GENERAL REMARKS

NOTE: As of March 14, 2017, the Jackson County Assessor's Office shows that this site is owned by Richard Mansfield [**Attachment: Page 1**].

During the stated date and time, I conducted an inspection of the site listed above. This inspection was made as a follow up to an inspection conducted on July 20, 2016 during which open dumped waste was observed scattered around the site. Weather conditions at the time of the inspection were: Cloudy with moderate winds and a temperature of approximately 74°F. I was accompanied on this inspection by Kyle Scerena of the Jackson County Health Department (JCHD).

Upon arrival at the site, I walked to a location west of a mobile home where I had observed open dumped waste during my previous inspection (**Photos #1 - #4, Site Sketch – Area A**). The waste in this area consisted of but was not limited to: concrete blocks, PVC pipe, shingles, dimensional lumber and a fiberglass shower enclosure.

I walked north and observed a waste pile consisting of, but not limited to: dimensional lumber, metal framed windows, PVC pipe and a used/waste tire (**Photo #5, Site Sketch – Area B**). The items in this waste pile were not in use and not being protected for future use.

South of the waste pile labeled "B" on the Site Sketch, I observed two waste piles which I had observed during previous inspections (**Photo #6, Site Sketch – WP1 & WP2**). The waste in these two piles consisted of but was not limited to: ash, dimensional lumber, melted upholstery fabric and vinyl siding. I did not observe evidence that the open burning of waste had recently occurred at this site.

South of the burn piles I observed a waste vehicle that appeared to have been in an accident (**Photo #11, Site Sketch – WV**). The vehicle was not in use, not usable in its current condition and not being protected for future use.

West of the waste vehicle I observed more open dumped waste (**Photos #19 - #11, Site Sketch – Area C & Waste boat**). The waste in these areas consisted of but was not limited to: metal wire, dimensional lumber, metal cans, plastic containers, metal poles, a metal animal watering tank (the tank was holding water but no evidence of mosquitos was observed), roofing shingles, car parts and a waste boat.

Page 2

077 804 5030

Dowell / Richard Mansfield

March 9, 2017

South of the waste vehicle I observed another waste pile (**Photo #12, Site Sketch – Trailer**). The waste in this area consisted of but was not limited to: scrap metal, metal wire, a television, a metal propane tank, plastic items, a waste metal trailer and dimensional lumber.

At the time of the inspection, the materials listed as waste in the narrative were not in use, were not useable in their current condition, and were not stored in such a way as to protect any future use.

The total volume of waste observed was approximately 100 + cubic yards.

My inspection ended at approximately 2:03 p.m.

Violations Observed:

Item #5(21)(a): Cause or allow open dumping; Item #8(21)(p)(1 & 7): Cause or allow the open dumping of any waste in a manner which results in any of the following occurrences at the dump site: (1) Litter and (7) Deposition of general construction or demolition debris; or clean construction or demolition debris: During the inspection, the open dumping of waste that resulted in litter, the proliferation of disease vectors and the deposition of general construction or demolition debris was observed.

Item #9(55)(a)(1): No person shall: Cause or allow open dumping of any used or waste tire: At the time of the inspection, at least one used/waste tire that had been open dumped was observed.
