**RECOMMENDATION OF THE ILLINOIS
ENVIRONMENTAL PROTECTION AGENCY**

The Illinois Environmental Protection Agency ("Illinois EPA") hereby files its Recommendation pursuant to Section 125.204 of the regulations of the Illinois Pollution Control Board ("Board"), 35 Ill. Adm. Code 125.204.

1. On April 3, 2020 and supplemented on May 25, 2020, the Illinois EPA received a request from Mills Farms-New Boston (log number TC-142502, Exhibit A) for an Illinois EPA recommendation regarding the tax certification of water pollution control facilities pursuant to 35 Ill. Adm. Code 125.204.
2. The facility's address is: Mills Farms
1274 44th Street
New Boston, Illinois 61272

The proposed water pollution control facilities in this request are located in the NW ¼ of Section 31, T15N, R5W of the 4th P.M. in Mercer County, at the above street address and consist of the following:

Livestock waste management facilities consisting of one concrete livestock waste pit (approximately 392.33 ft. x 52.16 ft. x 8 ft. deep), ten concrete pump out pits (each approximately 5 ft. x 6 ft. x 8 ft.), and the slotted concrete flooring over the entire area of this manure pit.

These livestock waste management facilities are used to collect, transport, and/or store livestock waste prior to cropland application, and are further described in Exhibit A.

3. Section 11-10 of the Property Tax Code, 35 ILCS 200/11-10 (2018), and Section 125.200(a) of the Board's regulations, 35 Ill. Adm. Code 125.200(a), define "pollution control facilities" as:

any system, method, construction, device or appliance appurtenant thereto or any portion of any building or equipment, that is designed, constructed, installed or operated for the primary purpose of: eliminating, preventing, or reducing air or water pollution ...or treating, pretreating, modifying or disposing of any potential solid, liquid or gaseous pollutant which if released without treatment, pretreatment modification or disposal might be harmful, detrimental or offensive to human, plant or animal life, or to property.

4. In order to receive preferential tax treatment as pursuant to 35 ILCS 200/11-5 (2018), pollution control facilities must be certified as such by the Board, 35 ILCS 200/11-20 (2018) and 35 Ill. Adm. Code 125.200(a).
5. Upon receipt of a tax certification application, the Illinois EPA must file a recommendation on the application with the Board, 35 Ill Adm. Code 125.204(a).
6. Based on the information in the application and the purpose of the facility, it is the Illinois EPA's engineering judgment that the described facilities may be considered "pollution control facilities," pursuant to 35 Ill. Adm. Code 125.200(a), with the primary purpose of eliminating, preventing, or reducing water pollution, or as otherwise provided in 35 Ill. Adm. Code 125.200, and are eligible for tax certification from the Board.

WHEREFORE, the Illinois EPA recommends that the Board issue the requested tax certification.

Re: Mills Farms - New Boston
Recommendation of Tax Certification
Log No.: TC-142502
BOW ID No.: W1310250005
Property Index Number: 01-02-31-100-009

The Bureau of Water received a request on April 3, 2020 from Mills Farms, having a principal place of business at 29007 190th Ave. W, Illinois City, IL 61259, for an Illinois EPA recommendation regarding the tax certification of water pollution control facilities pursuant to 35 Il. Adm. Code 125.204. We offer the following recommendation.

The water pollution control facilities in this request include the following:

Mills Farms
1274 44th Street
New Boston, IL 61272

NW 1/4 of Section 31, Township 15-North, Range 5-West of the West 4th PM in Mercer County.

Livestock waste management facilities consisting of:

One (1) concrete livestock waste pit measuring 392.33 ft. (length) x 52.16 ft. (width) x 8 ft. (depth) with 10 concrete pump out pits approximately 5 ft. (length) x 6 ft. (width) x 8 ft. (depth) and the slotted concrete flooring over the entire area of this manure pit.

These livestock waste management facilities are used to collect, transport and/or store livestock wastes prior to cropland application.

These facilities are further described in the enclosed applications and supporting documents.

Based on the information included in this submittal, it is our engineering judgment that the above proposed facilities may be considered "Pollution Control Facilities" under 35 IAC 125.200(a), with the primary purpose of eliminating, preventing, or reducing water pollution, or as otherwise provided in this section, and therefore eligible for tax certification from the Illinois Pollution Control Board. The Bureau of Water therefore recommends that the Board issue the requested tax certification for these facilities.

If you have any questions regarding the above, please contact Darren Gove at 217/782-0610.

Title: Owner

Contents of Application: New application form, facility diagram, process flow diagram, email dtd 5/25 with new drawn diagram and information.

Is there a pollutant control flow diagram? Yes

Is there sufficient diagrams showing the pollution control facilities? Yes

This facility generates the following pollutants and prevents their discharge as indicated:
Livestock waste is collected and land applied to cropland.

Physical description of pollution control facilities that ARE recommended:

Livestock waste management facilities consisting of:

One (1) concrete livestock waste pit measuring 392.33 ft. (length) x 52.16 ft. (width) x 8 ft. (depth) with 10 concrete pump out pits approximately 5 ft. (length) x 6 ft. (width) x 8 ft. (depth) and the slotted concrete flooring over the entire area of this manure pit.

These livestock waste management facilities are used to collect, transport and/or store livestock wastes prior to cropland application.

Good morning,

I am processing your request for tax certification of pollution control facilities for the subject operation. Based on my review of the application material, the request is deficient for the following reasons:

1. The application form does not disclose the PLSS Section number on which the requested facility resides (See Section II. Facility Information)
2. The application form does not disclose the Property index number (See Section II. Facility Information)
3. The diagram showing the features and dimensions of the pollution control facility is not legible enough for use and public records.

Electronic Filing: Received, Clerk's Office 1/8/2021 **PCB 2021-051**

Please provide a written response to the above items to address these deficiencies in no more than 30 days. I will call the phone number indicated to provide you notice of this email. If a response is not received within 30 days the Agency will consider the request withdrawn.

Kindest regards,

Darren Gove

This Agency is authorized to request this information under 415 ILCS 5/4(b)(2012). Disclosure of this information is voluntary and no penalties will result from the failure to provide the information. However, the absence of the information could prevent your application from being processed or could result in denial of your application.

Manufacturing Process Information:

Please provide information on the manufacturing process and materials on which pollution control facility is used, including each major piece of equipment associated with the pollution control facility (or low sulfur dioxide emission coal fueled device).
Description of the Process:

Materials Used in the Process:

Pollution Control Facility Information:

Please provide a narrative description of the pollution control facility (or low sulfur dioxide emission coal fueled device), and an explanation of why its primary purpose is to eliminate, prevent or reduce pollution. State the type of control facility, as well as a narrative description and a process flow diagram describing the pollution control facility. Include an average analysis of the influent and effluent of the control facility stating the collection efficiency, if applicable.

Describe the Pollution Control Facility (or Low Sulfur Dioxide Emission Coal Fueled Device): - 392.33 x 52.16

one concrete manure pit (391' x 50' x 8' deep) with concrete pump-out pits (each 5' x 6' x 8' deep) and the slotted concrete portion of the floor over the manure pit. see attached drawing.

Describe the Primary Purpose of the Pollution Control Facility (or Low Sulfur Dioxide Emission Coal Fueled Device):

contain manure and protect the water supply.

Identify the statute or regulation (federal or state), or local ordinance, if any, requiring the installation of the subject pollution control facility (or low sulfur dioxide emission coal fueled device).

Nature of Contaminants or Pollutants:

List air contaminants or water pollution substances released as effluents to the manufacturing processes. Also list the final disposal of any contaminants removed from the manufacturing processes.

| Contaminant or Pollutant | Material Retained, Captured or Recovered | |
|--------------------------|--|----------------------|
| | Description | Disposal or Use |
| Swine Manure | Swine Manure | Fertilizer for crops |
| | | |
| | | |
| | | |

Note: Contaminant or pollutant means that which is removed from the process by the pollution control facility.

Point(s) of Waste Water Discharge:

Identify the location of the discharge to the receiving stream. This will typically refer to a source of water pollution but can include water-carried wastes from air pollution control facilities.

Plans and Specifications Attached Yes No

Submit Drawings, which clearly show:

- (a) Point(s) of discharge to receiving stream; and
- (b) Sewers and process piping to and from the control facility.

Are contaminants (or residues) collected by the control facility? Yes No

Note: If the collected contaminants are disposed of other than as wastes, state the disposition of the materials, and the value dollars reclaimed by the sale or reuse of the collected substances. State the cost of reclamation and related expense.

Project Status:

Date Installation Completed: 12/12/2019

Provide the date the pollution control facility was first placed into service and operated. If not, explain.

Narrative Description of Pollution Control Facility

One wean-to-finish hog building measuring 391' x 50' x 8' deep pit. Building consists of concrete foundation and concrete slatted floors over 100% of the 391' x 50' x 8' deep pit. Finished grade around building prevents fresh water from running into pits. Manure storage is adequate to contain 14 months of manure production which will safely protect the well and nearby crop from contamination. We do not have an inspection port for checking manure leakage into groundwater which was NRCS approved. Manure from the pits will be pumped annually and applied through sub-surface injection at an appropriate agronomic rate to the nearby cropland.

Diagram Description (diagram found on next page):

- Grass vegetation surrounds building and field road
- 10 concrete pump outs measuring 5' x 6' x 8' deep protrude on both sides of the building foundation. Concrete pump outs indicate where the manure will be removed annually and then applied at an appropriate agronomic rate to neighboring cropland. Fig. 1
- Slatted concrete flooring over liquid manure pit. Fig. 2
