Subject: errors in online rule document

Unsure who this should be addressed to, so I appreciate your understanding and guidance. Below are images of two errors in the enumeration for Subtitle F: Public Water Supplies; Part 604 that I thought were worth bringing to someone's attention:

d) an identification of the potential problems with and obstacles to implementing the plan.

Section 604.330 Submission

a) A community water supply that first commenced construction after July 26, 2019, must develop and submit a source water protection plan simultaneously with the construction permit application.

b) A community water supply in existence as of July 26, 2019, must develop and submit to the Agency for approval a source water protection plan within the following time frame after July 26, 2019:

- 1) within 3 years, for a community water supply serving a population greater than 50,000 persons;
- 2) within 4 years, for a community water supply serving a population of greater than 3,000 but less than or equal to 49,999 persons; or
- 3) within 5 years, for a community water supply serving a population of less than or equal to 2,999 persons.

d) An existing community water supply that anticipates using a new source of water for its supply must develop and submit a revised source water protection plan simultaneously with the construction permit application.

Section 604.335 Agency Approval

Thank you in advance for your help.
