Pollution Control Bd.

Hear ye, Illinois EPA.[^] As a public servant please note:

Coal Ash kills innocent Illinois residents through water pollution.

Illinois has some of the worst air in the nation thanks to dirty coal plants.

The decision to close all coal plants in Illinois is the direction the people of Illinois want ~~EPA~~ to go.

To allow Dynegey to double air pollution and water pollution is unfathomable. Please put the health and well-being of your constituents ahead of profits for a dirty Texas company.

Coal has been subsidized for centuries. If coal can't make it on its own in our economy, ***it is time for coal to go.***

Dynegy & Gov. Rauner have circumvented open government and shown reckless disrespect for democracy. They put our health, economy and environment below Dynegy profits.

It is high time Illinois got aboard the solar express.

Use of renewables is here to stay. There is no future for coal.

Dynegy knows that the air pollution they created resulted in deaths from asthma, chronic pulmonary diseases, and heart disease. Dynegy knows that many chemicals from slurry ponds lead to cancer, diabetes, osteoporosis and death.

They hide their dirty secrets, but the public knows what they have done.

Use coal, kill our Earth.

Please deny bailout of Dynegy.

Thank you.
