**RECOMMENDATION OF THE ILLINOIS  
ENVIRONMENTAL PROTECTION AGENCY**

The Illinois Environmental Protection Agency (“Illinois EPA”) hereby files its Recommendation pursuant to Section 125.204 of the regulations of the Illinois Pollution Control Board (“Board”), 35 Ill. Adm. Code 125.204.

1. On August 21, 2020, the Illinois EPA received a request from James McCune, (log number TC-143026, Exhibit A) for an Illinois EPA recommendation regarding the tax certification of water pollution control facilities pursuant to 35 Ill. Adm. Code 125.204.
2. The facility’s address is: James McCune  
2577 1945 North Avenue  
Sheffield, IL 61316

The proposed water pollution control facilities in this request are located in the SE ¼ of Section 21, T17N, R6E of the 4th PM, in Bureau County the above street address and consist of the following:

One (1) earthen holding pond (approximately 145 ft. x 145 ft. x 10 ft. with 3:1 side slopes), the concrete floor (approximately 80 ft. x 40 ft.) inside the truck wash building that collect manure and wastewater, a concrete sump pit (approximately 6 ft. dia. X 8 ft.), a PVC gravity pipe (approximately 20 ft. x 8 in.) that transfer manure and wastewater from the concrete slab to the sump pit, a submersible pump (10 HP with automatic controls) installed at the sump pit, and a PVC forcemain (approximately 35 ft. x 4 in.) that transfer manure and wastewater from the sump pit to the holding pond.

This facility is used to collect, transport, and/or store livestock waste prior to cropland application, and are further described in Exhibit A.

3. Section 11-10 of the Property Tax Code, 35 ILCS 200/11-10 (2014), and Section 125.200(a) of the Board's regulations, 35 Ill. Adm. Code 125.200(a), define "pollution control facilities" as:

any system, method, construction, device or appliance appurtenant thereto or any portion of any building or equipment, that is designed, constructed, installed or operated for the primary purpose of: eliminating, preventing, or reducing air or water pollution ...or treating, pretreating, modifying or disposing of any potential solid, liquid or gaseous pollutant which if released without treatment, pretreatment modification or disposal might be harmful, detrimental or offensive to human, plant or animal life, or to property.

4. In order to receive preferential tax treatment as pursuant to 35 ILCS 200/11-5 (2014), pollution control facilities must be certified as such by the Board, 35 ILCS 200/11-20 (2014) and 35 Ill. Adm. Code 125.200(a).
5. Upon receipt of a tax certification application, the Illinois EPA must file a recommendation on the application with the Board, 35 Ill Adm. Code 125.204(a).
6. Based on the information in the application and the purpose of the facility, it is the Illinois EPA's engineering judgment that the described facilities may be considered "pollution control facilities," pursuant to 35 Ill. Adm. Code 125.200(a), with the primary purpose of eliminating, preventing, or reducing water pollution, or as otherwise provided in 35 Ill. Adm. Code 125.200, and are eligible for tax certification from the Board.

WHEREFORE, the Illinois EPA recommends that the Board issue the requested tax certification.

Re: James McCune – Sheffield  
Recommendation of Tax Certification  
Log# TC-143026  
Property Index# 0721100001

The Bureau of Water received a request on August 21, 2020 from James McCune for an Illinois EPA recommendation regarding the tax certification of water pollution control facilities pursuant to 35 Ill. Adm. Code 125.204. We offer the following recommendation.

The water pollution control facilities in this request include the following:

James McCune M5 Truck Wash  
2577 1945 North Avenue  
Sheffield, IL 61316

SE ¼ of Section 21, T17N, R6E of the 4<sup>th</sup> PM in Bureau County

The livestock waste handling facilities consisting of one (1) earthen holding pond (approximately 145 ft. x 145 ft. x 10 ft with 3:1 side slopes), the concrete floor (approximately 80 ft. x 40 ft.) inside the truck wash building that collect manure and wastewater, a concrete sump pit (approximately 6 ft. dia. x 8 ft.), a PVC gravity pipe (approximately 20 ft. x 8 in.) that transfer manure and wastewater from the concrete slab to the sump pit, a submersible pump (10 HP with automatic controls) installed at the sump pit, and a PVC forcemain (approximately 35 ft. x 4 in.) that transfer manure and wastewater from the sump pit to the holding pond. The facility collects, transports and stores livestock waste prior to cropland application.

The facility is further described in the enclosed applications and supporting documents.

Based on the information included in this submittal, it is our engineering judgment that the above proposed facilities may be considered "Pollution Control Facilities" under 35 IAC 125.200(a), with the primary purpose of eliminating, preventing, or reducing water pollution, or as otherwise provided in this section, and therefore eligible for tax certification from the Illinois Pollution Control Board. The Bureau of Water therefore recommends that the Board issue the requested tax certification for these facilities.

If you have any questions regarding the above, please contact Wei Han at 217/782-0610.

Title: Owner

Date Control Devices installed: December 2007

Wastes:  Livestock waste is applied to cropland.  
 Agrichemical rinsate and spillage is recycled through the facility and/or land applied.  
 Other: \_\_\_\_\_

### Physical Description of Pollution Control Devices:

The pollution control facilities consist of one (1) earthen holding pond (approximately 145 ft. x 145 ft. x 10 ft with 3:1 side slopes), the sloped concrete floor (approximately 80 ft. x 40 ft.) inside the truck wash building that collect wastewater, a concrete sump pit (approximately 6 ft. dia. x 8 ft.), a PVC gravity pipe (approximately 20 ft. x 8 in.) that transfer manure and wastewater from concrete slab to the sump pit, a submersible pump (10 HP with automatic controls) installed at the sump pit, and a PVC forcemain (approximately 35 ft. x 4 in.) that transfer manure and wastewater from the sump pit to the holding pond. The facility collects, transports and stores manure and wastewater prior to cropland application.

Pollution control facilities requested by the applicant through Description of Pollution Control Facilities, Section C of the application form and the attached drawings.

One earthen holding pond (approximately 145 ft. x 145 ft. x 10 ft)  
Concrete floor (approximately 80 ft. x 40 ft.) inside the truck wash building  
Concrete sump pit (6 ft. dia. x 10 ft.);  
PVC gravity pipe (20 ft. x 8 in.)  
PVC forcemain (35 ft. x 4 in.)  
Submersible pump (10 HP)

A plan view of the pit and a process flow diagram are submitted with the application.

Recommended Action: Issue tax certification.

**Application for Certification (Property Tax Treatment)  
 Pollution Control Facility**

FOR AGENCY USE ONLY	
File Number: _____	Date Rec'd: _____
Certification Number: _____	Date: _____

Facility Type (check one):  Air  Water

This form is to be used for any application for certification of property tax treatment for a pollution control facility for air or water from the Illinois EPA. Separate applications must be completed for each control facility claimed. Do not mix types (air and water). <sup>Where both air and water operations are related, file two applications.</sup>

If attachments are needed, record them consecutively on an index sheet.

You may complete this form online, save a copy locally, print, sign and submit it to:

NPDES Permit Number: <u>2018-EO-63444</u>	Date Issued: <u>8/10/2018</u> Exp. Date: <u>6/30/2023</u>
APC Construction Permit Number: _____	Date Issued: _____
APC Operating Permit Number: _____	Date Issued: _____ Exp. Date: _____

Note: Submit copies of all relevant permits issued by local pollution control agencies. (e.g. MSD Construction Permit)

IL 532-0222 APC 151 9/2014 *This Agency is authorized to request this information under 415 ILCS 5/4(b)(2012). Disclosure of this information is voluntary and no penalties will result from the failure to provide the information. However, the absence of the information could prevent your application from being processed or could result in denial of your application.*

**Manufacturing Process Information:**

Please provide information on the manufacturing process and materials on which pollution control facility is used, including each major piece of equipment associated with the pollution control facility (or low sulfur dioxide emission coal fueled device).  
Description of the Process:

NA

**Materials Used in the Process:**

NA

**Pollution Control Facility Information:**

Please provide a narrative description of the pollution control facility (or low sulfur dioxide emission coal fueled device), and an explanation of why its primary purpose is to eliminate, prevent or reduce pollution. State the type of control facility, as well as a narrative description and a process flow diagram describing the pollution control facility. Include an average analysis of the influent and effluent of the control facility stating the collection efficiency, if applicable.

Describe the Pollution Control Facility (or Low Sulfur Dioxide Emission Coal Fueled Device):

See Attachment 1: Facility Pollution Control Facility Description

Describe the Primary Purpose of the Pollution Control Facility (or Low Sulfur Dioxide Emission Coal Fueled Device):

See Attachment 2: Purpose of the Pollution Control Facility

Identify the statute or regulation (federal or state), or local ordinance, if any, requiring the installation of the subject pollution control facility (or low sulfur dioxide emission coal fueled device).

Federal: Title 35, Subtitle E, Chapter I, Part 502&502; State: Title 8, Chapter 1, Subchapter t, Part 900

**Nature of Contaminants or Pollutants:**

List air contaminants or water pollution substances released as effluents to the manufacturing processes. Also list the final disposal of any contaminants removed from the manufacturing processes.

Contaminant or Pollutant	Material Retained, Captured or Recovered	
	Description	Disposal or Use
Swine Manure	Manure	Land Application for Crop Nutrients

Note: Contaminant or pollutant means that which is removed from the process by the pollution control facility.

**Point(s) of Waste Water Discharge:**

Identify the location of the discharge to the receiving stream. This will typically refer to a source of water pollution but can include water-carried wastes from air pollution control facilities.

Plans and Specifications Attached  Yes  No

Submit Drawings, which clearly show:

- (a) Point(s) of discharge to receiving stream; and
- (b) Sewers and process piping to and from the control facility.

Are contaminants (or residues) collected by the control facility?  Yes  No

Note: If the collected contaminants are disposed of other than as wastes, state the disposition of the materials, and the value dollars reclaimed by the sale or reuse of the collected substances. State the cost of reclamation and related expense.

**Project Status:**

Date Installation Completed: 12-31-2007

Provide the date the pollution control facility was first placed into service and operated. If not, explain.

See Attachment 3: Date of First Service

Status of installation on date of application:

See Attachment 4: Status of Installation

**III. Verification and Signature:**

The following information is submitted in accordance with the Illinois Property Tax Code, as amended, and to the best of my knowledge is true and correct.

*Any person who knowingly makes a false, fictitious, or fraudulent material statement, orally or in writing, to the Illinois EPA commits a Class 4 felony. A second or subsequent offense after conviction is a Class 3 felony. (415 ILCS 5/44(h))*

Application for Certification (Property Tax Treatment) Pollution Control Facility  
James McCune – M5 Wash  
By: Maurer-Stutz, Inc

**ATTACHMENT 1: Facility Pollution Control Facility Description**

The facility is a wash facility for tractor-trailers hauling swine. It consists of a roofed wash bay building and earthen holding pond. The facility is seeking certification on the following waste storage structures:

E5-7	80' x 40'	Truck Wash Building
E5-8	145' x 145' Top dimensions 85' x 85' Bottom dimensions	Earthen Holding Pond w/ clay liner

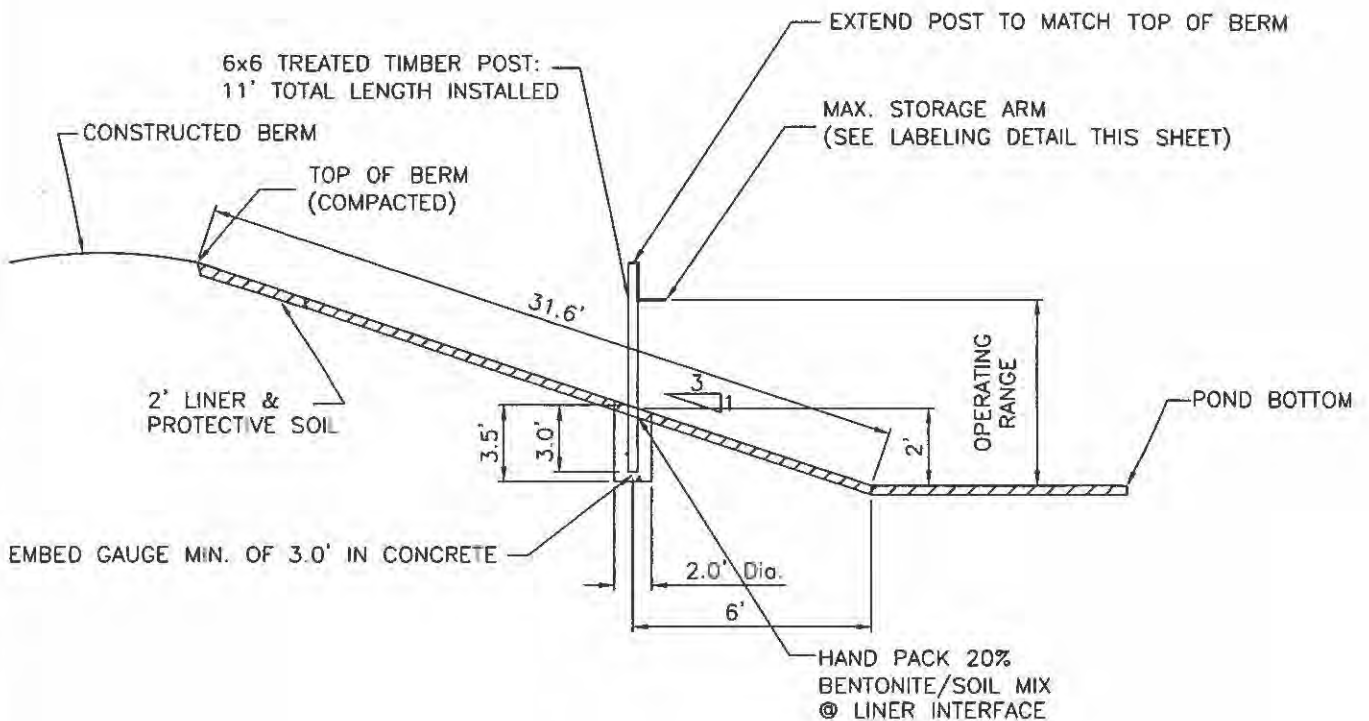

The structure labelled E5-7 is the truck wash building. It is a concrete slab roofed building. The floor slab slopes to the south. A gravity sewer pipe installed in the south side of the building collects and directs wastewater and manure washed out of trailers to a sump pit in the south east corner of the wash building. The sump pit is precast concrete, 6 ft diameter, and 8ft deep. There is 20' of 8" diameter SDR-35 PVC gravity sewer pipe to transfer manure from the truck wash to the sump pit. The sump pit contains a 10 HP, electric submersible pump with automated controls that will transfer manure and wastewater from the sump pit to the holding pond through 35' of 4" PVC forcemain.

The structure labelled E5-8 is an earthen holding pond. The pond is 10ft deep with side slopes at 3:1. The holding pond is lined with 2' of treated compacted clay material designed to be impervious to wastewater and manure. The structure serves as the waste storage for the for the truck wash facility. A 4" PVC forcemain pipe transfers wastewater to holding pond E5-8.

The facility protects ground and surface water by providing collection and storage of livestock waste and wastewater for around 6 to 12 months. The waste will be applied agronomically to cropland under proper soil and weather conditions.

**GENERAL NOTES**

1. STAFF GAUGE TO BE MADE OF PRESERVATIVE TREATED WOOD, CORROSION RESISTANT METAL
2. PAINT TOP OF GAUGE DOWN TO START PUMPING LEVEL RED. GRADUATIONS ARE ALSO RECOMMENDED
3. GAUGE SHOULD BE SECURED IN CONCRETE AS NEEDED TO PROVIDE STABILITY
4. EXTEND GAUGE TOP TO SAME ELEVATION AS THE TOP EDGE OF BERM
5. LABEL STAFF GAUGE AS INDICATED ON THE DRAWING
6. EXAMPLE GAUGE LABELS = USA BLUEBOOK PLANT PRO STYLE E

**WASTE STORAGE FACILITY

Terry,

I believe the concrete floor can be certified as part of wastewater collection system. Just confirm with you: The dimension of the concrete slab inside the building is 80 ft. by 40 ft.

This site did not have a truck wash?????

This is LTBS swine in Keenes Illinois. Should just be two swine barns and a composter. No Holding Pond.

Hi, Galye

I got the information I need. Thanks. I have clarification about this one. The truck wash building was listed as waste storage structure and required to be certified. The building does not meet the definition of pollution control facility and cannot be certified. The sump pit, HDPE pipes, pump, and the holding pond will be certified.

Wei,

How is the certification coming on this? Is everything complete on the application?

Hi, Gayle

What is the physical address for this swine farm?

Thanks,

Wei Han, P.E.
