#### Good morning, Jonathan:

I've attached two documents. The first document contains Board staff responses to your proposed Part 307 changes emailed to me on May 26, 2022. The second document is the JCAR line-numbered r01 referenced in your changes and our responses. Our responses include related changes prompted by your suggestions.

Thank you for your careful review. Please let me know if you have any questions.

Best regards,

#### Richard

Richard –

Attached are suggested first notice changes for the PCB rules published in Issue 20 of the *Illinois Register*. A few notes:

- 1. USC vs. U.S.C. Kim changed these to U.S.C. at publication to comply with the style guide. I understand that we've been changing U.S.C. to USC for years now and that the Board can't turn on a dime and easily reverse all of those earlier changes. JCAR's position is that we should make sure that the references in current and future rulemakings say U.S.C. but that having several residual USCs hanging about in the Code until their Sections are reopened shouldn't cause too much confusion.
- 2. IAC citations: We appreciated the initiative to make IAC citations more precise. Citations to other Parts should be preceded by "35 III. Adm. Code". However, across the Code the convention is for internal cross-references to refer to Section ###.### rather than to use the longer format. In the changes proposed, we did our best to standardize this.
- 3. Subsection headings: Although the convention in the CFR is for a subsection heading to capitalize only the first word and end with a period, the convention in the IAC is to use title case and no punctuation (unless the text of the subsection starts on the same line of the heading, in which case a period is added).
- 4. We've made a number of suggested changes to further clarify and simplify the language in these Parts in the spirit of the Board's initiative. Many of these would have been unilaterally made by Vicki at publication, but JCAR's current approach is much more collaborative. If we have been too aggressive in our proposals, please don't feel obliged to accept them.
- 5. Moving forward, especially on the really big rulemakings, would it be possible for the Board to submit revisions in predraft form first? That would enable changes to phrases that occur quite frequently without the need for individually written amendments (the number of proposals we've made for Part 307 is somewhat exceptional, and I imagine neither agency really relishes the prospect of similar lists...).

Thanks in advance for your consideration. Please let me know if you have any questions or concerns.

All the best,

Jonathan

- 914. In line 7219, after "from" add "<u>the</u>". Agree.
- 915. In line 7220, strike "whose" and add "for which the".

  Disagree. The word "whose" is used in 40 CFR 423.10, is more economical, and maintains parallel construction.
- 916. In line 7222, strike "utilizing" and add "<u>using</u>". **Agree.**

- 917. In line 7244, strike the comma.
  - a. Agree.
  - b. After "for" add "discharges of".
  - c. In line 7246, strike "discharges".
- 918. In lines 7265 and 7286, after "wastewater" add "discharges".

  Disagree. The phrase "as defined in 40 CFR 423.11(n)" refers to the definition of "FGD wastewater", not "FGD wastewater discharges". In lines 7264 and 7286, after "for" add "discharges of".
- 919. In lines 7266 and 7287, strike "discharges". **Agree.**
- 920. In line 7360, after "filing" add "<u>a</u>". **Agree.**
- 921. In line 7372, strike "an" and add "<u>a</u>". **Agree.**
- 922. In lines 7400-7401, strike "the construction of which commenced" and add "whose construction began".
  Disagree. See No. 56. Strike "the" and add "whose" and strike "of which".
- 923. In line 7413, after "combustion" add a comma. Agree.

- 934. In line 7446, strike "those". **Agree.**
- 935. In line 7448, strike "prior to" and add "before". a. Agree. Strike the comma. b. Disagree. The comma, which is used in 40 CFR 424.20, conveys to the reader that "collection and cleaning" is not continuing. After the second "and", add "in". c. Disagree. Conflicts with text of 40 CFR 424.20. The text change would refer to "in" electric furnaces, but the cleaning occurs in a wet air pollution control device. The existing text uses "which" to identify the type of off-gases, i.e., "furnace off-gases".
- 936. In line 7450, strike the first comma and add "or a". Strike ", etc". Agree. Strike "those".
- 937. In line 7452, after "smelting" strike the comma and add "or". a. Agree. Strike ", etc., where" and add "when". b. Disagree. The comma after "refining" sets off the non-restrictive "such as" clause from the restrictive "where these are controlled" clause at the end of the sentence. Strike "etc., where" and add "when".
- 938. In line 7454, strike "those". a. Agree. Strike "utilize" and add "use". b. Agree.

a) This Part places certain restrictions on the types, concentrations, and quantities of contaminants that can be discharged into sewer systems in the State.

657658

659

660

1) Subpart B includes standards for the discharge of contaminants to sewer systems. These apply to dischargers to publicly owned treatment works

1<sup>st</sup> Notice JCAR350307-2207274r01 661 (POTWs) and to dischargers to other types of treatment works, as 662 specified in each Section. 663 664 2) Subparts F through CT include standards for the discharge of contaminants from certain industrial source categories into POTWs. 665 666 667 b) 35 Ill. Adm. Code 310 specifies requirements for pretreatment programs for 668 POTWs. 669 670 This Part incorporates federal regulations by reference. c) 671 672 1) The incorporations include no later amendments or editions. 673 674 2) Except where the contrary is clearly indicated, the Board intends to set 675 forth all procedural requirements in full in this Part and 35 Ill. Adm. Code 676 310, and to utilize only the definitions, requirements, or standards from the 677 incorporated material. 678 679 3) Except where the contrary is clearly indicated, references to other federal 680 regulations within incorporated material are to be construed as referencing 681 Board regulations derived from the referenced material, rather than the other federal regulation. 682 683 (Source: Amended at 46 Ill. ## JCAR350307-2207274r01

789 790 791 792		The discharger is providing the best degree of treatment consistent with technological feasibility, economic reasonableness, and sound engineering judgment. This may include no treatment for mercury; and
792 793 794 795		4) The discharger has an inspection and maintenance program likely to reduce or to prevent an increase in the level of mercury discharges.
796 797 798 799	d)	The discharge of wastes from medicinal or therapeutic use of mercury, exclusive of laboratory use, will be exempt from the limitations of subsection (a) if all the following conditions are met:
300 301 302		1) The total plant discharge is less than 227 g (one half pound) as Hg in any year;
302 303 304		2) This discharge is to a public sewer system; and
305 306 307		The discharge does not, alone or in conjunction with other sources, cause the effluent from the sewer system or treatment plant to exceed $0.0005$ mg/ $\ell$ of mercury.
808 809 810 811 812 813	e)	No person may cause or allow any discharge of mercury to a publicly owned or publicly regulated sewer system which, alone or in combination with other sources, causes a violation by the sewer treatment plant discharge of the water quality standard of 35 Ill. Adm. Code 302 for mercury applicable in the receiving stream.
315 316 317 318 319 320	f)	For purposes of permit issuance, the Agency may consider application of the exception of subsection (b) or (c) to determine compliance with this Section. The Agency may impose permit conditions necessary or required to assure continued application of the exception. When subsection (b) or (c) applies, the Agency may impose an effluent limitation in the permit that allows the discharge of a concentration of mercury greater than 0.0005 mg/ $\ell$ but not more than 0.003 mg/ $\ell$ .
322 323 324 325 326 327	g)	The mercury standards of 35 III. Adm. Code 307.1102 will not apply to the Reilly Industries, Inc., Granite City, which discharges to any publicly-owned treatment works that receives such a manufacturing facility's wastewater. The amount of mercury discharged by any such manufacturing facility must not exceed a monthly average of $0.025 \text{ mg/}\ell$ nor a maximum of $0.035 \text{ mg/}\ell$ or 7.5 grams per day, subject to the Board's averaging rules during any one day.

333 334 335 336 337	a)	No waste to any public sewer system must contain more than $10 \text{ mg/}\ell$ total cyanide (STORET number 00720) provided any sample tested must not release more than $2 \text{ mg/}\ell$ of cyanide when tested at a pH of 4.5 and at a temperature of 66 °C (150 °F) for a period of 30 minutes, except as permitted by subsection (b).			
838 839 840 841 842	b)	Upon application by a county, municipality, sanitary district, or public utility and approval by the Agency, based upon determination by the Agency that no violation of the effluent standards of 35 Ill. Adm. Code 304 will result and that no hazard to workers in such sewage works will result, limited additional amounts of cyanide exceeding the standards in subsection (a) may be discharged to the sewage works of such county, sanitary district, municipality, or public utility.			
844 845 846 847	c)	Nothing in this Section may be construed as limiting the authority of any county, municipality, sanitary district, or public utility to impose any more stringent standards or limitations on cyanide discharges to its sewage works.			
348 349 350	d)	Any actions undertaken under subsection (b) will be subject to the limitations of 35 Ill. Adm. Code 307.2400(b)(7).

7180		• • • • • • • • • • • • • • • • • • •
7181	a)	Applicability. This Section applies to discharges resulting from operation of a
7182	/	generating unit by an establishment whose generation of electricity is the
7183		predominant source of revenue or principal reason for operation, and whose
7184		generation of electricity results primarily from a process utilizing fossil-type fuel
7185		(coal, oil, or gas), fuel derived from fossil fuel (e.g., petroleum coke, synthesis
7186		gas), or nuclear fuel in conjunction with a thermal cycle employing the steam
7187		water system as the thermodynamic medium. This Section applies to discharges
7188		associated with both the combustion turbine and steam turbine portions of a
7189		combined cycle generating unit.
7190		combined cycle generating unit.

BOARD NOTE: This subsection (c)(1)(A) derives from 40 CFR 423.13(g)(3)(i) and 423.19(h). USEPA calls VIP "Voluntary Incentives Program," and the Board evokes enough of that name as is evocative but stops short of using the same name. USEPA stated that its Voluntary Incentives Program applies only to direct discharges and is not finalized as to indirect discharges. 85 Fed. Reg. 64650, 64660, 64675 (Oct. 13, 2020). USEPA's rules, however, expressly contemplate applying its elements to indirect

Flue Gas Desulfurization (FGD) Wastewater Discharges by EGUs Initiating Cessation of Coal Burning. The owner or operator of an EGU that will undergo permanent cessation of coal combustion, as defined in 40 CFR 423.11(w), incorporated by reference in subsection (b), may seek to operate under alternative standards for FGD wastewater, as defined in 40 CFR 423.11(n), incorporated by reference in subsection (b), discharges as provided in 40 CFR 423.16(e)(1) after fulfilling the certification requirements in 40

BOARD NOTE: This subsection (c)(1)(B) derives from 40 CFR

Notice of Material Delay. An EGU that will undergo permanent cessation of coal combustion or one that opted into VIP under alternative standards under subsection (c)(1)(A) operating under alternative standards under subsection (c)(1)(B) must submit a notice of significant delay as required by 40 CFR 423.19(j).

BOARD NOTE: This subsection (c)(1)(C) derives from 40 CFR

(LUEGUs). The owner or operator of an EGU that qualifies as a LUEGU, as defined in 40 CFR 423.11(z), incorporated by reference in subsection (b), may seek to operate under the alternative standards for FGD wastewater, as defined in 40 CFR 423.11(n), incorporated by reference in subsection (b), discharges provided in 40 CFR 423.16(e)(2) after fulfilling the certification requirements in 40 CFR 423.19(a), (b), and (e).

BOARD NOTE: This subsection (c)(1)(D) derives from 40 CFR

- E) Bottom Ash (BA) Transport Water Discharges. Discharge of BA transport water, as defined in 40 CFR 423.11(p), incorporated by reference in subsection (b), is prohibited and only allowed as provided in 40 CFR 423.16(g) after complying with the best management practices requirements of 40 CFR 423.13(k)(3) and fulfilling the certification requirements in 40 CFR 423.19(a) through (d).
  - BOARD NOTE: This subsection (c)(1)(E) derives from 40 CFR 423.13(k)(3), 423.16(g), and 423.19(c) and (d).
- F) EGUs Seeking to Transfer Between Applicable Discharge Limitations. Subject to the limitations in subsection (c)(1)(G), the owner or operator of an EGU may seek to transfer applicable discharge standards, as provided in 40 CFR 423.13(o), after fulfilling the certification requirements in 40 CFR 423.19(a), (b), and (i). The permissible transfers are the following:
  - i) Before December 31, 2023, from limitations applicable to an EGU initiating cessation of coal combustion under subsection (c)(1)(B) to those applicable to a LUEGU under subsection (c)(1)(D);
  - ii) Before December 31, 2023, from VIP limitations under subsection (c)(1)(A) to those applicable to a LUEGU under subsection (c)(1)(D);
  - iii) Before December 31, 2025, from VIP limitations under subsection (c)(1)(A) to those applicable to an EGU initiating cessation of coal combustion under subsection (c)(1)(D);
  - iv) Before December 31, 2025, from limitations applicable to an EGU initiating cessation of coal combustion under subsection (c)(1)(B) to VIP limitations under subsection (c)(1)(A);
  - v) Before December 31, 2025, from limitations applicable to a LUEGU under subsection (c)(1)(D) to generally applicable limitations for discharges of FGD wastewater and BA transport water under 40 CFR 423.16;

11180			
11181	Section 307	.7300 G	General Provisions
11182			
11183	a)	Appli	icability
11184			
11185		1)	This Subpart CL applies to any plastics molding and forming process that
11186			introduces or may introduce process wastewater pollutants into a POTW.
11187			Plastics molding and forming processes include processes that blend,
11188			mold, form, or otherwise process plastic materials into intermediate or
11189			final plastic products. They include commonly recognized processes such
11190			as extrusion, molding, coating and laminating, thermoforming,
11191			calendering, casting, foaming, cleaning, and finishing.
11192			
11193		2)	Plastics molding and forming processes (e.g., extrusion and pelletizing)
11194			used by plastics resin manufacturers to process crude intermediate plastic
11195			material for shipment off-site are excluded from this regulation and
11196			regulated under the organic chemicals, plastics, and synthetic fibers
11197			category. Plastics molding and forming processes used by plastic resin
11198			manufacturers to process crude intermediate plastic materials, which are
11199			further processed on-site into intermediate or final plastics products in
11200			molding and forming processes, are controlled by this Subpart CL.
11201			
11202		3)	Processes that coat a plastic material onto a substrate may fall within the
11203			definition of electroplating and metal finished as defined in Subpart N or
11204			AH. These coating processes are excluded from the electroplating and
11205			metal finishing point source categories and are subject to this Subpart CL.
11206			
11207		4)	Coating of plastic material onto a formed metal substrate is also covered
11208		•	by this Subpart and is not covered by the specific metal forming guidelines
11209			such as aluminum forming, copper forming and nonferrous metals forming
11210			(Subparts BP, BQ, and BT). This Subpart CL applies only to the coating
11211			process; the metal forming operations are subject to the specific metal
11212			forming regulation.
11213			-

11214 11215 11216 11217 11218 11219 11220			5)	Research and development laboratories that produce plastic products using a plastics molding and forming process are subject to this Subpart CL if the plastics molding and forming process discharges process water. The mass of plastic product produced in the plastics molding and forming process is not considered when determining the applicability of this Subpart CL to plastics molding and forming processes at research and development laboratories.
11221				
11222			6)	Chemical and thermal reticulation processes for polyurethane foam are not
11223				subject to this Subpart CL. Water used in those processes is not
11224				considered to be process water as defined in this regulation. Processes
11225				used to further mold or form the reticulated foam are subject, however, to
11226				this regulation if they discharge process water.
11227			7)	D 14 4 11 1 1 1 1 4 1
11228			7)	Processes used to regenerate cellulose and to produce a product (e.g.,
11229				rayon) from the regenerated cellulose are not subject to the limitations and
11230				standards in this Subpart. Processes that mold or form cellulose
11231				derivatives (e.g., cellulose acetate) are subject to this Subpart CL if they
11232				discharge process water.

1st Notice JCAR350307-2207274r01

11742 11743 1) Aluminum forming includes commonly recognized forming operations such as rolling, drawing, extruding and forging, and related operations 11744 such as heat treatment, casting, and surface treatments. Surface treatment 11745 11746 of aluminum is any chemical or electrochemical treatment applied to the surface of aluminum. Such surface treatment is considered to be a part of 11747 aluminum forming whenever it is performed as an integral part of 11748 11749 aluminum forming. For the purposes of this Subpart CP, surface treatment of aluminum is considered to be an integral part of aluminum forming 11750 whenever it is performed at the same plant site at which aluminum is 11751 formed and such operations are not considered for regulation under the 11752 11753 electroplating and metal finishing provisions of Subparts N and AH. Casting aluminum when performed as an integral part of aluminum 11754 forming and located on-site at an aluminum forming plant is considered an 11755 aluminum forming operation and is covered under this Subpart CP. When 11756 aluminum forming is performed on the same site as primary aluminum 11757 reduction the casting must be regulated by Subpart CT (nonferrous metals) 11758 if there is no cooling of the aluminum prior to casting. If the aluminum is 11759 11760 cooled prior to casting then the casting must be regulated by this Subpart CP. 11761 11762 11763 2) This Subpart CP applies to any aluminum forming facility, except for plants identified under subsection (a)(3), which introduces or may 11764 introduce pollutants into a POTW. 11765 11766 11767 3) This Subpart CP applies to indirect discharging aluminum forming plants 11768 that extrude less than three million pounds of product per year and draw, with emulsions or soaps, less than one million pounds per year. 11769 11770 11771 b) General definitions.
