, as fired, and so is considered to be  
332 burned for destruction. The concentration of organic compounds  
333 in a waste as-generated may be reduced to the 500 ppm limit by  
334 bona fide treatment that removes or destroys organic constituents.  
335 Blending for dilution to meet the 500 ppm limit is prohibited, and  
336 documentation that the waste has not been impermissibly diluted  
337 must be retained in the records required by subsection (d)(1)(C) of  
338 this Section; or  
339
- 340 B) The hazardous waste has a heating value of 5,000 Btu/lb or more,  
341 as-fired, and is so considered to be burned as fuel. The heating  
342 value of a waste as-generated may be reduced to below the 5,000  
343 Btu/lb limit by bona fide treatment that removes or destroys  
344 organic constituents. Blending for dilution to meet the 5,000

Btu/lb limit is prohibited and documentation that the waste has not been impermissibly diluted must be retained in the records required by subsection (d)(1)(C) of this Section.

- 3) To be exempt from Sections 726.202 through 726.211, an owner or operator of a lead, nickel-chromium, or mercury recovery furnace, except for an owner or operator of a lead recovery furnace that is subject to regulation pursuant to the Secondary Lead Smelting NESHAP of subpart X of 40 CFR 63, or a metal recovery furnace that burns baghouse bags used to capture metallic dusts emitted by steel manufacturing must provide a one-time written notice to the Agency identifying each hazardous waste burned and specifying whether the owner or operator claims an exemption for each waste pursuant to this subsection (d)(3) or subsection (d)(1) of this Section. The owner or operator must comply with the requirements of subsection (d)(1) of this Section for those wastes claimed to be exempt pursuant to that subsection and must comply with the following requirements for those wastes claimed to be exempt pursuant to this subsection (d)(3):
- A) The hazardous wastes listed in Appendices K, L, and M of this Part and baghouse bags used to capture metallic dusts emitted by steel manufacturing are exempt from the requirements of subsection (d)(1) of this Section, provided the following are true:
    - i) A waste listed in Appendix K of this Part must contain recoverable levels of lead, a waste listed in Appendix L of this Part must contain recoverable levels of nickel or chromium, a waste listed in Appendix M of this Part must contain recoverable levels of mercury and contain less than 500 ppm of Appendix H to 35 Ill. Adm. Code 721 organic constituents, and baghouse bags used to capture metallic dusts emitted by steel manufacturing must contain recoverable levels of metal;
    - ii) The waste does not exhibit the toxicity characteristic of 35 Ill. Adm. Code 721.124 for an organic constituent;
    - iii) The waste is not a hazardous waste listed in Subpart D of 35 Ill. Adm. Code 721 because it is listed for an organic constituent, as identified in Appendix G of 35 Ill. Adm. Code 721; and
    - iv) The owner or operator certifies in the one-time notice that

hazardous waste is burned pursuant to the provisions of subsection (d)(3) of this Section and that sampling and analysis will be conducted or other information will be obtained as necessary to ensure continued compliance with these requirements. Sampling and analysis must be conducted according to subsection (d)(1)(B) of this Section, and records to document compliance with subsection (d)(3) of this Section must be kept for at least three years.

B) The Agency may decide, on a case-by-case basis, that the toxic organic constituents in a material listed in Appendix K, Appendix L, or Appendix M of this Part that contains a total concentration of more than 500 ppm toxic organic compounds listed in Appendix H to 35 Ill. Adm. Code 721 may pose a hazard to human health and the environment when burned in a metal recovery furnace exempt from the requirements of this Subpart H. Under these circumstances, after adequate notice and opportunity for comment, the metal recovery furnace will become subject to the requirements of this Subpart H when burning that material. In making the hazard determination, the Agency must consider the following factors:

- i) The concentration and toxicity of organic constituents in the material;
- ii) The level of destruction of toxic organic constituents provided by the furnace; and
- iii) Whether the acceptable ambient levels established in Appendix D or E of this Part will be exceeded for any toxic organic compound that may be emitted based on dispersion modeling to predict the maximum annual average off-site ground level concentration.

- e) The standards for direct transfer operations pursuant to Section 726.211 apply only to facilities subject to the permit standards of Section 726.202 or the interim status standards of Section 726.203.
- f) The management standards for residues pursuant to Section 726.212 apply to any BIF burning hazardous waste.
- g) Owners and operators of smelting, melting, and refining furnaces (including pyrometallurgical devices such as cupolas, sintering machines, roasters, and

foundry furnaces) that process hazardous waste for recovery of economically significant amounts of the precious metals gold, silver, platinum, palladium, iridium, osmium, rhodium, ruthenium, or any combination of these metals are conditionally exempt from regulation pursuant to this Subpart H, except for Section 726.212. To be exempt from Sections 726.202 through 726.211, an owner or operator must do the following:

- 1) Provide a one-time written notice to the Agency indicating the following:
  - A) The owner or operator claims exemption pursuant to this Section,
  - B) The hazardous waste is burned for legitimate recovery of precious metal, and
  - C) The owner or operator will comply with the sampling and analysis and recordkeeping requirements of this Section;
- 2) Sample and analyze the hazardous waste, as necessary, to document that the waste is burned for recovery of economically significant amounts of the metals and that the treatment recovers economically significant amounts of precious metal; and
- 3) Maintain, at the facility for at least three years, records to document that all hazardous wastes burned are burned for recovery of economically significant amounts of precious metal.

h) An owner or operator of a lead recovery furnace that processes hazardous waste for recovery of lead and which is subject to regulation pursuant to the Secondary Lead Smelting NESHAP of subpart X of 40 CFR 63, is conditionally exempt from regulation pursuant to this Subpart H, except for Section 726.201. To become exempt, an owner or operator must provide a one-time notice to the Agency identifying each hazardous waste burned and specifying that the owner or operator claims an exemption pursuant to this subsection (h). The notice also must state that the waste burned has a total concentration of non-metal compounds listed in Appendix H to 35 Ill. Adm. Code 721 of less than 500 ppm by weight, as fired and as provided in subsection (d)(2)(A) of this Section, or is listed in Appendix K to this Part.

i) Abbreviations and definitions. The following definitions and abbreviations are used in this Subpart H:

"APCS" means air pollution control system.

560 "TESH" means terrain-adjusted effective stack height (in meters).

561

562 "Tier I." See Section 726.206(b).

563

564 "Tier II." See Section 726.206(c).

565

566 "Tier III." See Section 726.206(d).

567

568 "Toxicity equivalence" is estimated, pursuant to Section 726.204(e), using  
569 section 4.0 (Procedures for Estimating the Toxicity Equivalence of  
570 Chlorinated Dibenzo-p-Dioxin and Dibenzofuran Congeners) in appendix  
571 IX to 40 CFR 266 (Methods Manual for Compliance with the BIF  
572 Regulations), incorporated by reference in 35 Ill. Adm. Code 720.111(b)  
573 (see Appendix I of this Part).

574

575 "mg" means microgram.
