2)		

RECOMMENDATION OF THE ILLINOIS ENVIRONMENTAL PROTECTION AGENCY

The Illinois Environmental Protection Agency ("Illinois EPA") hereby files its

Recommendation pursuant to Section 125.204 of the regulations of the Illinois Pollution

Control Board ("Board"), 35 Ill. Adm. Code 125.204.

- On January 18, 2019, the Illinois EPA received a request from Carrie Pollard on behalf of Prime Pork, Inc. (log number TC-140807, Exhibit A) for an Illinois EPA recommendation regarding the tax certification of water pollution control facilities pursuant to 35 Ill. Adm. Code 125.204.
- 2. The facility's address is:

Prime Pork, Inc. 16737 Crego Road DeKalb, IL 60115

The proposed water pollution control facility in this request is located in the NE ¼ of Section 11, T39N, R4E of the 3rd P.M. in DeKalb County, at the above street address and consist of the following facilities:

One (1) concrete livestock waste pit measuring 143.5 ft. (length) x 61 ft. (width) x 4 ft. (depth) with 2 concrete pump out pits approximately 6 ft. (length) x 6 ft. (width) x 4 ft.(depth) and approximately 432 linear feet of 4 inch diameter perimeter drain tile and the portion of flooring over the pit consisting of plastic slats.

These livestock waste management facilities are used to collect, transport, and/or store livestock waste prior to cropland application, and is further described in Exhibit A.

3. Section 11-10 of the Property Tax Code, 35 ILCS 200/11-10 (2018), and Section 125.200(a) of the Board's regulations, 35 Ill. Adm. Code 125.200(a), define "pollution control facilities" as:

any system, method, construction, device or appliance appurtenant thereto or any portion of any building or equipment, that is designed, constructed, installed or operated for the primary purpose of: eliminating, preventing, or reducing air or water pollution ...or treating, pretreating, modifying or disposing of any potential solid, liquid or gaseous pollutant which if released without treatment, pretreatment modification or disposal might be harmful, detrimental or offensive to human, plant or animal life, or to property.

- In order to receive preferential tax treatment as pursuant to 35 ILCS 200/11-5
 (2018), pollution control facilities must be certified as such by the Board, 35
 ILCS 200/11-20 (2014) and 35 Ill. Adm. Code 125.200(a).
- 5. Upon receipt of a tax certification application, the Illinois EPA must file a recommendation on the application with the Board, 35 Ill Adm. Code 125.204(a).
- 6. Based on the information in the application and the purpose of the facility, it is the Illinois EPA's engineering judgment that the described facilities may be considered "pollution control facilities," pursuant to 35 Ill. Adm. Code 125.200(a), with the primary purpose of eliminating, preventing, or reducing water pollution, or as otherwise provided in 35 Ill. Adm. Code 125.200, and is eligible for tax certification from the Board.

WHEREFORE, the Illinois EPA recommends that the Board issue the requested tax certification.

Prime Pork, Inc. - DeKalb

Recommendation of Tax Certification

Log # TC-140807

BOW ID # W0378000006

Property Identification # 11-11-200-004

The Bureau of Water received a request on January 18, 2019 from Prime Pork Inc. for an Illinois EPA recommendation regarding the tax certification of water pollution control facilities pursuant to 35 Il. Adm. Code 125.204. We offer the following recommendation.

The water pollution control facilities in this request include the following:

Prime Pork, Inc. 16737 Crego Road Dekalb, IL 60115

NE 1/4 of Section 11, Township 39-North, Range 4-East of the 3rd PM in DeKalb County.

Livestock waste management facilities consisting of:

One (1) concrete livestock waste pit measuring 143.5 ft. (length) x 61 ft. (width) x 4 ft. (depth) with 2 concrete pump out pits approximately 6 ft. (length) x 6 ft. (width) x 4 ft. (depth) and approximately 432 linear feet of 4 inch diameter perimeter drain tile and the portion of flooring over the pit consisting of plastic slats.

These livestock waste management facilities are used to collect, transport and/or store livestock wastes prior to cropland application.

These facilities are further described in the enclosed applications and supporting documents.

Based on the information included in this submittal, it is our engineering judgment that the above proposed facilities may be considered "Pollution Control Facilities" under 35 IAC 125.200(a), with the primary purpose of eliminating. preventing, or reducing water pollution, or as otherwise provided in this section, and therefore eligible for tax certification from the Illinois Pollution Control Board. The Bureau of Water therefore recommends that the Board issue the requested tax certification for these facilities.

If you have any questions regarding the above, please contact Darren Gove at 217/782-0610.

Title: Manager

Contents of Application: 2 page (old version) form, flow diagram and description with aerial image of facility, construction layout drawing

Is there a pollutant control flow diagram? Yes - bottom of page titled "Prime Pork, Inc."

Is there sufficient diagrams showing the pollution control facilities? Yes

This facility generates the following pollutants and prevents their discharge as indicated: Livestock waste is collected and land applied to cropland.

Physical description of pollution control facilities that ARE recommended:

Livestock waste management facilities consisting of:

One (1) concrete livestock waste pit measuring 143.5 ft. (length) x 61 ft. (width) x 4 ft. (depth) with 2 concrete pump out pits approximately 6 ft. (length) x 6 ft. (width) x 4 ft. (depth) and approximately 432 linear feet of 4 inch diameter perimeter drain tile and the portion of flooring over the pit consisting of plastic slats.

These livestock waste management facilities are used to collect, transport and/or store livestock wastes prior to cropland application.

Prime Pork, Inc.

Application for pollution control facility

This swine facility utilizes plastic slats in the building, with all waste contained & stored in the 4' deep pit under the building. The waste is then land applied using a flexible drag hose reel to adjoining fields. The concrete pumpouts, 6' x 6', allow for waste agitation & removal from the pit. An operator is at all times in view of the land application equipment in case of equipment failure.

PO Box 19276
Springfield, IL 62794-9281

Mr. Keller:

Included is an application for certification of a pollution control facility for Prime Pork, Inc.

This site already has existing certifications, but constructed a new facility in 2015 that also needs certification.

If you have any questions, please feel free to contact Carrie Pollard at Pipestone Veterinary Services at 815-756-3279.
