Good morning, Mr. Clerk:

Please docket, as a public comment in R22-18, this email message and its attachment of comments from JCAR.

Thank you.

Richard R. McGill, Jr.
Senior Attorney for Research & Writing
Illinois Pollution Control Board
60 E. Van Buren St., Suite 630
Chicago, Illinois 60605

Subject: [External] JCAR comments on 35-620-24-04608

Good morning,

You will find JCAR comments on the mentioned rulemaking attached. The bulk of comments regard alphabetization and the use of italics in the definition section. Please address these issues as first notice changes.

Let me know if there are any questions.

Best,

Toby Rivas
Joint Committee on Administrative Rules
(217) 785-2254

TITLE 35: ENVIRONMENTAL PROTECTION
SUBTITLE F: PUBLIC WATER SUPPLIES
CHAPTER I: POLLUTION CONTROL BOARD

PART 620
GROUNDWATER QUALITY

SUBPART A: GENERAL

10	Section	
11	620.105	Purpose
12	620.110	Definitions
13	620.115	Prohibition
14	620.125	Incorporations by Reference
15	620.130	Exemption from General Use Standards and Public and Food Processing Water Supply Standards
16		
17	620.135	Exclusion for Underground Waters in Certain Man-Made Conduits

SUBPART B: GROUNDWATER CLASSIFICATION

21	Section	
22	620.201	Groundwater Designations
23	620.210	Class I: Potable Resource Groundwater
24	620.220	Class II: General Resource Groundwater
25	620.230	Class III: Special Resource Groundwater
26	620.240	Class IV: Other Groundwater
27	620.250	Groundwater Management Zone
28	620.260	Reclassification of Groundwater by Adjusted Standard

SUBPART C: NONDEGRADATION PROVISIONS
FOR APPROPRIATE GROUNDWATERS

33	Section	
34	620.301	General Prohibition Against Use Impairment of Resource Groundwater
35	620.302	Applicability of Preventive Notification and Preventive Response Activities
36	620.305	Preventive Notification Procedures
37	620.310	Preventive Response Activities

SUBPART D: GROUNDWATER QUALITY STANDARDS

41	Section	
42	620.401	Applicability
43	620.405	General Prohibitions Against Violations of Groundwater Quality Standards

- 44 620.410 Groundwater Quality Standards for Class I: Potable Resource Groundwater
- 45 620.420 Groundwater Quality Standards for Class II: General Resource Groundwater
- 46 620.430 Groundwater Quality Standards for Class III: Special Resource Groundwater
- 47 620.440 Groundwater Quality Standards for Class IV: Other Groundwater
- 48 620.450 Alternative Groundwater Quality Standards

49
50 SUBPART E: GROUNDWATER MONITORING AND ANALYTICAL PROCEDURES

- 51
- 52 Section
 - 53 620.505 Compliance Determination
 - 54 620.510 Monitoring and Analytical Requirements

55
56 SUBPART F: HEALTH ADVISORIES

- 57
- 58 Section
 - 59 620.601 Purpose of a Health Advisory
 - 60 620.605 Issuance of a Health Advisory
 - 61 620.610 Publishing Health Advisories
 - 62 620.615 Additional Health Advice for Mixtures of Similar-Acting Substances

- 63
- 64 620.APPENDIX A Procedures for Determining Human ~~Threshold~~-Toxicant Advisory
 - 65 [ConcentrationsConcentration](#) for Class I: Potable Resource
 - 66 Groundwater
 - 67 620.APPENDIX B Procedures for Determining Hazard Indices for Class I: Potable
 - 68 Resource Groundwater for Mixtures of Similar-Acting Substances
 - 69 620.APPENDIX C Guidelines for Determining When Dose Addition of Similar-
 - 70 Acting Substances in Class I: Potable Resource Groundwaters is
 - 71 Appropriate
 - 72 620.APPENDIX D [Groundwater Management Zone Application underConfirmation of](#)
 - 73 [an Adequate Corrective Action Pursuant to](#) 35 Ill. Adm. Code
 - 74 [620.250\(b\) and Corrective Action Completion Certification under](#)
 - 75 [35 Ill. Adm. Code 620.250\(d\)\(a\)\(2\)](#)
 - 76 [620.APPENDIX E](#) [Similar-Acting Substances](#)
 - 77 [620.TABLE A](#) [Similar-Acting Noncarcinogenic Constituents](#)
 - 78 [620.TABLE B](#) [Similar-Acting Carcinogenic Constituents](#)

79
80 AUTHORITY: Implementing and authorized by Section 8 of the Illinois Groundwater
81 Protection Act [415 ILCS 55/8] and authorized by Section 27 of the Illinois Environmental
82 Protection Act [415 ILCS 5/27].

83
84 SOURCE: Adopted in R89-14(B) at 15 Ill. Reg. 17614, effective November 25, 1991; amended
85 in R89-14(C) at 16 Ill. Reg. 14667, effective September 11, 1992; amended in R93-27 at 18 Ill.
86 Reg. 14084, effective August 24, 1994; amended in R96-18 at 21 Ill. Reg. 6518, effective May 8,

87 1997; amended in R97-11 at 21 Ill. Reg. 7869, effective July 1, 1997; amended in R01-14 at 26
88 Ill. Reg. 2662, effective February 5, 2002; amended in R08-18 at 36 Ill. Reg. 15206, effective
89 October 5, 2012; amended in R08-18(B) at 37 Ill. Reg. 16529, effective October 7, 2013;
90 amended in R22-18 at 48 Ill. Reg. _____, effective _____.

91
92 SUBPART A: GENERAL

93
94 **Section 620.105 Purpose**

95
96 This Part ~~specifies regulatory requirements for~~prescribes various aspects of groundwater quality,
97 including method of classification of ~~groundwater~~groundwaters, nondegradation provisions,
98 standards for quality of ~~groundwater~~groundwaters, and various procedures and protocols for the
99 management and protection of ~~groundwater~~groundwaters.

100 (Source: Amended at 48 Ill. Reg. _____, effective _____)

101
102
103 **Section 620.110 Definitions**

104
105 The definitions of the Environmental Protection Act [415 ILCS 5] and the Groundwater
106 Protection Act [415 ILCS 55] apply to this Part. The following definitions also apply to this
107 Part:

108 "Act" means the Environmental Protection Act [415 ILCS 5].

109
110 "Agency" means the Illinois Environmental Protection Agency.

111
112
113 *"Aquifer" means saturated (with groundwater) soils and geologic materials which*
114 *are sufficiently permeable to readily yield economically useful quantities of water*
115 *to wells, springs, or streams under ordinary hydraulic gradients. [415 ILCS*
116 *55/3(b)]*

117
118 "BETX" means the sum of the concentrations of benzene, ethylbenzene, toluene,
119 and xylenes.

120
121 "Board" means the Illinois Pollution Control Board.

122
123 "Chemical Abstract Services Registry Number" or "CASRN" means a unique
124 numerical identifier designated for only one substance, assigned by the Chemical
125 Abstracts Service for the substance.

126
127 *"Carcinogen" means a contaminant that is classified as a Category A1 or A2*
128 *Carcinogen by the American Conference of Governmental Industrial Hygienists;*
129 *or a Category 1 or 2A/2B carcinogen by the World Health Organization's*

Commented [RT1]: Please move so definitions are properly alphabetized.

130 *International Agency for Research on Cancer; or a "Human carcinogen" or*
131 *"Anticipated Human Carcinogen" by the United States Department of Health and*
132 *Human Service National Toxicological Program; or a Category A or B1/B2*
133 *Carcinogen or as "carcinogenic to humans" or "likely to become carcinogenic to*
134 *humans" by the United States Environmental Protection Agency in Integrated*
135 *Risk Information System or a Final Rule issued in a Federal Register notice by*
136 *the USEPA. [415 ILCS 5/58.2]*
137

138 *"Community water supply" means a public supply which serves or is intended to*
139 *serve at least 15 service connections used by residents or regularly serves at least*
140 *25 residents. [415 ILCS 5/3.145]*
141

142 *"Contaminant" means any solid, liquid, or gaseous matter, any odor, or any form*
143 *of energy, from whatever source. [415 ILCS 5/3.165]*
144

145 *"Corrective action process" means ~~the~~those procedures and practices that ~~may be~~*
146 *~~imposed by~~ a regulatory agency ~~may impose or perform~~ when a determination has*
147 *~~been made that contamination of groundwater has taken place, and are necessary~~*
148 *to address a potential or existing violation of any Subpart D standard due to a*
149 *release of one or more contaminants ~~the standards set forth in Subpart D.~~*
150

151 *"Cumulative impact area" means the area, including the coal mine area permitted*
152 *under the Surface Coal Mining Land Conservation and Reclamation Act [225*
153 *ILCS 720] and 62 Ill. Adm. Code 1700 through 1850, within which impacts*
154 *resulting from the proposed operation may interact with the impacts of all*
155 *anticipated mining on surface water and groundwater systems.*
156

157 *"Department" means the Illinois Department of Natural Resources.*
158

159 *"Detection" means the identification of a contaminant in a sample at a value equal*
160 *to or greater than the:*
161

162 *"Method Detection Limit" or "MDL" ~~means the minimum concentration~~*
163 *~~of a substance that can be measured as reported with 99 percent~~*
164 *~~confidence that the true value is greater than zero, pursuant to 40 CFR~~*
165 *~~136, appendix B (2006), incorporated by reference at Section 620.125; or~~*
166

167 *"~~Lower Limit of Quantitation~~Method Quantitation Limit" or*
168 *"~~LLOMQL~~" means the minimum concentration of a substance that can*
169 *~~be measured and reported pursuant to "Test Methods for Evaluating Solid~~*
170 *~~Wastes, Physical/Chemical Methods", incorporated by reference at~~*
171 *~~Section 620.125.~~*
172

173 "Groundwater" means underground water which occurs within the saturated zone
174 and geologic materials where the fluid pressure in the pore space is equal to or
175 greater than atmospheric pressure. [415 ILCS 5/3.210]
176

177 "Hydrologic balance" means the relationship between the quality and quantity of
178 water inflow to, water outflow from, and water storage in a hydrologic unit such
179 as a drainage basin, aquifer, soil zone, lake, or reservoir. It encompasses the
180 dynamic relationships among precipitation, runoff, evaporation, and changes in
181 ground and surface water storage.
182

183 "IGPA" means the Illinois Groundwater Protection Act. [415 ILCS 55].
184

185 "Lowest Concentration Minimum Reporting Level" or "LCMRL" means the
186 lowest spiking concentration such that the probability of spike recovery in the
187 50% or 150% range is at least 99%.
188

189 "Lower Limit of Quantitation" or "LLOQ" means the minimum concentration of a
190 substance that can be measured or reported under "Test Methods of Evaluation
191 Solid Wastes, Physical/Chemical Methods", incorporated by reference at Section
192 620.125.
193

194 "Lowest observable adverse effect level" or "LOAEL" or "Lowest observable
195 adverse effect level" means the lowest tested concentration of a chemical or
196 substance that produces a statistically significant increase in frequency or severity
197 of non-overt adverse effects between the exposed population and its appropriate
198 control. ~~LOAEL may be determined for a human population (LOAEL-H) or an~~
199 ~~animal population (LOAEL-A).~~
200

201 "Licensed Professional Engineer" or "LPE" means a person, corporation, or
202 partnership licensed under the laws of the State of Illinois to practice professional
203 engineering. [415 ILCS 5/57.2]
204

205 "Licensed Professional Geologist" or "LPG" means an individual who is licensed
206 under the Professional Geologist Licensing Act to engage in the practice of
207 professional geology in Illinois. [225 ILCS 745/15]
208

209 "Method Detection Limit" or "MDL" means the minimum measured
210 concentration of a substance that can be reported with 99% confidence that the
211 measured concentration is distinguishable from method blank results as
212 determined under 40 CFR 136, appendix B (2017), incorporated by reference at
213 Section 620.125.
214

215 "Mutagen" means a carcinogen that can induce an alteration in the structure of

Commented [RT2]: Add citation for italicized text—does not appear to be in 415 ILCS 5/57.2

Commented [RT3]: This does not appear to be statutory text, as statutory text typically does not refer to particular incorporations by reference in this way. Recommend reviewing use of italics in this Part.

Commented [RT4]: Move so definitions are alphabetized

216 DNA.

217
218 "NOAEL" or "No observable adverse effect level" or "NOAEL" means the
219 highest tested concentration of a chemical or substance that does not produce a
220 statistically significant increase in frequency or severity of non-overt adverse
221 effects between the exposed population and its appropriate control. ~~NOAEL may~~
222 ~~be determined for a human population (NOAEL-H) or an animal population~~
223 ~~(NOAEL-A).~~

224
225 "*Non-community water supply*" means a public water supply that is not a
226 community water supply. [415 ILCS 5/3.145]

227
228 "Off-site" means not on-site.

229
230 "On-site" means on the same or geographically contiguous property that may be
231 divided by public or private right-of-way, provided the entrance and exit between
232 properties is at a crossroads intersection and access is by crossing as opposed to
233 going along the right-of-way. Noncontiguous properties owned by the same
234 person but connected by a right-of-way that he controls and that the public does
235 not have access to is also considered on-site property.

236
237 "Operator" means the person responsible for the operation of a site, facility or
238 unit.

239
240 "Owner" means the person who owns a site, facility, or unit; ~~or~~ part of a site,
241 facility, or unit; ~~;~~ or who owns the land on which the site, facility, or unit is
242 located.

243
244 "*Potable*" means generally fit for human consumption in accordance with
245 accepted water supply principles and practices. [415 ILCS 5/3.340]

246
247 "*Potential primary source*" means any unit at a facility or site not currently
248 subject to a removal or remedial action which:

249
250 *Is utilized for the treatment, storage, or disposal of any hazardous or*
251 *special waste not generated at the site; or*

252
253 *Is utilized for the disposal of municipal waste not generated at the site,*
254 *other than landscape waste and construction and demolition debris; or*

255
256 *Is utilized for the landfilling, land treating, surface impounding or piling*
257 *of any hazardous or special waste that is generated on the site or at other*
258 *sites owned, controlled or operated by the same person; or*

Stores or accumulates at any time more than 75,000 pounds above ground, or more than 7,500 pounds below ground, of any hazardous substances. [415 ILCS 5/3.345]

"Potential route" means abandoned and improperly plugged wells of all kinds, drainage wells, all injection wells, including closed loop heat pump wells, and any excavation for the discovery, development or production of stone, sand or gravel. This term does not include closed loop heat pump wells using USP (U.S. Pharmacopeia) food grade propylene glycol. [415 ILCS 5/3.350]

"Potential secondary source" means any unit at a facility or a site not currently subject to a removal or remedial action, other than a potential primary source, which:

Is utilized for the landfilling, land treating, or surface impounding of waste that is generated on the site or at other sites owned, controlled or operated by the same person, other than livestock and landscape waste, and construction and demolition debris; or

Stores or accumulates at any time more than 25,000 but not more than 75,000 pounds above ground, or more than 2,500 but not more than 7,500 pounds below ground, of any hazardous substance; or

Stores or accumulates at any time more than 25,000 gallons above ground, or more than 500 gallons below ground, of petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a hazardous substance; or

Stores or accumulates pesticides, fertilizers, or road oils for purposes of commercial application or for distribution to retail sales outlets; or

Stores or accumulates at any time more than 50,000 pounds of any de-icing agent; or

Is utilized for handling livestock waste or for treating domestic wastewaters other than private sewage disposal systems as defined in the Private Sewage Disposal Licensing Act [225 ILCS 225]. [415 ILCS 5/3.355]

"Practical Quantitation Limit" or "PQL" means the lowest concentration or level that can be reliably measured within specified limits of precision and accuracy during routine laboratory operating conditions in accordance with "Test Methods

302 [for Evaluating Solid Wastes, Physical/Chemical Methods", EPA Publication No.](#)
303 [SW-846, incorporated by reference at Section 620.125.](#)

304
305 "Previously mined area" means land disturbed or affected by coal mining
306 operations prior to February 1, 1983.

307 BOARD NOTE: February 1, 1983, is the effective date of the Illinois [Department](#)
308 [of Natural Resources Permanent Program](#) permanent program regulations [\(62 Ill.](#)
309 [Adm. Code 1800 through 1850\)](#) implementing the Surface Coal Mining Land
310 Conservation and Reclamation Act [225 ILCS 720], as [specified](#) ~~defined~~ in 62 Ill.
311 Adm. Code [1700.11\(c\)1700 through 1850](#).

312
313 "Property class" means the class assigned by a tax assessor to real property for
314 purposes of real estate taxes.

315 BOARD NOTE: The property class (rural property, residential vacant land,
316 residential with dwelling, commercial residence, commercial business,
317 commercial office, or industrial) is identified on the property record card
318 maintained by the tax assessor [according to in accordance with](#) the Illinois Real
319 Property Appraisal Manual (February 1987), published by the Illinois Department
320 of Revenue, Property Tax Administration Bureau.

321
322 *"Public water supply" means all mains, pipes and structures through which water*
323 *is obtained and distributed to the public, including wells and well structures,*
324 *intakes and cribs, pumping stations, treatment plants, reservoirs, storage tanks*
325 *and appurtenances, collectively or severally, actually used or intended for use for*
326 *the purpose of furnishing water for drinking or general domestic use and which*
327 *serve at least 15 service connections or which regularly serve at least 25 persons*
328 *at least 60 days per year. A public water supply is either a "community water*
329 *supply" or a "non-community water supply". [415 ILCS 5/3.365]*

330
331 "Regulated entity" means a facility or unit regulated for groundwater protection
332 by any State or federal agency.

333
334 "Regulatory agency" means the Illinois Environmental Protection Agency,
335 Department of Public Health, Department of Agriculture, the Office of Mines and
336 Minerals in the Department of Natural Resources, and the Office of State Fire
337 Marshal.

338
339 *"Regulated recharge area" means a compact geographic area, as determined by*
340 *the Board [underpursuant to](#) Section 17.4 of the Act, the geology of which renders*
341 *a potable resource groundwater particularly susceptible to contamination. [415*
342 *ILCS 5/3.390]*

343
344 *"Resource groundwater" means groundwater that is presently being, or in the*

Commented [RT5]: Move so definitions are alphabetical.

345 *future is capable of being, put to beneficial use by reason of being of suitable*
346 *quality. [415 ILCS 5/3.430]*
347

348 "Saturated zone" means a subsurface zone in which all the interstices or voids are
349 filled with water under pressure greater than that of the atmosphere.

350
351 *"Setback zone" means a geographic area, designated pursuant to this Act,*
352 *containing a potable water supply well or a potential source or potential route*
353 *having a continuous boundary, and within which certain prohibitions or*
354 *regulations are applicable in order to protect groundwaters. [415 ILCS 5/3.450]*
355

356 *"Site" means any location, place, tract of land and facilities, including but not*
357 *limited to, buildings and improvements used for the purposes subject to regulation*
358 *or control by the Act or regulations thereunder. [415 ILCS 5/3.460]*
359

360 "Spring" means a natural surface discharge of an aquifer from rock or soil.

361
362 "Threshold dose" means the lowest dose of a chemical at which a specified
363 measurable effect is observed and below which it is not observed.

364
365 "Treatment" means the technology, treatment techniques, or other procedures for
366 compliance with 35 Ill. Adm. Code, Subtitle F.

367
368 *"Unit" means any device, mechanism, equipment, or area (exclusive of land*
369 *utilized only for agricultural production). [415 ILCS 5/3.515]*
370

371 "[U.S. EPAUSEPA](#)" means the United States Environmental Protection Agency.

372
373 "Wellhead protection area" or "WHPA" means the surface and subsurface
374 recharge area surrounding a community water supply well or well field,
375 delineated outside of any applicable setback zones ~~under(pursuant to~~ Section 17.1
376 of the Act [415 ILCS 5/17.1]), and ~~pursuant to~~ Illinois' Wellhead Protection
377 Program, through which contaminants are reasonably likely to move toward such
378 well or well field.

379
380 "Wellhead Protection Program" or "WHPP" means the wellhead protection
381 program for the State of Illinois, approved by [U.S. EPAUSEPA](#) under 42 USC
382 300h-7.

383 BOARD NOTE: Derived from 40 CFR 141.71(b) (2003). The wellhead
384 protection program includes the "groundwater protection needs assessment" under
385 Section 17.1 of the Act [415 ILCS 5/17.1] and 35 Ill. Adm. Code 615-617.

619
620 SUBPART B: GROUNDWATER CLASSIFICATION

621
622 **Section 620.201 Groundwater Designations**

623 All groundwaters of the State are designated as:

624
625 a) One of the following four classes of groundwater in [according to accordance with](#)
626 Sections 620.210 through 620.240:

627
628 1) Class I: Potable Resource Groundwater;

629
630 2) Class II: General Resource Groundwater;

631
632 3) Class III: Special Resource Groundwater;

633
634 4) Class IV: Other Groundwater;

635
636 b) A groundwater management zone in [compliance accordance](#) with Section 620.250;
637 or

638
639 c) A groundwater management zone as defined in 35 Ill. Adm. Code 740.120 and
640 established under 35 Ill. Adm. Code 740.530.

641
642 (Source: Amended at 48 Ill. Reg. _____, effective _____)

643
644 **Section 620.210 Class I: Potable Resource Groundwater**
645

646
647 Except as provided in Sections 620.230, 620.240, or 620.250, Potable Resource Groundwater is:
648

- 649 a) Groundwater located 10 feet or more below the land surface and within:
650
- 651 1) The minimum setback zone of a well which serves as a potable water
652 supply and to the bottom of ~~the~~ well;
 - 653 2) Unconsolidated sand, gravel, or sand and gravel which is 5 feet or more in
654 thickness and that contains ~~12% percent~~ or less of fines (i.e., fines which
655 pass through a No. 200 sieve tested according to ASTM Standard Practice
656 D2487-06, incorporated by reference at Section 620.125);
 - 657 3) Sandstone which is 10 feet or more in thickness, or fractured carbonate
658 which is 15 feet or more in thickness; ~~or~~
 - 659 4) Any geologic material which is capable of a:
660
661 A) Sustained groundwater yield, from up to a 12-inch borehole, of 150
662 gallons per day or more from a thickness of 15 feet or less; or
663
664 B) Hydraulic conductivity of 1×10^{-4} cm/sec or greater using one of
665 the following test methods or its equivalent:
666
667 i) ~~Slug test; or~~ Permeameter;
668
669 ii) ~~Pump test~~ Slug test; ~~or~~
670
671 iii) ~~Pump test.~~
 - 672 5) The wellhead protection area of a community water supply well or well
673 field, as defined in Section 620.110 and delineated according to the
674 methods incorporated by reference in Section 620.125. For the purposes
675 of this Subpart, when a maximum setback zone has been adopted under
676 Section 14.3 of the Act, the WHPA includes the delineated area within the
677 maximum setback zone.
- 678 b) Any groundwater which is determined by the Board, ~~under the~~ pursuant to petition
679 procedures ~~set forth~~ in Section 620.260, to be capable of potable use.
680

681
682
683 ~~BOARD NOTE: Any portion of the thickness associated with the geologic~~
684 ~~materials as described in subsections 620.210(a)(2), (a)(3) or (a)(4) should be~~
685 ~~designated as Class I: Potable Resource Groundwater if located 10 feet or more~~
686
687
688

689 ~~below the land surface.~~

- 690
691 c) Any portion of the thickness associated with the geological materials as described
692 in subsections 620.210(a)(2), (a)(3), or (a)(4) is designed as Class I: Potable
693 Resource Groundwater if located 10 feet or more below the land surface.

694
695 (Source: Amended at 48 Ill. Reg. _____, effective _____)

696 **Section 620.220 Class II: General Resource Groundwater**

697 Except as provided in Section 620.250, General Resource Groundwater is:

- 700
701 a) Groundwater which does not meet the provisions of Section 620.210 (Class I),
702 Section 620.230 (Class III), or Section 620.240 (Class IV).
703
704 b) Groundwater which is ~~determined~~found by the Board, ~~underpursuant to~~ the
705 ~~petition~~ procedures ~~set forth~~ in Section 620.260, to be capable of agricultural,
706 industrial, recreational or other beneficial uses.

707
708 (Source: Amended at 48 Ill. Reg. _____, effective _____)

709 **Section 620.230 Class III: Special Resource Groundwater**

710
711 Except as provided in Section 620.250, Special Resource Groundwater is:

- 712
713
714 a) Groundwater that is determined by the Board, ~~underpursuant to~~ the procedures ~~set~~
715 ~~forth~~ in Section 620.260, to be:
716
717 1) Demonstrably unique (e.g., irreplaceable sources of groundwater) and
718 suitable for application of a water quality standard more stringent than the
719 otherwise applicable water quality standard specified in Subpart D; or
720
721 2) Vital for a particularly sensitive ecological system.
722
723 b) Groundwater that contributes to a dedicated nature preserve that is listed by the
724 Agency as ~~stated~~set forth below:
725
726 1) A written request to list a dedicated nature preserve under this subsection
727 must contain, ~~at a minimum,~~ the following information:
728
729 A) A general description of the site and the surrounding land use;
730
731 B) A topographic map or other map of suitable scale denoting the

732 location of the dedicated nature preserve;

- 733
734 C) A general description of the existing groundwater quality at and
735 surrounding the dedicated nature preserve;
736
737 D) A general geologic profile of the dedicated nature preserve based
738 upon the most reasonably available information, including but not
739 limited to geologic maps and subsurface groundwater flow
740 directions; and
741
742 E) A description of the interrelationship between groundwater and the
743 nature of the site.
744

- 745 2) Upon confirmation by the Agency of the technical adequacy of a written
746 request, the Agency mustshall publish the proposed listing of the
747 dedicated nature preserve in the Environmental Register for a 45-day
748 public comment period. Within 60 days after the close of the public
749 comment period, the Agency mustshall either publish a final listing of the
750 dedicated nature preserve in the Environmental Register or provide a
751 written response to the requestor specifying the reasons for not listing the
752 dedicated nature preserve.
753
754 3) At least once annually, the Agency mustshall publish in the Environmental
755 Register a complete listing of all dedicated nature preserves listed under
756 this subsection ~~(b)~~.
757
758 4) For purposes of this Section the term "dedicated nature preserve" means a
759 nature preserve that is dedicated underpursuant to the Illinois Natural
760 Areas Preservation Act [525 ILCS 30].
761

762 (Source: Amended at 48 Ill. Reg. _____, effective _____)
763

764 **Section 620.240 Class IV: Other Groundwater**
765

766 Except as provided in Section 620.250, Other Groundwater is:
767

- 768 a) Groundwater within athe zone of attenuation as provided in 35 Ill. Adm. Code
769 811 and 814;
770
771 b) Groundwater within a point of compliance as provided in 35 Ill. Adm. Code 724,
772 but not to exceed a distance of 200 feet from a potential primary or secondary
773 source.

- c) Groundwater that naturally contains more than 10,000 mg/L of total dissolved solids;
 - d) Groundwater which has been designated by the Board as an exempt aquifer underpursuant to 35 Ill. Adm. Code 730.104; or
 - e) Groundwater which underlies a potential primary or secondary source, in which contaminants may be present from a release, if the owner or operator of thesueh source notifies the Agency in writing and the following conditions are met:
 - 1) The outermost edge is the closest practicable distance from such source, but does not exceed:
 - A) A lateral distance of 25 feet from the edge of such potential source or the property boundary, whichever is less, and
 - B) A depth of 15 feet from the bottom of such potential source or the land surface, whichever is greater;
 - 2) The source of any release of contaminants to groundwater has been controlled;
 - 3) Migration of contaminants within the site resulting from a release to groundwater has been minimized;
 - 4) Any on-site release of contaminants to groundwater has been managed to prevent migration off-site; and
 - 5) No potable water well exists within the outermost edge as provided in subsection (e)(1).
 - f) Groundwater thatwhieh underlies a coal mine refuse disposal area not contained within an area from which overburden has been removed, a coal combustion waste disposal area at a surface coal mine authorized under Section 21(s) of the Act, or an impoundment that contains sludge, slurry, or precipitated process material at a coal preparation plant, in which contaminants may be present, if such area or impoundment was placed into operation after February 1, 1983, if the owner and operator notifies the Agency in writing, and if the following conditions are met:
 - 1) The outermost edge is the closest practicable distance, but does not exceed:

- 818 A) A lateral distance of 25 feet from the edge of such area or
819 impoundment, or the property boundary, whichever is less; and
820
821 B) A depth of 15 feet from the bottom of such area or impoundment,
822 or the land surface, whichever is greater;
823
824 2) The source of any release of contaminants to groundwater has been
825 controlled;
826
827 3) Migration of contaminants within the site resulting from a release to
828 groundwater has been minimized;
829
830 4) Any on-site release of contaminants to groundwater has been managed to
831 prevent migration off-site; and
832
833 5) No potable water well exists within the outermost edge as provided in
834 subsection (e)(1).
835
836 g) Groundwater within a previously mined area, unless monitoring demonstrates that
837 the groundwater is capable of consistently meeting the standards of Sections
838 620.410 or 620.420. If ~~such~~ capability is determined, groundwater within the
839 previously mined area must not be Class IV.

840
841 (Source: Amended at 48 Ill. Reg. _____, effective _____)
842

843 **Section 620.250 Groundwater Management Zone**
844

- 845 a) Within any class of groundwater, a groundwater management zone (GMZ) may
846 be established as a ~~three-dimensional~~three-dimensional region containing
847 groundwater being managed to mitigate impairment caused by the release of one
848 or more contaminants. ~~from a site:~~
849
850 1) ~~That is subject to a corrective action process approved by the Agency; or~~
851
852 2) ~~For which the owner or operator undertakes an adequate corrective action~~
853 ~~in a timely and appropriate manner and provides a written confirmation to~~
854 ~~the Agency. Such confirmation must be provided in a form as prescribed~~
855 ~~by the Agency.~~
856
857 b) Before a GMZ may be established, the owner or operator of a site at which there
858 has been a release of one or more contaminants to groundwater must submit to the
859 Agency a GMZ application. The application must contain the information
860 specified in Section 620. Appendix D, Parts I, II, and III, as well as any other

861 information requested in writing by the Agency that is relevant to its review under
862 subsection (c). ~~A groundwater management zone is established upon concurrence~~
863 by the Agency that the conditions as specified in subsection (a) are met and
864 groundwater management continues for a period of time consistent with the action
865 described in that subsection.

- 866
867
868 1) If the GMZ would extend off-site, the GMZ application must include each
869 affected property owner's written permission to the establishment of the
870 GMZ on its property.
- 871
872 2) If the release is subject to a corrective action process that requires the
873 submittal of more information to the Agency to establish a GMZ than that
874 specified in this subsection (b), the owner or operator must include the
875 additional information in its GMZ application.
- 876
877 3) Except as provided in this subsection (b)(3), a GMZ application must be
878 submitted to the Agency in the form specified in Section 620. Appendix D,
879 Parts I, II, and III. However, if the release is subject to a corrective action
880 process that requires the information specified in subsection (b) to be
881 submitted to the Agency in a different form (e.g., plan, agreement, report,
882 permit application), the owner or operator must submit the information in
883 that form. In that case, for Part 620, the submittal is nevertheless
884 considered a GMZ application.

885
886 c) The Agency must review each GMZ application submitted under subsection (b)
887 and issue a written determination approving or rejecting the GMZ.

- 888
889 1) In determining whether to approve a GMZ, the Agency must consider the
890 completeness of the GMZ application, the technical sufficiency of the
891 GMZ, the likelihood that the GMZ will protect public health and the
892 environment, and the likelihood that the GMZ's corrective action will, in a
893 timely manner, result in compliance with the applicable standards in
894 Section 620.410, 620.420, 620.430, or 620.440 or otherwise minimize
895 exceedances to restore beneficial use as appropriate for the class or classes
896 of groundwater. If the Agency rejects a GMZ, the Agency must, in its
897 written determination, specify the reasons for the rejection.
- 898
899 2) A GMZ is established when the Agency issues a written determination
900 approving the GMZ, including its corrective action. Once a GMZ is
901 established, the Agency may, as new information warrants, issue written
902 determinations amending any part of the GMZ, including its size, the
903 contaminants that are subject to it, and its corrective action.

904
 905 de) When the owner or operator completes the corrective action under subsection
 906 (c)(2), the owner or operator must submit to the Agency a demonstration that
 907 complies with subsection (d)(1) or (d)(2) and includes the completion certification
 908 specified in Section 620.Appendix D, Part IV. The Agency must review this
 909 demonstration and issue a written determination approving or rejecting the
 910 demonstration. A groundwater management zone expires upon the Agency's
 911 receipt of appropriate documentation which confirms the completion of the action
 912 taken pursuant to subsection (a) and which confirms the attainment of applicable
 913 standards as set forth in Subpart D. The Agency shall review the on-going
 914 adequacy of controls and continued management at the site if concentrations of
 915 chemical constituents, as specified in Section 620.450(a)(4)(B), remain in
 916 groundwater at the site following completion of such action. The review must
 917 take place no less often than every 5 years and the results shall be presented to the
 918 Agency in a written report.

919
 920 1) The owner or operator must demonstrate that it has completed the
 921 corrective action under subsection (c)(2) and the applicable standards in
 922 Subpart D, as specified in Section 620.450(a)(4)(A), have been attained in
 923 groundwater within the GMZ. The owner or operator must also
 924 demonstrate that the groundwater within the GMZ no longer requires
 925 controls or management to mitigate impairment caused by the release. If
 926 the Agency approves this demonstration, the Agency must issue a written
 927 determination to that effect in which the Agency terminates the GMZ.
 928 The termination takes effect when the Agency issues this determination.
 929 If the Agency rejects this demonstration, the Agency must, in its written
 930 determination, specify the reasons for the rejection, which may include the
 931 Agency's basis for amending the GMZ to require additional corrective
 932 action under subsection (c)(2).

933
 934 2) The owner or operator must demonstrate that it has completed the
 935 corrective action under subsection (c)(2) and concentrations of released
 936 chemical constituents, as specified in Section 620.450(a)(4)(B), remain in
 937 groundwater within the GMZ. The owner or operator must also
 938 demonstrate compliance with Section 620.450(a)(4)(B)(i) and (ii), as well
 939 as the on-going adequacy of controls and management to mitigate
 940 impairment caused by the release to groundwater within the GMZ. If the
 941 Agency approves this demonstration, the Agency must issue a written
 942 determination to that effect in which the Agency states that the GMZ
 943 remains in effect. If the Agency rejects this demonstration, the Agency
 944 must, in its written determination, specify the reasons for the rejection,
 945 which may include the Agency's basis for amending the GMZ to require
 946 additional corrective action under subsection (c)(2).

- 947
 948
 949
 950
 951
 952
 953
 954
 955
 956
 957
 958
 959

 980
 981
 982
 983
 984
 985
 986
 987
 988
 989
- e) Within five years after the Agency issues a written determination approving a demonstration under subsection (d)(2), the owner or operator must submit a report to the Agency demonstrating the on-going adequacy of controls and management to mitigate impairment caused by the release to groundwater within the GMZ. The Agency must review the report and issue a written determination approving or rejecting the demonstration. The submittal of these reports by the owner or operator and the corresponding issuance of these written determinations by the Agency must occur at least every five years while the GMZ remains in effect. If the Agency rejects a demonstration, the Agency must, in its written determination, specify the reasons for the rejection.

 - f) Without limiting any other legal authority of the Agency to terminate a GMZ, the Agency may issue a written determination terminating a GMZ based on any of the grounds specified in this subsection (f). The termination takes effect when the Agency issues this determination, specifying the grounds for termination. The Agency may terminate a GMZ if:
 - 1) The owner or operator fails to perform or comply with the schedule for any part of the GMZ, including corrective action under subsection (c)(2) or controls or management under subsection (d)(2) or (e);
 - 2) The Agency rejects a demonstration under subsection (d) or (e); or
 - 3) The owner or operator commits fraud or misrepresentation in any submittal under subsection (b), (c)(2), (d), or (e).

 - gd) Regardless of ~~Notwithstanding~~ subsections (a) through (f) and (b) above, a "groundwater management zone", as defined in 35 Ill. Adm. Code 740.120, may be established ~~under in accordance with the requirements of~~ 35 Ill. Adm. Code 740.530 for sites ~~in~~ undergoing remediation pursuant to the Site Remediation Program (35 Ill. Adm. Code 740). ~~A GMZ established under 35 Ill. Adm. Code 740.530 remains~~ Such a groundwater management zone shall remain in effect until ~~any condition of the requirements set forth at~~ 35 Ill. Adm. Code 740.530(c) ~~is~~ are met.

 - he) While a GMZ ~~the groundwater management zone~~ established ~~under in accordance with~~ 35 Ill. Adm. Code 740.530 is in effect, the otherwise applicable standards ~~as specified in Subpart D of this Part do~~ shall not ~~apply~~ be applicable to the "contaminants of concern," as defined ~~in~~ at 35 Ill. Adm. Code 740.120, for which groundwater remediation objectives have been approved ~~under in accordance with the procedures of~~ 35 Ill. Adm. Code 740.

990 if) ~~Regardless of Notwithstanding~~ subsection (c)~~(e) above~~, that subsection's submittal
991 and the review requirements concerning the on-going adequacy of controls and
992 continued management ~~do at the site shall~~ not apply to groundwater within a three-
993 dimensional region formerly encompassed by a ~~GMZ groundwater management~~
994 zone established ~~under in accordance with~~ 35 Ill. Adm. Code 740.530 while a No
995 Further Remediation Letter issued ~~under in accordance with the procedures of~~ 35
996 Ill. Adm. Code 740 is in effect.

997
998 j) ~~At least annually, the Agency must publish in the Environmental Register a list of~~
999 ~~all GMZs that have not been terminated, along with a brief statement of each~~
1000 ~~GMZ's status.~~

1003 Section 620.260 Reclassification of Groundwater by Adjusted Standard

1004
1005 Any person may petition the Board to reclassify a groundwater ~~under in accordance with the~~
1006 ~~procedures for adjusted standards specified in~~ Section 28.1 of the Act and 35 Ill. Adm. Code
1007 106.Subpart G. In any proceeding to reclassify specific groundwater by adjusted standard, in
1008 addition to the requirements of 35 Ill. Adm. Code 106.Subpart G, and Section 28.1(c) of the Act,
1009 the petition ~~must shall, at a minimum,~~ contain information to allow the Board to determine:

- 1010
1011
- 1012 a) The specific groundwater for which reclassification is requested, including ~~but not~~
1013 ~~limited to~~ geographical extent of any aquifers, depth of groundwater, and rate and
1014 direction of groundwater flow and that the specific groundwater exhibits the
1015 characteristics of the requested class ~~as set forth in~~ ~~Sections~~Section 620.210(b),
1016 620.220(b), 620.230, or 620.240;
 - 1017
1018 b) Whether the proposed change or use restriction is necessary for economic or
1019 social development, by providing information including, ~~but not limited to,~~ the
1020 impacts of the standards on the regional economy, social benefits ~~likesuch as~~ loss
1021 of jobs or closing of facilities, and economic analysis contrasting the health and
1022 environmental benefits with costs likely to be incurred in meeting the standards
1023 would be beneficial or necessary;
 - 1024
1025 c) Existing and anticipated uses of the specific groundwater;
 - 1026
1027 d) Existing and anticipated quality of the specific groundwater;
 - 1028
1029 e) Existing and anticipated contamination, if any, of the specific groundwater;
 - 1030
1031 f) Technical feasibility and economic reasonableness of eliminating or reducing
1032 contamination of the specific groundwater or of maintaining existing water

quality;

- g) The anticipated time period over which contaminants will continue to affect the specific groundwater;
- h) Existing and anticipated impact on any potable water supplies due to contamination;
- i) Availability and cost of alternate water sources or of treatment for those users adversely affected;
- j) Negative or positive effect on property values; and
- k) For special resource groundwater, negative or positive effect on:
 - 1) The quality of surface waters; and
 - 2) Wetlands, natural areas, and the life contained therein, including endangered or threatened species of plant, fish or wildlife listed ~~underpursuant to~~ the Endangered Species Act, 16 U.S.C. 1531 et seq., or the Illinois Endangered Species Protection Act [~~520415~~ ILCS 10].

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART C: NONDEGRADATION PROVISIONS FOR APPROPRIATE
GROUNDWATERS

Section 620.301 General Prohibition Against Use Impairment of Resource Groundwater

- a) ~~A~~~~No~~ person ~~must not~~~~shall~~ cause, threaten or allow the release of any contaminant to a resource groundwater such that:
 - 1) Treatment or additional treatment is necessary to continue an existing use or to assure a potential use of ~~thesueh~~ groundwater; or
 - 2) An existing or potential use of ~~thesueh~~ groundwater is precluded.
- b) Nothing in this Section ~~prevents~~~~shall prevent~~ the establishment of a groundwater management zone ~~underpursuant to~~ Section 620.250 or a cumulative impact area within a permitted site.
- c) Nothing in this Section ~~limits~~~~shall limit~~ underground injection ~~underpursuant to~~ a permit issued by the Agency under the Act or issued by the Department of Mines

and Minerals under the Illinois Oil and Gas Act [225 ILCS 725].

- d) Nothing in this Section ~~limit shall limit~~ the Board from promulgating nondegradation provisions applicable to particular types of facilities or activities which impact ~~upon~~ groundwater, including ~~but not limited to~~ landfills regulated ~~underpursuant to~~ 35 Ill. Adm. Code: Subtitle G.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 620.302 Applicability of Preventive Notification and Preventive Response Activities

- a) Preventive notification and preventive response ~~activities~~, as specified in Sections 620.305 through 620.310, ~~apply-applies~~ to:
- 1) Class I groundwater under Section 620.210(a)(1), (a)(2), or (a)(3) that is monitored by the persons listed in subsection (b); or
 - 2) Class III groundwater that is monitored by the persons listed in subsection (b).
- b) For purposes of subsection (a), the persons that conduct groundwater monitoring are:
- 1) An owner or operator of a regulated entity for which groundwater quality monitoring must be performed ~~underpursuant to~~ State or Federal law or regulation (e.g., 35 Ill. Adm. Code Parts 615, 616 and 807; 62 Ill. Adm. Code Parts 1816 and 1817. This subsection (b)(1) does not apply to an owner or operator of a regulated entity subject to program-specific requirements regarding groundwater contaminant notification and remediation (e.g., 35 Ill. Adm. Code Parts 731, 734, 740, 750, 807, 811, 814, or 815)section 106 and 107 of the Comprehensive Environmental Response, Compensation and Liability Act (42 USC 9601, et seq.); sections 3004 and 3008 of the Resource Conservation and Recovery Act (42 USC 6901, et seq.); sections 4(q), 4(v), 42(g), 21(d), 21(f), 22.2(f), 22.2(m) and 22.18 of the Act; 35 Ill. Adm. Code 724, 725, 730, 731, 750, 811 and 814);
 - 2) An owner or operator of a public water supply well who conducts groundwater quality monitoring;
 - 3) A State agency that is authorized to conduct, or is the recipient of, groundwater quality monitoring data (e.g., Illinois Environmental

Protection Agency, Department of Public Health, Department of Agriculture, Office of State Fire Marshal, or Department of Natural Resources); or

- 4) An owner or operator of a facility that conducts groundwater quality monitoring ~~underpursuant to~~ State or federal judicial or administrative order.
- c) If a contaminant exceeds a standard ~~set forth~~ in Section 620.410 or Section 620.430, the appropriate remedy is corrective action and Sections 620.305 and 620.310 do not apply.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 620.305 Preventive Notification Procedures

- a) ~~UnderPursuant to~~ groundwater quality monitoring ~~as described~~ in Section 620.302, a preventive notification must occur whenever a contaminant:
- 1) Listed under Section 620.310(a)(3)(A) is detected (except due to natural causes) in Class I groundwater; or
 - 2) Denoted as a carcinogen under Section 620.410(b) is detected in Class I groundwater; or
 - 3) Subject to a standard under Section 620.430 is detected (except due to natural causes) in Class III groundwater.
- b) When a preventive notification is required for groundwater which is monitored by a regulated entity for the subject contaminant, the owner or operator of the site ~~must:~~
- 1) ~~Confirmshall confirm~~ the detection by resampling the monitoring well. ~~This resampling shall be made~~ within 30 days of the date on which the first sample analyses are received; ~~and:~~
 - 2) ~~ProvideThe owner or operator shall provide~~ a preventive notification to the appropriate regulatory agency of the results of the resampling analysis within 30 days of the date on which the sample analyses are received, but no later than 90 days after the results of the first samples were received.
- c) When a preventive notification is required for groundwater which is monitored by a regulatory agency, such agency ~~mustshall~~ notify the owner or operator of the

1162 site where the detection has occurred. The owner or operator must:

- 1163
- 1164 1) ~~Confirm~~shall confirm the detection by resampling within 30 days of the
- 1165 date of the notice by the regulatory agency; ~~and:~~
- 1166
- 1167 2) ~~Provide~~The owner or operator shall provide preventive notification to the
- 1168 regulatory agency of the results of the resampling analysis within 30 days
- 1169 of the date on which the sample analyses are received, but no later than 90
- 1170 days after the results of the first samples were received.
- 1171
- 1172 d) When a preventive notification of a confirmed detection has been provided by an
- 1173 owner or operator ~~underpursuant to~~ this Section, additional detections of the same
- 1174 contaminant do not require further notice, ~~if provided that~~ the groundwater quality
- 1175 conditions are substantially unchanged or that preventive response is underway
- 1176 for ~~thesuch~~ contaminant.

1177 (Source: Amended at 48 Ill. Reg. _____, effective _____)

1178

1179

1180 **Section 620.310 Preventive Response Activities**

- 1181
- 1182 a) The following preventive assessment must be undertaken:
- 1183
- 1184 1) If a preventive notification under Section 620.305(c) is provided by a
- 1185 community water supply:
- 1186
- 1187 A) The Agency ~~must~~shall notify the owner or operator of any
- 1188 identified potential primary source, potential secondary source,
- 1189 potential route, or community water supply well that is located
- 1190 within 2,500 feet of the wellhead.
- 1191
- 1192 B) The owner or operator notified under subsection (a)(1)(A)
- 1193 ~~must~~shall, within 30 days after the date of issuance of such notice,
- 1194 sample each water well or monitoring well for the contaminant
- 1195 identified in the notice if the contaminant or material containing
- 1196 such contaminant is or has been stored, disposed of, or otherwise
- 1197 handled at the site. If a contaminant identified under Section
- 1198 620.305(a) is detected, then the well must be resampled within 30
- 1199 days of the date on which the first sample ~~results~~analyses are
- 1200 received. If a contaminant identified under Section 620.305(a) is
- 1201 detected by the resampling, preventive notification must be given
- 1202 as ~~specified~~set forth in Section 620.305.
- 1203
- 1204 C) If the Agency receives analytical results under subsection (a)(1)(B)

that show a contaminant identified under Section 620.305(a) has been detected, the Agency must shall:

- i) Conduct a well site survey ~~according pursuant to~~ [415 ILCS 5/17.1(d)], if such a survey has not been previously conducted within the last 5 years; and
- ii) Identify those sites or activities that represent a hazard to the continued availability of groundwaters for public use unless a groundwater protection needs assessment has been prepared ~~under pursuant to~~ [415 ILCS 5/17.1(d)].

2) If a preventive notification is provided under Section 620.305(c) by a non-community water supply or for multiple private water supply wells, the Department of Public Health must shall conduct a sanitary survey within 1,000 feet of the wellhead of a non-community water supply or within 500 feet of the wellheads for multiple private water supply wells.

3) If a preventive notification under Section 620.305(b) is provided by the owner or operator of a regulated entity and the applicable standard in Subpart D has not been exceeded, the appropriate regulatory agency must:

A) ~~Determine~~ The appropriate regulatory agency shall determine if any of the following occurs for Class I: Potable Resource Groundwater:

- i) The levels ~~set forth~~ below are exceeded or are changed for pH:

<u>CASRN</u>	Constituent	Criteria (mg/L)
	Para-Dichlorobenzene	0.005
<u>95-50-1</u>	Ortho-Dichlorobenzene <u>(1,2-dichlorobenzene)</u>	0.01

1257
1258
1259
1260

- iii) For a chemical constituent of gasoline, diesel fuel, or heating fuel, the constituent exceeds the following:

Constituent	Criterion (mg/L)
BETX	0.095

1261
1262
1263
1264

- iv) For pH, a statistically significant change occurs from background.

~~BOARD NOTE: Constituents that are carcinogens have not been listed in subsection (a)(3)(A) because the standard is set at the PQL and any exceedence thereof is a violation subject to corrective action.~~

1265
1266
1267
1268

- B) ~~If~~ The appropriate agency shall determine if, for Class III: Special Resource Groundwater, the levels as determined by the Board are exceeded.

1269
1270
1271
1272

- C) ~~Consider~~ The appropriate regulatory agency shall consider whether the owner or operator reasonably demonstrates that:

1273
1274
1275
1276

- i) The contamination is a result of contaminants remaining in groundwater from a prior release for which appropriate action was taken ~~according to the in accordance with~~ laws and regulations in existence at the time of the release;

1277
1278
1279
1280

- ii) The source of contamination is not due to the on-site release of contaminants; or

1281
1282
1283
1284

- iii) The detection resulted from error in sampling, analysis, or evaluation.

1285
1286
1287
1288

- D) ~~Consider~~ The appropriate regulatory agency shall consider actions necessary to minimize the degree and extent of contamination.

- b) The appropriate regulatory agency ~~must~~shall determine whether a preventive response ~~should~~must be undertaken based on relevant factors including, ~~but not limited to,~~the considerations in subsection (a)(3).

- c) After completion of preventive response ~~under the~~pursuant to authority of an appropriate regulatory agency, the concentration of a contaminant listed in subsection (a)(3)(A) in groundwater may exceed 50%~~percent~~ of the applicable numerical standard in Subpart D only if the following conditions are met:
 - 1) The exceedence has been minimized to the extent practicable;
 - 2) Beneficial use, as appropriate for the class of groundwater, has been assured; and
 - 3) Any threat to public health or the environment has been minimized.

- d) Nothing in this Section ~~limits~~shall in any way limit the authority of the State or of the United States to require or perform any corrective action process.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART D: GROUNDWATER QUALITY STANDARDS

Section 620.401 Applicability

~~Groundwater~~Groundwaters must meet the standards appropriate to the groundwater's class as specified in this Subpart and the nondegradation provisions of Subpart C.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 620.405 General Prohibitions Against Violations of Groundwater Quality Standards

~~A~~No person ~~must not~~shall cause, threaten or allow the release of any contaminant to groundwater so as to cause a groundwater quality standard ~~set forth~~in this Subpart to be exceeded.

Constituent Name and Groundwater Quality Standard Notations

- ^a The standard is the Human Threshold Toxicant Advisory Concentration ("HTTACT"), calculated using procedures at Appendix A.
- ^b The constituent meets the definition of a "carcinogen" at Section 620.110.
- ^c The standard is based on the Maximum Contaminant Level ("MCL"), promulgated by U.S. EPA, Office of Water, and Illinois Primary Drinking Water Standards at 35 Ill. Adm. Code 611.
- ^d The standard is the Human Nonthreshold Toxicant Advisory Concentration ("HNTAC"), calculated using procedures at Appendix A.
- ^e The constituent meets the definition of a "mutagen" at Section 620.110.
- ^f The standard is based on the Maximum Contaminant Level Goal ("MCLG"), promulgated by U.S. EPA, Office of Water.
- ^g The standard is the "LLOQ" or "LCMRL" as defined in Section 620.110.
- ^h The standard is based on 35 Ill. Adm. Code 302.208.

1413

1414 cd) Complex Organic Chemical Mixtures

- 1415 1) Concentrations of the following chemical constituents of ~~gasoline, diesel~~
 1417 ~~fuel, or heating fuel~~ must not be exceeded in Class I groundwater:

<u>CASRN</u>	<u>Constituent</u>	<u>Standard (mg/L)</u>
<u>71-43-2</u>	<u>Benzene^a</u>	<u>0.005^b</u>
	<u>Total BETX</u>	<u>11.705^c</u>

1419 Constituent Name and Groundwater Quality Standard Notations

- 1420
 1421
 1422 ^a The constituent meets the definition of a "carcinogen" at Section
 1423 620.110.
 1424
 1425 ^b The standard is based on the Maximum Contaminant Level ("MCL"),
 1426 promulgated by U.S. EPA, Office of Water, and Illinois Primary
 1427 Drinking Water Standards at 35 Ill. Adm. Code 611.
 1428
 1429 ^c The standard is the total combined standard of benzene, ethylbenzene,
 1430 toluene, and xylenes.

- 1431
 1432 2) Atrazine and Metabolites

1433 Concentrations of the following chemical constituents must not be
 1434 exceeded in Class I groundwater.

<u>CASRN</u>	<u>Constituent</u>	<u>Standard (mg/L)</u>
<u>1912-24-9</u>	<u>Atrazine</u>	<u>0.003^a</u>
	<u>Total Atrazine and Metabolites</u>	<u>0.003</u>
<u>6190-65-4</u>	<u>DEA (desethyl-atrazine)</u>	
<u>1007-28-9</u>	<u>DIA (desisopropyl-atrazine)</u>	
<u>3397-62-4</u>	<u>DACT (diaminochlorotriazine)</u>	

1437 Groundwater Quality Standard Notation

- 1438
 1439
 1440 ^a The standard is based on the Maximum Contaminant Level ("MCL"),
 1441 promulgated by U.S. EPA, Office of Water, and Illinois Primary
 1442 Drinking Water Standards at 35 Ill. Adm. Code 611.

<u>Constituent</u>	<u>Standard (mg/L)</u>
<u>Benzene*</u>	<u>0.005</u>
<u>BETX</u>	<u>11.705</u>

~~*Denotes a carcinogen.~~

de) pH
 Except due to natural causes, a pH range of 6.5 - 9.0 units must not be exceeded in Class I groundwater.

ef) Beta Particle and Photon Radioactivity

1) Except due to natural causes, the average annual concentration of beta particle and photon radioactivity from man-made radionuclides ~~must shall~~ not exceed a dose equivalent to the total body ~~or~~ organ greater than 4 mrem/year in Class I groundwater. If two or more radionuclides are present, the sum of their dose equivalent to the total body, or to any internal organ ~~must shall~~ not exceed 4 mrem/year in Class I groundwater except due to natural causes.

2) Except for the radionuclides listed in subsection (ef)(3), the concentration of man-made radionuclides causing 4 mrem total body or organ dose equivalent must be calculated on the basis of a 2 liter per day drinking water intake using the 168-hour data ~~according to in accordance with~~ the procedure ~~specified set forth~~ in NCRP Report Number 22, incorporated by reference at Section 620.125(a).

3) Except due to natural causes, the average annual concentration assumed to produce a total body or organ dose of 4 mrem/year of the following chemical constituents ~~must shall~~ not be exceeded in Class I groundwater:

<u>CASRN</u>	<u>Constituent</u>	<u>Critical Organ</u>	<u>Standard (pCi/L)</u>
<u>10028-17-8</u>	<u>Tritium</u>	<u>Total Body</u>	<u>20,000</u>
<u>10098-97-2</u>	<u>Strontium-90</u>	<u>Bone Marrow</u>	<u>8.0</u>

<u>Constituent</u>	<u>Critical Organ</u>	<u>Standard (pCi/L)</u>
<u>Tritium</u>	<u>Total body</u>	<u>20,000.0</u>
<u>Strontium-90</u>	<u>Bone marrow</u>	<u>8.0</u>

Section 620.420 Groundwater Quality Standards for Class II: General Resource Groundwater

1477
1478
1479
1480
1481
1482

a) Inorganic Chemical Constituents

- 1) Except due to natural causes or as provided in Section 620.450 or subsection (a)(3) or (e) of this Section, concentrations of the following chemical constituents must not be exceeded in Class II groundwater:

<u>CASRN</u>	<u>Constituent</u>	<u>Standard (mg/L)^a</u>
<u>7440-36-0</u>	<u>Antimony</u>	<u>0.024^b</u>
<u>7440-38-2</u>	<u>Arsenic^b</u>	<u>0.2^d</u>
<u>7440-39-3</u>	<u>Barium</u>	<u>2.0^e</u>
<u>7440-41-7</u>	<u>Beryllium</u>	<u>0.5^f</u>
<u>7440-43-9</u>	<u>Cadmium</u>	<u>0.05^g</u>
<u>7440-47-3</u>	<u>Chromium (total)</u>	<u>1.0^g</u>
<u>7440-48-4</u>	<u>Cobalt</u>	<u>1^d</u>
<u>143-33-9</u>	<u>Cyanide</u>	<u>0.6^d</u>
<u>7681-49-4</u>	<u>Fluoride</u>	<u>2^d</u>
<u>7439-92-1</u>	<u>Lead</u>	<u>1.0^d</u>
<u>7439-93-2</u>	<u>Lithium</u>	<u>2.5^f</u>
<u>7487-94-7</u>	<u>Mercury (mercuric chloride)</u>	<u>0.01^d</u>
<u>7439-98-7</u>	<u>Molybdenum</u>	<u>0.05^f</u>
<u>14797-55-8</u>	<u>Nitrate as N</u>	<u>100^d</u>
<u>14797-73-0</u>	<u>Perchlorate</u>	<u>0.0081^e</u>
<u>7440-28-0</u>	<u>Thallium</u>	<u>0.02^h</u>
<u>7440-62-2</u>	<u>Vanadium</u>	<u>0.1^d</u>

Constituent Name and Groundwater Quality Standard Notations

- ^a The inorganic groundwater quality standards are based on total metal analyses for the evaluation of human health effects.
- ^b A treatment factor of 4 is applied to the Class I groundwater quality standard. The constituent's treatment efficiency is based on the effectiveness to treat the constituent in the groundwater at an 75% removal efficiency rate for the constituent.
- ^c The constituent meets the definition of a "carcinogen" at Section 620.110.
- ^d The standard is based on beneficial use for watering livestock, per "Water Quality Criteria", by National Academy of Sciences, incorporated by reference at Section 620.125.
- ^e The Class II standard is equal to the Class I groundwater quality standard.

	<u>TDS (total dissolved solids)</u>	<u>1,200^e</u>
<u>7440-66-6</u>	<u>Zinc</u>	<u>10^d</u>

Constituent Name and Groundwater Quality Standard Notations

^a The standard units for radium (combined 226+228) is picocuries per liter ("pCi/L").

^b The inorganic groundwater quality standards are based on total metal analyses for the evaluation of human health effects.

^c The standard is based on beneficial use for watering livestock and irrigation of crops, per "Water Quality Criteria", by National Academy of Sciences, incorporated by reference at Section 620.125.

^d The standard is based on beneficial use for irrigation of crops, per "Water Quality Criteria", by National Academy of Sciences, incorporated by reference at Section 620.125.

^e The standard is the 95% confidence concentration stated in Illinois EPA's "Integrated Water Quality Report and Section 303(d) List", incorporated by reference at Section 620.125.

^f The Class II standard is equal to the Class I groundwater quality standard.

- 3) The standard for any inorganic chemical constituent listed in subsection (a)(2) of this Section, for barium in subsection (a)(1), or for pH in subsection (d) does not apply to groundwater within fill material or within the upper 10 feet of parent material under thesueh fill material on a site not within the rural property class for which:
- A) Prior to November 25, 1991, surficial characteristics have been altered by the placement of thesueh fill material so as to impact the concentration of the parameters (constituents and pH) listed in subsection (a)(3) of this Section, and any on-site groundwater monitoring of thosesueh parameters is available for review by the Agency.
 - B) On November 25, 1991, surficial characteristics are in the process of being altered by the placement of such fill material, that proceeds in a reasonably continuous manner to completion, so as to impact the concentration of the parameters listed in subsection (a)(3) of this Section, and any on-site groundwater monitoring of such parameters is available for review by the Agency.
- 4) For purposes of subsection (a)(3) of this Section, the term "fill material" means clean earthen materials, slag, ash, clean demolition debris, or other similar materials.

b) Organic Chemical Constituents

- 1) Except due to natural causes or as provided in Section 620.450 or subsection (b)(2) or (e) of this Section, concentrations of the following organic chemical constituents must not be exceeded in Class II groundwater:

<u>CASRN</u>	<u>Constituent</u>	<u>Standard (mg/L)</u>

Constituent Name and Groundwater Quality Standard Notations

- ^a A treatment factor of 5 is applied to the Class I groundwater quality standard. The constituent's treatment efficiency is based on the effectiveness to treat the constituent in the groundwater at an 80% removal efficiency rate for the constituent.
- ^b Illinois EPA's treatment efficiency determination demonstrates a treatment factor is not applicable for the constituent. The standard is equal to the Class I groundwater quality standard.
- ^c The constituent meets the definition of a "carcinogen" at Section 620.110.
- ^d The constituent meets the definition of a "mutagen" at Section 620.110.
- ^e A treatment factor of 10 is applied to the Class I groundwater quality standard. The constituent's treatment efficiency is based on the effectiveness to treat the constituent in the groundwater at a 90% removal efficiency rate for the constituent.
- ^f A treatment factor of 2.5 is applied to the Class I groundwater quality standard. The constituent's treatment efficiency is based on the effectiveness to treat the constituent in the groundwater at a 60% removal efficiency rate for the constituent.
- ^g A treatment factor of 3 is applied to the Class I groundwater quality standard. The constituent's treatment efficiency is based on the

* Denotes a carcinogen.

- 2) The standards for pesticide chemical constituents listed in subsection (b)(1) of this Section do not apply to groundwater within 10 feet of the land surface, provided that the concentrations of ~~thesueh~~ constituents result from the application of pesticides in a manner consistent with the requirements of the Federal Insecticide, Fungicide and Rodenticide Act (7 USC 136 et seq.), and the Illinois Pesticide Act [415 ILCS 60].

- e) ~~Explosive Constituents~~
~~Concentrations of the following explosive constituents must not exceed the Class II groundwater standard:~~

Constituent	Standard (mg/L)
1,3-Dinitrobenzene	0.0007
2,4-Dinitrotoluene*	0.0001
2,6-Dinitrotoluene*	0.00031
HMX (High Melting Explosive, Octogen)	1.4
Nitrobenzene	0.014
RDX (Royal Demolition Explosive, Cyclonite)	0.084
1,3,5-Trinitrobenzene	0.84
2,4,6-Trinitrotoluene (TNT)	0.014

*Denotes a carcinogen.

- cd) Complex Organic Chemical Mixtures

- 1) Concentrations of the following organic chemical constituents of ~~gasoline, diesel fuel, or heating fuel~~ must not be exceeded in Class II groundwater:

<u>CASRN</u>	<u>Constituent</u>	<u>Standard (mg/L)</u>
--------------	--------------------	------------------------

71-43-2 Benzene^a 0.025^b
 Total BETX 13.525^c

Constituent Name and Groundwater Quality Standard Notations

^a The constituent meets the definition of a "carcinogen" at Section 620.110.

^b A treatment factor of 5 is applied to the Class I groundwater quality standard. The constituent's treatment efficiency is based on the effectiveness to treat the constituent in the groundwater at an 80% removal efficiency rate for the constituent.

^c The standard is the total combined Class II standard of benzene, ethylbenzene, toluene, and xylenes.

<u>Constituent</u>	<u>Standard (mg/L)</u>
<u>Benzene*</u>	<u>0.025</u>
<u>BETX</u>	<u>13.525</u>

*Denotes a carcinogen

2) Atrazine and Metabolites

Concentration of the following chemical constituents must not be exceeded in Class II groundwater.

<u>CASRN</u>	<u>Constituent</u>	<u>Standard (mg/L)</u>
<u>1912-24-9</u>	<u>Atrazine Total Atrazine and Metabolites</u>	<u>0.015^a</u>
<u>6190-65-4</u>	<u>DEA (desethyl-atrazine)</u>	
<u>1007-28-9</u>	<u>DIA (desisopropyl-atrazine)</u>	
<u>3397-62-4</u>	<u>DACT (diaminochlorotriazine)</u>	

Constituent Name and Groundwater Quality Standard Notations:

^a A treatment factor of 5 is applied to the Class I groundwater quality standard. The constituent's treatment efficiency is based on the effectiveness to treat the constituent in the groundwater at an 80% removal efficiency rate for the constituent.

- 3) After completion of reclamation at a coal mine, the standards ~~as specified~~ in Sections 620.410(a) and (e), 620.420(a), 620.430, and 620.440 ~~apply~~ ~~are applicable~~ to inorganic constituents and pH, except:
- A) The concentration of total dissolved solids ("TDS") must not exceed:
 - i) The post-reclamation concentration ~~of TDS~~ or 3000 mg/L, whichever is less, for groundwater within the permitted area; or
 - ii) The post-reclamation concentration of TDS ~~must not exceed the post-reclamation concentration~~ or 5000 mg/L, whichever is less, for groundwater in underground coal mines and in permitted areas reclaimed after surface coal mining if the Illinois [Office of Mines and Minerals, Department of Natural Resources](#)~~Department of Mines and Minerals~~ and the Agency have determined that no significant resource groundwater existed ~~before prior to~~ mining (62 Ill. Adm. Code 1780.21(f) and (g)).~~;~~ ~~and~~
 - B) ~~The concentration of~~ ~~For~~ chloride, iron, manganese, and sulfate, ~~must not exceed~~ the post-reclamation concentration within the permitted area ~~must not be exceeded~~.
 - C) ~~For~~ pH ~~must not exceed~~; the post-reclamation concentration within the permitted area ~~in~~ ~~must not be exceeded within~~ Class I: Potable Resource Groundwater as specified in Section 620.210(a)(4).
 - D) ~~The concentration of~~ ~~For~~ 1,3-dinitrobenzene, 2,4-dinitrotoluene, 2,6-dinitrotoluene, HMX (~~octahydro-1,3,5,7-tetranitro-1,3,5,7-tetrazocin~~~~high melting explosive, octogen~~), nitrobenzene, RDX (~~hexahydro-1,3,5-trinitro-1,3,5-triazin~~~~royal demolition explosive, cyclonite~~), 1,3,5-trinitrobenzene, and TNT (2,4,6-trinitrotoluene (TNT)) ~~must not exceed~~; the post-reclamation concentration within the permitted area ~~must not be exceeded~~.
- 4) A refuse disposal area (not contained within the area from which overburden has been removed) is subject to the inorganic chemical constituent and pH requirements of:
- A) 35 Ill. Adm. Code 302.Subparts B and C, except due to natural causes, for ~~an~~ ~~such~~ area that was placed into operation after

- 1832 February 1, 1983, and before ~~November 25, 1991~~ the effective date
1833 of this Part, if provided that the groundwater is a present or a
1834 potential source of water for public or food processing;
- 1835
- 1836 B) Section 620.440(c) for ~~ansueh~~ area that was placed into operation
1837 before prior to February 1, 1983, and has remained in continuous
1838 operation since that date; or
- 1839
- 1840 C) Subpart D of this Part for ~~ansueh~~ area that is placed into operation
1841 on or after ~~November 25, 1991~~ the effective date of this Part.
- 1842
- 1843 5) For a refuse disposal area (not contained within the area from which
1844 overburden has been removed) that was placed into operation before prior
1845 to February 1, 1983, and is modified after that date to include additional
1846 area, this subsection (b) ~~Section~~ applies to the area that meets the
1847 requirements of subsection (b)(4)(C) and the following applies to the
1848 additional area:
- 1849
- 1850 A) 35 Ill. Adm. Code 302. Subparts B and C, except due to natural
1851 causes, for ~~ansueh~~ additional refuse disposal area that was placed
1852 into operation after February 1, 1983, and before ~~November 25,~~
1853 ~~1991~~ the effective date of this Part, if provided that the groundwater
1854 is a present or a potential source of water for public or food
1855 processing; and
- 1856
- 1857 B) Subpart D for ~~ansueh~~ additional area that was placed into operation
1858 on or after ~~November 25, 1991~~ the effective date of this Part.
- 1859
- 1860 6) A coal preparation plant (not located in an area from which overburden
1861 has been removed) ~~that which~~ contains slurry material, sludge, or other
1862 precipitated process material, is subject to the inorganic chemical
1863 constituent and pH requirements of:
- 1864
- 1865 A) 35 Ill. Adm. Code 302. Subparts B and C, except due to natural
1866 causes, for ~~asueh~~ plant that was placed into operation after
1867 February 1, 1983, and before ~~November 25, 1991~~ the effective date
1868 of this Part, if provided that the groundwater is a present or a
1869 potential source of water for public or food processing;
- 1870
- 1871 B) Section 620.440(c) for ~~asueh~~ plant that was placed into operation
1872 before prior to February 1, 1983, and has remained in continuous
1873 operation since that date; or
- 1874

- 1875 C) Subpart D for ~~asueh~~ plant that is placed into operation on or after
1876 ~~November 25, 1991~~ the effective date of this Part.
1877
- 1878 7) For a coal preparation plant (not located in an area from which overburden
1879 has been removed) ~~thatwhich~~ contains slurry material, sludge, or other
1880 precipitated process material, ~~that~~ was placed into operation ~~before~~ prior to
1881 February 1, 1983, and is modified after that date to include additional area,
1882 this subsection (b) ~~Section~~ applies to the area that meets the requirements
1883 of subsection (b)(6)(C) and the following applies to the additional area:
1884
- 1885 A) 35 Ill. Adm. Code 302.Subparts B and C, except due to natural
1886 causes, for ~~ansueh~~ additional area that was placed into operation
1887 after February 1, 1983, and before ~~November 25, 1991~~ the effective
1888 date of this Part, if provided that the groundwater is a present or a
1889 potential source of water for public or food processing; and
1890
- 1891 B) Subpart D for ~~ansueh~~ additional area that was placed into operation
1892 on or after ~~November 25, 1991~~ the effective date of this Part.
1893
- 1894 c) Groundwater Quality Standards for ~~Specified~~ Certain Groundwater Subject to a
1895 No Further Remediation Letter under the Site Remediation Program (35 Ill. Adm.
1896 CodePart 740). While a No Further Remediation Letter is in effect for a region
1897 formerly encompassed by a GMZ ~~groundwater management zone~~ established
1898 under 35 Ill. Adm. Code 740.530, the applicable groundwater quality standards
1899 for the specified "contaminants of concern", as defined in 35 Ill. Adm. Code
1900 740.120, within ~~thatsueh~~ area willshah be the Groundwater
1901 Objectives ~~groundwater objectives~~ achieved as documented in the approved
1902 Remedial Action Completion Report.

- 3) For groundwater that underlies a coal mine refuse disposal area, a coal combustion waste disposal area, or an impoundment that contains sludge, slurry, or precipitated process material at a coal preparation plant, the outermost edge as specified in Section 620.240(f)(1) or location of monitoring wells in existence as of the effective date of this Part on a permitted site.
- 4) For a groundwater management zone, as specified in a corrective action process.
- 5) For groundwater, any point where monitoring is conducted using a water well, or a monitoring well that meets one of the following conditions:
 - A) For a potable water supply well if geologic logs exist for this well or geologic logs in the immediate 1,000-foot area of this well are representative of the hydrogeologic materials encountered by this well as determined by a licensed professional geologist or a licensed professional engineer or a WHPA has been delineated outside of an applicable setback zone of a community water well or well field in ~~accordance with~~ according to the "Guidance Document for Groundwater Protection Needs Assessments," incorporated by reference at Section 620.125, and "The Illinois Wellhead Protection Program," incorporated by reference at Section 620.125.
 - B) For a potable water supply well other than a community water supply well, a construction report has been filed with the Department of Public Health for such potable well, or such well has been located and constructed (or reconstructed) to meet the Illinois Water Well Construction Code [415 ILCS 30] and 77 Ill. Adm. Code 920.
 - C) For a potable water supply well that was constructed prior to August 20, 1965, the enactment of the Illinois Water Well Construction Code [415 ILCS 30], and meets all of the following criteria:
 - i) Construction must be done in a manner that will enable the collection of groundwater samples that represent in situ groundwater conditions;
 - ii) Casings and screens must be made from durable material

resistant to expected chemical or physical degradation that do not interfere with the quality of groundwater samples being collected; and

iii) The annular space opposite the screened section of the well (i.e., the space between the bore hole and well screen) must be filled with gravel or sand if necessary to collect groundwater samples. The annular space above and below the well screen must be sealed to prevent migration of water from adjacent formations and the surface to the sampled depth.

D) For a community water supply well, [thesueh](#) well has been permitted by the Agency, or has been constructed in [complianceaeoordanee](#) with 35 Ill. Adm. Code 602.115.

E) For a water well other than a potable water supply well (e.g., a livestock watering well or an irrigation well), a construction report has been filed with the Department of Public Health or the Office of Mines and Minerals in the Department of Natural Resources for such well, or [thesueh](#) well has been located and constructed (or reconstructed) to meet the Illinois Water Well Construction Code [415 ILCS 30] and 35 Ill. Adm. Code 920.

F) For a monitoring well, [thesueh](#) well meets the following requirements:

i) Construction must be done in a manner that will enable the collection of groundwater samples;

ii) Casings and screens must be made from durable material resistant to expected chemical or physical degradation that do not interfere with the quality of groundwater samples being collected; and

iii) The annular space opposite the screened section of the well (i.e., the space between the bore hole and well screen) must be filled with gravel or sand if necessary to collect groundwater samples. The annular space above and below the well screen must be sealed to prevent migration of water from adjacent formations and the surface to the sampled depth.

2129
2130 SUBPART F: HEALTH ADVISORIES

2131
2132 **Section 620.601 Purpose of a Health Advisory**

2133
2134 This Subpart establishes procedures for the issuance of a Health Advisory that ~~specifies~~ ~~sets forth~~
2135 guidance levels that, in the absence of standards under Section 620.410, must be considered by
2136 the Agency in:

- 2137
- 2138 a) Establishing groundwater cleanup or action levels whenever there is a release or
2139 substantial threat of a release of:
 - 2140 1) A hazardous substance or pesticide; or
 - 2141 2) Other contaminant that represents a significant hazard to public health or
2142 the environment.
 - 2143 b) Determining whether the community water supply is taking its raw water from a
2144 site or source ~~in compliance~~ ~~consistent~~ with the siting and source water
2145 requirements of 35 Ill. Adm. Code ~~604.200611.114 and 611.115~~.
 - 2146 c) Developing Board rulemaking proposals for new or revised numerical standards.
 - 2147 d) Evaluating mixtures of chemical substances.

2148
2149
2150
2151 (Source: Amended at 48 Ill. Reg. _____, effective _____)

2152
2153
2154
2155 **Section 620.605 Issuance of a Health Advisory**

- 2156
2157
- 2158 a) The Agency ~~must~~ ~~shall~~ issue a Health Advisory for a chemical substance if all of
2159 the following conditions are met:
 - 2160 1) A community water supply well is sampled and a substance is detected
2161 and confirmed by resampling;
 - 2162 2) There is no standard under Section 620.410 for such chemical substance;
2163 and
 - 2164 3) The chemical substance is toxic or harmful to human health according to
2165 the procedures of Appendix A, B, or C.
 - 2166 b) The Health Advisory must contain a general description of the characteristics of
2167 the chemical substance, the potential adverse health effects, and a guidance level
2168 to be determined as follows:
 - 2169 1) If disease or functional impairment is caused due to a physiological
2170 mechanism for where there is a threshold dose below which no damage
2171
- 2172
2173
2174
2175

occurs, the guidance level for any ~~such~~-substance ~~will~~shall be the Maximum Contaminant Level Goal ("MCLG"), adopted by U.S. EPA for ~~the~~such substance, 40 CFR 136, appendix B, 40 CFR 141.80, 40 CFR 141.61, and 40 CFR 141.62, incorporated by reference at Section 620.125.

- 2) If there is no MCLG for the substance, the guidance level is ~~either~~ the Human Threshold Toxicant Advisory Concentration ~~or the Human Nonthreshold Toxicant Advisory Concentration~~ for ~~the~~such substance as determined ~~according to in accordance with~~ Appendix A, ~~whichever is less~~, unless the ~~lower~~ concentration for ~~the~~such substance is less than the lowest appropriate ~~LLOQ or LCMRL~~ specified in "Test Methods for Evaluating Solid Wastes, Physical/Chemical Methods", EPA Publication No. SW-846 (SW-846), incorporated by reference at Section 620.125, ~~or the LCMRL specified in the drinking water methods incorporated by reference at Section 620.125~~ for the substance.
- 3) If the concentration for ~~a~~such substance ~~under subsection (b)(2)~~ is less than the lowest appropriate ~~LLOQ or LCMRL~~ for the substance ~~specified in SW 846, incorporated by reference at Section 620.125~~, the guidance level is the lowest appropriate ~~LLOQ or LCMRL~~.
- 2) ~~If the chemical substance is a carcinogen, the guidance level for any such chemical substance is the one in one million cancer risk concentration, unless the concentration for such substance is less than the lowest appropriate PQL specified in "Test Methods for Evaluating Solid Wastes, Physical/Chemical Methods," EPA Publication No. SW 846 (SW 846), incorporated by reference at Section 620.125 for such substance. If the concentration for such substance is less than the lowest appropriate PQL for the substance specified in SW 846, the guidance level is the lowest appropriate PQL. The one in one million cancer risk concentration, the Human Nonthreshold Toxicant Advisory Concentration (HNTAC), shall be determined according to the following equation:~~

$$\frac{HNTAC}{(mg/L)} = \frac{TR \times BW \times AT \times 365 \text{ days/year}}{SFo \times IR \times EF \times ED}$$

Where:

- TR = Target Risk = 1.0E-06
 BW = Body Weight = 70 kg
 AT = Averaging Time = 70 years

~~SF_e~~ = ~~Oral Slope Factor = Chemical specific~~
~~IR~~ = ~~Daily Water Ingestion Rate = 2 liters/day~~
~~EF~~ = ~~Exposure Frequency = 350 days/year~~
~~ED~~ = ~~Exposure Duration = 30 years~~

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 620.610 Publishing Health Advisories

- a) The Agency ~~must~~shall publish the full text of each Health Advisory upon issuance and make the document available to the public.
- b) The Agency ~~must~~shall publish and make available to the public, at intervals of not more than 6 months, a comprehensive and up-to-date summary list of all Health Advisories.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 620.615 Additional Health Advice for Mixtures of Similar-Acting Substances

- a) The ~~Agency must determine the~~ need for additional health advice appropriate to site-specific conditions ~~shall be determined by the Agency~~ when mixtures of chemical substances are detected, where two or more of the chemical substances are similar-acting in their toxic or harmful physiological effect on the same specific organ or organ system.
- b) If mixtures of similar-acting chemical substances are present, the procedure for evaluating the mixture of such substances is specified in ~~accordance with~~ Appendices A, B, and C.

2242 **Section 620.APPENDIX A Procedures for Determining Human ~~Threshold~~ Toxicant**
 2243 **Advisory ~~Concentrations~~ Concentration for Class I: Potable Resource Groundwater**

- 2244
 2245 a) Calculating the Human ~~Threshold~~ Toxicant Advisory Concentration for
 2246 Noncancer Effects.
 2247 For those substances for which U.S. EPA USEPA has not adopted a Maximum
 2248 Contaminant Level Goal ("MCLG"), the Human Threshold Toxicant Advisory
 2249 Concentration is calculated as follows:

2250
 2251
$$HTTAC = \frac{RSC \cdot ADE}{W}$$

 2252
 2253
$$HTTAC = \frac{RSC \times ADE}{W}$$

2254 Where:

- 2255
 2256
 | HTTAC = Human Threshold Toxicant Advisory Concentration in
 milligrams per liter ("mg/L");
 RSC = Relative contribution of the amount of the exposure to
 a chemical via drinking water when compared to the
 total exposure to that chemical from all sources. Valid
 chemical-specific data shall be used if available. If
 valid chemical-specific data are not available, a value
 of 20% (= 0.20) must be used;
 ADE = Acceptable Daily Exposure of substance in milligrams
 per day ("mg/d") as determined pursuant to subsection
 (b); and
 W = Per capita daily water consumption for a child (0-6
 years of age, equal to 0.78 2-liters per day ("L/d").

- 2257 b) Procedures for Determining Acceptable Daily Exposures for Class I: Potable
 2258 Resource Groundwater
 2259
 2260
 2261 1) The Acceptable Daily Exposure ("ADE") represents the maximum amount
 2262 of a threshold toxicant in milligrams per day ("mg/d"), which if ingested
 2263 daily by a child from 0-6 years of age for a lifetime results in no adverse
 2264 effects ~~to humans~~. Subsections (b)(2) through (b)(6) list, in prescribed
 2265 order, methods for determining the ADE in Class I: Potable Resource
 2266 Groundwater.
 2267
 2268 2) For those substances for which noncancer toxicity values have been

derived and presented in units of milligrams per kilogram per day ("mg/kg/day"), the ADE equals the product of multiplying the toxicity value by 15 kilograms ("kg"), which is the assumed average weight of a child 0 to 6 years of age. For those substances for which the USEPA has derived a Verified Oral Reference Dose for humans, USEPA's Reference Dose given in milligrams per kilogram per day (mg/kg/d), as determined in accordance with methods provided in National Primary and Secondary Drinking Water Regulations, 40 CFR 136, appendix B, 40 CFR 141.80, 40 CFR 141.61, and 40 CFR 141.62, incorporated by reference at Section 620.125, must be used. The ADE equals the product of multiplying the Reference Dose by 70 kilograms (kg), which is the assumed average weight of an adult human.

- 3) For those substances for which an oral reference dose is not available, the ADE equals the value of the most sensitive Point of Departure ("POD") as determined by Benchmark Dose Modeling or the NOAEL/LOAEL approach consistent with current U.S. EPA RfD guidance, followed by the derivation of a Human Equivalent Dose ("HED") using physiologically based pharmacokinetic ("PBPK") modeling or Dose Adjustment Factor ("DAF"), then divided by the total Uncertainty Factor ("UF") and modifying factor ("MF"), if applicable. The value is then multiplied by 15 kg (the assumed average weight of a child 0-6 years of age). The equation is depicted below:

$$ADE = \frac{POD}{UF} \cdot 15 \text{ kg}$$

For those substances for which a no observed adverse effect level for humans (NOAEL-H) exposed to the substance has been derived, the ADE equals the product of multiplying one-tenth of the NOAEL-H given in milligrams of toxicant per kilogram of body weight per day (mg/kg/d) by the average weight of an adult human of 70 kilograms (kg). If two or more studies are available, the lowest NOAEL-H must be used in the calculation of the ADE.

- 4) Uncertainty Factors must be applied to the Point of Departure ("POD") in increments of 1, 3, or 10, not to exceed a total UF of 10,000, and must be used consistent with U.S. EPA guidance. A composite UF of 3 and 10 shall be expressed as 30 whereas a composite UF of 3 and 3 shall be expressed as 10. UFs may be used to account for the following:

A) Interspecies Variability

- B) Intraspecies Variability
- C) Lowest Observable Adverse Effects Level ("LOAEL") to No Observed Adverse Effects Level ("NOAEL") Uncertainty
- D) Database Deficiencies
- E) Subchronic to Chronic Duration

For those substances for which only a lowest observed adverse effect level for humans (LOAEL-H) exposed to the substance has been derived, one-tenth the LOAEL-H must be substituted for the NOAEL-H in subsection (b)(3).

- 5) For those substances for which a no-observed adverse effect level has been derived from studies of mammalian test species (NOAEL-A) exposed to the substance, the ADE equals the product of multiplying 1/100 of the NOAEL-A given in milligrams toxicant per kilogram of test species weight per day (mg/kg/d) by the average weight of an adult human of 70 kilograms (kg). Preference will be given to animal studies having High Validity, as defined in subsection (c), in the order listed in that subsection. Studies having a Medium Validity must be considered if no studies having High Validity are available. If studies of Low Validity must be used, the ADE must be calculated using 1/1000 of the NOAEL-A having Low Validity instead of 1/100 of the NOAEL-A of High or Medium Validity, except as described in subsection (b)(6). If two or more studies among different animal species are equally valid, the lowest NOAEL-A among animal species must be used in the calculation of the ADE. Additional considerations in selecting the NOAEL-A include:

- A) If the NOAEL-A is given in milligrams of toxicant per liter of water consumed (mg/L), prior to calculating the ADE the NOAEL-A must be multiplied by the average daily volume of water consumed by the mammalian test species in liters per day (L/d) and divided by the average weight of the mammalian test species in kilograms (kg).
- B) If the NOAEL-A is given in milligrams of toxicant per kilogram of food consumed (mg/kg), prior to calculating the ADE, the NOAEL-A must be multiplied by the average amount in kilograms of food consumed daily by the mammalian test species (kg/d) and divided by the average weight of the mammalian test species in kilograms (kg).

- 2354
2355
2356
2357
2358
2359
2360
2361
2362
2363
2364
2365
2366
2367
2368
2369
2370
2371
2372
2373
2374
- C) ~~If the mammalian test species was not exposed to the toxicant each day of the test period, the NOAEL-A must be multiplied by the ratio of days of exposure to the total days of the test period.~~
 - D) ~~If more than one equally valid NOAEL-A is available for the same mammalian test species, the best available data must be used.~~
 - 6) ~~For those substances for which a NOAEL-A is not available but the lowest observed adverse effect level (LOAEL-A) has been derived from studies of mammalian test species exposed to the substance, one-tenth of the LOAEL-A may be substituted for the NOAEL-A in subsection (b)(5). The LOAEL-A must be selected in the same manner as that specified in subsection (b)(5). One-tenth the LOAEL-A from a study determined to have Medium Validity may be substituted for a NOAEL-A in subsection (b)(3) if the NOAEL-A is from a study determined to have Low Validity, or if the toxicity endpoint measured in the study having the LOAEL-A of Medium Validity is determined to be more biologically relevant than the toxicity endpoint measured in the study having the NOAEL-A of Low Validity.~~

2375 c) Procedures for Establishing Validity of Data from Animal Studies

2376 1) High Validity Studies

- 2377
2378
2379
2380
2381
2382
2383
2384
2385
2386
2387
2388
2389
2390
2391
2392
2393
2394
2395
2396
- A) High validity studies use a route of exposure by ingestion or gavage, and are based upon:
 - i) Data from animal carcinogenicity studies with a minimum of 2 dose levels and a control group, 2 species, both sexes, with 50 animals per dose per sex, and at least 50 percent survival at 15 months in mice and 18 months in rats and at least 25 percent survival at 18 months in mice and 24 months in rats;
 - ii) Data from animal chronic studies with a minimum of 3 dose levels and a control group, 2 species, both sexes, with 40 animals per dose per sex, and at least 50 percent survival at 15 months in mice and 18 months in rats and at least 25 percent survival at 18 months in mice and 24 months in rats, and a well-defined NOAEL; or
 - iii) Data from animal subchronic studies with a minimum of 3

dose levels and control, 2 species, both sexes, 4 animals per dose per sex for non-rodent species or 10 animals per dose per sex for rodent species, a duration of at least 5% of the test species' lifespan, and a well-defined NOAEL.

- B) Supporting studies which reinforce the conclusions of a study of Medium Validity may be considered to raise ~~the such a~~ study to High Validity.

2) Medium Validity Studies
Medium validity studies are based upon:

- A) Data from animal carcinogenicity, chronic, or subchronic studies in which minor deviations from the study design elements required for a High Validity Study are found, but which otherwise satisfy the standards for a High Validity Study;
- B) Data from animal carcinogenicity and chronic studies in which at least 25 percent survival is reported at 15 months in mice and 18 months in rats (a lesser survival is permitted at the conclusion of a longer duration study, but the number of surviving animals should not fall below 20 percent per dose per sex at 18 months for mice and 24 months for rats), but which otherwise satisfy the standards for a High Validity Study;
- C) Data from animal subchronic or chronic studies in which a Lowest Observable Adverse Effect Level (LOAEL) is determined, but which otherwise satisfy the standards for a High Validity Study; or
- D) Data from animal subchronic or chronic studies which have an inappropriate route of exposure (for example, intraperitoneal injection or inhalation) but which otherwise satisfy the standards for a High Validity Study, with correction factors for conversion to the oral route.

3) Low Validity Studies
Low validity studies are studies not meeting the standards ~~of set forth in~~ subsection (c)(1) or (c)(2).

- d) Calculating a Human Nonthreshold Toxicant Advisory Concentration ("HNTAC") for Cancer Risk
The Human Nonthreshold Toxicant Advisory Concentration ("HNTAC") is calculated as follows:

2440
2441
2442
2443

- 1) For chemicals designated by U.S. EPA as "mutagens," the HNTAC is calculated as follows:

2444

$$HNTAC = \frac{TR \cdot \left(AT \cdot 365 \frac{days}{year} \right)}{SF_o \cdot IFWM_{adj}}$$

2445
2446
2447

Where:

- HNTAC ≡ Human Nonthreshold Toxicant Advisory Concentration, equal to milligrams per liter (mg/L)
TR ≡ Target Cancer Risk, equal to one-in-one million cancer risk (1E-06)
AT ≡ Averaging Time, equal to 70 years
SF_o ≡ Oral Slope Factor (chemical-specific), equal to (mg/kg-day)⁻¹
IFWM_{adj} ≡ Age-Adjusted Mutagenic Drinking Water Ingestion Rate, equal to 1,019.0 liters per kilogram (L/kg)

2448
2449
2450
2451

- 2) For chemicals not designated by U.S. EPA as "mutagens," the HNTAC is calculated as follows:

2452

$$HNTAC = \frac{TR \cdot \left(AT \cdot 365 \frac{days}{year} \right)}{SF_o \cdot IFW_{adj}}$$

2453
2454
2455

Where:

- HNTAC ≡ Human Nonthreshold Toxicant Advisory Concentration, equal to milligrams per liter (mg/L)
TR ≡ Target Cancer Risk, equal to one-in-one million cancer risk (1E-06)
AT ≡ Averaging Time, equal to 70 years
SF_o ≡ Oral Slope Factor (chemical-specific), equal to (mg/kg-day)⁻¹

JCAR350620-2404608r01

IFWM_{adj} \equiv Age-Adjusted Mutagenic Drinking Water Ingestion Rate, equal to 327.95 liters per kilogram (L/kg)

2459 **Section 620.APPENDIX B Procedures for Determining Hazard Indices for Class I:**
 2460 **Potable Resource Groundwater for Mixtures of Similar-Acting Substances**

- 2461
- 2462 a) This appendix describes procedures for evaluating mixtures of similar-acting
 2463 substances which may be present in Class I: Potable Resource Groundwaters.
 2464 Except as provided otherwise in subsection (c), subsections (d) through (h)
 2465 describe the procedure for determining the Hazard Index for mixtures of similar-
 2466 acting substances.
- 2467
- 2468 b) For the purposes of this appendix, a "mixture" means two or more substances
 2469 which are present in Class I: Potable Resource Groundwater which may or may
 2470 not be related either chemically or commercially, but which are not complex
 2471 mixtures of related isomers and congeners which are produced as commercial
 2472 products (for example, PCBs or technical grade chlordane).
- 2473
- 2474 c) The following substances listed in Section 620.Appendix E Section 620.410 are
 2475 similar-acting mixtures of similar acting substances:
- 2476
- 2477 1) ~~Mixtures of ortho-Dichlorobenzene and para-Dichlorobenzene. The~~
 2478 ~~Hazard Index (HI) for such mixtures is determined as follows:~~
- 2479
- 2480 ~~$HI = [\text{ortho-Dichlorobenzene}]/0.6 + [\text{para-Dichlorobenzene}]/0.075$~~
- 2481
- 2482 2) ~~Mixtures of 1,1-Dichloroethylene and 1,1,1-trichloroethane. The Hazard~~
 2483 ~~Index (HI) for such mixtures is determined as follows:~~
- 2484
- 2485 ~~$HI = [1,1\text{-Dichloroethylene}]/0.007 + [1,1,1\text{-trichloroethane}]/0.2$~~
- 2486
- 2487 d) When two or more substances occur together in a mixture, the additivity of the
 2488 toxicities of some or all of the substances will be considered when determining
 2489 health-based standards for Class I: Potable Resource Groundwater. This is done
 2490 by the use of a dose addition model with the development of a Hazard Index for
 2491 the mixture of substances with similar-acting toxicities. This method does not
 2492 address synergism or antagonism. Guidelines for determining when the dose
 2493 addition of similar-acting substances is appropriate are presented in Appendix C.
 2494 The Hazard Index is calculated as follows:

2495

2496
$$HI = [A]/ALA + [B]/ALB + \dots [I]/ALI$$

2497 Where:

2498 HI = Hazard Index, unitless.

2499

[A], [B], [I] = Concentration of each similar-acting substance in groundwater in milligrams per liter ("mg/L").

ALA, ALB, ALI = The acceptable level of each similar-acting substance in the mixture in milligrams per liter ("mg/L").

2526
2527
2528
2529
2530
2531
2532
2533
- e) For substances that are considered to have a threshold mechanism of toxicity, the acceptable level is:
- 1) The standards listed in Section 620.410; or
 - 2) For those substances for which standards have not been established in Section 620.410, the Human Threshold Toxicant Advisory Concentration ("HTTAC") as determined in Appendix A.
- f) For substances that are carcinogens, the acceptable level is:
- 1) The standards listed in Section 620.410; or
 - 2) For those substances for which standards have not been established under Section 620.410, the one-in-one-million cancer risk concentration, unless the concentration for such substance is less than the lowest appropriate LLOQ PQL specified in "Test Methods for Evaluating Solid Wastes, Physical/Chemical Methods," EPA Publication No. SW-846, incorporated by reference at Section 620.125, or the LCMRL specified in the drinking water methods incorporated by reference at Section 620.125 for the substance, incorporated by reference at Section 620.125, the guidance level is in which case the lowest appropriate LLOQ or LCMRL PQL shall be the acceptable level.
- g) Since the assumption of dose addition is most properly applied to substances that induce the same effect by similar modes of action, a separate Hazard Index HI must be generated for each toxicity endpoint of concern.
- h) In addition to meeting the individual substance objectives, a Hazard Index must be less than or equal to 1 for a mixture of similar-acting substances.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

2534 **Section 620.APPENDIX C Guidelines for Determining When Dose Addition of Similar-**
2535 **Acting Substances in Class I: Potable Resource Groundwaters is Appropriate**

- 2536
- 2537 a) Substances must be considered similar-acting if:
- 2538
- 2539 1) The substances have the same target in an organism (for example, the
- 2540 same organ, organ system, receptor, or enzyme); or.
- 2541
- 2542 2) The substances have the same mode of toxic action. These actions may
- 2543 include, for example, central nervous system depression, liver toxicity, or
- 2544 cholinesterase inhibition.
- 2545
- 2546 b) Substances that have fundamentally different mechanisms of toxicity (threshold
- 2547 toxicants vs. carcinogens) must not be considered similar-acting. However,
- 2548 carcinogens which also cause a threshold toxic effect should be considered in a
- 2549 mixture with other similar-acting substances having the same threshold toxic
- 2550 effect. In such a case, an Acceptable Level for the carcinogen must be derived for
- 2551 its threshold effect, using the procedures described in Appendix A.
- 2552
- 2553 c) Substances which are components of a complex mixture of related compounds
- 2554 which are produced as commercial products (for example, PCBs or technical
- 2555 grade chlordane) are not mixtures, as defined in Appendix B. Such complex
- 2556 mixtures are equivalent to a single substance. In such a case, the Human
- 2557 Threshold Toxicant Advisory Concentration may be derived for threshold effects
- 2558 of the complex mixture, using the procedures described in Appendix A, if valid
- 2559 toxicological or epidemiological data are available for the complex mixture. If
- 2560 the complex mixture is a carcinogen, the Health Advisory Concentration is the
- 2561 one-in-one-million cancer risk concentration, unless the lower concentration for
- 2562 such substance is less than the lowest appropriate LLOQ PQL specified in "Test
- 2563 Methods for Evaluating Solid Wastes, Physical/Chemical Methods," EPA
- 2564 Publication No. SW-846, incorporated by reference at Section 620.125, or the
- 2565 LCMRL specified in the drinking water methods incorporated by reference at
- 2566 Section 620.125 for the substance.; If the concentration for the substance is less
- 2567 than in which case the lowest appropriate LLOQ or LCMRL for the substance
- 2568 incorporated by reference at Section 620.125, the guidance level is the lowest
- 2569 appropriate LLOQ or LCMRL PQL shall be the Health Advisory Concentration.

2570
2571 (Source: Amended at 48 Ill. Reg. _____, effective _____)

2572

2573 **Section 620.APPENDIX D Groundwater Management Zone Application under**
2574 **Confirmation of an Adequate Corrective Action Pursuant to 35 Ill. Adm. Code 620.250(b)**
2575 **and Corrective Action Completion Certification under 35 Ill. Adm. Code 620.250(d)(a)(2)**
2576

2577 Within any class of groundwater, Pursuant to 35 Ill. Adm. Code 620.250(a) if an owner or
2578 operator provides a written confirmation to the Agency that an adequate corrective action,
2579 equivalent to a corrective action process approved by the Agency, is being undertaken in a timely
2580 and appropriate manner, then a groundwater management zone (GMZ) may be established. A
2581 GMZ is as a three-dimensional region containing groundwater being managed to mitigate
2582 impairment caused by a the release of one or more contaminants from a site. See 35 Ill. Adm.
2583 Code 620.250(a). A GMZ cannot be established before the owner or operator submits a GMZ
2584 application to the Illinois Environmental Protection Agency (Agency) under 35 Ill. Adm. Code
2585 620.250(b). A GMZ is not established until the Agency issues a written approval of the GMZ,
2586 including its corrective action, under 35 Ill. Adm. Code 620.250(c)(2). This document provides
2587 the form in which the written confirmation is to be submitted to the Agency.
2588

2589 When an owner or operator completes the Agency-approved corrective action, the owner or
2590 operator must submit to the Agency appropriate documentation under 35 Ill. Adm. Code
2591 620.250(d), including a corrective action completion certification. A GMZ is terminated when
2592 the Agency issues a written determination to that effect under 35 Ill. Adm. Code 620.250(d)(1)
2593 or (f).
2594

Note 1. Parts I, and II and III of this Appendix D specify the information required for the
GMZ application that the owner or operator submits are to the Agency be submitted
to IEPA at the time that the facility claims the alternative groundwater standards.
Part IV of this Appendix D specifies the information required for III is to be
submitted at the corrective action completion certification that the owner or
operator submits to the Agency of the site investigation. At the completion of the
corrective process, a final report is to be filed which includes the confirmation
statement included in Part IV.

Note 2. The issuance of a permit by the Agency's IEPA's Division of Air Pollution Control
or Water Pollution Control for a treatment system does not imply that the Agency
has approved any the corrective action process.

Note 3. A GMZ application is not for use in establishing a GMZ under the Site
Remediation Program (35 Ill. Adm. Code 740). See 35 Ill. Adm. Code 620.250(g).
If the release is subject to a corrective action process that requires the submittal of
more information to the Agency to establish a GMZ than that specified in Parts I,
II, and III of this Appendix D, the owner or operator must include the additional
information with its GMZ application. See 35 Ill. Adm. Code 620.250(b)(2). In
addition, if the release is subject to a corrective action process that requires the
information specified in Parts I, II, and III of this Appendix D to be submitted to

the Agency in a different form than a GMZ application (e.g., plan, agreement, report, permit application), the owner or operator must submit the information in that form. See 35 Ill. Adm. Code 620.250(b)(3). If the facility is conducting a cleanup of a unit which is subject to the requirements of the Resource Conservation and Recovery Act (RCRA) or the 35 Ill. Adm. Code 731 regulations for Underground Storage Tanks, this confirmation process is not applicable and cannot be used.

Note 4. If the GMZ would extend off-site, the GMZ application must include each affected property owner's written permission to the establishment of the GMZ on its property. See 35 Ill. Adm. Code 620.2501(b)(1). If a response to any item in this Appendix D requires additional explanation or clarification, provide it in an attachment to the submittal this document.

c. RCRA Part B ~~permits~~Permits. Yes ___ No ___ If the answer to this question is "yes", identify the permit log number or numbers.

8. Has the facility ever conducted the closure of a RCRA hazardous waste management unit? Yes ___ No ___

9. Have any of the following State or federal government actions taken place for a release at the facility?

a. Written notification regarding known, suspected or alleged contamination ~~at or emanating from~~ the property (e.g., a Notice pursuant to Section 4(q) or Section 31(a) or (b) of the Illinois Environmental Environment Protection Act)? Yes ___ No ___ If the answer to this question is "yes", identify notice's the caption and date of issuance.

b. Consent Decree or Order under RCRA, the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), EPAet Section 22.2 of the Illinois Environmental Protection Act (State Superfund), or EPAet Section 21(f) of the Illinois Environmental Protection Act (State RCRA). Yes ___ No ___

c. If either ~~item 9(a) or 9(b) is of Items a or b were~~ answered by checking "yes", is the notice, order, or decree still in effect? Yes ___ No ___

10. Provide a statement of the classification or classifications of groundwater at the facility.

Class I ___ Class II ___ Class III ___ Class IV ___
If more than one Class applies, explain.

11. What ~~groundwater~~ classification will the groundwater within the proposed groundwater management zone facility be subject to at the completion of the remediation?

Class I ___ Class II ___ Class III ___ Class IV ___
If more than one Class applies, ~~please~~ explain.

1211. Describe the circumstances under which the release to groundwater was identified.

Based on my inquiry of those persons directly responsible for gathering the information, I certify

Part III: Remedy Selection Information

- Describe the selected remedy and why it was chosen. Include a description of the fate and transport of contaminants with the selected remedy over time.
- Describe other remedies that ~~which~~ were considered and why they were rejected.
- Will waste, contaminated soil, or contaminated groundwater be removed from the site during in the course of this remediation? Yes ___ No ___ If the answer to this question is "yes", where will the contaminated material be taken?
- Describe how the selected remedy will accomplish the maximum practical restoration of beneficial use of groundwater.
- Describe how the selected remedy will minimize any threat to public health or the environment.
- Describe how the selected remedy will result in compliance with the applicable groundwater standards for the appropriate class or classes of groundwater. Include the results of groundwater contaminant transport modeling or calculations showing how the selected remedy will achieve compliance with these standards.
- Provide a schedule for design, construction, and operation of the remedy, including

- 2751 dates for the start and completion.
 2752
 2753 8. Describe how the remedy will be operated and maintained.
 2754
 2755 9. Have any of the following permits been issued for the remediation?
 2756
 2757 a. Construction or ~~operating~~ Operating permit from the Agency's Division of
 2758 Water Pollution Control. Yes ___ No ___ If the answer to this question is
 2759 "yes", identify the permit number or numbers.
 2760
 2761 b. Land treatment permit from the Agency's Division of Water Pollution
 2762 Control. Yes ___ No ___ If the answer to this question is "yes", identify the
 2763 permit number or numbers.
 2764
 2765 c. Construction or ~~operating~~ Operating permit from the Agency's Division of
 2766 Air Pollution Control. Yes ___ No ___ If the answer to this question is
 2767 "yes", identify the permit number or numbers.
 2768
 2769 10. How will groundwater within the proposed groundwater management zone at the
 2770 facility be monitored ~~after following~~ completion of the remedy to ensure compliance
 2771 with the that the groundwater standards for the appropriate class or classes of
 2772 groundwater have been attained?
 2773

2774 Based on my inquiry of those persons directly responsible for gathering the information, I
 2775 certify that the information submitted is, to the best of my knowledge and belief, true and
 2776 accurate and confirm that the actions identified in this submittal herein will be performed
 2777 undertaken in compliance aeeordance with the schedule in this submittal set forth herein.
