**RECOMMENDATION OF THE ILLINOIS
ENVIRONMENTAL PROTECTION AGENCY**

The Illinois Environmental Protection Agency ("Illinois EPA") hereby files its Recommendation pursuant to Section 125.204 of the regulations of the Illinois Pollution Control Board ("Board"), 35 Ill. Adm. Code 125.204.

1. On November 3, 2016, the Illinois EPA received a request from Nick Briggs (log number TC-137029, Exhibit A) for an Illinois EPA recommendation regarding the tax certification of water pollution control facilities pursuant to 35 Ill. Adm. Code 125.204.
2. The facility's address is: Pro Ag Hartney #2
955 Twp. Rd. 900 N.
Stronghurst, IL 61361

The proposed water pollution control facilities in this request are located at the SW ¼ of Section 18, T9N, R5W of the 4th P.M. in Henderson County, at the above street address and consist of the following:

Livestock waste management facilities consisting of one concrete manure pit (approximately 72 ft. x 281 ft. x 8 ft. deep), a concrete slotted floor over the manure pit that collects livestock waste, four livestock waste pump out pits to allow for waste removal (approximately 6 ft. x. 6 ft. x. 8 ft.), and one plastic perimeter drainage pipe (approximately 6" tall x 2" wide) located around the footing of the manure pit to prevent flotation.

These livestock waste management facilities are used to collect, transport and store livestock waste prior to cropland application, and is further described in Exhibit A.

3. Section 11-10 of the Property Tax Code, 35 ILCS 200/11-10 (2014), and Section 125.200(a) of the Board's regulations, 35 Ill. Adm. Code 125.200(a), define

"pollution control facilities" as:

any system, method, construction, device or appliance appurtenant thereto or any portion of any building or equipment, that is designed, constructed, installed or operated for the primary purpose of: eliminating, preventing, or reducing air or water pollution ...or treating, pretreating, modifying or disposing of any potential solid, liquid or gaseous pollutant which if released without treatment, pretreatment modification or disposal might be harmful, detrimental or offensive to human, plant or animal life, or to property.

4. In order to receive preferential tax treatment as pursuant to 35 ILCS 200/11-5 (2014), pollution control facilities must be certified as such by the Board, 35 ILCS 200/11-20 (2014) and 35 Ill. Adm. Code 125.200(a).
5. Upon receipt of a tax certification application, the Illinois EPA must file a recommendation on the application with the Board, 35 Ill Adm. Code 125.204(a).
6. Based on the information in the application and the purpose of the facility, it is the Illinois EPA's engineering judgment that the described facilities may be considered "pollution control facilities," pursuant to 35 Ill. Adm. Code 125.200(a), with the primary purpose of eliminating, preventing, or reducing water pollution, or as otherwise provided in 35 Ill. Adm. Code 125.200, and are eligible for tax certification from the Board.

WHEREFORE, the Illinois EPA recommends that the Board issue the requested tax certification.

Re: Pro Ag Hartney #2 - Stronghurst
Recommendation of Tax Certification
Log # TC-137029
Property Index# 08-018-004-00

The Bureau of Water received a request on November 3, 2016 from Nick Biggs for an Illinois EPA recommendation regarding the tax certification of water pollution control facilities pursuant to 35 Ill. Adm. Code 125.204. We offer the following recommendation.

The water pollution control facilities in this request include the following:

Nick Biggs
955 Twp Rd. 900 N.
Stronghurst, IL

SW ¼ of Section 18, T9N, R5W of the 4th PM in Henderson County

The livestock waste handling facilities consisting of one (1) concrete manure pit (approximately 72 ft. x 281 ft. x 8 ft.) and the concrete slotted portion of the floor over the manure pit that capture and contain waste generated in the barns above. Four (4) pumpouts pits (approximately 6 ft. x 6 ft. x 8 ft. each) for manure removal from the manure pit. One (1) perimeter plastic drainage pipe (approximately 6" tall and 2" wide) located around the footing of the manure pit to prevent flotation of the manure pit. The facility collects, transports and stores livestock waste prior to cropland application.

The facility is further described in the enclosed applications and supporting documents.

Based on the information included in this submittal, it is our engineering judgment that the above proposed facilities may be considered "Pollution Control Facilities" under 35 IAC 125.200(a), with the primary purpose of eliminating, preventing, or reducing water pollution, or as otherwise provided in this section, and therefore eligible for tax certification from the Illinois Pollution Control Board. The Bureau of Water therefore recommends that the Board issue the requested tax certification for these facilities.

If you have any questions regarding the above, please contact Wei Han at 217/782-0610.

Date Control Devices installed: 10/2016

Wastes: Livestock waste is applied to cropland.
 Agrichemical rinsate and spillage is recycled through the facility and/or land applied.
 Other: _____

Physical Description of Pollution Control Devices:

The livestock waste handling facilities consisting of one (1) concrete manure pit (approximately 72 ft. x 281 ft. x 8 ft.) and the concrete slotted portion of the floor over the manure pit that capture and contain waste generated in the barns above. Four (4) pumpouts pits (approximately 6 ft. x 6 ft. x 8 ft. each) for manure removal from the manure pit. One (1) plastic perimeter drainage pipe (rectangular approximately 6" tall and 2" wide) located around the footing of the manure pit to prevent flotation of the manure pit. The facility collects, transports and stores livestock waste prior to cropland application.

12/15/2016: Called Nick Biggs about the correction of the pollution control facilities to be certified. He will send email about the corrections. He also provided the land property ID 08-18-004-00. His physical address is 103 East Railroad, Oakville, IA 52646.

12/16/2016: Received email from Nick Biggs. See attached email.

Recommended Action: Issue tax certification.

Subject: [External] Property Tax Treatment form

To whom it may concern,

This e-mail is to follow-up a phone conversation on 12-15-2016 concerning the description of the pollution abatement control facility.

I understand that only the concrete pit, slatted floor, four 6 foot by 6 foot pump-outs and perimeter tile qualify for the property tax treatment.

The dimensions of the concrete pit are 281' Length x 71' 10" Width x 8' depth.

The dimensions of the four pump outs 6' length x 6' width x 8' depth.

The dimensions of the slatted floor 281' Length x 71' 10" Width x 4" Thick

The dimensions of the perimeter tile 2" wide x 6" tall rectangle goes all around the pit floor. 281' x 71' 10" floor.

If you have any questions give me a call.

Thank You

Nick Biggs

	Signature	Title	
Sec. G	INSTRUCTIONS FOR COMPILING AND FILING APPLICATION		
	General: Separate applications must be completed for each control facility claimed. Do not mix types (water and air). Where both air and water operations are related, file two applications. If attachments are needed, record them consecutively on an index sheet.		
Sec. A	Information refers to applicant as listed in the tax records and the person to be contacted for further details or for inspection of facilities. Define facility location by street address or legal description. A plat map location is required for facilities located outside of municipal boundaries. The property identification number is required.		
Sec. B	Self-explanatory. Submit copies of all permits issued by local pollution control agencies. (e.g. MSD Construction Permit)		
Sec. C	Refers to manufacturing processes or materials on which pollution control facility is used.		
Sec. D	Narrative description of the pollution control facility, indicating that its primary purpose is to eliminate, prevent or reduce pollution. State the type of control facility. State permit number, date, and agency issuing permit. A narrative description and a process flow diagram describing the <u>pollution control facility</u> . Include a listing of each major piece of equipment included in the claimed fair cash value for real property. Include an <u>average</u> analysis of the influent and effluent of the control facility stating the collection efficiency.		
Sec. E	List air contaminants, or water pollution substances released as effluents to the manufacturing processes. List also the final disposal of any contaminants removed from the manufacturing processes. Item (1) - Refers to pollutants and contaminants removed from the process by the pollution control facility. Item (2) - Refers to water pollution but can apply to water-carried wastes from air pollution control facilities. Submit drawings, which clearly show (a) Point(s) of discharge to receiving stream, and (b) Sewers and process piping to and from the control facility. Item (3) - If the collected contaminants are disposed of other than as wastes, state the disposition of the materials, and the value in dollars reclaimed by sale or reuse of the collected substances. State the cost of reclamation and related expense. Item (4) - State the date which the pollution control facility was first placed in service and operated. If not, explain. Item (5) - This information is essential to the certification and assessment actions. This accounting data must be completed to activate project review prior to certification by this Agency.		
Sec. F	Self-explanatory. Signature must be a corporate authorized signature.
