POLLUTION CONTROL BOARD

NOTICE OF ADOPTED AMENDMENTS

- 13) Will this rulemaking replace an emergency rule currently in effect? No
- 14) Are there any other rulemakings pending on this Part? No
- 15) Summary and purpose of rulemaking: The following briefly describes the subjects and issues involved in this rulemaking. A comprehensive description is contained in the Board's opinion and order of March 7, 2024, proposing amendments in docket R24-15 for public comment, which opinion and order is available from the address below. As is explained in that opinion, the Board will receive public comment on the proposed amendment for 45 days from the date it appears in the Illinois Register before proceeding to adopt amendment based on this proposal.

The docket in the R24-15 proceeding relates to the Illinois ambient air quality requirements in 35 Ill. Adm. Code 243 of the Illinois air pollution control rules. This amendment would update the Illinois ambient air quality requirements to correspond with amendments to the federal National Ambient Air Quality Standards (NAAQSs) that the United States Environmental Protection Agency (USEPA) adopted during the second half of 2023. The Federal NAAQS are codified at 40 C.F.R. 50. During this period, USEPA amended implementation of its NAAQSs as follows:

October 12, 2023 (88 Fed. Reg. 70595)

USEPA updated the current ozone absorption cross-section to the recommended consensus based cross-section value. The new value is 1.2% lower than the current value and reduces the uncertainty in the value. The adoption of this updated ozone absorption cross-section could result in increases in measured ozone concentrations. However, given the existing sources of potential variability in monitoring data, it is unlikely that there will be any consistent measurable and predictable effect on reported data.

November 6, 2023 (88 Fed. Reg. 76212)

USEPA updated its *List of Designated Reference and Equivalent Methods* (List) on November 6, 2023. USEPA's update modified existing method designations and designated a new Federal Equivalent Method (FEM) for measuring concentrations of Particulate Matter (PM10) in ambient air. USEPA updated its *List of Designated Reference and Equivalent Methods* on November 6, 2023. The Board's rules incorporate the December 15, 2022 version of the List by reference. Updating the incorporation by reference to the December 15, 2023 version will incorporate the November 6, 2023
