COMPLAINT

Complainant, PEOPLE OF THE STATE OF ILLINOIS, by LISA MADIGAN, Attorney General of the State of Illinois, complains of Respondent, MAGNA TAX SERVICE CO., INC., an Illinois corporation:

COUNT I
OPEN DUMPING VIOLATIONS

1. This Count is brought by the Attorney General on her own motion and at the request of the Illinois Environmental Protection Agency ("Illinois EPA"), pursuant to the terms and provisions of Section 31 of the Illinois Environmental Protection Act ("Act"), 415 ILCS 5/31 (2014).

2. The Illinois EPA is an agency of the State of Illinois created by the Illinois General Assembly in Section 4 of the Act, 415 ILCS 5/4 (2014), and charged, *inter alia*, with the duty of enforcing the Act in proceedings before the Illinois Pollution Control Board ("Board").

3. This Complaint is brought pursuant to Section 31 of the Act, 415 ILCS 5/31 (2014), after providing Respondent, MAGNA TAX SERVICE CO., INC. ("Magna Tax"), with notice and the opportunity for a meeting with the Illinois EPA.

4. The Respondent, Magna Tax, is an active Illinois corporation in good standing as of the date of this filing. The president, secretary and registered agent of Magna Tax is Dennis D. Ballinger. The address for the registered agent is 119 W. Williams St., Suite 300, Decatur, IL 62523.

5. The Respondent owns the former Young Radiator factory property, located at 120 North 14th Street, Mattoon, Coles County, Illinois ("the Site").

6. On October 5, 2011, the Illinois EPA inspected the Site. Along the west half of the northern edge of the Site, a dark stain was located on the north end of a concrete pad and an area of dark liquid was located on the surface of the soil adjacent to the concrete pad ("Contaminated Area"). The Contaminated Area comprised approximately a few square feet.

7. On November 15, 2011, the Illinois EPA took a soil sample from the Contaminated Area ("Sample SV01"). While taking the soil sample at a depth of approximately one foot, a dark liquid was discharging from the surrounding soil into the bottom of the sampling hole. An unknown object existed at a depth of approximately one foot, which prevented the Illinois EPA inspector from sampling at depths greater than one foot. The soil in the Contaminated Area was saturated with a dark liquid.

8. A laboratory analysis of Sample SV01 identified several semi-volatile compounds, metals, and volatile organic compounds in the sample. The following table provides a summary of the contaminants detected in the sample:

Chemical Name	Result

9. On May 2, 2012, the Illinois EPA issued Violation Notice L-2012-01027 to Respondent, by serving Dennis Ballinger as registered agent, at 119 W. William St., Suite 300, Decatur, IL 62523. The Violation Notice instructed that the Respondent enroll the site into the Illinois EPA's Site Remediation Program by July 1, 2012 to obtain review and approval to remediate the site and document the remediation.

10. On August 23, 2012, the Respondent conducted an investigative dig at the Site along a 6-inch metal pipe in the Contaminated Area. During the dig, soil and media uncovered next to the pipe were saturated with dark liquid material. Neither the extent of the full contamination nor the source of the contamination were defined on this date.

11. On September 5, 2012, the Respondent conducted another investigative dig of the Site near the 6-inch metal pipe in the Contaminated Area. During the dig, several pipes were identified below the groundwater level adjacent to the Contaminated Area. At least one of the pipes leaked dark liquid into the soil during the dig.

12. On September 5, 2012, the Illinois EPA took a soil sample from the Site (Sample X101). A laboratory analysis of Sample X101 identified several contaminants,

including metals, in the soil sample. The following table provides a summary of the contaminants detected in the sample:

13. The following calendar year, on September 13, 2013, Respondent conducted another exploratory dig of the Site and located an underground storage tank ("UST"). Field

observations indicated the UST had a release. The release was reported to Illinois Emergency Management Agency and assigned IEMA Incident #H2013-1007.

14. On September 17, 2013, the UST was registered with the Office of the State Fire Marshal ("OSFM.")

15. On October 16 - 17, 2013, Respondent excavated and removed one (1) 1,500 gallon heating oil UST from the Site. Visible contamination was identified in the soil.

16. On or about October 31, 2013, Respondent submitted a Leaking Underground Storage Tank Fund Eligibility and Deductible Application ("Application") in relation to the UST. The Application noted that the UST piping had leaked.

17. Sections 21(a) and (e) of the Act, 415 ILCS 5/21(a) and (e) (2014), provide as follows:

No person shall:

(a) Cause or allow the open dumping of any waste.

(e) Dispose, treat, store or abandon any waste, or transport any waste into this State for disposal, treatment, storage or abandonment, except at a site or facility which meets the requirements of the Act and of regulations and standards thereunder.

18. Section 3.305 of the Act, 415 ILCS 5/3.305 (2014), provides as follows:

"Open dumping" means the consolidation of refuse from one or more sources at a disposal site that does not fulfill the requirements of a sanitary landfill.

24. The Respondent, a corporation, is a “person” as that term is defined in Section 3.315 of the Act, 415 ILCS 5/3.315 (2014).

25. The dark liquid identified in the Contaminated Area and surrounding the UST, is a waste, pursuant to Section 3.535 of the Act, 415 ILCS 5/3.535 (2014).

26. By causing or allowing the dark liquid to enter the environment, the Respondent allowed this waste material to be disposed at the Site.

27. The Site is not a sanitary landfill or otherwise permitted for the disposal of waste such as the dark liquid.

28. By causing or allowing the dark liquid to be consolidated at the Site, the Respondent violated Section 21(a) of the Act, 415 ILCS 5/21(a) (2014).

29. By causing or allowing the UST to discharge, deposit, spill or leak waste material into the environment, the Respondent violated Section 21(e) of the Act, 415 ILCS 5/21(e) (2014).

29. At all times prior to the removal of the UST, the Respondent failed to make a determination as to whether the dark liquid in the Contamination Area and surrounding the UST was a hazardous waste or a special waste.

30. Sections 21(d)(1)-(2) of the Act, 415 ILCS 5/21(d)(1)-(2) (2014), provides, in pertinent part, as follows:

No person shall:

- (d) Conduct any waste-storage, waste-treatment, or waste-disposal operation:
 - (1) without a permit granted by the Agency or in violation of any conditions imposed by such permit, including periodic reports and full access to adequate records and the inspection of facilities, as may be necessary to assure compliance with this Act and with regulations and standards adopted thereunder.....or
 - (2) in violation of any regulations or standards adopted by the Board under this Act;

31. Section 722.111 of the Board's Hazardous Waste Operating Regulations, 35 Ill. Adm. Code 722.111, states as follows:

- a) The person should first determine if the waste is excluded from regulation under 35 Ill. Adm. Code 721.104.

- b) The person should then determine if the waste is listed as a hazardous waste in Subpart D of 35 Ill. Adm. Code 721.

BOARD NOTE: Even if a waste is listed as a hazardous waste, the generator still has an opportunity under 35 Ill. Adm. Code 720.122 to demonstrate that the waste from the generator's particular facility or operation is not a hazardous waste.

- c) For purposes of compliance with 35 Ill. Adm. Code 728, or if the waste is not listed as a hazardous waste in Subpart D of 35 Ill. Adm. Code 721, the generator must then determine whether the waste is identified in Subpart C of 35 Ill. Adm. Code 721 by either of the following methods:
 - (1) Testing the waste according to the methods set forth in Subpart C of 35 Ill. Adm. Code 721, or according to an equivalent method approved by the Board under 35 Ill. Adm. Code 720.121; or
 - (2) Applying knowledge of the hazard characteristic of the waste in light of the materials or processes used.
- d) If the generator determines that the waste is hazardous, the generator must refer to 35 Ill. Adm. Code 721, 724 through 728, and 733 for possible exclusions or restrictions pertaining to the management of the specific waste.

32. Section 808.110 of the Board's Solid Waste and Special Waste Hauling

Regulations, 35 Ill. Adm. Code 808.110, states as follows:

"Special waste" means any hazardous waste, and any industrial process waste or pollution control waste which has not been declassified pursuant to Section 808.245. (Section 3.45 of the Act.)

33. By allowing the release of the dark liquid from the UST, the Respondent generated a solid waste.

34. By failing to determine whether the waste released from the UST was a hazardous waste or a special waste, the Respondent violated Section 21(d)(2) of the Act, 415 ILCS 5/21(d)(2) (2014), and 35 Ill. Adm. Code 722.111.
