RECOMMENDATION

The Illinois Environmental Protection Agency (“Illinois EPA”) hereby files its Recommendation pursuant to Section 125.204 of the regulations of the Illinois Pollution Control Board (“Board”), 35 Ill. Adm. Code 125.204.

1. On December 30, 2019, the Illinois EPA received a request from Tim Schmidgall (log number TC-142733, **Exhibit A**) for an Illinois EPA recommendation regarding the tax certification of water pollution control facilities pursuant to 35 Ill. Adm. Code 125.204.¹
2. The facility’s address is:

Tim Schmidgall
2540 400 th Ave.
Emden, IL 62635

The proposed water pollution control facilities in this request are located in the SW ¼ of Section 11, T21N, R4W of the 3rd P.M. in Logan County, at the above street address and consist of the following:

Livestock waste handling facilities consisting of one concrete manure pit (approximately 201 ft. x 102 ft. x 8 ft.), the concrete slatted portion of the floor over the manure pit that captures and contains waste generated in the barn above, six pump out pits (each approximately 6 ft. x 6 ft. x 8 ft.) to allow manure removal from the manure pit, and perimeter drainage tiles (approximately 680 ft. x 6 in. Form-A-Drain) located around the footing of the manure pit to prevent flotation of the pit.

¹ To prevent confusion, Counsel for the Illinois EPA would like to note that three separate—but schematically identical—livestock waste handling facilities exist at the listed facility address and PIN. Each facility has a different owner and, therefore, the Illinois EPA has filed three separate recommendations with the Board.

These livestock waste management facilities are used to collect, transport, and/or store livestock waste prior to cropland application, and are further described in Exhibit A.

3. Section 11-10 of the Property Tax Code, 35 ILCS 200/11-10 (2018), and Section 125.200(a) of the Board's regulations, 35 Ill. Adm. Code 125.200(a), define "pollution control facilities" as:

any system, method, construction, device or appliance appurtenant thereto or any portion of any building or equipment, that is designed, constructed, installed or operated for the primary purpose of: eliminating, preventing, or reducing air or water pollution ...or treating, pretreating, modifying or disposing of any potential solid, liquid or gaseous pollutant which if released without treatment, pretreatment modification or disposal might be harmful, detrimental or offensive to human, plant or animal life, or to property.

4. In order to receive preferential tax treatment as pursuant to 35 ILCS 200/11-5 (2018), pollution control facilities must be certified as such by the Board, 35 ILCS 200/11-20 (2018) and 35 Ill. Adm. Code 125.200(a).
5. Upon receipt of a tax certification application, the Illinois EPA must file a recommendation on the application with the Board, 35 Ill Adm. Code 125.204(a).
6. Based on the information in the application and the purpose of the facility, it is the Illinois EPA's engineering judgment that the described facilities may be considered "pollution control facilities," pursuant to 35 Ill. Adm. Code 125.200(a), with the primary purpose of eliminating, preventing, or reducing water pollution, or as otherwise provided in 35 Ill. Adm. Code 125.200, and are eligible for tax certification from the Board.

WHEREFORE, the Illinois EPA recommends that the Board issue the requested tax certification.

Respectfully submitted,

ILLINOIS ENVIRONMENTAL
PROTECTION AGENCY

Re: Tim Schmidgall – Mackinaw
Recommendation of Tax Certification
Log# TC-142733
Property Index# 17-011-005-20

The Bureau of Water received a request on December 30, 2019 from Tim Schmidgall for an Illinois EPA recommendation regarding the tax certification of water pollution control facilities pursuant to 35 Ill. Adm. Code 125.204. We offer the following recommendation.

The water pollution control facilities in this request include the following:

Tim Schmidgall
30814 Townline Rd.
Mackinaw, IL 61755

SW ¼ of Section 11, T21N, R4W of the 3rd PM in Logan County

The livestock waste handling facilities consisting of one (1) concrete manure pit (approximately 201 ft. x 102 ft. x 8 ft.), the concrete slatted portion of the floor over the manure pit that capture and contain waste generated in the barn above, six (6) pumpout pits (approximately 6 ft. x 6 ft. x 8 ft. each) to allow manure removal from the manure pit, and perimeter drainage tiles (approximately 680 ft. x 6 in. Form-A-Drain) located around the footing of the manure pit to prevent flotation of the pit. The facility collects, transports and stores livestock waste prior to cropland application.

The facility is further described in the enclosed applications and supporting documents.

Based on the information included in this submittal, it is our engineering judgment that the above proposed facilities may be considered "Pollution Control Facilities" under 35 IAC 125.200(a), with the primary purpose of eliminating, preventing, or reducing water pollution, or as otherwise provided in this section, and therefore eligible for tax certification from the Illinois Pollution Control Board. The Bureau of Water therefore recommends that the Board issue the requested tax certification for these facilities.

If you have any questions regarding the above, please contact Wei Han at 217/782-0610.

Legal Description:
SW of Section: 11 Twp: 21N R: 4W PM: 3rd

County: Logan

Signature: Tim Schmidgall

Title: Owner

Date Control Devices installed: December 2018

- Wastes:
- Livestock waste is applied to cropland.
 - Agrichemical rinsate and spillage is recycled through the facility and/or land applied.
 - Other: _____

Physical Description of Pollution Control Devices:

The livestock waste handling facilities consist of one (1) concrete manure pit (approximately 201 ft. x 102 ft. x 8 ft) and the concrete slatted portion of the floor over the manure pit that capture and contain waste generated in the barn above. The concrete manure pit has six (6) pumpout pits (approximately 6 ft. x 6 ft. x 8 ft. each) to allow manure removal from the manure pit. Perimeter drainage tiles (approximately 680 ft. x 6 in. Form-A-Drain) are located around the footing of the manure pit to prevent flotation of the pit. The facility collects, transports and stores livestock waste prior to cropland application.

Pollution control facilities requested by the applicant through Description of Pollution Control Facilities, Section C of the application form and the attached drawings.

One (1) concrete manure pit; (approximately 201 ft. x 102 ft. x 8 ft)

Concrete slatted floor at the pit;

Pumpout pits attached to the manure pit, 6 x 6 ft. x 6 ft. x 8 ft.

Perimeter drainage tiles at the pit: 680 ft. x 6 in Form-A-Drain

A plan view of the pit is submitted with the application. A process flow diagram is submitted via email of 06/18/2020.

Recommended Action: Issue tax certification.

All,

FYI I have attached the signed mail receipt I have in my file regarding the date that the applications were received at the Illinois EPA. My request would be that the dates be applied in the database as having been received in 2019, since that is when the applications were received. Every consideration you could give to this matter is appreciated.

All,

As July 1 is just a week away, I would like to know the status of the applications we had submitted last year for a pollution control tax credit for hog buildings built in Logan County. The applications were prepared by Jacob Nims, Agricultural -Engineer at Frank & West Environmental Engineers, Inc.

I have been in contact with several of you, trying to get the process started. We submitted the applications in 2019, but were unaware that the applications were never started, and had been misplaced. Since there is a large tax savings attached with the certification of these buildings, I am anxious to know where the application stands today.

I now believe there are numbers assigned which are:

TC-142733 Tim Schmidgall
TC-142734 Jay Schmidgall
TC-142735 Randall Schmidgall

I hope knowing these numbers exist is a good sign that the status of the applications is moving through the proper channels, but I would appreciate an update if at all possible. If there is more information needed, I hope someone can let me know what is still needed.

Thank you for any help you may be able to give.

Manufacturing Process Information:

Please provide information on the manufacturing process and materials on which pollution control facility is used, including each major piece of equipment associated with the pollution control facility (or low sulfur dioxide emission coal fueled device).
Description of the Process:

Not applicable

Materials Used in the Process:

Not applicable

Pollution Control Facility Information:

Please provide a narrative description of the pollution control facility (or low sulfur dioxide emission coal fueled device), and an explanation of why its primary purpose is to eliminate, prevent or reduce pollution.

Describe the Pollution Control Facility (or Low Sulfur Dioxide Emission Coal Fueled Device):

A concrete pit with dimensions of 201' x 101'10" x 8' deep is used to store livestock waste until the appropriate time to apply the manure to agricultural fields at agronomic rates. The building has six (6) 6' x 6' x 8' deep pumpouts, 680' of 6" Form-a-Drain around the perimeter of the footings, and 20,000 ft² of precast concrete slats.

Describe the Primary Purpose of the Pollution Control Facility (or Low Sulfur Dioxide Emission Coal Fueled Device):

The primary purpose of the pit is to have a years worth of livestock manure storage to allow flexibility for application to agricultural fields when conditions are ideal.

Identify the statute or regulation (federal or state), or local ordinance, if any, requiring the installation of the subject pollution control facility (or low sulfur dioxide emission coal fueled device).

Not applicable

Nature of Contaminants or Pollutants:

List air contaminants or water pollution substances released as effluents to the manufacturing processes. Also list the final disposal of any contaminants removed from the manufacturing processes.

Contaminant or Pollutant	Material Retained, Captured or Recovered	
	Description	Disposal or Use
Livestock Manure	Stored in below ground concrete pit	Field applied at agronomic rates

Note: Contaminant or pollutant means that which is removed from the process by the pollution control facility.

Illinois Environmental Protection Agency

Point(s) of Waste Water Discharge:

Identify the location of the discharge to the receiving stream. This will typically refer to a source of water pollution but can include water-carried wastes from air pollution control facilities.

1021 North Grand Avenue East, P.O. Box 19278, Springfield, Illinois 62704-9278 (217) 782-3397

Plans and Specifications Attached Yes No

Submit Drawings, which clearly show:

- (a) Point(s) of discharge to receiving stream; and
- (b) Sewers and process piping to and from the control facility.

Are contaminants (or residues) collected by the control facility? Yes No

Note: If the collected contaminants are disposed of other than as wastes, state the disposition of the materials, and the value dollars reclaimed by the sale or reuse of the collected substances. State the cost of reclamation and related expense.

Project Status:

Date Installation Completed: 12-31-18

Provide the date the pollution control facility was first placed into service and operated. If not, explain.

12-31-18

Status of installation on date of application:

In use

III. Verification and Signature:

The following information is submitted in accordance with the Illinois Property Tax Code, as amended, and to the best of my knowledge is true and correct.

Any person who knowingly makes a false, fictitious, or fraudulent material statement, orally or in writing, to the Illinois EPA commits a Class 4 felony. A second or subsequent offense after conviction is a Class 3 felony. (415 ILCS 5/44(h))

Hi All,

I am wondering if there has been any of the applications found. We would like to have Logan County aware that this was requested before the end of the year, since there would have been a very large property tax savings. It will be due on July 1 and again on September 1. Is there any way that we could work together on this?

Your help is very much appreciated if we could unearth the applications and push them through your system.

All your questions are yes, except the address of the hog buildings is 2540 400th Avenue, Emden, IL 62635.

Ms. Schmidgall:

Good afternoon. I was recently (this month) assigned to review and make recommendations re: the subject tax certifications. I have the following questions:

1. Please confirm that there are three (3) different buildings / structures for which you / the listed owners are seeking certification as water pollution control facilities?
2. Are all three buildings / structures located at the same site, which you've identified by PIN 17-011-005-20 in Logan County?
3. The applications did not contain a street address for the site / facilities. Can you confirm that the nearest street address for all of the pollution control facilities would be: **RM Schmidgall Inc., 2530 400th Ave., Atlanta IL 61723**? This is the "site address" for the PIN you provided the Agency. If this is not correct, please provide the nearest street address(es).

Thank you for your assistance with this matter. I am working primarily remotely, so e-mail is the best way to reach me.

Respectfully,

-Gabe Neibergall

Subject: [External] FW: real estate taxes in Logan county

Good morning Darren,

I am writing on behalf of one of my pork producer members, the Schmidgall's in Logan Co. They applied for the tax certification in 2019 and haven't gotten any other updates since applying in 2019. In the meantime, they received their tax bill and it was taxed at 100% per building. Can you help me determine where this application is and what they can do to rectify the situation?

I am attaching the documents that the Schmidgall's shared with me for your review.

Thank you,

Jennifer

Subject: real estate taxes in Logan county

Jennifer,

Thank you for talking to me this morning. It is a relief to have someone listen and try to help us with this. We have talked with Nic Anderson, and he has tried to help as well. We appreciate any help we get, since this has moved like mud through the process. I am attaching all three applications. Each building is in a different name, but we received one tax bill under RM Schmidgall, Inc.

I mentioned seeing numbers attached to each application:

TC-142735 Randall Schmidgall

TC-142733 Tim Schmidgall

TC-142734 Jay Schmidgall

Thank you!

Marjorie Schmidgall
