POLLUTION CONTROL BOARD

NOTICE OF WITHDRAWAL OF PROPOSED AMENDMENT

- 1) Heading of the Part: Control of Emissions from Large Combustion Sources
- 2) Code Citation: 35 Ill. Adm. Code 225
- 3) Section Number: 225.233 Proposed Action:
Amendment
- 4) Date Notice of Proposed Amendments Published in the Illinois Register: 41 Ill. Reg. 13299, November 3, 2017.
- 5) Reason for the Withdrawal: The above-cited publication was authorized by the Pollution Control Board's opinion and order of October 19, 2017. *See Amendments to 35 Ill. Adm. Code 225.233, Multi-Pollutant Standards (MPS)*. These rules are to be codified at 35 Ill. Adm. Code 225.233 and will provide certain coal-fired electric generating units owned by Vistra in central and southern Illinois with additional flexibility in complying with the Multi-Pollutant Standard (MPS) under Part 225, the Illinois mercury rule. The MPS establishes control requirements and emission standards for nitrogen oxides, sulfur dioxide, and mercury. The proposed amendments relate only to the MPS's annual and seasonal emission standards for NOx and annual standard for SO2 and would provide operational flexibility in complying with those standards while protecting air quality.

The Board's first Notice of Proposed Amendments was published November 3, 2017 at 41 Ill. Reg. 13299. Based on public comments from citizens, State legislative representatives, and units of local government, the Board made changes to the notice provisions of the rules and determined to withdraw the original first notice to allow for additional comment and hearing on the proposal.

Questions regarding this matter should reference Board Docket R18-20, and be directed to:
