GENERAL REMARKS

NOTE: As of September 26, 2016 the Jackson County Assessor's Office shows that this site is owned by Richard Mansfield [**Attachment: Page 1**].

During the stated date and time, I conducted an inspection of the site listed above. This inspection was made as a follow up to an inspection conducted on July 20, 2016 during which open dumped waste was observed scattered around the site. Weather conditions at the time of the inspection were: Sunny with calm winds and a temperature of approximately 73°F. I was accompanied on this inspection by Kyle Scerena of the Jackson County Health Department (JCHD).

Upon arrival at the site, I observed from Lincoln Street Extension, a public roadway, a waste pop-up camping trailer overgrown with vegetation (**Photo #1, Site Sketch – A**). I observed this waste camping trailer during my previous inspection of the site. It appears to be in the same general location as it was during my previous inspection and today it is much more overgrown with vegetation indicating that it is not in use and is not being protected for future use.

I then walked west along the driveway and from one location looked north and observed material lying on the ground west of a mobile home (**Photo #2, Site Sketch – B**). I walked north towards the material and observed several piles open dumped waste (**Photos #3 - #5, Site Sketch – B & C**). The waste in these two areas (B & C) consisted of but was not limited to: plywood, PVC pipe, dimensional lumber and two tub/shower enclosures. One of the tub/shower enclosures was holding water (**Photos #5 & #6, Site Sketch – B**). Kyle Scerena who was accompanying me, is a sanitarian at the JCHD. Some of his duties include working in the vector control program; specifically catching and identifying mosquitoes. I kicked the tub/shower enclosure and asked Mr. Scerena if he saw any mosquito larvae or pupa. Mr. Scerena pointed out two or three areas where there were mosquito larvae and pupa moving. I looked carefully and observed them in the water. I took a photo towards one of the areas where I observed movement (**Photo #6, Site Sketch – B**). Upon return to the JCHD, Mr. Scerena and I looked at Photo #6 and when it was magnified he pointed out two mosquito pupa in the photo (**Photo #6, Site Sketch – B; see two black circles in upper center of photo**).

I walked to the northwest and observed a waste pile consisting of, but not limited to: dimensional lumber, metal framed windows, PVC pipe and a used/waste tire (**Photo #7, Site Sketch – D**). The items in this waste pile were not in use and not being protected for future use.

Page 2

September 19, 2016

South of the waste pile labeled "D" on the Site Sketch, I observed two burn piles which I had observed during previous inspections (Photos #8 & #9, Site Sketch – BP1 & BP2). The waste in these two piles consisted of but was not limited to: ash, dimensional lumber, melted upholstery fabric and vinyl siding. I did not observe evidence that the open burning of waste had recently occurred at this site.

South of the burn piles I observed a waste vehicle that appeared to have been in an accident (Photos #10 & #11, Site Sketch – E).

West of the demolished vehicle I observed more open dumped waste (Photos #12 - #15, Site Sketch – F & G). The waste in these area consisted of but was not limited to: metal wire, dimensional lumber, metal cans, plastic containers, metal poles, a metal animal watering tank (the tank was holding water but no evidence of mosquitos was observed), roofing shingles, car parts and a waste boat.

South of the waste vehicle I observed another waste pile (Photos #16 - #18, Site Sketch – H). The waste in this area consisted of but was not limited to: scrap metal, metal wire, a television, a metal propane tank, plastic items, a waste metal trailer and dimensional lumber.

At the time of the inspection, the materials listed as waste in the narrative were not in use, were not useable in their current condition, and were not stored in such a way as to protect any future use.

The total volume of waste observed was approximately 100 + cubic yards.

My inspection ended at approximately 10:04 a.m.

Violations Observed:

Item #5(21)(a): Cause or allow open dumping; Item #8(21)(p)(1, 5 & 7): Cause or allow the open dumping of any waste in a manner which results in any of the following occurrences at the dump site: (1) Litter, (5) Proliferation of disease vectors (7) Deposition of general construction or demolition debris; or clean construction or demolition debris: During the inspection, the open dumping of waste that resulted in litter, the proliferation of disease vectors and the deposition of general construction or demolition debris was observed.

Item #9(55)(a)(1): No person shall: Cause or allow open dumping of any used or waste tire: At the time of the inspection, one used/waste tire that had been open dumped was observed.
