ILLINOIS POLLUTION CONTROL BOARD
June 6, 2024

IN THE MATTER OF:	)	
	)	
AMENDMENTS TO 35 ILL. ADM. CODE	)	R 18-21
SUBTITLE B	)	(Rulemaking – Air)

Proposed Rule. Proposal for Public Comment.

OPINION AND ORDER OF THE BOARD (by M.D. Mankowski)

On January 10, 2018, the Illinois Environmental Protection Agency (IEPA or Agency) filed a proposal to amend numerous Board rules, including Subtitle B air pollution regulations. IEPA's proposal cited Executive Order 2016-13, which directed agencies to review regulations to identify provisions that are outdated, repetitive, confusing, or unnecessary and then revise or repeal them as appropriate. In 2016, the Board had begun its own review with the same general purposes.

Today, the Board proposes amendments to its Subtitle B rules for public comment. The amendments consist of both IEPA's original proposals and additional revisions identified by the Board. Both IEPA and the Board intend proposed amendments to be non-substantive.

In this opinion and order, the Board first provides the procedural history of this rulemaking docket at pages 1-2 before providing procedural direction to participants at page 2. It then addresses the background of its proposal at page 3 before discussing proposed amendments part-by-part at pages 3-42. Next, it addresses filing public comments at page 42 and specifically requests comment on 167 questions at pages 42-68. The Board then addresses the technical feasibility and economic reasonableness of its proposal at pages 69-70 and IEPA's anticipated revisions to State Implementation Plans at pages 70-71. Finally, at page 71, the Board concludes to propose amended rules for public comment and issues its order. The proposed amendments follow this opinion.

PROCEDURAL HISTORY

On January 10, 2018, IEPA filed proposed non-substantive revisions to Board rules including Subtitle B (IEPA Clean-Up). Clean-Up Amendments to 35 Ill. Adm. Code Parts 201, 211, 212, 214, 215, 216, 217, 218, 219, 225, 228, 232, 237, 301, 302, 303, 304, 306, 309, 401, 402, 403, 404, 405, 501, 611, 615, 616, 617, 722, 811, 813, 855, and 1000, R18- 21 (Jan. 10, 2018). IEPA included its Statement of Reasons (SR), Technical Support Document (TSD), and proposed revisions of Parts 201, 211, 212, 214-219, 225, 228, 232, and 237 (Prop. 201 *et seq*.). On February 8, 2018, the Board accepted IEPA's proposal for hearing.

On March 22, 2018, the Board concluded to consider in this docket only amendments to Subtitle B. Amendments to 35 Ill. Adm. Code Subtitle B: Air Pollution, R18-21 (Mar. 22, 2018). The Board opened eight additional rulemaking dockets, one to consider each of the other

Subtitles of the Board's rules. *See, e.g.*, Amendments to 35 Ill. Adm. Code Subtitle C: Water Pollution, R18-23 (Mar. 22, 2018).

On March 22, 2018, the Board docketed as public comments three emails from JCAR staff to the Board. The first (PC 1) addressed Part 201, the second (PC 2) addressed Part 211, and the third (PC 3) addressed Part 212. On March 26, 2018, the Board docketed as PC 6 an email from JCAR staff intended to replace PC 3.

On March 23, 2018, the Board docketed as public comments two emails from JCAR staff to the Board. The first (PC 4) addressed Part 215, and the second (PC 5) addressed Part 217. On March 26, 2018, the Board docketed as a public comment as email from JCAR staff to the Board (PC 7) addressing Part 214. On April 2, 2018, the Board docketed as public comments two emails from JCAR staff to the Board. The first (PC 8) addressed Part 215 and intended to replace PC 4, and the second (PC 9) addressed Part 218.

PROCEDURAL DIRECTION

The Board's Subtitle B rules include 30 parts. While Parts 230 and 231 have been repealed, the remaining 28 include lengthy Parts, and the Board's proposal for public comment includes more than 2100 pages of proposed amendments.

The Board proceeds today by proposing these amendments for public comment without submitting them to first-notice publication in the *Illinois Register*, which would trigger a one-year adoption deadline. *See* 5 ILCS 100/5-40(b), (e) (2022). Although the Board intends to propose only non-substantive amendments, it recognizes that participants including IEPA, the Attorney General's Office, regulated entities, and environmental organizations will wish to review them thoroughly.

The Board expects that its proposal for public comment will allow participants more time for review and comment than if the Board adopted a first-notice proposal today and immediately had to begin meeting rulemaking requirements including publishing the proposal in one or more issues of the *Illinois Register*, providing the minimum comment period of 45 days, following hearing procedures including at least 20 days of public notice under the Act, preparing a second-notice opinion and order, and submitting a proposal to second-notice review by JCAR at one of its monthly meetings.

Below, the Board directs its hearing officer to proceed by scheduling required hearings and setting deadlines including those for pre-filed testimony and post-hearing comments. The Board now intends to provide participants with time to review its lengthy proposal before holding hearings in the fall of 2024. After completing hearings and considering testimony and comments received by that time, the Board intends to adopt a proposal for first-notice publication.

BACKGROUND

Subtitle B of the Board's rules addresses air pollution and includes permitting provisions, emissions standards and limitations, and monitoring requirements. IEPA does not propose substantive changes. SR at 3; TSD at 2. IEPA proposed "to repeal specified portions of Board regulations which have over time become obsolete, duplicative, or unnecessary." SR at 2; *see* TSD at 2. IEPA also proposed "minor corrections or updates" to other provisions "[f]or purposes of economy." *Id*. The Board proposes additional amendments to remove redundant or unnecessary language, replace outdated language, update statutory references, and make other non-substantive revisions.

IEPA argues that "[a]ll amendments are emissions-neutral and do not affect the overall plans or goals of attainment or nonattainment areas within the State." SR at 3, citing TSD at 2. IEPA further argues that, "[a]s the amendments are administrative in nature they will not affect emission levels of any pollutant within the State, nor will the proposed amendments impact reasonable further progress toward any National Ambient Air Quality Standard (NAAQS)." SR at 3; *see* TSD at 2. IEPA asserts that its proposal "will not impact permitting programs." *Id*. IEPA adds that the proposal also would not interfere with Section 193 of the Clean Air Act (CAA)[1], the General Savings Clause, or other CAA requirements. TSD at 2.

IEPA proposed amending provisions that are part of Illinois' State Implementation Plan (SIP). TSD at 2. To revise the SIP, IEPA must "demonstrate that the revisions would not 'interfere with any applicable requirement concerning attainment and reasonable further progress, or any other applicable requirement' of the CAA" under Section 110(l) of the CAA. *Id*. IEPA provides this demonstration for each proposed amendment for which it must make this demonstration in a SIP revision. *Id*.

The Illinois Administrative Procedure Act (APA) requires rulemaking proposals to identify "any published study or research report used in developing the rule" and describe how the public may obtain a copy of it. SR at 34, citing 5 ILCS 100/5-40(b)(3.5) (2020). The Board's procedural rules require the same information. SR at 34, citing 35 Ill. Adm. Code 102.202(e). IEPA stated that it "did not consult with a published study or report when developing its proposal." SR at 34.

SUMMARY OF PROPOSED AMENDMENTS

In the following subsections, the Board addresses the proposed amendments Part-by-Part.

Part 201: Permits and General Provisions

Part 201 identifies actions that require a permit and provides the permit application process. SR at 3; *see* 35 Ill. Adm. Code 201. IEPA explains that Part 201 is intended to satisfy CAA requirements to institute an emission-based permitting program. SR at 3.

---

[1] Section 193 pertains to "regulations, standards, rules, notices, orders, and guidance documents promulgated or issued prior to November 5, 1990." TSD at 2, n.1.

IEPA proposed to repeal or revise four sections of Part 201, which the Board summarizes in the following subsections.

In addition, the Board throughout Part 201 proposes numerous revisions including matters of capitalization, punctuation, organization, spelling, and concision. The Board also proposed amendments such as changing passive to active voice, avoiding unnecessary nominalizations, simplifying cross references, making the forms of temperatures more consistent with one another, making the forms of definitions more consistent with other Parts, and using "must" to be more clearly mandatory. The Board intended that each of its proposed revisions would be non-substantive, and the Board does not specifically discuss them in the opinion.

JCAR suggested approximately 20 additional changes. PC 1. The Board considers these suggested changes consistent with its own and largely includes them in its proposal for public comment without discussion in this opinion.

Finally, below under "Filing Public Comments," the Board specifically requests comment from any of the participants on matters concerning Part 201. *See infra* at 42-43.

Section 201.124: Annual Report

Section 201.124 requires IEPA to submit to the Board "an annual report that lists the emissions sources for which an operating permit is needed, the type and quantity of pollutants they emit, and the existing and planned controls these sources have, including when planned controls would be completed." SR at 3; *see* 35 Ill. Adm. Code 201.124; TSD at 2. The Board adopted this rule in 1972. TSD at 2, citing Emission Standards, R71-23 (Apr. 13, 1972) (adopting Rule 112). IEPA argues that the Board adopted this rule to allow it "to assess the operation of the Air program in the years following its initial inception." SR at 3; TSD at 2.

IEPA argues that the Act and Board rules clearly establish "the emission sources for which permits are required, as well as the type of permit required, based on the nature of the source and type and quantity of emissions." SR at 3, citing 415 ILCS 5/9, 39 (2022); 35 Ill. Adm. Code 201.142, 201.143, 201.144, 201.146. IEPA adds that rules for source categories and processes generally require specified control measures. TSD at 2. IEPA argues that information in this annual report "would serve no particular purpose and is not, in fact, implemented by the Agency." TDS at 2. Based on these factors, IEPA asserts that Section 201.124 is no longer necessary and proposes to repeal it. SR at 3; TSD at 2; *see* Prop. 201 at 5.

In its proposal for public comment, the Board repeals this section.

IEPA argues that adopting this repeal into the SIP is consistent with Sections 110(l) and 193 of the CAA. TSD at 3. It asserts that the proposed repeal "is only administrative and will not affect the current emission levels or the air quality status in Illinois. This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Section 201.147: Former Permits

Section 201.147 provides that all permits issued by IEPA or its predecessor are subject to Sections 201.121, 201.142 through 201.146 and Subparts D through F and must be revised or revoked as necessary to conform with Board's air pollution rules. SR at 3. The Board adopted this rule in 1972. TSD at 3, citing Emission Standards, R71-23 (Apr. 13, 1972) (adopting Rule 103(j)). IEPA argues that this provision "intended to address the requirements applicable to pre-1971 permits." SR at 3. IEPA asserts that "[n]o source still holds a 'former permit,' making this Section obsolete and unnecessary." SR at 3; TSD at 3. Based on these factors, IEPA proposes to repeal it. *Id*.; *see* Prop. 201 at 5.

In its proposal for public comment, the Board repeals this section.

IEPA argues that adopting this repeal into the SIP is consistent with Sections 110(l) and 193 of the CAA. TSD at 3. It asserts that the proposed repeal "is only administrative and will not affect the current emission levels or the air quality status in Illinois. This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Section 201.164: Design Criteria

Section 201.164 authorized IEPA "to establish design parameters for those wishing to know what was considered adequate to meet the standards for issuance of a permit." SR at 3; TSD at 3. The Board adopted this rule in 1972. TSD at 3, citing Emission Standards, R71-23 (Apr. 13, 1972) (adopting Rule 103(d)). IEPA states that, since the Board adopted this provision, "design criteria or parameters have been included within regulations." SR at 3; *see* TSD at 3. IEPA asserts that it has "never implemented or published any procedures concerning specific criteria in the design, operation, or maintenance of any emission unit or control equipment." SR at 3-4; TSD at 3. Based on these factors, IEPA argues that is no longer necessary and should be repealed. SR at 3, 4; TSD at 3; *see* Prop. 201 at 5.

In its proposal for public comment, the Board repeals this section.

IEPA argues that adopting this repeal into the SIP is consistent with Sections 110(l) and 193 of the CAA. TSD at 3. It asserts that the proposed repeal "is only administrative and will not affect the current emission levels or the air quality status in Illinois. This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Section 201.207: Applicability

Section 201.207 provides in its entirety that

> [t]his Subpart shall apply only to sources subject to Section 39.5 of the Act. The requirements of Sections 201.143 through 201.148 of Subpart C, Sections 201.157 through 201.165 and 201.169 of Subpart D, and Subparts G and H of this

> Part shall not apply to a source subject to the requirements of Section 39.5 of the Act. 35 Ill. Adm. Code 201.207.

IEPA proposed to revise Section 201.207 by referring to "[t]he requirements of Sections 201.143 through 201.146~~201.148~~ of Subpart C." Prop. 201 at 6. The Board includes this revision in its proposal for public comment.

However, the Board notes that IEPA proposed to repeal Section 201.147 as obsolete and unnecessary. SR at 3,4; TSD at 3; *see* Prop. 201 at 5. The Board below requests comment on whether Section 201.148, Operation Without Compliance Program and Project Completion Schedule, would then apply to sources subject to Section 39.5 of the Act and whether applying it to those sources reflects IEPA's intent.

Part 202: Alternative Control Strategies

Part 202 addresses alternative control strategies for emission sources in place of requirements which would otherwise apply. *See* 35 Ill. Adm. Code 202.140. Neither IEPA nor JCAR proposed revising Part 202.

The Board throughout Part 202 proposes numerous revisions including matters of punctuation, organization, abbreviation, and concision. The Board also proposed amendments such as changing passive to active voice, avoiding unnecessary nominalizations, simplifying cross references, and using "must" to be more clearly mandatory. The Board intended that each of its proposed revisions is non-substantive, and the Board does not specifically discuss them in the opinion.

Finally, below under "Filing Public Comments," the Board specifically requests comment from any of the participants on matters concerning Part 202. *See infra* at 44.

Part 203: Major Stationary Sources Construction and Modification

Part 203 addresses construction and modification of major stationary sources. *See* 35 Ill. Adm. Code 203.201. Neither IEPA nor JCAR proposed revising Part 203.

The Board throughout Part 203 proposes numerous revisions including matters of punctuation, spelling, organization, abbreviation, and concision. The Board also proposed amendments such as changing passive to active voice, avoiding unnecessary nominalizations, simplifying cross references, and using "must" to be more clearly mandatory. The Board intended that each of its proposed revisions is non-substantive, and the Board does not specifically discuss them in the opinion.

Finally, below under "Filing Public Comments," the Board specifically requests comment from any of the participants on matters concerning Part 203. *See infra* at 44.

Part 204: Prevention of Significant Deterioration

In 2020, the Board adopted rules based on an IEPA proposal to adopt a new Part 204. IEPA's proposal intended to create a state Prevention of Significant Deterioration (PSD) permitting program allowing it to assume responsibility for those permits and allow the Board to decide appeals of them. Proposed New 35 Ill. Adm. Code 204, Prevention of Significant Deterioration, Amendments to 35 Ill. Adm. Code Parts 101, 105, 203, 211, and 215, R 19-1 (Aug. 27, 2020).

In first-notice comments in R 19-1, IEPA argued that the Act required the Board to adopt PSD rules that mirror - and not merely approximate - the federal PSD rules. Proposed New 35 Ill. Adm. Code 204, Prevention of Significant Deterioration, Amendments to 35 Ill. Adm. Code Parts 101, 105, 203, 211, and 215, R 19-1, slip op. at 2 (June 18, 2020), citing 42 U.S.C 7475; 415 ILCS 5/9.1(c) (2018) (second-notice opinion). IEPA commented that the first-notice version of Part 204 published in the *Illinois Register* amended its proposal. IEPA argued that, although those amendments might appear to be non-substantive, they in many cases changed the proposal in ways that were not consistent with the federal PSD rules and jeopardized approval of Part 204 as a SIP revision. Proposed New 35 Ill. Adm. Code 204, Prevention of Significant Deterioration, Amendments to 35 Ill. Adm. Code Parts 101, 105, 203, 211, and 215, R 19-1, slip op. at 3 (June 18, 2020).

In its second-notice opinion, the Board agreed with IEPA that the Act requires adopting state PSD rules that follow the federal rules and that USEPA will approve as a SIP revision. Proposed New 35 Ill. Adm. Code 204, Prevention of Significant Deterioration, Amendments to 35 Ill. Adm. Code Parts 101, 105, 203, 211, and 215, R 19-1, slip op. at 5 (June 18, 2020). In its second-notice proposal, the Board in numerous cases revised Part 204 as IEPA had recommended and reinstated language originally proposed by IEPA. *See id.* at 12-58. When it adopted the rules, the Board made only a limited number of additional changes, many to conform to IEPA's first-notice comment. Proposed New 35 Ill. Adm. Code 204, Prevention of Significant Deterioration, Amendments to 35 Ill. Adm. Code Parts 101, 105, 203, 211, and 215, R 19-1, slip op. at 2-3 (Aug. 27, 2020).

On September 9, 2021, USEPA approved revisions to Illinois' SIP that IEPA had submitted to it. The revisions implemented new permitting requirements under the PSD program. 86 Fed. Reg. 50459-70 (Sept. 9, 2021). USEPA also transferred to IEPA responsibility for administering PSD permits previously issued to sources in Illinois. *Id*.

Neither IEPA nor JCAR proposed revising Part 204. In the proceedings that considered and adopted Part 204, the Board accepted IEPA's general position that state PSD rules must mirror the federal rules to comply with the Section 9.1(c) of the Act and obtain USEPA approval as a SIP submission. As noted above, Illinois obtained this approval. Considering this background and the recent adoption of the rules, the Board does not include Part 204 in its proposal for public comment.

Part 205: Emissions Reduction Marketing System

Part 205 implements the Emissions Reduction Marketing System (ERMS) under Section 9.8 of the Act. *See* 415 ILCS 5.9.8 (2022); 35 Ill. Adm. Code 205.110. The Board notes that in 2018 it adopted a rule "sunsetting" Part 205. 35 Ill. Adm. Code 205.115; *see* Amendment to 35 Ill. Adm. Code 205, Emissions Reduction Market System, R18-22 (Dec. 6, 2018). Neither IEPA nor JCAR proposed revising Part 205.

The Board throughout Part 205 proposes numerous revisions including matters of punctuation, capitalization, and concision. The Board also proposed amendments such as changing passive to active voice, avoiding unnecessary nominalizations, simplifying cross references, and using "must" to be more clearly mandatory. The Board intended that each of its proposed revisions is non-substantive, and the Board does not specifically discuss them in the opinion.

Finally, below under "Filing Public Comments," the Board specifically requests comment from any of the participants on matters concerning Part 205. *See infra* at 44.

Part 207: Vehicle Scrappage Activities

Part 207 establishes procedures and requirements vehicle scrapping activities performed in Illinois must follow to obtain Creditable Emissions Reductions. 35 Ill. Adm. Code 207.100(a). Neither IEPA nor JCAR proposed revising Part 207.

The Board throughout Part 207 proposes numerous revisions including matters of punctuation, capitalization, organization, and concision. The Board also proposed amendments such as changing passive to active voice, avoiding unnecessary nominalizations, simplifying cross references, and using "must" to be more clearly mandatory. The Board intended that each of its proposed revisions is non-substantive, and the Board does not specifically discuss them in the opinion.

Finally, below under "Filing Public Comments," the Board specifically requests comment from any of the participants on matters concerning Part 207. *See infra* at 44.

Part 211: Definitions and General Provisions

Part 211 provides definitions for Subchapter C of the Board's rules entitled "Emission Standards and Limitations for Stationary Sources." 35 Ill. Adm. Code 211. IEPA proposed to amend a number of these definitions, and the Board summarizes these proposed amendments in the subsections below. *See* SR at 4; TSD at 4-7.

In addition, the Board throughout Part 211 proposes numerous revisions including matters of punctuation, capitalization, spelling, organization, and concision. The Board also proposed amendments such as changing passive to active voice, avoiding unnecessary nominalizations, simplifying cross references, updating statutory references, making the forms of temperatures more consistent with one another, making the form of definitions more consistent

with one another, and using "must" to be more clearly mandatory. The Board intended that each of its proposed revisions would be non-substantive, and the Board does not specifically discuss them in the opinion.

JCAR suggested approximately 50 additional changes. PC 2. The Board considers these suggested changes consistent with its own and largely includes them in its proposal for public comment without discussion in this opinion if the Board has not already adopted them.

Finally, below under "Filing Public Comments," the Board specifically requests comment from any of the participants on matters concerning Part 211. *See infra* at 44-47.

Section 211.481: Ammunition Sealant
Section 211.880: Cap Sealant

IEPA proposed to amend these two definitions by striking from both of them the phrase "for the purposes of 35 Ill. Adm. Code 218.204(q)(1) and 219.204(q)(1)." SR at 4; TSD at 4. IEPA asserts that this phrase is unnecessary and possibly confusing because the definitions also affect other Board rules. *Id*.

The Board includes this revision in its proposal for public comment.

IEPA argues that adopting these amendments into the SIP is consistent with Section 110(l) of the CAA. TSD at 4. It asserts that the proposed amendments are "only administrative" and would clarify the definitions. IEPA argues that these amendments will not affect the current emission levels or the air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Section 211.1270: Coil Coating

IEPA proposed to amend this definition by adding language to clarify that "protective oils which are used for the purpose of providing lubrication or protection from corrosion without forming a solid film are not subject the volatile organic material (VOM) limitations for coil coatings." SR at 4; TSD at 4; *see* Prop. 211 at 15-16. IEPA argues that this amendment is consistent with USEPA's definition of "protective oil" in the National Emission Standards for Hazardous Air Pollutants (NESHAP) for Surface Coating of Metal Coil. SR at 4; TSD at 4, citing 40 CFR 63.5110.

The Board includes this revision in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 4. It asserts that the proposed amendments are "only administrative" and would clarify the definition. IEPA argues that this amendment will not affect the current emission levels or the air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Section 211.1670: Daily-Weighted Average VOM Content

IEPA proposed to amend this definition to reflect that VOM emission limits are no longer expressed only in terms of weight of VOM per volume of coatings. TSD at 5. IEPA proposed to refer also to limits expressed in terms of "weight of VOM per weight of solids in the coating, weight of VOM per weight of coating, or weight of VOM per volume of solids in the coating." SR at 4; TSD at 5. IEPA proposed to amend this definition "by adding equations to determine daily weighted VOM content to match each type of VOM emission limit." *Id*.; *see* Prop. 211 at 16-20.

The Board includes these revisions in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 5. It asserts that the proposed amendment is "only administrative" and would clarify the definition. IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Section 211.2200: Extreme High-Gloss Coating

IEPA states that, although this definition applies to sources in both the Chicago and Metro East nonattainment areas (NAAs), "the references to the regulations applicable to the Metro East NAA were inadvertently omitted." SR at 4; TSD at 5. IEPA proposed to "add references to Section 219.204(q)(1) and Section 219.204(q)(5) to reflect that the definition of Extreme High-Gloss Coating applies to both the Chicago and Metro East NAAs." SR at 4-5; TSD at 5; *see* Prop. 211 at 20.

The Board includes this revision in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 5. It asserts that the proposed amendment is "only administrative" and would clarify the definition. IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Section 211.2310: Final Repair Coat

IEPA proposed to revise this definition by correcting typographical errors. First, IEPA proposed to change "218.219(a)(1)" and "218.219(a)(2)" to "219.204(a)(1)" and "219.204(a)(2)," respectively. TSD at 5; *see* SR at 5. IEPA states that these two corrections add references to Part 219, as "the definition applies to both NAAs of the State." TSD at 5. IEPA adds that the replaced Sections 218.219(a)(1) and 218.219(a)(2) address "closed container requirements under the work practice standards for automobile and light-duty truck and miscellaneous metal and plastic parts coatings." *Id*.

IEPA also proposed to restore a reference to Section 215.204(a) "that was mistakenly removed in a prior rulemaking." SR at 5; *see* TSD at 5; Prop. 211 at 20.

The Board includes these revisions in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 5. It asserts that the proposed amendment is "only administrative" and would clarify the definition. *Id*. at 6. IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Section 211.3850: Miscellaneous Metal Parts and Products Coating

IEPA proposed to amend this definition by adding language clarifying that "protective oils which are used for the purpose of providing lubrication or protection from corrosion without forming a solid film are not subject the VOM limitations for miscellaneous metal parts and products coating." SR at 5; TSD at 6; *see* Prop. 211 at 21. IEPA argues that this amendment is consistent with USEPA's definition of "coating" in the NESHAP for Surface Coating of Miscellaneous Metal Parts and Products. SR at 5; TSD at 6, citing 40 CFR 63.3981.

The Board includes this revision in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 6. It asserts that the proposed amendment is "only administrative" and would clarify the definition. IEPA argues that this amendment will not affect the current emission levels or the air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Section 211.3967: Mouth Waterproofing Sealant

IEPA proposed to amend this definition by striking the phrase "for the purposes of 35 Ill. Adm. Code 218.204(q)(1) and 219.204(q)(1)." SR at 5; TSD at 6. IEPA asserts that this phrase is unnecessary and possibly confusing since the definition also affects other rules. *Id*.; *see* Prop. 211 at 21.

The Board includes this revision in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 6. It asserts that the proposed amendment is "only administrative" and would clarify the definition. IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Section 211.4250: Organic Material and Organic Materials

IEPA proposed to amend subsection (b) of this definition to clarify that it "applies to Parts 201 and 211, as well as to Parts 215, 218, and 219." SR at 5; TSD at 6; *see* Prop. 211 at 21-22.

The Board includes this revision in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 6. It asserts that the proposed amendment is "only administrative" and would clarify the definition. IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Section 211.5500: Regulated Air Pollutant

IEPA notes that "Section 39.5(l) of the Act includes 'greenhouse gases' in the definition of "Regulated Air Pollutant." SR at 5; TSD at 7, citing 415 ILCS 5/39.5(l) (2022). IEPA proposed to add "greenhouse gases" to this definition "to be consistent with the definition in the Act." SR at 5; TSD at 7; *see* Prop. 211 at 22.

The Board includes this revision in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 7. It asserts that the proposed amendment is "only administrative" and would clarify the definition. IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Part 212: Visible and Particulate Matter Emissions

"Part 212 contains standards and limitations for visible and particulate matter emissions and discharges from stationary emission units. The Part is divided into various subparts based upon the type of source producing the emissions." SR at 5. IEPA proposed three amendments to Part 212, and the Board summarizes these proposed amendments in the subsections below. SR at 4; TSD at 7-8.

In addition, the Board throughout Part 212 proposes numerous revisions including matters of punctuation, capitalization, spelling, organization, and concision. The Board also proposed amendments such as changing passive to active voice, avoiding unnecessary nominalizations, simplifying cross references, updating statutory references, making the forms of temperatures more consistent with one another, making the forms of definitions more consistent with one another, and using "must" to be more clearly mandatory. The Board intended that each of its proposed revisions would be non-substantive, and the Board does not specifically discuss them in the opinion.

JCAR suggested approximately 50 additional changes. PC 2. The Board considers these suggested changes consistent with its own and largely includes them in its proposal for public comment without discussion in this opinion if the Board has not already adopted them.

Finally, below under "Filing Public Comments," the Board specifically requests comment from any of the participants on matters concerning Part 212. *See infra* at 48-49.

Section 212.423: Emission Limits for the Portland Cement Manufacturing Plant Located in LaSalle County, South of the Illinois River

IEPA states that the Board first adopted this provision in 1991 to control PM_{10} emissions from a Portland cement manufacturing plant in LaSalle County that operated before September 1, 1990. SR at 6; TSD at 7, citing PM-10 Emission Limits for the Portland Cement Manufacturing Plant and Associated Quarry Operations Located South of the Illinois River in LaSalle County, R 91-6 (Sept. 26, 1991). IEPA adds that the Board amended this provision in 1996. TSD at 7, citing Visible and Particulate Matter Emissions - Conditional Approval and Clean Up: Amendments to 35 Ill. Code Parts 211 and 212, R96-5 (May 16, 1996). IEPA reports that "the only Portland cement manufacturer in that area ceased operation and withdrew its Title V permit on March 3, 2014." SR at 6; TSD at 7. IEPA concludes that "Section 212.423 is obsolete and should be repealed." SR at 6; *see* TSD at 7; Prop. 212 at 5-7.

The Board repeals this section in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 7. It asserts that the proposed amendment is "only administrative." IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Section 212.424: Fugitive Particulate Matter Control for the Portland Cement Manufacturing Plant and Associated Quarry Operations Located in LaSalle County, South of the Illinois River

As with Section 212.423, the Board adopted this provision in 1991 to control PM_{10} emissions from a Portland cement manufacturing plant and associated quarries in LaSalle County that operated before September 1, 1990. SR at 6; TSD at 7, citing PM-10 Emission Limits for the Portland Cement Manufacturing Plant and Associated Quarry Operations Located South of the Illinois River in LaSalle County, R 91-6 (Sept. 26, 1991). The rule "provides fugitive control measures and recordkeeping requirements for both the cement manufacturing plant and the quarries that transport limestone and other material to the manufacturing plant." TSD at 7. IEPA reports that this Portland cement manufacturer has ceased operation, and "the associated quarries have therefore ceased transporting materials." SR at 6; TSD at 8. IEPA argues that Section 212.424 is obsolete and should be repealed. SR at 6; *see* TSD at 8.; Prop. 212 at 7-9.

The Board repeals this section in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 8. It asserts that the proposed amendment is "only administrative." IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Section 212.458: Emission Units in Certain Areas

IEPA proposed to amend this section by correcting a typographical error. TSD at 8. Subsection (b)(14) now sets an emission limit of "0.05 kg/Mg (0.01 lb/T) of sand processed from molding sand forming systems at a steel foundry plant located in Granite City." 35 Ill. Adm. Code 212.458. IEPA asserts that the decimal point is "misplaced" and proposes to revise the limit to "0.10 lb/T." SR at 6; TSD at 8; Prop. 212 at 11.

The Board includes this revision in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 8. It asserts that the proposed amendment is "only administrative." IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Section 212.700: Applicability

This section addresses applicability of additional control measures and refers to Section 212.423(a), which IEPA proposed to repeal. IEPA proposed to amend this section by striking that reference. SR at 6; TSD at 8; Prop. 212 at 14.

The Board includes this revision in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 8. It asserts that the proposed amendment is "only administrative." IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Part 214: Sulfur Limitations

"Part 214 sets standards and limitations for emissions of sulfur from stationary sources. The Part is divided into various subparts based upon factors such as the location of sources or the type of industry grouping the facility belongs to (petroleum refining, glass and concrete manufacturing, etc.)." SR at 6.

IEPA proposed two amendments to Part 214, and the Board summarizes these proposed amendments in the subsections below. SR at 6; TSD at 8-9.

In addition, the Board throughout Part 214 proposes numerous revisions including matters of punctuation and concision. The Board also proposed amendments such as changing passive to active voice, avoiding unnecessary nominalizations, simplifying cross references, and using "must" to be more clearly mandatory. The Board intended that each of its proposed revisions would be non-substantive, and the Board does not specifically discuss them in the opinion.

JCAR suggested a small number of additional changes. PC 7. The Board considers these suggested changes consistent with its own and largely includes them in its proposal for public comment without discussion in this opinion if the Board has not already adopted them.

Finally, below under "Filing Public Comments," the Board specifically requests comment from any of the participants on matters concerning Part 214. *See infra* at 49-50.

Section 214.521: Winnetka Power Plant

This section "sets a sulfur dioxide (SO_2) limit for the coal-fired boilers at the Village of Winnetka Electric Utility Plant." SR at 6. The Board adopted this site-specific rule in 1984 for the plant's source burning exclusively solid fuel. TD at 8, citing Sulfur Dioxide Emission Limitations: Village of Winnetka, R80-22(B) (Apr. 18, 1984). IEPA reports that, in 1989 and 1992, it granted construction permits to convert these sources to use natural gas instead of coal. TSD at 8-9; *see* SR at 6. Because all of the boilers at the plant are now natural gas-fired, IEPA asserts that this rule is obsolete and should be repealed. SR at 6; TSD at 8; Prop. 214 at 3-4.

The Board includes this repeal in its proposal for public comment.

IEPA adds that "[n]o federal considerations are implicated, as Section 214.521 is not part of Illinois' SIP." TSD at 9.

Section 214.561: E.D. Edwards Electric Generating Station

This section sets SO_2 limits for the E.D. Edwards Electric Generating Plant in Bartonville. SR at 6. The Board adopted these limits in 1986 for coal-fired boilers 1 and 3 at the plant. *Id*., citing Amendments to 35 Ill. Adm. Code 214, Sulfur Limitations, R 84-28 (Apr. 24, 1986). EPA reports that, in 2003, the Board revised this section to include coal-fired boiler 2 and revise the emission limitations. TSD at 9, citing Petition of Central Illinois Light Company (E.D. Edwards Generating Station) for a Site-Specific Air Regulation: 35 Ill. Adm. Code 214.561, R02-21 (June 5, 2003). IEPA states that "[t]he purpose of this rulemaking was to ensure that the primary 1971 SO_2 NAAQS was being achieved and maintained in this area. TSD at 9.

IEPA adds that in 2015 the Board adopted 35 Ill. Adm. Code 214.Subpart AA, "which specifically limited SO_2 emission rates for certain sources in response to the one-hour 2010 SO_2 NAAQS of 75 ppb." SR at 9, citing Amendments to 35 Ill. Adm. Code Part 214, Sulfur Limitations, Part 217, Nitrogen Oxides Emission, and Part 225, Control of Emissions from Large Combustion Sources, R15-21 (Nov. 19, 2015). IEPA argues that, because Subpart AA has SO_2

emission limits that are more stringent than Section 214.561, it is "obsolete and ripe for repeal." SR at 6; *see* TSD at 9, Prop. 214 at 4.

The Board includes this repeal in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Sections 110(l) and 193 of the CAA. TSD at 9. It asserts that the proposed repeal is "only administrative." IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Part 215: Organic Material Emission Standards and Limitations

"Part 215 contains standards and limitations for emission of organic material from stationary sources located in areas other than the Chicago and Metro East areas. The Part is divided into subparts based on categories of sources that emit VOMs." SR at 6.

IEPA proposed numerous amendments to Part 215, which the Board summarizes in the subsections below. SR at 6; TSD at 8-9.

In addition, the Board throughout Part 215 proposes numerous revisions including matters of punctuation, capitalization, spelling, organization, and concision. The Board also proposed amendments such as changing passive to active voice, avoiding unnecessary nominalizations, updating statutory references, simplifying cross references, making the forms of temperatures more consistent with one another, making the forms of definitions more consistent with one another, replacing references to effective dates with those dates, and using "must" to be more clearly mandatory. The Board intended that each of its proposed revisions would be non-substantive, and the Board does not specifically discuss them in the opinion.

JCAR suggested approximately 60 additional changes. PC 7. The Board considers these suggested changes consistent with its own and largely includes them in its proposal for public comment without discussion in this opinion if the Board has not already adopted them.

Finally, below under "Filing Public Comments," the Board specifically requests comment from any of the participants on matters concerning Part 215. *See infra* at 50-53.

Part 215.Subpart E: Solvent Cleaning

Section 215.185: Compliance Plan. IEPA reports that this section "required sources subject to the solvent cleaning and degreasing regulations to submit a compliance plan." TSD at 9, citing Emissions of Volatile Organic Material, R78-3, 78-4 (consol.) (July 12, 1979); *see* 35 Ill. Adm. Code 215.185, citing 35 Ill. Adm. Code 215.Appendix C (Past Compliance Dates). Because the due date for submitting that plan passed in 1980, IEPA argues that this section is obsolete and ready for repeal. SR at 7; TSD at 9-10; Prop. 215 at 8.

The Board includes this repeal in its proposal for public comment.

IEPA adds that "[n]o federal considerations are implicated, as Section 215.185 is not part of Illinois' SIP." TSD at 10.

Part 215.Subpart F: Cleaning Operations

Section 215.202: Compliance Schedules. IEPA reports that this section "required owners and operators of coating lines subject to [Section] 215.204(a) through (i) to develop compliance plans that contain a project completion schedule and periodic reporting requirements until the coating lines are in compliance with the VOM limits, unless the limits are met by the compliance date." TSD at 10, citing Emissions of Volatile Organic Material, R78-3, 78-4 (consol.) (July 12, 1979); *see* 35 Ill. Adm. Code 215.202, citing 35 Ill. Adm. Code 215.Appendix C (Past Compliance Dates). Because the latest date for compliance, even with a compliance plan, passed in 1982, IEPA argues that this section is obsolete and ready for repeal. SR at 7; TSD at 10.; Prop. 215 at 8.

The Board includes this repeal in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Sections 110(l) and 193 of the CAA. TSD at 10. It asserts that the proposed repeal is "only administrative." IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Section 215.210: Alternative Compliance Schedules. IEPA reports this this section "allowed sources with coating lines subject to Section 215.204(k)(2) for heavy off-highway vehicle products located in attainment counties for ozone, other than Macoupin County, to submit a compliance plan with a completion schedule and semi-annual progress reports." TSD at 10, citing RACT II Rules, Chapter 2: Air Pollution, R 80-5 (Dec. 30, 1982). IEPA argues that this plan gave a source "more time to demonstrate compliance with the use of low solvent coating technology." TSD at 10. Because the compliance date passed on December 31, 1986 (35 Ill. Adm. Code 215.210(b)(3)), IEPA argues that this section is obsolete and ready for repeal. SR at 7; TSD at 10; Prop. 215 at 8-9.

The Board includes this repeal in its proposal for public comment.

IEPA adds that "[n]o federal considerations are implicated, as Section 215.210 is not part of Illinois' SIP." TSD at 10.

Section 215.211: Compliance Dates and Geographical Areas. IEPA proposes to strike subsection (a)(3), which sets a compliance date for the category of "extreme performance top coat – air dried." 35 Ill. Adm. Code 215.211(a)(3). IEPA argues that subsection (a)(3) refers to a date under Section 215.210, which it has proposed to repeal. TSD at 10; SR at 7. Consequently, IEPA proposed to repeal subsection (a)(3). Prop. 211 at 9.

The Board includes this repeal in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 10. It asserts that the proposed repeal is "only administrative." IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Section 215.212: Compliance Plan. IEPA reports that this section requires sources with coating operations subject to compliance dates listed in 35 Ill. Adm. Code 215.211 to submit a compliance plan by a specified deadline. TSD at 11, citing RACT II Rules, Chapter 2: Air Pollution, R80-5 (Dec. 30, 1982). Because the last of these compliance plan deadlines passed in 1986, IEPA argues that this section is obsolete and ready for repeal. SR at 7; TSD at 11; Prop. 211 at 10.

The Board includes this repeal in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 11. It asserts that the proposed repeal is "only administrative." IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Section 215.213: Special Requirements for Compliance Plan. IEPA reports that this section lists "special requirements to be included within the compliance plan required for sources with coating operations subject to Section 215.204 through 215.209." TSD at 11, citing Emissions of Volatile Organic Material, R78-3, 78-4 (consol.) (July 12, 1979). IEPA argues that, since deadlines for submitting compliance plans have passed, this section is obsolete and ready for repeal. TSD at 11; SR at 7; Prop. 215 at 10-11.

The Board includes this repeal in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Sections 110(l) and 193 of the CAA. TSD at 11. It asserts that the proposed repeal is "only administrative." IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Section 215.215: DMI Emissions Limitations. IEPA reports that the Board in 1992 adopted site-specific VOM emission limitations for DMI, Inc. for its coating operations. TSD at 11, citing Petition for DMI, Inc. for Site-Specific Air Regulation: 35 Ill. Adm. Code 215.215, R91-9 (Feb. 6, 1992). IEPA argues that, since this section expired no later than January 1, 2000 (35 Ill. Adm. Code 215.215(e)), it is obsolete and ready for repeal. TSD at 11; SR at 7; Prop. 215 at 11.

The Board includes this repeal in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 12. It asserts that the proposed repeal is "only administrative." IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Part 215.Subpart I: Adjusted RACT Emissions Limitations

IEPA reports that Subpart I "allows owners and operators of emission sources subject to Part 215 Subparts PP [Miscellaneous Fabricated Product Manufacturing Processes], QQ [Miscellaneous Formulation Manufacturing Processes], or RR [Miscellaneous Organic Chemical Manufacturing Processes] to petition the Board for an Adjusted Reasonably Available Control Technology (RACT) Emissions Limitation, in lieu of compliance with certain other specified limitations." TSD at 12, citing Organic Material Emission Standards and Limitations: Organic Emissions Generic Rule, R86-18 (Apr. 7, 1988); SR at 7. IEPA argues that "Subpart I is rarely used by sources" and that "it appears that the last Subpart I proceeding took place over 20 years ago." SR at 7; TSD at 12. IEPA further argues that, without Subpart I, a source may still request adjusted standards from Subparts PP, QQ, and RR under general criteria in the Act and Board rules. *Id*., citing 415 ILCS 5/28 (2020); 35 Ill. Adm. Code 104. IEPA argues that this Subpart is unnecessary and should be repealed. SR at 7; TSD at 12; Prop. 215 at 12-14.

The Board includes this repeal of Subpart I in its proposal for public comment.

IEPA adds that "[n]o federal considerations are implicated by repeal, as Subpart I is not part of Illinois' SIP." TSD at 12.

Part 215.Subpart N: Vegetable Oil Processing

IEPA reports that Subpart N applies to hexane extraction soybean crushing and hexane extraction corn oil processing sources "that would emit VOM in excess of 100 tons per year in the absence of pollution control equipment or enforceable operating permit limitations." TSD at 12, citing Volatile Organic Material Emissions from Stationary Sources: RACT III, R82-14. IEPA states that "[c]ommercially available hexane solvent consists of 64-100% n-hexane (VOM and HAP), and the remainder is either hexane isomers (VOM) or other isomers (VOM or OM). The solvents used to thin out the hexane to reduce HAP usage and cost are heavier solvents (*e.g.*, distillate oils), hence the increases in VOM emissions when reducing hexane." TSD at 12.

In 2001, USEPA published the NESHAP for Vegetable Oil Production, which addresses controlling HAP emissions from new and existing processes. SR at 7; TSD at 12, citing 40 CFR Part 63 Subpart GGGG. IEPA reports that the rules apply only to extracting oil from corn, soybeans, cottonseed, flax, peanuts, rapeseed, safflower, and sunflower. TSD at 12. "An owner/operator of a vegetable oil production process is subject to this rule if it is a major source of HAP emissions, or is collocated with other sources that are individually or collectively a major source of HAP emissions." *Id*. Under this rule, "a major source of HAP emissions is defined as a source that emits or has the potential to emit any single HAP at a rate of 10 tons or more per year or any combination of HAP at a rate of 25 tons or more per year." *Id*.

For corn oil processing, the state VOM emission limit is 2.2 gallons of VOM per ton of raw corn germ processed, and "the comparable NESHAP allowable HAP loss factor is 0.3 to 0.7 gallons per ton of corn seed processed." TSD at 13. Converted, this HAP loss factor "ranges between 0.70 gallons and 0.19 gallons of solvent loss per ton of corn germ processed, depending on the percent of n-hexane contained in the extraction solvent." *Id*. IEPA notes that this "is more than ten times as stringent as Section 215 Subpart N when using 100 percent n-hexane." *Id*.

For conventional soybean oil processing, the state VOM emission limit is 0.0026 pound of VOM per pound of conventional soybean crush, and "the comparable federal allowable HAP loss factor is 0.2 gallons per ton of soybean seed processed." TSD at 13. Converted, this HAP loss factor "ranges between 0.0006 lb and 0.0004 lb solvent loss per lb of conventional soybean seed processed, depending on the percent of n-hexane contained in the extraction solvent." *Id*. IEPA notes that this "is more than four times as stringent as Section 215 Subpart N at 100 percent n-hexane." *Id*.

For specialty soybean oil processing, the state VOM emission limit is 0.0052 pound of VOM per pound of specialty soybean crush, and "the comparable federal allowable HAP loss factor is 1.5 to 1.7 gallons per ton of specialty soybeans processed." TSD at 13. Converted, this HAP loss factor "ranges between 0.0051 lb and 0.0029 lb of VOM per lb of specialty soybean seed processed depending on the percent of n-hexane contained in the extraction solvent." *Id*.

IEPA asserts that the NESHAP Subpart GGGG has an applicability threshold and allowable HAP solvent loss factor more stringent than Part 215 Subpart N. TSD at 13. IEPA adds that the NESHAP includes reporting and notification requirements and deviation reporting, which Subpart N does not include. *Id*. "All existing vegetable oil processing sources in the state are required to comply with this NESHAP," although "[o]nly sources in attainment areas for the ozone NAAQS are required to comply with Part 215 Subpart N." *Id*. IEPA states that "all Illinois sources that are currently covered under Part 215 Subpart N are also subject to the NESHAP." *Id*.; SR at 7. IEPA concludes that, because the NESHAP more effectively controls VOM emissions including hexane emissions, Subpart N is no longer necessary and is ready for repeal. SR at 7; TSD at 12; Prop. 215 at 15-18.

The Board includes this repeal in its proposal for public comment.

IEPA adds that no federal considerations are implicated by repeal, as Part 215 Subpart N "is not part of Illinois' SIP." TSD at 13.

Part 215.Subpart P: Printing and Publishing

Section 215.406: Alternative Compliance Plan. IEPA reports that this section "provided additional time for flexographic, rotogravure, and lithographic printing sources to come into compliance with the associated printing regulations." TSD at 13, citing RACT II Rules, Chapter 2: Air Pollution, R80-5 (Dec. 30, 1982). The rule required submitting by 1983 plans achieving compliance by 1987. TSD at 13-14; *see* 35 Ill. Adm. Code 215.406(a). Since

these dates have passed, IEPA argues that the rule is obsolete and ready for repeal. SR at 7; TSD at 14; Prop. 215 at 18.

The Board includes this repeal in its proposal for public comment.

IEPA adds that "[n]o federal considerations are implicated, as Section 215.406 is not part of Illinois' SIP." TSD at 14.

Section 215.407: Compliance Plan. IEPA reports that this section required sources with flexographic and rotogravure printing operations to submit a compliance plan by specified deadlines, the last of which was in 1986. TSD at 14, citing Volatile Organic Material Emissions from Stationary Sources: RACT III, R82-14. Because these dates have passed, IEPA argues that this section is obsolete and ripe for repeal. SR at 7; TSD at 14; Prop. 215 at 18-19.

The Board includes this repeal in its proposal for public comment.

IEPA adds that "[n]o federal considerations are implicated, as Section 215.407 is not part of Illinois' SIP." TSD at 14.

Part 215.Subpart Q: Leaks from Synthetic Organic Chemical and Polymer Manufacturing Equipment

Section 215.420: Applicability. IEPA proposed to amend this section by striking a cross reference to Section 215.429, which it proposes to repeal. SR at 7; TSD at 14; Prop. 215 at 19.

The Board includes this revision in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Sections 110(l) and 193 of the CAA. TSD at 14. It asserts that the proposed repeal is "only administrative." IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Section 215.429: Compliance Plan. IEPA reports that this section "required sources with a synthetic organic chemical or polymer manufacturing plant to submit a compliance plan by December 31, 1987." SR at 14, citing Volatile Organic Material Emissions from Stationary Sources: RACT III, R82-14. Since that date has passed, IEPA argues that the section is obsolete and ripe for repeal. SR at 7; TSD at 14; Prop. 215 at 19.

The Board includes this repeal in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Sections 110(l) and 193 of the CAA. TSD at 14. It asserts that the proposed repeal is "only administrative." IEPA argues that this amendment will not affect current emission levels or air quality status in

Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Part 215.Subpart S: Rubber and Miscellaneous Plastic Products

Section 215.466: Compliance Plan. IEPA reports that this section "required pneumatic rubber tire manufacturers that were subject to the requirements in Sections 215.461 through 215.464 to submit a compliance plan" by a specified deadline, the last of which passed in 1986. TSD at 14-15, citing RACT II Rules, Chapter 2: Air Pollution, R80-5 (Dec. 30, 1982). Because these dates have passed, IEPA argues that this section is obsolete and ready for repeal. SR at 7; TSD at 15; Prop. 215 at 20.

The Board includes this repeal in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Sections 110(l) and 193 of the CAA. TSD at 14. It asserts that the proposed repeal is "only administrative." IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Part 215.Subpart U: Coke Manufacture and By-Product Recovery

Section 215.517: Compliance Plan. IEPA reports that this section "required sources with coke manufacture and by-product recovery processes to submit a compliance plan and project completion schedule by August 31, 1986, and a compliance plan for the leak detection and inspection reporting requirements by October 31, 1985." TSD at 15, citing Volatile Organic Material Emissions from Stationary Sources: RACT III, R82-14. Because these dates have passed, IEPA argues that the section is obsolete and ready for repeal. SR at 7; TSD at 15; Prop. 215 at 20.

The Board includes this repeal in its proposal for public comment.

IEPA adds that "[n]o federal considerations are implicated, as Section 215.517 is not part of Illinois' SIP." TSD at 15.

Part 215.Subpart Z: Dry Cleaners

Section 215.613: Compliance Plan. IEPA reports that this section "required sources with petroleum dry cleaning operations to submit a compliance plan by May 31, 1987." TSD at 15, citing Volatile Organic Material Emissions from Stationary Sources: RACT III, R82-14. Because this date has passed, IEPA argues that the section is obsolete and ready for repeal. SR at 7; TSD at 15; Prop. 215 at 21.

The Board includes this repeal in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Sections 110(l) and 193 of the CAA. TSD at 15. It asserts that the proposed repeal is "only administrative." IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Part 215.Subpart BB: Polystyrene Plants

Section 215.881: Compliance Plan. IEPA reports that this section "required sources with polystyrene manufacturing operations to submit a compliance plan and project completion schedule by December 1, 1987." TSD at 15, citing Amendments to 35 Ill. Adm. Code 211 and 215, Organic Material Emissions Standards and Limitations for Polystyrene Plants, R86-12. Since that date has passed, IEPA argues that this section is obsolete and ready for repeal. SR at 7; TSD at 15; Prop. 215 at 21.

The Board includes this repeal in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Sections 110(l) and 193 of the CAA. TSD at 16. It asserts that the proposed repeal is "only administrative." IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Section 215.883: Special Requirements for Compliance Plan. IEPA reports that this section "listed specific requirements to be included in the compliance plan for polystyrene manufacturing plants." TSD at 16, citing Amendments to 35 Ill. Adm. Code 211 and 215, Organic Material Emissions Standards and Limitations for Polystyrene Plants, R86-12. Because the deadline in Section 215.881 to submit that plan passed in 1987, IEPA argues that this section is obsolete and ready for repeal. SR at 7; TSD at 16; Prop. 215 at 21.

The Board includes this repeal in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Sections 110(l) and 193 of the CAA. TSD at 16. It asserts that the proposed repeal is "only administrative." IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Part 216: Carbon Monoxide Emissions

"Part 216 contains standards and limitations for carbon monoxide (CO) emissions from stationary sources. The Part is divided into subparts based upon the type of source which emits CO." SR at 7.

IEPA proposed one amendment to Part 216, which the Board summarizes in the subsection below. SR at 7-8; TSD at 16. JCAR has not suggested changes to Part 216.

The Board throughout Part 216 proposes numerous revisions including matters of organization, and concision. The Board also proposed amendments such as changing passive to active voice, clarifying abbreviations, updating statutory references, simplifying cross references and incorporations by reference, making the forms of temperatures more consistent with one another, and using "must" to be more clearly mandatory. The Board intended that each of its proposed revisions would be non-substantive, and the Board does not specifically discuss them in the opinion.

Finally, below under "Filing Public Comments," the Board specifically requests comment from any of the participants on matters concerning Part 216. *See infra* at 53.

Section 216.382: Exception, General Motor's Ferrous Foundry in Vermilion County

IEPA reports that this section establishes a site-specific CO emission limit for General Motors' foundries in Vermilion County. SR at 8; TSD at 16, citing General Motors Corporation Site-Specific Exception to 35 Ill. Adm. Code 216.381 for Ferrous Foundries in Vermilion County, R90-23 (Oct. 1, 1992). IEPA states that this plant "ceased operation and withdrew its operating permit on July 2, 1996." SR at 8; TSD at 16. IEPA argues that this section is obsolete and ready for repeal. SR at 8; TSD at 16; Prop. 216 at 2.

The Board includes this repeal in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 16. It asserts that the proposed repeal is "only administrative." IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Part 217: Nitrogen Oxides Emissions

Part 217 "sets standards and limitations for emission of oxides of nitrogen from stationary sources." 35 Ill. Adm. Code 217.100(a). The Part is divided into various subparts based upon factors such as the location of sources or the type of industry grouping the facility belongs to (petroleum refining, glass and concrete manufacturing, etc.)." SR at 6.

IEPA proposed to repeal two subparts and an appendix to Part 217, and the Board summarizes these proposed amendments in the subsections below. SR at 8-9; TSD at 17.

In addition, the Board throughout Part 217 proposes numerous revisions including matters of punctuation, spelling, alphabetizing, organization, and concision. The Board also proposed amendments such as changing passive to active voice, avoiding unnecessary nominalizations, simplifying cross references, and using "must" to be more clearly mandatory. The Board intended that each of its proposed revisions would be non-substantive, and the Board does not specifically discuss them in the opinion.

JCAR suggested a small number of additional changes. PC 5. The Board considers these suggested changes consistent with its own and largely includes them in its proposal for public comment without discussion in this opinion.

Finally, below under "Filing Public Comments," the Board specifically requests comment from any of the participants on matters concerning Part 217. *See infra* at 53-55.

Subpart W: NO_x Trading Program for Electrical Generating Units
Appendix F: Allowances for Electrical Generating Units

IEPA states that "[t]hese regulations were adopted to assist the State in meeting the requirements under 40 CFR 96 [NO_x Budget Trading Program and CAIR NO_x and SO_2 Trading Programs for State Implementation Programs] as authorized under Section 9.9 of the Act." TSD at 17.

The Board adopted Subpart W "as the State implementation regulations for the federal NO_x SIP Call trading program," specifically to implement NO_x trading for electrical generating units in Illinois. TSD at 17; *see* SR at 9, citing Proposed New 35 Ill. Adm. Code 217.Subpart W, The NO_x Trading Program for Electrical Generating Units, and Amendments to 35 Ill. Adm. Code 211 and 217, R01-9 (Dec. 21, 2000). Appendix F listed "initial NO_x emission allowances for electrical generating units." TSD at 17. IEPA reports that USEPA "stopped administering the NO_x SIP Call trading program in Illinois as of 2009 with its implementation of the Clean Air Interstate Rule (CAIR)." SR at 9; TSD at 17. IEPA adds that "Subpart W was sunset in November 2009, around the time CAIR was being implemented." *Id.*; *see* 35 Ill. Adm. Code 217.751 (Sunset Provisions); Nitrogen Oxide (NO_x) Trading Program Sunset Provisions for Electric Generating Units (EGUs): New 35 Ill. Adm. Code 217.751, R09-20 (Oct. 15, 2009). Based on these factors, IEPA argues that Subpart W and Appendix F can be repealed. SR at 9; SR at 17; Prop. 217 at 5-39, 54-60.

The Board includes these repeals in its proposal for public comment.

IEPA argues that adopting this repeal of Subpart W into the SIP is consistent with Section 110(l) of the CAA. TSD at 17. It asserts that the proposed repeal is "only administrative." IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA since the NO_x SIP Call trading program was replaced by CAIR, which was more stringent." *Id.*

IEPA adds that repealing Appendix F does not implicate federal considerations, as it is "not part of Illinois' SIP." TSD at 17.

Subpart X: Voluntary NO_x Emissions Reduction Program

After adopting Subpart W, the Board adopted Subpart X "to allow Illinois sources to voluntarily reduce NO_x emissions from any emission unit not affected by the NO_x SIP Call and which had not opted into the NO_x trading program." TSD at 17. Subpart X implemented

Section 9.9(d)(3) of the Act "by providing a method by which additional NO_x allowances may be generated for use by emission units subject to the requirements of the NO_x SIP Call." SR at 9. Since USEPA no longer administers the NO_x SIP Call, and Subpart W has been "sunset," IEPA argues that Subpart X is obsolete and ready for repeal. SR at 9; TSD at 17; Prop. 217 at 39-54.

The Board includes this repeal in its proposal for public comment.

IEPA adds that repealing Subpart X does not implicate federal considerations, as it is "not part of Illinois' SIP." TSD at 17. "Subpart X was never approved by USEPA or implemented by the Illinois EPA." SR at 9.

Part 218: Organic Material Emission Standards and Limitations for the Chicago Area

"Part 218 contains standards and limitations for emissions of organic material and VOM from stationary sources located in the Chicago area. The Part is divided into subparts based upon the different source categories which may emit VOM." SR at 9.

IEPA proposed numerous amendments to Part 218, which the Board summarizes in the subsections below. *See* SR at 6; TSD at 8-9.

In addition, the Board throughout Part 218 proposes numerous revisions including matters of punctuation, capitalization, spelling, organization, and concision. The Board also proposed amendments such as avoiding unnecessary nominalizations, simplifying cross references, making the forms of temperatures more consistent with one another, and using "must" to be more clearly mandatory. The Board intended that each of its proposed revisions would be non-substantive, and the Board does not specifically discuss them in the opinion.

JCAR suggested approximately 20 additional changes. PC 9. The Board considers these suggested changes consistent with its own and largely includes them in its proposal for public comment without discussion in this opinion.

Finally, below under "Filing Public Comments," the Board specifically requests comment from any of the participants on matters concerning Part 218. *See infra* at 55-62.

Section 218.204: Emission Limitations.

Subsection (c): Paper Coating. Subsection (c)(2) sets VOM emission limits for paper coating "in terms of weight of VOM per weight of solids and weight of VOM per weight of coatings." SR at 9; TSD at 18. IEPA proposed to add that "the owner or operator shall comply with either the limit in weight of VOM per weight of solids applied or weight of VOM per weight of coatings applied." SR at 9; TSD at 18; Prop. 218 at 15. IEPA asserts that this clarifies that "sources do not have to comply with both limits, but rather must comply with one or the other." SR at 9; TSD at 18.

IEPA also proposed to add "VOM limitations in terms of lb VOM/lb solids applied and lb VOM/lb of coatings applied in parentheses to match the general format of the emission limitations of Section 218.204." SR at 9-10; TSD at 18; Prop. 218 at 15-16.

The Board includes these revisions in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 18. It asserts that the proposed repeal is "only administrative." IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Subsection (g): Metal Furniture Coating. Subsection (g)(2) sets VOM emission limits for metal furniture coating "in terms of weight of VOM per weight of coating and weight of VOM per volume of solids". SR at 9; TSD at 18. IEPA proposed to add that "the owner or operator shall comply with either the limit in weight of VOM per weight of coating applied or weight of VOM per volume of solids applied." SR at 9; TSD at 18; Prop. 218 at 16. IEPA asserts that this clarifies that "sources do not have to comply with both limits, but rather must comply with one or the other." SR at 9; TSD at 18.

IEPA also proposed to clarify the column heading "kg/l (lb/gal)" by adding the phrase "coatings applied." SR at 10; TSD at 18; Prop. 218 at 16.

The Board includes these revisions in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 18. It asserts that the proposed repeal is "only administrative." IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Subsection (h): Large Appliance Coating. Subsection (h)(2) sets VOM emission limits for large appliance coating "in terms of weight of VOM per volume of coating and weight of VOM per volume of solids". SR at 9; TSD at 18. IEPA proposed to add that "the owner or operator shall comply with either the limit in weight of VOM per volume of coatings applied or weight of VOM per volume of solids applied." SR at 9; TSD at 18; Prop. 218 at 16. IEPA asserts that this clarifies that "sources do not have to comply with both limits, but rather must comply with one or the other." SR at 9; TSD at 18.

IEPA also proposed to clarify the column heading "kg/l (lb/gal)" by adding the phrase "coatings applied." SR at 10; TSD at 18; Prop. 218 at 18.

The Board includes these revisions in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 19. It asserts that the proposed repeal is "only administrative." IEPA

argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Subsection (n): Prior to May 1, 2012 Plastic Parts Coating Automotive and Transportation. IEPA asserts that the Board note to this subsection erroneously refers to Section 218.240(q). SR at 10; TSD at 19. IEPA proposes to correct the reference by changing it from "218.240(q)" to "218.204(q)." *Id*.; Prop. 218 at 25.

The Board includes this revision in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 19. It asserts that the proposed repeal is "only administrative." IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Subsection (q): Miscellaneous Metal Parts and Products Coatings and Plastic Parts and Products Coatings on and After May 1, 2012. This subsection includes a sentence providing that "[t]he limitations in this subsection (q) shall not apply to aerosol coating products, powder coatings, or primer sealants and ejection cartridge sealants used in ammunition manufacturing." 35 Ill. Adm. Code 218.204(q); *see* SR at 10; TSD at 19. IEPA proposes to clarify this sentence by revising it to provide that "[t]he limitations in this subsection (q) shall not apply to primer sealants and ejection cartridge sealants used in ammunition manufacturing, aerosol coating products, or powder coatings." SR at 10; TSD at 19.

The Board includes this revision in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 19. It asserts that the proposed repeal is "only administrative." IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Subsection (q)(1): Metal Parts and Products. This subsection sets VOM emission limits for metal parts and products "in terms of weight of VOM per volume of coating and weight of VOM per volume of solids." TSD at 19; *see* 35 Ill. Adm. Code 218.204(q)(1). IEPA proposes to add that "[t]he owner or operator shall comply with either the limit in weight of VOM per volume of coatings applied or weight of VOM per volume of solids applied." SR at 10; TSD at 19; Prop. 218 at 26. IEPA asserts that this revision clarifies that "sources do not have to comply with both limits, but rather must comply with either one or the other." TSD at 19.

The Board includes this revision in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 19. It asserts that the proposed repeal is "only administrative." IEPA

argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*. at 19-20.

Subsection (q)(1)(BB): All other coatings. IEPA proposes to strike this subsection adopted in 2011. TSD at 20, citing Reasonably Available Control Technology (RACT) for Volatile Organic Material Emissions from Group II and Group IV Consumer & Commercial Products: Proposed Amendments to 35 Ill. Adm. Code 211, 218, and 219, R11-23 (July 21, 2011). IEPA argues that VOM limits at 35 Ill. Adm. Code 218.204(j)(4), entitled "All other coatings," apply before May 1, 2012. TSD at 20. It further argues that VOM limits for General One Component and General Multi Component categories apply on and after May 1, 2012. *See* 35 Ill. Adm. Code 218.204(q)(1)(A) and (B). IEPA adds that these limits "are based on a federal Control Techniques Guideline (CTG) and encompass all coatings that previously fell into the 'All Other Coatings' category." SR at 10; TSD at 20. IEPA concludes that this subsection is no longer necessary and should be struck. *Id.*; Prop. 218 at 30.

The Board strikes this subsection in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 20. It asserts that "the VOM emission limits in Section 218.204(q)(1)(A) and (B) are more stringent than the VOM limits in Section 218.204(q)(1)(BB). *Id*. IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Subsections (q)(2): Plastic Parts and Products. This subsection sets VOM emission limits for plastic parts and products "in terms of weight of VOM per volume of coating and weight of VOM per volume of solids." TSD at 20; *see* 35 Ill. Adm. Code 218.204(q)(2). IEPA proposes to add that "[t]he owner or operator shall comply with either the limit in weight of VOM per volume of coatings applied or weight of VOM per volume of solids applied." SR at 10; TSD at 19; Prop. 218 at 30. IEPA asserts that this revision clarifies that "sources do not have to comply with both limits, but rather must comply with either one or the other." TSD at 20.

The Board includes this revision in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 20. It asserts that the proposed amendment is "only administrative." IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Subsections (q)(3): Plastic Parts and Products Automotive/Transportation. This subsection sets VOM emission limits for automotive and transportation plastic parts and products "in terms of weight of VOM per volume of coating and weight of VOM per volume of solids." TSD at 20; *see* 35 Ill. Adm. Code 218.204(q)(3). IEPA proposes to add that "[t]he owner or operator shall comply with either the limit in weight of VOM per volume of coatings applied or

weight of VOM per volume of solids applied." SR at 10; TSD at 20; Prop. 218 at 31. IEPA asserts that this revision clarifies that "sources do not have to comply with both limits, but rather must comply with either one or the other." TSD at 20.

The Board includes this revision in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 21. It asserts that the proposed amendment is "only administrative." IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Subsections (q)(4): Plastic Parts and Products Business Machine. This subsection sets VOM emission limits for business machine plastic parts and products "in terms of weight of VOM per volume of coating and weight of VOM per volume of solids." TSD at 21; *see* 35 Ill. Adm. Code 218.204(q)(4). IEPA proposes to add that "[t]he owner or operator shall comply with either the limit in weight of VOM per volume of coatings applied or weight of VOM per volume of solids applied." SR at 10; TSD at 21; Prop. 218 at 33. IEPA asserts that this revision clarifies that "sources do not have to comply with both limits, but rather must comply with either one or the other." TSD at 21.

The Board includes this revision in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 21. It asserts that the proposed amendment is "only administrative." IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Subsections (q)(5): Pleasure Craft Surface Coatings. This subsection sets VOM emission limits for pleasure craft surface coatings "in terms of weight of VOM per volume of coating and weight of VOM per volume of solids." TSD at 21; *see* 35 Ill. Adm. Code 218.204(q)(5). IEPA proposes to add that "[t]he owner or operator shall comply with either the limit in weight of VOM per volume of coatings applied or weight of VOM per volume of solids applied." SR at 10; TSD at 21; Prop. 218 at 33. IEPA asserts that this revision clarifies that "sources do not have to comply with both limits, but rather must comply with either one or the other." TSD at 21.

The Board includes this revision in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 21. It asserts that the proposed amendment is "only administrative." IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Section 218.401: Flexographic and Rotogravure Printing

Subsection (c)(1) includes a cross reference to "subsection (c)(1)(D)." 35 Ill. Adm. Code 218.401(c)(1)(D). IEPA argues that this is a typographical error and that it should instead refer to "subsection (c)(1)(B)." SR at 10; TSD at 21. IEPA proposed to amend this subsection by correcting this reference. *Id*.; Prop. 218 at 40.

The Board includes this revision in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 21. It asserts that the proposed amendment is "only administrative." IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*. at 21-22.

Section 218.926: Control Requirements

Subsection (b)(2)(C)(ii) includes a limit expressed in terms of "0.42 Kg Vom/l (3.5lbs Vom/gal." 35 Ill. Adm. Code 218.926(b)(2)(C)(ii). IEPA argues that the abbreviated units include typographical errors. SR at 10; TSD at 22. IEPA proposes to revise the limit to "0.42 kg VOM/l (3.5 lbs VOM/gal)." SR at 10; TSD at 22; Prop. 218 at 44. IEPA asserts that this revision is "consistent with the abbreviation for kilograms in Section 211.102(a)." SR at 10.

The Board includes this revision in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 22. It asserts that the proposed amendment is "only administrative." IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*. at 22.

Part 219: Organic Material Emission Standards and Limitations for the Metro East Area

"Part 219 contains standards and limitations for emissions of organic material and VOM from stationary sources located in the Metro-East Area. The Part is divided into Subparts based on the different source categories which may emit organic material emissions." SR at 11.

IEPA proposed numerous amendments to Part 219, which the Board summarizes in the subsections below. SR at 6; TSD at 8-9. JCAR did not suggest additional changes.

In addition, the Board throughout Part 219 proposes numerous revisions including matters of punctuation, capitalization, organization, and concision. The Board also proposed amendments such as avoiding unnecessary nominalizations, simplifying cross references, making the forms of temperatures more consistent with one another, updating statutory references, and using "must" to be more clearly mandatory. The Board intended that each of its

proposed revisions would be non-substantive, and the Board does not specifically discuss them in the opinion.

Finally, below under "Filing Public Comments," the Board specifically requests comment from any of the participants on matters concerning Part 219. *See infra* at 55-62.

Section 219.204: Emission Limitations

Subsections (c): Paper Coating. Subsection (c)(2) sets VOM emission limits for paper coating "in terms of weight of VOM per weight of solids and weight of VOM per weight of coatings." SR at 11; TSD at 22. IEPA proposed to add that "the owner or operator shall comply with either the limit in weight of VOM per weight of solids applied or weight of VOM per weight of coatings applied." SR at 11; TSD at 22; Prop. 219 at 15. IEPA asserts that this clarifies that "sources do not have to comply with both limits, but rather must comply with one or the other." SR at 11; TSD at 22.

IEPA also proposed to add "VOM limitations in terms of lb VOM/lb solids applied and lb VOM/lb of coatings applied in parentheses to match the general format of the emission limitations of Section 219.204." TSD at 22; Prop. 219 at 15; *see* SR at 11.

The Board includes these revisions in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 22. It asserts that the proposed repeal is "only administrative." IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Subsections (g): Metal Furniture Coating. Subsection (g)(2) sets VOM emission limits for metal furniture coating "in terms of weight of VOM per volume of coating and weight of VOM per volume of solids". SR at 11; TSD at 22. IEPA proposed to add that "the owner or operator shall comply with either the limit in weight of VOM per volume of coatings applied or weight of VOM per volume of solids applied." SR at 11; TSD at 22; Prop. 219 at 16. IEPA asserts that this clarifies that "sources do not have to comply with both limits, but rather must comply with one or the other." SR at 11; TSD at 22.

IEPA also proposed to clarify the column heading "kg/l (lb/gal)" by adding the phrase "coatings applied." SR at 11; TSD at 22; Prop. 219 at 16.

The Board includes these revisions in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 23. It asserts that the proposed repeal is "only administrative." IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Subsections (h): Large Appliance Coating. Subsection (h)(2) sets VOM emission limits for large appliance coating "in terms of weight of VOM per volume of coating and weight of VOM per volume of solids." SR at 11; TSD at 23. IEPA proposed to add that "the owner or operator shall comply with either the limit in weight of VOM per volume of coatings applied or weight of VOM per volume of solids applied." SR at 11; TSD at 23; Prop. 219 at 17. IEPA asserts that this clarifies that "sources do not have to comply with both limits, but rather must comply with one or the other." SR at 11; TSD at 23.

IEPA also proposed to clarify the column heading "kg/l (lb/gal)" by adding the phrase "coatings applied." SR at 11; TSD at 23; Prop. 219 at 17.

The Board includes these revisions in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 23. It asserts that the proposed repeal is "only administrative." IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Subsection (q): Miscellaneous Metal Parts and Products Coatings and Plastic Parts and Products Coatings On and After May 1, 2012. This subsection includes the sentence providing that "[t]he limitations in this subsection (q) shall not apply to aerosol coating products, powder coatings, or primer sealants and ejection cartridge sealants used in ammunition manufacturing." 35 Ill. Adm. Code 219.204(q); *see* TSD at 23. IEPA proposes to clarify this sentence by revising it to provide that "[t]he limitations in this subsection (q) shall not apply to primer sealants and ejection cartridge sealants used in ammunition manufacturing, aerosol coating products, or powder coatings." TSD at 23.

The Board includes this revision in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 23. It asserts that the proposed repeal is "only administrative." IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Subsection (q)(1): Metal Parts and Products. This subsection sets VOM emission limits for meatal parts and products coating "in terms of weight of VOM per volume of coating and weight of VOM per volume of solids." TSD at 23; *see* 35 Ill. Adm. Code 218.204(q)(1). IEPA proposes to add that "[t]he owner or operator shall comply with either the limit in weight of VOM per volume of coatings applied or weight of VOM per volume of solids applied." TSD at 23; Prop. 219 at 24. IEPA asserts that this revision clarifies that "sources do not have to comply with both limits, but rather must comply with either one or the other." TSD at 23.

IEPA adds that "this subsection mistakenly provides VOM emission limits in terms of 'kg VOM/l coating solids applied' and equivalent VOM emission limits in terms of 'lb VOM/gal

coating solids applied.'" SR at 11; TSD at 24; *see* 35 Ill. Adm. Code 219.204(q)(1). IEPA proposes to replace these limits "with the correct VOM emission limits in terms of 'kg/l (lb/gal) coating' and equivalent VOM emission limits in terms of 'kg/l (lb/gal) solids.'" SR at 11; TSD at 24; Prop. 219 at 24-25.

The Board includes these revisions in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 19. It asserts that the proposed repeal is "only administrative." IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*. at 19-20.

Subsection (q)(1)(BB): All other coatings. IEPA proposes to strike this subsection adopted in 2011. TSD at 24, citing Reasonably Available Control Technology (RACT) for Volatile Organic Material Emissions from Group II and Group IV Consumer & Commercial Products: Proposed Amendments to 35 Ill. Adm. Code 211, 218, and 219, R11-23 (July 21, 2011). IEPA argues that VOM limits at 35 Ill. Adm. Code 219.204(j)(4), entitled "All other coatings," apply before May 1, 2012. TSD at 24. It further argues that VOM limits for general one component coating and general multi-component coating apply on and after May 1, 2012. *See* 35 Ill. Adm. Code 219.204(q)(1)(A) and (B). IEPA adds that these limits "are based on a federal Control Techniques Guideline (CTG) and encompass all coatings that previously fell into the "All Other Coatings" category." SR at 11; TSD at 24. IEPA concludes that this subsection is no longer necessary and should be struck. *Id*.; Prop. 219 at 28.

The Board strikes this subsection in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 24. It asserts that "the VOM emission limits in Section 219.204(q)(1)(A) and (B) are more stringent than the VOM limits in Section 219.204(q)(1)(BB). *Id*. IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Subsection (q)(2): Plastic Parts and Products. This subsection sets VOM emission limits for miscellaneous plastic parts and products "in terms of weight of VOM per volume of coating and weight of VOM per volume of solids." TSD at 24; *see* 35 Ill. Adm. Code 219.204(q)(2). IEPA proposes to add that "[t]he owner or operator shall comply with either the limit in weight of VOM per volume of coatings applied or weight of VOM per volume of solids applied." SR at 11; TSD at 24; Prop. 219 at 28. IEPA asserts that this revision clarifies that "sources do not have to comply with both limits, but rather must comply with either one or the other." TSD at 24.

The Board includes this revision in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 24. It asserts that the proposed amendment is "only administrative." IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Subsection (q)(3): Plastic Parts and Products Automotive/Transportation. This subsection sets VOM emission limits for automotive and transportation plastic parts and products "in terms of weight of VOM per volume of coating and weight of VOM per volume of solids." TSD at 25; *see* 35 Ill. Adm. Code 219.204(q)(3). IEPA proposes to add that "[t]he owner or operator shall comply with either the limit in weight of VOM per volume of coatings applied or weight of VOM per volume of solids applied." SR at 11; TSD at 25; Prop. 219 at 29. IEPA asserts that this revision clarifies that "sources do not have to comply with both limits, but rather must comply with either one or the other." TSD at 25.

The Board includes this revision in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 25. It asserts that the proposed amendment is "only administrative." IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Subsection (q)(4): Plastic Parts and Products. This subsection sets VOM emission limits for business machine plastic parts and products "in terms of weight of VOM per volume of coating and weight of VOM per volume of solids." TSD at 25; *see* 35 Ill. Adm. Code 219.204(q)(4). IEPA proposes to add that "[t]he owner or operator shall comply with either the limit in weight of VOM per volume of coatings applied or weight of VOM per volume of solids applied." SR at 11; TSD at 25; Prop. 219 at 31. IEPA asserts that this revision clarifies that "sources do not have to comply with both limits, but rather must comply with either one or the other." TSD at 25.

The Board includes this revision in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 25. It asserts that the proposed amendment is "only administrative." IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Subsection (q)(5): Pleasure Craft Surface Coatings. This subsection sets VOM emission limits for pleasure craft surface coatings "in terms of weight of VOM per volume of coating and weight of VOM per volume of solids." TSD at 25; *see* 35 Ill. Adm. Code 219.204(q)(5). IEPA proposes to add that "[t]he owner or operator shall comply with either the limit in weight of VOM per volume of coatings applied or weight of VOM per volume of solids applied." SR at 11; TSD at 25; Prop. 219 at 32. IEPA asserts that this revision clarifies that

"sources do not have to comply with both limits, but rather must comply with either one or the other." TSD at 25.

The Board includes this revision in its proposal for public comment.

IEPA argues that adopting this amendment into the SIP is consistent with Section 110(l) of the CAA. TSD at 25. It asserts that the proposed amendment is "only administrative." IEPA argues that this amendment will not affect current emission levels or air quality status in Illinois. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA." *Id*.

Part 220: Nonmethane Organic Compounds

Part 220 establishes "emission control requirements for municipal solid waste landfills" under the Clean Air Act. 35 Ill. Adm. Code 220.100. Neither IEPA nor JCAR suggested amendments to Part 220.

The Board throughout Part 220 proposes numerous revisions including primarily matters of concision. The Board also proposed amendments such as updating statutory references, simplifying cross references, making the forms of temperatures more consistent with one another, and using "must" to be more clearly mandatory. The Board intended that each of its proposed revisions would be non-substantive, and the Board does not specifically discuss them in the opinion.

Part 223: Standards and Limitations for Organic Material Emissions for Area Sources

Part 223 limits emissions of VOM by requiring reductions in the VOM content of consumer and commercial products in Subpart B and architectural and industrial maintenance coatings in Subpart C. 35 Ill. Adm. Code 223.200, 223.300. Subpart C also includes work practices to minimize VOM emissions during application of architectural and industrial maintenance coatings. 35 Ill. Adm. Code 223.300. Neither IEPA nor JCAR suggested amendment to Part 223.

The Board throughout Part 223 proposes numerous revisions including matters of punctuation, capitalization, and concision. The Board also proposed amendments such as changing passive to active voice, simplifying cross references, making the forms of temperatures more consistent with one another, making the form of definitions more consistent with one another, and using "must" to be more clearly mandatory. The Board intended that each of its proposed revisions would be non-substantive, and the Board does not specifically discuss them in the opinion.

Finally, below under "Filing Public Comments," the Board specifically requests comment from any of the participants on matters concerning Part 223. *See infra* at 62-65.

Part 225: Control of Emissions from Large Combustion Sources

In Part 225, IEPA proposed to "sunset" Subparts C, D, and E. SR at 8-9; TSD at 26. JCAR did not suggest additional revisions.

In addition, the Board throughout Part 225 proposes numerous revisions including matters of punctuation and concision. The Board also proposed amendments such as changing passive to active voice, clarifying incorporations by reference, simplifying cross references, making the forms of temperatures more consistent with one another, and using "must" to be more clearly mandatory. The Board intended that each of its proposed revisions would be non-substantive, and the Board does not specifically discuss them in the opinion.

Finally, below under "Filing Public Comments," the Board specifically requests comment from any of the participants on matters concerning Part 225. *See infra* at 65-67.

Subpart C: Clean Air Act Interstate Rule (CAIR) SO_2 Trading Program
Subpart D: CAIR NO_x Annual Trading Program
Subpart E: CAIR NO_x Ozone Season Trading Program

IEPA states that USEPA in 2005 adopted the Clean Air Act Interstate Rule (CAIR) to replace the NO_x SIP Call Trading Program beginning with the 2009 control period. SR at 8, citing 70 Fed. Reg. 25162 (May 12, 2005). "CAIR added two new trading programs addressing annual emissions of NO_x and SO_2 from electrical generating units [EGUs] at power plants." SR at 8. In 2007, the Board adopted rules implementing CAIR. TSD at 26, citing Proposed New Clean Air Interstate Rule (CAIR) SO_2, NO_x Annual and NO_x Ozone Season Trading Programs, 35 Ill. Adm. Code 225, Subparts A, C, D, E and F, R06-26 (Aug. 23, 2007). Subpart C and D of these rules "include annual programs for the control of SO_2 and NO_x, respectively." SR at 8. Subpart E includes "a trading program for the control of NO_x emissions during the trading season (May 1 through September 30) of 2009 and thereafter." *Id*.

IEPA reports that, "[o]n August 8, 2011, USEPA finalized the Cross-State Air Pollution Rule (CSAPR), which replaced CAIR. CSAPR requires states to improve air quality by reducing power plant emissions that contribute to ozone and/or fine particle pollution in other states." SR at 8 (emphasis in original), citing 76 Fed. Reg. 48208 (Aug. 8, 2011); *see* TSD at 26. IEPA adds that the program did not take effect until the 2015 control periods. SR at 8. IEPA states that "CSAPR established budgets for SO_2 and NO_x emissions." TSD at 26. It adds that these budgets are below the CAIR budgets established in Subparts C, D, and E of Part 225. *Id*. Emissions of NO_x and SO_2 "are further reduced under CSAPR." *Id*. However, IEPA argues that "Illinois' EGUs must now comply with duplicative administrative requirements (*e.g.*., recordkeeping and reporting) for the 2015 control periods and beyond" until Subparts C, D, and E are sunset. SR at 9.

Based on these factors, IEPA proposed to sunset Subparts C, D, and E of Part 225 on and after January 1, 2018. SR at 8; TSD at 26; Prop. 225 at 4. Specifically, IEPA proposed to adopt this sunset language in Section 225.307 for Subpart C, Section 225.407 for Subpart D, and Section 225.507 for Subpart E. TSD at 26; Prop. 225 at 4. IEPA argues that these provisions are

consistent with 40 CFR 51.123(ff) and 51.124(s), "which provide that USEPA will no longer administer CAIR for control periods after December 31, 2014." SR at 9. IEPA further argues that these provisions also relieve the sources from "unnecessary reporting requirements under CAIR." TSD at 26.

The Board includes these revisions in its proposal for public comment.

IEPA argues that adopting the provisions into the SIP is consistent with Section 110(l) of the CAA. TSD at 26. It asserts that the proposed amendments are "only administrative." IEPA argues that these amendments will not affect current emission levels or air quality status in Illinois because CSAPR substitutes for CAIR. "This revision will not interfere with attainment, reasonable further progress, or any other applicable requirement of the CAA since the program has been replaced." *Id*.

Part 226: Standards and Limitations for Certain Sources of Lead

Part 226 "sets standards and limitations for emissions of lead from stationary sources." 35 Ill. Adm. Code 226.105(a). Neither IEPA nor JCAR suggested amendments to Part 225.

The Board throughout Part 226 proposes numerous revisions including matters of capitalization and concision. The Board also proposed amendments such as changing passive to active voice and using "must" to be more clearly mandatory. The Board intended that each of its proposed revisions would be non-substantive, and the Board does not specifically discuss them in the opinion.

Part 228: Asbestos

"Part 228 regulates the construction or repair of sites with asbestos-containing material, the destruction of sites containing asbestos, and the manufacturing of asbestos." SR at 11. It also includes requirements for disposing of asbestos-containing materials. TSD at 26.

IEPA states that the Board adopted Part 228 in in 1971. TSD at 26, citing Asbestos Regulations, R71-16 (Jan. 6, 1971). IEPA adds that in 1978 the Board adopted rules identical-in-substance to federal rules including asbestos NESHAP regulations. SR at 12; TSD at 27, citing Standards of Performance for New Stationary Sources and National Emission Standards for Hazardous Air Pollutants, R78-18 (Dec. 14, 1978). IEPA reports that "[t]he Board stated that these rules voided any prior regulations that impacted the same sources; in other words, these rules superseded Part 228 for asbestos." TSD at 27; SR at 12. IEPA now implements the federal regulations through a delegation agreement with USEPA and does not implement Part 228. SR at 12; TSD at 27. IEPA concludes that Part 228 is obsolete and ready for repeal. *Id*.; Prop. 228. JCAR did not suggest any revision of Part 228.

The Board includes this repeal in its proposal for public comment.

IEPA states that repealing Part 228 does not implicate federal considerations, as it is "not part of Illinois' SIP." TSD at 27.

Part 229: Hospital/Medical/Infectious Waste Incinerators

Part 229 addresses hospital/medical/infectious waste incinerators. 35 Ill. Adm. Code 229. Neither IEPA nor JCAR suggested revising Part 229.

The Board throughout Part 229 proposes numerous revisions including matters of punctuation, capitalization, and concision. The Board also proposed amendments such as changing passive to active voice, avoiding unnecessary nominalizations, simplifying cross references, and using "must" to be more clearly mandatory. The Board intended that each of its proposed revisions would be non-substantive, and the Board does not specifically discuss them in the opinion.

Finally, below under "Filing Public Comments," the Board specifically requests comment from any of the participants on matters concerning Part 229. *See infra* at 67.

Part 230: New Source Performance Standard

The Board repealed Part 230 in 1991. Continuous Monitoring Rules and Repeal of New Source Performance Standards and Hazardous Air Pollutant Regulations, R 89-7(B) (Aug. 8, 1991). However, the repeal left in the rules a single Board Note addressing the applicability of federal standards for performance of new stationary sources. *Id*., slip op. at 35. The Board includes this part in its proposal for public comment only to strike this single Board Note and complete its repeal.

Part 232: Toxic Air Contaminants

"Part 232 includes a list of toxic air contaminants, the procedures to determine a toxic air contaminant, and the procedures to amend the list." SR at 12. IEPA states that "Part 232 contains no substantive provisions addressing toxins." TSD at 28.

IEPA states that Part 232 originates from amendments to Section 9.5 of the Act. SR at 12; TSD at 27; *see* 415 ILCS 5/9.5 (2022); Toxic Air Contaminants List (35 Ill. Adm. Code 232), R90-1(C) (Sept. 3, 1992). It argues that Section 9.5(d) directed the Board to adopt rules "to control toxic contaminants released into the air in a manner to protect public health and the environment." 415 ILCS 5/9.5(d) (2022); *see* SR at 12; TSD at 27. IEPA asserts that this authority stemmed from "the lack of federal programs to adequately protect the public." SR at 12; TSD at 27.

IEPA states that "Part 232 allowed IEPA to gather information from Illinois sources." TSD at 27. Reports were first due on October 1, 1997, and "then by July 1 of the year following operation of a new applicable source or after an applicable change in emissions of one or more of the contaminants." TSD at 27. IEPA reports that it "may see one or two revised reports per year" when it receives Annual Emissions Reports under 35 Ill. Adm. Code 205." *Id*.

Since the Board adopted Part 232, IEPA states that USEPA "has fully developed programs to control emissions of toxic air contaminants, including NESHAPs under 40 CFR Part

61 and Part 63." SR at 12; TSD at 28. It adds that it has delegated authority to implement the NESHAPs. TSD at 28. IEPA concludes that Part 232 is obsolete and ready for repeal. SR at 12; TSD at 28; Prop. 232. JCAR did not propose revisions to Part 232.

The Board includes this repeal in its proposal for public comment.

IEPA states that repealing Part 232 does not implicate federal considerations, as it is "not part of Illinois' SIP." TSD at 28.

Part 237: Open Burning

"Part 237 prohibits open burning or the burning of any refuse in any chamber or apparatus, unless such chamber or apparatus is designed for the purpose of the class of refuse bring burned." SR at 12.

IEPA proposed a single revision to Part 237. Section 237.130 is a site-specific rule that "allowed the City of Freeport to burn landscape waste and clean wood debris using an air curtain destructor." TSD at 28; *see* 35 Ill. Adm. Code 237.130; SR at 12. In 2004, the City of Freeport notified IEPA in writing that "it no longer owns or operates an air curtain destructor and will no longer burn waste." SR at 12: TSD at 28. IEPA concludes that Section 237.130 is obsolete and ready for repeal. SR at 12; TSD at 28; Prop. 237 at 2. JCAR did not suggest any revision to Part 237.

IEPA states that repealing Section 237.130 does not implicate federal considerations, as it is "not part of Illinois' SIP." TSD at 28.

The Board includes this revision in its proposal for public comment.

In addition, the Board throughout Part 237 proposes numerous revisions including matters of punctuation, spelling, and concision. The Board also proposed amendments such as changing passive to active voice, avoiding unnecessary nominalizations, updating statutory references, simplifying cross references, making the form of definitions more consistent with one another, and using "must" to be more clearly mandatory. The Board intended that each of its proposed revisions would be non-substantive, and the Board does not specifically discuss them in the opinion.

Part 240: Mobile Sources

Part 240 addresses emission from motor vehicles. 35 Ill. Adm. Code 240.101. Neither IEPA nor JCAR proposed to revise Part 240.

The Board throughout Part 240 proposes numerous revisions including matters of punctuation and concision. The Board also proposed amendments such as clarifying statutory references, simplifying cross references, making the form of definitions more consistent with one another, and using "must" to be more clearly mandatory. The Board intended that each of its

proposed revisions would be non-substantive, and the Board does not specifically discuss them in the opinion.

Finally, below under "Filing Public Comments," the Board specifically requests comment from any of the participants on matters concerning Part 240. *See infra* at 67-68.

Part 241: Clean Fuel Fleet Program

Part 241 applies to specified fleets of vehicles. 35 Ill. Adm. Code 241.110(a). Neither IEPA nor JCAR suggested revising Part 241.

The Board throughout Part 241 proposes numerous revisions including matters of punctuation and concision. The Board also proposed amendments such as simplifying cross references, making the form of definitions more consistent with one another, and using "must" to be more clearly mandatory. The Board intended that each of its proposed revisions would be non-substantive, and the Board does not specifically discuss them in the opinion.

Part 243: Air Quality Standards

Part 243 establishes National Ambient Air Quality Standards (NAAQS) adopted by USEPA under the Clean Air Act. 35 Ill. Adm. Code 243.102, citing 42 USC 7409; 415 ILCS 5/7.2, 10H (2022). Neither IEPA nor JCAR suggested revising Part 243.

The Board throughout Part 243 proposes numerous revisions including matters of punctuation and concision. The Board also proposed amendments such as making the form of definitions more consistent with one another and simplifying Board Notes. The Board intended that each of its proposed revisions would be non-substantive, and the Board does not specifically discuss them in the opinion.

Part 244: Episodes

Part 244 provides rules for declaring the stages of air episodes. 35 Ill. Adm. Code 244. Neither IEPA nor JCAR suggested revising Part 244.

The Board throughout Part 244 proposes numerous revisions including matters of punctuation, spelling, and concision. The Board also proposed amendments such as changing passive to active voice, avoiding unnecessary nominalizations, updating statutory references, simplifying cross references, making the forms of temperatures more consistent with one another, making the form of definitions more consistent with one another, and using "must" to be more clearly mandatory. The Board intended that each of its proposed revisions would be non-substantive, and the Board does not specifically discuss them in the opinion.

Finally, below under "Filing Public Comments," the Board specifically requests comment from any of the participants on matters concerning Part 244. *See infra* at 68.

Part 245: Odors

Part 245 addresses specified odors. 35 Ill. Adm. Code 245. Neither IEPA nor JCAR suggested revising Part 245.

The Board throughout Part 245 proposes numerous revisions including matters of spelling and concision. The Board also proposed amendments such as avoiding unnecessary nominalizations, updating statutory references, simplifying cross references, making the form of definitions more consistent with one another, and using "must" to be more clearly mandatory. The Board intended that each of its proposed revisions would be non-substantive, and the Board does not specifically discuss them in the opinion.

Finally, below under "Filing Public Comments," the Board specifically requests comment from any of the participants on matters concerning Part 245. *See infra* at 68.

Part 249: Ethylene Oxide Ambient Air Monitoring

Part 249 governs ambient air monitoring of ethylene oxide under the Act. 35 Ill. Adm., Code 249.100, citing 415 ILCS 5/9.16 (2022). Section 249.120 "sunsets" this Part after January 25, 2023. 35 Ill. Adm. Code 243.120. Neither IEPA nor JCAR suggested revising Part 249.

The Board throughout Part 249 proposes numerous revisions for concision. The Board also proposed amendments such as avoiding unnecessary nominalizations and simplifying cross references. The Board intended that each of its proposed revisions would be non-substantive, and the Board does not specifically discuss them in the opinion.

Finally, below under "Filing Public Comments," the Board specifically requests comment from any of the participants on matters concerning Part 249. *See infra* at 68.

FILING PUBLIC COMMENTS

The Board welcomes comment from any participant on any aspect of its proposal. The Board specifically requests comment on the 167 matters listed below, which the Board has organized part-by-part. Public comments must be filed electronically through the Clerk's Office On-Line (COOL) at pcb.illinois.gov. The Board requests that comments indicate the docket number R 18-21 of this rulemaking. Questions about electronic filing should be directed to the Board's Clerk at 312-814-3461.

Part 201

1. Section 201.102 defines "Standard Industrial Classification Manual" as its 1972 version, and Section 201.104(a) incorporates that 1972 version by reference. Section 211.101(a)(2) also incorporates the 1972 version by reference. Please comment on whether these provisions should refer to a more recent version of this manual or a different source. If so, please provide the information that would

update the definition and incorporations. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

2. Section 201.104(b) incorporates by reference "ASAE Standard 248.1, Section 9, Basis for Stating Drying Capacity of Batch and Continuous-Flow Dryers" by the American Society of Agricultural Engineers. Also, Section 201.146(t) refers to ASAE Standard 248.2. Please comment on whether the either the incorporation at Section 201.104(b) or the reference at Section 201.146(t) should be revised. If so, please provide the information that would update the incorporation and reference. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

3. Section 201.104(c), (d), and (e) incorporate by reference various provisions of the 2015 Code of Federal Regulations. Please comment on whether any update to any of the incorporations is necessary and, if so, please provide the information that would update it.

4. IEPA proposed to revise Section 201.207 by referring to "[t]he requirements of Sections 201.143 through 201.146~~201.148~~ of Subpart C." Although IEPA proposed to repeal Section 201.147, Section 202.148 would continue in effect. The Board requests that IEPA comment on whether Section 201.148 would apply to sources subject to Section 39.5 of the Act and whether applying it reflects IEPA's intent. If not, the Board requests that IEPA provide revised language reflecting its intent.

5. Sections 201.401(b) and 201.406(b) refer to incorporating the 1987 version of 40 CFR 51, Appendix P, although it is not now incorporated by reference in either of those sections or in Section 201.104. The Board proposes to incorporate this regulation by reference as Section 201.104(f) and provide a cross reference to that incorporation in Sections 201.401(b) and 201.406(b). The Board specifically requests comment on whether to adopt this proposed incorporation and, if so, whether to update it from the 1987 version or revise it in any other way.

6. Section 201.406(a) refers to procedures in 35 Ill. Adm. Code 230, which has been repealed. *See* Continuous Monitoring Rules and Repeal of New Source Performance Standards and Hazardous Air Pollutant Regulations, R89-7(B) (Aug. 8, 1991). The Board specifically requests comment on whether this reference should be struck or whether this subsection should refer to another authority. If so, the Board requests proposed language for this revision.

7. The Board specifically requests comment on whether to repeal as obsolete Section 201.Appendix C, which is based on compliance dates that passed as long as 50 years ago.

Part 202

8. Section 202.302(c) refers to notifying IEPA "by telephone or telegram." The Board specifically requests comment on whether it should revise that subsection with different or additional means of communication and, if so, requests language revising it.

Part 203

9. Section 203.112 refers to a 1972 version of the Standard Industrial Classification Manual, incorporated by reference at 35 Ill. Adm. Code 720.111. That provision incorporates the 1987 version of the manual. The Board specifically requests comment on its proposal to update Section 203.112 by referring to the 1987 version.

10. The Board has proposed to clarify the definition of "Dispersion Enhancement Techniques" at Section 203.117 by adding a Section 203.102 incorporating the cited federal regulation by reference and also adding a reference to the proposed incorporation. The Board specifically requests comment on these proposed revisions.

Part 205

11. Section 205.115 provides that "[t]he Part [Emissions Reduction Market System] does not apply after April 29, 2018." The Board specifically requests comment on whether Part 205 should be repealed as obsolete or otherwise revised. If so, the Board requests proposed language of any suggested revision.

12. Section 205.225 refers to Section 201.262, which the Board repealed. *See* Amendments to 35 Ill. Adm. Code Parts 210, 202, and 212, R23-18 (July 20, 2023). The Board specifically requests comment on whether this reference should be struck as obsolete and whether this section should be otherwise revised. If so, the Board requests proposed language of the revision.

Part 207

13. Sections 207.304(i), 207.314(e), 207.404, and 207.410 cite Chapter 13B of the Illinois Vehicle Emissions Inspection Law of 1995, which was repealed effective July 1, 2007. The Board specifically requests comment on whether this citation should be updated to refer to Chapter 13C of the Illinois Vehicle Code or any other provision or should be struck.

Part 211

14. Section 211.101(a)(1) incorporates by reference a 1962 bulletin of the American Petroleum Institute. The Board specifically requests comment on whether this

incorporation should be updated. If so, the Board specifically requests proposed language updating it.

15. Section 211.101(a)(3) incorporates by reference ASTM Standard D 86. The Board specifically requests comment on whether this incorporation should refer to a specific version. If so, the Board specifically requests language clarifying this incorporation.

16. Section 211.101(a)(3) incorporates by reference ASTM Standard D 240-64. Also, the definition of "gross heating value" at Section 211.2770 refers to this incorporation. The Board specifically requests comment on whether this incorporation should be updated. If so, the Board specifically requests language clarifying this incorporation.

17. Section 211.101(a)(3) incorporates by reference ASTM Standard D 369-69 (1971). Also, the definition of "distillate fuel oil" at Section 211.1770 refers to this incorporation. The Board specifically requests comment on whether this incorporation and that reference should be updated. If so, the Board specifically requests language clarifying this incorporation.

18. Section 211.101(a)(3) incorporates by reference ASTM Standard D 396-69. Also, the definition of "residual fuel oil" at Section 211.5590 refers to this incorporation. The Board specifically requests comment on whether this incorporation should be updated. If so, the Board specifically requests language clarifying this incorporation.

19. Section 211.101(a)(3) incorporates by reference ASTM Standards D 523-80 and D 523-89. Also, the definitions of "extreme high-gloss coating" at Section 211.2200 and "high gloss coating" at Section 211.2958 refer to these standards. The Board specifically requests comment on whether these incorporations should be updated. If so, the Board specifically requests language clarifying this incorporation.

20. Section 211.101(a)(3) incorporates by reference ASTM Standard D 900-5. Also, the definition of "gross heating value" at Section 211.2770 refers to this incorporation. The Board specifically requests comment on whether this incorporation should be updated. If so, the Board specifically requests language clarifying this incorporation.

21. Section 211.101(a)(3) incorporates by reference ASTM Standard D 975-68. The Board specifically requests comment on whether this incorporation should be updated. If so, the Board specifically requests language clarifying this incorporation.

22. Section 211.101(a)(3) incorporates by reference ASTM Standard D 1826-64. Also, the definition of "gross heating value" at Section 211.2770 refers to this

incorporation. The Board specifically requests comment on whether this incorporation should be updated. If so, the Board specifically requests language clarifying this incorporation.

23. Section 211.101(a)(3) incorporates by reference ASTM Standard D 2015-66. Also, the definition of "gross heating value" at Section 211.2770 refers to this incorporation. The Board specifically requests comment on whether this incorporation should be updated. If so, the Board specifically requests language clarifying this incorporation.

24. Section 211.101(a)(3) incorporates by reference ASTM Standard D 2880-71. The Board specifically requests comment on whether this incorporation should be updated. If so, the Board specifically requests language clarifying this incorporation.

25. Section 211.101(a)(3) incorporates by reference a number of ASTM standards without providing their titles. The Board specifically requests comment on whether it would clarify this subsection to provide the titles of these materials. If so, the Board specifically requests that the comment include these titles, particularly in light of any updates provided in response to the preceding questions.

26. Section 211.101(b) list as a "Referenced Material" the Federal Insecticide, Fungicide, and Rodenticide Act (7 USC 136). The Board specifically requests comment on whether this material should instead be included in the incorporations by reference in subsection (a), struck from this section, or revised in some other manner. If so, the Board specifically requests language providing this revision.

27. At Section 211.1000, the definition of "Class II Finish" refers to a Voluntary Product Standard PS-59-73. The Board specifically requests comment on whether this reference should be updated or revised in some other manner. If so, the Board specifically requests language providing this revision. Also, the Board requests comment on whether this or any revised standard should be included in the incorporations by reference at Section 211.101(a).

28. The definition of "medical device" at Section 211.3705 refers to "the National Formulary or the United States Pharmacopeia, or any supplement to them." The Board specifically requests comment on whether these materials should be described more specifically and whether they should be incorporated by reference in Section 211.101. If so, the Board specifically requests language revising this reference and requests that the comment include a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

29. The definition of "no detectable volatile organic material emissions" at Section 211.4030 refers to "40 CFR 60.485(c), incorporated by reference in 35 Ill. Adm.

Code 215.105, 218.112 and 219.112." Part 215 incorporates the 1989 version, and Parts 218 and 219 incorporate the 1991 version. The Board specifically requests comment on whether these incorporations should be consistent with one another and, if so, requests language for revisions that would accomplish this.

30. The definition of "power driven fastener coating" at Section 211.4990 refers to "Federal Specification FF-N-105b of the General Services Administration dated August 23, 1977." The Board specifically requests comment on whether this reference should be updated or revised and, if so, requests language for revisions that would accomplish this. The Board also requests comment on whether this or any updated specification should be incorporated by reference at Section 211.101. If so, the Board specifically requests that the comment include a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

31. The definition of "power driven fastener coating" at Section 211.4990 refers to "Bulletin UM-25d of the U.S. Department of Housing and Urban Development - Federal Housing Administration dated September 5, 1973." The Board specifically requests comment on whether this reference should be updated or revised and, if so, requests language for revisions that would accomplish this. The Board also requests comment on whether this or any updated specification should be incorporated by reference at Section 211.101. If so, the Board specifically requests that the comment include a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

32. The definition of "power driven fastener coating" at Section 211.4990 refers to "the Model Building Code of the Council of American Building Officials." The Board specifically requests comment on whether this reference should be made more specific or should be updated or revised and, if so, requests language for revisions that would accomplish this. The Board also requests comment on whether this or any updated specification should be incorporated by reference at Section 211.101. If so, the Board specifically requests that the comment include a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

33. The definition of "Ringelmann chart" at Section 211.5650 refers to "the chart published and described in the Bureau of Mines, U.S. Department of Interior, Information Circular 8333 (Revision of IC7718) May 1, 1967" or any adaptation of it that the Agency has approved. The Board specifically requests comment on whether this reference should be updated or revised and, if so, requests language of the revision that would accomplish this. The Board also requests comment on whether this material should be incorporated by reference at Section 211.101. If so, the Board specifically requests that the comment include a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

Part 212

34. Section 212.113(a) incorporates by reference 14 methods from 40 CFR part 60, Appendix A (1991). The Board specifically requests comment on whether any of these incorporations should be updated or otherwise revised and, if so, requests language of the revision or revisions that would accomplish this and a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

35. Section 212.113(b) incorporates by reference three methods from 40 CFR part 51 Appendix M (1994). The Board specifically requests comment on whether any of these incorporations should be updated or otherwise revised and, if so, requests language of the revision or revisions that would accomplish this and include a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

36. Section 212.113(c) and (d) incorporate by reference provisions of 40 CFR 672 and 40 CFR 675 (1991). The Board specifically requests comment on whether any of these incorporations should be updated or otherwise revised and, if so, requests language of the revision or revisions that would accomplish this and a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act..

37. Section 212.113(e) incorporates by reference "Standard 248.2, Section 9, Basis for Stating Drying Capacity of Batch and Continuous-Flow Grain Dryers, American Society of Agricultural Engineers." Also, Section 212.463, Grain Drying Operations, refers to this incorporation. The Board specifically requests comment on whether this incorporation should be updated or otherwise revised and, if so, requests language of the revision that would accomplish this and a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act..

38. Section 212.113(f) incorporates by reference "U.S. Sieve Series, ASTM-E11, American Society of Testing Materials." The Board specifically requests comment on whether this incorporation should be updated or otherwise revised and, if so, requests language of the revision that would accomplish this and a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

39. Section 212.113(g) incorporates by reference "Standard Methods for the Examination of Water and Wastewater, Section 209C, "Total Filtrable Residue Dried at 103 - 105° C," 15th Edition, 1980, American Public Health Association." Also, Section 212.443(h), Coke Plants, refers to this incorporation. The Board specifically requests comment on whether this incorporation should be updated or otherwise revised and, if so, requests language of the revision that would accomplish this and a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

40. Section 212.113(j) incorporates by reference "40 CFR 50, Appendix K (1992), "Interpretation of the National Ambient Air Quality Standard for Particulate Matter." The Board specifically requests comment on whether this incorporation should be updated or otherwise revised and, if so, requests language of the revision that would accomplish this and a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

41. Part 212.Appendix C, Past Compliance Dates, includes dates that passed more than 50 years ago. The Board specifically requests comment on whether this entire appendix or specific sections of it should be struck as obsolete or otherwise revised.

Part 214

42. Because Section 214.100 addresses the scope and organization of Part 214, the Board has proposed to repeal Sections 214.120, 214.140, 214.300, 214.380, 214.400, 214.420, and 214.560 entitled "Scope" as redundant and specifically requests comment on these proposed repeals.

43. Section 214.104(a) incorporates by reference 10 methods from 40 CFR 60, Appendix A (2014). The Board specifically requests comment on whether any of these incorporations should be updated or otherwise revised. If so, the Board requests that the comment include language of the revision or revisions that would accomplish this and include a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

44. Section 214.104(b) incorporates by reference 40 CFR 60.8(b) (2014). The Board specifically requests comment on whether this incorporation should be updated or otherwise revised. If so, the Board requests that the comment include language of the revision or revisions that would accomplish this and a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

45. Section 214.104(c)(1) incorporates by reference ASTM Standards D-2234 (1989) and D-2013 (1986) for solid fuel sampling. The Board specifically requests comment on whether these incorporations should be updated or otherwise revised and, if so, requests language of the revision that would accomplish this and a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

46. Section 214.104(c)(2) incorporates by reference ASTM Standards D-3177 (1984), D-2622 (1987), D-3180 (1984), and D-4239 (1985) for sulfur determinations. The Board specifically requests comment on whether these incorporations should be updated or otherwise revised and, if so, requests language of the revision that would accomplish this and a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

47. Section 214.104(c)(3) incorporates by reference ASTM Standards D-2015 (1985) and D-3286 (1985) for heating value determinations. The Board specifically requests comment on whether these incorporations should be updated or otherwise revised and, if so, requests language of the revision that would accomplish this and a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

48. Section 214.104(d) incorporates by reference the Tutwiler Procedure for hydrogen sulfide at 40 CFR 60.648 (2014). The Board specifically requests comment on whether this incorporation should be updated or otherwise revised and, if so, requests language of the revision that would accomplish this and a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

49. Section 214.104(e) incorporates by reference 40 CFR 75 (2014). The Board specifically requests comment on whether this incorporation should be updated or otherwise revised and, if so, requests language of the revision that would accomplish this and a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

50. Section 214.562 addresses emissions from a specific generating station in Montgomery County. The Board specifically requests comment on whether this section correctly identifies its current owner and, if not, requests language that correctly identifies the current owner.

51. Part 214.Appendix D, Past Compliance Dates, includes dates that passed more than 50 years ago. The Board specifically requests comment on whether this entire appendix or specific sections of it should be struck as obsolete or otherwise revised.

Part 215

52. The thirteen ASTM standards incorporated by reference in Section 215.105(a) are not identified by title. The Board specifically requests comment on whether it would clarify subsection (a) to include a title for any or all of the incorporations. If so, and particularly in light of any revisions in response to the following questions, the Board also requests the specific titles.

53. Section 215.105(a)(1) incorporates by reference ASTM Standard D 1644-59 Method A. The Board specifically requests comment on whether this incorporation should be updated or otherwise revised and, if so, requests language that would accomplish this and a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

54. Section 215.105(a)(2) incorporates by reference ASTM Standard D 1475-60. The Board specifically requests comment on whether this incorporation should be updated or otherwise revised and, if so, requests language that would accomplish

this and a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

55. Section 215.105(a)(3) incorporates by reference ASTM Standard D 2369-81. The Board specifically requests comment on whether this incorporation should be updated or otherwise revised and, if so, requests language that would accomplish this and a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

56. Section 215.105(a)(4) incorporates by reference ASTM Standards D 2879-83 (Approved 1983) and D 2879-86 (Approved 1986). The Board specifically requests comment on whether these incorporations should be updated or otherwise revised and, if so, requests language that would accomplish this and a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

57. Section 215.105(a)(5) incorporates by reference ASTM Standard D 86-82 (Approved 1982). The Board specifically requests comment on whether this incorporation should be updated or otherwise revised and, if so, requests language that would accomplish this and a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

58. Section 215.105(a)(6) incorporates by reference ASTM Standards E 260-73 (Approved 1973), E 168-67 (Reapproved 1977), E 169-63 (Reapproved 1981), and E 20 (Approved 1985). The Board specifically requests comment on whether these incorporations should be updated or otherwise revised and, if so, requests language that would accomplish this and a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

59. Section 215.105(a)(7) incorporates by reference ASTM Standard D 97-66. The Board specifically requests comment on whether this incorporation should be updated or otherwise revised and, if so, requests language that would accomplish this and a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

60. Section 215.105(a)(8) incorporates by reference ASTM Standard D 1946-67. The Board specifically requests comment on whether this incorporation should be updated or otherwise revised and, if so, requests language that would accomplish this and a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

61. Section 215.105(a)(9) incorporates by reference ASTM Standard D 2382-76. The Board specifically requests comment on whether this incorporation should be updated or otherwise revised and, if so, requests language that would accomplish this and a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

62. Section 215.105(a)(10) incorporates by reference ASTM Standard D 2504-83. The Board specifically requests comment on whether this incorporation should be updated or otherwise revised and, if so, requests language that would accomplish this and a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

63. Section 215.105(a)(11) incorporates by reference ASTM Standard D 2382-83. The Board specifically requests comment on whether this incorporation should be updated or otherwise revised and, if so, requests language that would accomplish this and a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

64. Section 215.105(a)(12) incorporates by reference ASTM Standard D 4953-89. The Board specifically requests comment on whether this incorporation should be updated or otherwise revised and, if so, requests language that would accomplish this and a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

65. Section 215.105(a)(13) incorporates by reference ASTM Standard D 4457-85. The Board specifically requests comment on whether this incorporation should be updated or otherwise revised and, if so, requests language that would accomplish this and a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

66. Section 215.105(c) incorporates by reference "National Fire Codes, National Fire Protection Association . . . (1979)." The Board specifically requests comment on whether this incorporation should be updated or otherwise revised and, if so, requests language that would accomplish this and a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

67. Current Section 215.105(i), proposed to be re-designated as subsection (g), incorporates by reference "'The Vapor Pressure of Pure Substances' (1973)." The Board specifically requests comment on whether this incorporation should be updated or otherwise revised and, if so, requests language that would accomplish this and a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

68. Current Section 215.105(j), proposed to be re-designated as subsection (h), incorporates by reference "'Perry's Chemical Engineer's Handbook' (1984)." The Board specifically requests comment on whether this incorporation should be updated or otherwise revised and, if so, requests language that would accomplish this and a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

69. Current Section 215.105(k), proposed to be re-designated as subsection (i), incorporates by reference the "'CRC Handbook of Chemistry and Physics' (1986-

87)." The Board specifically requests comment on whether this incorporation should be updated or otherwise revised and, if so, requests language that would accomplish this and a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

70. Section 215.581(a)(4) refers to materials including "the guidelines of the National Fire Prevention Association." The Board specifically requests comment on whether this is material incorporated by reference in Section 215.105 and whether subsection (a)(4) should refer to refer to it. If not, the Board requests comment on whether Section 281.581 should provide a more specific reference to materials and whether they should be incorporated by reference in Section 215.105.

71. Section 215.610(b) refers to determining compliance using "methods described in EPA-450/3-82-009 (1982) and does not include any later amendments or editions." The Board specifically requests comment on whether this reference should be updated or otherwise revised. The Board also specifically requests comment on whether it should be incorporated by reference in Section 215.105 and, if so, requests language that would accomplish this and a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

72. Section 215.610(c) refers to demonstrating compliance using "40 CFR 60 Appendix A, Method 25 (1984) and does not include any later amendments or editions." The Board specifically requests comment on whether this reference should be updated or otherwise revised. The Board also specifically requests comment on whether it should be incorporated by reference in Section 215.105, noting that it now incorporates "40 CFR 60 (1989)." If so, the Board requests language that would accomplish these revisions and a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

Part 216

73. Part 216.Appendix C, Compliance Dates, includes two dates, the most recent of which is December 31, 1973. The Board specifically requests comment on whether this entire appendix or specific sections of it should be struck as obsolete or otherwise revised.

Part 217

74. Section 217.104(i) incorporates by reference "ASTM D6522-00, Standard Test Method for Determination of Nitrogen Oxides, Carbon Monoxide, and Oxygen Concentrations in Emissions from Natural Gas-Fired Reciprocating Engines, Combustion Turbines, Boilers, and Process Heaters Using Portable Analyzers (2000)." The Board specifically requests comment on whether this reference should be updated or otherwise revised. If so, the Board requests language that would accomplish this revision and a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

75. Section 217.104(f) and (k) incorporate by reference various provisions and revision of USEPA's Compilation of Air Pollutant Emission Factors. The Board specifically requests comment on whether these references should be updated, revised, or merged. If so, the Board requests language that would accomplish this revision and a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

76. Section 217.156(j)(2) refers to compliance with requirements including "40 CFR 60.7(c) and (d) and 60.13, or 40 CFR 75." The Board specifically requests comment on whether the subsection should refer to a specific version of those requirements by year or other designation and, if so, whether it should be incorporated by reference in Section 217.104 if it is not already incorporated.

77. Section 217.156(k) refers to compliance with requirements including "40 CFR 96." The Board specifically requests comment on whether the subsection should refer to a specific version of those requirements by year or other designation and, if so, whether it should be incorporated by reference in Section 217.104 if it is not already incorporated.

78. Both Section 217.402(b) and 217.454(e) in italicized language cite language from Section 9.9(f) of the Environmental Protection Act. The Board notes that, with Public Act 92-279, effective August 7, 2001, Section 9.9(f) was struck and replaced with language providing that, "[n]otwithstanding any provisions in subparts T, U, and W of Section 217 of Title 35 of the Illinois Administrative Code to the contrary, compliance with the regulations promulgated by the Board pursuant to subsections (b) and (d) of this Section is required by May 31, 2004." The Board specifically requests comment on whether Sections 217.402(b) and 217.454(e) should be updated or otherwise revised and, if so, requests language accomplishing this revision.

79. Section 217.454(a)(2) and (d) refer to the applicability of Subpart W, which IEPA has proposed to repeal. The Board specifically requests comment on whether this subsection should be updated or otherwise revised and, if so, requests language accomplishing the revision.

80. Section 217.462(b) refers to "budget units subject to Subpart W," which IEPA has proposed to repeal. The Board specifically requests comment on whether this subsection should be updated or otherwise revised and, if so, requests language accomplishing the revision.

81. Section 217.472(d) refers to "allowances issued for voluntary NO_x reductions meeting the requirements of Subpart X" and "allowances for NO_x reductions obtained in accordance with Subpart X," which IEPA has proposed to repeal. The Board specifically requests comment on whether this subsection should be updated or otherwise revised and, if so, requests language accomplishing the revision.

82. Section 217.474(a)(1) refers to "a budget EGU under Subpart W," which IEPA has proposed to repeal. The Board specifically requests comment on whether this subsection should be updated or otherwise revised and, if so, requests language accomplishing the revision.

83. Part 217.Appendix C, Past Compliance Dates, includes deadlines, the most recent of which passed in 1975. The Board specifically requests comment on whether this entire appendix or specific sections of it should be struck as obsolete or otherwise revised.

84. Part 217.Appendix D, Non-Electrical Generating Units, has not been amended since it was adopted in 2000. The Board specifically requests comment on whether any of the units should be struck as obsolete or otherwise revised.

85. Part 217.Appendix E, Large Non-Electrical Generating Units, has not been amended since it was adopted in 2001. The Board specifically requests comment on whether any of the units should be struck as obsolete or otherwise revised.

86. Part 217.Appendix G, Existing Reciprocating Internal Combustion Engines Affected by the NO_x SIP Call, has not been adopted since it was amended in 2007. The Board specifically requests comment on whether any part of it should be struck as obsolete or otherwise revised.

Parts 218 and 219

87. Sections 218.109(a), 218.110(a), 218.111(a), 219.109(a), 219.110(a), and 219.111(a) refer to four publications from which vapor pressure may be obtained. The Board specifically requests comment on whether any of these references should be updated or struck. If so, the Board specifically requests proposed language updating the reference. The Board also specifically requests comment on whether any of these publications should be incorporated by reference in Section 218.112 or 219.112. If so, the Board requests that the comment include a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

88. Sections 218.112(a)(1) and 219.112(a)(1) incorporate by reference American Society for Testing and Materials (ASTM) Method "D 2879-86." Also, the definitions of "heavy liquid" at Section 211.2870 and "maximum true vapor pressure" at Section 211.3695 refer to the incorporation of this method. The Board specifically requests comment on whether this should be updated with a more recent version of that standard or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

89. Sections 218.112(a)(2) and 219.112(a)(2) incorporate by reference ASTM Method "D 323-08." Also, the definition of "heavy liquid" at Section 211.2870 refers to this incorporation. The Board specifically requests comment on whether this should be updated with a more recent version of that standard or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

90. Sections 218.112(a)(3) and 219.112(a)(3) incorporate by reference ASTM Method "D 86-82." Also, the definition of "heavy liquid" at Section 211.2870 refers to this incorporation. The Board specifically requests comment on whether this should be updated with a more recent version of that standard or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

91. Sections 218.112(a)(4) and 219.112(a)(4) incorporate by reference ASTM Method "D 369-69 (1971)." Also, the definition of "distillate fuel oil" at Section 211.1770 refers to the incorporation of this method. The Board specifically requests comment on whether this should be updated with a more recent version of that standard or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

92. Sections 218.112(a)(5) and 219.112(a)(5) incorporate by reference ASTM Method "D 369-69." Also, the definition of "petroleum liquid" at Section 211.4610 refers to the incorporation of this method. The Board specifically requests comment on whether this should be updated with a more recent version of that standard or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

93. Sections 218.112(a)(6) and 219.112(a)(6) incorporate by reference ASTM Method "D 2880-71." Also, the definition of "petroleum liquid" at Section 211.4610 refers to the incorporation of this method. The Board specifically requests comment on whether this should be updated with a more recent version of that standard or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

94. Sections 218.112(a)(7) and 219.112(a)(7) incorporate by reference ASTM Method "D 975-68." Also, the definition of "petroleum liquid" at Section 211.4610 refers to the incorporation of this method. The Board specifically

requests comment on whether this should be updated with a more recent version of that standard or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

95. Sections 218.112(a)(8) and 219.112(a)(8) incorporate by reference ASTM Method "D 3925-81 (1985)." Also, test methods and procedures for coatings, inks, and fountain solutions at Sections 218.105(a)(1)(A) and 219.105(a)(1)(A) refer to the incorporation of this method. The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that standard or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

96. Sections 218.112(a)(9) and 219.112(a)(9) incorporate by reference ASTM Method "E 300-96." Also, test methods and procedures for coatings, inks, and fountain solutions at Sections 218.105(a)(1)(B) and 219.105(a)(1)(B) refer to the incorporation of this method. The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that standard or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

97. Sections 218.112(a)(10) and 219.112(a)(10) incorporate by reference ASTM Method "D 1475-85." Also, test methods and procedures for coatings, inks, and fountain solutions at Sections 218.105(a)(2)(C)(i) and 219.105(a)(2)(C)(i) refer to the incorporation of this method. The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that standard or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

98. Sections 218.112(a)(11) and 219.112(a)(11) incorporate by reference ASTM Method "D 2369-87." Also, test methods and procedures for coatings, inks, and fountain solutions at Sections 218.105(a)(2)(C)(ii) and 219.105(a)(2)(C)(ii) refer to the incorporation of this method. The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that standard or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

99. Sections 218.112(a)(12) and 219.112(a)(12) incorporate by reference ASTM Method "D 3792-86." Also, test methods and procedures for coatings, inks, and fountain solutions at Sections 218.105(a)(2)(C)(iii) and 219.105(a)(2)(C)(iii) refer to the incorporation of this method. The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that standard or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

100. Sections 218.112(a)(13) and 219.112(a)(13) incorporate by reference ASTM Method "D 4017-81 (1987)." Also, test methods and procedures for coatings, inks, and fountain solutions at Sections 218.105(a)(2)(C)(iv) and 219.105(a)(2)(C)(iv) refer to the incorporation of this method. The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that standard or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

101. Sections 218.112(a)(14) and 219.112(a)(14) incorporate by reference ASTM Method "D 4457-85." Also, test methods and procedures for coatings, inks, and fountain solutions at Sections 218.105(a)(2)(C)(v) and 219.105(a)(2)(C)(v) refer to the incorporation of this method. The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that standard or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

102. Sections 218.112(a)(15) and 219.112(a)(15) incorporate by reference ASTM Method "D 2697-86." Also, test methods and procedures for coatings, inks, and fountain solutions at Sections 218.105(a)(2)(C)(vi) and 219.105(a)(2)(C)(vi) refer to the incorporation of this method. The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that standard or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

103. Sections 218.112(a)(16) and 219.112(a)(17) incorporate by reference ASTM Method "D 3980-87." Also, test methods and procedures for coatings, inks, and fountain solutions at Sections 218.105(a)(2)(C)(vii) and 219.105(a)(2)(C)(vii) refer to the incorporation of this method. The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that standard or revised with a different method. If so, the Board

requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

104. Sections 218.112(a)(17) and 219.112(a)(17) incorporate by reference ASTM Method "E 180-85." Also, test methods and procedures for coatings, inks, and fountain solutions at Sections 218.105(a)(2)(C)(viii) and 219.105(a)(2)(C)(viii) refer to the incorporation of this method. The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that standard or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

105. Sections 218.112(a)(18) and 219.112(a)(18) incorporate by reference ASTM Method "D 2372-85." Also, test methods and procedures for coatings, inks, and fountain solutions at Sections 218.105(a)(2)(C)(ix) and 219.105(a)(2)(C)(ix) refer to the incorporation of this method. The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that standard or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

106. Sections 218.112(a)(19) and 219.112(a)(19) incorporate by reference ASTM Method "D 97-66." The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that standard or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

107. Sections 218.112(a)(20) and 219.112(a)(20) incorporate by reference ASTM Method "E 168-67 (1977)." The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that standard or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

108. Sections 218.112(a)(21) and 219.112(a)(21) incorporate by reference ASTM Method "E 169-87." The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that standard or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

109. Sections 218.112(a)(22) and 219.112(a)(22) incorporate by reference ASTM Method "E 260-91." The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that standard or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

110. Sections 218.112(a)(23) and 219.112(a)(23) incorporate by reference ASTM Method "D 2504-83." The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that standard or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

111. Sections 218.112(a)(24) and 219.112(a)(24) incorporate by reference ASTM Method "D 2382-83." The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that standard or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

112. Sections 218.112(a)(25) and 219.112(a)(25) incorporate by reference ASTM Method "D 2099-00." The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that standard or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

113. Section 218.112(c) and 219.112(c) incorporate by reference American Petroleum Institute Bulletin 2517, "Evaporation Loss from Floating Roof Tanks," second edition, February 1980. Also, the definitions of "maximum true vapor pressure" at Section 211.3695(a) and "true vapor pressure" at Section 211.6770 refer to this incorporation. The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that standard or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

114. Sections 218.112(d-h), 218.112(cc-ee), 219.112(d-h) and 219.112(z-cc) incorporate by reference provisions of the Code of Federal Regulations. The Board specifically requests comment on whether any of these should be updated with a more recent version of those regulations. If so, the Board requests language updating them.

115. Section 218.112(d) incorporates by reference "40 CFR 60 (July 1, 1991) and 40 CFR 60, appendix A, Method 24." Section 218.105(a)(2)(B) refers to the

incorporation of Method 24A in this section, and Section 218.105(f)(1) refers to the incorporation of Methods 18, 25, and 25A in this section. The Board specifically requests comment on whether Section 218.112(d) should be revised to specifically incorporate these four additional methods.

116. Sections 218.112(i-v) and 219.112(i-u) incorporate by reference various USEPA materials. The Board specifically requests comment on whether any of these should be updated. If so, the Board requests language updating them. If so, please also provide a copy of the incorporated material required by Section 5-75 of the Illinois Administrative Procedure Act.

117. Sections 218.204 and 219.204 require "compliance with the emission limitations marked with an asterisk . . . on and after March 15, 1996, and compliance with emission limitations not marked with an asterisk . . . until March 15, 1996." The Board specifically requests comment on whether any or all of the standards not marked with an asterisk that were superseded in 1996 may be struck as obsolete or otherwise revised.

118. In Section 218.204 and 219.204, a number of subsections establish an emissions limitation that applies before a date and a limitation that applies on and after that date. As one example, Sections 218.204(l) and 219.204(l) establish wood furniture coating limitations that apply before March 15, 1998, and separate limitations that apply on and after March 15, 1998. The Board specifically requests comment on whether any or all of the superseded standards should be struck as obsolete or otherwise revised with specific language.

119. Sections 218.205(e) refers to meeting "the requirement specified in the note to Section 218.204(l)(1)," which sets limits "[b]efore March 15, 1998." Section 219.205(e) makes ta similar reference to the corresponding Board Note. The Board specifically requests comment on whether the Board Notes and references to them should be struck as obsolete or otherwise revised with specific language.

120. In Sections 218.401 and 219.401, subsections establish requirements that apply before a date and after it. As one example, subsection (a) establishes limitations that apply "[p]rior to August 1, 2010" and separate limitations that apply "[o]n and after August 1, 2010." The Board specifically requests comment on whether any or all of the superseded requirements should be struck as obsolete and whether these sections should be otherwise revised with specific language.

121. In Sections 218.405 and 219.405, subsection (b) applies "[p]rior to August 1, 2010," and subsection (c) applies "[o]n and after August 1, 2010." The Board specifically requests comment on whether any or all of the superseded requirements should be struck as obsolete and whether these sections should be otherwise revised with specific language.

122. Sections 218.407 and 219.407 establish limits that apply "[p]rior to August 1, 2010, and subsections and separate limits that apply "[o]n and after August 1, 2010. The Board specifically requests comment on whether any or all of the superseded requirements should be struck as obsolete and whether these sections should be otherwise revised with specific language.

123. Sections 218.411 and 219.411 includes requirements such as subsection (a) that apply before August 1, 2010, and such as subsection (b) that apply on and after August 1, 2010. The Board specifically requests comment on whether the superseded requirements should be struck as obsolete or whether these provisions should be otherwise revised with specific language.

124. Sections 218.452 and 219.452 include deadlines to submit a monitoring program and a first monitoring report by 1990 and 1991, respectively. The Board specifically requests comment on whether either or both or both of those requirements should be struck as obsolete or whether these sections should be otherwise revised with specific language.

125. In PC 9, JCAR suggested amending "propylenediene" to "propylene diene" in Sections 218.901(b)(2)(N) and 219.901(b)(2)(N). The Board specifically requests comment on whether these amendments correct or clarify these subsections.

Part 223

126. Section 223.120(f)(1) incorporates by reference ASTM Method "E119-05a." The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that method or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

127. Section 223.120(f)(2) incorporates by reference ASTM Method "D523-89 (1999)." The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that method or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

128. Section 223.120(f)(3) incorporates by reference ASTM Method "D1640-03 (1999)." The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that method or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

129. Section 223.120(f)(4) incorporates by reference ASTM Method "D3912-95 (2001)." The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that method or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

130. Section 223.120(f)(5) incorporates by reference ASTM Method "D4082-02." The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that method or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

131. Section 223.120(f)(6) incorporates by reference ASTM Method "D4214-98." The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that method or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

132. Section 223.120(f)(7) incorporates by reference ASTM Method "D1613-03." The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that method or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

133. Section 223.120(f)(8) incorporates by reference ASTM Method "E84-07." The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that method or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

134. Section 223.120(f)(9) incorporates by reference ASTM Method "D4359-90(2006)." The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that method or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

135. Section 223.120(f)(10) incorporates by reference ASTM Method "E260-96 (2006)." The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that method or revised with a different method. If so, the Board requests proposed language updating or

revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

136. Section 223.120(f)(11) incorporates by reference ASTM Method "E2167-01." The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that method or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

137. Section 223.120(f)(12) incorporates by reference ASTM Method "C836-06." The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that method or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

138. Section 223.120(f)(13) incorporates by reference ASTM Method "D86-07b." The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that method or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

139. Section 223.120(h)(1) incorporates by reference Bay Area Air Quality Management District (BAAQMD) Method 43, proposed amendment February 4, 2004. The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that method or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

140. Section 223.120(h)(2) incorporates by reference BAAQMD Method 41, proposed amendment February 4, 2004. The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that method or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

141. Section 223.120(i) incorporates by reference California Air Resources Board (CARB) Method 310, amended May 5, 2005. The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that method or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please

also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

142. In Section 223.203, "Deodorant" is defined separately based on whether the product is manufactured on and after July 1, 2009, or before that date. The Board specifically requests comment on whether the definition that applied before July 1, 2009, should be struck as obsolete or otherwise revised. If so, the Board requests proposed language updating or revising it.

143. In Section 223.203, "Deodorant Body Spray" is defined separately based on whether the product is manufactured on and after July 1, 2009, or before that date. The Board specifically requests comment on whether the definition that applied before July 1, 2009, should be struck as obsolete or otherwise revised. If so, the Board requests proposed language updating or revising it.

144. In Section 223.203, "Hair Spray" is defined separately based on whether the product is manufactured on and after July 1, 2009, or before that date. The Board specifically requests comment on whether the definition that applied before July 1, 2009, should be struck as obsolete or otherwise revised. If so, the Board requests proposed language updating or revising it.

145. In Section 223.203, the definition of "Hair Styling Gel" refers to a product manufactured before July 1, 2009. The Board specifically requests comment on whether this definition should be struck as obsolete or otherwise revised. If so, the Board requests proposed language updating or revising it.

146. Section 223.260(a) separately refers to products manufactured before July 1, 2009, and July 1, 2010. The Board specifically requests comment on whether this subsection should be struck as obsolete.

Part 225

147. Section 225.140(h)(1) incorporates by reference

> ASTM D388-77 (approved February 25, 1977), D388-90 (approved March 30, 1990), D388-91a (approved April 15, 1991), D388-95 (approved January 15, 1995), D388-98a (approved September 10, 1998), or D388-99 (approved September 10, 1999, reapproved in 2004), Classification of Coals by Rank

The Board specifically requests comment on whether this incorporation should be updated with one or more recent versions of this or another method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

148. Section 225.140(h)(2) incorporates by reference ASTM Method "D3173-03." The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that method or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

149. Section 225.140(h)(3) incorporates by reference ASTM Method "D3684-01." The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that method or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

150. Section 225.140(h)(4) incorporates by reference ASTM Method "D4840-99." The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that method or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

151. Section 225.140(h)(5) incorporates by reference ASTM Method "D5865-04." The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that method or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

152. Section 225.140(h)(6) incorporates by reference ASTM Method "D6414-01." The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that method or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

153. Section 225.140(h)(7) incorporates by reference ASTM Method "D6722-01." The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that method or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

154. Section 225.140(h)(8) incorporates by reference ASTM Method "D6784-02." The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that method or revised with a different method. If so, the Board requests proposed language updating or revising this

incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

155. Section 225.140(h)(9) incorporates by reference ASTM Method "D6911-03." The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that method or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

156. Section 225.140(h)(10) incorporates by reference ASTM Method "D7036-04." The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that method or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

Part 229

157. Section 229.104(b) incorporates by reference "Revised Statistical Definitions for Metropolitan Areas . . . (June 30, 1993)." The Board specifically requests comment on whether this incorporation should be updated with a more recent version of those definitions or revised with different definitions. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

158. Section 229.140(h) incorporates by reference ASTM Method "D6784-02." The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that method or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

Part 240

159. Section 240.107 incorporates by reference a Society of Automotive Engineers test procedure dated February 1996. The Board specifically requests comment on whether this incorporation should be updated with a more recent version of that procedure or revised with a different method. If so, the Board requests proposed language updating or revising this incorporation. If so, please also provide a copy of the publication required by Section 5-75 of the Illinois Administrative Procedure Act.

160. Section 240.151 provides that Subpart D "is effective through January 31, 2012." The Board specifically requests comment on whether that Subpart should be

struck as obsolete or otherwise revised. If so, the Board requests language that would revise it.

161. Section 240.151 refers to vehicles identified in Section 13C-25(d) of the Vehicle Emissions Inspection Law of 2005, which is a blank subsection. The Board specifically requests comment on whether to update this reference and requests proposed language that would update it.

162. Section 240.171 provides that Subpart F "is effective through January 31, 2012." The Board specifically requests comment on whether that Subpart should be struck as obsolete or otherwise revised. If so, the Board requests language that would revise it.

Part 244

163. Section 244.121(b) refers to reports "by either telephone or telemetry." The Board specifically requests comment on whether this reference should be revised to include different or additional means of reporting and, if so, requests proposed language revising it.

164. Section 244.143(a)(2) refers to the "Cook County Department of Environmental Control." The Board specifically requests comment on whether this name should be updated or revised and requests proposed language revising it.

165. Section 244.143(a)(3) refers the "Chicago Department of Environmental Control." The Board specifically requests comment on whether this name should be updated or revised and requests proposed language revising it.

Part 245

166. Section 245.120(b) refers to ASTM Standard D1391-57. The Board specifically requests comment on whether this reference should be updated or revised. If so, the Board requests language that would accomplish this. In addition, the Board specifically requests comment on whether this or any updated materials should be incorporated by reference at Section 245.101 and, if so, requests any copy of updated materials required by Section 5-75 of the Illinois Administrative Procedure Act.

Part 249

167. Section 249.120 entitled "Sunset Provisions" provides that the Part 249 will not apply after January 25, 2023. The Board specifically requests comment on whether it should repeal the Part or revise it. If so, the Board requests proposed language of any suggested revision.

TECHNICAL FEASIBILITY AND ECONOMIC REASONABLENESS

Request for Economic Impact Study

Before it submits a proposal to first-notice publication, the Board will request that the Department of Commerce and Economic Opportunity (DCEO) conduct an economic impact study of that proposal. *See* 415 ILCS 5/27(b) (2022). At least 20 days before the required hearing to consider the economic impact of the proposal, the Board must make the economic impact study, or DCEO's explanation for not producing one, available to the public. *Id*. The Board intends to request the study in time to address this at its second hearing.

Regions and Sources Affected

IEPA states that a number of its proposed amendments apply statewide. SR at 32, citing 35 Ill. Adm. Code 201, 217. "Other proposed revisions apply to different areas of the State." SR at 32, citing 35 Ill. Adm. Code 215, 218, 219. [S]ome of the other proposed amendments are site-specific." SR at 33, citing 35 Ill. Adm. Code 212.423, 212.424, 214.521, 214.561, 216.382, 237.130.

IEPA adds that its TSD includes three appendices: Appendix A lists sources subject to Part 225 under CAIR, Appendix B lists sources subject to Subpart N of Part 215, and Appendix C lists sources subject to Part 232. SR at 33; TSD at 29, citing TSD at 30-36.

However, IEPA argues that "[n]o source in Illinois will be adversely affected." TSD at 29. It asserts that its proposed revisions "are administrative in nature and will clarify the meaning or intent of regulations, correct typos within the existing regulatory provisions and definitions, and delete obsolete provisions that are no longer applicable." *Id*.

Projected Environmental Impact

IEPA argues that its proposed amendments "will not adversely impact the air quality in Illinois." TSD at 28. It further argues that "[i]t will neither increase nor decrease current emissions levels and will not impact any of the State's future attainment or maintenance plans." *Id*.

Technical Feasibility and Economic Reasonableness

IEPA states that its proposed amendments repeal outdated or duplicative provisions or clarify or correct requirements. SR at 34. IEPA stresses that its proposed revisions do not "add new emission limits or requirements for the sources in Illinois." *Id*.; TSD at 28. It argues that "[e]mission sources do not need to install any new controls or incur any costs to meet the requirements of the proposed rules." *Id*. Because its proposal is not intended to have any substantive effect or economic impact on Illinois sources, IEPA concludes that its proposed revisions are both technically feasible and economically reasonable. *Id*.

When it submits a proposal to first-notice publication, the Board intends to make findings on the technical feasibility and economic reasonableness of that proposal. *See* 415 ILCS 5/27(a) (2022). The Board also intends at that time to determine whether the proposal would have any adverse economic impact on the people of the State of Illinois. *See* 415 ILCS 5/27(b) (2022).

STATE IMPLEMENTATION PLAN (SIP) AMENDMENTS

IEPA states that the scope of its rulemaking proposal implicates a number of State Implementation Plans.[2] IEPA argues that "[a]ll amendments are emissions-neutral and do not affect the overall plans or goals of attainment or nonattainment areas within the State." SR at 3, citing TSD at 2. IEPA further argues that, "[a]s the amendments are administrative in nature they will not affect emission levels of any pollutant within the State, nor will the proposed amendments impact reasonable further progress toward any National Ambient Air Quality Standard (NAAQS)." SR at 3; *see* TSD at 2.

If adopted by the Board, IEPA reports that it intends to submit the following amendments to USEPA as SIP revisions:

> Amendments as a general revision to the SIP: Sections 20l.124, 201.147, and 201.164.
>
> Amendments to the fine particulate matter ($PM_{2.5}$) SIP: Sections 212.423, 212.424, 212.458, 212.700, and Section 225.307.
>
> Amendments to the SO_2 SIP: Section 214.561.
>
> Amendments to the ozone SIP: Sections 211.481, 211.880, 211.1270, 211.1670, 211.2200, 211.2310, 211.3850, 211.3967, 211.4250, and 211.5500; Sections 215.202, 215.211, 215.212, 215.213, 215.215, 215.420, 215.429, 215.466, 215.613, 215.881 and 215.883; Sections 217.750, 217.751, 217.752, 217.754, 217.756, 217.758, 217.760, 217.762, 217.764, 217.768, 217.770, 217.774, 217.776, 217.778, 217.780, and 217.782; Sections 218.204, 218.401, and 218.926; Section 219.204; and Sections 225.407, 225.507.
>
> Amendments to the carbon monoxide (CO) SIP: Section 216.382. TSD at 31.

Above in its part-by-part discussion of IEPA's proposed amendments, the Board notes IEPA's arguments that its proposed revisions are consistent with Sections 110(l) and 193 of the CAA. IEPA asserts that these proposals "repeal outdated requirements, clarify the meaning or intent of regulations, or correct typographical errors." TSD at 29. IEPA argues that they "will not impact emissions from the current permitted emission units." *Id.*

---

[2] IEPA also identifies its proposed amendments that are not part of a SIP and would not be submitted to USEPA as SIP revisions. TSD at 32.

IEPA adds that proposed SIP revisions must receive public notice and have an opportunity for hearing. *Id*. IEPA recommends language for the Board to use in providing notice of a public hearing on a proposal to amend its rules. *Id*. at 31-32, citing 35 Ill. Adm. Code 102.416.

CONCLUSION

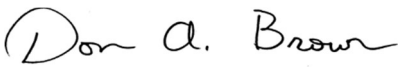
The Board proposes non-substantive amendments of its Subtitle B air pollution rules for public comment before submitting them to first-notice publication in the *Illinois Register.* The proposed amendments appear below with proposed additions underlined and proposed deletions struck through. The Board invites public comment on the entire proposal and particularly on the questions listed above.

ORDER

The Board directs its Clerk to submit proposed non-substantive amendments to its Subtitle B air pollution rules to public comment. It also directs its hearing officer to schedule required hearings on the proposal beginning in the fall of 2024 and to set deadlines including those for pre-filed testimony and post-hearing comments.

IT IS SO ORDERED.

I, Don A. Brown, Clerk of the Illinois Pollution Control Board, certify that the Board adopted the above opinion and order on June 6, 2024, by a vote of 4-0.



Don A. Brown, Clerk
Illinois Pollution Control Board

SUBPART A: DEFINITIONS

Section 201.101 Other Definitions

a) Except as stated and unless a different meaning of a term is clear from its context, the definitions ~~of terms used~~ in this Part ~~shall~~ must be the same as those ~~used~~ in the Environmental Protection Act [415 ILCS 5] ~~(Act)~~.

b) All terms in this Part defined in 35 Ill. Adm. Code 211 ~~which appear in this Part~~ have the definitions ~~specified by~~in 35 Ill. Adm. Code 211.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.102 Definitions

"Air Contaminant~~":~~ " means any solid, liquid, or gaseous matter~~,~~; any odor; or any form of energy~~,~~ that is capable of being released into the atmosphere from an emission source.

"Air Pollution Control Equipment~~":~~ " means any equipment or facility of a type intended to eliminate, prevent, reduce, or control the emission of specified air contaminants to the atmosphere.

"Air Pollution~~":~~ " means the presence in the atmosphere of one or more air contaminants in sufficient quantities and of such characteristics and duration as to be injurious to human, plant, or animal life~~,~~; ~~to~~ health~~,~~; or ~~to~~ property~~,~~ or to unreasonably interfere with the enjoyment of life or property.

"Ambient Air~~":~~ " means that portion of the atmosphere external to buildings comprising emission sources.

"Ambient Air Quality Standard"~~: those~~ means standards promulgated ~~from time to time~~ by the Pollution Control Board ~~(Board) pursuant to authority contained in~~under the Act ~~and found~~ at 35 Ill. Adm. Code 243~~,~~ or by the United States Environmental Protection Agency ~~(USEPA) pursuant to authority contained in~~under 42 ~~U.S.C.~~USC 7401 et seq., as amended from time to time.

"Clean Air Act" or "CAA~~:~~ " means the Clean Air Act of 1970, as amended, including the Clean Air Act Amendments of 1977, as amended (42 ~~U.S.C.~~USC 7401 et seq.).

"Commence~~":~~ " means the act of entering into a binding agreement or contractual obligation to undertake and complete, within a reasonable time, a continuous program of construction or modifications.

"Construction"~~: commencement of~~ means commencing on-site fabrication, erection, or installation of an emission source or ~~of~~ air pollution control equipment.

"Emission Source~~":~~ " means any equipment or facility of a type capable of emitting specified air contaminants to the atmosphere.

"Existing Air Pollution Control Equipment": " means any air pollution control equipment, the construction or modification which has commenced prior tobefore April 14, 1972.

"Existing Emission Source": " means any emission source, the construction or modification of which has commenced prior tobefore April 14, 1972.

"Modification": " means any physical change in, or change in the method of operations of, an emission source or of air pollution control equipment which increases the amount of any specified air contaminant emitted by such the source or equipment or which results in the emission of any specified air contaminant not previously emitted. It shall must be presumed that an increase in the use of raw materials, the time of operation, or the rate of production will change the amount of any specified air contaminant emitted. Notwithstanding any other provisions of this definition, for purposes of permits issued pursuant tounder Subpart D, the Illinois Environmental Protection Agency (Agency) may specify conditions under which an emission source or air pollution control equipment may be operated without causing a modification as herein defined, and normal cyclical variations, before the date operating permits are required, shall must not be considered modifications.

"New Air Pollution Control Equipment": " means any air pollution control equipment, the construction or modification of which is commenced on or after April 14, 1972.

"New Emission Source": " means any emission source, the construction or modification of which is commenced on or after April 14, 1972.

"Owner or Operator": " means any person who owns, leases, controls, or supervises an emission source or air pollution control equipment.

"Person": " means any individual, corporation, partnership, firm, association, trust, estate, public or private institution, group, agency, political subdivision of this State, any other State or political subdivision or agency thereof or any legal successor, representative, agent, or agency of the foregoing.

"PSD Increment": " means the maximum allowable increase over baseline concentration of any air contaminant as determined by Section 163 of the Clean Air ActCAA (42 U.S.C.USC 7473) and regulations adopted thereunderunder it.

"Specified Air Contaminant": " means any air contaminant as to which this Subtitle contains emission standards or other specific limitations and any contaminant regulated in Illinois pursuant tounder Section 9.1 of the Act.

"Standard Industrial Classification Manual": " means the Standard Industrial Classification Manual (1972), Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Section 201.103 Abbreviations and Units

a) ~~The~~ This Part uses the following abbreviations ~~have been used in this Part~~:

Act	Illinois Environmental Protection Act
~~AER~~	~~Annual Emissions Report~~
Agency	Illinois Environmental Protection Agency
btu or Btu	British thermal units
CAA	Clean Air Act
CAAPP	Clean Air Act Permit Program
CO	Carbon monoxide
CO_2e	Carbon dioxide equivalent
gal	gallons
HAPs	hazardous air pollutants
hp	horsepower
hr	hour
~~gal/mo~~	~~gallons per month~~
~~gal/yr~~	~~gallons per year~~
kPa	kilopascals
kPa absolute	kilopascals absolute
kW	kilowatts
l	liters
Mg	megagrams
m^3	cubic meters
MM	million
MW	megawatts; one million watts
NESHAP	National Emission Standards for Hazardous Air Pollutants
~~NMOC~~	~~nonmethane organic compounds~~
NO_x	nitrogen oxide
NSPS	New Source Performance Standards
NSR	New Source Review
PBR	permit by rule
PM	particulate matter
PM_{10}	particulate matter with an aerodynamic diameter less than or equal to 10 micrometers
$PM_{2.5}$	particulate matter with an aerodynamic diameter less than or equal to 2.5 micrometers
PSD	Prevention of Significant Deterioration
psi	pounds per square inch
psia	pounds per square inch absolute
ROSS	Registration of Smaller Sources
SO_2	sulfur dioxide
~~TPY~~	~~tons per year~~

USEPA	United States Environmental Protection Agency
VOM	volatile organic material
yr	year

b) ~~The~~ This Part uses the following conversion factors ~~have been used in this Part~~:

English	Metric
1 gal	3.785 l
1000 gal	3.785 m^3
1 hp	0.7452 kW
1 MMbtu/hr	0.293 MW
1 psi	6.897 kPa

Section 201.104 Incorporations by Reference

The following materials are incorporated by reference. These incorporations ~~by reference~~ do not include any later amendments or editions:

a) Standard Industrial Classification Manual (1972), Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

b) ASAE Standard 248.2, Section 9, Basis for Stating Drying Capacity of Batch and Continuous-Flow Grain Dryers, American Society of Agricultural Engineers, 2950 Niles Road, St. Joseph, MI 49085.

c) Prevention of Significant Deterioration of Air Quality, 40 CFR 52.21 (2015).

d) Standards of Performance for New Stationary Sources, 40 CFR 60:

1) Subpart A – General Provisions (2015);

2) Standards of Performance for Small Industrial-Commercial-Institutional Steam Generating Units, Subpart Dc (2015);

3) Appendix A-4, Reference Method 10 – Determination of Carbon Monoxide Emissions from Stationary Sources (2015); and

4) Subpart Ja – Standards of Performance for Petroleum Refineries for Which Construction, Reconstruction, or Modification Commenced After May 14, 2007 (2015).

e) National Emission Standards for Hazardous Air Pollutants for Source Categories, 40 CFR 63:

1) Subpart A – General Provisions (2015);

2) Subpart DDDDD – National Emission Standards for Hazardous Air Pollutants for Major Sources: Industrial, Commercial, and Institutional Boilers and Process Heaters (2015); and

3) Subpart JJJJJJ – National Emission Standards for Hazardous Air Pollutants for Industrial, Commercial, and Institutional Boilers Area Sources (2015).

f) Requirements for Preparation, Adoption, and Submittal of Implementation Plans, 40 CFR 51, Appendix P: Minimum Emissions Monitoring Requirements (1987).

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART B: GENERAL PROVISIONS

Section 201.121 Existence of Permit No Defense

The existence of a permit under this Part ~~shall~~ must not constitute a defense to a violation of the Act or any rule or regulation of this Chapter~~,~~ except for construction or operation without a permit.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.122 Proof of Emissions

Notwithstanding other provisions of this Chapter, evidence that specified air contaminant emissions, as calculated on the basis of standard emission factors or other factors generally accepted ~~as true~~ by ~~those~~ persons engaged in the field of air pollution control, exceed the limitations ~~prescribed by~~under this Chapter ~~shall~~ must constitute adequate proof of a violation~~,~~ in the absence of a showing that actual emissions are in compliance.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.123 Burden of Persuasion Regarding Exceptions

In any proceeding ~~pursuant to~~under this Chapter, if an exception ~~stated~~ in this Chapter would limit an obligation, limit a liability, or eliminate ~~either~~ an obligation or a liability, the person who would benefit from ~~the application of~~ the exception ~~shall~~ must have the burden of persuasion that the exception applies and that the terms of the exception have been met.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.124 Annual Report (Repealed)

~~The Agency shall annually prepare and submit to the Board an Air Contaminant Emission Report which lists the emission sources in the State for which an operating permit is required under this Part, describes the type, quantity and concentrations of the various specified contaminants being emitted and describes the existing and planned controls and the scheduled dates for completion of improvements.~~

(Source: Repealed at 48 Ill. Reg._____, effective _____)

Section 201.125 Severability

If any provision of ~~these rules or regulations is adjudged invalid,~~this Chapter or ~~if the~~its application ~~thereof~~ to any person or in any circumstance is adjudged invalid, ~~such invalidity shall~~ that adjudication must not affect the validity of this Chapter as a whole or ~~of any part, subpart, sentence or clause thereof~~any portion not adjudged invalid.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 201.126 Repealer

Each provision of the Rules and Regulations Governing the control of Air Pollution, as amended August 19, 1969, applying to an emission source ~~shall~~ must remain in full force and effect unless and until ~~such~~ that source is required to comply with a corresponding provision of this Chapter.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART C: PROHIBITIONS

Section 201.141 Prohibition of Air Pollution

~~No~~ A person ~~shall~~ must not cause or threaten or allow the discharge or emission of any contaminant into the environment in any State so as, either alone or in combination with contaminants from other sources, to cause or tend to cause air pollution in Illinois, or ~~so as to~~ violate the provisions of this Chapter, or ~~so as to~~ prevent the attainment or maintenance of any applicable ambient air quality standard.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.142 Construction Permit Required

~~No~~ A person ~~shall~~ must not cause or allow the construction of any new emission source or any new air pollution control equipment, or cause or allow the modification of any existing emission source or air pollution control equipment, without first obtaining a construction permit from the Agency, except ~~as provided in Sections~~under Section 201.146 or ~~Section~~ 201.170(b) ~~of this Part~~.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.143 Operating Permits for New Sources

~~No~~ A person ~~shall~~ must not cause or allow the operation of any new emission source or new air pollution control equipment of a type for which a construction permit is required by Section 201.142 without first obtaining an operating permit from the Agency, except for ~~such~~ testing operations ~~as may be authorized by~~ the construction permit authorizes. Applications for operating permits ~~shall~~ must be made at ~~such~~ times and contain ~~such~~ information ~~(~~in addition to the information required by Section 201.157 as ~~shall be specified in~~ the construction permit specifies.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.144 Operating Permits for Existing Sources

~~No~~ A person ~~shall~~ must cause or allow the operation of any existing emission source or any existing air pollution control equipment without first obtaining an operating permit from the Agency, except as ~~provided~~ exempted in Section 201.146. Appendix C lists dates~~Dates~~ on which permits were required ~~are shown in Appendix C~~.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.146 Exemptions from State Permit Requirements

Construction or operating permits~~, pursuant to~~ under Sections 201.142, 201.143, and 201.144 ~~of this Part,~~ are not required for the classes of equipment and activities listed ~~below~~ in this Section. The permitting exemptions in this Section do not relieve the owner or operator of any source from any obligation to comply with any other applicable requirements, including the obligation to obtain a permit ~~pursuant to~~under Sections 9.1(d) and 39.5 of the Act, sections 165, 173, and 502 of the ~~Clean Air Act~~CAA, or any other applicable permit or registration requirements.

a) Air contaminant detectors or recorders, combustion controllers, or combustion shutoffs;

b) Air conditioning or ventilating equipment not designed to remove air contaminants generated by or released from associated equipment;

c) Each fuel burning emission unit for indirect systems and for heating and reheating furnace systems used exclusively for residential~~,~~ or commercial establishments using gas and/or fuel oil exclusively with a design heat input capacity of less than 14.6 MW (50 MMbtu/hr), except that a permit ~~shall~~ must be required for any such emission unit with a design heat input capacity of at least 10 MMbtu/hr that was constructed, reconstructed, or modified after June 9, 1989, and ~~that~~ is subject to 40 CFR 60, subpart D;

d) Each fuel burning emission unit other than those ~~listed~~ in subsection (c) ~~of this Section~~ for direct systems used for comfort heating purposes and indirect heating

systems with a design heat input capacity of less than 2930 kW (10 MMbtu/hr);

e) Internal combustion engines or boilers (including the fuel system) of motor vehicles, locomotives, ~~air craft~~aircraft, watercraft, ~~lifttrucks~~ lift trucks, and other vehicles powered by nonroad engines;

f) Bench scale laboratory equipment and laboratory equipment used exclusively for chemical and physical analysis, including associated laboratory fume hoods, vacuum producing devices, and control devices installed primarily to address potential accidental releases;

g) Coating operations located at a source not using ~~not in excess of~~more than 18,925 l (5,000 gal) of coating (including thinner) per year;

h) Any emission unit acquired exclusively for domestic use, except that a permit ~~shall~~ must be required for any incinerator and for any fuel combustion emission unit using solid fuel with a design heat input capacity of 14.6 MW (50 MMbtu/hr) or more;

i) Any stationary internal combustion engine with a rated power output of less than 1118 kW (1500 bhp) or stationary turbine, except that a permit ~~shall~~ must be required for~~ the following~~:

1) Any internal combustion engine with a rating ~~at~~ equal to or greater than 500 bhp output that is subject to ~~the control requirements of~~ 35 Ill. Adm. Code 217.388(a) or (b); or

2) Any stationary gas turbine engine with a rated heat input at peak load of 10.7 gigajoules/hr (10 MMbtu/hr) or more that is constructed, reconstructed, or modified after October 3, 1977, and ~~that is~~ subject to ~~requirements of~~ 40 CFR 60, subpart GG;

j) Rest room facilities and associated cleanup operations, and stacks or vents used to prevent the escape of sewer gases through plumbing traps;

k) Safety devices designed to protect life and limb, ~~provided that~~if a permit is not otherwise required for the emission unit with which the safety device is associated;

l) Storage tanks and fuel dispensing equipment that are both used ~~for the dispensing of~~to dispense fuel to mobile sources, including on-road and off-road vehicles, for use in such mobile sources;

m) Printing operations with aggregate organic solvent usage that never exceeds 2,839 l (750 gal) per year from all printing lines at the source, including organic solvent from inks, ~~dilutents~~diluents, fountain solutions, and cleaning materials;

n) Storage tanks of:

1) Organic liquids with a capacity of less than 37,850 l (10,000 gal), ~~provided~~ if the storage tank is not used to store any amount of material or mixture of any material listed as a hazardous air pollutant ~~pursuant to~~under section 112(b) of the ~~Clean Air Act~~CAA;

2) Any size containing exclusively soaps, detergents, surfactants, waxes, glycerin, vegetable oils, greases, animal fats, sweetener, corn syrup, aqueous salt solutions, or aqueous caustic solutions, ~~provided~~ if an organic solvent has not been mixed with ~~such~~ the materials; or

3) Any size containing virgin or re-refined distillate oil (including kerosene and diesel fuel), hydrocarbon condensate from natural gas pipeline or storage systems, lubricating oil, or residual fuel oils;

o) Threaded pipe connections, vessel manways, flanges, valves, pump seals, pressure relief valves, pressure relief devices, and pumps;

p) Sampling connections used exclusively to withdraw materials for testing and analyses;

q) All storage tanks of Illinois crude oil with capacity of less than 151,400 1 (40,000 gal) located on oil field sites;

r) All organic material-water single or multiple compartment effluent water separator facilities for Illinois crude oil of vapor pressure of less than 34.5 kPa absolute (5 psia);

s) Grain-handling operations, exclusive of grain-drying operations, with an annual grain through-put not exceeding 300,000 bushels;

t) Grain-drying operations with a total grain-drying capacity not exceeding 750 bushels per hour for 5% moisture extraction at manufacturer's rated capacity, using the American Society of Agricultural Engineers Standard 248.2, Section 9, Basis for Stating Drying Capacity of Batch and Continuous-Flow Grain Dryers, incorporated by reference at Section 201.104(b);

u) Portable grain-handling equipment and one-turn storage space;

v) Cold cleaning degreasers that are not in-line cleaning machines, where the vapor pressure of the solvents used never exceeds 2 kPa (15 mmHg or 0.3 psi) measured at ~~38°C~~38 ºC (100ºF)(100 ºF) or 0.7 kPa (5 mmHg or 0.1 psi) at ~~20°C~~20 ºC ~~(68°F)~~(68 ºF);

w) Coin-operated dry cleaning operations;

x) Dry cleaning operations at a source that consume less than 30 gallons per month of perchloroethylene;

y) Brazing, soldering, wave soldering, or welding equipment, including associated ventilation hoods;

z) Cafeterias, kitchens, and other similar facilities, including smokehouses, used for preparing food or beverages, but not including facilities used in the manufacturing and wholesale distribution of food, beverages, food or beverage products, or food or beverage components;

aa) Equipment for carving, cutting, routing, turning, drilling, machining, sawing, surface grinding, sanding, planing, buffing, sand blast cleaning, shot blasting, shot peening, or polishing ceramic artwork, leather, metals (other than beryllium), plastics, concrete, rubber, paper stock, wood, or wood products, where ~~such~~ this equipment is either:

1) Used for maintenance activity;

2) Manually operated;

3) Exhausted inside a building; or

4) Vented externally with emissions controlled by an appropriately operated cyclonic inertial separator (cyclone), filter, ~~electro-static precipitor~~electrostatic precipitator, or a scrubber;

bb) Feed mills that produce no more than 10,000 tons of feed per calendar year, ~~provided that~~if a permit is not otherwise required for the source ~~pursuant to~~under Section 201.142, 201.143, or 201.144;

cc) Extruders used for the extrusion of metals, minerals, plastics, rubber, or wood, excluding:

1) Extruders used in the manufacture of polymers;

2) Extruders using foaming agents or release agents that contain volatile organic materials or Class I or II substances subject to ~~the requirements of~~ Title VI of the ~~Clean Air Act~~CAA; and

3) Extruders processing scrap material that was produced using foaming agents containing volatile organic materials or Class I or II substances subject to ~~the requirements of~~ Title VI of the ~~Clean Air Act~~CAA;

dd) Furnaces used for melting metals, other than beryllium, with a brim full capacity of less than 450 cubic inches by volume;

ee) Equipment used for the melting or application of less than 22,767 kg/yr (50,000 lbs/yr) of wax to which no organic solvent has been added;

ff) Equipment used for filling drums, pails, or other packaging containers, excluding aerosol cans, with soaps, detergents, surfactants, lubricating oils, waxes, vegetable oils, greases, animal fats, glycerin, sweeteners, corn syrup, aqueous salt solutions, or aqueous caustic solutions, ~~provided~~ if an organic solvent has not been mixed with ~~such~~ the materials;

gg) Loading and unloading systems for railcars, tank trucks, or watercraft that handle only the following liquid materials: soaps, detergents, surfactants, lubricating oils, waxes, glycerin, vegetable oils, greases, animal fats, sweetener, corn syrup, aqueous salt solutions, or aqueous caustic solutions, ~~provided~~ if an organic solvent has not been mixed with such materials;

hh) Equipment used for the mixing and blending of materials at ambient temperatures to make ~~water based~~water-based adhesives, ~~provided~~ if each material mixed or blended contains less than 5% organic solvent by weight;

ii) Die casting machines where a metal or plastic is formed under pressure in a die located at a source with a through-put of less than 2,000,000 lbs of metal or plastic per year, in the aggregate, from all die casting machines;

jj) Air pollution control devices used exclusively with other equipment that is exempt from permitting~~, as provided in~~ under this Section;

kk) (Reserved);

ll) Photographic process equipment by which an image is reproduced upon material sensitized to radiant energy;

mm) Equipment used for hydraulic or hydrostatic testing;

nn) General vehicle maintenance and servicing activities conducted at a source, motor vehicle repair shops, and motor vehicle body shops, but not including motor vehicle refinishing;

oo) Equipment using water, water and soap, or detergent, or a suspension of abrasives in water for purposes of cleaning or finishing, ~~provided~~ if no organic solvent has been added to the water;

pp) Administrative activities including~~, but not limited to,~~ paper shredding, copying, photographic activities, and blueprinting machines. This does not include

incinerators;

qq) Laundry dryers, extractors, and tumblers processing that have been cleaned with water solutions of bleach or detergents that are:

1) Located at a source and process clothing, bedding, and other fabric items used at the source, ~~provided that~~if any organic solvent present in ~~such~~ the items before processing that is retained from cleanup operations ~~shall~~ must be addressed as part of the VOM emissions from use of cleaning materials;

2) Located at a commercial laundry; or

3) Coin operated;

rr) Housekeeping activities for cleaning purposes, including collecting spilled and accumulated materials~~, including operation of~~ and operating fixed vacuum cleaning systems specifically for ~~such~~ these purposes, but not including use of cleaning materials that contain organic solvent;

ss) Refrigeration systems, including storage tanks used in refrigeration systems, but excluding any combustion equipment associated with ~~such~~ these systems;

tt) Activities associated with the construction, on-site repair, maintenance, or dismantlement of buildings, utility lines, pipelines, wells, excavations, earthworks, and other structures that do not constitute emission units;

uu) Piping and storage systems for natural gas, propane, and liquefied petroleum gas;

vv) Water treatment or storage systems, as follows:

1) Systems for potable water or boiler feedwater;

2) Systems, including cooling towers, for process water, ~~provided that such~~if this water has not been in direct or indirect contact with process streams that contain volatile organic material or materials listed as hazardous air pollutants ~~pursuant to~~under section 112(b) of the ~~Clean Air Act~~CAA;

ww) Lawn care, landscape maintenance, and grounds keeping activities;

xx) Containers, reservoirs, or tanks used exclusively in dipping operations to coat objects with oils, waxes, or greases, ~~provided~~ if no organic solvent has been mixed with ~~such~~ these materials;

yy) Use of consumer products, including hazardous substances as that term is defined in the Federal Hazardous Substances Act (15 USC 1261 et seq.), where the

product is used at a source in the same manner as normal consumer use;

zz) Activities directly used in the diagnosis and treatment of disease, injury, or other medical condition;

aaa) Activities associated with the construction, repair, or maintenance of roads or other paved or open areas, including operation of street sweepers, vacuum trucks, spray trucks, and other vehicles related to the control of fugitive emissions of such roads or other areas;

bbb) Storage and handling of drums or other transportable containers, where the containers are sealed during storage and handling;

ccc) Activities at a source associated with the maintenance, repair, or dismantlement of an emission unit or other equipment installed at the source, not including the shutdown of the unit or equipment, including preparation for maintenance, repair, or dismantlement, and preparation for subsequent startup, including preparation of a shutdown vessel for entry, replacement of insulation, welding and cutting, and steam purging of a vessel prior to startup;

ddd) Equipment used for corona arc discharge surface treatment of plastic with a power rating of 5 kW or less or equipped with an ozone destruction device;

eee) Equipment used to seal or cut plastic bags for commercial, industrial, or domestic use;

fff) Each direct-fired gas dryer used for a washing, cleaning, coating, or printing line, excluding:

1) Dryers with a rated heat input capacity of 2930 kW (10 MMbtu/hr) or more; and

2) Dryers for which emissions other than those attributable to combustion of fuel in the dryer, including emissions attributable to use or application of cleaning agents, washing materials, coatings, or inks or other process materials that contain volatile organic material are not addressed as part of the permitting of ~~such~~ the line, if a permit is otherwise required for the line;

ggg) Municipal solid waste landfills with a maximum total design capacity of less than 2.5 million Mg or 2.5 million m^3 that are not required to install a gas collection and control system ~~pursuant to~~under 35 Ill. Adm. Code 220 or 800 through 849 or Section 9.1 of the Act;

hhh) Replacement or addition of air pollution control equipment for existing emission units in circumstances where:

1) The existing emission unit is permitted and has operated in compliance for the past year;

2) The new control equipment will provide equal or better control of the target pollutants;

3) The new control device will not be accompanied by a net increase in emissions of any non-targeted criteria air pollutant;

4) Different State or federal regulatory requirements or newly proposed regulatory requirements will not apply to the unit; and

BOARD NOTE: All sources must comply with underlying federal regulations and future State regulations.

5) Where the existing air pollution control equipment had required monitoring equipment, the new air pollution control equipment will be equipped with the instrumentation and monitoring devices that are typically installed on the new equipment of that type.

BOARD NOTE: For major sources subject to Section 39.5 of the Act, where the new air pollution control equipment will require a different compliance determination method in the facility's CAAPP permit, the facility may need a permit modification to address the changed compliance determination method;

iii) Replacement, addition, or modification of emission units at facilities with federally enforceable State operating permits limiting their potential to emit in circumstances where:

1) The potential to emit any regulated air pollutant in the absence of air pollution control equipment from the new emission unit, or the increase in the potential to emit resulting from the modification of any existing emission unit, is less than 0.1 pound per hour or 0.44 tons per year;

2) The raw materials and fuels used or present in the emission unit that cause or contribute to emissions, based on the information contained in Material Safety Data Sheets for those materials, do not contain equal to or greater than 0.01 percent by weight of any hazardous air pollutant as defined under section 112(b) of the ~~federal Clean Air Act~~CAA;

3) The emission unit or modification is not subject to an emission standard or other regulatory requirement ~~pursuant to~~under section 111 of the ~~federal Clean Air Act~~CAA;

4) Potential emissions of regulated air pollutants from the emission unit or modification will not, in combination with emissions from existing units or other proposed units, trigger permitting requirements under Section 39.5, ~~permitting requirements under~~ section 165 or 173 of the ~~federal Clean Air Act~~CAA, or the requirement to obtain a revised federally enforceable State operating permit limiting the source's potential to emit; and

5) The source is not currently the subject of a Non-compliance Advisory, ~~Clean Air Act~~CAA Section 114 Request, Violation Notice, Notice of Violation, Compliance Commitment Agreement, Administrative Order, or civil or criminal enforcement action~~,~~ related to the air emissions of the source;

jjj) Replacement, addition, or modification of emission units at permitted sources that are not major sources subject to Section 39.5 of the Act and that do not have a federally enforceable State operating permit limiting their potential to emit, in circumstances where:

1) The potential to emit of any regulated air pollutant in the absence of air pollution control equipment from the new emission unit, or the increase in the potential to emit resulting from the modification of any existing emission unit is either:

A) Less than 0.1 pound per hour or 0.44 tons per year; or

B) Less than 0.5 pound per hour, and the permittee provides prior notification to the Agency of the intent to construct or install the unit. The unit may be constructed, installed, or modified immediately after the notification is filed;

2) The emission unit or modification is not subject to an emission standard or other regulatory requirement under section 111 or 112 of the ~~federal Clean Air Act~~CAA;

3) Potential emissions of regulated air pollutants from the emission unit or modification will not, in combination with the emissions from existing units or other proposed units, trigger permitting requirements under Section 39.5 of the Act or the requirement to obtain a federally enforceable permit limiting the source's potential to emit; and

4) The source is not currently the subject of a Non-compliance Advisory, ~~Clean Air Act~~CAA Section 114 Request, Violation Notice, Notice of Violation, Compliance Commitment Agreement, Administrative Order, or civil or criminal enforcement action, related to the air emissions of the source;

kkk) The owner or operator of a CAAPP source is not required to obtain an air pollution control construction permit for the construction or modification of an emission unit or activity that is an insignificant activity ~~as addressed by~~under Section 201.210 or 201.211 ~~of this Part~~. The owner or operator must still follow Section 201.212 ~~of this Part must still be followed~~, as applicable. Other than excusing the owner or operator of a CAAPP source from the requirement to obtain an air pollution control construction permit for the emission units or activities, nothing in this subsection ~~shall~~ must alter or affect the liability of the CAAPP source for compliance with emission standards and other requirements that apply to the emission units or activities, either individually or in conjunction with other emission units or activities constructed, modified, or located at the source;

lll) Plastic injection molding equipment with an annual through-put not exceeding 5,000 tons of plastic resin in the aggregate from all plastic injection molding equipment at the source, and all associated plastic resin loading, unloading, conveying, mixing, storage, grinding, and drying equipment and associated mold release and mold cleaning agents.

mmm) Sources required to comply with Section 210.175 (Registration of Smaller Sources (ROSS)).

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.147 Former Permits (Repealed)

~~Any permit issued by the Agency, or any predecessor, is subject to the requirements of Sections 201.121, 201.142 through 201.146 and Subparts D through F, and shall be revised or revoked as necessary to conform to this Chapter.~~

(Repealed at 48 Ill. Reg._____, effective _____)

Section 201.148 Operation Without Compliance Program and Project Completion Schedule

a) ~~No~~ A person ~~shall~~ must not cause or allow the operation of an emission source which is not in compliance with ~~the requirements of~~ 35 Ill. Adm. Code 215 unless ~~such~~ the person is in compliance with a compliance program ~~as provided for in~~under Subpart H and ~~in~~ the applicable provisions of 35 Ill. Adm. Code 215.

b) Any compliance plan or project completion schedule, where applicable, ~~shall~~ must be a binding condition of the operating permit for the source.

(Source: Amended at 48 Ill. Reg. _____, effective _____).

Section 201.149 Operation During Malfunction, Breakdown or Startups

A person must not cause or allow the continued operation of an emission source during malfunction or breakdown of the emission source or related air pollution control equipment if ~~such~~ that operation would cause a violation of the applicable standards or limitations ~~stated~~ in Subchapter c except as specifically provided for by ~~such~~ the standard or limitation. A person must not cause or allow violation of the applicable standards or limitations ~~stated~~ in Subchapter c during startup except as specifically provided for by ~~such~~ the standard or limitation.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.150 Circumvention

Except as provided in 35 Ill. Adm. Code 212.207, 214.162, and 214.182 through 214.185, and except as further provided by Section 201.151, ~~no~~ a person ~~shall~~ must not cause or allow the construction or operation of any device or any means, including the creation or use of any corporations or other business entities having interlocking directorships or substantially identical ownerships which, without resulting in a reduction in the total amount of any air contaminant emitted, conceals, dilutes, or permits air contaminant emissions which would otherwise violate these regulations.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.151 Design of Effluent Exhaust Systems

a) ~~No~~ A person ~~shall~~ must not cause or allow the operation of an emission source or ~~of~~ air pollution control equipment without providing one or more stacks or vents ~~that are~~ designed to prevent the concentration of any air contaminant from:

1) Exceeding any applicable ambient air quality standard, either alone or in combination with air contaminants from other sources; or,

2) Causing or tending to cause air pollution, either alone or in combination with air contaminants from other sources; or,

3) Exceeding the emission standards and limitations of subchapter (c) ~~of this Chapter~~.

b) Exception. This rule ~~shall~~ must not apply to emission sources~~,~~ such as stock piles of particulate matter which, because of the disperse nature of ~~such~~ the emission sources, cannot reasonably be expected to be emitted through a stack.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART D: PERMIT APPLICATIONS AND REVIEW PROCESS

Section 201.152 Contents of Application for Construction Permit

a) An application for a construction permit ~~shall~~ must contain, ~~as~~ at a minimum, the following ~~data and information~~:

1) the nature of the emission unit and air pollution control equipment, including the expected life and deterioration rate;

2) information concerning processes to which the emission unit or air pollution control equipment is related;

3) the quantities and types of raw materials to be used in the emission unit or air pollution control equipment;

4) the nature, specific points of emission, and quantities of uncontrolled and controlled air contaminant emissions at the source that includes the emission unit or air pollution control equipment;

5) the type, size, efficiency, and specifications (including engineering drawings, plans, and specifications certified ~~to~~ by a registered Illinois professional engineer) of the proposed emission unit or air pollution control equipment; and

6) maps, statistics, and other data reasonably sufficient to describe the location of the emission unit or air pollution control equipment.

b) The Agency may waive the submission by the applicant of ~~such~~ engineering drawings, plans, specifications, or ~~such~~ other portions of the above data or information ~~as it shall deem~~it deems inappropriate or unnecessary to the construction permit application.

~~a)~~c) The Agency may adopt procedures that require data and information in addition to ~~and in amplification of the matters specified in the first sentence of this Section,~~that required by subsection (a) that are reasonably designed to determine compliance with this Chapter and ambient air quality standards, or that set forth the format by which all data and information ~~shall~~ must be submitted.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.153 Incomplete Applications (Repealed)

(Source: Repealed at 22 Ill. Reg. 11451, effective June 23, 1998)

Section 201.154 Signatures (Repealed)

(Source: Repealed at 22 Ill. Reg. 11451, effective June 23, 1998)

Section 201.155 Standards for Issuance (Repealed)

(Source: Repealed at 22 Ill. Reg. 11451, effective June 23, 1998)

Section 201.156 Conditions

The Agency may impose ~~such~~ in a construction permit conditions ~~in a construction permit as may be~~ necessary to accomplish the purposes of the Act, and ~~as~~ that are not inconsistent with the regulations promulgated by the Board ~~thereunder~~under the Act. Except as ~~herein~~ specified in it, nothing in this Chapter ~~shall~~ must be deemed to limit the power of the Agency ~~in this regard~~to impose conditions. ~~Such~~ These conditions may include conditions specifying any testing operations that may be conducted under the construction permit.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.157 Contents of Application for Operating Permit

a) An application for an operating permit must contain the data and information specified in Section 201.152. Each application must list all individual emission units and air pollution equipment for which a permit is sought. Any applicant may seek to obtain from the Agency a permit for each emission unit, or such emission units as are similar in design or principle of operation or function, or for all emission units encompassed in an identifiable operating unit, unless subject to the provisions of Section 201.169 ~~of this Subpart~~ or required to obtain an operating permit with federal enforceable conditions in compliance with Section 39.5 of the Act.

b) To the extent that the ~~above specified~~ data and information ~~has~~ in subsection (a) have previously been submitted to the Agency in compliance with this Subpart, the data and information need not be resubmitted, but the applicant must certify that the data and information previously submitted ~~remains~~ remain true, correct, and current.

~~a)~~c) An application for an operating permit must contain a description of the startup procedure for each emission unit, the duration and frequency of startups, the types and quantities of emissions during startup, and the applicant's efforts to minimize any such startup emissions, duration of individual startups, and frequency of startups.

~~b)~~d) The Agency may adopt procedures that require data and information in addition to ~~and in amplification of the matters specified in the first sentence of this Section,~~that required under subsection (a) that are reasonably designed to determine compliance with this Chapter~~,~~ and ambient air quality standards, and that specify the format by which all data and information must be submitted.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.158 Incomplete Applications

An application ~~shall~~ must not be deemed to be filed until the applicant has submitted all information and completed application forms required by Section 201.152 or 201.157 ~~of this Subpart~~, whichever is applicable, and procedures adopted and effective ~~pursuant hereto~~under them. ~~Provided, however, that if~~However, if the Agency fails to notify the applicant within 30 days after the filing of a purported application that the application is incomplete and ~~of~~ the reasons the Agency deems it incomplete, the application ~~shall~~ must be deemed to have been filed as of the date of ~~such~~ the purported filing. The applicant may treat the Agency's notification that an application is incomplete as a denial of the application for purposes of review~~, pursuant to~~ under Section 40 of the Act [415 ILCS 5/40].

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.159 Signatures

All applications and supplements ~~thereto shall~~ to them must be signed by the owner and operator of the source~~,~~ or their authorized agent~~,~~ and ~~shall~~ must be accompanied by evidence of authority to sign the application.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.160 Standards for Issuance

a) ~~No~~ A construction permit ~~shall~~ must not be granted unless the applicant submits proof to the Agency that:

1) The emission unit or air pollution control equipment will be constructed or modified to operate so as not to cause a violation of the Act or of this Chapter; and

2) If subject to a future compliance date, the applicant has an approved compliance program and project completion schedule in ~~accordance~~ compliance with ~~the provisions of~~ Subpart H ~~of this Part~~

b) ~~No~~ An operating permit ~~shall~~ must not be granted unless the applicant submits proof to the Agency that:

1) The emission unit or air pollution control equipment has been constructed or modified to operate so as not to cause a violation of the Act or of this Chapter, or has been granted a variance ~~therefrom~~ from them by the Board and is in full compliance with ~~such~~ the variance; and

2) The emission unit or air pollution control equipment has been constructed

or modified in ~~accordance~~ compliance with all conditions in the construction permit, where applicable; and

3) The emission unit or air pollution control equipment has been shown by tests in ~~accordance~~ compliance with ~~the provisions of~~ Subpart J ~~of this Part~~, applicable regulations, and permit conditions to operate in ~~accordance~~ compliance with the emission limitations ~~set forth~~ in this Chapter, provided that the Agency may waive the requirement for actual tests where sufficient standard testing information is available; and

4) The applicant has taken all technically feasible measures, including changes in work rules, to minimize the duration and frequency of startups and to reduce the quantity of emissions during startup; and

5) If subject to a future compliance date, the applicant has an approved compliance program and project completion schedule in ~~accordance~~ compliance with ~~the provisions of~~ Subpart H ~~of this Subpart~~; and

6) If required, the applicant has an approved episode action plan in effect in ~~accordance~~ compliance with ~~the provisions of~~ 35 Ill. Adm. Code 244.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.161 Conditions

The Agency may impose ~~such~~ conditions in an operating permit ~~as may be~~ necessary to accomplish the purposes of the Act~~,~~ and ~~as are~~ not inconsistent with the regulations promulgated by the Board ~~thereunder~~under it. Except as ~~herein~~ specified in this section, nothing in this Chapter ~~shall~~ must be deemed to limit the power of the Agency in this regard. When deemed appropriate as a condition to the issuance of an operating permit, the Agency may require that the permittee adequately maintain the air pollution control equipment covered by the permit. To assure that ~~such~~ a maintenance program is planned, the Agency may require that the permittee have a maintenance program and keep ~~such~~ maintenance records ~~as are~~ necessary to demonstrate compliance with this rule~~; provided, however,~~. However, the Agency ~~shall~~ must not have the authority to approve the maintenance programs required ~~thereunder~~under this section.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.162 Duration

a) ~~No~~ An operating permit ~~shall~~ must not be valid longer than ten years or ~~such~~ a shorter period as the Agency may specify in the operating permit as necessary to accomplish the purposes of the Act and this Chapter, unless the source is subject to:

1) Section 201.169 ~~of this Subpart~~; or

2) Section 39.5 of the Act, except for sources exempt ~~pursuant to~~under Section 39.5(1.1).

b) Applications for renewal of an operating permit ~~shall~~ must be submitted to the Agency at least 90 days ~~prior to the expiration of~~before the prior permit expires and ~~shall~~ must conform to Sections 201.157, 201.158, and 201.159. The standards for issuance of renewal of operating permits ~~shall be as set forth~~must be those in Section 201.160.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.163 Joint Construction and Operating Permits

~~In cases where~~When the Agency determines that an emission unit or air pollution control equipment is sufficiently standard ~~so as~~ to obviate the need for separate construction and operating permits, the Agency may issue a joint construction and operating permit. The Agency may adopt procedures that~~:~~ set forth the circumstances under which joint construction and operating permits may be issued; require data and information designed to determine compliance with this Chapter~~,~~ and ambient air quality standards; and set forth the format by which all data and information ~~shall~~ must be submitted. The standards for issuance of joint construction and operating permits ~~shall~~ must be ~~as set forth~~those in Section 201.160. Except as ~~herein~~ provided in this section, nothing in this Chapter ~~shall~~ must be deemed to limit the power of the Agency in this regard. The term "operating permit" as used elsewhere in this Chapter ~~shall~~ must be deemed to include a joint construction and operating permit.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.164 Design Criteria (Repealed)

~~a) The Agency may adopt procedures that set forth criteria for the design, operation or maintenance of emission units and air pollution control equipment. These procedures shall be revised from time to time to reflect current engineering judgment and advances in the state of the art.~~

~~b) Before adopting new criteria or making substantive changes to any criteria adopted by the Agency, the Agency shall:~~

~~1) Publish a summary of the proposed changes in the Environmental Register or a comparable publication at the Agency's expense; and~~

~~2) Provide a copy of the full text of the proposed changes to any person who in writing so requests; and~~

~~3) Defer adoption of the changes for 45 days from the date of publication to allow submission and consideration of written comments on the proposed~~

~~changes.~~

(Source: Repealed at 48 Ill. Reg. _____, effective _____)

Section 201.165 Hearings

a) The Agency may conduct hearings~~, prior to~~ before issuing a permit ~~pursuant to~~under this Chapter~~,~~ to determine whether an applicant has submitted proof that the emission source or air pollution control equipment is or will be in compliance with every rule of this Chapter.

b) The Agency ~~shall~~ must adopt procedural regulations for ~~the conduct of such~~conducting these hearings.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.166 Revocation

Violation of any of the conditions of a permit, or the failure to comply with any rule or regulation of this Chapter, ~~shall~~ must be grounds for revocation of the permit, ~~as well as~~and for other sanctions provided in the Act. ~~Such~~ These sanctions ~~shall~~ must be sought by filing a complaint with the Board.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.167 Revisions to Permits

The Agency may revise any permit issued ~~pursuant to~~under Subpart D or any condition contained in ~~such~~ the permit~~, as follows~~:

a) Upon reapplication by the permittee; or

b) Upon the revision of the Act or this Chapter.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.168 Appeals from Conditions

An applicant may consider any condition imposed by the Agency in a permit as a refusal by the Agency to grant a permit, which ~~shall entitle~~entitles the applicant to appeal the Agency's decision to the Board ~~pursuant to~~under Section 40 of the Act [415 ILCS 5/40].

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.169 Special Provisions for Certain Operating Permits

a) Applicability~~:~~

1) Operating permits issued ~~pursuant to~~under Section 39 of the Act for sources of air pollution that are not subject to ~~the requirements of~~ Section 39.5 of the Act and are not required to have a federally enforceable State operating permit are subject to ~~the provisions of~~ this Section.

2) This Section only applies to sources that meet the requirements of subsection (a)(1) ~~above~~ and whose permit has not expired ~~pursuant to~~under a renewal request under subsection (b)(2) ~~of this Section~~. If this Section no longer applies to a source and its permit has not expired ~~pursuant to~~under a renewal request under subsection (b)(2) ~~of this Section~~, the terms and conditions of the permit ~~shall~~ must remain in effect until the permit is superseded by a new or revised permit or is withdrawn.

3) Nothing in this Subpart ~~shall~~ must be construed as exempting persons with permits issued ~~pursuant to~~under this Section from ~~the requirements of~~ Section 201.142 ~~of this Part~~ requiring a construction permit or from review under Part 203 procedures for new and modified emission units.

b) Expiration and Renewal~~:~~

1) The Agency may request the renewal of an operating permit subject to this Section for reasons including~~, but not limited to,~~ a change in the requirements applicable to the source; an indication that the information on the source's application is inaccurate; or information that the source may not be in compliance with the Act, a Board regulation, or an existing permit condition.

2) Notwithstanding Section 201.162 ~~of this Subpart~~, an operating permit subject to this Section ~~shall~~ must expire 180 days after the Agency sends a written request for renewal of the permit. A permit ~~shall~~ must terminate if it is withdrawn upon written request by the permittee or is superseded by a revised permit issued for the source.

3) In its request for renewal pursuant to subsection (b)(2) ~~above~~, the Agency may include a request for any supplemental information that the Agency may need to determine the continued applicability of this Section or the ability of the source to comply with any requirement.

4) An owner or operator may appeal to the Board only a final determination by the Agency to deny a permit or to include conditions as provided by Section 40 of the Act and Section 201.168 ~~of this Subpart~~, or a determination that a permit application is incomplete based upon insufficiencies such as~~, but not limited to,~~ a failure to submit information requested under subsection (b)(3) ~~above~~ or Section 201.158 ~~of this~~

~~Subpart~~.

c) Requirement for a Revised Permit~~:~~

1) Persons with operating permits subject to this Section must obtain a revised permit ~~prior to~~before any of the following changes at the source:

A) An increase in emissions above the amount the emission unit or the source is permitted to emit; or

B) A modification; or

C) A change in operations that will result in the source's noncompliance with a condition in the existing permit; or

D) A change in ownership, company name, or address, so that the application or existing permit is no longer accurate.

2) If changes in the source's emission units or control equipment remove a source from the applicability of this Section, an owner or operator ~~shall~~ must apply for a construction permit under Section 201.152 ~~of this Subpart~~, if applicable, and either a federally enforceable State operating permit or a ~~Clean Air Act Permit Program (~~CAAPP~~)~~ permit ~~pursuant to~~under Section 39.5 of the Act.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.170 Portable Emission Units

a) An emission unit is portable ~~provided that~~if the emission unit meets the following criteria.

1) Emissions from the emission unit are expected to occur for less than one year at any one site.

2) The emission unit of air pollution is subject to ~~the requirements of~~ Section 201.169 ~~of this Subpart~~.

3) The emission unit or group of emission units that will be changing sites is permitted to emit less than 25 tons per year of any combination of regulated air pollutants.

4) The emission unit is mounted on a chassis or skids and is designed to be moveable.

5) The emission unit is not used as a thermal desorption system ~~pursuant to~~under 35 Ill. Adm. Code 728.Table F or as an incinerator system.

b) An owner or operator of a portable emission unit meeting the requirements of subsection (a) ~~of this Section~~ may change the site of the unit without obtaining a new construction or operating permit ~~pursuant to~~under Section 201.142, 201.143, or 201.169 ~~of this Part, provided that~~if the owner or operator meets the following requirements:

1) The owner or operator has obtained a construction and operating permit containing special conditions as required by subsection (c) ~~of this Section~~ for the emission unit, or is exempt ~~pursuant to~~under subsection (d) ~~of this Section~~.

2) If a permit issued ~~pursuant to~~under subsection (c) ~~of this Section~~ includes more than one emission unit, the owner or operator ~~shall~~ must move all emission units covered by the permit to the new site.

3) The owner or operator does not locate the emission unit on a site with a source:

A) That is subject to ~~the requirements of~~ Section 39.5 of the Act; or

B) That would become subject to ~~the requirements of~~ Section 39.5 of the Act if the emissions of all regulated pollutants from the portable emission unit were included in such source's potential to emit.

4) The owner or operator does not modify the operation of the emission unit ~~in such a way so as~~ to:

A) Make the emission unit subject to New Source Review (NSR) requirements ~~pursuant to~~under 35 Ill. Adm. Code 203 or ~~to~~ Prevention of Significant Deterioration (PSD) ~~pursuant to~~under Section 9.1(a) of the Act; or

B) Make the emission unit a support facility of a source that is subject to Section 39.5 of the Act.

5) At least three days ~~prior to~~before moving the emission unit to a new site, the owner or operator ~~shall~~ must notify the Agency by certified mail. The notification ~~shall~~ must include the items ~~listed~~ in this subsection (b)(5), unless the emission unit is exempt ~~pursuant to~~under subsection (d) ~~of this Section~~:

A) The location of the new site;

B) The estimated emissions of all regulated air pollutants while located at the new site; and

C) That the operation for the emission unit will be consistent with its construction and operating permits.

6) The owner or operator ~~shall~~ must keep a copy of the construction and operating permits for that emission unit on the site where the emission unit is in operation.

c) Permit Requirements~~.~~

1) The owner or operator of an emission unit must obtain a new or amended construction and operating permit containing special conditions for changing the site of the portable emission unit ~~pursuant to the requirements of~~under Sections 201.142, 201.143, and 201.169 ~~of this Subpart prior to~~before an initial change in site of an emission unit. The permit application, in addition to the information required ~~pursuant to~~under Section 201.152, 201.157, and 201.169 ~~of this Part~~, must contain the following information:

A) The initial site of the emission unit;

B) A permanent address where correspondence may be sent to the owner or operator; and

C) The permanent site of any required operating records.

2) If the portable emission unit has a permit ~~pursuant to~~under this subsection (c)~~,~~ but has not changed sites within the prior twelve months at least once, the owner or operator ~~shall~~ must obtain a revised permit ~~prior to~~before changing the site of the emission unit.

d) The owner or operator of a portable emission unit that is included in more than one operating permit and meets the requirements of subsections (a)(2) through (a)(5), (b)(3), (b)(4), and (b)(6) ~~of this Section~~ may change the site of the unit without obtaining a new construction or operating permit ~~pursuant to~~under Section 201.142, 201.143, or 201.169 ~~of this Part~~ when the unit is moved to a site covered by the permit.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.175 Registration of Smaller Sources (ROSS)

a) An owner or operator of an eligible source ~~shall~~ must annually register with the Agency instead of complying with the requirement to obtain an air pollution construction or operating permit under the Act or complying with a permit issued under Section 201.169. The owner and operator of a ROSS source are still subject to all applicable environmental statutes and regulations. The source must meet all of the following criteria to be an eligible source:

1) ~~pursuant to~~under Section 9.14 of the Act:

A) *The source must not be required to obtain a permit pursuant to the Clean Air Act Permit Program, or federally enforceable State operating permit program, or under regulations promulgated pursuant to Section 111 or 112 of the Clean Air Act;*

B) *USEPA has not otherwise determined that a permit is required;*

C) *The source emits less than an actual 5 tons per year of combined particulate matter, carbon monoxide, nitrogen oxides, sulfur dioxide, and volatile organic material air pollutant emissions;*

D) *The source emits less than an actual 0.5 tons per year of combined hazardous air pollutant emissions;*

E) *The source emits less than an actual 0.05 tons per year of lead air emissions;*

F) *The source emits less than an actual 0.05 tons per year of mercury air emissions; and*

G) *The source does not have an emission unit* or source *subject to a standard pursuant to 40 CFR 61 (Maximum Achievable Control Technology) or 40 CFR 63 (National Emissions Standards for Hazardous Air Pollutants), other than those regulations that USEPA has categorized as "area source."*

2) Emission units at the source are not used as thermal desorption systems ~~pursuant to~~under 35 Adm. Code 728.Table F or as incinerator systems.

3) The source or its emission units must not be subject to local siting under Section 39.2 of the Act.

b) For the purposes of determining whether the actual emissions from the source meet the criteria of subsections (a)(1)(C), (a)(1)(D), (a)(1)(E), and (a)(1)(F) ~~of this Section~~, the owner or operator of a source ~~shall~~ must only use emissions from units that are not exempt from the requirement to obtain a permit ~~pursuant to~~under Section 201.146, as follows:

1) Initial registration or reentry into ROSS: the owner or operator must sum the actual emissions from all units associated with the source for the prior calendar year. If the source is new, or has been operating less than one calendar year, projected estimated emissions may be used for all of the remaining months in the prior calendar year, respectively.

2) Annual renewal of registration:

A) For the purposes of determining compliance with subsection (a)(1)(C) ~~of this Section~~, the owner or operator must:

i) Verify that the source still meets the eligibility criteria in subsection (a)(1)(C); or

ii) Calculate emissions by summing all actual emissions of combined particulate matter, carbon monoxide, nitrogen oxides, sulfur dioxide, and volatile organic material air pollutant emissions from all units associated with the source for the prior calendar year. The total sum of actual emissions of combined particulate matter, carbon monoxide, nitrogen oxides, sulfur dioxide, and volatile organic material air pollutant emissions for the prior calendar year must be less than or equal to 7 tons, or the total sum of actual emissions of combined particulate matter, carbon monoxide, nitrogen oxides, sulfur dioxide, and volatile organic material air pollutant emissions from the prior two calendar years must be less than or equal to 10 tons.

B) For the purposes of determining compliance with subsections (a)(1)(D), (a)(1)(E), and (a)(1)(F) ~~of this Section~~, the owner or operator must:

i) Verify that the source still meets the eligibility criteria in subsections (a)(1)(D), (a)(1)(E), and (a)(1)(F) ~~of this Section~~; or

ii) Calculate emissions by summing all actual emissions from all units at the source for the prior calendar year. Summed emissions of HAPs, mercury, or lead must be less than or equal to 0.5 tons per year, 0.05 tons per year, or 0.05 tons per year, for the prior calendar year, respectively.

c) The following must be included in each initial registration and each re-entry registration:

1) The name, address, and telephone number of the source and of the person responsible for submitting and retaining copies of the registration information and the records;

2) A statement that the source meets the requirements of this Section;

3) A certification that the information submitted in subsections (c)(1) and (c)(2) of this Section is correct or a correction of the information; and

4) The applicable fee pursuant to Section 9.14 of the Act.

d) The owner or operator of an eligible source ~~shall~~ must submit the registration required by subsection (c) ~~of this Section~~ as follows:

1) Initial registration:

A) The owner or operator of a source holding a permit may register after the effective date of this Section and no later than their annual fee payment date in fiscal year 2013 (July 1, 2012, through June 30, 2013). The terms and conditions of a permit issued ~~pursuant to~~under Section 201.169 do not apply during the period the source is registered. The owner and operator of a ROSS source are still subject to all applicable environmental statutes and regulations.

B) The owner or operator of an operating source not holding a permit ~~shall~~ must register no later than July 1, 2012.

C) The owner or operator of a new source ~~shall~~ must register at least 10 days before commencing construction or operation and may commence construction or operation 10 days after submittal to the Agency.

2) Annual registration. The owner or operator of a ROSS source must pay an annual fee on or before their annual fee payment date. Annual payment of the fee is verification by the owner or operator that the source continues to meet the criteria in subsection (a), as determined by subsection (b)(2), as applicable.

3) Re-entry into ROSS under subsection (h). The owner or operator of a source that re-enters ROSS based on the criteria in subsection (a), as determined by subsection (b)(1), must register and pay an annual fee on or before their annual fee payment date.

e) The owner or operator ~~shall~~ must keep the following records and make them available for inspection by the Agency:

1) A description of the emission units associated with the source and their associated control devices;

2) A description of control efficiency or emission rates of any control devices that are relied upon to meet the criteria for ROSS in subsection (a), as determined by subsection (b)(1) or (b)(2), as applicable;

3) Documentation of the source's actual emissions and calculations demonstrating that the source is eligible for ROSS ~~pursuant to~~under the criteria in subsections (a), as determined by subsection (b)(1) or (b)(2), as applicable. This documentation may include~~, but is not limited to,~~ annual material usage or emission rates;

4) A copy of the source's initial registration; and

5) A copy of the owner's or operator's annual fee payment for at least the most recent 5 calendar years.

f) Changes to a ROSS source requiring notification: The owner or operator of the source must notify the Agency in writing within 45 days after the change to the source, if the information provided in subsection (c)(1) ~~of this Section~~ changes.

g) Changes requiring a new or modified construction or operating permit, or compliance with conditions in an existing permit issued ~~pursuant to~~under Section 201.169:

1) The owner or operator must apply for a permit by the date required by the new regulation or statute if there is a change in a regulation or statutory requirement or a new regulation or statutory requirement that makes a source ineligible for ROSS under the criteria in subsection (a), as determined in subsection (b)(2), as applicable.

2) If the source no longer meets the criteria in subsection (a), as determined by subsection (b)(2), as applicable:

A) The owner or operator of a source that did not have a permit under Section 201.169 ~~prior to~~beforeegistration must apply and comply with the applicable requirements of the Act and 35 Ill. Adm. Code Parts 201 and 203, as follows:

i) If the source is eligible for a permit under Section 201.169, the owner or operator must apply for a permit within 90 days ~~of~~ after the source's annual fee payment date.

ii) If the source is not eligible under Section 201.169, the owner or operator must apply for a permit as provided for under the Act and 35 Ill. Adm. Code Parts 201 and 203.

iii) If the source was not constructed or operated at the time of initial registration and has actual emissions in excess of the eligibility levels during the first or second year of operations as determined in subsection (b)(2), the owner or operator must apply for an operating permit and pay construction permit application fees.

B) The owner or operator of a source that had a permit under Section 201.169 ~~prior to~~before registration:

i) If the source is in compliance with the terms and conditions of the permit, the owner or operator ~~shall~~ must notify the Agency no later than the source's annual fee payment date of the calendar year following the change in status from a ROSS eligible source to a permitted source.

ii) If the source is not in compliance with the terms and conditions of the permit, but is still eligible for a permit ~~pursuant to~~under Section 201.169, the owner or operator must apply for a new or revised permit within 90 days of the source's annual fee payment date.

iii) If the source is not eligible for a permit ~~pursuant to~~under Section 201.169, the owner or operator must comply with the applicable permitting requirements under the Act and 35 Ill. Adm. Code Parts 201 and 203.

h) Reentry into ROSS: the owner or operator of a source that changed status to become a permitted source ~~pursuant to~~under subsection (g) ~~of this Section~~ ~~shall~~must submit a registration for ROSS if the source meets the criteria in ~~subsections~~ subsection (a), as determined in subsection (b)(1), in the prior calendar year.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART E: SPECIAL PROVISIONS FOR OPERATING PERMITS FOR CERTAIN SMALLER SOURCES

Section 201.180 Applicability (Repealed)

(Source: Repealed at 22 Ill. Reg. 11451, effective June 23, 1998)

Section 201.181 Expiration and Renewal (Repealed)

(Source: Repealed at 22 Ill. Reg. 11451, effective June 23, 1998)

Section 201.187 Requirement for a Revised Permit (Repealed)

(Source: Repealed at 22 Ill. Reg. 11451, effective June 23, 1998)

SUBPART F: CAAPP PERMITS

Section 201.207 Applicability

This Subpart ~~shall~~ must apply only to sources subject to Section 39.5 of the Act. The requirements of Sections 201.143 through ~~201.148 of Subpart C~~201.146, Sections 201.157 through 201.165 and 201.169 ~~of Subpart D~~, and Subparts G and H ~~of this Part shall~~must not apply to a source subject to ~~the requirements of~~ Section 39.5 of the Act.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.208 Supplemental Information

Notwithstanding Sections 201.210, 201.211, and 201.212, an applicant for a CAAPP permit ~~shall~~ must supplement its application with any information for an emission unit of the source that is needed to determine the applicability of any applicable requirement or to set forth in a permit any applicable requirement, when ~~such~~ the information is requested by the Agency~~, pursuant to~~ under Section 39.5(5)(g) of the Act~~,~~ or when the applicant becomes aware that ~~such~~ the information has not been submitted or that incorrect information has been submitted, ~~pursuant to~~under Section 39.5(5)(i) of the Act.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.209 Emissions of Hazardous Air Pollutants

a) For the purposes of establishing whether an emission unit qualifies as an insignificant activity and providing emission data for an emission unit in a CAAPP application, an applicant may presume that an emission unit does not emit an air pollutant listed as hazardous ~~pursuant to~~under Section 112(b) of the ~~Clean Air Act~~CAA if:

1) Raw material, other than fuel, for the emission unit contains a concentration by weight of ~~such~~ the pollutant that is equal to or less than the following:

A) 0.01 percent by weight for the following pollutants if more than 1 ton of the raw material is used annually: alkylated lead compounds, polycyclic organic matter, ~~hexachloro~~

~~benzene~~hexachlorobenzene, mercury, polychlorinated biphenyls, 2,3,7,8-tetrachlorodibenzofurans, and 2,3,7,8-~~tetrachloridibenzo~~tetrachlorodibenzene-p-dioxin; or

B) 0.01 percent by weight for pollutants other than those in subsection (a)(1)(A) ~~above~~ if more than 1,000 tons of the raw material are used annually; or

C) 0.1 percent by weight for pollutants other than those addressed in subsection (a)(1)(A) or (B) ~~above~~.

2) The fuel used in the emission unit does not qualify as a hazardous waste, and the emission unit is not subject to an applicable requirement for the pollutant.

b) Notwithstanding ~~the above~~subsection (a), ~~pursuant to~~under Section 39.5(5)(g) of the Act, the Agency may require an applicant to submit specific information for an emission unit concerning emissions of an air pollutant listed as hazardous ~~pursuant to~~under Section 112(b) of the ~~Clean Air Act~~CAA.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.210 Categories of Insignificant Activities or Emission Levels

a) The owner or operator of a CAAPP source, ~~pursuant to~~under 35 Ill. Adm. Code 270, ~~shall~~ must submit to the Agency within its CAAPP application a list of the following activities or emission levels:

1) Any emission unit determined to be an insignificant activity by the Agency ~~pursuant to~~under Section 201.211 ~~of this Part~~;

2) Emission units with emissions that never exceed 0.1 lbs/hr of any regulated air pollutant in the absence of air pollution control equipment and that do not emit any air pollutant listed as hazardous ~~pursuant to~~under section 112(b) of the ~~Clean Air Act~~CAA;

3) Emission units with emissions that never exceed 0.44 tons/year of any regulated air pollutant in the absence of air pollution control equipment and that do not emit any air pollutant listed as hazardous ~~pursuant to~~under section 112(b) of the ~~Clean Air Act~~CAA;

4) Direct combustion units designed and used for comfort heating purposes and fuel combustion emission units as follows:

A) Units with a rated heat input capacity of less than 2.5 mmbtu/hr that fire only natural gas, propane, or liquefied petroleum gas;

B) Units with a rated heat input capacity of less than 1.0 mmbtu/hr that fire only oil or oil in combination with only natural gas, propane, or liquefied petroleum gas;

C) Units with a rated capacity of less than 200,000 btu/hr which never burn refuse or treated or chemically contaminated wood;

5) Extruders used for the extrusion of metals, minerals, plastics, rubber, or wood, excluding extruders used in the manufacture of polymers, ~~provided that~~if volatile organic materials or class I or II substances subject to ~~the requirements of~~ Title VI of the Clean Air Act are not used as foaming agents or release agents or were not used as foaming agents in the case of extruders processing scrap material;

6) Furnaces used for melting metals other than beryllium with a brim full capacity of less than 450 cubic inches by volume;

7) Equipment used for the melting or application of less than 50,000 lbs/yr of wax to which no organic solvent has been added;

8) Equipment used for filling drums, pails, or other packaging containers, excluding aerosol cans, with soaps, detergents, surfactants, lubricating oils, waxes, vegetable oils, greases, animal fats, glycerin, sweeteners, corn syrup, aqueous salt solutions, or aqueous caustic solutions;

9) Equipment used for the mixing and blending of materials at ambient temperature to make water based adhesives ~~provided~~ if each material contains less than 5% organic solvent by weight;

10) Storage tanks, as follows:

A) Storage tanks of organic liquids with a capacity of less than 10,000 gallons and an annual throughput of less than 100,000 gallons ~~provided~~ if the tank is not used for the storage of any amount of gasoline, including gasoline/ethanol blend fuels, or any amount of material or mixture of any material listed as a hazardous air pollutant ~~pursuant to~~under section 112(b) of the ~~Clean Air Act~~CAA;

B) Storage tanks of gasoline, including gasoline/ethanol blend fuels, with a capacity of less than 2000 gallons;

11) Storage tanks of virgin or rerefined distillate oil (including kerosene and diesel fuel), hydrocarbon condensate from natural gas pipeline or storage systems, lubricating oil, or residual fuel oils;

12) Die casting machines where a metal or plastic is formed under pressure in a die;

13) Coating operations (excluding powder, architectural and industrial maintenance coating) with aggregate VOM usage that never exceeds 15 lbs/day from all coating lines at the source, including VOM from coating, ~~dilutents~~diluents, and cleaning materials;

14) Printing operations with aggregate organic solvent usage that never exceeds 750 gallons per year from all printing lines at the source, including organic solvent from inks, ~~dilutents~~diluents, fountain solutions, and cleaning materials;

15) Gas turbines and stationary reciprocating internal combustion engines of less than 112 kW (150 horsepower) power output;

16) Gas turbines and stationary reciprocating internal combustion engines of between 1118 and 112 kW (1500 and 150 horsepower) power output that are emergency or standby units;

17) Storage tanks of any size containing exclusively soaps, detergents, surfactants, waxes, glycerin, vegetable oils, greases, animal fats, sweetener, corn syrup, aqueous salt solutions, or aqueous caustic solutions ~~provided~~ if an organic solvent has not been mixed with ~~such~~ the materials;

18) Loading and unloading systems for railcars, tank trucks, or watercraft that handle only the following liquid materials ~~provided~~ if an organic solvent has not been mixed with ~~such~~ the materials: soaps, detergents, surfactants, lubricating oils, waxes, glycerin, vegetable oils, greases, animal fats, sweetener, corn syrup, aqueous salt solutions, or aqueous caustic solutions; and

19) Fuel dispensing operations and fuel dispensing equipment for the fuels ~~specified~~ in subsections (a)(19)(A) and (B)~~,~~ for mobile sources, including on-road and off-road vehicles, for use in those mobile sources. For purposes of this subsection (a)(19), fuel dispensing equipment means equipment for transferring fuel to a mobile source, including nozzles, hoses, swivels, breakaways, hose retractors, vapor valves, dispensers, vacuum-assist devices, vapor-return piping, and liquid collection points. Storage tanks and storage tank equipment are not included in fuel dispensing operations or fuel dispensing equipment and are addressed separately.

A) Gasoline, including gasoline/ethanol blend fuels, if the annual throughput of the fuel dispensed is less than 120,000 gallons (rolling 12 month total).

B) Distillate oil (including kerosene and diesel fuel), biodiesel, and biodiesel/distillate oil blends.

b) The owner or operator of a CAAPP source is not required to individually list the following activities in a CAAPP application ~~pursuant to~~under 35 Ill. Adm. Code 270. The applicant ~~shall~~ must denote whether any of the following activities are present at the source in its CAAPP application:

1) Air conditioning or ventilating equipment not designed to remove air contaminants generated by or released from associated equipment;

2) Photographic process equipment by which an image is reproduced upon material sensitized to radiant energy;

3) Equipment used for hydraulic or hydrostatic testing;

4) General vehicle maintenance and servicing activities at the source, other than fuel handling or dispensing of gasoline (including gasoline/ethanol blend fuels), distillate oil (including kerosene and diesel fuel), biodiesel, or biodiesel/distillate oil blends;

5) Cafeterias, kitchens, and other facilities used for preparing food or beverages primarily for consumption at the source;

6) Equipment using water, water and soap or detergent, or a suspension of abrasives in water for purposes of cleaning or finishing ~~provided~~ if no organic solvent has been added to the water;

7) Administrative activities including~~, but not limited to,~~ paper shredding, copying, photographic activities, and blueprinting machines. This does not include incinerators;

8) Laundry dryers, extractors, and tumblers processing clothing, bedding, and other fabric items used at the source that have been cleaned with water solutions of bleach or detergents ~~provided that~~if any organic solvent present in ~~such~~ the items before processing that is retained from clean-up operations ~~shall~~ must be addressed as part of the VOM emissions from use of cleaning materials;

9) Housekeeping activities for cleaning purposes, including collecting spilled and accumulated materials at the source~~, including operation of~~ and operating fixed vacuum cleaning systems specifically for ~~such~~ these

purposes, but not including use of cleaning materials that contain organic solvent;

10) Refrigeration systems, including storage tanks used in refrigeration systems, but excluding any combustion equipment associated with ~~such~~ these systems;

11) Bench scale laboratory equipment and laboratory equipment used exclusively for chemical and physical analysis, including associated laboratory fume hoods, vacuum producing devices, and control devices installed primarily to address potential accidental releases;

12) Restroom facilities and associated clean-up operations, and stacks or vents used to prevent the escape of sewer gases through plumbing traps;

13) Activities associated with the construction, on-site repair, maintenance or dismantlement of buildings, utility lines, pipelines, wells, excavations, earthworks, and other structures that do not constitute emission units;

14) Storage tanks of organic liquids with a capacity of less than 500 gallons, ~~provided~~ if the tank is not used for storage of any amount of material or mixture of any material listed as a hazardous air pollutant ~~pursuant to~~under section 112(b) of the ~~Clean Air Act~~CAA;

15) Piping and storage systems for natural gas, propane, and liquefied petroleum gas;

16) Water treatment or storage systems, as follows:

A) Systems for potable water or boiler feedwater;

B) Systems, including cooling towers, for process water ~~provided that such~~if that water has not been in direct or indirect contact with process streams that contain volatile organic material or materials listed as hazardous air pollutants ~~pursuant to~~under section 112(b) of the ~~Clean Air Act~~CAA;

17) Lawn care, landscape maintenance, and groundskeeping activities;

18) Containers, reservoirs, or tanks used exclusively in dipping operations to coat objects with oils, waxes, or greases, ~~provided~~ if no organic solvent has been mixed with ~~such~~ those materials;

19) Cold cleaning degreasers that are not in-line cleaning machines, where the vapor pressure of the solvents used never exceed 2kPa (15 mmHg or 0.3

psi) measured at ~~38°C~~ 38 °C (~~100°F~~100 °F) or 0.7 kPa (5 mmHg or 0.1 psi) at ~~20°C~~ 20 °C (~~68°F~~68 °F);

20) Manually operated equipment used for buffing, polishing, carving, cutting, drilling, machining, routing, sanding, sawing, scarfing, surface grinding, or turning;

21) Use of consumer products, including hazardous substances as ~~that term is~~ defined in the Federal Hazardous Substances Act (15 USC 1261 et seq.), where the product is used at a source in the same manner as normal consumer use;

22) Activities directly used in the diagnosis and treatment of disease, injury, or other medical condition;

23) Firefighting activities and training in preparation for fighting fires conducted at the source

BOARD NOTE: Open burning permits may be required for certain training activities.

24) Internal combustion engine or boiler (including the fuel system) of motor vehicles, locomotives, aircraft, watercraft, ~~lifttrucks~~lift trucks, and other vehicles powered by nonroad engines;

25) Activities associated with the construction, repair, or maintenance of roads or other paved or open areas, including operation of street sweepers, vacuum trucks, spray trucks, and other vehicles related to the control of fugitive emissions of ~~such~~ those roads or other areas;

26) Storage and handling of drums or other transportable containers where the containers are sealed during storage and handling;

27) Individual points of emission or activities as follows:

A) Individual flanges, valves, pump seals, pressure relief valves, and other individual components that have the potential for leaks;

B) Individual sampling points, analyzers, and process instrumentation, whose operation may result in emissions;

C) Individual features of an emission unit such as each burner and sootblowers in a boiler or each use of cleaning materials on a coating or printing line;

D) Individual equipment that is transportable or activities within a facility established for testing units ~~prior to~~before sale or distribution or for purposes of research; and

E) Individual equipment or activities within a pilot plant facility that is used for research or training;

BOARD NOTE: Notwithstanding the foregoing, ~~such~~ these points of emissions or activities ~~shall~~ must be addressed in a CAAPP application in sufficient detail to identify applicable requirements and demonstrate compliance with ~~such~~ the requirements. Emission data for ~~such~~ these activities ~~shall~~ must be addressed in the aggregate for each emission unit or group of related emission units.

28) Activities at a source associated with the modification only or construction only of a facility, an emission unit, or other equipment at the source; and

BOARD NOTE: Notwithstanding the status of this activity as insignificant, a particular activity that entails modification or construction of an emission unit or construction of air pollution control equipment may require a construction permit ~~pursuant to~~under Section 201.142 ~~of this Part~~ and may subsequently require a revised CAAPP permit. A revised CAAPP permit may also be necessary for operation of an emission unit after completion of a particular activity if the existing CAAPP permit does not accommodate the new state of the emission unit.

29) Activities at a source associated with the maintenance, repair, or dismantlement of an emission unit or other equipment installed at the source, not including the shutdown of the unit or equipment, including preparation for maintenance, repair, or dismantlement, and preparation for subsequent startup, including preparation of a shutdown vessel for entry, replacement of insulation, welding and cutting, and steam purging of a vessel prior to startup.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.211 Application for Classification as an Insignificant Activity

a) An owner or operator of a CAAPP source may propose to the Agency in its CAAPP application that an emission unit at the source be treated as an insignificant activity consistent with Section 201.210 ~~of this Part, provided~~if the emission unit meets the following criteria and the owner or operator provides the information required in subsection (b) ~~below~~ regarding the emission unit:

1) The emission unit would not emit more than 1.0 lb/hr of any regulated air pollutant not listed as hazardous ~~pursuant to~~under Section 112(b) of the ~~Clean Air Act~~CAA in the absence of air pollution control equipment;

2) The emission unit would not emit more than 0.1 lb/hr of any regulated air pollutant that is listed as hazardous ~~pursuant to~~under Section 112(b) of the ~~Clean Air Act~~CAA in the absence of air pollution control equipment; and

3) The emission unit is not a process unit.

b) The owner or operator of such emission unit ~~shall~~ must include the following information in its CAAPP application:

1) A description of the emission unit including the function and expected operating schedule of the unit;

2) A description of any air pollution control equipment or control measures associated with the emission unit;

3) The emissions of regulated air pollutants in lb/hr and ton/yr;

4) The means by which emissions were determined or estimated;

5) The estimated number of such emission units at the source; and

6) Other information upon which the applicant relies to support ~~treatment of such~~treating the emission unit as an insignificant activity.

c) The Agency ~~shall~~ must determine whether ~~such~~ the emission unit may be treated as an insignificant activity considering factors including~~, but not limited to,~~ the following:

1) The amount and nature of emissions;

2) The basis by which emissions were determined;

3) The expected consistency and reliability of operation of the emission unit;

4) The operating schedule or intended use of the emission unit;

5) The air pollution control equipment or control measures applied to the emission unit;

6) The nature of applicable requirements;

7) The environmental impact of ~~such~~ the emission unit; and

8) The potential benefits to the environment if the emission unit were not treated as an insignificant activity.

d) Unless the Agency notifies the applicant in writing that the emission unit cannot be treated as an insignificant activity following the Agency's determination in subsection (c) ~~above~~, the emission unit ~~shall~~ must be deemed an insignificant activity for purposes of Section 201.210(a) ~~of this Part~~. If the Agency determines that an emission unit cannot be treated as an insignificant activity ~~pursuant to~~under this Section, the Agency ~~shall~~ must notify the owner or operator in writing and request that ~~such~~ the owner or operator submit the information required in a CAAPP application ~~pursuant to~~under Agency procedures regarding the emission unit within a reasonable time ~~frame~~. The owner or operator ~~shall~~ must submit the requested information to the Agency within the time ~~frame stated~~ in the request.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.212 Revisions to Lists of Insignificant Activities or Emission Levels

a) The owner or operator of a CAAPP source is not required to notify the Agency of additional insignificant activities present at the source of a type that were previously listed in its CAAPP application ~~pursuant to~~under Section 201.210(a) or 201.211 ~~of this Part,~~ until it submits its renewal CAAPP application ~~is submitted~~.

b) The owner or operator of a CAAPP source seeking to add a new insignificant activity of a type ~~provided~~ under Section 201.210(a) or 201.211 ~~of this Part~~ that was not previously listed in its CAAPP application must notify the Agency ~~pursuant to~~under Section 39.5(12)(b) of the Act.

c) The owner or operator of a CAAPP source is not required to notify the Agency of additional insignificant activities present at the source of a type that were previously listed in its CAAPP application ~~pursuant to~~under Section 201.210(b) ~~of this Part~~ or any new insignificant activities of a type provided under Section 201.210(b) ~~of this Part~~ that were not previously listed in its CAAPP application, until it submits its renewal CAAPP application ~~is submitted~~.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART H: COMPLIANCE PROGRAMS AND PROJECT COMPLETION SCHEDULES

Section 201.241 Contents of Compliance Program

A compliance program ~~shall~~ must contain~~,~~ as a minimum~~,~~ the following data and information:

a) the nature and/or type of the proposed air pollution control equipment or proposed air pollution control technique which has been chosen to achieve compliance;

~~a)~~b) the cost, availability, and technical reasonableness of the proposed air pollution control equipment or proposed air pollution control technique, including detailed cost analyses and copies of engineering reports or studies sufficient to prove to the Agency that the compliance program will result in compliance with applicable standards and limitations of Subchapter c ~~of this Chapter~~.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.242 Contents of Project Completion Schedule

a) A project completion schedule ~~shall~~ must contain, as a minimum, the following data and information:

1) a final compliance date~~, which date shall be~~ no later than the applicable date ~~prescribed~~ in Subchapter c ~~of this Chapter~~; and

~~1)~~2) reasonable interim dates by which various increments of the proposed compliance program ~~shall~~ must be completed, such as dates when contracts will be awarded, ~~dates~~ for equipment delivery, and ~~dates~~ for construction of preliminary structural work.

b) The Agency may adopt procedures which require data and information in addition to ~~and in amplification of the matters specified~~information in subsection (a), and which set forth the format by which all data and information ~~shall~~ must be submitted.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.243 Standards for Approval

~~No~~ A compliance program and project completion schedule ~~shall~~ must not be approved unless the applicant submits proof to the Agency that:

a) The compliance program will result in timely compliance with applicable standards and limitations of Subchapter c ~~of this Chapter~~; and

b) The owner or operator has provided adequate proof that it is committed to the compliance program or project completion schedule, including, in the case of a corporation, certification by a duly authorized officer of ~~such~~ the corporation that ~~such~~ the corporation approves each ~~and every~~ provision of ~~such~~ the program and ~~of such~~ schedule.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.244 Revisions

The owner or operator of an emission source or air pollution control equipment subject to an approved compliance program and project completion schedule may request a revision of ~~such~~ the program or schedule at any time. In addition, the Agency may require a revision upon any change in the Act or this Chapter. The Agency ~~shall~~ must not approve any revision which contains a final compliance date later than the applicable date ~~prescribed~~ in Subchapter c ~~of this Chapter~~.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.245 Effects of Approval

The ~~approval of~~Agency must approve a compliance program and project completion schedule ~~shall be a condition precedent to the issuance and effectiveness of~~before it issues a permit ~~pursuant to~~and before the permit becomes effective under Subpart D. An approved compliance program and project completion schedule~~,~~ and full compliance ~~therewith~~with it, and a current operating permit, ~~shall be~~are a prima facie defense to any enforcement action alleging a violation of the standards or limitations ~~set forth~~ in Subchapter c ~~of this Chapter~~ with respect to any air contaminant included in ~~such~~ the program and schedule during the period of the program. Failure to adhere to an approved compliance schedule ~~shall constitute~~constitutes a violation of this Part for which appropriate sanctions may be sought ~~in accordance with~~under the Act.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.246 Records and Reports

Any person subject to this Subpart ~~shall~~ must maintain ~~such~~ records and make ~~such~~ reports ~~as may be~~ required in procedures adopted by the Agency ~~pursuant to~~under Subpart K.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.247 Submission and Approval Dates

The owner or operator of an emission source required to have a compliance plan and project completion schedule ~~shall~~ must have a compliance plan and a project completion schedule, where applicable, approved by the Agency by the dates ~~indicated~~ in Subchapter c ~~of this Chapter~~. A compliance plan and project completion schedule, where applicable, ~~shall~~ must be submitted at least 90 days before the date required in Subchapter c ~~of this Chapter~~.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART I: MALFUNCTIONS, BREAKDOWNS OR STARTUPS

Section 201.261 Contents of Request for Permission to Operate During a Malfunction, Breakdown or Startup (Repealed)

(Source: Repealed at 47 Ill. Reg. 12089, effective July 25, 2023)

Section 201.262 Standards for Granting Permission to Operate During a Malfunction, Breakdown or Startup (Repealed)

Section 201.264 Continued Operation or Startup Prior to Granting of Operating Permit (Repealed)

(Source: Repealed at 47 Ill. Reg. 12089, effective July 25, 2023)

Section 201.265 Effect of Granting of Permission to Operate During a Malfunction, Breakdown or Startup (Repealed)

(Source: Repealed at 47 Ill. Reg. 12089, effective July 25, 2023)

SUBPART J: MONITORING AND TESTING

Section 201.281 Permit Monitoring Equipment Requirements

Except as otherwise provided at Subpart L ~~of this Part~~, every emission source or air pollution control equipment ~~shall~~ must be equipped with ~~such~~ monitoring instruments as ~~may be~~ required as a condition to a permit issued by the Agency. The permit may require that ~~such~~ the monitoring instruments be continuous or intermittent. ~~Such~~ The monitoring instruments ~~shall~~ must be installed, maintained, and operated at the expense of the owner or operator of the emission source or air pollution control equipment. A permit condition to monitor is appealable to the Board ~~pursuant to~~under Section 40 of the Act.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.282 Testing

Every emission source or air pollution control equipment ~~shall~~ must be subject to the following testing requirements ~~for the purpose of determining~~to determine the nature and quantities of specified air contaminant emissions and ~~for the purpose of determining~~ ground level and ambient air concentrations of such air contaminants:

a) Testing by Owner or Operator. The Agency may require the owner or operator of the emission source or air pollution control equipment to conduct ~~such~~ tests in ~~accordance~~ compliance with procedures adopted by the Agency, at ~~such~~ reasonable times ~~as may be~~ specified by the Agency, and at the expense of the owner or operator of the emission source or air pollution control equipment. The Agency may adopt procedures detailing methods of testing and formats for reporting results of testing. ~~Such~~ These procedures~~,~~ and revisions ~~thereto, shall~~shallot them must not become effective until filed with the Secretary of State, as required by the ~~APA~~ Illinois Administrative Procedure Act [5 ILCS 100]. All such tests ~~shall by~~must be made by or under the direction of a person qualified by training and/or experience in the field of air pollution testing. The Agency ~~shall~~ must have the right to observe all aspects of ~~such~~ these tests.

b) Testing by the Agency. The Agency ~~shall~~ must have the right to conduct such tests at any time at its own expense. Upon request of the Agency, the owner or operator of the emission source or air pollution control equipment ~~shall~~ must provide, without charge to the Agency, necessary holes in stacks or ducts and other safe and proper testing facilities, including scaffolding, but excluding instruments and sensing devices, as may be necessary.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.283 Records and Reports

Any person subject to this Subpart ~~shall~~ must maintain ~~such~~ records and make ~~such~~ reports as ~~may be~~ required in procedures adopted by the Agency ~~pursuant to~~under Subpart K.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART K: RECORDS AND REPORTS

Section 201.301 Records

a) The owner or operator of any emission source or air pollution control equipment must maintain:

1) records detailing all activities under any compliance program and project completion schedule in compliance with Subpart H;

2) records of all monitoring and testing conducted in compliance with Subpart J~~, plus~~; and

~~1)~~3) ~~-~~records of all monitoring and testing of any type ~~whatsoever~~ conducted with respect to specified air contaminants.

~~2)~~4) All records must be made available to the Agency at any reasonable time.

~~a~~b) The Agency may adopt procedures which:

1) Require maintaining additional records ~~be maintained~~ consistent with this Part; and

2) Specify the format in which all records must be maintained.

~~b~~c) The procedures and formats~~,~~ and revisions~~,~~ to them will not become effective until filed with the Secretary of State as required by the Illinois Administrative Procedure Act [5 ILCS 100].

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.302 Reports

a) The owner or operator of any emission unit or air pollution control equipment meeting the applicability criteria ~~contained~~ in 35 Ill. Adm. Code 254.102 ~~shall~~ must submit to the Agency, as a minimum, annual reports detailing the nature, specific emission units, and total annual quantities of all specified air contaminant emissions.~~; provided, however~~ However, ~~that~~ the Agency may require more frequent reports when necessary to accomplish the purposes of the Act and this Chapter.

b) The Agency may adopt procedures which require ~~that~~ submitting additional reports ~~be submitted,~~ and which ~~set forth~~provide the format in which all reports ~~shall~~ must be submitted. ~~Such~~ These procedures and formats~~,~~ and revisions ~~thereto, shall~~ to them must not become effective until filed with the Secretary of State as required by the Illinois Administrative Procedure Act [5 ILCS 100].

c) All emission data received by the Agency~~, shall~~ must be available for public inspection at reasonable times and upon reasonable notice.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART L: CONTINUOUS MONITORING

Section 201.401 Continuous Monitoring Requirements

a) Except as otherwise provided at ~~Section~~ Sections 201.402 and ~~Section~~ 201.403, the owners and operators of the following emission sources ~~shall~~ must install, operate, calibrate, and maintain continuous monitoring equipment for the indicated pollutants.

1) Fossil fuel-fired steam generators with an annual average capacity factor greater than 30%, as reported to the Federal Power Commission for

calendar year 1974, or as otherwise demonstrated to the Agency through ~~the use of~~ annual production data and equipment rating information representative of the facility's operations, ~~shall~~ must monitor for:

A) Opacity, when the steam generator is greater than 250 million Btu per hour heat input unless:

i) Gas is the only fuel burned; or

ii) Oil or a mixture of gas and oil are the only fuels burned, and the source can comply with the limitations applicable to ~~that~~ the source for particulate matter and opacity without use of collection equipment for particulate matter, and the source has never been found to be in violation of an applicable visible or particulate emission standard through any administrative or judicial proceedings.

B) Nitrogen oxides, when:

i) The steam generator is greater than 1000 million Btu per hour heat input;

ii) The facility is located in an Air Quality Control Region where the Administrator~~,~~ of the U.S. Environmental Protection Agency~~,~~ has specifically determined ~~pursuant to~~under Section 107 of the Clean Air Act (42 ~~U.S.C.~~USC 7407) that a control strategy for nitrogen dioxide is necessary to attain the national standards; and

iii) The owner or operator has not demonstrated during compliance tests that the source emits nitrogen oxides at levels less than 30% or more below the emissions standards applicable to that source. ~~Such~~ These compliance tests ~~shall~~ must be performed ~~pursuant to~~in compliance with regulations promulgated by the U.S. Environmental Protection Agency under Section 111 of the ~~Clean Air Act~~CAA (42 USC 7411), as amended. *The provisions of Section 111 of the Clean Air Act…relating to standards of performance for new stationary sources…are applicable in this state and are enforceable under* the Environmental Protection Act ~~*[the Environmental Protection Act]*~~. [415 ILCS 5/9.1(b)] ~~*(Ill Rev. State. Ch. 111½, par. 1009.1(b))*~~

C) Sulfur dioxide, when the steam generator is greater than 250 million Btu per hour heat input and ~~which~~ has installed and operates sulfur dioxide pollution control equipment.

D) Percent oxygen or carbon dioxide, when measurements of oxygen or carbon dioxide in the flue gas are required in regulations adopted by the U.S. Environmental Protection Agency under Section 111 of the ~~Clean Air Act~~CAA, (42 USC 7411) as amended, to convert sulfur dioxide or nitrogen oxide continuous emissions data to units of the emission standard applicable to that source. *The provisions of Section 111 of the Clean Air Act relating to standards of performance for new stationary sources are applicable in this state and are enforceable under* the Environmental Protection Act [415 ILCS 5/9.1(b)] ~~*[the Environmental Protection Act] (Ill. Rev. Stat. Ch. 111 1/2, par. 1009.1(b))*~~

2) Sulfuric acid plants of greater than 300 tons per day production capacity, the production ~~being~~ expressed as 100 percent acid, ~~shall~~ must monitor for sulfur dioxide at each point of sulfur dioxide emission.

3) Nitric acid plants of greater than 300 tons per day production capacity, the production capacity ~~being~~ expressed as 100 percent acid, located in an Air Quality Control Region where the Administrator~~,~~ of the U.S. Environmental Protection Agency~~,~~ has specifically determined ~~pursuant to~~under Section 107 of the ~~Clean Air Act~~CAA that a control strategy for nitrogen dioxide is necessary to attain the national standard, ~~shall~~ must monitor for nitrogen oxides at each point of nitrogen oxide emission.

4) Petroleum refineries ~~shall~~ must monitor for opacity at each catalyst regenerator for fluid bed catalytic cracking units of greater than 20,000 barrels per day fresh feed capacity.

b) Except for sources permitted to use alternative monitoring ~~pursuant to~~under Section 201.402, compliance with the Illinois emissions limitations by the owners and operators of emission sources required to monitor continuously ~~shall~~ must be determined by the use of equipment which meets the performance specifications ~~set forth~~ in paragraphs 3.1 through 3.8 of 40 CFR 51, Appendix P (1987) ~~(this incorporation includes no later amendments or editions),~~ incorporated by reference in Section 201.104(f), and relevant regulations promulgated by the U.S. Environmental Protection Agency under Section 111 of the ~~Clean Air Act~~CAA (42 USC 7411), as amended. *The provisions of Section 111 of the Clean Air Act relating to standards of performance for new stationary sources . . . are applicable in this state and are enforceable under* ~~*[the Environmental Protection Act]*~~ the Environmental Protection Act. ~~*(Ill. Rev. Stat. Ch. 111 1/2, par. 1009.1(b))*~~[415 ILCS 5/9.1(b)]

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.402 Alternative Monitoring

Alternative monitoring requirements for sources subject to Section 201.401(a) ~~shall~~ must be prescribed by permit upon a demonstration by the owner or operator that continuous monitoring is technically unreasonable or infeasible due to physical plant limitations or would impose an extreme economic burden. It ~~shall~~ must be demonstrated that the installation, location, or operation of a continuous monitoring system or device:

a) Would not provide accurate determinations of nitrogen dioxide, sulfur dioxide, carbon dioxide, percent oxygen, or opacity; or

b) Cannot be installed due to the facility's physical constraints such as size, space, or strength of materials, or due to safety considerations; or

c) Would impose an extreme economic burden in proportion to the significance of the monitoring information which would be provided, in that the cost of monitoring would exceed the norm for similar sources and those costs would have a significant adverse effect on the profitability of the operations.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.403 Exempt Sources

The following emission sources are exempt from the requirements of this Subpart:

a) Any source subject to monitoring requirements which are part of a new source performance standard adopted by USEPA ~~pursuant to~~under Section 111 of the ~~Clean Air Act~~CAA and made applicable in Illinois ~~pursuant to~~under Section 9.1 of the Act; or

b) Any source not subject to either the generally applicable emission limitation established ~~pursuant to~~under the Act or Board regulation or an alternative, adjusted, or site specific standard approved by the Board.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.404 Monitoring System Malfunction

The monitoring and recording requirements of this Subpart ~~shall~~ must not be applicable during any period of a monitoring system or device malfunction if demonstrated by the owner or operator of the source that the malfunction was unavoidable and is being repaired as expeditiously as practicable. This demonstration may include~~, but is not limited to,~~ evidence that the device has been properly calibrated and maintained, adequate spare parts are on hand, and trained technicians are available to make repairs.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.405 Excess Emission Reporting

Owners and operators of sources subject to the continuous monitoring requirements of this Subpart ~~shall~~ must report the following information:

a) For periods of emissions ~~in excess of~~exceeding any emission limitation applicable to the source adopted by the Board:

1) The starting date and time of the excess emissions;

2) The duration of the excess emissions;

3) The magnitude of excess emissions;

4) The cause of the excess emissions, if known;

5) Corrective actions and actions taken to lessen the emissions;

6) The operating status of the monitoring system, including the dates and times of any periods during which it was inoperative; and

7) Other information, including ~~but not limited to,~~ monitoring location, monitoring maintenance records, and source operating hours, which the Agency may require by permit.

b) For gaseous sulfur dioxide, percent oxygen, or carbon dioxide measurements, the averaging period used for data reporting ~~shall~~ must correspond to the averaging period used to determine compliance with the emission limitation applicable to the source. The report ~~shall~~ must consist of emission averages in the units of the applicable limitation for each averaging period during which the limitation was exceeded.

c) For opacity measurements, the report ~~shall~~ must be based on ~~six minute~~six-minute averages of opacity and contain.

1) The percent opacity for each continuous opacity excess period; and

2) The start and stop time in ~~six minute~~six-minute increments of any opacity measurements ~~in excess of~~exceeding the limitation.

d) If there were no excess emissions during the reporting period, the report ~~shall~~ must so state and include information about the operating status of the monitoring equipment during that period.

e) Reports ~~shall~~ must be submitted within 45 days ~~of~~ after the end of every calendar quarter.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.406 Data Reduction

To convert monitoring data to the units of the emission limitation, owners and operators of sources subject to this Subpart ~~shall~~ must use:

a) The procedures ~~specified~~ in 35 Ill. Adm. ~~code~~ Code 230 or in regulations adopted by the U.S. Environmental Protection Agency under Section 111 of the Clean Air Act and made applicable in Illinois ~~pursuant to~~under Section 9.1 of the Illinois Environmental Protection Act; or where necessary

b) The procedures ~~specified~~ in 40 CFR 51, Appendix P, paragraph 5 (1987)~~. This incorporation includes no later amendments or editions~~incorporated by reference in Section 201.104(f); or

c) Alternative measurement and data reduction methods may be ~~utilized~~ used if demonstrated by the owner or operator of the affected source by means including~~, but not limited to,~~ instrument accuracy tests that ~~such~~ the alternative methods will provide information equivalent to the information which would be provided by the ~~above~~ methods in subsections (a) and (b).

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.407 Retention of Information

Owners and operators of sources which are subject to the monitoring and recording requirements of this Subpart ~~shall~~ must maintain files of emission information at the facility and make the information available to the Agency upon request. This information ~~shall~~ must be retained for at least two years from the date of collection, and ~~shall~~ must include:

a) Emission measurements;

b) Continuous monitoring system performance testing measurements;

c) Performance evaluations;

d) Calibration checks;

e) Maintenance and adjustments performed;

f) Quarterly reports submitted ~~pursuant to~~under Section 201.405; and

g) Data reduction information used ~~pursuant to~~under Section 201.406.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.408 Compliance Schedules

Owners and operators of sources subject to Section 201.401 ~~shall~~ must install all necessary equipment and monitor in ~~accordance~~ compliance with the compliance schedule ~~contained~~ in the permit issued by the Agency. This schedule ~~shall~~ must provide that monitoring and recording begin within 18 months ~~of~~ after USEPA approves this Subpart ~~being approved by the USEPA pursuant to~~under Section 110(a)(3)(A) of the ~~Clean Air Act~~CAA as a revision to the State Implementation Plan, unless the owner or operator has been granted a variance ~~pursuant to~~under Section 35(a) of the Act allowing a longer compliance schedule.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART M: PERMIT BY RULE (PBR) –
GENERAL PROVISIONS

Section 201.500 Purpose

The purpose of this Subpart is to implement the PBR program ~~provided for in~~under Section 39.12 of the Act for classes of emission units described in this and following Subparts that address specific types of units covered by the PBR program. By fulfilling all the applicable requirements of this Subpart and the applicable Subpart for the specific type of emission unit, an owner or operator of a source seeking a PBR for an emission unit is considered to have met the requirement to submit an application for a construction permit and obtain such a construction permit ~~pursuant to~~under Section 9(b) of the Act and 35 Ill. Adm. Code 201.142, 201.152, and 201.160(a).

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.505 Applicability

a) An owner or operator of a source is eligible to obtain a PBR for a proposed new or modified emission unit if:

1) The proposed emission unit will be located at a CAAPP source that has a CAAPP permit ~~pursuant to~~under Section 39.5 of the Act;

2) There is a PBR that has been adopted and become effective within this Part that is applicable to the proposed emission unit;

3) The proposed emission unit, either alone or as part of a larger project, is not subject to any pre-construction permitting requirements for a major new source or major modification ~~pursuant to~~under 40 CFR 52.21 or

Section 9.1(c) of the Act, including 35 Ill. Adm. Code 203 and any other regulations adopted ~~pursuant to~~under Section 9.1(c) of the Act; and

4) The proposed emission unit is not an element in a larger project that otherwise requires a construction permit ~~pursuant to~~under this Part or the Act.

b) A PBR does not:

1) Exempt any owner or operator from the requirements of the CAA or the Act, including determining whether construction or modification of an emission unit, by itself or as part of a project, constitutes a major modification or major source;

2) Exempt any owner or operator from any requirement to notify the Agency or list insignificant activities and emissions levels for CAAPP permit purposes;

3) Relieve the owner or operator of a source from the requirement of including the emissions associated with the emission unit in any pre-construction permitting application for a major new source or major modification ~~pursuant to~~under 40 CFR 52.21 or Section 9.1(c) of the Act, including 35 Ill. Adm. Code 203 and any other regulations adopted ~~pursuant to~~under Section 9.1(c) of the Act;

4) Relieve the owner or operator of the emission unit from any applicable requirements of Section 39.5 of the Act for the emission unit, including any requirement to submit a timely application for a new or modified CAAPP permit that addresses the emission unit; or

5) Relieve the owner or operator of the source from compliance with other applicable statutes and regulations of the United States~~,~~ or the State of Illinois~~,~~ or with applicable local laws, ordinances, and regulations.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.510 Notice of Intent to Be Covered by a PBR (Notification)

a) An owner or operator of a source seeking to construct or modify an emission unit ~~pursuant to~~under this Subpart M and the applicable PBR Subpart must submit a complete Notification, including fees, ~~prior to~~before commencing construction or modification of the emission unit. A complete Notification containing the following information and fees must be submitted to the Agency's Permit Section at the address ~~provided~~ in Section 201.530(f)(1):

1) The owner's or operator's name, the name of the source, and the applicable Agency Bureau of Air Identification Number;

2) Name, site address, mailing address (if different from site address), e-mail address, and telephone number of the source's contact;

3) Statement ~~noting~~ whether the emission unit is a new emission unit or a modified emission unit (including a reconstructed emission unit);

4) The location of the emission unit at the source;

5) The identity of the new emission unit or the identity of the current emission unit ~~prior to~~before modification, applicable permit numbers, and the description of the modification or reconstruction of the emission unit;

6) A statement that indicates which PBR applies to the emission unit;

7) A statement ~~as to~~ whether the proposed emission unit will be an element in a larger project; if it is, all of the following information must also be included:

   A) A description of the larger project;

   B) A statement describing why a construction permit will not be required for any element of that project; and

   C) A demonstration that the potential emissions of each regulated NSR pollutant, as defined in 40 CFR 52.21, as incorporated by reference in Section 201.104, from the project will be less than 80 percent of the relevant significant emission rates under 40 CFR 52.21, 35 Ill. Adm. Code 203, and any other regulations adopted ~~pursuant to~~under Section 9.1(c) of the Act;

8) Identification of construction permits and PBRs received in the last two years and a demonstration that the requested PBR should not be aggregated with, and considered an element of, any of these projects that were addressed by the construction permits and PBRs identified;

9) The specific information required by the applicable PBR Subpart Notification requirement for this type of emission unit;

10) A statement ~~noting~~ whether the source is major or non-major for emissions of HAPs ~~pursuant to~~under Section 39.5(2)(c)(i) of the Act. If the source is non-major, the Notification must include documentation for the determination;

11) A certification signed by the responsible official, as defined in Section 39.5 of the Act, that, under penalty of law, based on information and belief formed after reasonable inquiry, the statements and information ~~contained~~ in the Notification are true, accurate, and complete and that the emission unit is eligible for the PBR selected ~~pursuant to~~under subsection (a)(6); and

12) Payment of the fee that applies to the owner or operator of the source ~~pursuant to~~under Section 9.12 of the Act for the proposed construction or modification of a single emission unit.

b) The Agency ~~will~~ must acknowledge receipt of the Notification within 30 days.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.515 Commencing Construction or Modification

a) For the emission unit addressed by a complete Notification, the owner or operator of the source may commence construction or modification after submittal of a complete Notification in ~~accordance~~ compliance with Section 201.510.

b) If the submitted Notification is incomplete, the emission unit is not covered by a PBR, and the owner or operator has not met the requirement to submit an application for a construction permit and to obtain the construction permit ~~pursuant to~~under Section 9(b) of the Act and 35 Ill. Adm. Code 201.142, 201.152, and 201.160(a). The owner or operator of the source may not commence construction or modification of the emission unit until it has submitted a complete Notification to the Agency in ~~accordance~~ compliance with Section 201.510 or received a construction permit issued by the Agency.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.520 Modification or Change in Status of an Emission Unit Covered by a PBR

a) If the owner or operator proposes to modify an emission unit covered by a PBR, the owner or operator of the source must submit a new Notification for a PBR or obtain a construction permit for the modification ~~pursuant to~~under this Part and the Act, as applicable.

b) If a proposed modification of the source at which an emission unit covered by a PBR is located will cause the source to become a major source of HAPs as defined in Section 39.5(2)(c)(i) of the Act, the owner or operator must submit a new Notification for a PBR for the emission unit.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.525 Standard Conditions for PBR

a) Duration. A PBR ~~will expire~~expires one year ~~from~~ after the date of submittal of the complete Notification unless a continuous program of construction on this project has commenced by that time.

b) The construction covered by a PBR must be performed in compliance with applicable provisions of the PBR, the Act, and regulations adopted by the Board.

c) The owner or operator of the emission unit must comply with all applicable requirements of Subpart M and the applicable PBR Subpart.

d) The owner or operator of the emission unit must submit an updated Fee Determination for CAAPP Permit form ~~prior to~~before commencing operation of the proposed emission unit if there is an increase in allowable emissions over the existing permitted allowable emissions for fee purposes as a result of the construction or modification of the emission unit.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.530 Recordkeeping and Reporting

The owner or operator of the emission unit must:

a) Keep and maintain all records used to demonstrate initial compliance and ongoing compliance with the applicable requirements of Subpart M and the applicable PBR Subpart, as well as any additional records required by and reported ~~pursuant to~~under those Subparts, for at least five years from the date the document is created and make all records available to the Agency for inspection and copying upon request. These records include any records required by State or federal laws or regulations and any materials submitted to the Agency or USEPA pertaining to the emission unit. Any record retained in an electronic format must be capable of being retrieved and printed on paper during normal source office hours.

b) Notify the Agency of the emission unit's actual start-up date no later than 30 days after that date, unless an earlier date is specified in the applicable PBR.

c) Except as otherwise provided in this Subpart M or the applicable PBR Subpart, submit a written report of any deviations from the applicable emission standards, emission limitations, operational restrictions, qualifying criteria, work practice requirements, or control equipment operating parameter limitations ~~set forth~~ in this Subpart M and the applicable PBR Subpart. The report must be submitted to the Agency within 30 days after the date the deviation occurred and must describe the deviation (including the date, time, and duration of the deviation), identify the specific requirement from which the deviation occurred and the total amount of excess emissions during the deviation, and describe the probable cause of the

deviation and any corrective actions or preventive measures that have been or will be taken.

d) If required to conduct a performance test:

1) Submit to the Agency a testing protocol as required by the applicable PBR Subpart at least 45 days ~~prior to~~before the scheduled performance test. Upon written request directed to the Bureau of Air's Compliance Section, the Agency may waive the 45-day requirement. A waiver is only effective if ~~it is provided~~the Bureau of Air provides it in writing ~~by the Bureau of Air~~;

2) Notify the Agency in writing of the date of performance testing at least 30 days ~~prior to~~before testing and again 5 days ~~prior to~~before the testing, unless the emission unit is subject to other State or federal requirements that specify a longer notification period. Upon written request directed to the Bureau of Air's Compliance Section, the Agency may waive either or both of these requirements. ~~Such~~ A waiver is only effective if ~~it is provided~~the Bureau of Air provides it in writing ~~by the Bureau of Air~~;

3) If, after the 30-day notice for an initially scheduled performance test is sent, there is a delay (e.g., due to operational problems) in conducting the test as scheduled, notify the Agency of the delay in the original test date, directed to the Bureau of Air's Compliance Section, as soon as practicable. This must be done either by providing at least a 7-day notice of the rescheduled date of the test or by arranging a new test date with the Agency by mutual agreement;

4) Not later than 60 days after ~~the completion of~~completing the performance test, submit the results of the test to the Agency.

e) Submit any monitoring information required by the PBR as part of the Semi-Annual Monitoring Report required by the source's CAAPP permit.

f) Provide copies of all required reports and Notifications as follows:

1) One copy of the new or amended Notification must be sent to:

Illinois Environmental Protection Agency
Bureau of Air
Permit Section (#11)
~~P.O. Box 19506~~1021 North Grand Avenue East
Springfield, Illinois ~~62794-9506~~62702

2) One copy of all other reports and notices must be sent to:

Illinois Environmental Protection Agency
Bureau of Air
Compliance Section (#40)
~~P.O. Box 19276~~1021 North Grand Avenue East
Springfield, Illinois ~~62794-9276~~62702

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.535 Authority to Operate

For eligible emission units under Section 201.505, the owner or operator of a proposed emission unit must submit a complete application to the Agency for a minor modification to the CAAPP permit for the source to address the emission unit, ~~pursuant to~~under Section 39.5(14) of the Act, before the emission unit begins operation. The application for minor permit modification must address all applicable requirements ~~contained~~ in this Subpart M, the applicable PBR Subpart, and Section 39.5(14) of the Act. ~~Pursuant to~~Under Section 39.5(14)(a)(vi) of the Act, the owner or operator may begin operating the emission unit immediately after it files the application. Until the Agency takes any of the actions ~~specified~~ in Section 39.5(14)(a)(v)(A) through (C) of the Act, the owner or operator must comply with both the applicable requirements governing the emission unit and the proposed terms and conditions of the suggested draft of the modified CAAPP permit in the application, ~~pursuant to~~under Section 39.5(14)(a)(iii)(B) of the Act.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.540 Enforcement Authority

Nothing in this Subpart limits the State's authority to seek penalties and injunctive relief for any violation of any applicable State law or regulation. Nothing in this Subpart limits the right of the federal government or any person to directly enforce against owners or operators due to actions or omissions that constitute violations of permits required by the CAA or applicable laws and regulations.

a) Any owner or operator of a source that commences construction or modification of an emission unit and submits a Notification ~~pursuant to~~under Section 201.510 that is incomplete, or fails to submit any Notification, is deemed to have constructed without the benefit of a permit under Section 9(b) of the Act and 35 Ill. Adm. Code 201.142, 201.152, and 201.160(a) unless the Agency has issued a construction permit other than a PBR for the emission unit ~~pursuant to~~under Section 9(b) of the Act. A violation exists even if it is determined that the Notification was incomplete after construction or modification has already occurred.

b) Any owner or operator of a source that submits a Notification and commences operation of an emission unit covered by a PBR, but fails to submit a complete application for a minor modification to the CAAPP permit in ~~accordance~~ compliance with Section 39.5(14) of the Act, is deemed to have operated without

the benefit of a permit under Section 39.5(6)(b) of the Act. A violation exists even if it is determined that the application for a minor permit modification was incomplete after operation has already occurred.

c) Any owner or operator of an emission unit covered by a PBR that violates any condition of this Subpart or the applicable PBR Subpart is deemed to have violated Sections 39.12(e) and 9(b) of the Act, as well as any other applicable State or federal regulation or portion of the Act. If such a violation occurs after the emission unit has commenced operation, the owner or operator is also deemed to have violated Section 39.5(6)(a) of the Act.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART N: PERMIT BY RULE (PBR) – BOILERS
LESS THAN OR EQUAL TO 100 MMBTU/HR

Section 201.600 Applicability

An owner or operator of a source seeking a PBR for a new or modified boiler is eligible to obtain a PBR under this Subpart N if:

a) The boiler has a maximum design heat input capacity of:

1) Less than or equal to 50 MMBtu/hr; or

2) Greater than 50 MMBtu/hr and less than or equal to 100 MMBtu/hr and is equipped with low-NO_x burners designed by the manufacturer to meet a NO_x emission limit of not greater than 0.05 lb/MMBtu;

b) The boiler primarily burns pipeline natural gas, butane, propane, or refinery fuel gas;

c) The only backup or reserve fuel burned in the boiler is diesel fuel, butane, or propane. If diesel fuel is the backup fuel, ~~the~~ burning ~~of~~ diesel fuel in the boiler must be such that, as appropriate, the boiler is a "unit designed to burn gas 1 subcategory," as defined by 40 CFR 63.7575, incorporated by reference in Section 201.104(e), or a "gas-fired boiler," as defined by 40 CFR 63.11237 as incorporated by reference in Section 201.104(e); and

d) The emissions from the boiler consist entirely of the products of fuel combustion.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.605 Boiler Notice of Intent to Be Covered by a PBR (Notification)

The Notification for a PBR ~~pursuant to~~under this Subpart must also include the following information, in addition to the information ~~specified by~~in Section 201.510:

a) The primary fuel that will be burned by the boiler, along with the maximum rated heat input capacity of the boiler (MMBtu/hr) and a copy of the manufacturer's specifications for the boiler.

b) Whether the boiler would be a temporary boiler as defined by 40 CFR 60.41c and 63.7575 or 63.11237, ~~as~~ incorporated by reference in Section 201.104, and, if it would be, a demonstration that the criteria ~~set forth~~ in the definition of a temporary boiler are met, and the expected period or periods in which the boiler would be at a location or locations at the source.

c) The potential emissions of individual pollutants from the boiler in lb/hr, tons/month, and tons/year, including emissions of PM, PM_{10} (including both filterable and condensable particulate), $PM_{2.5}$ (including both filterable and condensable particulate), NO_x, CO, VOM, and SO_2, based on continuous operation of the boiler at its rated heat input capacity combusting its primary fuel, with supporting documentation and calculations.

d) Whether the boiler will have the capability to burn diesel fuel, butane, propane, or refinery fuel gas, and, if so, the potential SO_2 emissions of the boiler from the use of such fuel.

e) If the boiler or the source at which the boiler would be located does not meet the applicability criteria in 35 Ill. Adm. Code 217.150(a)(1)(A) or (a)(1)(B), an identification of the criteria that are not met, with explanation.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.610 Federal NSPS and NESHAP Requirements

The owner or operator must comply with ~~the requirements of~~ all applicable federal regulations for the PBR boiler, including the following limits, work practice standards, testing, monitoring, recordkeeping, and reporting requirements:

a) 40 CFR 60, subpart A, Standards of Performance for New Stationary Sources: General Provisions: General Provisions, ~~as~~ incorporated by reference in Section 201.104.

b) 40 CFR 60, subpart Dc, Standards of Performance for Small Industrial-Commercial-Institutional Steam Generating Units, ~~as~~ incorporated by reference in Section 201.104.

c) 40 CFR 63, subpart A, National Emission Standards for Hazardous Air Pollutants for Source Categories: General Provisions, ~~as~~ incorporated by reference in

Section 201.104.

d) 40 CFR 63, subpart DDDDD, National Emission Standards for Hazardous Air Pollutants for Major Sources: Industrial, Commercial, and Institutional Boilers and Process Heaters, ~~as~~ incorporated by reference in Section 201.104.

e) 40 CFR 63, subpart JJJJJJ, National Emission Standards for Hazardous Air Pollutants for Industrial, Commercial, and Institutional Boilers Area Sources, ~~as~~ incorporated by reference in Section 201.104.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.615 Opacity Requirements

The owner or operator of the source must comply with the applicable provisions of 35 Ill. Adm. Code 212.Subpart B.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.620 Requirements for Use of Diesel Fuel and Refinery Fuel Gas

a) For a PBR boiler to burn diesel fuel as a backup fuel, the owner or operator must:

1) Comply with the applicable provisions of 35 Ill. Adm. Code 214.Subpart B or D when burning diesel fuel;

2) Comply with the particulate emission standard in 35 Ill. Adm. Code 212.206 when diesel fuel is burned;

3) Maintain records that include the following information:

A) Date, time, and duration of any period when diesel fuel was fired in the boiler~~,~~; the amount of diesel fuel that was fired~~,~~; and the reason diesel fuel was fired, e.g., gas curtailment, gas supply interruption, or periodic operational testing;

B) The total duration of periodic operational testing or other activity while firing diesel fuel (number of hours of operation per calendar year); and

C) The actual SO_2 emissions of the boiler from use of diesel fuel (tons/month and tons/year), with supporting calculations.

b) For a PBR boiler to burn refinery fuel gas, the owner or operator must use fuel gas at a petroleum refinery from a fuel gas system that is subject to and meeting

the requirements for compliance with the limits for H_2S content of fuel gas in 40 CFR 60.102a(g)(l)(ii), ~~as~~ incorporated by reference in Section 201.104.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.625 Carbon Monoxide (CO) Requirements

~~Pursuant to~~Under 35 Ill. Adm. Code 216.121, ~~no~~ an owner or operator of a PBR boiler ~~may~~ must not cause or allow the emission of CO into the atmosphere from any fuel combustion emission source with actual heat input greater than 2.9 MW (10 MMBtu/hr) to exceed 200 ppm, corrected to 50 percent excess air.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.630 Nitrogen Oxide (NO_x) Requirements

The owner or operator of the PBR boiler must comply with the following, as applicable:

a) If the PBR boiler is subject to ~~the requirements of~~ 35 Ill. Adm. Code 217.Subpart D, comply with all the applicable requirements of 35 Ill. Adm. Code 217.Subparts D and E;

b) If the PBR boiler is subject to ~~the requirements of~~ 40 CFR 63.subpart DDDDD, comply with all applicable requirements, including the combustion tuning work practice requirements of 40 CFR 63.7440(a)(10), ~~as~~ incorporated by reference in Section 201.104; and

c) For a boiler with a maximum design heat input capacity greater than 50 MMBtu/hr~~,~~ and not subject to either 35 Ill. Adm. Code 217.Subpart D or 40 CFR 63, subpart DDDDD, conduct combustion tuning for the boiler. This tuning must be conducted in each calendar year in which the boiler is operated, except for the calendar year in which the boiler first starts up and the calendar year in which the boiler is permanently removed from service. The combustion tuning must be conducted as specified by 40 CFR 63.7540(a)(10)(i) through (vi), ~~as~~ incorporated by reference in Section 201.104, and must be conducted while burning the type of fuel that provided the majority of the heat input to the boiler over the 12 months ~~prior to~~before the tune-up.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 201.635 PBR Boiler Recordkeeping Requirements

The owner or operator of the PBR boiler must maintain records containing the following information, in addition to the records required by Section 201.530:

a) The maximum design heat input capacity of the boiler, in MMBtu/hr, with

supporting documentation;

b) An inspection, maintenance, and repair log with dates and the nature of those activities for the boiler;

c) The quantity of each fuel used per month and per year;

d) The hours of operation, in hours/month and hours/year;

e) Emissions of PM, PM_{10}, $PM_{2.5}$, NO_x, CO, and VOM, in tons/month and tons/year, with supporting calculations; and

f) SO_2 emissions, in tons/month and tons/year, with supporting calculations if the boiler has the capability to burn refinery fuel gas, butane, or propane.

Section 201.APPENDIX C ~~Part~~ Past Compliance Dates

Rule 103(b)(2)

Operating permits were required as follows:

SOURCE CLASSIFICATION	DATE OPERATING PERMIT REQUIRED
Primary Metal Industry Operations as defined by code 33 of the "Standard Industrial Classification Manual"	By December 1, 1972
Rubber and Plastics Products Industry Operations as defined by code 30 of the "Standard Industrial Classification Manual"	By December 1, 1972
Chemicals and Allied Products Industry Operations as defined by code 28 of the "Standard Industrial Classification Manual"	By January 1, 1973
Food and Kindred Products Industry Operations as defined by code 20 and Printing and Publishing Industry Operations as defined by code 27 of the "Standard Industrial Classification Manual"	By February 1, 1973
Petroleum and Coal Products ~~Indusry~~ Industry Operations as defined by code 29 of the "Standard Industrial Classification Manual" and bituminous cement (asphalt) plants	By February 1, 1973
Stone, Clay and Glass Products and Paper and Allied Products Industry Operations as defined by code 32 and 26 of the "Standard Industrial Classification Manual" and all painting operations using in excess of 5,000 gallons of paint (including thinner) per year	By March 1, 1973
Incinerators	By April 1, 1973
Electric, Gas, and Sanitary Services as defined by code 49 of the "Standard Industrial Classification Manual" and coal fired boilers	By May 1, 1973
Gas and Oil fired boilers and all other emission sources or air pollution control equipment not listed previously in this paragraph except equipment excluded under paragraph (i) of this Rule	By June 1, 1973

Grain-Handling and Conditioning Operations	By March 1, 1976
Grain-Handling and Grain-Drying Operations	By March 1, 1976

(B) All applications for Operating Permits ~~shall~~ must be submitted to the Agency at least 90 days ~~prior to~~before the date on which an Operating Permit is required. ~~Provided, however, the~~The Agency may waive this ~~90-day~~90-day requirement when appropriate. If necessary, to prevent an unmanageable workload as ~~may be deemed~~it deems appropriate, the Agency may extend the dates by which Operating Permits are required under Section 103(b)(2)(A) for ~~a period~~ not to exceed four months. The Agency ~~shall~~ must notify the persons affected and the Board in writing of the extension at least four months before the dates ~~set forth~~ in Section 103(b)(2)(A).

(C) Nothing in this Rule ~~shall preclude~~precludes any person from applying for an Operating Permit earlier than the dates ~~specified~~ in part (b)(2)(A) of this Rule 103.

Rule 103(b)(6)(G)

No operating permit could be granted unless the applicant submitted proof to the Agency that: if subject to a future compliance date, the applicant was, on the effective date of this Chapter, and is at the time of application for an Operating Permit ~~pursuant to~~under Rule 103(b)(2), in compliance with any applicable emission standards of the Rules and Regulations Governing the Control of Air Pollution of the former State of Illinois Air Pollution Control Board; or was, on the effective date of this Chapter, in full compliance with any variance from those regulations granted by the Pollution Control Board; or has been, since the effective date of this Chapter, granted a variance from those regulations, and is in full compliance with ~~such~~ that variance.

Rule 104(g)

Submission and Approval Dates. The owner or operator of an emission source subject to the following rules was required to have a Compliance Plan and a Project Completion Schedule, where applicable, approved by the Agency by the following dates. A Compliance Plan and a Project Completion Schedule, where applicable, ~~shall~~ must be submitted at least 90 days before the following dates.

(1) By February 1, 1980. Gasoline Dispensing facilities subject to Rule 205(p) and degreasers subject to Rule 205(k) located in Cook, DuPage, Lake, Kane, McHenry, and Will counties.

(2) By March 1, 1980. Petroleum refineries subject to Rule 205(l), except (l) (4)-(10). Gasoline dispensing facilities subject to Rule 205(p) in Boone, Madison, St. Clair, Peoria, Tazewell, Rock Island, and Winnebago counties.

(3) By April 1, 1980. Degreasers subject to Rule 205(k) located in counties other than Cook, DuPage, Lake, Kane, McHenry, or Will. Bulk gasoline plants, bulk gasoline terminals, and petroleum liquid storage tanks subject to Rule 205(o), except (o) (3), located in Cook, DuPage, Lake, Kane, McHenry, and Will counties.

(4) By April 1, 1980. Coating lines subject to Rule 205(n), except (n)(1)(J)~~,~~ and (K). Bulk gasoline plants, bulk gasoline terminals, and petroleum liquid storage tanks subject to Rule 205(o), except (o)(3), which are located in counties other than Cook, Lake, DuPage, Kane, McHenry, or Will.

TITLE 35: ENVIRONMENTAL PROTECTION
SUBTITLE B: AIR POLLUTION
CHAPTER I: POLLUTION CONTROL BOARD
SUBCHAPTER a: PERMITS AND GENERAL PROVISIONS

PART 202
ALTERNATIVE CONTROL STRATEGIES

SUBPART A: GENERAL PROVISIONS

SUBPART B: PERMIT APPLICATION

SUBPART C: PERMIT CONDITIONS AND ISSUANCE

SUBPART D: PERMIT DURATION, REVISION AND RENEWAL

SUBPART E: ALTERNATIVE CONTROL STRATEGIES INVOLVING MORE THAN ONE PERSON

AUTHORITY: Implementing Section 9.3 and authorized by Sections 5 and 27 of the Environmental Protection Act ~~(Ill. Rev. Stat. 1981, ch. 111 1/2, pars. 1005, 1009.3, and 1027)~~[415 ILCS 5/5, 9.3, 27].

SOURCE: 35 Ill. Adm. Code 212 adopted in R81-20 (Interim) at 6 Ill. Reg. 6703, effective May 20, 1982; renumbered to 35 Ill. Adm. Code 202 and amended in R81-20(A) at 7 Ill. Reg. 8091, effective June 27, 1983; codified at 7 Ill. Reg. 13584; corrected at 7 Ill. Reg. 14561; amended in R81-20(B) at 8 Ill. Reg. 4171, effective March 16, 1984; amended in R23-18 at 47 Ill. Reg. 12101, effective July 25, 2023; amended in R18-21 at 48 Ill. Reg._____, effective _____.

SUBPART A: GENERAL PROVISIONS

Section 202.101 Definitions

Unless a different meaning of a term is clear from its context, the definitions of terms used ~~for~~ in this Part ~~shall be the same as~~are those used in ~~this Chapter,~~ 35 Ill. Adm. Code Subtitle B, Chapter I ~~(Chapter)~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 202.104 Actual Emissions

"Actual emissions" means the actual rate of annual emissions of a pollutant from an operational emission source for a particular date equal to the mean rate at which the emission source actually emitted the pollutant during the two-year period which immediately precedes the particular date and which is determined by the Illinois Environmental Protection Agency (Agency) to ~~be representative of~~represent normal emission source operation; however:

a) The Agency ~~shall~~ must allow the use of a different time period upon a determination that it is more representative of normal emission source operation. The burden ~~shall~~ must be on the applicant to demonstrate that another time period is more representative. Actual emissions ~~shall~~ must be calculated using the emission source's actual operating hours, production rates, and types of materials processed, stored, or combusted during the selected time period.

b) If the Agency determines that there is inadequate information to determine actual emissions ~~as indicated in the preceding paragraphs~~under this section, the Agency ~~shall~~ must use the potential to emit of the emission source.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 202.107 Allowable Emissions

a) "Allowable emissions" means the emission rate of an emission source calculated using the maximum rated capacity of the emission source (unless the emission source is subject to permit conditions or other enforceable limits that restrict the operating rate, or hours of operation, or both) and the more stringent of the following:

1) The applicable emission standard or limitation ~~contained~~ in this Chapter, including those with a future compliance date; or

2) The emissions rate specified as a permit condition, including those with a future compliance date.

b) The allowable emissions may be expressed as a permit condition limiting annual emissions or material or fuel throughput.

c) If an emission source is not subject to an emission standard under subsection (a) and is not conditioned ~~pursuant to~~under subsection (b), the allowable emissions will be the source's potential to emit.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 202.110 Alternative Control Strategy (ACS)

"Alternative control strategy" means a specific program of emissions limitations and requirements which is environmentally equivalent to that which would otherwise be required by applicable statutes or regulations, and under which the owner or operator of an emission source increases emissions of a regulated pollutant beyond the emission baseline at one or more emission sources and correspondingly reduces emissions of the same pollutant below the emission baseline at other emission sources.

Section 202.113 Chapter

References to "this Chapter" or "Chapter 2" in this Part ~~shall mean~~means Pollution Control Board air pollution rules and regulations ~~as contained in Chapter 2: Air Pollution Regulations and as codified~~ under 35 Ill. Adm. Code: Subtitle B, Chapter I.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 202.116 Emission Baseline

"Emission baseline" means the starting point or reference level from which increases and decreases in emissions are measured. The rules governing determination of emission offsets, calculation of net emission increases, and evaluation of ACS strategies specify the ~~particular~~ emission baseline that applies for ~~that purpose~~those purposes.

Section 202.119 Multi-person ACS

"Multi-person ACS" means an ACS which includes emission sources which are owned and controlled by different persons who have formed a joint venture for purposes of the ACS.

Section 202.122 Potential to Emit

"Potential to emit" means the maximum capacity of an emission source to emit a pollutant under its physical and operational design. Any physical or operational limitation on the capacity of the emission source to emit a pollutant, including air pollution control equipment and restrictions on hours of operation or on the type or amount of material combusted, stored, or processed, ~~shall~~ must be treated as part of its design only if the limitation or the effect it would have on emissions is enforceable. Secondary emissions do not count in determining the potential to emit of a stationary source.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 202.125 Abbreviations

This Part uses the following abbreviations:

"ug" ~~is an abbreviation for~~ _____micrograms.

"m^3" ~~is an abbreviation for~~ _____cubic meter.

"SO_2""~~SO2" is an abbreviation for~~ _____sulfur dioxide.

"TSP" ~~is an abbreviation for~~ _____particulate matter.

"NO_x" ~~is an abbreviation for~~ _____nitrogen oxides.

"CO" ~~is an abbreviation for~~ _____carbon monoxide.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 202.140 Scope

~~Pursuant to~~Under a permit issued by the Agency under this Part, a person or persons may use an ACS for emission sources, including fugitive emission sources, ~~in lieu~~instead of ~~compliance~~ complying with conflicting requirements ~~which would~~ otherwise ~~be~~ applicable under this Chapter.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 202.142 Severability

Notwithstanding 35 Ill. Adm. Code 201.125, if any provision of Part 202 is stayed or declared invalid by a final order, no longer subject to appeal, of any court of competent jurisdiction, then the ~~entirety of~~entire Part 202 ~~shall~~ must be deemed stayed or invalidated until the stay is lifted or the Pollution Control Board ~~(Board) acts to revalidate~~revalidates the Part.

(Source: Amended at 48 Ill. Reg._____, effective _____)

SUBPART B: PERMIT APPLICATION

Section 202.201 Emission Baseline for Alternative Control Strategies

a) The baseline for reviewing decreases or increases of emissions from emission sources which are the subject of an ACS ~~shall~~ must be the lesser of the actual emissions or the allowable emissions prescribed by this Chapter.

b) Notwithstanding subsection (a), an increment of emission reduction ~~shall~~ must be creditable under an ACS to the extent that it:

1) Was achieved as a result of ~~the installation of~~installing pollution control equipment~~,~~; changes in process, procedures, or materials~~,~~; or the shutdown of an emission source which would not have occurred but for the purpose of creating an emission reduction;

2) Reduced emissions beyond the requirements of Board regulations; and

3) Was not relied upon in the State Implementation Plan (SIP) demonstration to demonstrate compliance with ambient air quality standards in the compliance year in nonattainment areas or maintenance of air quality in other areas.

c) For purposes of subsection (b), the burden ~~shall~~ must generally be on the permit applicant. However, for the purpose of subsection (b)(3) it ~~shall~~ must be the

responsibility of the Agency to demonstrate that the SIP demonstration either did or did not rely upon the emission reduction in question, whether from the particular emission source or the category to which it belongs.

d) Notwithstanding subsection (b)(3), if an emission source is located in an area for which the SIP does not demonstrate attainment of the air quality standards by the compliance year for the pollutant which is the subject of the ACS, it may ~~utilize~~ use an emission reduction credit only to the extent that that reduction reduces its emissions below actual emissions.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 202.210 Permit Application Information

In addition to other information which may be required under 35 Ill. Adm. Code 201, a permit application under this Subpart ~~shall~~must:

a) List the emission sources to be included in the ACS, the emission baseline the applicant believes to be applicable to each emission source, and the remaining useful life of each emission source.

b) Describe the proposed modifications to the emission sources and quantify the emission increases and decreases anticipated to occur as a result of each modification.

c) Identify the Board regulations and the terms of the Environmental Protection Act ~~(Act) (Ill. Rev. Stat. 1981, ch. 111 1/2, pars. 1001 et seq.)~~ to which the applicant believes the ACS provides an alternative.

d) Describe the methods currently used to assure compliance and the methods proposed to be used under the ACS. ~~Such~~ These methods may include~~, but are not limited to~~ recordkeeping, equipment or emissions monitoring, source testing, and material or process specifications.

e) Provide an analysis of the ACS ~~pursuant to~~under this Subpart.

f) Contain a certification, signed by all ACS applicants, stating that a copy of the ACS application has been sent by certified mail to the United States Environmental Protection Agency (USEPA) if any of the emission sources included in the ACS are presently the subject of a federal notice of violation or federal enforcement action under the provisions of the ~~Clean Air Act~~CAA (42 U.S.C. 7401 et seq.), including civil actions filed under Section 113(b), criminal actions filed under Section 113(c), a notice imposing non-compliance penalties ~~issued~~ under Section 120, administrative orders ~~issued~~ under Section 113(a), or a citizen suit ~~filed~~ under Section 304 ~~where~~ in which the USEPA has intervened (42 U.S.C. 7413 and 7420).

g) Provide ~~such~~ other information as the Agency ~~can demonstrate to be~~demonstrates is necessary ~~for the determination of~~to determine compliance with the standards of issuance in Section 202.306, including the results of any source tests or ambient air monitoring.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 202.211 Analysis of Emissions

a) A permit application under this Subpart must provide a comparison of the baseline emissions and the emissions that would be permitted under the proposed ACS for each emission source involved in the ACS. Where appropriate, this analysis must address differences between the emission sources to be covered by the ACS regarding:

1) Methods of determining emissions;

2) Consistency and reliability of the performance of the emission sources and any associated control devices;

3) Frequency and duration of operating during malfunction or breakdown with excess emissions, or during start-up with excess emissions;

4) Methods of operation, including operating schedules~~,~~ and range of raw materials or products; and

5) Other characteristics of the emission sources or their operation which may affect equivalence of emissions.

b) The analysis must describe any increases in emissions from emission sources outside the ACS which may accompany the proposed ACS.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 202.212 Analysis of Environmental Quality

a) A permit application under this Subpart ~~shall~~ must provide a comparison of the ambient air quality under existing requirements and the ambient air quality ~~which would exist~~ under the proposed ACS. This analysis ~~shall~~ must include dispersion modeling based on the best and most appropriate models for the pollutant and emission sources involved, unless the Agency finds that:

1) Due to the characteristics of the pollutant and emission source, dispersion modeling is inappropriate or unnecessary for determining effects on air quality; or

2) The location of emission sources included in the ACS are not more than 250 meters apart, the effective plume height of the emission increases and decreases are not significantly different, and the differences in the characteristics of the emission sources are not likely to affect ambient air quality; or

3) Differences in location, plume height, operating practice, and other characteristics of the emission sources subject to the ACS are not likely to significantly affect ambient air quality. An effect on ambient air quality is significant if it equals or exceeds the levels ~~specified~~ in the following table:

SIGNIFICANCE LEVELS

Pollutant	Annual	24- Hour	8- Hour	3- Hour	1- Hour
SO_2	1.0 ug/m^3	5 ug/m^3		25 ug/m^3	
TSP	1.0 ug/m^3	5 ug/m^3			
NO_x	1.0 ug/m^3				
CO			0.5 mg/m^3		2 mg/m^3

b) The applicant ~~shall~~ must analyze the air quality impacts resulting from trades between emission sources, including the impact of emissions which differ in their qualitative impact on health or the environment.

c) The analysis ~~shall~~ must describe any other impacts on the environment which may accompany the proposed ACS.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 202.213 Analysis of Methods of Assuring Compliance

A permit application under this Subpart ~~shall~~ must provide a comparison of the methods of assuring compliance under existing requirements and the methods of assuring compliance ~~which would be used~~ under the proposed ACS. As a minimum, the analysis ~~shall~~ must address the effectiveness, reliability, and accessibility of these methods.

(Source: Amended at 48 Ill. Reg._____, effective _____)

SUBPART C: PERMIT CONDITIONS AND ISSUANCE

Section 202.301 Permit Conditions

a) The permit ~~shall~~ must specify:

1) All emission limits which apply to emission sources under the ACS, and

2) Any compliance procedures which ~~shall~~ must be followed by the permittee.

b) The permit may ~~be conditioned~~include conditions so that compliance with the terms of the ACS will continue ~~in the event of change of~~if ownership of emission sources changes, and ~~such~~ the terms will ~~be made applicable~~apply to the new owner.

c) The Agency may impose ~~such~~ other permit conditions ~~in a permit as are~~ necessary to accomplish the purposes of the Act or ~~of~~ this Part.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 202.302 Records and Reports

a) The Agency ~~shall~~ must require that a permittee operating under an ACS maintain ~~such~~ records ~~as~~ necessary to determine compliance with the requirements of the ACS.

1) These records ~~shall~~ must include~~, but shall not be limited to~~ the actual and allowable emission rates, or the parameters from which these rates are determined, or related operational parameters of the equipment.

2) The records ~~shall~~ must be maintained as prescribed in the permit.

3) These records ~~shall~~ must be available to the Agency, and copies of these records ~~shall~~ must be sent to the Agency upon written request. The Agency ~~shall~~ must make ~~such~~ these records available to the public ~~pursuant to~~under Sections 7 and 7.1 of the Act ~~(Ill. Rev. Stat. 1981, ch. 111 1/2, pars. 1007 and 1007.1)~~ and regulations promulgated ~~hereunder~~under them.

b) A permittee operating under an ACS ~~shall~~ must submit to the Agency reports containing such reasonable information and at such reasonable frequency as the Agency may specify ~~pursuant to~~under a permit condition ~~of a permit~~ or general procedures established by the Agency, to assure that the terms of the ACS are met.

c) A permittee operating under an ACS ~~shall~~ must notify the Agency within 72 hours by telephone or telegram of circumstances~~,~~ which will make compliance with the requirements of the ACS impossible.

1) This notice ~~shall~~ must be followed within ten days by written confirmation which describes the circumstances which prevent compliance with the

requirements of the ACS and supplies a preliminary Compliance Program which will result in compliance with this Chapter.

2) The permittee ~~shall~~ must take all reasonable steps to come into compliance with the ACS or this Chapter as expeditiously as possible.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 202.303 Monitoring and Testing

The Agency may require that equipment testing and monitoring~~, as~~ authorized ~~elsewhere~~ in this Chapter~~,~~ accompany the construction or operation of emission sources under a permit containing an ACS.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 202.304 Compliance Dates

a) ~~No~~ An owner or operator subject to a permit utilizing an ACS is not relieved of the responsibility ~~for achieving and maintaining~~to achieve and maintain a reduction of emissions as expeditiously as practicable, but not later than the compliance date required under other applicable regulations.

b) Notwithstanding subsection (a), an owner or operator may demonstrate compliance with 35 Ill. Adm. Code 215 ~~pursuant to~~under an Agency approved alternative compliance plan ~~contained~~ in a permit ~~utilizing~~ using an ACS ~~which is~~the owner or operator applied for ~~prior to~~before December 31, 1982. The Agency ~~shall~~ must approve such an alternative compliance plan if, and only if, the applicant demonstrates that:

1) The alternative compliance plan extends the compliance date for each emission source subject to the ACS no longer than necessary to enable that emission source to ~~utilize~~ use the ACS, but in no case later than December 31, 1987;

2) The emission source belongs to a category of emission sources having a compliance date of December 31, 1982, or later under 35 Ill. Adm. Code 215;

3) ~~The use of~~Using an ACS will result in either greater or faster overall emission reductions than would otherwise be achieved; and

4) ~~Such~~ The extension is consistent with the requirements of the Clean Air Act.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 202.305 Public Participation

The initial issuance of a permit containing an ACS ~~shall~~ must be subject to applicable Agency public participation procedures (35 Ill. Adm. Code 166) ~~prior to issuance~~before the Agency issues the permit. At a minimum, the Agency ~~shall~~ must provide an opportunity for public comment.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 202.306 Standards for Issuance

The Agency ~~shall~~ must issue a permit containing an ACS if, and only if, the permit applicant demonstrates that:

a) The ACS provides, in the aggregate with respect to each regulated pollutant, equivalent or less total emissions than would otherwise be required.

b) The impact of the ACS is environmentally equivalent to that which would otherwise be achieved and maintained under existing requirements.

c) The methods for assuring compliance with the conditions and requirements of the permit under the ACS are equivalent to the those that are associated with otherwise applicable requirements.

d) The ACS complies with any applicable requirements ~~contained~~ in 35 Ill. Adm. Code 203, 230, or 231.

e) USEPA has not disapproved the proposed ACS or any compliance schedule it ~~may contain due to the existence~~contains because of a federal enforcement action pending against a participant in the ACS.

f) The ACS does not permit an increase in emissions of any pollutant ~~which is~~ listed or regulated ~~pursuant to~~under Section 112 of the ~~Clean Air Act~~CAA (42 U.S.C. 7412 et seq.).

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 202.307 Notification to USEPA

~~Upon issuance of~~When it issues an ACS permit, the Agency ~~shall~~ must notify USEPA of emission limitations, alternative compliance plans, and any other permit conditions applicable to emission sources under an ACS.

(Source: Amended at 48 Ill. Reg._____, effective _____)

SUBPART D: PERMIT DURATION, REVISION AND RENEWAL

Section 202.401 Duration

a) A permit containing an ACS ~~shall~~ must be issued for no longer than five years~~,~~ or ~~for such~~a shorter period ~~as~~ the Agency ~~may specify~~specifies as necessary for periodic review of the ACS or to accomplish the purposes of the Act or ~~of~~ this Chapter. However, an ACS permit may not be issued for a period ~~of time which is~~ greater than the useful life of an emission source which contributes an emission reduction to the ACS. The burden of proving the useful life of the emission source is on the applicant.

b) ~~Upon the initial issuance or renewal of~~When it issues or renews an ACS permit, the Agency ~~shall~~ must consider all factors which it reasonably construes as bearing upon the useful life of an emission source which contributes an emission reduction to the ACS. Where a shutdown emission source contributes an emission reduction to an ACS, the Agency ~~shall~~ must specify the useful life of the shutdown emission source in a permit condition. Factors which the Agency considers ~~shall~~ must include~~, as a minimum~~:

1) The anticipated useful life of the principal components of the emission source upon purchase;

2) The physical condition of the principal components of the emission source;

3) The technological acceptability of the emission source;

4) The economic viability of the emission source; and

5) The demonstrated useful life of emission sources of the same category or functional type.

c) The Agency ~~shall~~ must make a record of the factors considered and the basis for its initial or modified determination of useful life made ~~pursuant to~~under subsection (b).

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 202.402 Revision

a) Timing

1) An application for revision of a permit containing an ACS shall be submitted at least 180 days prior to the date on which the revision is required to go into effect.

2) If the standard under this Chapter changes for an emission source included in the ACS ~~is changed~~ and the permittee proposes a revised ACS ~~is being proposed~~, an application ~~for revision of~~to revise a permit containing the ACS ~~shall~~ must be submitted at least 90 days ~~prior to~~before the date a compliance plan must be submitted.

b) The applicant ~~shall~~ must submit the information ~~specified~~ in Section 202.210 which is necessary to show that the revised ACS will meet the standards ~~of~~ to issue a permit ~~issuance specified in~~under Section 202.306.

c) Unless the Agency finds that the proposed revisions to the ACS are not substantive in nature and do not alter fundamental details of the ACS ~~which was~~ approved under the prior permit, ~~issuance of~~issuing the revised permit ~~shall~~ must be subject to public participation ~~pursuant to~~under Section 202.305.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 202.403 Renewal

a) An application ~~for renewal of~~to renew a permit containing an ACS ~~shall~~ must be submitted at least 180 days ~~prior to the expiration of~~before the previous permit expires.

b) Applications for renewal ~~shall~~ must contain the information ~~specified~~ in Section 202.210. However, an analysis of the effect of the ACS on air quality ~~pursuant to~~under Section 202.212 need be provided only if:

1) The other information submitted ~~pursuant to~~under this subsection is different from the information upon which the Agency previously issued the permit ~~was previously issued~~, and

2) the differences include a change in the applicable emission limit or operation of the source or may otherwise significantly affect air quality.

c) Unless the Agency finds that changes in the application are not substantive in nature and do not alter fundamental details of the ACS ~~which was~~ approved under the prior permit, renewal of the permit ~~shall~~ must be subject to public participation ~~pursuant to~~under Section 202.305.

(Source: Amended at 48 Ill. Reg._____, effective _____)

SUBPART E: ALTERNATIVE CONTROL STRATEGIES INVOLVING MORE THAN ONE PERSON

Section 202.501 Applicability

Persons who propose or participate in a multi-person ACS ~~shall~~ must be subject to the rules ~~found~~ in this Subpart ~~in addition to~~and in the remainder of this Part.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 202.502 Permit Application

In addition to ~~the~~ information required in Section 212.210, persons who propose a multi-person ACS ~~shall~~must:

a) Identify the persons having ownership and control of the emission sources to be included in the ACS.

b) Provide a written agreement showing the participants' intent to pursue the multi-person ACS and ~~to~~ be jointly bound by the terms and conditions of any permits ~~which are~~ issued ~~pursuant to~~through the application.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 202.503 Duration

All permits issued under a multi-person ACS ~~shall~~ must have the same expiration date.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 202.504 Permit Conditions

Each participant in a multi-person ACS ~~shall~~ must be issued an individual permit, which ~~shall~~ must be conditioned on the continuing compliance of the other participants with the limitations in their permits.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 202.505 Records and Reports

All records and reports of the participants in a multi-person ACS which are not confidential in nature ~~shall~~ must be available for inspection to the other participants upon reasonable notice of a request to inspect.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 202.506 Revocation

Permit revocation or other sanctions may be initiated before the Board against any and all persons in ~~the~~ a multi-person ACS, regardless of the ownership and control of the emission

source at which the violations occurred or any contracts or other agreements between the participants.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 202.507 Termination

a) If a participant in a multi-person ACS intends to terminate involvement in the ACS, it ~~shall~~ must give written notice to the Agency and the other participants in the ACS at least 180 days ~~prior to~~before the anticipated termination date.

b) If the ACS will not meet the standards of issuance with only the remaining participants, they may:

1) Propose a revised ACS to include the remaining sources and persons. ~~;~~ ~~this~~This proposal ~~shall~~ must be submitted to the Agency at least 120 days before new permits are required; or

2) Apply for revised permits~~, pursuant to~~ under the otherwise applicable regulations in this Chapter. ~~; such~~This applications ~~shall~~ must be submitted at least 90 days before the permits are required; or

c) If the notice of termination of the multi-person ACS does not allow sufficient time to meet the ~~time periods~~deadlines in ~~Subsection~~ Section 202.507(b) ~~above~~, the participants may ~~seek variance relief from~~petition the Board for variance relief from the requirements of this Chapter and of the Act.

(Source: Amended at 48 Ill. Reg._____, effective _____)

TITLE 35: ENVIRONMENTAL PROTECTION
SUBTITLE B: AIR POLLUTION
CHAPTER I: POLLUTION CONTROL BOARD
SUBCHAPTER a: PERMITS AND GENERAL PROVISIONS
PART 203
MAJOR STATIONARY SOURCES CONSTRUCTION AND MODIFICATION

SUBPART A: GENERAL PROVISIONS

Section

SUBPART B: MAJOR STATIONARY SOURCES IN NONATTAINMENT AREAS

Section

SUBPART C: REQUIREMENTS FOR MAJOR STATIONARY SOURCES IN NONATTAINMENT AREAS

SUBPART F: OPERATION OF A MAJOR STATIONARY SOURCE OR MAJOR MODIFICATION

SUBPART G: GENERAL MAINTENANCE OF EMISSION OFFSETS

SUBPART H: OFFSETS FOR EMISSION INCREASES FROM ROCKET ENGINES AND MOTOR FIRING

AUTHORITY: Implementing Section 9.1 and 10 and authorized by Section 27 and 28.5 of the Environmental Protection Act ~~(Ill. Rev. Stat. 1991, ch. 111 1/2, pars. 1009.1, 1010 and 1027)~~[415 ILCS 5/9.1, 10, 27, 28.5].

SOURCE: Adopted and codified at 7 Ill. Reg. 9344, effective July 22, 1983; codified at 7 Ill. Reg. 13588; amended in R85-20 at 12 Ill. Reg. 6118, effective March 22, 1988; amended in R91-24 at 16 Ill. Reg. 13551, effective August 24, 1992; amended in R92-21 at 17 Ill. Reg. 6973, effective April 30, 1993; amended in R93-9 at 17 Ill. Reg. 16630, effective September 27, 1993; amended in R93-26 at 18 Ill. Reg. 6335, effective April 15, 1994; amended in R98-10 at 22 Ill. Reg. 5674, effective March 10, 1998; amended in R19-1 at 44 Ill. Reg. 14916, effective September 4, 2020; amended in R18-21 at 48 Ill. Reg._____, effective_____.

SUBPART A: GENERAL PROVISIONS

Section 203.101 Definitions

Unless otherwise specified ~~within~~ in this Part, the definitions of the terms ~~used~~ in this Part ~~shall be~~are the same as ~~those used in the Pollution Control Board (Board) Rules and Regulations~~the definitions in 35 Ill. Adm. Code 201 and 211.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 203.102 Incorporation by Reference

The following material is incorporated by reference. This incorporation does not include any later amendments or editions:

Definitions, 40 CFR 51.100 (1987)

(Source: Added at 48 Ill. Reg. _____, effective _____)

Section 203.103 Actual Construction

"Actual Construction" generally means ~~in general, initiation of~~initiating physical on-site construction activities on an emissions unit which are of a permanent nature. ~~Such~~ These activities include~~, but are not limited to, installation of~~ installing building supports and foundations, laying ~~of~~ underground pipework, and ~~erection of~~erecting permanent storage structures. With respect to a change in method of operation, this term refers to ~~those~~ on-site activities other than preparatory activities which mark the initiation of the change.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 203.104 Actual Emissions

"Actual Emissions" means the actual rate of annual emissions of a pollutant from an emissions unit as of a particular date. Actual emissions are equal to the average rate~~,~~ in tons per year~~,~~ at which the emissions unit actually emitted the pollutant during the two-year period which immediately precedes the particular date or ~~such~~ other period ~~which is~~ determined by the Illinois Environmental Protection Agency (Agency) to ~~be representative of~~represent normal source operation. Actual emissions ~~shall~~ must be calculated using the unit's actual operating hours, production rates, and types of materials processed, stored, or combusted during the selected time period; however:

a) The Agency ~~shall~~ must allow the use of a different time period ~~upon a demonstration by~~if the applicant demonstrates to the Agency that the time period is more representative of normal source operation. ~~Such~~ This demonstration may include~~, but need not be limited to,~~ operating records or other documentation of

events or circumstances indicating that the preceding two years is not representative of normal source operations.

b) The Agency may presume in the absence of reliable data on actual emissions that the source-specific allowable emissions for the emissions unit are equivalent to the actual emissions of the emissions unit.

c) For any emissions unit which has not begun normal operations on the particular date, the Agency ~~shall~~ must presume that the potential to emit of the emissions unit is equivalent to the actual emissions on that date.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 203.107 Allowable Emissions

a) "Allowable emissions" means the emission rate of a stationary source calculated using the maximum rated capacity of the source (unless the source is subject to federally enforceable permit conditions or other such federally enforceable limits which restrict the operating rate, or hours of operation, or both) and the most stringent of the following:

1) Any applicable standards adopted by the United States Environmental Protection Agency (USEPA) ~~pursuant to~~under Sections 111 and 112 of the ~~Clean Air Act~~CAA (42 ~~U.S.C.~~USC 7401, et seq.) and made applicable in Illinois ~~pursuant to~~under Section 9.1 of the Environmental Protection Act ~~(Act) (Ill. Rev. Stat. 1991, ch. 111 1/2, pars. 1001 et seq.)~~ [415 ILCS 5/~~1 et seq.~~9.1];

2) The applicable emission standards or limitations ~~contained~~ in this Chapter and approved by USEPA ~~pursuant to~~under Section 110(a)(2) or 110(a)(3) of the ~~Clean Air Act~~CAA, including ~~those~~ standards or limitations with a future compliance date and any other emission standard or limitation enforceable under the Environmental Protection Act or by ~~the~~ USEPA under Section 113 of the ~~Clean Air Act~~CAA; or

3) The emissions rate specified as a federally enforceable permit condition including ~~those~~ emissions rates with a future compliance date.

b) The allowable emissions may be based on a federally enforceable permit condition limiting material or fuel throughput.

c) If a source is not subject to an emission standard ~~described in~~under subsection (a) ~~above~~ and is not subject to a permit condition ~~described in~~under subsection (b) ~~above~~, the allowable emissions ~~shall~~ must be the source's potential to emit.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 203.110 Available Growth Margin

"Available growth margin" means the portion which remains of any emission allowance for new or modified major stationary sources ~~expressly~~ identified in the attainment demonstration approved by the United States Environmental Protection Agency under Section 172(c)(4) of the ~~Clean Air Act~~CAA (42 ~~U.S.C.~~USC 7502(c)(4)) for a particular pollutant and area in a zone (within a nonattainment area) to which economic development should be targeted~~,~~ in ~~accordance~~ compliance with Section 173(a)(1)(B) of the ~~Clean Air Act~~CAA (42 ~~U.S.C.~~USC 7503(a)(1)(B)).

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 203.112 Building, Structure and Facility

a) The terms "building", "structure", and "facility" include all of the pollutant-emitting activities which belong to the same industrial grouping, are located on one or more contiguous or adjacent properties, and are under the control of the same person (or persons under common control). Pollutant-emitting activities ~~shall~~ must be considered as part of the same "Major Group" (i.e., which have the same two-digit code) as described in the Standard Industrial Classification Manual, ~~1972, as amended by the 1977 Supplement (U.S. Government Printing Office stock numbers 4101-0066 and 003-005-00176-0, respectively)~~1987, incorporated by reference in 35 Ill. Adm. Code 720.111.

b) The terms "building", "structure", and "facility" shall also include:

1) the transfer of materials, including ~~but not limited to~~ grain, gasoline, petroleum liquids, coal, fertilizer, crushed stone, and ore~~,~~ from vessels, motor vehicles, or other conveyances, ~~irrespective~~ regardless of ownership or industrial grouping, to or from a building, structure, or facility as defined in subsection (a) ~~above~~, and

2) activities at or adjacent to such building, structure, or facility which are associated with such transfer, including ~~but not limited to the operation of~~operating engines to provide heat, refrigeration, or lighting~~,~~; operating ~~of~~ auxiliary engines for pumps or cranes~~,~~; and ~~transfer of~~transferring materials from hold to hold or tank to tank during onloading or offloading operations except those activities causing emissions resulting directly from internal combustion engines from transportation purposes or from a ~~non road~~non-road engine or ~~non road~~non-road vehicle as defined in Section 216 of the ~~Clean Air Act~~CAA (42 ~~U.S.C.~~USC 7401 et seq.).

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 203.113 Commence

As applied to construction of a major stationary source or major modification, "commence" means that the owner or operator has obtained all necessary preconstruction approvals or permits and either has:

a) Begun, or caused to begin, a continuous program of actual on-site construction of the source, to be completed within a reasonable time; or

b) Entered into binding agreements or contractural obligations, which cannot be cancelled or modified without substantial loss to the owner or operator, to undertake a program of actual construction of the source to be completed within a reasonable time.

c) For purposes of this Section, a "reasonable time" ~~shall~~ must be determined considering the following factors: ~~The~~ the nature and size of the project, the extent of design engineering, the amount of off-site preparation, whether equipment can be fabricated or can be purchased, when the project begins (considering both the seasonal nature of construction activity, ~~and~~ the existence of other projects competing for construction labor at the same time, and the ~~place of the environmental permit in the sequence of corporate and overall governmental approval~~time necessary to apply for and receive any environmental permit the construction requires), and the nature of the permittee (private, public, regulated, etc).

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 203.116 Construction

"Construction" means any physical change or change in the method of operation, including ~~but not limited to~~ fabrication, erection, installation, demolition, or modification of an emissions source unit, which would result in a change in actual emissions.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 203.117 Dispersion Enhancement Techniques

"Dispersion Enhancement Techniques" mean so much of the stack height of any source ~~as exceeds~~exceeding good engineering practice or any other dispersion technique, determined by ~~regulations at~~ 40 CFR 51.100 (1987) ~~(no future amendments or editions are included),~~ incorporated by reference at Section 203.102.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 203.119 Emission Baseline

"Emission baseline" means the starting point or reference level from which increases and decreases in emissions are measured. The rules governing determination of emission offsets,

calculations of net emission increases, and evaluation under 35 Ill. Adm. Code 202~~, Alternative Control Strategies~~ specify the particular emission baseline that applies ~~for that purpose~~.

Section 203.121 Emission Offset

"Emission offset" means a creditable emission reduction used to compensate for the increase in emissions resulting from a new major source or a major modification in ~~accordance~~ compliance with Sections 203.302 and 203.303 ~~of this Part~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 203.122 Emissions Unit

"Emissions unit" means any part of a stationary source which emits or has the potential to emit any air pollutant subject to regulation under the Act or this Chapter or by the United States Environmental Protection Agency under the ~~Clean Air Act~~CAA (42 ~~U.S.C.~~USC 7401 et seq.).

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 203.123 Federally Enforceable

"Federally enforceable" means enforceable by the United States Environmental Protection Agency.

(Source: Former Section 203.123 renumbered to Section 203.122, new Section 203.123 added at 17 Ill. Reg. 6973, effective April 30, 1993)

Section 203.124 Fugitive Emissions

"Fugitive Emissions" means ~~those~~ emissions which could not reasonably pass through a stack, chimney, vent, or other functionally equivalent opening.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 203.125 Installation

"Installation" means an identifiable piece of equipment, including~~, but not limited to,~~ boilers, furnaces, reactors, dryers, incinerators, heaters, and coating lines.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 203.126 Lowest Achievable Emission Rate

"LAER" is an acronym for lowest achievable emission rate.

(Source: Amended at 17 Ill. Reg. 6973, effective April 30, 1993)

Section 203.127 Nonattainment Area

"Nonattainment area" means an~~An~~ area designated by USEPA as nonattainment for a given pollutant ~~pursuant to~~under Section 107 of the ~~Clean Air Act~~CAA (42 ~~U.S.C.~~USC 7407).

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 203.128 Potential to Emit

"Potential to emit" means the maximum capacity of a stationary source to emit a pollutant under its physical and operational design. Any physical or operational limitation on the capacity of the source to emit a pollutant, including air pollution control equipment and restrictions on hours of operation or on the type or amount of material combusted, stored, or processed, ~~shall~~ must be treated as part of its design only if the limitation or the effect it would have on emissions is federally enforceable. Secondary emissions do not count in determining the potential to emit of a stationary source.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 203.131 Reasonable Further Progress

"Reasonable Further Progress" means the annual incremental reductions in the emissions of the applicable air pollutant as determined by USEPA ~~pursuant to~~under Part D of the ~~Clean Air Act~~CAA (42 ~~U.S.C.~~USC 7501 et seq.) and federal regulations adopted ~~pursuant thereto~~under it.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 203.134 Secondary Emissions

"Secondary Emissions" means the emissions which would occur as a result of the construction or operation of a major stationary source or major modification~~,~~ but do not come from the major stationary source or major modification itself. For the purpose of this Part, secondary emissions must be specific, ~~well defined~~well-defined, and quantifiable~~,~~ and must impact the same general area as the stationary source or modification which causes the secondary emissions. Secondary emissions may include~~, but are not limited to,~~ emissions from any off-site support facility which would not be constructed or increase its emissions except as a result of the construction or operation of the major stationary source or major modification.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 203.136 Stationary Source

"Stationary Source" means any building, structure, facility, or installation which emits or may emit any air pollutant subject to regulation under the Act or this Chapter or by USEPA under the ~~Clean Air Act~~CAA (42 ~~U.S.C.~~USC 7401 et seq.).

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 203.145 Volatile Organic Material (Repealed)

(Source: Repealed at 17 Ill. Reg. 16630, effective September 27, 1993)

Section 203.150 Public Participation

~~Prior to~~Before the initial issuance or revision of a permit ~~pursuant to~~under Subpart B, the Agency ~~shall~~ must provide, at a minimum, notice of the proposed issuance of a permit, a comment period, and opportunity for public hearing ~~pursuant to the~~under Agency public participation procedures ~~set forth~~ at 35 Ill. Adm. Code 252.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 203.155 Severability (Repealed)

(Source: Repealed at 12 Ill. Reg. 6118, effective March 22, 1988)

SUBPART B: MAJOR STATIONARY SOURCES IN NONATTAINMENT AREAS

Section 203.201 Prohibition

In any nonattainment area, ~~no~~ a person ~~shall~~ must not cause or allow the construction of a new major stationary source or major modification that is major for the pollutant for which the area is designated a nonattainment area, except ~~as~~ in compliance with this Part for that pollutant. In areas designated nonattainment for ozone, this prohibition ~~shall~~ must apply to new major stationary sources or major modifications of sources that emit volatile organic materials or nitrogen oxides. Revisions to this Part ~~which were~~ adopted to implement the Clean Air Act Amendments of 1990 ~~shall~~ must not apply to any new major stationary source or major modification for which a permit application was submitted by June 30, 1992, for PM-10, May 15, 1992, for SO_2, or ~~by~~ November 15, 1992, for nitrogen oxides and volatile organic material emissions for sources located in all ozone nonattainment areas.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 203.202 Coordination with Permit Requirement and Application ~~Pursuant to~~Under 35 Ill. Adm. Code 201

For new major sources and major modifications, ~~the fulfillment of~~meeting the requirements of 35 Ill. Adm. Code 201 related to construction, including the permit requirements of 35 Ill. Adm. Code 201.142, ~~shall~~ must be combined with the requirements of this Subpart.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 203.203 Construction Permit Requirement and Application

a) A construction permit is required ~~prior to~~before actual construction of a major new source or major modification.

b) Applications for construction permits required under this Section ~~shall~~ must contain sufficient information to demonstrate compliance with 35 Ill. Adm. Code 201 and the requirements of this Part including~~, but not limited to,~~ Subpart C.

c) The permit ~~shall~~ must include conditions specifying the manner in which the requirements of Subparts B and C ~~of this Part~~ are satisfied.

d) ~~No~~ A permittee ~~shall~~ must not violate any condition ~~contained~~ in a construction permit issued for a new major stationary source or major modification which is subject to this Part.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 203.204 Duration of Construction Permit (Repealed)

(Source: Repealed at 12 Ill. Reg. 6118, effective March 22, 1988)

Section 203.205 Effect of Permits

The issuance of a permit for a source subject to ~~the requirements of~~ this Part ~~shall~~ must not relieve any person of the responsibility to comply fully with applicable provisions of the Environmental Protection Act ~~(Act) (Ill. Rev. Stat. 1985, ch. 111 1/2, pars 1001 et seq.)~~, this Chapter, and any other applicable requirements under local, state, or federal law.

(Source: Amended at 48 Ill. Reg._____, effective _____) .

Section 203.206 Major Stationary Source

a) For purposes of this Part, the term "major stationary source" ~~shall~~ exclusively ~~mean~~ means "building, structure and facility," as those terms are defined in Section ~~203.113 of this Part~~203.112.

b) The following constitute a major stationary source:

1) For an area designated as nonattainment for ozone, a major stationary source is a stationary source which emits or has the potential to emit volatile organic material in an amount equal to or greater than the following:

A) 100 tons per year in an area classified as marginal or moderate nonattainment for ozone;

B) 50 tons per year in an area classified as serious nonattainment for ozone;

C) 25 tons per year in an area classified as severe nonattainment for ozone; and

D) 10 tons per year in an area classified as extreme nonattainment for ozone.

2) For an area designated as nonattainment for nitrogen dioxide, a major stationary source is a stationary source which emits or has the potential to emit 100 tons per year or more of nitrogen dioxide.

3) For an area designated as nonattainment for ozone, a major stationary source is a stationary source which emits or has the potential to emit nitrogen oxides in an amount equal to or greater than the following, unless United States Environmental Protection Agency (USEPA) has made a finding under Sections 110 and 182(f) of the ~~Clean Air Act~~CAA that controlling ~~of~~ emissions of nitrogen oxides from ~~such~~ the source ~~shall~~ is not ~~be~~ required:

A) 100 tons per year in an area classified as marginal or moderate nonattainment for ozone,

B) 50 tons per year in an area classified as serious nonattainment for ozone,

C) 25 tons per year in an area classified as severe nonattainment for ozone, and

D) 10 tons per year in an area classified as extreme nonattainment for ozone.

4) For an area designated nonattainment for PM-10, a major stationary source is a stationary source which emits or has the potential to emit:

A) 100 tons per year or more of PM-10 in an area classified as moderate nonattainment area, or

B) 70 tons per year or more of PM-10 in an area classified as serious nonattainment.

5) For an area designated nonattainment for carbon monoxide, a major stationary source is a stationary source which emits or has the potential to emit:

A) 100 tons per year or more of carbon monoxide in a nonattainment area, except as provided in subsection (b)(5)(B),

B) 50 tons per year or more in an area classified as "serious" nonattainment for carbon monoxide where stationary sources significantly contribute to ambient carbon monoxide levels, as determined under rules issued by USEPA~~, pursuant to~~ under the ~~Clean Air Act~~CAA.

6) For an area designated nonattainment for a pollutant other than ozone, nitrogen dioxide, PM-10, or carbon monoxide, a major stationary source is a stationary source which emits or has the potential to emit 100 tons per year or more of the pollutant.

c) Any physical change that occurs at a stationary source which does not qualify under subsection (a) ~~of this Section~~ as a major stationary source will be considered a major stationary source~~,~~ if the change would constitute a major stationary source by itself.

d) For purposes of this Part, in areas that are classified as serious, severe, or extreme nonattainment, the fugitive emissions of a stationary source ~~shall~~ must be included in determining whether it is a major stationary source. In areas that are not classified as serious, severe, or extreme nonattainment, the fugitive emissions of a stationary source ~~shall~~ must not be included in determining whether it is a major stationary source, unless the source belongs to one of the following categories of stationary sources:

1) Coal cleaning plants (with thermal dryers);

2) Kraft pulp mills;

3) Portland cement plants;

4) Primary zinc smelters;

5) Iron and steel mills;

6) Primary aluminum ore reduction plants;

7) Primary copper smelters;

8) Municipal incinerators capable of charging more than 250 tons of refuse per day;

9) Hydrofluoric, sulfuric, or nitric acid plants;

10) Petroleum refineries;

11) Lime plants;

12) Phosphate rock processing plants;

13) Coke oven batteries;

14) ~~Sulfer~~ Sulfur recovery plants;

15) Carbon black plants (furnace process);

16) Primary lead smelters;

17) Fuel conversion plants;

18) Sintering plants;

19) Secondary metal production plants;

20) Chemical process plants;

21) Fossil-fuel boilers (or combination ~~thereof~~of them) totaling more than 250 million Btu per hour heat input;

22) Petroleum storage and transfer units with a total storage capacity exceeding 300,000 barrels;

23) Taconite ore processing plants;

24) Glass fiber processing plants;

25) Charcoal production plants;

26) Fossil fuel-fired steam electric plants of more than 250 million Btu per hour heat input;

27) Any other stationary source categories regulated by a standard promulgated under Section 111 or 112 of the ~~Clean Air Act~~CAA (42 ~~U.S.C.~~USC 7411, 7412), but only with respect to ~~those~~ air pollutants that have been regulated for that category;

28) Any other stationary source category designated by the USEPA by rule.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 203.207 Major Modification of a Source

a) Except ~~as provided in~~under subsection (c), (d), (e)~~,~~, or (f), a physical change~~,~~ or change in the method of operation of a major stationary source that would result in a significant net emissions increase of any pollutant for which the area is designated a nonattainment area~~, shall~~ must constitute a major modification of a source.

b) Any net emissions increase that is significant for volatile organic material or nitrogen oxides ~~shall~~ must be considered significant for ozone.

c) A physical change or change in the method of operation ~~shall~~ must not include:

1) Routine maintenance and repair.

2) Use of an alternative fuel or raw material by reason of any order under Section 2(a) and (b) of the Energy Supply and Environmental Coordination Act of 1974 (15 USC 791), the Power Plant and Industrial Fuel Use Act of 1978 (42 USC 8301) (or any superseding legislation)~~,~~ or by reason of a natural gas curtailment plan under the Federal Power Act (16 USC 791, et seq.).

3) Use of an alternative fuel by reason of an order or rule under Section 125 of the ~~Clean Air Act~~CAA (42 USC 7425).

4) Use of an alternative fuel at a steam generating unit to the extent that the fuel is generated from municipal solid waste.

5) Use of an alternative fuel or raw material by a stationary source that:

A) Was capable of accommodating ~~such~~ the alternative fuel or raw material before December 21, 1976, and that has continuously remained capable of accommodating ~~such~~ the fuels or materials unless ~~such~~ the change would be prohibited under any enforceable permit condition established after December 21, 1976, under 40 CFR 52.21, 35 Ill. Adm. Code 204, this Part, or 35 Ill. Adm. Code 201.142 or 201.143; or

B) Is approved for use under any permit issued under this Part or 35 Ill. Adm. Code 201.142 or 201.143.

6) An increase in the hours of operation or in the production rate, unless ~~such~~ the change is prohibited under any enforceable permit condition ~~that was~~ established after December 21, 1976~~,~~ under 40 CFR 52.21, 35 Ill. Adm. Code 204, this Part, or 35 Ill. Adm. Code 201.142 or 201.143.

7) Any change in ownership at a stationary source.

d) In an area classified as serious or severe nonattainment for ozone, increased emissions of volatile organic material or nitrogen oxides resulting from any physical change in, or change in the method of operation of, a stationary source located in the area ~~shall~~ must be considered de minimis for purposes of this Part if the increase in net emissions of ~~such~~ the air pollutant from ~~such~~ the source does not exceed 25 tons when aggregated with all other net increases in emissions from the source over any period of five consecutive calendar years that includes the year in which such increase occurred.

e) In the case of any major stationary source of volatile organic material or nitrogen oxides located in an area classified as serious or severe nonattainment for ozone (other than a source that emits or has the potential to emit 100 tons or more of volatile organic material or nitrogen oxides per year), whenever any change at that source results in any increase (other than a de minimis increase) in emissions of volatile organic material or nitrogen oxides, respectively, from any discrete operation, unit, or other pollutant emitting activity at the source, ~~such~~ the increase ~~shall~~ must be considered a major modification for purposes of this Part, except ~~such~~ the increase ~~shall~~ must not be considered a major modification for such purposes if the owner or operator of the source elects to offset the increase by a greater reduction in emissions of volatile organic material or nitrogen oxides, respectively, from other operations, units, or activities within the source at an internal offset ratio of at least 1.3 to 1.

f) In areas classified as extreme nonattainment for ozone, beginning on the date that an area is classified by USEPA as an extreme nonattainment area for ozone, any physical change in or change in the method of operation of a major stationary source that results in any increase in emissions of volatile organic material or nitrogen oxides from a discrete operation, unit, or other pollutant emitting activity ~~shall~~ must be considered a major modification.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 203.208 Net Emission Determination

A net emissions increase is the amount by which the sum of any increase in actual emissions from a particular physical change or change in method of operation at a source, and any other increases and decreases in actual emissions at the source that are contemporaneous with the particular change and are otherwise creditable, exceeds zero. The following steps determine whether the increase or decrease in emissions is available.

a) Except for increases or decreases in volatile organic material and nitrogen oxides emissions in serious and severe ozone nonattainment areas, which are addressed in Section 203.209(b), an increase or decrease in actual emissions is

contemporaneous only if it occurs between the date that an increase from a particular change occurs and the date five years before a timely and complete application is submitted for the particular change. It must also occur after either April 24, 1979, or the date the area is designated by the United States Environmental Protection Agency as a nonattainment area for the pollutant, whichever is more recent.

b) An increase or decrease in actual emissions is creditable:

1) Only if there is not in effect for the source at the time the particular change occurs, a permit which relied on the same increase or decrease in actual emissions; and

2) Only to the extent the new and old levels differ.

c) A decrease in actual emissions is creditable to the extent that:

1) It is federally enforceable at and after the time that actual construction on the particular change begins;

2) It has approximately the same qualitative significance for public health and welfare as that attributed to the increase from the particular change;

3) The old level of actual emissions or the old level of allowable emissions, whichever is lower, exceeds the new level of actual emissions; and

4) It is demonstrated by the Agency not to have been previously relied on in issuing any permit ~~pursuant to~~under this Part or 35 Ill. Adm. Code 201.142 or 201.143 or for demonstrating attainment or reasonable further progress in the nonattainment area which the particular change will impact.

d) An increase that results from a physical change at a source occurs when the emissions unit on which construction occurred becomes operational and begins to emit a particular pollutant. Any replacement unit that requires shakedown becomes operational only after a shakedown period not to exceed 180 days.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 203.209 Significant Emissions Determination

a) A net emission increase in the pollutant emitted is significant if the rate of emission is equal to or ~~in excess of~~exceeds the following:

1) Carbon monoxide: 100 tons per year (tpy)

2) Nitrogen oxides: 40 tpy for a nonattainment area for nitrogen dioxide and 40 tpy for an ozone nonattainment area, except as provided in subsection (b) ~~of this Section~~

3) Sulfur dioxide: 40 tpy

4) Particulate matter measured as PM-10: 15 tpy

5) Ozone: 40 tpy of volatile organic material, except as provided in subsection (b) ~~of this Section~~

6) Lead: 0.6 tpy

b) For areas classified as serious or severe nonattainment for ozone, an increase in emissions of volatile organic material or nitrogen oxides ~~shall~~ must be considered significant if the net emissions increase of ~~such~~ the air pollutant from a stationary source located within ~~such~~ the area exceeds 25 tons when aggregated with all other net increases in emissions from the source over any period of 5 consecutive calendar years which includes the calendar year in which such increase occurred. This provision ~~shall~~ must become effective beginning November 15, 1992, or ~~such~~ the later date ~~that~~ in which an area is classified as a serious or severe nonattainment area for ozone.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 203.210 Relaxation of a Source-Specific Limitation

a) ~~No~~ A person ~~shall~~ must not cause or allow the operation of a source so as to exceed any enforceable limitation which affects or defines the applicability of the requirements of this Part to a stationary source or modification by specifying the permissible emission rate~~,~~; operating hours~~,~~; the type or amount of material processed, stored, or combusted~~,~~; or other aspects of source operation.

b) ~~At such time that~~When a particular source or modification becomes a major stationary source or major modification solely ~~by virtue of a relaxation in, or expiration of,~~because any enforceable limitation ~~which was~~ established after August 7, 1980, on the capacity of the source or modification otherwise to emit a pollutant, such as a restriction on hours of operation, relaxes or expires, then the requirements of this Part ~~shall~~ must apply as though construction had not yet commenced on the source or modification.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 203.211 Permit Exemption Based on Fugitive Emissions

The provisions of this Part ~~shall~~ must not apply to a source or modification that would be a major stationary source or major modification only if fugitive emissions, to the extent quantifiable ~~as evidenced by~~under 35 Ill. Adm. Code 201.122, are considered in calculating the potential to emit of the stationary source or modification and the source does not belong to any of the categories ~~enumerated~~ in Section 203.206(d).

(Source: Amended at 48 Ill. Reg._____, effective _____)

SUBPART C: REQUIREMENTS FOR MAJOR STATIONARY SOURCES IN NONATTAINMENT AREAS

Section 203.301 Lowest Achievable Emission Rate

a) For any source, lowest achievable emission rate (LAER) will be the more stringent rate of emissions based on the following:

1) The most stringent emission limitation ~~which is contained~~ in the implementation plan of any state for ~~such~~ the class or category of stationary source, unless it is demonstrated that ~~such~~ the limitation is not achievable; or

2) The most stringent emission limitation ~~which is~~ achieved in practice by ~~such a~~the class or category of stationary source. This limitation, when applied to a modification, means the lowest achievable emissions rate for the new or modified emissions units within the stationary source. In no event ~~shall~~ must the application of this term permit a proposed new or modified stationary source to emit any pollutant in excess of the amount allowable under an applicable new source performance standard adopted by United States Environmental Protection Agency (USEPA) ~~pursuant to~~under Section 111 of the ~~Clean Air Act~~CAA and made applicable in Illinois ~~pursuant to~~under Section 9.1 of the Act.

b) The owner or operator of a new major stationary source ~~shall~~ must demonstrate that the control equipment and process measures applied to the source will produce LAER.

c) Except as provided in subsection (e) or (f) ~~below~~, the owner or operator of a major modification ~~shall~~ must demonstrate that the control equipment and process measures applied to the major modification will produce LAER. This requirement applies to each emissions unit at which a net increase in emissions of the pollutant has occurred or would occur as a result of a physical change or change in the method of operation.

d) The owner or operator ~~shall~~ must provide a detailed showing that the proposed emission limitations constitute LAER. ~~Such~~ This demonstration ~~shall~~ must include:

1) A description of the manner in which the proposed emission limitation was selected, including a detailed listing of information resources,

2) Alternative emission limitations, and

3) Such other reasonable information as the Agency may request as necessary to determine whether the proposed emission limitation is LAER.

e) If the owner or operator of a major stationary source (other than a source which emits or has the potential to emit 100 tons per year or more of volatile organic material or nitrogen oxides) located in an area classified as serious or severe nonattainment for ozone does not elect to provide internal offsets for a change at the source in ~~accordance~~ compliance with Section 203.207(e) ~~of this Part~~, ~~such~~ the change ~~shall~~ must be considered a major modification for purposes of this Part, but in applying this Section in the case of any such modification, the Best Available Control Technology (BACT), as defined in section 169 of the Clean Air Act, ~~shall~~ must be substituted for the Lowest Achievable Emission Rate (LAER). BACT ~~shall~~ must be determined in ~~accordance~~ compliance with policies and procedures published by USEPA.

f) In the case of any major stationary source of volatile organic material or nitrogen oxides located in an area classified as serious or severe nonattainment for ozone which emits or has the potential to emit 100 tons per year or more of volatile organic material or nitrogen oxides~~, respectively~~, whenever any change at that source results in any increase (other than a de minimis increase) in emissions of volatile organic material or nitrogen oxides~~, respectively,~~ from any discrete operation, unit, or other pollutant emitting activity at the source, ~~such~~ the increase ~~shall~~ must be considered a major modification for purposes of this Part, except that if the owner or operator elects to offset the increase by a greater reduction in emissions of volatile organic material or nitrogen oxides~~, respectively,~~ from other operations, units, or activities within the source at an internal offset ratio of at least 1.3 to 1, the requirements of this Section concerning LAER ~~shall~~ must not apply.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 203.302 Maintenance of Reasonable Further Progress and Emission Offsets

a) The owner or operator of a new major source or major modification ~~shall~~ must provide emission offsets equal to or greater than the allowable emissions from the source or the net increase in emissions from the modification sufficient to allow the Agency to determine that the source or modification will not interfere with reasonable further progress ~~as set forth in~~under Section 173 of the ~~Clean Air Act~~CAA (42 ~~U.S.C.~~USC 7401 et seq.).

1) For new major sources or major modifications in ozone nonattainment areas the ratio of total emission reductions provided by emission offsets for volatile organic material or nitrogen oxides to total increased emissions of such contaminants ~~shall~~ must be at least as follows:

A) 1.1 to 1 in areas classified as marginal;

B) 1.15 to 1 in areas classified as moderate;

C) 1.2 to 1 in areas classified as serious;

D) 1.3 to 1 in areas classified as severe; and

E) 1.5 to 1 in areas classified as extreme.

2) The offset requirement ~~provided~~ in subsection (a)(1) ~~above shall~~must not be applicable in extreme areas to a modification of an existing source:

A) if ~~such~~ the modification consists of installation of equipment required to comply with the implementation plan or the ~~Clean Air Act~~CAA; or

B) if the owner or operator of the source elects to offset the increase by a greater reduction in emissions of ~~such~~ the pollutant from other discrete operations, units, or activities within the source at an internal offset ratio of at least 1.3 to 1.

b) The Agency ~~shall~~ must allow the use of all or some portion of the available growth margin to satisfy subsection (a) ~~above~~ if the owner or operator can present evidence that the possible sources of emission offsets were investigated, none were available at that time, and the new or modified major stationary source is located in a zone (within the nonattainment area) identified by United States Environmental Protection Agency, in consultation with the Secretary of Housing and Urban Development, as a zone to which economic development should be targeted.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 203.303 Baseline and Emission Offsets Determination

a) An emission offset must be obtained from a source in operation ~~prior to~~before the permit application for the new or modified source. Emission offsets must be effective ~~prior to~~before start-up of the new or modified source.

b) The emission offsets provided:

1) Must be of the same pollutant and ~~further be of~~ a type with approximately the same qualitative significance for public health and welfare as that attributed to the increase from a particular change;

2) Must, in the case of a fuel combustion source, be based on the type of fuel being burned at the time the permit application is filed, and, if offset is to be produced by a future switch to a cleaner fuel, be accompanied by evidence that long-term supplies of the ~~clean~~ cleaner fuel are available and a commitment to a specified alternative control measure which would achieve the same degree of emission reduction if return ~~of~~ to the dirtier fuel is proposed;

3) Must, in the case of a past shutdown of a source or permanent curtailment of production or operating hours, have occurred since April 24, 1979, or the date the area is designated a nonattainment area for the pollutant, whichever is more recent, and, until the United States Environmental Protection Agency has approved the attainment demonstration and state trading or marketing rules for the relevant pollutant, the proposed new or modified source must be a replacement for the shutdown or curtailment;

4) Must be federally enforceable by permit;

5) Must not have been previously relied on, as demonstrated by the Agency, in issuing any permit ~~pursuant to~~under 35 Ill. Adm. Code 201.142 or 201.143 or this Part, or for demonstrating attainment or reasonable further progress.

c) The baseline for determining the extent to which emission reductions are creditable as offsets ~~shall~~ must be the actual emissions of the source from which the offset is to be obtained, to the extent they are within any applicable emissions limitations of this Chapter or the Act or any applicable standards adopted by USEPA ~~pursuant to~~under Section 111 and 112 of the ~~Clean Air Act~~CAA, and made applicable in Illinois ~~pursuant to~~under Section 9.1 of the Environmental Protection Act ~~(Ill. Rev. Stat. 1991, ch. 111 1/2, par. 1009.1)~~ [415 ILCS 5/9.1].

d) The location of sources providing the emission reductions to fulfill the offset requirements of this Section:

1) Must be achieved in the same nonattainment area as the increase being offset, except ~~as provided~~ as follows:

A) An owner or operator may obtain the necessary emission reductions from another nonattainment area ~~where such~~when the other area has an equal or higher nonattainment classification than the area in which the source is located, and

B) The emission reductions from ~~such~~ the other area contribute to a violation of the national ambient air quality standard in the nonattainment area in which the new or modified source is located.

2) Must, for particulate matter, sulfur dioxide, and carbon monoxide, be such that, relative to the site of the proposed new or modified source, the location of the offset, together with its effective stack height, ensures a positive net air quality benefit. This ~~shall~~ must be demonstrated by atmospheric simulation modeling, unless the sources providing the offset are on the same premises or in the immediate vicinity of the new or modified source and the pollutants disperse from substantially the same effective stack height. In determining effective stack height, credit ~~shall~~ must not be given for dispersion enhancement techniques. The owner or operator of a proposed new or modified source ~~shall~~ must perform the analysis to demonstrate the acceptability of the location of an offset, if the Agency declines to make ~~such~~ that analysis. Effective stack height means actual stack height plus plume rise. Where actual stack height exceeds good engineering practices, as determined ~~pursuant to~~under 40 CFR 51.100 (1987) ~~(no future amendments or editions are included)~~, incorporated by reference at Section 203.102, the creditable stack height ~~shall~~ must be used.

e) ~~Replacement of~~Replacing one volatile organic material with another of lesser reactivity does not constitute an emission reduction.

f) Emission reductions otherwise required by the ~~Clean Air Act~~CAA (42 ~~U.S.C.~~USC 7401 et seq.) ~~shall~~ must not be creditable for purposes of any such offset requirement. Incidental emission reductions ~~which are~~ not otherwise required by the ~~Clean Air Act shall~~CAA must be creditable as emission reductions for such purposes if ~~such~~ the emissions reductions meet the requirements of this subpart.

Section 203.304 Exemptions from Emissions Offset Requirement (Repealed)

(Source: Repealed at 12 Ill. Reg. 6118, effective March 22, 1988)

Section 203.305 Compliance by Existing Sources

The owner or operator ~~shall~~ must demonstrate that all major stationary sources which he or she owns or operates (or which are owned or operated by any entity controlling or controlled by, or under common control, with the owner or operator) in Illinois are in compliance, or on a schedule for compliance, with all applicable state and federal air pollution control requirements. For purposes of this Section, a schedule for compliance must be federally enforceable or ~~contained~~ in an order of the Illinois Pollution Control Board or a court decree.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 203.306 Analysis of Alternatives

The owner or operator ~~shall~~ must demonstrate that benefits of the new major source or major modification significantly outweigh the environmental and social costs imposed as a result of its location, construction, or modification, based upon an analysis of alternative sites, sizes, production processes, and environmental control techniques for ~~such~~ the proposed source.

SUBPART H: OFFSETS FOR EMISSION INCREASES FROM ROCKET ENGINES AND MOTOR FIRING

Section 203.801 Offsetting by Alternative or Innovative Means

A source may offset, by alternative or innovative means, emission increases from rocket engine and motor firing, and cleaning related to ~~such~~ that firing, at an existing or modified major source that tests rocket engines or motors under the following conditions:

a) Any modification proposed is solely for the purpose of expanding the testing of rocket engines or motors at an existing source ~~that is~~ permitted to test ~~such~~ those engines on November 15, 1990;

b) The source demonstrates to the satisfaction of the Agency that it has used all reasonable means to obtain and ~~utilize~~ use offsets, as determined on an annual basis, for the emissions increases beyond allowable levels, that all available offsets are being used, and that sufficient offsets are not available to the source;

c) The source has obtained a written finding from the Department of Defense, Department of Transportation, National Aeronautics and Space Administration, or other appropriate Federal agency, that the testing of rocket motors or engines at the facility is required for a program essential to ~~the~~ national security; and

d) The source will comply with an alternative measure, imposed by the Agency or Board, designed to offset any emission increases beyond permitted levels not directly offset by the source.

SUBPART C: OPERATIONAL IMPLEMENTATION

SUBPART D: SEASONAL EMISSIONS MANAGEMENT

SUBPART E: ALTERNATIVE ATU GENERATION

SUBPART F: MARKET TRANSACTIONS

SUBPART G: PERFORMANCE ACCOUNTABILITY

AUTHORITY: Implementing Section 9.8 and authorized by Sections 25 and 28 of the Environmental Protection Act [415 ILCS 5/9.8, 27 and 28].

SOURCE: Adopted in R97-13 at 21 Ill. Reg. 15777, effective November 27, 1997; amended in R05-11 at 29 Ill. Reg. 8848, effective June 13, 2005; amended in R18-22 at 43 Ill. Reg. 441, effective December 26, 2018; amended in R 18-21 at 48 Ill Reg. _____, effective _____.

SUBPART A: GENERAL PROVISIONS

Section 205.100 Severability

If any ~~Section, subsection, sentence or clause~~provision of this Part is judged invalid, ~~such~~ that adjudication ~~shall~~ must not affect the validity of this Part as a whole or of any ~~Section, subsection, sentence or clause thereof~~provision not judged invalid.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 205.110 Purpose

The purpose of this Part is to implement the Emissions Reduction Market System (ERMS) regulatory program consistent with ~~the assurances that are specified in~~ Section 9.8 of the Environmental Protection Act [415 ILCS 5/9.8]. The ERMS is designed~~, as further specified in this Part,~~ to achieve the following:

a) Implement innovative and cost-effective strategies to attain the national ambient air quality standard (NAAQS) for ozone and to meet the requirements of the Clean Air Act;

b) Increase flexibility for participating sources and lessen the economic impacts associated with implementation of the Clean Air Act;

c) Take into account the findings of the national ozone transport assessment coordinated by the Environmental Council of States with participation by the United States Environmental Protection Agency and by the Lake Michigan Air Directors Consortium; and

d) Assure that sources subject to the ERMS regulatory program will not be required to reduce emissions to an extent that exceeds their proportionate share of the total emissions reductions required of all emission sources, including mobile and area sources.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 205.115 Sunset Provision

This Part does not apply after April 29, 2018. Subject sources must comply with this Part before April 30, 2018.

Section 205.120 Abbreviations and Acronyms

Unless otherwise specified within this Part, the abbreviations used in this Part ~~shall be~~are the same as those ~~found~~ in 35 Ill. Adm. Code 211. ~~The~~ This Part uses the following abbreviations and acronyms~~ are used in this Part~~:

ACMA	Alternative Compliance Market Account
Act	Environmental Protection Act [415 ILCS 5]
ATU	Allotment Trading Unit
BAT	Best Available Technology
CAA	Clean Air Act as amended in 1990 [42 U.S.C. 7401 through 7671q]
CAAPP	Clean Air Act Permit Program
ERMS	Emissions Reduction Market System
FESOP	Federally Enforceable State Operating Permit
LAER	Lowest Achievable Emission Rate
MACT	Maximum Achievable Control Technology
NAAQS	National Ambient Air Quality Standard

NESHAP	National Emission Standards for Hazardous Air Pollutants
RFP	Reasonable Further Progress
~~ROP~~	~~Rate of Progress~~
USEPA	United States Environmental Protection Agency
VOM	Volatile Organic Material

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 205.130 Definitions

Unless otherwise specified within this Part, the definitions for the terms used in this Part ~~shall be~~are the same as those ~~found~~ in Section 39.5 of the Act [415 ILCS 5/39.5] and ~~in~~ 35 Ill. Adm. Code 211.

"Account officer" means a natural person who has been approved by the Agency~~, as specified in~~under Section 205.620 ~~of this Part,~~ and is ~~subsequently~~ responsible for one or more Transaction Accounts to which he or she is designated.

"Allotment" means the number of allotment trading units (ATUs) allotted to a source by the Agency, as established in the source's CAAPP permit or FESOP.

"Allotment Trading Unit (ATU)" means a tradable unit that represents 200 lbs of VOM emissions and is a limited authorization to emit 200 lbs of VOM emissions during the seasonal allotment period.

"Annual Emissions Report" means the report submitted to the Agency annually ~~pursuant to~~under 35 Ill. Adm. Code 254.

"Baseline emissions" means a participating source's VOM emissions for the seasonal allotment period based on historical operations as determined under Subpart C ~~of this Part~~. Baseline emissions ~~shall be~~are the basis of the allotment for each participating source.

"Best Available Technology (BAT)" means an emission level based on the maximum degree of reduction of VOM emitted from or which results from any emission unit, which the Agency, on a case-by-case basis, taking into account energy, environmental and economic impacts, determines is achievable for ~~such~~ the unit through application of production processes and available methods, systems, and techniques for control of VOM, considering the features and production process and control methods, systems, and techniques already used for the unit. BAT for an emission unit ~~shall~~ must not be more stringent than Best Available Control Technology (BACT) as would be determined contemporaneously for ~~such~~ the unit under the federal rules for Prevention of Significant Deterioration of Air Quality (PSD), 40 CFR 52.21 (1996). ~~In no event shall application~~Application of "best available technology" must not result in emissions of VOM which exceed the emissions allowed by any standard established ~~pursuant to~~under

Section 111 of the Clean Air Act, if ~~such a~~the standard is applicable to the category of emission unit.

"CAAPP" means the Clean Air Act Permit Program~~, pursuant to~~ under Section 39.5 of the Act [415 ILCS 5/39.5].

"Chicago area" means the area ~~composed of~~comprising Cook, DuPage, Kane, Lake, McHenry, and Will Counties~~;~~ ~~and~~ Aux Sable Township and Goose Lake Township in Grundy County~~;~~ and Oswego Township in Kendall County.

"Emergency" means any situation arising from sudden and reasonably unforeseeable events beyond the control of the source, such as an act of God, that requires immediate corrective action to restore normal operation.

"Emissions excursion" refers to the event that occurs when a participating source or new participating source does not hold sufficient ATUs at the end of a reconciliation period to account for its VOM emissions from the preceding seasonal allotment period, in ~~accordance~~ compliance with Section 205.150(c) or (d)~~ of this Subpart~~.

"Excursion Compensation Notice" means an administrative notice issued by the Agency~~,~~ ~~pursuant to~~ under Section 205.720 ~~of this Part,~~ that notifies the owner or operator of a participating source or new participating source that the Agency has determined that the source has had an emissions excursion.

"General participant" means any person, other than a participating source or new participating source, that obtains a Transaction Account and is allowed to buy and sell ATUs.

"New participating source" means a source not operating ~~prior to~~before May 1, 1999, located in the Chicago area~~,~~ that emits or has the potential to emit 25 tons per year or more of VOM or is required to obtain a CAAPP permit~~;~~ and has or will have seasonal emissions of at least 10 tons of VOM.

"Participating source" means a source operating ~~prior to~~before May 1, 1999, located in the Chicago area, that emits or has the potential to emit 25 tons per year or more of VOM or is required to obtain a CAAPP permit~~;~~ and has baseline emissions of at least 10 tons, as specified in Section 205.320(a)~~ of this Part~~, or seasonal emissions of at least 10 tons in any seasonal allotment period beginning in 1999.

"Reconciliation period" means the period from October 1 through December 31 of each year during which the owner or operator of a participating source or new participating source must compile actual VOM emissions for the previous seasonal allotment period and may also buy or sell ATUs so that sufficient ATUs are held by the source by the conclusion of the reconciliation period.

"Seasonal allotment period" means the period from May 1 through September 30 of each year.

"Seasonal emissions" means actual VOM emissions at a source that occur during a seasonal allotment period.

"Sell" means to transfer ATUs to another person through sale, lease, trade, or other means of transfer.

"Special participant" means any person that registers with the Agency and may purchase and retire ATUs but not sell ATUs, ~~as specified in~~under Section 205.610 ~~of this Part~~.

"Throughput" means the activity of an emission unit during a particular period relevant to its generation of VOM emissions, including~~, but not limited to,~~ the amount of material transferred for a liquid storage operation, the amount of material processed through or produced by the emission unit, fuel usage, or the weight or volume of coatings or inks.

"Transaction Account" means an account authorized by the Agency or its designee that allows an account officer to buy or sell ATUs.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 205.150 Emissions Management Periods

a) The VOM emissions control period is the seasonal allotment period, which is from May 1 through September 30, annually.

b) The reconciliation period is from October 1 to December 31, annually. During each reconciliation period, participating sources and new participating sources ~~shall~~must:

1) Compile data of actual VOM emissions during the immediately preceding seasonal allotment period; and

2) Submit its seasonal emissions component of its Annual Emissions Report, in ~~accordance~~ compliance with Section 205.300 ~~of this Part~~.

c) At the end of each reconciliation period, on and after the dates ~~specified~~ in Section 205.200 ~~of this Part~~, each participating source ~~shall~~must:

1) Hold ATUs in an amount not less than its VOM emissions during the preceding seasonal allotment period, except as provided in Sections 205.220, 205.225, 205.315, 205.316, 205.320(e)(3) or (f) and 205.750 ~~of this Part~~; or

2) Except as provided in subsection (f) ~~of this Section~~, hold ATUs in an amount not less than 1.3 times its emissions during the preceding seasonal allotment period that are attributable to a major modification, if a participating source commences operation of a major modification ~~pursuant to~~under 35 Ill. Adm. Code 203 on or after May 1, 1999. Additionally, ~~such~~ the source must hold ATUs in ~~accordance~~ compliance with subsection (c)(1) ~~of this Section~~ for VOM emissions during the preceding seasonal allotment period that are not attributable to this major modification.

d) At the end of each reconciliation period, beginning with the reconciliation period immediately following the seasonal allotment period in which the source first becomes a new participating source, as specified in Section 205.210 ~~of this Part~~, each new participating source ~~shall~~must:

1) Except as provided in subsection (f) ~~of this Section~~, if the new participating source is a new major source ~~pursuant to~~under 35 Ill. Adm. Code 203, hold ATUs in an amount not less than 1.3 times its VOM emissions during the preceding seasonal allotment period; or

2) If the new participating source is not a new major source ~~pursuant to~~under 35 Ill. Adm. Code 203, hold ATUs in an amount not less than its VOM emissions during the preceding seasonal allotment period, except as provided in Sections 205.220, 205.225 and 205.750 ~~of this Part~~.

e) Except as provided in subsection (f) ~~of this Section~~, any participating source that commences operation of a major modification on or after May 1, 1999, or any new participating source that is a new major source, which, at the end of each reconciliation period, holds ATUs in an amount not less than 1.3 times the VOM emissions during the preceding seasonal allotment period, in ~~accordance~~ compliance with subsection (c)(2) or (d)(1) ~~of this Section~~, as applicable, ~~shall~~ will be deemed to have satisfied the VOM offset requirements of 35 Ill. Adm. Code 203.302(a), 203.602 and 203.701.

f) Chicago area classification

1) If the nonattainment classification of the Chicago area for ozone is changed ~~such~~ so that the required offset ratio is no longer 1.3 to 1 and a new offset ratio applies~~, as specified in~~ under 35 Ill. Adm. Code 203.302, that ratio ~~shall~~ then ~~apply~~ applies in lieu of the 1.3 to 1 ratio ~~set forth~~ in subsections (c)(2), (d)(1), and (e) ~~of this Section~~. ~~Such~~ The new ratio ~~shall~~ does not apply to any part of a source or any modification already subject to the 1.3 to 1 ratio or other previously-effective offset ratio established ~~prior to~~before the effective date of the new ratio.

2) If the Chicago area is designated as attainment for ozone, the 1.3 to 1 ratio ~~set forth~~ in subsections (c)(2), (d)(1), and (e) ~~of this Section~~ or any new ratio established ~~pursuant to~~under subsection (f)(1) ~~of this Section shall cease~~ceases to apply. However, ~~such~~ the ratio ~~shall~~ will continue to apply to any part of a source or any modification that is already subject to the ratio ~~prior to such~~before the designation.

(Source: Amended at 48 Ill. Reg._____, effective_____)

SUBPART B: APPLICABILITY

Section 205.200 Participating Source

a) ~~The requirements of this~~This Part ~~shall apply~~applies to any source operating ~~prior to~~before May 1, 1999, located in the Chicago area, that

1) emits or has the potential to emit 25 tons per year or more of VOM or is required to obtain a CAAPP permit; and

2) has baseline emissions of at least 10 tons, ~~as specified in~~under Section 205.320(a) ~~of this Part~~, or seasonal emissions of at least 10 tons in any seasonal allotment period beginning in 1999.

b) Each participating source ~~shall~~ must hold ATUs~~, as specified in~~ under Section 205.150(c) ~~of this Part~~, in ~~accordance~~ compliance with the following schedule:

1) For any participating source that has baseline emissions of at least 10 tons of VOM, as determined in ~~accordance~~ compliance with Section 205.320(a) ~~of this Part~~, beginning with the 1999 seasonal allotment period;

2) For any source that first becomes a participating source because its VOM emissions increase to 10 tons per season or more in any seasonal allotment period beginning with 1999 and this emissions increase is not a major modification ~~pursuant to~~under 35 Ill. Adm. Code 203, beginning with the first seasonal allotment period after ~~such~~ the increased emissions occurred; or

3) For any source that will first be subject to ~~the requirements of~~ this Part because of a VOM emissions increase at any time on or after May 1, 1999, that constitutes a major modification ~~pursuant to~~under 35 Ill. Adm. Code 203, upon commencing operation of this modification.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 205.205 Exempt Source

a) Any source that otherwise meets the criteria for participating sources ~~shall be~~is exempt from the requirements of this Part, except that any such source ~~shall~~ will be required to obtain a CAAPP permit or FESOP and submit the seasonal emissions component of the Annual Emissions Report ~~as specified in~~under Section 205.300 ~~of this Part~~, if the source accepts a 15 tons per seasonal allotment period limit on its VOM emissions in its CAAPP permit or FESOP for each seasonal allotment period in which the source would be required to participate in the ERMS in accordance with the following:

1) If the source would be required to participate in the ERMS beginning with the 1999 seasonal allotment period in accordance with Section 205.200(b)(1) ~~of this Subpart~~, ~~such~~ the source ~~shall~~ must apply for the applicable permit limitation by March 1, 1998; or

2) If the source is required to participate in the ERMS in any seasonal allotment period after 1999 because its VOM emissions increase to 10 tons or more in any seasonal allotment period beginning with 1999 ~~in accordance with~~under Section 205.200(b)(2) ~~of this Subpart~~, ~~such~~ the source ~~shall~~ must apply for the applicable permit limitation by December 1 of the first year in which its seasonal emissions are at least 10 tons.

b) Any source that otherwise meets the criteria for participating sources ~~shall be~~is exempt from the requirements of this Part, except that any such source ~~shall~~ will be required to submit the seasonal emissions component of the Annual Emissions Report and an ERMS application ~~as specified in~~under Sections 205.300 and 205.310(d) ~~of this Part~~, respectively, if ~~such~~the source reduces its seasonal emissions by at least 18 percent beginning in 1999. Any such source ~~shall~~ must accept conditions in its CAAPP permit or FESOP limiting its seasonal emissions to at least 18 percent less than its baseline emissions, as determined in ~~accordance~~ compliance with Section 205.320 ~~of this Part~~. Any such source ~~shall~~ must apply for the applicable permit limitation(s) by March 1, 1998. ATUs equivalent to any amount of VOM emissions reductions achieved by the source beyond 12 percent (at least six percent) ~~shall~~ must be issued by the Agency to the ACMA.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 205.210 New Participating Source

a) ~~The requirements of this~~This Part ~~shall apply~~applies to any new participating source, a source not operating ~~prior to~~before May 1, 1999, located in the Chicago area, that

1) emits or has the potential to emit 25 tons per year or more of VOM or is required to obtain a CAAPP permit; and

2) has or will have seasonal emissions of at least 10 tons of VOM.

b) Each new participating source ~~shall~~ must hold ATUs, as specified in Section 205.150(d) ~~of this Part~~.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 205.220 Insignificant Emission Units

a) Emission units identified as insignificant activities ~~pursuant to~~under the CAAPP permit for a participating or new participating source are exempt from the requirements of this Part.

b) Emission units that the Agency determines would qualify as insignificant activities under 35 Ill. Adm. Code 201.Subpart F if the source were a CAAPP source and for which a statement to this effect is ~~contained~~ in the FESOP for a participating or new participating source are exempt from the requirements of this Part.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 205.225 Startup, Malfunction, or Breakdown

Participating or new participating sources permitted to operate during startup, malfunction, or breakdown ~~pursuant to~~under 35 Ill. Adm. Code 201.262, 270.407 and 270.408 are not required to hold ATUs for excess VOM emission during startup, malfunction, and breakdown as authorized in the source's permit.

(Source: Amended at 48 Ill. Reg._____, effective_____)

SUBPART C: OPERATIONAL IMPLEMENTATION

Section 205.300 Seasonal Emissions Component of the Annual Emissions Report

a) For each year in which the source is operational, the owner or operator of each participating source and new participating source ~~shall~~ must submit, as a component of its Annual Emissions Report, seasonal emissions information to the Agency for each seasonal allotment period after the effective date of this Part in ~~accordance~~ compliance with the following schedule:

1) For each participating source or new participating source that generates VOM emissions from less than 10 emission units, by October 31 of each year; and

2) For each participating source or new participating source that generates VOM emissions from 10 or more emission units, by November 30 of each year.

b) In addition to any information required ~~pursuant to~~under 35 Ill. Adm. Code 254, the seasonal emissions component of the Annual Emissions Report ~~shall~~ must contain the following information for the preceding seasonal allotment period for each emission unit emitting or capable of emitting VOM, except that ~~such~~ the information is not required for emission units excluded ~~pursuant to~~under Section 205.220 ~~of this Part~~ or for VOM emissions attributable to startup, malfunction, or breakdown, as specified in Section 205.225 ~~of this Part~~:

1) Actual seasonal emissions of VOM from the source;

2) A description of the methods and practices used to determine VOM emissions, as required by the source's CAAPP permit or FESOP, including any supporting documentation and calculations;

3) A detailed description of any monitoring methods that differ from the methods specified in the CAAPP permit or FESOP for the source~~, as provided in~~ under Section 205.337 ~~of this Subpart~~;

4) If a source has experienced an emergency~~, as provided in~~ under Section 205.750 ~~of this Part~~, it ~~shall reference~~must refer to the associated emergency conditions report that has been approved by the Agency;

5) If a source's baseline emissions have been adjusted because of a variance, consent order, or CAAPP permit compliance schedule~~, as provided for in~~ under Section 205.320(e)(3) ~~of this Subpart~~, it ~~shall~~ must provide documentation quantifying the adjusted VOM emissions amount; and

6) If a source is operating a new or modified emission unit for which three years of operational data is not yet available~~, as specified in~~ under Section 205.320(f) ~~of this Subpart~~, it ~~shall~~ must specify seasonal emissions attributable to the new emission unit or the modification of the emission unit.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 205.310 ERMS Applications

a) The owner or operator of each participating source or new participating source ~~shall~~ must submit to the Agency an ERMS application in ~~accordance~~ compliance with the following schedule:

1) For a participating source with baseline emissions of at least 10 tons of VOM, as determined in ~~accordance~~ compliance with Section 205.320(a) ~~of this Subpart~~, by March 1, 1998;

2) For any source that first becomes a participating source or new participating source because its VOM emissions increase to 10 tons or greater during any seasonal allotment period beginning with 1999, on or before December 1 of the year of the first seasonal allotment period in which its VOM emissions are at least 10 tons, ~~provided that~~if this emissions increase is not a major modification ~~pursuant to~~under 35 Ill. Adm. Code 203;

3) For any source that first becomes a participating source or new participating source due to a major modification subject to 35 Ill. Adm. Code 203 based on VOM emissions, at the time a construction permit application is submitted or due for the modification, whichever occurs first; or

4) For a source that will be a new participating source when it commences construction and that is also a major new source under 35 Ill. Adm. Code 203 based on VOM emissions, at the time a construction permit application is submitted or due for the source, whichever occurs first.

b) Except as provided in subsection (d) ~~of this Section~~, each ERMS application for participating sources ~~shall~~ must contain all information required by the Agency ~~pursuant to~~under Section 39.5 of the Act [415 ILCS 5/39.5] or ~~reference such~~refer to that information if previously submitted to the Agency, including the following information:

1) Data sufficient to establish the appropriate baseline emissions for the source in ~~accordance~~ compliance with Section 205.320 ~~of this Subpart~~, including ~~but not limited to~~ the following:

A) VOM emissions data and production types and levels from the baseline emissions year(s), as specified in Section 205.320(a)(1), (b) or (c) ~~of this Subpart~~, as appropriate;

B) If the source is proposing a substitute baseline emissions year(s), as provided in Section 205.320(a)(2) ~~of this Subpart~~, a justification that the year is more representative than 1994, 1995, or 1996, including data on production types and levels from the proposed substitute year(s) and historical production data, as needed to justify that the proposed substitute year(s) is representative; and

C) If the source is proposing a baseline emissions adjustment based on voluntary over-compliance, as provided in Section 205.320(d) ~~of this Subpart~~, sufficient information for the Agency to determine the appropriate adjustment;

2) A description of methods and practices used to determine baseline emissions and that will be used to determine seasonal emissions for purposes of demonstrating compliance with this Part, in ~~accordance~~ compliance with Sections 205.330 and 205.335 ~~of this Subpart~~;

3) Identification of any emission unit for which exclusion from further reductions is sought ~~pursuant to~~under Section 205.405(b) ~~of this Part~~ and including all of the information required ~~pursuant to~~under Section 205.405(b) ~~of this Part~~;

4) Identification of any emission unit excluded from further reductions ~~pursuant to~~under Section 205.405(a) ~~of this Part~~; and

5) Identification of any new or modified emission unit for which a construction permit was issued ~~prior to~~before January 1, 1998, but for which three years of operational data ~~is~~ are not available, and the permitted VOM emissions or the permitted increase in VOM emissions from such emission unit(s), adjusted for the seasonal allotment period.

c) Except as provided in subsection (h) ~~of this Section~~, the ERMS application submitted by each participating source ~~shall~~ must also be an application for a significant modification of its CAAPP permit or a revision to its FESOP, or a revision to its CAAPP or FESOP application if a CAAPP permit or FESOP has not yet been issued for the source.

d) The ERMS application for any source that elects to reduce its seasonal emissions by at least 18 percent from its baseline emissions, as provided in Section 205.205(b) ~~of this Part~~, ~~shall~~ must include:

1) VOM emissions data sufficient to establish the appropriate baseline emissions for the source in ~~accordance~~ compliance with Section 205.320 ~~of this Subpart~~; and

2) A description of methods and practices used to determine baseline emissions and that will be used to demonstrate that its seasonal emissions will be at least 18 percent less than its baseline emissions, in ~~accordance~~ compliance with Sections 205.330 and 205.335 ~~of this Subpart~~.

e) Within 120 days after receipt of an ERMS application, the Agency ~~shall~~ must provide written notification to the source of a preliminary baseline emissions determination. Public notice of a draft CAAPP permit or FESOP ~~shall~~ will fulfill this requirement for a preliminary baseline emissions determination if issued within 120 days.

f) The ERMS application for each source applying for a major modification, as provided in subsection (a)(3) ~~of this Section~~, ~~shall~~ must include the information

~~specified~~ in subsection (b) ~~of this Section~~ and a certification by the owner or operator recognizing that the source will be required to hold ATUs by the end of each reconciliation period in ~~accordance~~ compliance with Section 205.150(c)(2) ~~of this Part~~, and provide a plan explaining the means by which it will obtain ATUs for the VOM emissions attributable to the major modification for the first three seasonal allotment periods in which this major modification is operational.

g) The ERMS application for each new participating source ~~shall~~ must include:

1) A description of methods and practices that will be used to determine seasonal emissions for purposes of demonstrating compliance with this Part, in ~~accordance~~ compliance with Sections 205.330 and 205.335 ~~of this Subpart~~;

2) A certification by the owner or operator recognizing that the source will be required to hold ATUs by the end of each reconciliation period in ~~accordance~~ compliance with Section 205.150(d) ~~of this Part~~ for each seasonal allotment period in which it is operational; and

3) If the source is a new major source subject to 35 Ill. Adm. Code 203, a plan explaining means by which it will obtain ~~such~~ ATUs for the first three seasonal allotment periods in which it is operational.

h) The owner or operator of any participating source that has identified a new or modified emission unit~~, as specified in~~ under subsection (b)(5) ~~of this Section~~, ~~shall~~ must submit a written request for, or an application for, a revised emissions baseline and allotment. ~~Such~~ The written request or application ~~shall~~ must be submitted by December 1 of the year of the third complete seasonal allotment period in which ~~such~~ the newly constructed emission unit is operational, which submittal ~~shall~~ must include information on the seasonal emissions for these first three seasonal allotment periods.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 205.315 CAAPP Permits for ERMS Sources

a) Except as provided in Section 205.316(c) ~~of this Subpart~~, the Agency ~~shall~~ must determine the baseline emissions for each participating source in ~~accordance~~ compliance with Section 205.320 ~~of this Subpart,~~ through its final permit action on a new or modified CAAPP permit for the source. The Agency's baseline emissions determination may be appealed ~~in accordance with~~under the CAAPP appeal procedures ~~specified~~ in Section 40.2 of the Act [415 ILCS 5/40.2]. If the permit conditions establishing a source's baseline emissions are appealed, the baseline emissions for the source ~~shall~~ will be as proposed in the source's ERMS application during the pendency of the appeal. During the pendency of the appeal, ATUs ~~shall~~ must be allotted to the source ~~pursuant to~~under the part of the

source's proposed baseline emissions that is not disputed in the appeal. If ~~such~~ the source's seasonal VOM emissions exceed the ATUs it holds at the end of reconciliation periods during the pendency of the appeal, the source will not be deemed to have had an emissions excursion to the extent that ~~such~~ the seasonal VOM emissions do not exceed the amount it proposed as its baseline in its ERMS application, less reductions required ~~pursuant to~~under Section 205.400(c) or (e) ~~of this Part~~, if applicable. ~~Such~~ The source ~~shall~~ must not be allowed to sell ATUs during the pendency of the appeal.

b) Except as provided in Section 205.316(c) ~~of this Subpart~~, the Agency ~~shall~~ must determine, in ~~accordance~~ compliance with Sections 205.330 and 205.335 ~~of this Subpart~~, the methods and practices applicable to each participating source and new participating source to determine seasonal emissions through its final permit action on a new or modified CAAPP permit for the source. The Agency's determination of the methods and practices applicable may be appealed ~~in accordance with~~under the CAAPP appeal procedures ~~specified~~ in Section 40.2 of the Act [415 ILCS 5/40.2].

c) Except as provided in Section 205.316(c) ~~of this Subpart~~, the Agency ~~shall~~ must determine, in ~~accordance~~ compliance with Section 205.405(b) ~~of this Part~~, if an emission unit qualifies for exclusion from further reductions in its final permit action on a new or modified CAAPP permit for each such source. The Agency's determination may be appealed ~~in accordance with~~under the CAAPP appeal procedures ~~specified~~ in Section 40.2 of the Act [415 ILCS 5/40.2]. If the permit conditions establishing the Agency's BAT determination are appealed, ATUs ~~shall~~ will be allotted to the source for any emission unit for which the Agency's BAT determination is being appealed with the emissions reduction required by Section 205.400(c) or (e) ~~of this Part~~ during the pendency of the appeal. If the seasonal VOM emissions for the subject emission unit(s) exceed the ATUs that are attributed to the unit(s) during the pendency of the appeal, the source will not be deemed to have an emissions excursion to the extent that ~~such~~ the seasonal VOM emissions do not exceed the amount of ATUs that would be attributed to this unit if the BAT exclusion was accepted. ~~Such~~ The source ~~shall~~ must not be allowed to sell ATUs during the pendency of the appeal.

d) The CAAPP permit for a participating source ~~shall~~ must specify the allotment for each seasonal allotment period.

e) To the extent possible, the Agency ~~shall~~ must initiate the procedures of 35 Ill. Adm. Code 252, as required by Section 39.5 of the Act [415 ILCS 5/39.5], by grouping the draft CAAPP permits and supporting documents for participating sources. ~~Specifically, to~~To the extent possible, the Agency ~~shall~~ must issue a joint public notice and hold a joint hearing, as appropriate, addressing participating sources for which a hearing is requested.

f) When a CAAPP permit for a participating source or new participating source is transferred from the current permittee to another person:

1) In the case of a name change of the participating source or new participating source where ownership is not altered, appropriate documentation ~~shall~~ must be submitted to revise the Transaction Account to reflect the name change; or

2) In the case of an ownership change of the participating source or new participating source, the allotment ~~shall~~ must also be transferred by the owner or operator of the permitted source to the new owner or operator, or the new owner or operator ~~shall~~ must submit a statement to the Agency certifying that ~~such~~ the transfer is not occurring and demonstrating that necessary ATUs are or will be available by other means for the intended operation of the source.

g) Upon reopening or renewal of the CAAPP permit for any participating source or new participating source, any multiple season transfer agreement, as provided in Section 205.630(a)(2)(B) ~~of this Part~~, that has three or more years of transfers remaining ~~shall~~ must be identified in the renewed or reissued CAAPP permit for each such source.

h) Upon reopening or renewal of the CAAPP permit for any participating source or new participating source, any ATUs that will be issued by the Agency for three years or more to any such source ~~pursuant to~~under Section 205.410, 205.500 or 205.510 ~~of this Part shall~~must be identified in the renewed or reissued CAAPP permit for each such source.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 205.316 Federally Enforceable State Operating Permits for ERMS Sources

a) Any participating or new participating source ~~shall~~ must not operate without a CAAPP permit or FESOP.

1) If a source has a CAAPP permit containing ERMS provisions and the source elects to obtain a different permit in lieu of the CAAPP permit, the source ~~shall~~ must apply for and obtain a FESOP that contains ERMS provisions including~~, but not limited to,~~ emissions calculation methodologies, baseline emissions, and allotment for each seasonal allotment period, all of which are identical to those provisions ~~contained~~ in its CAAPP permit.

2) If a participating or new participating source does not have a CAAPP permit containing ERMS provisions and the source elects to obtain a permit other than a CAAPP permit, the source ~~shall~~ must apply for and

obtain a FESOP that contains, in addition to other necessary provisions, federally enforceable ERMS provisions, including baseline emissions, allotment for each seasonal allotment period, identification of any units deemed to be insignificant activities for the purposes of the ERMS, emissions calculation methodologies, and provisions addressing all other applicable requirements of this Part.

b) When determining the baseline emissions and allotment for a participating source as required under subsection (a)(2) ~~of this Section~~:

1) The Agency ~~shall~~ must determine baseline emissions in ~~accordance~~ compliance with Section 205.320 ~~of this Subpart,~~ through its final permit action on the new or modified FESOP for the source. The Agency's baseline emissions determination may be appealed ~~in accordance with~~under the appeal procedures ~~specified~~ in Section 40 of the Act [415 ILCS 5/40]. If the permit conditions establishing a source's baseline emissions are appealed, the baseline emissions for the source ~~shall~~ must be as proposed in the source's ERMS application during the pendency of the appeal. During the pendency of the appeal, ATUs ~~shall~~ will be allotted to the source ~~pursuant to~~under the part of the source's proposed baseline emissions that is not disputed in the appeal. If ~~such~~ the source's seasonal VOM emissions exceed the ATUs it holds at the end of reconciliation periods during the pendency of the appeal, the source will not be deemed to have had an emissions excursion to the extent that ~~such~~ the seasonal VOM emissions do not exceed the amount it proposed as its baseline in its ERMS application, less reductions required ~~pursuant to~~under Section 205.400(c) or (e) ~~of this Part~~, if applicable. ~~Such~~ The source ~~shall~~ must not be allowed to sell ATUs during the pendency of the appeal.

2) The Agency ~~shall~~ must determine, in ~~accordance~~ compliance with Section 205.405(b) ~~of this Part~~, if an emission unit qualifies for exclusion from further reductions in its final permit action on a new or modified FESOP for the source. The Agency's determination may be appealed ~~in accordance with~~under the appeal procedures ~~specified~~ in Section 40 of the Act [415 ILCS 5/40]. If the permit conditions establishing the Agency's BAT determination are appealed, ATUs ~~shall~~ will be allotted to the source for any emission unit for which the Agency's BAT determination is being appealed with the emissions reduction required by Section 205.400(c) or (e) ~~of this Part~~ during the pendency of the appeal. If the seasonal VOM emissions for the subject emission unit(s) exceed the ATUs that are attributed to the unit(s) during the pendency of the appeal, the source will not be deemed to have an emissions excursion to the extent that ~~such~~ the seasonal VOM emissions do not exceed the amount of ATUs that would be attributed to this unit if the BAT exclusion was accepted. ~~Such~~ The source ~~shall~~ must not be allowed to sell ATUs during the pendency of the appeal.

c) The Agency ~~shall~~ must determine, in ~~accordance~~ compliance with Sections 205.330 and 205.335 ~~of this Subpart~~, the methods and practices applicable to the participating source or new participating source to determine seasonal emissions through its final permit action on the new or modified FESOP for ~~such~~ the source. The Agency's determination of the methods and practices applicable may be appealed ~~in accordance with~~under the appeal procedures ~~specified~~ in Section 40 of the Act [415 ILCS 5/40].

d) When a FESOP for a participating source or new participating source is transferred from the current permittee to another person:

1) In the case of a name change of the participating source or new participating source where ownership is not altered, appropriate documentation ~~shall~~ must be submitted to revise the Transaction Account to reflect the name change; or

2) In the case of an ownership change of the participating source or new participating source, the allotment ~~shall~~ must also be transferred by the owner or operator of the permitted source to the new owner or operator, or the new owner or operator ~~shall~~ must submit a statement to the Agency certifying that ~~such~~ the transfer is not occurring and demonstrating that necessary ATUs are or will be available by other means for the intended operation of the source.

e) Upon reopening or renewal of the FESOP for any participating source or new participating source, any multiple season transfer agreement, as provided in Section 205.630(a)(2)(B) ~~of this Part~~, that has three or more years of transfers remaining ~~shall~~ must be identified in the renewed or reissued FESOP for such source.

f) Upon reopening or renewal of the FESOP for any participating source or new participating source, any ATUs that will be issued by the Agency for three years or more to any such source ~~pursuant to~~under Section 205.410, 205.500, or 205.510 ~~of this Part shall~~must be identified in the renewed or reissued FESOP for ~~such~~ the source.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 205.318 Certification for Exempt CAAPP Sources

The owner or operator of any source that is located in the Chicago area that is required to obtain a CAAPP permit~~,~~ and has seasonal emissions, as determined in ~~accordance~~ compliance with Section 205.320(a) ~~of this Subpart~~, of less than 10 tons ~~shall~~ must submit a written certification to the Agency by March 1, 1998, certifying that its VOM emissions are below 10 tons per season as specified in Section 205.320(a) ~~of this Subpart~~. ~~Such~~ The certification ~~shall~~ must include the

amount of VOM emissions at the source during the 1994, 1995, 1996, and 1997 seasonal allotment periods~~,~~ and supporting calculations.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 205.320 Baseline Emissions

a) Except as provided in subsection (b) or (c)~~ of this Section~~, baseline emissions ~~shall~~ must be determined by the Agency in ~~accordance~~ compliance with the following, adjusted as specified in subsections (d), (e), and (f)~~ of this Section~~:

1) Baseline emissions ~~shall~~ must be calculated using the average of the two seasonal allotment periods with the highest VOM emissions during 1994, 1995, or 1996.

2) Any source may propose to substitute seasonal emissions on a year-for-year basis due to non-representative conditions in 1994, 1995, or 1996, but must stay within the period from 1990 through 1997, and must have accurate seasonal emissions data for the substitute year(s). When considering whether to substitute a seasonal baseline emission year(s), the Agency must consider the information submitted by the source ~~pursuant to~~under Section 205.310(b)(1)(B)~~ of this Subpart~~, as well as the accuracy of that data. For the purposes of this subsection (a)(2), "non-representative conditions" include~~, but are not limited to,~~ events such as strikes, fires, floods, and market conditions.

b) Except as provided ~~below~~ in subsection (c)~~ of this Section~~, for any source that has seasonal emissions of less than 10 tons, as determined in ~~accordance~~ compliance with subsection (a)~~ of this Section~~, but becomes a participating source because its seasonal emissions increase to 10 tons or more in any seasonal allotment period beginning with 1999, baseline emissions ~~shall~~ must be determined by the Agency based on actual VOM emissions from the first seasonal allotment period in which the source's emissions equaled or exceeded 10 tons, adjusted as specified in subsections (d), (e), and (f) ~~of this Section,~~, ~~provided such~~if the emissions increase is not a major modification ~~pursuant to~~under 35 Ill. Adm. Code 203.

c) For any source that has seasonal emissions of less than 10 tons, as determined in ~~accordance~~ compliance with subsection (a)~~ of this Section~~, but becomes a participating source because its seasonal emissions increase to 10 tons or more in any seasonal allotment period beginning with 1999 and this emissions increase constitutes a major modification ~~pursuant to~~under 35 Ill. Adm. Code 203, baseline emissions ~~shall~~ must be determined by the Agency based on the average of the actual seasonal emissions from the two seasonal periods ~~prior to~~before a timely submittal of its application for the major modification, adjusted as specified in subsections (d) and (e)~~ of this Section~~. Any such source may substitute seasonal emissions on a year-for-year basis due to non-representative conditions in either

of the two seasonal allotment periods ~~prior to submittal of~~before submitting its application for the major modification but must stay within the five year period ~~prior to submittal of such~~before submitting the application. For the purposes of this subsection, "non-representative conditions" include~~, but are not limited to,~~ conditions such as strikes, fires, floods, and market conditions.

d) The baseline emissions of any participating source ~~shall~~ must be increased for voluntary over-compliance that occurred after October 31, 1990 and results in a VOM emissions level that is lower than the level required by applicable requirements effective in 1996, including limitations in the source's permit(s) based on ~~such~~ the applicable requirements. Voluntary over-compliance ~~shall~~ must be determined in ~~accordance~~ compliance with the following:

1) Determine the actual activity or production types and levels from the seasonal allotment period(s) selected for baseline emissions ~~pursuant to~~under subsection (a), (b), or (c) ~~of this Section~~;

2) Determine seasonal emissions for each emission unit as the product of the amount of activity or production, as determined in ~~accordance~~ compliance with subsection (d)(1) ~~of this Section~~, and the actual emissions level;

3) Determine seasonal emissions for each emission unit as the product of the amount of activity or production, as determined in ~~accordance~~ compliance with subsection (d)(1) ~~of this Section~~, and the allowable emissions level ~~pursuant to~~under all applicable requirements effective through 1996, including limitations in the source's permit(s) based on ~~such~~ the applicable requirements; and

4) Determine the appropriate adjustment to baseline emissions by subtracting the seasonal emissions determined ~~pursuant to~~under subsection (d)(2) ~~of this Section~~ from the seasonal emissions determined ~~pursuant to~~under subsection (d)(3) ~~of this Section~~.

e) The baseline emissions of any participating source ~~shall~~ must be decreased if any of the following circumstances exist:

1) If a source is out of compliance with any applicable requirements, including limitations in the source's permit(s) based on ~~such~~ the applicable requirements, in any of the seasonal allotment periods used for baseline emissions, its baseline emissions ~~shall~~ must be lowered to reflect the amount of VOM emissions that would be achieved if in compliance with such requirements.

2) If any of the seasonal allotment periods selected for baseline emissions do not reflect compliance with requirements effective through 1996 that became applicable after any of the years selected as baseline years, the

source's baseline emissions ~~shall~~ mustl be lowered to reflect the amount of VOM emissions that would be achieved if in compliance with such requirements.

3) If, in any of the years selected for baseline emissions, a source's VOM emissions are in excess of the amount of VOM emissions allowed by applicable rules because it has been granted a variance, has entered into a consent order, or is operating ~~pursuant to~~under a CAAPP permit compliance schedule, the baseline emissions for such source ~~shall~~ must be lowered to reflect the VOM emissions amount that would be achieved if in compliance with such requirements, subject to the following:

A) Each such source ~~shall~~ will be allowed to emit VOM emissions in excess of the ATUs it holds at the end of the reconciliation period each year until compliance with the applicable regulation is achieved, or upon expiration of the relief allowed for in the variance, consent order, or CAAPP permit compliance schedule, whichever occurs first;

B) ~~Such~~ The excess VOM emissions ~~shall~~ will be allowed to the extent allowed in the variance, consent order, or CAAPP permit compliance schedule; and

C) The seasonal component of the Annual Emissions Report for each such source ~~shall~~ must be adjusted each year until compliance with the applicable requirement(s) is achieved, or upon expiration of the relief allowed for in the variance, consent order, or CAAPP permit compliance schedule, whichever occurs first, as specified in subsection (e)(3)(B) ~~of this Section~~.

4) For any participating source that operated with excess emissions during startup, malfunction, or breakdown during any year used to determine its baseline emissions, whether or not ~~such~~ the operation was authorized ~~pursuant to~~under the source's permit, excess VOM emissions attributable to startup, malfunction, or breakdown ~~shall~~ must be excluded from the baseline emissions.

f) For new or modified emission units at a source for which a construction permit was issued ~~prior to~~before January 1, 1998, but for which three years of operational data ~~is~~ are not available, the baseline emissions determination for the source ~~shall~~ must include VOM emissions from ~~such~~ the new emission unit or the increase in emissions from the modification of ~~such~~ the emission unit based on the two seasonal allotment periods with the highest VOM emissions from the first three complete seasonal allotment periods in which any such new or modified emission unit is operational. ATUs ~~shall~~ must only be issued in ~~accordance~~ compliance with this subsection after the baseline emissions ~~has~~ have been

determined. Any such source ~~shall~~ will not be required to hold ATUs for VOM emissions attributable to the new emission unit or the modification of the existing emission unit for the first three complete seasonal allotment periods in which it is operational.

g) For any source which acquired emission reduction credits ~~pursuant to~~under a written agreement~~,~~ entered into ~~prior to~~before January 1, 1998, and ~~such~~ the emission reduction credits were acquired for use as emissions offsets~~,~~ in ~~accordance~~ compliance with 35 Ill. Adm. Code 203, ~~such~~ the emission reduction credits, adjusted for the seasonal allotment period, and reduced by 24 percent, ~~shall~~ must be included in the baseline emissions determination for the source, only to the extent that:

1) The Agency has issued a federally enforceable permit~~, prior to~~ before January 1, 1998, to the source from which the emission reduction credits were acquired, and ~~such~~ the federally enforceable permit recognized the creation of the VOM emission reduction credits by the cessation of all VOM-emitting activities and the withdrawal of the operating permits for VOM-emitting activities at such other sources; and

2) The Agency has not relied upon the emission reduction credits to demonstrate attainment or reasonable further progress.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 205.330 Emissions Determination Methods

The owner or operator of a participating source or new participating source ~~shall~~ must determine VOM emissions from the source during the seasonal allotment period using methods as necessary to demonstrate compliance with this Part. ~~Such~~ The methods ~~shall~~ must be, at a minimum, as stringent as those required by any applicable requirement and any permit condition. The Agency ~~shall~~ must establish the emissions determination methods applicable to each such source in the source's CAAPP permit or FESOP. The following methods, in conjunction with relevant source-specific throughput and operating data, are acceptable methods a source may use to determine seasonal emissions, depending on the type of emission unit:

a) Material balance calculation, based on the VOM content of raw materials and recovered materials, as is typically used for degreasers, coating lines, and printing lines equipped with a carbon adsorption system (recovery-type control device) or without any control device;

b) A standard engineering formula for estimation of emissions, as is typically used for storage and transfer of volatile organic liquids;

c) A source-specific emission factor(s), based on representative testing and sampling data and appropriate analysis, as typically used for petroleum refining processes;

d) A published USEPA emission factor(s), as is typically used for component leaks;

e) A source-specific emission rate or VOM control efficiency, based on representative testing, as is typically used for chemical processes and afterburners (destruction-type control device), respectively;

f) A method not listed above that is sufficient to demonstrate compliance with this Section; or

g) An appropriate combination of the above methods, as typically used for a coating or printing line equipped with a control device, where the available emissions are determined by material balance and the control efficiency is determined by representative testing.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 205.335 Sampling, Testing, Monitoring, and Recordkeeping Practices

The owner or operator of a participating source or new participating source ~~shall~~ must conduct sampling, perform testing, conduct monitoring, and maintain records as needed to support its method for determining seasonal emissions in ~~accordance~~ compliance with Section 205.330 ~~of this Subpart~~ and to demonstrate compliance with this Part. ~~Such~~ The sampling, testing, monitoring, and recordkeeping ~~shall~~ must be, at a minimum, as stringent as that required by any applicable requirement and any permit condition. The Agency ~~shall~~ must establish the practices applicable to each such source in the source's CAAPP permit or FESOP.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 205.337 Changes in Emission Determination Methods and Sampling, Testing, Monitoring, and Recordkeeping Practices

a) The methods used for determining seasonal emissions from a source ~~shall~~ must generally be consistent with the methods used to determine its baseline emissions unless the source's permit accommodates the use of alternate methods to determine VOM emissions.

b) Modification of Methods and Practices

1) If a source proposes new or revised methods to determine VOM emissions or new or revised supporting practices for sampling, testing, monitoring, or recordkeeping that differ significantly from the methods and practices ~~specified by~~in its current permit, the source ~~shall~~ must obtain a revised CAAPP permit ~~in accordance with~~under the procedures ~~specified~~ in Section 39.5 of the Act [415 ILCS 5/39.5], or a revised FESOP, ~~prior to~~before relying on ~~such~~ the methods and practices.

2) The Agency ~~shall~~ must issue a revised permit if it finds, based upon submission of an appropriate permit application, that the proposed methods or practices are needed or appropriate to address changes in the operation of the source or emission units that were not considered when the current permit was issued, that the proposed methods and procedures will not significantly affect the determination of actual seasonal emissions, or that the proposed methods and procedures incorporate new or improved analytical techniques or estimation methods that will increase the accuracy with which actual seasonal emissions are determined, and other applicable requirements for issuance of a revised permit are met.

3) If the Agency approves the use of a modified method or practice, the Agency is authorized to determine a corrected baseline and ~~thereafter~~ issue ATUs in ~~accordance~~ compliance with Section 205.400(c) ~~of this Part pursuant to~~under this corrected baseline.

(Source: Amended at 48 Ill. Reg._____, effective_____)

SUBPART D: SEASONAL EMISSIONS MANAGEMENT

Section 205.400 Seasonal Emissions Allotment

a) Each participating source ~~shall~~ will receive an allotment which ~~shall~~ must be issued by the Agency and distributed in ATUs.

b) Except for ATUs issued ~~pursuant to~~under Sections 205.500 and 205.510 ~~of this Part~~, ATUs issued for any seasonal allotment period are valid for use during the seasonal allotment period following issuance and the next succeeding seasonal allotment period. All ATUs ~~shall~~ will be valid until ~~such~~ the ATUs expire or are retired.

c) The initial allotment for each participating source ~~shall~~ must be based on the baseline emissions for ~~such~~ the source, as determined in ~~accordance~~ compliance with Section 205.320 ~~of this Part~~, and ~~shall~~ must be reduced by 12 percent in 1999 or in such other year that a source is issued its initial allotment, except as provided in Section 205.405 ~~of this Subpart~~.

d) Except as provided in Section 205.337(b)(3) ~~of this Part~~ and subsections (c) and (e) ~~of this Section~~, allotments ~~shall~~ must remain at 1999 or initial levels unless the Agency makes a demonstration to the Board, ~~in accordance with~~under the rulemaking provisions of Sections 9.8, 27, and 28 of the Act [415 ILCS 5/9.8, 27 and 28], that further reductions are needed. An allotment or a baseline under this Part does not constitute a property right. Nothing in this Part ~~shall~~ must be construed to limit the authority of the Board to terminate or limit such allotment

or baseline ~~pursuant to~~under its rulemaking authority under Sections 9.8, 27, and 28 of the Act [415 ILCS 5/9.8, 27, and 28].

e) If the baseline emissions for any participating source are increased in ~~accordance~~ compliance with Section 205.320(f) ~~of this Part~~, the allotment ~~shall~~ must be increased by the modified portion of the baseline emissions amount, reduced by 12 percent, except as provided in Section 205.405 ~~of this Subpart~~.

f) Except as provided in subsection (h) ~~of this Section~~, any new participating source ~~shall~~ must not be issued ATUs by the Agency, but ~~shall~~ must be required to hold ATUs at the end of the reconciliation period as specified in Section 205.150(d) ~~of this Part~~.

g) Any source existing as of May 1, 1999, which first becomes subject to ~~the requirements of~~ this Part because its seasonal emissions increase to 10 tons or more as a result of a major modification ~~pursuant to~~under 35 Ill. Adm. Code 203, in any seasonal allotment period beginning with 1999, ~~shall~~ must not be allotted ATUs by the Agency for the VOM emissions attributable to this modification, except as provided in subsection (h) ~~of this Section~~, but ~~shall~~ must be allotted ATUs by the Agency based on its baseline emissions, as determined in ~~accordance~~ compliance with Section 205.320 ~~of this Part~~. Any such participating source ~~shall~~ must be required to hold ATUs at the end of the reconciliation period as specified in Section 205.150(c) ~~of this Part~~, for each seasonal allotment period in which it is subject to this Part.

h) If a participating source or new participating source submits an ATU transfer agreement authorizing the transfer of ATUs for more than one year, as provided in Section 205.630(a)(2)(B) ~~of this Part~~, the ATUs ~~shall~~ must be automatically transferred by the Agency from the transferor's Transaction Account to the transferee's Transaction Account. Upon reopening or renewal of the CAAPP permit or FESOP for any such source, any multiple season transfer agreement that has three or more years of transfers remaining ~~shall~~ must be identified in the renewed or reissued CAAPP permit or FESOP for each ~~such~~ source.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 205.405 Exclusions from Further Reductions

a) VOM emissions from the following emission units, if satisfying subsection (a)(1), (a)(2), or (a)(3) ~~of this Section prior to~~before May 1, 1999, ~~shall~~ must be excluded from the VOM emissions reductions requirements ~~specified~~ in Section 205.400(c) and (e) ~~of this Subpart~~ as long as ~~such~~ the emission units continue to satisfy subsection (a)(1), (a)(2), or (a)(3) ~~of this Section~~:

1) Emission units that comply with any NESHAP or MACT standard promulgated ~~pursuant to~~under the CAA;

2) Direct combustion emission units designed and used for comfort heating purposes, fuel combustion emission units, and internal combustion engines; and

3) An emission unit for which a LAER demonstration has been approved by the Agency on or after November 15, 1990.

b) When it is determined that an emission unit is using, ~~prior to~~before May 1, 1999, BAT for controlling VOM emissions, VOM emissions from ~~such~~ the emission unit ~~shall~~ must not be subject to the VOM emissions reductions requirement ~~specified~~ in Section 205.400(c) or (e) ~~of this Subpart~~ as long as ~~such~~ the emission unit continues to use ~~such~~ the BAT. The owner or operator of a source may request ~~such~~ exclusion from further reductions by providing the following information, in addition to the information required in Section 205.310 ~~of this Part~~, in its ERMS application:

1) Identification of each emission unit for which exclusion is requested, including the year of initial operation of such emission unit;

2) Identification of all requirements applicable to the emission unit;

3) A demonstration that the emission unit is using BAT for controlling VOM emissions;

4) Identification of the permitted VOM emissions from the emission unit;

5) VOM emissions from the emission unit for each seasonal allotment period used in the baseline emissions determination for the source; and

6) A description and quantification of any reductions in VOM emissions that were achieved at the emission unit or source based on its use of BAT.

c) As part of its review of an ERMS application or application for a modified allotment, the Agency may determine that any such emission unit qualifies for exclusion from further reductions under subsection (a) or (b) ~~of this Section~~. The Agency ~~shall~~ must make its proposed determination in a draft CAAPP permit or FESOP subject to public notice and participation, accompanied by an explanation of its proposed action.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 205.410 Participating Source Shutdowns

a) If a participating source shuts down all operations at the source~~,~~ and withdraws its permit or its permit is revoked or terminates, allotments issued to ~~such a~~the source

for each seasonal allotment period after the shutdown occurred ~~shall~~ must be subject to the following:

1) 80 percent of all such ATUs ~~shall~~ must continue to be allotted to the owner or operator of such source or its duly authorized recipient; and

2) 20 percent of all such ATUs ~~shall~~ must be issued to the ACMA.

b) Except as provided in subsection (c) ~~of this Section~~, the owner or operator of any participating source that shuts down all operations~~,~~ in ~~accordance~~ compliance with subsection (a) ~~of this Section, shall~~must submit a written request to have its status changed to a general participant, upon withdrawal, revocation, or termination of its permit.

c) The owner or operator of any participating source that shuts down all operations~~,~~ in ~~accordance~~ compliance with subsection (a) ~~of this Section,~~ may authorize the issuance of future ATUs to the Transaction Account of another participating source, new participating source, or general participant by submitting a transfer agreement authorizing a permanent transfer of all future ATUs. The CAAPP permit or FESOP of any participating source or new participating source designated to receive future allotments of ATUs ~~pursuant to~~under such a transfer agreement ~~shall~~ must be modified to reflect this transfer upon reopening or renewal. Any ATUs issued ~~pursuant to~~under a transfer agreement entered into under this subsection before shut down of all operations of the participating source ~~shall~~ will not be subject to subsection (a) ~~of this Section~~.

(Source: Amended at 48 Ill. Reg._____, effective_____)

SUBPART E: ALTERNATIVE ATU GENERATION

Section 205.500 Emissions Reduction Generator

Any participating source, new participating source, or general participant may submit a proposal for issuance of ATUs to it based on VOM emissions reductions, as specified in subsection (a) ~~of this Section~~, achieved by any source or group of sources located in the Chicago area with an operating permit(s) other than a participating source or new participating source. The owner or operator of each source from which the VOM emissions reductions have been or will be achieved ~~shall~~ must certify its acceptance of the terms of the proposal and that it has achieved or will achieve the emissions reductions specified in the proposal. An emissions reduction generator may apply for a modification to its operating permit to incorporate limitations that make the VOM emissions reductions ~~specified~~ in the relevant proposal enforceable.

a) ATUs will only be issued ~~pursuant to~~under this Section if based on actual VOM emissions reductions that meet one or more of the following:

1) If, based on the same actual production rate, VOM emissions at the source for any seasonal allotment period beginning in 1999 are or will be lower due to the use of technology or materials at the source than if operating at the same production rate at the emissions level allowed by applicable requirements effective in 1996 or any requirements included in the State Implementation Plan, provided such reductions occurred after 1990;

2) The source shuts down a portion or all of its operation(s) after 1996 and withdraws the relevant operating permit(s), provided the VOM emissions from the shut down activity or activities will not be distributed elsewhere within the Chicago area;

3) The source(s) curtails its seasonal production activity resulting in an actual reduction in VOM emissions during any seasonal allotment period beginning in 1999, ~~provided~~ if the VOM emissions from the curtailment will not be distributed elsewhere within the Chicago area. ~~Such~~ The emissions reduction ~~shall~~ must be based on the difference between the average production level for the two seasonal allotment periods ~~prior to~~before the year of curtailment and the curtailed production level, calculated at the VOM emission rate allowed by applicable requirements effective in 1996; or

4) The source shuts down operations or curtails seasonal production activity as described in subsections (a)(2) and (a)(3) ~~of this Section~~, respectively, and the VOM emissions from the shut down activity or activities or curtailment will be distributed to a participating or new participating source or sources within the Chicago area, and the proposal provides that all ATUs issued ~~pursuant to~~under this Section on account of ~~such~~ the shut down or curtailment are to be issued to the corresponding participating or new participating source or sources.

b) If any proposal is based on a shut down of operations, as specified in subsection (a)(2) ~~of this Section~~, that results in seasonal emissions reductions of 10 tons or more, 20 percent of ATUs issued based on such an emissions reduction generator proposal ~~shall~~ must be allocated to the ACMA.

c) Any proposal based on seasonal emissions reductions of 10 tons or more and the Agency's approval ~~thereof shall~~of it must be subject to the public notice requirements ~~in accordance with the~~under regulations governing CAAPP permit or FESOP issuance.

d) Any proposal submitted ~~shall~~ must include the following:

1) Information identifying the source(s) from which the VOM emissions reductions has been or will be achieved and its owner or operator;

2) An explanation of the method used to achieve the VOM emissions reductions;

3) Relevant information describing the nature of the underlying activity that generated the VOM emissions and the relationship of the units at which the VOM emissions reduction occurred to other units or sources performing the same or related activity in the Chicago area, if the VOM emissions reduction is attributable to a partial or complete source shutdown or a production curtailment, as specified in subsection (a)(2), (a)(3) or (a)(4) ~~of this Section~~;

4) The amount of VOM emissions for the two seasonal allotment periods ~~prior to~~before the year(s) of curtailment, including supporting calculations, if the VOM emissions reduction is attributable to a production curtailment as specified in subsection (a)(3) or (a)(4) ~~of this Section~~;

5) The amount of the VOM emissions reduction, including supporting calculations and documentation, such as material usage information;

6) The name and address of the participating source(s), new participating source(s) or general participant(s) to which ATUs will be issued, including the name and telephone number of the account officer for ~~such~~ the source or participant; and

7) The owner or operator of each proposed emission reduction generator ~~shall~~ must certify its acceptance of the terms of the proposal and certify that it has achieved or will achieve the emissions reductions specified in the proposal.

e) The owner or operator of any emissions reduction generator may modify its operating permit to incorporate limitations that make the VOM emissions reductions specified in the relevant proposal enforceable.

f) If the emissions reduction generator does not modify its permit~~, as specified in~~ under subsection (e) ~~of this Section~~, or experiences a shutdown~~, as specified in~~ under subsection (a)(2) or (a)(4) ~~of this Section~~, and the proposal is submitted ~~prior to~~before the availability of actual VOM emissions data from the relevant seasonal allotment period, the Agency ~~shall~~ must determine if the proposal is acceptable on a preliminary basis and provide notification of this determination. The Agency ~~shall~~ must not issue final approval, in accordance with subsection (g) ~~of this Section~~, of any such proposal until the actual VOM emissions data ~~is~~ are submitted.

g) The Agency ~~shall~~ must notify the participating source, new participating source, or general participant in writing of its final decision with respect to the proposal within 45 days after ~~receipt of such~~receiving the proposal or ~~receipt of~~receiving

VOM emissions data to verify that the specified reductions occurred, whichever occurs later. If the Agency denies or conditionally approves a proposal, this written notice ~~shall~~ must include a statement of the specific reasons for denying or modifying the proposal. The Agency's determination as to the approvability of any proposal submitted ~~pursuant to~~under this Section is subject to review by the Board ~~as provided at~~under 35 Ill. Adm. Code 105.102~~, provided~~ if the proposed emissions reduction generator is not requesting a permit revision. If ~~such~~ a permit revision is requested, the applicable permit review and appeal procedures ~~shall~~ apply.

h) If the Agency deems that the proposal is sufficient to receive final approval, the Agency ~~shall~~ must issue ATUs in ~~accordance~~ compliance with the following:

1) Any ATUs issued ~~pursuant to~~under this subsection ~~shall~~ must be issued to the participating source(s), new participating source(s), or general participant identified in the proposal;

2) If the emissions reduction generator modifies its operating permit ~~as specified in~~under subsection (e) ~~of this Section,~~ to incorporate limitations that make the VOM emissions reductions specified in the relevant proposal enforceable, ATUs ~~shall~~ must be issued on the date ~~such~~ the source is required to comply with the limitations in the permit and for each seasonal allotment period thereafter in which the VOM emissions reductions are required by the source's permit;

3) If the proposal is based on a partial or complete shut down~~, as specified in~~ under subsection (a)(2) or (a)(4) ~~of this Section~~, ATUs ~~shall~~ must be issued before the seasonal allotment period for each year specified in the proposal;

4) If the emissions reduction generator does not modify its permit and the proposal is submitted ~~prior to~~before the availability of actual VOM emissions data from the relevant seasonal allotment period(s), the Agency ~~shall~~ must issue ATUs upon final approval, which ~~shall~~ must occur after actual VOM emissions data is evaluated for the relevant seasonal allotment period;

5) If the emissions reduction generator includes information on actual VOM emissions reductions during the seasonal allotment period for which ATUs are sought, ATUs will be issued by the Agency upon final approval of the proposal;

6) Except as provided in subsection (h)(7) ~~of this Section~~, ATUs issued ~~pursuant to~~under this subsection ~~shall~~ must only be valid for the seasonal allotment period in which the emissions reductions were achieved;

7) If the VOM emissions reductions specified in a proposal are incorporated into the emissions reduction generator's permit or, if the emissions reduction generator shuts down all or a portion of its operations and withdraws all relevant operating permits, ATUs issued ~~pursuant to~~under this subsection ~~shall~~ must be valid for the seasonal allotment period following issuance and for the next seasonal allotment period; and

8) The number of ATUs issued ~~pursuant to~~under subsection (h)(2) or (h)(3) ~~of this Section~~ based on a proposal under subsection (a)(4) ~~of this Section~~ ~~shall~~must be equal to the number of ATUs otherwise issuable under this Section reduced by 12 percent.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 205.510 Inter-Sector Transaction

Any person may submit a proposal to the Agency to have ATUs issued to the Transaction Account of a participating source, new participating source, or general participant equivalent to VOM emissions reductions from mobile sources or area sources in the Chicago area. Any such proposal for the VOM emissions reduction project is subject to Agency review and approval, ~~shall~~ must be consistent with laws and regulations, and ~~shall~~ must include all supporting documentation. The Agency ~~shall~~ must review all such proposals in ~~accordance~~ compliance with the following:

a) Regulatory Based Proposal

If the VOM emission reductions that have been generated or will be generated are pursuant to a regulation that provides the procedure to determine VOM emissions reductions and allows for such reductions to be converted to ATUs, the Agency ~~shall~~ must approve the proposal if based on the provisions of the applicable regulation. The Agency ~~shall~~ must approve, conditionally approve, or deny any complete and adequately supported proposal within 45 days after the ~~Agency's receipt thereof~~Agency receives it by sending written notification of its decision. If the Agency denies or conditionally approves a proposal, this written notice ~~shall~~ must include a statement of the specific reasons for denying or modifying the proposal.

b) Other Proposals

If the proposal is based on VOM emissions reductions that have been generated or will be generated which are beyond VOM emissions reductions required by any mandatory applicable rules, the proposal ~~shall~~ must include an explanation of the method(s) used to achieve the VOM emissions reductions and the method(s) used to quantify the VOM emissions reductions, including supporting documentation and calculations. The Agency ~~shall~~ must evaluate the validity of VOM emission reductions that allegedly were generated or will be generated and approve,

conditionally approve, or deny any complete proposal within 90 days after the ~~Agency's receipt~~Agency receives it by sending written notification of its decision to the source. If the Agency denies or conditionally approves a proposal, this written notice ~~shall~~ must include a statement of the specific reasons for denying or modifying the proposal.

c) ~~No~~ ATUs ~~shall~~ must not be issued based on mobile or area source VOM emissions reductions unless a proposal, in accordance with this Section, has been approved by the Agency.

d) All ATUs issued ~~pursuant to~~under a proposal approved ~~pursuant to~~under this Section ~~shall~~ must be issued to the Transaction Account identified in the proposal. ~~Such~~ The ATUs ~~shall~~ must only be valid for the seasonal allotment period in which the emissions reductions were achieved, unless the Agency specifies in its approval that ~~such~~ the ATUs ~~shall~~ must be valid for the seasonal allotment period following issuance and for the next seasonal allotment period.

e) The Agency's determination that a proposal submitted ~~pursuant to~~under this Section is denied or conditionally approved is subject to review by the Board ~~as provided at~~under 35 Ill. Adm. Code 105.102.

(Source: Amended at 48 Ill. Reg._____, effective_____)

SUBPART F: MARKET TRANSACTIONS

Section 205.600 ERMS Database

a) The Agency or its designee ~~shall~~ must maintain a bulletin board ~~that shall be~~ available for public access on which a listing of the status of ATUs will be posted. Other public information and notices will also be posted, and participating sources, new participating sources, and general participants may post ATUs available for purchase or wanted for purchase. The bulletin board ~~shall~~ must include the following information on ATUs:

1) Date issued and source issued to;

2) Where applicable, date transferred, and source or person transferred to;

3) Status of ATUs in each account, i.e., available for use, or date retired, or date expired; and

4) Posted each week during the reconciliation period and no less than monthly at all other times, the average price paid for ATUs transferred the previous week or the previous month, as appropriate.

b) The Agency or its designee ~~shall~~ must maintain a Transaction Account database. Information contained on this database ~~shall~~ must be considered the official record of the ERMS. Account officer(s) may request status updates for accounts for which they are designated. The database ~~shall~~ must include information on all ATUs held in each account.

c) The Agency or its designee ~~shall~~ must separately maintain a listing of all ATUs expired or retired within the most recent five years, including the date of expiration or retirement.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 205.610 Application for Transaction Account

a) Each participating source, new participating source, and general participant ~~shall~~ must apply for and obtain authorization for a Transaction Account from the Agency ~~prior to~~before conducting any market transactions. Each participating source ~~shall~~ must submit to the Agency its completed application for a Transaction Account no later than 30 days ~~prior to~~before the beginning of the first seasonal allotment period in which the source is required to participate. Each new participating source ~~shall~~ must submit to the Agency its completed application for a Transaction Account no later than 30 days ~~prior to~~before the beginning of the first seasonal allotment period in which it is operational.

b) Each Transaction Account application ~~shall~~ must include the following information:

1) The name and address of the participating source, new participating source, or general participant, and the name and address of its owner or operator;

2) The names and addresses of all designated account officers;

3) The certification ~~specified in~~under Section 205.620(a)(5) ~~of this Subpart~~ signed by each account officer; and

4) For a participating source or new participating source, identification of the CAAPP permit or FESOP number for the source.

c) Special Participants

Any person may purchase ATUs to retire for air quality benefit only. ~~Such~~ The person ~~shall~~ must be a special participant and ~~shall~~ must register with the Agency ~~prior to~~before its first ATU purchase. Special participants will not have Transaction Accounts in the Transaction Account database. All ATUs purchased

by special participants will be retired effective on the date of purchase and will be listed as retired in the appropriate database.

d) Special participants will be given a registration number by the Agency so that their purchases of ATUs can be recorded.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 205.620 Account Officer

a) Each participating source, new participating source, or general participant must have at least one account officer designated for each of its Transaction Accounts. The account officer(s) ~~shall~~ must be the only person(s) authorized to make ATU transactions involving ~~such~~ the designated Transaction Account. At least one account officer must certify each official document that pertains to a designated Transaction Account or associated market transactions. Account officers may be employees or contractors of participating sources, new participating sources, or general participants. No participating source, new participating source, or general participant may engage in ATU transactions if it does not have an account officer approved by the Agency. Each account officer ~~shall~~ must satisfy all of the following:

1) Be at least 18 years of age;

2) Be an American citizen or a legal alien;

3) Have not been convicted of or had a final judgment entered against him or her in any State or federal court for a violation of State or federal air pollution laws or regulations, or for fraud;

4) Be scheduled to attend the next scheduled training program or has already completed the program; and

5) Certify to the following statement as a part of the relevant Transaction Account application:

I certify that I satisfy all of the requirements for an account officer. I am aware that I may be disqualified from acting as an account officer in the State of Illinois~~, pursuant to~~ under 35 Ill. Adm. Code 205~~,~~ if any information submitted in this application is determined to be false or misleading.

b) Account Officer Training Program

Except as provided in subsection (d) ~~of this Section~~, each candidate must satisfactorily complete the training program for account officers conducted by the Agency or its designee ~~prior to~~before acting as an account officer.

1) To attend the account officer training program, a person must enroll with the Agency ~~prior to~~before the date for the next scheduled training program.

2) The training program ~~shall~~ must cover, at a minimum, ~~the following topics:~~ an overview of the ERMS, forms for the ERMS, market transaction procedures, and operation of the ERMS databases.

3) The account officer training program will be offered at least once annually, and may be offered more frequently, depending upon demand. The Agency or its designee ~~shall~~ mustl publish advance notice of the time, date, and location for each training program.

c) Disclaimer

The Agency and the State of Illinois do not endorse or guarantee the conduct or quality of work by account officers who have been approved by the Agency, nor does it endorse or guarantee the validity of any representations or ERMS market transactions offered or made by account officers who have been approved by the Agency.

d) Expedited Approval of Account Officer

~~In the event that~~If an account officer unexpectedly leaves that position, the participating source, new participating source, or general participant may request permission from the Agency to allow for a new account officer for up to one year~~, provided~~ if the participating source, new participating source, or general participant submits a written certification in ~~accordance~~ compliance with subsection (a)(5) ~~of this Section~~ and affirms that the candidate for expedited approval by the Agency ~~shall~~ will complete the training program~~,~~ in ~~accordance~~ compliance with subsection (b) ~~of this Section,~~ no later than one year ~~from~~ after the date the expedited approval is requested.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 205.630 ATU Transaction Procedures

Recognized sales and purchases of ATUs may be made between any two Transaction Accounts or from a Transaction Account to the ACMA. A sale of ATUs may also be made from a Transaction Account to a special participant. ~~No sale~~Sale of ATUs ~~shall be recognized~~ from a special participant to any other person must not be recognized.

a) Transfer of ATUs ~~shall be~~are subject to the following requirements:

1) Transfers between Transaction Accounts may only be made by the account officers for both accounts;

2) All ATU transfers ~~shall~~ must be duly authorized by the account officers for both Transaction Accounts~~,~~ or, if the ATUs are being transferred to a special participant, the account officer of the Transaction Account of the transferor and a representative of the special participant;

A) Duly authorized ATU transfers ~~shall~~ mustl identify the ATU(s) involved in the transaction;

B) Written ATU transfer agreements signed by the account officers for both Transaction Accounts may authorize the transfer of ATUs for more than one season. If a transfer agreement authorizes the future transfer of ATUs for any season for which ATUs have not yet been issued for use, the ATUs ~~shall~~ will be automatically transferred to the buyer's Transaction Account for each year ~~such~~ the transfer is authorized ~~pursuant to~~under the transfer agreement, in which case the account officers for each Transaction Account will be notified of this transfer;

3) No transfer ~~shall~~ will be considered official for purposes of the ERMS until entered into the Transaction Account database;

4) The Agency or its designee ~~shall~~ must enter ATU transfers into the Transaction Account database within one week ~~of~~ after the Agency ~~receiving~~ receives notification of a duly authorized ATU transfer; and

5) Any ATU transfer agreements entered into after December 31 of a given year may not be used by the buyer to cover emissions from the preceding seasonal allotment period, but may only be used prospectively.

b) The account officers involved in ATU transfers ~~shall~~ must report the purchase price for all ATU transfers to the Agency or its designee and ~~shall indicate whether consideration other than the purchase price reported was~~must involved in the transfer.

c) Transaction Requirements

1) Expired or retired ATUs may not be bought or sold;

2) The Transaction Account database must show ATUs proposed for transfer as being held by the selling entity. After ~~such~~ a transfer is official ~~as specified in~~under subsection (a)(3) ~~of this Section~~, the transferee's

Transaction Account will show the ATUs subject to ~~such~~ the transfer as being held in this Transaction Account;

3) The minimum sale allowed under the ERMS ~~shall~~ must be one ATU; and

4) No sale may include partial ATUs.

d) Official Record of Transactions

1) The official record of all ATU transactions and the current status of all ATUs ~~shall~~ must be the Transaction Account database.

2) Account officers ~~shall~~ must be allowed to inspect their Transaction Account(s) in the Transaction Account database. Any discrepancies found by the account officer ~~shall~~ must be reported to the Agency or its designee ~~along~~ with a request for correction. All data supporting ~~such~~ the request ~~shall~~ must be sent ~~along~~ with the request for correction. A request for correction may not be used to alter an allotment.

3) After the end of each reconciliation period, the Agency ~~shall~~ must retire ATUs in the Transaction Account of each participating source or new participating source in the amount specified in Section 205.150(c) or (d) ~~of this Part~~. If the source does not have sufficient ATUs in its Transaction Account to account for its VOM emissions from the preceding seasonal allotment period, the source ~~shall~~ must be subject to emissions excursion compensation in ~~accordance~~ compliance with Section 205.720 ~~of this Part~~. ATUs ~~shall~~ must be retired in order of issuance, unless the account officer for the Transaction Account notifies the Agency in writing to specify which ATUs in the Transaction Account should be retired.

(Source: Amended at 48 Ill. Reg._____, effective_____)

SUBPART G: PERFORMANCE ACCOUNTABILITY

Section 205.700 Compliance Accounting

a) The owner or operator of each participating source or new participating source ~~shall~~ must maintain and retain for five years at the source or at another location agreed to by the Agency, ~~in conjunction~~ with the records it maintains to demonstrate compliance with its CAAPP permit or FESOP, all of the following documents as its compliance master file:

1) A copy of its seasonal component of its Annual Emissions Report;

2) Information on actual VOM emissions, as recorded in ~~accordance~~ compliance with Section 205.335 ~~of this Part~~, and as required by the CAAPP permit or FESOP for the source; and

3) Copies of any transfer agreements for the purchase or sale of ATUs and other documentation associated with the transfer of ATUs.

b) Compliance Master File Review

1) The owner or operator of each participating source or new participating source ~~shall~~ must allow the Agency or an authorized representative to enter and inspect the premises as described by Section 39.5(7)(p)(ii) of the Act [415 ILCS 5/39.5(7)(p)(ii)] and to review its compliance master file.

2) After the conclusion of each compliance master file review, the Agency must prepare and issue to the inspected source a report ~~shall be prepared by the Agency and issued to the inspected source~~ that includes the following information:

A) An identification of any noncompliance with the requirements of this Part; and

B) An evaluation of increases and decreases in seasonal emissions of VOMs that are also hazardous air pollutants, as related to ATU transactions.

3) Nothing in this Part ~~shall affect~~affects any other obligations of a source to allow inspection(s) under State or federal laws or regulations.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 205.710 Alternative Compliance Market Account (ACMA)

a) The Agency or its designee ~~shall~~ must operate the ACMA. The purpose of the ACMA is to serve as a secondary source of ATUs that may be purchased by participating sources and new participating sources, as specified in this Section.

b) The ATUs in the ACMA will have an indefinite life so long as they remain in the ACMA, but, once purchased, must be used either for the preceding or next seasonal allotment period. If these ATUs are not used for compliance in that seasonal allotment period, they will expire.

c) ATUs in an amount equal to one percent of each year's allotment ~~shall~~ mustl be issued to the ACMA, beginning in 1999. In addition, ATUs ~~shall~~ mustl be deposited into the ACMA due to source shutdowns, as specified in Sections

205.410(a) and 205.500(b) ~~of this Part~~. ATUs for the ACMA may also be obtained by the Agency in the following ways:

1) The Agency or its designee is authorized to accept voluntary contributions of ATUs from participating sources or other persons for deposit into the ACMA.

2) The Agency is authorized to deposit ATUs from its purchase of ATUs or to deposit ATUs created from emissions reductions it generates beyond reductions otherwise required by statute or regulation for attainment of the NAAQS for ozone.

d) Regular Access to ACMA

1) Regular access to the ACMA ~~shall~~ must be available when there is sufficient positive balance of ATUs to supply the requesting source. Any participating source or new participating source may apply to the Agency during the reconciliation period for regular access to the ACMA to purchase ATUs for the preceding seasonal allotment period.

2) Within 15 days after receipt of any request for regular access to the ACMA, the Agency ~~shall~~ mustl notify the source if regular access to the ACMA is available or if there are insufficient ATUs in the ACMA for regular access. The Agency ~~shall~~ must also advise any participating source that special access is available when regular access is unavailable.

3) After being granted regular access to the ACMA by the Agency, a participating source or new participating source may purchase ATUs from the ACMA at the rate of $1,000 per ATU or 1.5 times the average market price, as determined by the Agency, whichever is less. ATUs ~~shall~~ will only be available at 1.5 times the market price if sufficient single season ATUs transfers have occurred with a purchase price that fully reflects the consideration involved in the transfer to establish an average market price. All payments for ATUs from the ACMA ~~shall~~ must be made to the Agency or the Agency's designee for deposit into the Alternative Compliance Market Account Fund.

e) Special Access to ACMA

Special access to the ACMA ~~shall~~ must be available to participating sources~~,~~ in ~~accordance~~ compliance with this subsection~~,~~ when the ACMA balance is not sufficient to meet the needs of requesting participating sources.

1) The Agency ~~shall~~ must credit the ACMA with up to one percent of ATUs from the seasonal allotment for the next seasonal allotment period as an advance to provide assistance for special access to be granted, as provided

in subsection (e)(2) ~~of this Section~~. Special access to the ACMA ~~shall~~ must only be allowed to the extent that ~~such~~ the access does not exceed this one percent of the next seasonal allotment.

2) To the extent allowed ~~pursuant to~~under subsection (e)(1) ~~of this Section~~, the Agency ~~shall~~ must grant special access to the ACMA to any participating source if the source submits a written request demonstrating that the following exist:

A) During the reconciliation period the source has not been able to obtain regular access to the ACMA and has not been able to obtain ATUs in the market; and

B) Actual seasonal emissions have exceeded ATUs held by the source for the applicable seasonal allotment period.

3) After being granted special access to the ACMA, a participating source may purchase ATUs at the rate of $1100 per ATU or 2 times the average market price, as determined by the Agency, whichever is less. ATUs ~~shall~~ will only be available at 2 times the market price if sufficient single season ATUs transfers have occurred with a purchase price that fully reflects the consideration involved in the transfer to establish an average market price. All payments for ATUs from the ACMA ~~shall~~ must be made payable to the Agency or the Agency's designee for deposit into the Alternative Compliance Market Account Fund.

4) The Agency ~~shall~~ must provide written notification, within 15 days after receipt of any request for special access to the ACMA, allowing or denying special access to the ACMA to any participating source requesting ~~such~~ access. If the Agency denies ~~such~~ access, this written notification ~~shall~~ must include its reasons for denying access.

f) Special access to the ACMA will create a need to generate sufficient VOM emissions reductions during the subsequent calendar year to offset the ATUs distributed~~; in this instance~~. In this case, the Agency ~~shall~~must:

1) Offset these ATUs by crediting any expired ATUs from the Transaction Accounts of all ERMS participants to the ACMA after the end of the reconciliation period;

2) Seek to achieve an equivalent amount of VOM emissions reductions by the end of the subsequent year to offset these ATUs; or

3) Credit the ACMA with the one percent of ATUs, as needed, from the next seasonal allotment, as provided in subsection (e)(1) ~~of this Section~~.

g) The Agency is authorized to use moneys derived from the sale of ATUs from the ACMA to develop and implement additional VOM emissions reductions. If the ACMA is operating without a positive balance, the Agency ~~shall~~ must endeavor to generate new emissions reductions whenever possible.

h) Limitations on Operation of ACMA

The ability of new participating sources to obtain ATUs from the ACMA ~~shall~~ must be limited through the seasonal allotment period of 2002, in the aggregate, to no more than 30 percent of the available ACMA balance at the start of each seasonal allotment period unless ATUs are available after access by all participating sources. In ~~such~~ that case, new participating sources may obtain ATUs from the ACMA up to 50 percent of the available ACMA balance at the start of each seasonal allotment period.

i) If the Agency denies special access to the ACMA to any participating source, ~~such~~ the source may petition the Board for review of the Agency's denial ~~in accordance with~~under the procedures ~~specified~~ at 35 Ill. Adm. Code 105.102.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 205.720 Emissions Excursion Compensation

The Agency ~~shall~~ must obtain emissions excursion compensation from any participating source or new participating source that does not hold ATUs in ~~accordance~~ compliance with Section 205.150(c) or (d) ~~of this Part~~ by the conclusion of the reconciliation period. For any emissions excursion during 1999 by a participating or new participating source that was not issued a CAAPP permit before May 1, 1998, all references in subsections (b)(1) and (b)(3), (c), and (e) ~~of this Section~~ to 1.2 times the emissions excursion ~~shall~~ must be 1.0 times the emissions excursion. The Agency ~~shall~~ must obtain emissions excursion compensation ~~pursuant to~~under the following procedures.

a) The Agency ~~shall~~ must issue an Excursion Compensation Notice to any such source when the Agency identifies an apparent emissions excursion ~~is identified by the Agency~~.

b) Except as provided in subsection (c) ~~of this Section~~, the Excursion Compensation Notice ~~shall~~ must require the source to provide compensation in the following manner:

1) The participating source or new participating source ~~shall~~ must purchase ATUs from the ACMA in an amount equivalent to 1.2 times the emissions excursion;

2) For the second consecutive seasonal allotment period in which an emissions excursion occurred, the participating source or new

participating source ~~shall~~ must purchase ATUs from the ACMA in an amount equivalent to 1.5 times the emissions excursion; or

3) If the ACMA balance is not adequate to cover 1.2 times or, when required, 1.5 times the total emissions excursion amount, the Agency ~~shall~~ must deduct ATUs equivalent to 1.2 times or, when required, 1.5 times the total emissions excursion or any remaining portion thereof from the source's next allotment of ATUs.

c) Within 15 days after ~~receipt of~~receiving an Excursion Compensation Notice, the owner or operator of the subject source may apply to the Agency to request that ATUs in an amount equivalent to 1.2 times or, when required, 1.5 times the emissions excursion be deducted from the source's next seasonal allotment, rather than acquired from the ACMA.

d) Any source issued an Excursion Compensation Notice may contest the Agency's findings by filing a petition with the Board requesting review of the Emissions Excursion Compensation Notice ~~in accordance with~~under the procedures ~~specified~~ in 35 Ill. Adm. Code 105.102.

e) If any source contests the Agency's findings in the Excursion Compensation Notice, the Agency ~~shall~~ will withhold ATUs in an amount equivalent to 1.2 times or, when required, 1.5 times the amount of the alleged emissions excursion from the source's next seasonal allotment. These ATUs ~~shall~~ must be withheld until the Board issues a final order resolving the source's petition contesting the Agency's Excursion Compensation Notice. If the source prevails before the Board, the ATUs withheld ~~shall~~ will be transferred to the source's Transaction Account. If the Agency prevails before the Board, the ATUs withheld ~~shall~~ will be retired to offset the emissions excursion.

f) Sources that provide emissions excursion compensation ~~pursuant to~~under this Section ~~shall~~ must not be subject to enforcement authority granted to the State or any person under applicable State or federal laws or regulations or any permit conditions. The enforcement authority of the State or any person is only limited by this subsection as it applies to an emissions excursion.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 205.730 Excursion Reporting

Upon issuance of each Excursion Compensation Notice to any source that has already had one previous admitted or adjudicated emissions excursion, the source ~~shall~~ must submit to the Agency any additional reports required by the source's CAAPP permit or FESOP.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 205.740 Enforcement Authority

Except as provided in Section 205.720(f) ~~of this Subpart~~, nothing in this Part limits the State's authority to seek penalties and injunctive relief for any violation of any applicable State law or regulation or any permit condition, as otherwise provided in the Act. Nothing in this Part limits the right of the federal government or any person to directly enforce against actions or omissions which constitute violations of permits required by the Clean Air Act or applicable federal environmental laws and regulations.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 205.750 Emergency Conditions

VOM emissions that are a consequence of an emergency~~,~~ and are in excess of the technology-based emission rates which are achieved during normal operating conditions, to the extent that ~~such~~ the excess emissions are not caused by improperly designed equipment, lack of preventative maintenance, careless or improper operation, or operation error, ~~shall~~ must be deducted from the calculation of actual VOM emissions during the seasonal allotment period in which the emergency occurred, subject to the following:

a) The owner or operator of the participating source or new participating source ~~shall~~ must submit an initial emergency conditions report to the Agency within two days after the time when such excess emissions occurred due to the emergency. ~~The submittal of~~Submitting this initial emergency conditions report ~~shall~~ will be sufficient to fulfill the notice requirements of Section 39.5(7)(k) of the Act [415 ILCS 5/39.5(7)(k)] as it relates to VOM emissions at the source if the report provides a detailed description of the emergency, any steps taken to mitigate emissions, and corrective actions taken, to the extent practicable. The final report ~~shall~~ must contain the following information:

1) A description of the cause(s) of the emergency and the duration of the episode;

2) Verification that the source was being operated properly at the time of the emergency;

3) A demonstration that the source took all reasonable steps to minimize excess VOM emissions during the emergency period, including ~~but not limited to~~ the following actions, if technically and economically feasible:

A) The level of operation of the affected emission unit(s) was minimized;

B) The level of emissions from the affected emission units(s) was minimized by use of alternative raw materials or alternative control measures;

C) The duration of the excess emissions was minimized; and

D) The amount of VOM emissions from other emission units at the source or other sources located in the Chicago area owned or operated by the person or entity were reduced;

4) A demonstration that appropriate corrective action(s) were taken promptly;

5) A demonstration that the affected emission units were:

A) Being carefully and properly operated at the time of the emergency, including copies of appropriate records and other relevant evidence;

B) Properly designed; and

C) Properly maintained with appropriate preventative maintenance; and

6) An estimate of the amount of VOM emissions that occurred during the emergency in excess of the technology-based emission factor achieved during normal operating conditions, including supporting data, the relevant emissions factor, and calculations.

b) The owner or operator of any such source may supplement its initial emergency conditions report within 10 days after the conclusion of the emergency situation. If an initial emergency conditions report is not supplemented, ~~such~~ theh report is deemed the final emergency conditions report. If, however, an initial emergency conditions report is supplemented, the combination of ~~such~~ the initial report ~~plus~~ and the supplemental information is deemed the final emergency conditions report.

c) The Agency must approve, conditionally approve, or reject the findings in the final emergency conditions report~~,~~ submitted by the source~~,~~ in writing within 45 days after ~~receipt of~~receiving the initial emergency conditions report, subject to the following:

1) If the Agency concurs with the emergency conditions report, the source is not required to hold ATUs for the excess VOM emissions attributable to the emergency;

2) If the Agency approves with conditions or rejects the emergency conditions report, the source ~~shall~~ must be required to hold ATUs by the end of the reconciliation period in an amount not less than the emissions

identified as excess in the emergency conditions report or provide emissions excursion compensation in ~~accordance~~ compliance with Section 205.720 ~~of this Subpart~~, if an emissions excursion occurred;

3) If the Agency approves with conditions an emergency conditions report, the Agency must identify in its written notice the amount of VOM emissions that are not attributable to an emergency; and

4) If the Agency approves with conditions or rejects a source's emergency conditions report, the source may raise the emergency as an affirmative defense ~~pursuant to~~under Section 39.5(7)(k) of the Act [415 ILCS 5/39.5(7)(k)] in any action brought for noncompliance with this Part or an action brought to review the Agency's issuance of an Excursion Compensation Notice~~, as provided in~~ under Section 205.720(d) ~~of this Subpart~~.

d) Nothing in this Section relieves any source of any obligation to comply with other applicable requirements, permit conditions, or other provisions addressing emergency situations.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 205.760 Market System Review Procedures

Beginning in 2000, the Agency ~~shall~~ must prepare an Annual Performance Review Report that addresses the effect of VOM emissions reductions in the Chicago area on progress toward meeting the RFP requirements and achieving attainment of the NAAQS for ozone by 2007.

a) The Annual Performance Review Report will review trends and patterns which may have emerged in the operation of the ERMS, and ~~shall~~ must include~~, but not be limited to,~~ the following:

1) Total aggregate VOM emissions during the previous seasonal allotment period;

2) The number of ATUs retired for compliance purposes or for air quality benefit, currently being banked, or used by new participating sources for the previous seasonal allotment period;

3) An evaluation of trading activities, including sources with no trading activity, sources that are net purchasers of ATUs, and sources that are net sellers of ATUs;

4) ACMA transactions since the preparation of the previous report and the account balance;

5) A summary of emissions reduction generator and inter-sector proposals;

6) Distribution of transactions by geographic area or character of source;

7) Availability of ATUs for purchase;

8) The average market price for ATU transactions from the previous seasonal allotment period; and

9) Trends and spatial distributions of hazardous air pollutants.

b) The Agency ~~shall~~ must prepare the Report by June 30 of the year following the seasonal allotment period addressed by the Report. The Agency will make copies of its Report available to interested parties upon request.

207.902 Agency Right of Inspection
207.904 Agency Right to Revoke Approval of Plan

AUTHORITY: Implementing and authorized by the Vehicle Emissions Inspection Law of 1995 [625 ILCS 5/13B-30(d)] and the Illinois Environmental Protection Act [415 ILCS 5/5, 10, 27, 28 and 39].

SOURCE: Adopted in R00-16 at 24 Ill. Reg. 8979, effective June 14, 2000; amended in R18-21 at 48 Ill. Reg._____, effective_____.

SUBPART A: GENERAL PROVISIONS

Section 207.100 Purpose

a) This Part ~~sets forth the~~establishes procedures and performance requirements ~~to be followed when~~for conducting vehicle scrappage activities within the State of Illinois ~~for the purpose of receiving~~to receive Creditable Emissions Reductions (CERs).

b) This Part ~~is designed to achieve the following objectives~~intends to:

1) Provide an option for regulated sources and interested parties to achieve emissions reductions;

2) Ensure compatibility with applicable guidance for vehicle scrappage activities developed by the United States Environmental Protection Agency (USEPA);

3) Provide vehicle scrappage training to help ensure that vehicle scrappage activities conducted to generate CERs are ~~only~~ managed only by qualified individuals; and

4) Strike an equitable balance among various parties that may be interested in vehicle scrappage, including regulated sources, potential sponsors of scrappage activities, owners of vehicles eligible to be scrapped, vehicle collectors, automotive rebuilders, and other interest groups.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 207.102 Definitions

Unless otherwise specified in this Part and unless a different meaning of a term is clear from its context, the definitions for the terms ~~used~~ in this Part ~~shall be~~are the same as those ~~found~~ in the Environmental Protection Act [415 ILCS 5] or ~~in~~ 35 Ill. Adm. Code 211 or 240. As used in this Part, the following terms have the meanings ~~set forth~~ below:

a) "Creditable Emissions Reductions" or "CER" means a unit of emissions reductions based on vehicle retirement activities ~~in accordance~~complying with an Agency-approved vehicle scrappage plan.

b) "Eligible vehicle" means any vehicle that qualifies for retirement in a vehicle scrappage project or program ~~as specified in~~under Section 207.304 ~~of this Part~~.

c) "Emissions-related parts" means the engine and other vehicle parts involved with fuel intake, combustion, exhaust, or ~~the control of the~~controlling evaporation of fuel, which have a direct relation to the type or quantity of emissions produced by the vehicle.

d) "IM240 Test" means a transient loaded mode exhaust test procedure, ~~as specified in~~under 35 Ill. Adm. Code 276, designed to measure mass quantities of vehicle exhaust emissions of hydrocarbons, carbon monoxide, carbon dioxide, and oxides of nitrogen generated during vehicle operation on a chassis dynamometer.

e) "Light-duty truck 1" means a motor vehicle rated at 6000 pounds maximum gross vehicle weight rate (GVWR) or less and which has a vehicle frontal area of 45 square feet or less, and which is

1) designed primarily ~~for purposes of transportation of~~to transport property or ~~is a derivation of~~derives from such a vehicle~~,~~; or ~~is~~

2) designed primarily ~~for transportation of~~to transport persons and has a capacity of more than 12 persons~~,~~; or ~~is~~

3) available with special features enabling off-street or off-highway operation and use.

f) "Light-duty truck 2" means a motor vehicle rated between 6001 and 8500 pounds maximum GVWR and which has a vehicle frontal area of 45 square feet or less, and which is

1) designed primarily ~~for purposes of transportation of~~to transport property or ~~is a derivation of~~derives from such a vehicle~~,~~; or ~~is~~

2) designed primarily ~~for transportation of~~to transport persons and has a capacity of more than 12 persons~~,~~; or ~~is~~

3) available with special features enabling off-street or off-highway operation and use.

g) "Light-duty vehicle" means a passenger car or passenger car derivative capable of seating twelve passengers or fewer.

h) "Non-emissions-related parts" means vehicle parts not involved with fuel intake, combustion, or exhaust, or ~~the control of~~controlling evaporation of fuel, and

which do not have a direct relation to the type or quantity of emissions produced by the vehicle.

i) "Recognized repair technician" means a person

1) professionally engaged in vehicle repair~~,~~; or

2) employed by a going concern whose purpose is ~~the repair of~~repairing vehicles~~,~~; or

3) ~~possessing~~ possesses a ~~nationally recognized~~nationally-recognized certification for emissions-related diagnosis and repair.

j) "Vehicle retirement" means ~~the permanent~~ rendering ~~of~~ an eligible vehicle into ~~an~~ a permanently inoperable condition, in ~~accordance~~ compliance with this Part and a vehicle scrappage plan.

k) "Vehicle scrappage" means activities related to ~~retirement of~~retiring eligible vehicles for the purpose of receiving CERs under this Part.

l) "Vehicle scrappage manager" means a natural person who satisfies all qualification requirements ~~specified~~ in Section 207.700 ~~of this Part~~ and is eligible to conduct vehicle scrappage activities ~~pursuant to~~under this Part.

m) "Vehicle scrappage plan" means a ~~type of~~ plan ~~that satisfies~~satisfying all applicable requirements of Subpart F ~~of this Part,~~ and ~~has been~~ approved or sponsored by the Agency, under which the vehicle scrappage activities for the applicable vehicle scrappage project or program must be conducted.

n) "Vehicle scrappage program" means periodic or ongoing vehicle scrappage activities conducted in ~~accordance~~ compliance with the applicable requirements of this Part and a vehicle scrappage plan.

o) "Vehicle scrappage project" means a one-time vehicle scrappage event conducted in ~~accordance~~ compliance with the applicable requirements of this Part and a vehicle scrappage plan.

p) "Vehicle scrappage sponsor" means any interested person or entity that satisfies all of the requirements of Section 207.702 ~~of this Part~~ and financially underwrites a vehicle scrappage project or program conducted under this Part.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 207.104 Severability

If any Section, subsection, sentence, or clause of this Part is judged invalid, ~~such~~ that adjudication ~~shall~~ must not affect the validity of this Part as a whole or any Section, subsection, sentence, or clause ~~thereof~~ not judged invalid.

(Source: Amended at 48 Ill. Reg._____, effective_____)

SUBPART B: APPLICABILITY

Section 207.200 Applicability

This Part applies to vehicle scrappage activities conducted in the State of Illinois ~~conducted~~ to receive CERs and to all persons or entities that are, or desire to be, vehicle scrappage managers, sponsors, or other participants.

(Source: Amended at 48 Ill. Reg._____, effective_____)

SUBPART C: REQUIREMENTS OF VEHICLE SCRAPPAGE PROJECTS AND PROGRAMS

Section 207.300 Scope

Each vehicle scrappage project or program conducted ~~pursuant to the provisions of~~under this Part must satisfy ~~all of~~ the requirements ~~specified~~ in this Subpart.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 207.302 Vehicle Scrappage Sponsors and Managers

Each vehicle scrappage project or program ~~shall~~ must be financially underwritten by a vehicle scrappage sponsor ~~who satisfies all of~~satisfying the requirements of Section 207.702 ~~of this Part~~, and ~~shall~~ must be directed by a vehicle scrappage manager ~~who satisfies all of~~satisfying the requirements of Section 207.700 ~~of this Part~~.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 207.304 Vehicle Eligibility

Each vehicle that is retired in a vehicle scrappage project or program ~~shall~~ must satisfy the following criteria:

a) Be a light-duty vehicle, light-duty truck 1, or light-duty truck 2;

b) ~~Shall~~ Must not be from a model year 25 years old or older;

c) Have been continuously registered with the Illinois Secretary of State for the ~~12 month~~12-month period immediately ~~prior to~~before the date of its sale for use in a vehicle scrappage project or program;

d) If the vehicle will be used to claim CERs ~~that are~~ intended to address a specific pollution problem (e.g., ozone nonattainment), the vehicle must have been registered at an address within an area where emissions reductions are required for the applicable pollutant or pollutant precursor for the ~~12 month~~12-month period immediately ~~prior to~~before the date of its sale for use in a vehicle scrappage project or program;

e) Be legally driven to the collection site and have the applicable equipment required to drive the vehicle on any highway ~~as specified in~~under Chapter 12 of the Illinois Vehicle Code [625 ILCS 5/12];

f) Be powered by a spark ignition internal combustion engine;

g) Have arrived at the place of sale under its own power;

h) Have passed the operability check ~~specified~~ in Section 207.312 ~~of this Subpart~~; and

i) ~~Be in compliance~~Comply with the Illinois vehicle emissions testing program ~~as specified by~~under the Illinois Vehicle Emissions Inspection Law of 1995 [625 ILCS 5/13B] and regulations promulgated ~~thereunder~~under it.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 207.306 Vehicle Ownership

a) Each vehicle retired ~~pursuant to~~under a vehicle scrappage project or program must have a valid, legally transferable title.

b) An owner listed on the title, a legal representative of the owner or owners, or, if the owner is an entity, an agent of the entity must appear at the collection site with the vehicle at the time of its sale to a vehicle scrappage project or program.

c) It ~~shall~~ must be the responsibility of the vehicle scrappage sponsor or manager to provide the Illinois Secretary of State with all vehicle transfer records necessary to document the proper transfer and retirement of vehicles that are scrapped. The Agency assumes no responsibility for documentation or legality of transfer of vehicle titles.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 207.308 Notification of Intent to Retire Vehicles

a) If the vehicle scrappage plan targets certain vehicles~~, as provided in~~ under Subpart D ~~of this Part~~, the vehicle scrappage manager or sponsor may request that the

Agency provide notice of the applicable vehicle scrappage activities to owners of vehicles that meet the specifications in the plan. This notice will provide information to allow the vehicle owners to contact the relevant vehicle scrappage sponsor or manager for more information about the proposed vehicle scrappage activities.

b) If a vehicle scrappage manager or sponsor does not request that the Agency ~~to~~ provide notification ~~as provided in~~under subsection (a) ~~of this Section~~, the vehicle scrappage sponsor or manager must notify owners of vehicles that are prospective candidates for retirement of the proposed vehicle scrappage activities. Notification may be provided by general public notification methods.

c) Any notification provided to vehicle owners by vehicle scrappage sponsors or managers must, at a minimum, convey the following ~~information~~:

1) That participation in the program or project is strictly voluntary;

2) The name and address of the vehicle scrappage sponsor or manager;

3) All conditions that the vehicle owner and the vehicle itself must satisfy ~~in order~~ to participate in the ~~vehicle scrappage~~ project or program;

4) The amount of money that is being offered to the owner by the vehicle scrappage sponsor or manager for the purchase of the owner's vehicle if all conditions of vehicle eligibility are met;

5) That ~~the identification of~~identifying the owner's vehicle as a candidate for retirement does not ~~constitute an allegation of~~allege any environmental or other violation by that owner; and

6) A clear statement that the notice is ~~being~~ provided by that sponsor or manager, not by the Agency or by any other governmental entity, unless the Agency is the vehicle scrappage sponsor.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 207.310 Notification to Vehicle Collectors and Automotive Rebuilders and Suppliers

a) The Agency will make available to vehicle scrappage sponsors or managers a list of recognized vehicle collector associations and persons normally engaged in either the business of rebuilding vehicle parts or supplying ~~such~~ parts to rebuilders that may be interested in purchasing vehicles collected under projects and programs. ~~Recognized~~ To be included in the list, recognized vehicle collector associations and persons normally engaged in either the business of rebuilding

vehicle parts or supplying ~~such~~ parts to rebuilders must submit a written request to the Agency ~~for inclusion on the list~~.

b) Vehicle scrappage sponsors or managers ~~shall~~ must provide notification of the availability of vehicles to be retired by either posting notice on the Internet or providing written notice to ~~the~~ persons or entities identified by the Agency on the list ~~specified~~ in subsection (a) ~~of this Section~~. Vehicles may not be retired until 21 days after the notification required by this subsection is provided.

c) A vehicle scrappage manager or sponsor may ~~utilize~~ use Agency capabilities to provide the notification required under this Section on the Internet.

d) Vehicle scrappage sponsors and managers may sell vehicles to interested persons ~~in lieu~~instead of retiring the vehicle for CERs. Vehicle scrappage managers and sponsors remain eligible for CERs if non-emissions-related parts are sold to interested persons or emissions-related parts are sold to either vehicle collectors or persons normally engaged in either the business of rebuilding vehicle parts or supplying such parts to rebuilders, ~~provided that~~if disassembly of emissions-related parts has been performed ~~as specified in~~under Section 207.316(e) ~~of this Subpart~~. If a vehicle or emissions-related parts from a vehicle are resold without disassembly ~~as specified in~~under Section 207.316(e) ~~of this Subpart~~, CERs may not be claimed for the vehicle.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 207.312 Operability Check

Each vehicle ~~that is~~ to be retired ~~pursuant to~~under this Part ~~shall~~ must pass an operability check ~~prior to~~before purchase and collection. The operability check ~~shall~~ must include, at a minimum:

a) ~~Start-up of~~Starting up the vehicle;

b) ~~Test-drive of~~Test-driving the vehicle for five or more feet in forward gear;

c) ~~Test-drive of~~Test-driving the vehicle for five or more feet in reverse gear;

d) ~~Shut-off of~~Shutting off the vehicle; and

e) Visual inspection for fluid leakage or any malfunction or other damage that would render the vehicle unsuitable for normal operation.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 207.314 Collection and Testing

a) Each vehicle ~~that is~~ purchased and collected by a vehicle scrappage sponsor or manager ~~shall~~ must be photographed at the collection site~~, along~~ with all owners or representatives or agents of the owners of the vehicle that are present. Each vehicle ~~shall~~ must also be marked with a unique identification number ~~that is~~ visible in the photograph.

b) After ~~arrival~~ a vehicle arrives at the collection site, a vehicle scrappage sponsor or manager ~~shall~~ must take adequate measures to ensure that a vehicle that is to be retired is not adjusted, repaired, or tampered with in any way until any testing has been completed. If non-emissions-related parts are no longer in operable condition after the vehicle is collected and passes the operability requirements in Section 207.312 ~~of this Subpart~~, repairs to parts including batteries and tires may be made if needed to allow testing ~~(e.g., batteries, tires)~~. No parts may be removed from any vehicle ~~prior to the completion of~~before completing any testing.

c) The mileage indicated on the odometer must be recorded at the time of collection.

d) If vehicles to be retired must undergo emissions testing ~~pursuant to~~under the applicable vehicle scrappage plan and are not tested within 45 calendar days after collection of the vehicle, any CERs claimed which are attributable to that vehicle will be discounted by ten percent. If emissions testing is not conducted within 90 calendar days after collection of vehicles, vehicle scrappage managers and sponsors will be able to claim CERs based only on ~~the basis of~~ modeled emissions.

e) ~~In lieu~~Instead of performing emissions testing on a vehicle, vehicle scrappage managers and sponsors may use the most recent emissions test results for that vehicle from an ~~Agency administered~~Agency-administered IM240 Test conducted under the Illinois vehicle emissions test program ~~established and operated pursuant to~~under the Vehicle Emissions Inspection Law of 1995 [625 ILCS 5/13B]~~, provided that such~~if the test was performed no more than 90 calendar days before collection of the vehicle.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 207.316 Disassembly, Recycling, and Disposal Based on Vehicle Scrappage Activities

a) All vehicles for which CERs are claimed ~~shall~~ must be crushed or otherwise recycled or ultimately disposed of in ~~accordance~~ compliance with this Section, the applicable vehicle scrappage plan, and the schedule ~~specified~~ in that plan.

b) Any residual materials or wastes ~~that are~~ derived from ~~the permanent retirement of~~permanently retiring vehicles, including all fluids, gases, and environmentally sensitive materials, ~~shall~~ must be recycled or disposed of in an environmentally

sound manner, in conformity with the applicable vehicle scrappage plan, and in ~~accordance~~ compliance with all federal and State laws and regulations.

c) Used tires derived from ~~the permanent retirement of~~permanently retiring vehicles ~~shall~~ must be recycled or ultimately disposed of in ~~accordance~~ compliance with Title XIV of the Environmental Protection Act [415 ILCS 5/53-55.15] and regulations promulgated ~~thereunder~~under it.

d) Non-emissions-related parts may be resold or recycled.

e) Vehicle scrappage managers, sponsors, and scrap yards identified in vehicle scrappage plans may resell or recycle emissions-related parts (including engines) to vehicle collectors or to persons normally engaged in either the business of rebuilding vehicle parts or ~~normally engaged in~~ supplying such parts to rebuilders, ~~provided~~ if the following requirements are met:

1) The engine must be disassembled into the cylinder head, block, crankshaft, and connecting rods; and

2) All other emissions-related parts must be disassembled into their major components.

f) Any recycling of emissions-related or non-emissions-related parts ~~shall~~ must be conducted in ~~conformity~~ compliance with a vehicle scrappage plan expressly providing for appropriate disassembly, rebuilding or reconditioning, if applicable, and sale.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 207.318 Documentation Requirements

a) Each vehicle scrappage sponsor or manager ~~shall~~ must maintain records for at least five years of all vehicle scrappage activities conducted ~~as specified in~~under the applicable vehicle scrappage plan, including ~~the following information~~:

1) Identification of eligible vehicles accepted in the vehicle scrappage project or program, including the vehicle identification number and documentation indicating that these vehicles meet the eligibility criteria ~~specified~~ in Section 207.304 ~~of this Subpart~~;

2) Documentation to verify vehicle ownership and appropriate transfer of ownership for all eligible vehicles, as specified in Section 207.306 ~~of this Subpart~~;

3) Photographic documentation ~~relative to~~of vehicle collection activities, as specified in Section 207.314(a) ~~of this Subpart~~;

4) Records verifying mileage for each vehicle, as specified in Section 207.314(c);

5) Documentation of all vehicle testing performed in ~~accordance~~ compliance with the applicable vehicle scrappage plan and ~~Section~~ Sections 207.314 ~~of this Subpart~~ and ~~Section~~ 207.502 ~~of this Part~~;

6) All records and supporting documentation related to any calculations of emissions that are performed;

7) Documentation of all vehicle disassembly, recycling, and disposal activities, as specified in Section 207.316 ~~of this Subpart~~, including any waste disposal manifests or receipts obtained from scrap yards, recyclers, or disposal facilities ~~evidencing~~ documenting recycling or disposal of all residual materials and wastes derived from vehicle scrappage;

8) If emissions-related parts are resold or recycled, documentation demonstrating that appropriate disassembly has occurred, as specified in Section 207.316(e) ~~of this Subpart~~; and

9) Documentation supporting the use of any enhanced vehicle scrappage options such as the options ~~described~~ in Subpart D.

b) Vehicle scrappage sponsors or managers ~~shall~~must:

1) Maintain all records required under this Part at one location within Illinois;

2) Maintain a copy of the applicable vehicle scrappage plan at the site of each vehicle scrappage activity;

3) Make a copy of all documentation required to be maintained ~~pursuant to~~under this Part available to Agency representatives for inspection upon request; and

4) Submit to the Agency a copy of any of the documentation required to be maintained ~~pursuant to~~under this Part, upon request by the Agency.

(Source: Amended at 48 Ill. Reg._____, effective_____)

SUBPART D: OPTIONS FOR VEHICLE SCRAPPAGE PROJECTS AND PROGRAMS

Section 207.400 Optional Project or Program Enhancements

Vehicle scrappage sponsors and managers proposing to conduct vehicle scrappage projects or programs may include options in proposed plans that exceed the requirements of Subpart C ~~of this Part~~. The options ~~contained~~ in this Subpart are examples ~~of possible options~~. Vehicle scrappage sponsors and managers of proposed vehicle scrappage programs or projects ~~shall~~ must identify any options in their proposed vehicle scrappage plans and ~~shall~~ must specify the rationale and any supporting information which would indicate that the proposed options will generate greater emissions reductions or more reliable documentation of any claimed CERs.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 207.402 Targeting of Vehicles by Model Year

Vehicle scrappage plans may be limited to include only eligible vehicles from specific model years.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 207.404 Targeting of High Emissions Vehicles

Vehicle scrappage plans may include only eligible vehicles with demonstrated high emissions. A certificate of waiver under 35 Ill. Adm. Code 276.403 or test results~~, pursuant to~~ under the vehicle inspection and maintenance program ~~administered~~ under the Vehicle Inspection Law of 1995 [625 ILCS 5/13B]~~,~~ may demonstrate that a vehicle has high emissions.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 207.406 Targeting of High Usage Vehicles

Vehicle scrappage plans may be limited to eligible vehicles that have been driven at least a specified number of miles per year.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 207.408 Use of Enhanced Prescreening Inspection

Vehicle scrappage plans may include operability inspections of vehicles which are to be retired ~~beyond~~ but do not meet the operability requirements ~~specified~~ in Section 207.312 ~~of this Part~~ with the intent of determining the probable recent use patterns of a vehicle and the remaining useful life of that vehicle. ~~Such~~ These inspections ~~shall~~ must be conducted and certified by a recognized repair technician, as defined in Section 207.102 ~~of this Part~~.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 207.410 Use of Evaporative System Integrity Test

Vehicle scrappage plans may include an evaporative system integrity test to determine the ability of each vehicle's system to recycle vapors. The results of these tests may be used to characterize the functional status of the vehicle's evaporative control system for use as an input to USEPA's MOBILE model. If the applicable vehicle scrappage plan is for a vehicle scrappage project, the evaporative system integrity test administered at an official vehicle emissions test station of the Agency ~~pursuant to~~under 625 ILCS 5/13B-10 must be used to measure evaporative emissions. Vehicle scrappage plans for programs may specify the use of the evaporative system test administered at an official test station of the Agency or ~~the use of~~ another test.

(Source: Amended at 48 Ill. Reg._____, effective_____)

SUBPART E: MEASUREMENT TECHNIQUES AND CER CALCULATION AND REVIEW

Section 207.500 Vehicle Scrappage as a Basis for CERs

Vehicle scrappage sponsors and managers may receive CERs for emissions reductions achieved based on vehicle scrappage activities conducted ~~pursuant to~~under this Part in ~~accordance~~ compliance with the requirements ~~specified in~~of this Subpart. CERs may be used in conjunction with an emissions reduction program or as new source review offsets under 35 Ill. Adm. Code 203 to the extent that ~~the recognition or use of~~recognizing or using CERs is allowed under and fulfills the requirements of the applicable rule.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 207.502 Methods for Determining Emissions Reductions

a) Emission rates from both retired and replacement vehicles must be either measured (measure/measure method), modeled (model/model method), or a combination of measurement and modeling (measure/model method). The vehicle scrappage sponsor or manager ~~shall~~ must propose the measurement and/or modeling techniques to be used in the applicable vehicle scrappage plan.

b) Modeled emission rates for retired and replacement vehicles must be calculated using the USEPA MOBILE model~~, as applied~~ in ~~accordance~~ compliance with USEPA guidance for MOBILE model use for vehicle scrappage activities.

c) The IM240 Test ~~shall~~ must be used for any measured VOM emission rate determinations.

d) The remaining useful life of retired vehicles is limited to three years.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 207.504 CER Calculation Methodology

a) Except as provided in subsection (b) ~~of this Section~~, the following formula ~~shall~~ must be used to calculate proposed CERs:

CER = [sigma] ([(a)(b)(c)] - [(d)(e)(c)]) (1-(f/100)) / (1000)

Where:

a represents the retired vehicle emissions in grams/mile
b represents miles per year traveled by the retired vehicle based on recent usage, as established in ~~accordance~~ compliance with Section 207.510(a)(2)(B)
c represents remaining life of the retired vehicle in years
d represents the replacement vehicle emissions in grams/mile
e represents miles per year traveled by the replacement vehicle (which ~~shall~~ must be equal to or greater than "b", unless demonstrated otherwise in a vehicle scrappage plan)
f represents the environmental discount factor that must be applied~~,~~ ~~pursuant to~~ under Section 207.506 ~~of this Subpart~~, if applicable.
CER represents a creditable emissions reduction unit in kilograms.

b) Vehicle scrappage sponsors and managers may request Agency approval to deviate from the general formula in subsection (a) ~~of this Section~~ to calculate CERs in their proposed vehicle scrappage plan. This request must demonstrate that the deviation is necessary based on elements of the proposed vehicle scrappage project or program.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 207.506 CER Adjustments

a) If the vehicle scrappage plan provides that the emissions of both retired and replacement vehicles are to be modeled (model/model method), the total value of CERs claimed ~~shall~~ must be:

1) Reduced by 20 percent to account for the natural retirement of vehicles; and

2) Discounted by an additional 5 percent.

b) If the vehicle scrappage plan provides that emissions of vehicles to be retired are to be measured and emissions of replacement vehicles are to be modeled (measure/model method), the total value of CERs claimed ~~shall~~ must be reduced by 10 percent to account for the natural retirement of vehicles, unless enhanced prescreening inspection is conducted, as provided in Section 207.408 ~~of this Part~~. If enhanced prescreening is conducted, no reduction to CERs claimed ~~shall~~ must be assessed, except ~~as provided in~~under Section 207.314(d) ~~of this Part~~.

c) Except ~~as provided in~~under Section 207.314(d) ~~of this Part~~, if the vehicle scrappage plan provides that emissions of both retired and replacement vehicles are to be measured (measure/measure method), no reduction to the value of CERs claimed ~~shall~~ must be assessed.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 207.508 Remaining Useful Life of Vehicles and Lifetime of CERs

a) If emissions from retired vehicles are modeled, the remaining useful life of retired vehicles ~~shall~~ must be three years.

b) If emissions from retired vehicles are measured, the remaining useful life of retired vehicles ~~shall~~ must be a minimum of two years. Vehicle scrappage sponsors and managers may demonstrate to the Agency that a remaining useful life of more than two years should apply to CERs generated using a measure/model or a measure/measure method. To make this demonstration, the vehicle scrappage sponsor or manager ~~shall~~ must provide the Agency with sufficient information to substantiate that a greater remaining useful life of retired vehicles is justified.

c) CERs are valid for the same period as the remaining useful life of the retired vehicle as specified in this Section.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 207.510 Submission and Agency Review of CER Claims

a) Except ~~as provided in~~under Section 207.512 ~~of this Subpart~~, a vehicle scrappage sponsor or manager must submit a CER claim to the Agency for review within 120 days ~~of completion of~~after completing vehicle collection for vehicle scrappage projects or quarterly for a vehicle scrappage program. The following information must be included in each CER claim, in addition to any information required in the applicable vehicle scrappage plan:

1) The amount of CERs claimed to have been generated by vehicle retirement; and

2) Sufficient calculations and supporting documentation to substantiate ~~such~~ the claim, including:

A) Identification (i.e., make, model year, and vehicle identification number) of retired vehicles upon which the claim is based;

B) Estimates of recent mileage for each retired vehicle based on data recorded in the most recent two years or on established mileage estimation methods;

C) Mileage for each replacement vehicle, which may not be less than the mileage estimated for the retired vehicle unless demonstrated otherwise in a vehicle scrappage plan;

D) The method used to determine emissions from each retired and replacement vehicle;

E) The method used to identify replacement vehicles;

F) Any discounting of CERs required by this Part; and

G) A log identifying for each returned vehicle whether enhanced options or disassembly and recycling were used.

b) CERs may not be claimed for a vehicle until it has been acquired and retired by the vehicle scrappage sponsor or manager.

c) CERs may be claimed on a lump sum basis for the total aggregate emissions reduction over the remaining useful life of the retired ~~vehicle(s)~~vehicle or vehicles, or allocated on an annual basis over the remaining useful life, not to exceed the total aggregate emissions reduction.

d) Except for Agency sponsored projects or programs, a vehicle scrappage manager, vehicle scrappage sponsor, or, if the vehicle scrappage sponsor is an entity, the responsible official of the entity submitting a CER claim for Agency review ~~pursuant to~~under this Subpart ~~shall~~ must make the following statement as part of the claim:

I certify that the information submitted in this CER claim is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that I may be subject to enforcement pursuant to the Environmental Protection Act if any information submitted in this CER claim is determined to be false or misleading.

e) Except ~~as provided in~~under Section 207.512 ~~of this Subpart~~, the Agency ~~will~~ must review each CER claim submitted and ~~will~~ must issue its written determination ~~regarding~~ of how many CERs have been generated, if any, within 45 calendar days after the ~~Agency's receipt of~~Agency receives a complete claim. CERs are not valid until the Agency has completed its CER determination and notified the vehicle scrappage sponsor or manager in writing of its determination of the amount of CERs generated.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 207.512 CERs Based on Agency Sponsored Vehicle Scrappage Activities

If the Agency generates CERs based on vehicle scrappage activities it has sponsored, it ~~shall~~ must develop and maintain documentation to substantiate the CERs generated, including the information ~~specified~~ in Section 207.510(a)(2) ~~of this Subpart~~.

(Source: Amended at 48 Ill. Reg._____, effective_____)

SUBPART F: VEHICLE SCRAPPAGE PLAN CRITERIA, SUBMITTAL, REVIEW AND SUPPLEMENTAL NOTICE PROCEDURE

Section 207.600 Proposed Vehicle Scrappage Plans

~~No~~ A vehicle scrappage project or program ~~may~~ must not be conducted within Illinois ~~pursuant to~~under this Part without Agency approval or sponsorship of a vehicle scrappage plan ~~designed to cover~~covering that specific vehicle scrappage project or program.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 207.602 Submittal of Proposed Vehicle Scrappage Plans

a) A vehicle scrappage sponsor or manager may submit a proposed vehicle scrappage plan to the Agency. Each proposed vehicle scrappage plan ~~shall~~must, at a minimum, include:

1) The name and address of the vehicle scrappage sponsor and manager that will be responsible for the vehicle scrappage project or program;

2) Proof that the vehicle scrappage sponsor identified in the plan meets the financial responsibility requirements of Section 207.702 ~~of this Part~~;

3) Proof that the vehicle scrappage manager has fulfilled the applicable requirements in Section 207.700 ~~of this Part~~;

4) The estimated number of vehicles to be retired during the ~~course of the~~ proposed project or program;

5) The locations ~~to be used~~ for all proposed vehicle scrappage activities;

6) The name and address of any person or entity ~~to be used to perform~~performing any of the proposed activities, including~~, but not limited to,~~ any scrap yard~~,~~ or recycling or disposal facility ~~proposed~~ to be used;

7) A schedule identifying ~~key~~ planned dates of the proposed project or program, including ~~the planned dates for: notification to~~notifying owners of vehicles; ~~purchase of~~purchasing vehicles; ~~measurement of~~measuring emissions, if any; ~~retirement of~~retiring vehicles; and ~~completion of~~completing the project or program;

8) Method of ~~notification to~~notifying owners of vehicles that are candidates to sell their vehicles in ~~accordance~~ compliance with Section 207.308 ~~of this Part~~;

9) Procedures to be used for collection and testing, if any, of vehicles to be retired in ~~accordance~~ compliance with Section 207.314 ~~of this Part~~;

10) Procedures, if any, for disassembly, rebuilding, or reconditioning~~,~~ and resale of vehicle parts to eligible persons~~,~~ in ~~accordance~~ compliance with Section 207.316 ~~of this Part~~;

11) Procedures for recycling or disposal of all residual materials and wastes generated from the permanent retirement of vehicles, in ~~accordance~~ compliance with Section 207.316(b) ~~of this Part~~;

12) Method of determining what replacement vehicles are obtained by owners whose vehicles have been retired;

13) Method for measuring or modeling emissions of applicable pollutants for vehicles purchased for retirement and for replacement vehicles, in ~~accordance~~ compliance with Section 207.502 ~~of this Part~~;

14) Method for ~~calculation of~~calculating any CERs that may be generated by the project or program, in ~~accordance~~ compliance with Section 207.504 ~~of this Part~~;

15) If the vehicle scrappage plan is for a vehicle scrappage program, ~~identification of~~identifying any options that will be used to generate greater emissions reductions or produce more reliable documentation~~, as provided in~~ under Subpart D ~~of this Part~~, and sufficient justification that the options proposed will achieve these objectives. ~~Additionally, if the use of~~If the plan proposes enhanced prescreening inspection ~~is proposed, as specified in~~under Section 207.408 ~~of this Part~~, it must identify the recognized repair technician who will be used ~~must be identified~~ and include information verifying that the technician qualifies as a recognized repair technician ~~must be included~~;

16) If the vehicle scrappage plan is for a vehicle scrappage project, the vehicle sponsor or manager is not required to obtain prior approval from the

Agency ~~for its~~to use ~~of the~~ options ~~described~~ in Subpart D ~~of this Part,~~ but must maintain documentation to support its use of ~~such~~ the options.

b) In addition to the information ~~specified~~ in subsection (a) ~~of this Section~~, the Agency may request additional information from the vehicle scrappage sponsor or manager ~~as needed~~ to determine ~~if~~ whether the vehicle scrappage plan meets the requirements of this Part.

c) Each vehicle scrappage manager and sponsor, or, if the vehicle scrappage sponsor is an entity, a responsible official of the entity, submitting a proposed plan for Agency approval ~~shall~~ must make the following statement as part of the submission to the Agency:

> I certify that the information submitted in this proposed vehicle scrappage plan is, to the best of my knowledge and belief, true, accurate, and complete~~,~~ based on reasonable inquiry. I am aware that I may be subject to enforcement under the Environmental Protection Act and may be disqualified from conducting or sponsoring scrappage projects or programs in the State of Illinois~~, pursuant to~~ under 35 Ill. Adm. Code Part 207~~,~~ if any information submitted in this proposed vehicle scrappage plan is determined to be false or misleading.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 207.604 Notice of Proposed Vehicle Scrappage Plans

a) Within 14 days after submitting a vehicle scrappage plan to the Agency, the vehicle scrappage manager or sponsor that submitted the plan ~~shall~~ must cause, at its own expense, the publication of notice by advertisement in a newspaper of general circulation in the area where the collection site for vehicles to be retired is located or, if the vehicle scrappage sponsor is a source, the notice shall be in a newspaper of general circulation in the area the source is located.

b) The notice ~~shall~~ must be titled "Notice of Proposed Vehicle Scrappage Plan Submission to the Illinois Environmental Protection Agency."

c) The notice ~~shall~~ must contain the name and address of the proposed sponsor and the address of the proposed vehicle collection location.

d) The notice ~~shall~~ must state ~~the following~~:

> "Any person may review the proposed plan, to the extent allowed by applicable laws and regulations, by contacting the Illinois Environmental Protection Agency. Any person may submit comments to the Illinois Environmental Protection Agency and request a hearing. Comments and requests for hearing must be submitted in writing to Illinois EPA at:

Public Information for the Bureau of Air
Illinois Environmental Protection Agency
P.O. Box 19276
Springfield, Illinois 62794

These comments and requests for a hearing must be received by the Illinois EPA within 21 days after the date of publication."

e) The Agency will determine whether to hold a hearing on any vehicle scrappage plan ~~in accordance with~~under 35 Ill. Adm. Code 252.205. Any hearing on a proposed vehicle scrappage plan ~~shall~~ must be conducted in ~~accordance~~ compliance with ~~the Agency's "Procedures for Permit and Closure Plan Hearings" (~~35 Ill. Adm. Code 166~~: Subpart A, Informational Permit and Closure Plan Hearings)~~.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 207.606 Agency Review of Proposed Vehicle Scrappage Plans

a) The Agency ~~will~~ must approve or disapprove the proposed vehicle scrappage plan within 90 calendar days after ~~the Agency's receipt of~~it receives a complete proposed plan, except that this ~~time~~ period is extended to 180 days when the Agency holds a hearing ~~is held, as provided in~~under Section 207.604(e) ~~of this Subpart~~.

b) A proposed plan ~~will~~ must be deemed complete within 30 days after ~~receipt by~~ the Agency receives it unless the Agency provides written notification to the applicant of its determination that the plan is incomplete. A proposed plan ~~will~~ must be deemed complete if it includes information addressing each of the applicable elements required under this Section. A notification of incompleteness ~~shall~~ must specifically identify the deficiencies with the plan identified by the Agency. After a plan has been deemed complete, the Agency may request additional information as needed to complete its review of the proposed plan.

c) ~~Upon receipt of a~~After receiving notice of approval from the Agency, the vehicle scrappage sponsor or manager who submitted the plan may proceed to implement it ~~pursuant to~~under the schedule ~~specified~~ in the plan.

d) ~~Upon receipt of a~~After receiving notice of disapproval from the Agency, the person who submitted the plan may request that the Board review the Agency's determination~~. Such review will be filed pursuant to~~ under 35 Ill. Adm. Code 105.

e) ~~Any~~ The Agency may disapprove any plan ~~that identifies~~identifying for use in the applicable vehicle scrappage project or program a scrap yard~~,~~ or recycling or

disposal facility ~~for use in the applicable vehicle scrappage project or program~~ that has violated any requirement ~~specified~~ in this Part ~~may be disapproved by the Agency~~. ~~The~~ Before disapproving the plan, the Agency ~~will~~ must notify the vehicle scrappage plan applicant in writing of this deficiency with the plan and afford the applicant a reasonable period to identify another scrap yard~~,~~ or recycling or disposal facility to use for its vehicle scrappage activities ~~prior to disapproving the plan~~.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 207.608 Notice of Commencement of Vehicle Scrappage Activities

The vehicle scrappage manager or sponsor must submit ~~written notification~~ to the Agency at least 14 days ~~prior to~~before collecting vehicles for the project or program~~,~~ written notification indicating the date and location of vehicle collection activities.

Section 207.610 Supplemental Notices ~~Pursuant to~~Under Approved Vehicle Scrappage Plans

A vehicle scrappage plan may be renewed if the vehicle scrappage sponsor or manager submits to the Agency a written supplemental notice of his or her intent to conduct more vehicle scrappage activities at least 60 days ~~in advance of~~before the intended date for notification to owners of vehicles of the opportunity to sell his or her vehicles. The supplemental notice ~~shall reference~~must refer to the date and number of the ~~already~~ approved plan and ~~shall~~ must update the dates and any changes in collection locations. If the vehicle scrappage sponsor or manager plans any deviation ~~is planned~~ from the terms and conditions of the approved plan, other than dates or collection locations, he or she must submit a new proposed plan ~~must be submitted~~ to the Agency, which ~~shall be reviewed~~must review it in the same manner and ~~time frames~~by the deadlines ~~provided~~ in Section 207.606 ~~of this Subpart~~.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 207.612 Plans for Agency Sponsored Projects or Programs

Notwithstanding the requirements in this Subpart, if the Agency sponsors a vehicle scrappage project or program, it ~~shall~~ must develop a vehicle scrappage plan that meets the requirements of Section 207.602 ~~of this Subpart~~ and provide public notice of its proposed plan~~, as specified in~~ under Section 207.604 ~~of this Subpart~~.

(Source: Amended at 48 Ill. Reg._____, effective_____)

SUBPART G: VEHICLE SCRAPPAGE SPONSOR AND MANAGER ELIGIBILITY, TRAINING AND APPLICATION PROCEDURE

Section 207.700 Qualifications for Vehicle Scrappage Managers

a) ~~No~~ A person or entity ~~may~~ must not conduct a vehicle scrappage project or program without participation of a vehicle scrappage manager who meets the requirements of this Section for supervising vehicle scrappage activities.

b) Any natural person may qualify to be a vehicle scrappage manager if he or she meets the following criteria:

1) Is at least eighteen years old;

2) Is an American citizen or legal alien; and

3) Has never been convicted of or had a final judgment entered against him or her in any State or federal court for a violation of State or federal air pollution laws or regulations, ~~for~~ fraud, or ~~for~~ felony theft.

c) Each natural person who wishes to become a vehicle scrappage manager must successfully complete the training course offered by the Agency.

1) The Agency will offer the training program annually~~,~~ based on need. The Agency will provide advance public notice of the time, date, and location for each training course.

2) The curriculum for the Agency training course ~~will~~ must include the following subjects:

A) ~~The development of~~Developing acceptable vehicle scrappage plans;

B) Methods for CER calculations;

C) Procedures for modeling and ~~measurement of~~measuring emissions;

D) Collector vehicle and vehicle parts rebuilder provisions;

E) Proper vehicle disassembly and recycling of vehicle parts; and

F) Methods for proper recycling and/or disposal of residual materials and wastes derived from ~~the retirement of~~retiring vehicles.

3) For the applicant to be authorized to manage a vehicle scrappage program, he or she must pass the examination administered by the Agency at the conclusion of each Agency training course, which will test each applicant's knowledge of the material covered in the training course.

4) If an applicant fails the Agency-administered examination ~~specified~~ in subsection (c)(3) ~~of this Section~~ on the first attempt, he or she ~~shall~~ must

have the opportunity to take and pass the examination one additional time. If an applicant fails the Agency-administered examination on the second attempt, he or she may reapply for approval to manage a vehicle scrappage program, subject to the same requirements as a first time applicant.

5) The Agency will offer the examination biannually~~,~~ if needed. When an Agency-administered examination is to be offered at a different time than immediately ~~following~~ after the Agency training course, the Agency ~~will~~ must provide advance public notice of the time, date, and location for the examination.

d) ~~Prior to~~Before conducting any vehicle scrappage activities, each natural person who wishes to be a vehicle scrappage manager must submit to the Agency for its approval an application ~~for the Agency's approval which demonstrates~~demonstrating that he or she satisfies all of the qualifications ~~specified~~ in subsection (b) ~~of this Section~~. Applicants may indicate that they intend to satisfy the requirements ~~specified~~ in subsection (c) ~~of this Section~~ by attending the next Agency training course and taking the examination, if applicable, at that time.

e) The Agency ~~will~~ must approve or disapprove a vehicle scrappage manager application in writing within 30 calendar days after the ~~Agency's receipt of~~Agency receives an application or at the conclusion of the Agency training course the applicant is scheduled to attend, whichever occurs later. Approval will indicate ~~if~~ whether the applicant is authorized to manage both vehicle scrappage projects and programs or only vehicle scrappage projects.

f) ~~Upon receipt of a~~After receiving notice of approval from the Agency, the applicant is considered a vehicle scrappage manager and may conduct a vehicle scrappage project or, if approved, a vehicle scrappage program in ~~accordance~~ compliance with this Part. Only an approved vehicle scrappage manager may be identified as the vehicle scrappage manager in any proposed vehicle scrappage plan.

g) Each natural person submitting an application ~~pursuant to~~under this Subpart ~~shall~~ must sign and date the following statement as part of his or her application:

I certify that I satisfy all of the qualification requirements for a vehicle scrappage manager and that the information submitted in this application is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that I may be subject to enforcement under the Environmental Protection Act and may be disqualified from conducting vehicle scrappage activities in the State of Illinois ~~pursuant to~~under 35 Ill. Adm. Code 207 if any information submitted in this application is determined to be false or misleading.

h) To retain authorization to be a vehicle scrappage manager of a vehicle scrappage program, each person approved to manage a vehicle scrappage program ~~shall~~ must submit a renewal application to the Agency every three years on or before the date on which he or she received initial approval, and ~~shall~~ must take a refresher training course at the next available course offered.

i) ~~In the event~~If a vehicle scrappage manager unexpectedly leaves that position, the vehicle scrappage sponsor may submit the application ~~specified~~ in subsection (d) ~~of this Section~~ requesting permission from the Agency to allow the substitution of a new manager for up to one year, ~~provided that~~if the candidate for substitution meets the qualifications ~~contained~~ in subsection (b) ~~of this Section~~ and will fulfill the remaining requirements of this Section as soon as practicable, but in any event~~,~~ no later than one year ~~from~~ after the date on which the sponsor requests approval of the substitution ~~is requested~~.

j) Notwithstanding the requirements in this Section, if the Agency sponsors a vehicle scrappage project or program, it may obtain the services of a vehicle scrappage manager or designate an employee of the Agency to serve in this capacity. To qualify to manage an Agency sponsored vehicle scrappage project or program, an Agency employee must complete the training course ~~specified~~ in subsection (c)(2) ~~of this Section~~.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 207.702 Financial Responsibility of Vehicle Scrappage Sponsors

Any person or entity may qualify to be a vehicle scrappage sponsor if it ~~can demonstrate~~demonstrates to the Agency that it has the financial resources necessary to fully complete a project or program in ~~accordance~~ compliance with this Part, including~~, but not limited to,~~ payment for all vehicles proposed to be retired, testing and analytical costs associated with the proposed project or program, and proper recycling or disposal of all residual materials and wastes generated from the scrappage process~~,~~ in ~~accordance~~ compliance with this Part. The potential sponsor must demonstrate the sufficiency of ~~the~~ its financial resources ~~of a potential sponsor must be demonstrated upon submittal of~~when submitting a proposed vehicle scrappage plan in ~~accordance~~ compliance with Subpart F ~~of this Part~~. A corporate entity may provide the Agency with its most recent Section 10(k) filing submitted to the U.S. Securities and Exchange Commission ~~in order~~ to attempt to demonstrate financial resources sufficient to conduct and complete a scrappage project or program. Corporations for which a Section 10(k) filing is not required and other entities or persons may provide the Agency with audited financial statements or other evidence of ~~a level of~~ capital sufficient to conduct and complete the applicable vehicle scrappage project or program, taking into account the proposed number of vehicles proposed for scrappage. If the Agency sponsors a vehicle scrappage project or program, it is not required to make the demonstration ~~specified~~ in this Section.

(Source: Amended at 48 Ill. Reg._____, effective_____)

SUBPART H: VEHICLE SCRAPPAGE PLAN FEES

Section 207.800 Vehicle Scrappage Plan and Plan Renewal Fees

Each vehicle scrappage sponsor or manager submitting a proposed vehicle scrappage plan or supplemental notice renewal pursuant to Subpart D ~~of this Part shall~~must submit to the Agency the following fee ~~amount~~:

a) If the plan is for a vehicle scrappage project, a fee of $250 ~~shall~~ must be submitted with the proposed vehicle scrappage plan and with any supplemental notification;

b) If the plan is for a vehicle scrappage program, an initial fee of $250 ~~shall~~ must be submitted with the proposed vehicle scrappage plan and an annual fee of $175 ~~shall~~ must be submitted for each ~~12 month~~subsequent 12-month period or portion of that period during which it operates~~thereof it is in operation thereafter~~. The annual fee ~~shall~~ must be submitted to the Agency each year by the date on which the Agency approved the applicable program ~~was approved~~; or

c) If the plan requests that the Agency ~~provide notification to~~notify owners of vehicles for retirement ~~as provided in~~under Section 207.308(a) ~~of this Part~~, the fees ~~listed~~ in subsection (a) or (b) ~~of this Section shall~~must be increased by $50 for the initial fee and $25 for the annual fee, if applicable.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 207.802 Form of Payment

a) All fees required under this Subpart ~~shall~~ must be paid by check or money order payable to "Treasurer, State of Illinois," for deposit in the Environmental Protection Permit and Inspection Fund.

b) Payment ~~shall~~ must identify the associated vehicle scrappage sponsor, vehicle scrappage manager, and proposed vehicle scrappage plan and be sent to:

Illinois Environmental Protection Agency
Fiscal Services Center
1021 North Grand Avenue East
P.O. Box 19276
Springfield, Illinois 62794-9276

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 207.804 Non-Refundability of Fees and Credits for Overpayments

a) Any fees received by the Agency ~~pursuant to~~under this Subpart in a correct amount~~, as specified in~~ under Section 207.800 ~~of this Subpart, shall be~~must not be refunded at any time or for any reason, either in part or in full.

b) ~~In the event that~~If the vehicle scrappage sponsor or manager submits payment in an incorrect amount that results in overpayment, the Agency ~~will~~ mustreturn the overpaid amount within 90 days after discovering the overpayment.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 207.806 Fee Exemption for Agency Sponsored Vehicle Scrappage Projects or Programs

~~In the event~~If the Agency sponsors a vehicle scrappage project or program, it ~~shall~~ is not ~~be~~ subject to fees ~~specified~~ in this Subpart.

(Source: Amended at 48 Ill. Reg._____, effective_____)

SUBPART I: ENFORCEMENT AND PENALTIES

Section 207.900 Enforcement

Any person or entity that violates any requirement of this Part ~~shall be~~is subject to enforcement ~~as provided in~~under Title XII of the Environmental Protection Act [415 ILCS 5/42-45].

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 207.902 Agency Right of Inspection

The Agency under Section 4 of the Environmental Protection Act [415 ILCS 5/4] must ~~shall~~ be entitled to inspect any location used for any activity conducted ~~pursuant to~~under any approved vehicle scrappage plan ~~in accordance with Section 4 of the Environmental Protection Act [415 ILCS 5/4]~~.

(Source: Amended at 48 Ill. Reg._____, effective_____)

Section 207.904 Agency Right to Revoke Approval of Plan

If any authorized representative of the Agency determines that any vehicle scrappage project or program is not being conducted in ~~accordance~~ compliance with the applicable vehicle scrappage plan or this Part, the Agency may revoke its approval of the plan.

SUBPART A: GENERAL PROVISIONS

Section 211.101 Incorporations by Reference

The following materials are incorporated by reference. These incorporations do not include any later amendments or editions.

a) Incorporations by Reference

1) "Evaporation Loss from Floating Roof Tanks," American Petroleum Institute Bulletin 2517 (1962)

2) Standard Industrial Classification Manual, Superintendent of Documents, Washington, D.C. 20402 (1972)

3) American Society for Testing and Materials, 100 Barr Harbor Dr., West Conshohocken PA 19428-2959

ASTM	D 86
ASTM	D 240-64
ASTM	D 323-08
ASTM	D 369-69 (1971)
ASTM	D 396-69
ASTM	D 523-80
ASTM	D 523-89
ASTM	D 900-55
ASTM	D 975-68
ASTM	D 1826-64
ASTM	D 2015-66
ASTM	D 2880-71

4) 40 CFR 51.100 (1987)

5) American Architectural Manufacturers Association, 1827 Walden Office Square, Suite 550, Schaumburg, IL 60173-4268~~,~~

A) Specification 2604-05 (Voluntary Specification, Performance Requirements and Test Procedures for High Performance Organic Coatings on Aluminum Extrusions and Panels) (2005)

~~6~~B) ~~American Architectural Manufacturers Association, 1827 Walden Office Square, Suite 550, Schaumburg, IL 60173-4268,~~ Specification 2605-05 (Voluntary Specification, Performance Requirements and Test Procedures for Superior Performing Organic Coatings on Aluminum Extrusions and Panels) (2005)

b) Referenced Materials

Federal Insecticide, Fungicide, and Rodenticide Act (7 USC 136)

(Source: Amended at 37 Ill. Reg. 1662, effective January 28, 2013)

Section 211.102 Abbreviations and Conversion Factors

a) ~~Abbreviations used in this part include the following~~This Part uses the following abbreviations:

ABS	acrylonitrile butadiene styrene
ASTM	American Society for Testing and Materials
bbl	barrels (42 gallons)
btu	British thermal units (~~60°F~~60 °F)
btu/hr	btu per hour
° C~~°C~~	degrees Celsius or Centigrade
CAAPP	Clean Air Act Permit Program
cm	centimeters
cu in	cubic inches
EDP	electrodeposition primer
EMI/RFI	electromagnetic interference/radio frequency interference
EPDM	ethylene propylenediene monomer
EGU	Electrical Generating Unit
° F~~°F~~	degrees Fahrenheit
FIP	Federal Implementation Plan
ft	feet
ft^2	square feet
ft^3	cubic feet
g	grams
gpm	gallons per minute
g/mole	grams per mole
gal	gallons
hp	horsepower

hr	hours
in	inch
° K~~°K~~	degrees Kelvin
kcal	kilocalories
kg	kilograms
kg/hr	kilograms per hour
kPa	kilopascals; one thousand newtons per square meter
kW	kilowatt
l or L or ℓ	liters
l/sec	liters per second
lbs	pounds
lbs/day	pounds per day
lbs/hr	pounds per hour
lbs/gal	pounds per gallon
lbs/yr	pounds per year
LEL	lower explosive limit
m	meters
m^2	square meters
m^3	cubic meters
mg	milligrams
Mg	Megagrams, metric tons or tonnes
ml	milliliters
min	minutes
MJ	megajoules
mmbtu	million British thermal units
mmbtu/hr	million British thermal units per hour
mmHg	millimeters of mercury
MTE	maximum theoretical emissions
Mwe	megawatt of electricity
MW	megawatt; one million watts
MW-hr	megawatt per hour
NDO	natural draft opening
No_x	nitrogen oxides
peoc	potential electrical output capacity
ppm (vol)	parts per million
ppmv	parts per million by volume
ppmvd	parts per million by volume dry
psi	pounds per square inch
psia	pounds per square inch absolute
psig	pounds per square inch gauge
PTE	potential to emit
RACT	reasonably available control technology
R_T	solids turnover ratio
scf	standard cubic feet
scm	standard cubic meters
sec	seconds

SIP	State Implementation Plan
TTE	temporary total enclosure
sq cm	square centimeters
sq in	square inches
T	short ton (2,000 lbs)
ton	short ton (2,000 lbs)
TPY	tons per year
USEPA	United States Environmental Protection Agency
VOC	volatile organic compounds
VOL	volatile organic liquids
VOM	volatile organic materials

b) ~~The~~ This Part uses the following conversion factors ~~have been used in this part~~:

English	Metric
1 gal	3.785 l
1,000 gal	3,785 l or 3.785 m^3
1 psia	6.897 kPA (51.71 mmHg)
2.205 lbs	1 kg
~~32°~~32 ºF	~~0°C (273.15°K)~~0 ºC (273.15 ºK)
1 bbl	159.0 l
1 cu in	16.39 ml
1 lb/gal	119,800 mg/l
1 lb/mmbtu	1.548 kg/MW-hr
1 lb/T	0.500 kg/Mg
1 ton	0.907 Mg
1 T	0.907 Mg
mmbtu/hr	0.293 MW

SUBPART B: DEFINITIONS

Section 211.121 Other Definitions

All terms defined at 35 Ill. Adm. Code 201.102 have that definition ~~in 35 Ill. Adm. Code 201 which appear~~ in 35 Ill. Adm. Code 211 through 219 ~~have the definitions specified by 35 Ill. Adm. Code 201.102~~. ~~Otherwise~~ Terms not defined at 35 Ill. Adm. Code 201.102 have the definitions in this Part ~~shall apply~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.122 Definitions (Repealed)

(Source: Repealed at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.125 Ablative Coating

"Ablative coating" means a coating that chars when exposed to open flame or extreme temperatures, as would occur during the failure of an engine casing or during aerodynamic heating. The ablative char surface serves as an insulative barrier, protecting adjacent components from the heat or open flame.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.130 Accelacota

"Accelacota" means a pharmaceutical coating operation which consists of a horizontally rotating perforated drum in which tablets are placed, a coating is applied by spraying, and the coating is dried by the flow of air across the drum through the perforations.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.150 Accumulator

"Accumulator" means the reservoir of a condensing unit receiving the condensate from a surface condenser.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.170 Acid Gases

"Acid gases" means, for the purposes of Section 9.4 of the Environmental Protection Act ~~(the Act) (Ill. Rev. Stat. 1991, ch. 111½, par. 1009.4)~~ [415 ILCS 5/9.4], hydrogen chloride, hydrogen fluoride, and hydrogen bromide, which exist as gases, liquid mist, or any combination ~~thereof~~of them.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.200 Acrylonitrile Butadiene Styrene (ABS) Welding

"Acrylonitrile butadiene styrene welding" or "ABS Welding" means, for purposes of Subparts JJ of 35 Ill. Adm. Code 218 and 219, any process to weld acrylonitrile butadiene styrene pipe.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.210 Actual Heat Input

"Actual heat input" means the quantity of heat produced by the combustion of fuel using the gross heating value of the fuel.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.230 Adhesive

"Adhesive" means any substance or mixture of substances intended to serve as a joining compound.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.233 Adhesion Primer

"Adhesion primer" means, for purposes of 35 Ill. Adm. Code 218 and 219, a coating that is applied to a polyolefin part to promote the adhesion of a subsequent coating. An adhesion primer should be clearly identified as an adhesion primer or adhesion promoter on its accompanying material safety data sheet.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.234 Adhesive Bonding Primer

"Adhesive bonding primer" means a primer applied in a thin film to aerospace components for the purpose of corrosion inhibition and increased adhesive bond strength by attachment. There are two categories of adhesive bonding primers: primers with a design cure at 250 °F or below and primers with a design cure above 250 °F.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.235 Adhesive Primer

"Adhesive primer" means, for purposes of 35 Ill. Adm. Code 218 and 219, any product applied to a substrate, ~~prior to the application of~~before applying an adhesive, to provide a bonding surface.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.240 Adhesion Promoter

"Adhesion promoter" means a coating used to promote adhesion of a topcoat on surfaces such as trim moldings, door locks, and door sills~~,~~ where sanding is impractical.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.245 Adhesion Promoter for Aerospace Applications

"Adhesion promoter for aerospace applications" means a very thin coating applied to a substrate to promote wetting and form a chemical bond with the subsequently applied material.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.250 Aeration

"Aeration" means the practice of forcing air through bulk stored grain to maintain the condition of the grain.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.260 Aerosol Adhesive and Adhesive Primer

"Aerosol adhesive and adhesive primer" means, for purposes of 35 Ill. Adm. Code 218 and 219, an adhesive or adhesive primer packaged as an aerosol product in which the spray mechanism is permanently housed in a non-refillable can designed for handheld application without the need for ancillary hoses or spray equipment.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.270 Aerosol Can Filling Line

"Aerosol can filling line" means an operation where a series of process steps are used to fill and seal aerosol cans.

(Source: Added at 18 Ill. Reg. 1253, effective January 18, 1994)

Section 211.271 Aerosol Coating

"Aerosol coating" means a hand-held, pressurized, nonrefillable container that expels an adhesive or a coating in a finely divided spray when a valve on the container is depressed.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.272 Aerospace Coating

"Aerospace coating" means a material that is applied to the surface of an aerospace vehicle or component to form a decorative, protective, or functional solid film, or the solid film itself.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.273 Aerospace Coating Operation

"Aerospace coating operation" means using a spray booth, tank, or other enclosure or any area, such as a hangar, for applying a single type of aerospace coating at an aerospace facility. Using the same spray booth for applying another type of coating (e.g., a topcoat after having previously applied a primer) constitutes a separate aerospace coating operation for which compliance determinations are performed separately.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.275 Aerospace Flexible Primer

"Aerospace flexible primer" means a primer for aerospace use that meets flexibility requirements such as those needed for adhesive bond-primed fastener heads or on surfaces expected to contain fuel. The aerospace flexible coating is required because it provides a compatible, flexible substrate over bonded sheet rubber and rubber-type coatings, as well as a flexible bridge between the fasteners, skin, and skin-to-skin joints on outer aircraft skins. This flexible bridge allows more topcoat flexibility around fasteners and decreases the chance of the topcoat cracking around the fasteners. The result is better corrosion resistance.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.277 Aerospace Facility

"Aerospace facility" means any facility that produces, reworks, or repairs any commercial, civil, or military aerospace vehicle or component.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.278 Aerospace Pretreatment Coating

"Aerospace pretreatment coating" means an organic coating that contains at least 0.5 percent acids by weight and is applied directly to metal or composite surfaces to provide surface etching, corrosion resistance, adhesion, and ease of stripping.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.280 Aerospace Primer

"Aerospace primer" means the first layer and any subsequent layers of identically formulated coating applied to the surface of an aerospace vehicle or component. Primers are typically used for corrosion prevention, protection from the environment, functional fluid resistance, and adhesion of subsequent coatings. Primers ~~that are~~ listed as specialty coatings in 35 Ill. Adm. Code 219.204(r)(2) are not included under this definition.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.284 Aerospace Specialty Coating

"Aerospace specialty coating" means a coating that, even though it meets the definition of a primer, topcoat, or self-priming topcoat, has additional performance criteria beyond those of primers, topcoats, and self-priming topcoats for specific applications. These performance criteria may include~~, but are not limited to,~~ temperature or fire resistance, substrate compatibility,

antireflection, temporary protection or marking, sealing, adhesively joining substrates, or enhanced corrosion protection. Aerospace specialty coatings are listed in 35 Ill. Adm. Code 219.204(r)(2).

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.289 Aerospace Vehicle or Component

"Aerospace vehicle or component" means any fabricated part, processed part, assembly of parts, or completed unit, with the exception of electronic components, of any aircraft, including airplanes, helicopters, missiles, rockets, and space vehicles. This term includes any raw material, partial or completed fabricated part, assembly of parts, or completed unit of any aircraft, helicopter, missile, or space vehicle, including mockups and prototypes, models, molds, jigs, tooling, hardware jackets, and test coupons.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.290 Afterburner

"Afterburner" means a control device in which materials in gaseous effluent are combusted.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.300 Aircraft Fluid Systems

"Aircraft fluid systems" means those systems that handle hydraulic fluids, fuel, cooling fluids, or oils.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.303 Aircraft Transparencies

"Aircraft transparencies" means the aircraft windshield, canopy, passenger windows, lenses, and other components ~~that are~~ constructed of transparent materials.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.310 Air Contaminant

"Air contaminant" means any solid, liquid, or gaseous matter, any odor, or any form of energy~~,~~ ~~that is~~ capable of being released into the atmosphere.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.330 Air Dried Coatings

"Air dried coatings" means any coatings that dry by use of air or forced air at temperatures up to ~~363.15º K (194º F)~~363.15 ºK (194 ºF).

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.350 Air Oxidation Process

"Air oxidation process" means any unit process including ammoxidation and oxychlorination which uses air or a combination of air and oxygen as an oxidant in combination with one or more organic reactants to produce one or more organic compounds.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.370 Air Pollutant

"Air pollutant" means an air pollution agent or combination of such agents, including any physical, chemical, biological, or radioactive (including source material, special nuclear material, and byproduct material) substance or matter which is emitted into or otherwise enters the atmosphere. "Air pollutant"~~Such term~~ includes any precursors to the formation of any air pollutant, to the extent that the relevant statute or rule has identified ~~such~~ the precursor or precursors for the particular purpose for which the term "air pollutant" is used.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.390 Air Pollution

"Air pollution" means the presence in the atmosphere of one or more air contaminants in sufficient quantities and of such characteristics and duration as to be injurious to human, plant, or animal life, to health, or to property, or to unreasonably interfere with the enjoyment of life or property.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.410 Air Pollution Control Equipment

"Air pollution control equipment" means any equipment or apparatus of a type intended to eliminate, prevent, reduce, or control the emission of air contaminants to the atmosphere.

~~(Board Note~~BOARD NOTE: The requirements at 35 Ill. Adm. Code 201.Subpart C to obtain permits for air pollution control equipment~~, in 35 Ill. Adm. Code 201.Subpart C,~~ apply to ~~such~~ equipment intended to eliminate, prevent, reduce, or control the emissions of specified air contaminants from stationary emission units.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.430 Air Suspension Coater/Dryer

"Air suspension coater/dryer" means a pharmaceutical coating operation which consists of vertical chambers in which tablets or particles are placed, and a coating is applied and then dried while the tablets or particles are kept in a fluidized state by the passage of air upward through the chambers.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.450 Airless Spray

"Airless spray" means a spray coating method in which the coating is atomized by forcing it through a small opening at high pressure. The coating liquid is not mixed with air before exiting from the nozzle.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.470 Air Assisted Airless Spray

"Air assisted airless spray" means a spray coating method which combines compressed air with hydraulic pressure to atomize the coating material into finer droplets than is achieved with pure airless spray. Lower hydraulic pressure is used than with airless spray.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.474 Alcohol

"Alcohol," for the purposes of 35 Ill. Adm. Code 218.405 through 218.411 and 219.405 through 219.411, means isopropyl alcohol, normal propyl alcohol, or ethanol used in a fountain solution in a lithographic printing operation.

(Source: Added at 19 Ill. Reg. 6823, effective May 9, 1995)

Section 211.479 Allowance

"Allowance" means an authorization to emit up to one ton of NO_x during the control period of a specified year or any year ~~thereafter~~ after it under 35 Ill. Adm. Code 217 and 40 CFR 96.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.481 Ammunition Sealant

"Ammunition ~~Sealant~~sealant" means~~, for purposes of 35 Ill. Adm. Code 218.204(q)(1) and 219.204(q)(1),~~ a coating applied in the manufacture of ammunition, including cap sealants and mouth waterproofing sealants.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.484 Animal

"Animal" means any organism other than a human being of the kingdom, Animalia, distinguished from other multicellular organisms by certain typical characteristics such as the power of locomotion, fixed structure and limited growth, and non-photosynthetic metabolism.

(Source: Added at 20 Ill. Reg.7590, effective May 22, 1996)

Section 211.485 Animal Pathological Waste

"Animal pathological waste" means waste composed of whole or parts of animal carcasses and also noncarcass materials such as plastic, paper wrapping, and animal collars. Noncarcass materials ~~shall~~ must not exceed ten percent by weight of the total weight of the carcass and noncarcass materials combined.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.490 Annual Grain Through-Put

"Annual grain through-put" ~~unless otherwise shown by the owner or operator, annual grain through-put~~means for grain-handling operations~~,~~ which have been in operation for three consecutive years ~~prior to~~before June 30, 1975, ~~shall be~~the amount determined by adding grain receipts and shipments for the three previous fiscal years and dividing the total by 6, unless otherwise shown by the owner or operator. "Annual~~The annual~~ grain through-put" for grain-handling operations in operation for less than three consecutive years ~~prior to~~before June 30, 1975, ~~shall be~~means the amount determined by a reasonable three-year estimate~~;~~, for which the owner or operator ~~shall~~ must document the reasonableness ~~of his three-year estimate~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.491 Antichafe Coating

"Antichafe coating" means a coating applied to areas of moving aerospace components that may rub during normal operations or installation.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.492 Antifoulant Coating

"Antifoulant coating" means, for purposes of 35 Ill. Adm. Code 218 and 219, any coating applied to the underwater portion of a pleasure craft to prevent or reduce the attachment of biological organisms, and registered with USEPA as a pesticide under the Federal Insecticide, Fungicide, and Rodenticide Act (7 USC 136).

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.493 Antifouling Sealer/Tie Coat

"Antifouling Sealer/Tie Coat" means a coating applied over biocidal antifouling coating for the purpose of preventing release of biocides into the environment and/or to promote adhesion between an antifouling and a primer or other antifoulings.

(Source: Added at 35 Ill. Reg. 13451, effective July 27, 2011)

Section 211.495 Anti-Glare/Safety Coating

"Anti-glare/safety coating" means a low gloss coating formulated to minimize glare for safety purposes on interior surfaces of a vehicle, as specified under the U.S. Department of Transportation Motor Vehicle Safety Standards.

(Source: Added at 19 Ill. Reg. 6823, effective May 9, 1995)

Section 211.500 Antique Aerospace Vehicle or Component

"Antique aerospace vehicle or component" means an aircraft or a component of an aircraft that is at least 30 years old and is not routinely in commercial or military service in the capacity for which it was designed.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.510 Application Area

"Application area" means an area where a coating is applied by dipping, spraying, or other techniques.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.520 Aqueous Cleaning Solvent

"Aqueous cleaning solvent" means a cleaning solvent in which water is the primary ingredient (at least 80 percent of the cleaning solvent solution, as applied, must be water). Detergents, surfactants, and bioenzyme mixtures and nutrients may be combined with the water, along with a variety of additives, such as organic solvents (e.g., high boiling point alcohols), builders, saponifiers, inhibitors, emulsifiers, pH buffers, and antifoaming agents. Aqueous solutions must have a flash point greater than 93 °C (200 °F) (as reported by the manufacturer), and the solution must be miscible with water.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.530 Architectural Coating

"Architectural coating" means any coating used for residential or commercial buildings or their appurtenances, or for industrial buildings, which is site applied.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.540 Architectural Structure

"Architectural structure" means, for purposes of 35 Ill. Adm. Code 218 and 219, a free-standing, immobile outdoor construction, which may be permanent or temporary, including ~~but not limited to~~ buildings, bridges, dams, and electricity pylons.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.550 As Applied

"As applied" means the formulation of a coating during application on or impregnation into a substrate, including any dilution solvents or thinners added at the source before application of the coating.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.560 As-Applied Fountain Solution

"As-applied fountain solution" means the formulation of a fountain solution during application onto the image plate on a lithographic printing line, including any material added at the line before the application of the fountain solution.

(Source: Added at 19 Ill. Reg. 6823, effective May 9, 1995)

Section 211.570 Asphalt

"Asphalt" means the dark-brown to black cementitious material (solid, semisolid, or liquid in consistency) of which the main constituents are bitumens which occur naturally or as a residue of petroleum refining.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.590 Asphalt Prime Coat

"Asphalt prime coat" means a low-viscosity liquid asphalt applied to an absorbent surface as the first of more than one asphalt coat.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.610 Automobile

"Automobile" means a motor vehicle which normally has four wheels, is used ~~predominanetly~~ predominantly for carrying 12 or fewer passengers, and is not a light-duty truck.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.630 Automobile or Light-Duty Truck Assembly Source or Automobile or Light-Duty Truck Manufacturing Plant

"Automobile or light-duty truck assembly source" or "Automobile or light-duty truck manufacturing plant" means a source where parts are assembled or finished for inclusion into a finished automobile or light-duty truck ready for sale to vehicle dealers, but not including customizers, body shops, and other repainters.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.650 Automobile or Light-Duty Truck Refinishing

"Automobile or light-duty truck refinishing" means the repainting of used automobiles and light-duty trucks.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.660 Automotive/Transportation Plastic Parts

"Automotive/transportation plastic parts" means the interior and exterior plastic components of automobiles, trucks, tractors, lawnmowers, and other like mobile equipment intended for primary use on land, with the exception of the following: plastic parts coated on the main (body) paint line in automobile and light duty truck assembly plants, and plastic parts coated during refinishing of automobiles, trucks, tractors, lawnmowers, and other like mobile equipment.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.665 Auxiliary Boiler

"Auxiliary boiler" means, for purposes of Part 217, a boiler that is operated only when the main boiler or boilers at a source are not in service and is used either to maintain building heat or to assist in the startup of the main boiler or boilers. This term does not include emergency or standby units and load shaving units.

(Source: Added at 33 Ill. Reg. 15754, effective August 31, 2009)

Section 211.670 Baked Coatings

"Baked coatings" means any coating which is cured or dried in an oven where the oven air temperature exceeds ~~90ºC (194ºF)~~90 ºC (194 ºF), or any coating which is cured in any manner

that does not otherwise fit into the definition of "air dried coatings," as defined in Section 211.330 ~~of this Part~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.680 Bakery Oven

"Bakery oven" means an oven used at any time for ~~the purpose of~~ baking yeast-leavened products~~,~~ including~~, but not limited to,~~ breads, rolls, and buns.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.685 Basecoat/Clearcoat System

"Basecoat/clearcoat system" means a topcoat system composed of a pigmented basecoat portion and a transparent clearcoat portion.

(Source: Added at 19 Ill. Reg. 6823, effective May 9, 1995)

Section 211.690 Batch Loading

"Batch loading" means, with respect to solvent cleaning, the process of loading a number of individual parts at the same time for degreasing.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.695 Batch Operation

"Batch operation" means, for purposes of 35 Ill. Adm. Code ~~218 and 219, Sections~~ 218.500 through 218.506 and 219.500 through 219.506, a noncontinuous operation in which a discrete quantity or batch of feed is charged into a chemical manufacturing process unit and distilled or reacted, or otherwise used at one time, and may include~~, but is not limited to,~~ reactors, filters, dryers, distillation columns, extractors, crystallizers, blend tanks, neutralizer tanks, digesters, surge tanks, and product separators. After each batch operation, the equipment is generally emptied before a fresh batch is started.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.696 Batch Process Train

"Batch process train" means, for purposes of 35 Ill. Adm. Code ~~218 and 219, Sections~~ 218.500 through 218.506 and 219.500 through 219.506, the collection of equipment (e.g., reactors, filters, dryers, distillation columns, extractors, crystallizers, blend tanks, neutralizer tanks, digesters, surge tanks, and product separators) configured to produce a specific product or intermediate by a batch operation. A batch process train terminates at the point of storage or product handling of the product or intermediate being produced in the batch process train. ~~Irrespective~~ Regardless of

the product being produced, a batch process train ~~which is~~ independent of other processes ~~shall~~ must be considered a single batch process train for purposes of 35 Ill. Adm. Code 218 and 219.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.710 Bead-Dipping

"Bead-dipping" means the dipping of an assembled tire bead into a solvent-based cement.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.712 Bearing Coating

"Bearing coating" means a coating applied to an antifriction bearing, a bearing housing, or the area adjacent to such a bearing ~~in order~~ to facilitate bearing function or to protect base material from excessive wear. A material ~~shall~~ must not be classified as a bearing coating if it can also be classified as a dry lubricative material or a solid film lubricant.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.715 Bedliner

"Bedliner" means, for purposes of 35 Ill. Adm. Code 218 and 219, a multi-component coating applied to a cargo bed after the application of topcoat and outside of the topcoat operation to provide additional durability and chip resistance.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.730 Binders

"Binders" means organic materials and resins which do not contain VOM.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.737 Bonding Maskant

"Bonding maskant" means a temporary coating used to protect selected areas of aerospace parts from strong acid or alkaline solutions during processing for bonding.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.735 Black Coating

"Black coating" means, for purposes of 35 Ill. Adm. Code 218 and 219, a coating that meets both of the following criteria, based on Cielab color space, 0/45 geometry:

Maximum lightness of 23 units. For spherical geometry, specular included, maximum lightness of 33 units; and

Saturation of less than 2.8, where saturation equals the square root of $A^2 + B^2$.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.740 Brakehorsepower (rated-bhp)

"Brakehorsepower" or "bhp" means the rated horsepower capacity of the engine as defined on the engine nameplate at standard conditions.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.750 British Thermal Unit

"British ~~Thermal Unit~~thermal unit" means the quantity of heat required to raise one pound of water from ~~60 º F to 61º F~~60 ºF to 61 ºF ~~(abbreviated btu)~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.770 Brush or Wipe Coating

"Brush or wipe coating" means a manual method of applying a coating using a brush, cloth, or similar object.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.790 Bulk Gasoline Plant

a) "Bulk gasoline plant" means, for purposes of 35 Ill. Adm. Code 215, any gasoline storage and distribution source that receives gasoline from bulk gasoline terminals by delivery vessels and distributes gasoline to gasoline dispensing operations.

b) "Bulk gasoline plant" means, for purposes of 35 Ill. Adm. Code 218 and 219, a gasoline storage and distribution source with an average throughput of 76,000 ~~l~~ L (20,000 gal) or less on a 30-day rolling average that distributes gasoline to gasoline dispensing operations.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.810 Bulk Gasoline Terminal

"Bulk gasoline terminal" means any gasoline storage and distribution source that receives gasoline by pipeline, ship, or barge, and distributes gasoline to bulk gasoline plants or gasoline dispensing operations.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.820 Business Machine Plastic Parts

"Business machine plastic parts" means:

~~Prior to~~Before May 1, 2012, the plastic housings and other exterior plastic components of electronic office equipment and ~~of~~ medical and musical equipment, including~~, but not limited to the following:~~ computers, monitors, printers and keyboards, facsimile machines, copiers, microfiche readers, cellular and standard phones, and pencil sharpeners. This definition excludes internal electrical components of business machines;

On and after May 1, 2012, a device that uses electronic or mechanical methods to process information, perform calculations, print or copy information, or convert sound into electrical impulses for transmission, including devices listed in standard industrial classification numbers 3572, 3573, 3574, 3579, and 3661, and photocopy machines, a subcategory of standard industrial classification number 3861.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.825 Camouflage Coating

"Camouflage coating" means, for purposes of 35 Ill. Adm. Code 218 and 219, a coating used, principally by the military, to conceal equipment from detection.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.830 Can

"Can" means any cylindrical single walled metal container, with or without a top, cover, spout, or handles, with walls thinner than 29 gauge (0.0141 inch), into which solid or liquid materials may be packaged.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.850 Can Coating

"Can coating" means any protective, decorative, or functional coating applied onto the surface of a can or a metal sheet or metal part which is made into a can.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.870 Can Coating Line

"Can coating line" means a coating line in which any protective, decorative, or functional coating is applied onto the surface of a can or a metal sheet or metal part which is made into a can.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.880 Cap Sealant

"Cap sealant" means~~, for purposes of 35 Ill. Adm. Code 218.204(q)(1) and 219.207(q)(1),~~ a coating applied in the manufacture of ammunition to seal the annular crevice between a primer cap and shellcase.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.890 Capture

"Capture" means the containment or recovery of emissions from an emission unit for direction into a duct which may be exhausted through a stack or vent to a control device. The overall abatement of emissions from an emission unit with an add-on control device is a function both of the capture efficiency and of the control device efficiency.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.910 Capture Device

"Capture device" means a hood, enclosed room, floor sweep, or other means of collecting volatile organic material or other air contaminants into a duct. The pollutant can then be directed to a pollution control device such as an afterburner, carbon adsorber, fabric filter, or scrubber. Sometimes the term is used loosely to include the control device.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.930 Capture Efficiency

"Capture efficiency" means, for purposes of 35 Ill. Adm. Code 218 and 219, the weight of VOM entering a capture system and delivered to a control device divided by the weight of VOM generated by an emission unit, during a particular time period, expressed as a percentage.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.950 Capture System

"Capture system" means all equipment (including~~, but not limited to,~~ hoods, ducts, fans, ovens, dryers, etc.) used to contain, collect, and transport an air contaminant to a control device.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.953 Carbon Adsorber

"Carbon ~~Adsorber~~adsorber" means a control device designed to remove and, if desired, recover volatile organic material (VOM) from process emissions where removal of VOM is accomplished through the adherence of the VOM onto the surface of highly porous adsorbent particles, such as activated carbon. The term "carbon adsorber" describes any adsorber technology used as a control device even though media other than carbon, such as oxides of silicon and aluminum, may be used as the adsorbent~~, such as oxides of silicon and aluminum~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.954 Cavity Wax

"Cavity wax" means, for purposes of 35 Ill. Adm. Code 218 and 219, a coating applied into the cavities of the vehicle primarily for the purpose of enhancing corrosion protection.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.955 Cement

"Cement" means, for the purposes of 35 Ill. Adm. Code 217, Subpart T, a hydraulic cement produced by pulverizing clinker consisting primarily of hydraulic calcium silicates, usually containing one or more of the forms of calcium sulfate as an interground addition.

(Source: Added at 25 Ill. Reg. 4582, effective March 15, 2001)

Section 211.960 Cement Kiln

"Cement kiln" means, for the purposes of 35 Ill. Adm. Code 217, Subpart T, a system including any solid, gaseous, or liquid fuel combustion equipment~~,~~ used to preheat, calcine, and react with raw materials, including limestone and clay, to produce cement clinker.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.965 Ceramic Tile Installation Adhesive

"Ceramic tile installation adhesive" means, for purposes of 35 Ill. Adm. Code 218 and 219, any adhesive used in the installation of ceramic tiles.

(Source: 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.970 Certified Investigation

"Certified investigation" means a report signed by Illinois Environmental Protection Agency ~~(Agency)~~ personnel certifying whether a grain-handling operation (or portion ~~thereof~~of it) or

grain-drying operation is causing or tending to cause air pollution. ~~Such~~ The report must describe the ~~signatory's~~ signer's investigation, including a summary of those facts on which the ~~signatory~~ s relies to certify whether the grain-handling or grain-drying operation is causing or threatening or allowing the discharge or emission of any contaminant into the environment so as to cause or tend to cause air pollution in Illinois, either alone or in combination with contaminants from other sources, or so as to violate regulations or standards adopted by the ~~Pollution Control Board (~~Board) under the ~~Environmental Protection Act (~~Act~~)~~. The certified investigation ~~shall~~ must be open to a reasonable public inspection and may be copied upon ~~payment of~~paying the actual cost of reproducing the original.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.975 Chemical Agent-Resistant Coating

"Chemical agent-resistant coating" means an exterior topcoat designed to withstand exposure to chemical warfare agents or the decontaminants used on these agents.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.980 Chemical Manufacturing Process Unit

"Chemical manufacturing process unit" means the equipment assembled and connected by pipes or ducts to process raw materials and to manufacture an intended product. For purposes of 35 Ill. Adm. Code 218.431 through 218.436~~,~~ and ~~Sections~~ 219.431 through 219.436, the chemical manufacturing process unit includes reactors and their associated product separators and recovery devices, distillation units and their associated distillate receivers, and recovery devices. A chemical manufacturing process unit includes~~, but is not limited to,~~ any combination of pumps, compressors, agitators, pressure relief devices, sampling connection systems, open ended valves or lines, valves, connectors, instrumentation systems, and control devices or systems. A chemical manufacturing process unit is identified by its primary product, as defined in Section 211.5060~~ of this Part~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.985 Chemical Milling Maskant

"Chemical milling maskant" means a coating that is applied directly to aluminum components to protect surface areas when chemical milling the component with a Type I or II etchant. Type I chemical milling maskants are used with a Type I etchant and Type II chemical milling maskants are used with a Type II etchant. This definition does not include:

bonding maskants;

critical use and line sealer maskants;

seal coat maskants;

maskants that must be used with a combination of Type I or II etchants and any of these maskants (i.e., bonding, critical use and line sealer, and seal coat); or

maskants that are listed as aerospace specialty coatings in 35 Ill. Adm. Code 219.204(r)(2).

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.990 Choke Loading

"Choke loading" means that method of transferring grain from the grain-handling operation to any vehicle for shipment or delivery which precludes a free fall velocity of grain from a discharge spout into the receiving container.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.995 Circulating Fluidized Bed Combustor

"Circulating fluidized bed combustor" means, for purposes of Part 217, a fluidized bed combustor in which the majority of the fluidized bed material is carried out of the primary combustion zone and is transported back to the primary zone through a recirculation loop.

(Source: Added at 33 Ill. Reg. 15754, effective August 31, 2009)

Section 211.1000 Class II Finish

"Class II ~~Finish~~finish" means a finish that meets the specifications of Voluntary Product Standard PS-59-73, as approved by the American National Standards Institute.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1010 Clean Air Act

"Clean Air Act" means the Clean Air Act Amendments of 1970 (42 ~~U.S.C.~~USC §7401 et seq.), as amended in 1977 and 1990.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1050 Cleaning and Separating Operation

"Cleaning and separating operation" means ~~that~~ an operation ~~where~~ in which foreign and undesired substances are removed from the grain.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1070 Cleaning Materials

"Cleaning materials" mean any materials used for cleaning an emission unit; ~~cleaning~~ tools, equipment, or other items used with the emission unit; ~~cleaning~~ the walls or area in which the emission unit is located; or ~~cleaning~~ personnel. "Cleaning materials" also means~~; or~~ materials used for other cleaning activity associated with an emission unit.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1090 Clear Coating

"Clear coating" means coatings that lack color and opacity or are transparent using the undercoat as a reflectant base or undertone color.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.1095 Clear Coating for Aerospace Applications

"Clear coating for aerospace applications" means a transparent coating usually applied over a colored opaque coating, metallic substrate, or placard to give improved gloss and protection to the color coat. In some cases, a clearcoat refers to any transparent coating without regard to substrate.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1110 Clear Topcoat

"Clear topcoat" means the final coating which contains binders, but not opaque pigments, and is specifically formulated to form a transparent or translucent solid protective film.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.1120 Clinker

"Clinker" means the product of a cement kiln from which finished cement is manufactured by milling and grinding.

(Source: Added at 25 Ill. Reg. 4582, effective March 15, 2001)

Section 211.1128 Closed Molding

"Closed molding" means, for purposes of 35 Ill. Adm. Code 218 and 219, any molding process in which pressure is used to distribute the resin through the reinforcing fabric placed between two mold surfaces to either saturate the fabric or fill the mold cavity. The pressure may be clamping pressure, fluid pressure, atmospheric pressure, or vacuum pressure used either alone or

in combination. The mold surfaces may be rigid or flexible. Closed molding includes~~, but is not limited to,~~ compression molding with sheet molding compound, infusion molding, resin injection molding, vacuum assisted resin transfer molding, resin transfer molding, and vacuum assisted compression molding. Processes in which a closed mold is used only to compact saturated fabric or remove air or excess resin from the fabric (such as in vacuum bagging)~~,~~ are not considered closed molding. Open molding steps, such as application of a gel coat or skin coat layer by conventional open molding ~~prior to~~before a closed molding process, are also not closed molding.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1130 Closed Purge System

"Closed purge system" means a system that is not open to the atmosphere and that is composed of piping, connections, and, if necessary, flow inducing devices that transport liquid or vapor from a piece or pieces of equipment to a control device, or return the liquid or vapor to the process line.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1150 Closed Vent System

"Closed vent system" means a system that is not open to the atmosphere and is composed of piping, connections, and, if necessary, flow inducing devices that transport gas or vapor from a piece or pieces of equipment to a control device.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1170 Coal Refuse

"Coal refuse" means waste products of coal mining, cleaning, and coal preparation operations containing coal, matrix material, clay, and other organic and inorganic material.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1190 Coating

a) "Coating" means, for purposes of 35 Ill. Adm. Code 215, a material applied to a substrate for decorative, protective, or other functional purposes. ~~Such~~ This material ~~shall include, but are not limited to~~includes paints, varnishes, sealers, adhesives, diluents, and thinners.

b) "Coating" means, for purposes of 35 Ill. Adm. Code 218 and 219, a material applied onto or impregnated into a substrate for protective, decorative, or functional purposes. ~~Such materials include, but are not limited to,~~This material includes paints, varnishes, sealers, adhesives, thinners, diluents, and inks.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1210 Coating Applicator

"Coating applicator" means equipment used to apply a coating.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.1230 Coating Line

a) "Coating line" means, for purposes of 35 Ill. Adm. Code 215, an operation ~~where~~ in which a surface coating is applied to a material and ~~subsequently~~ the coating is then dried and/or cured.

b) "Coating line" means, for purposes of 35 Ill. Adm. Code 218 and 219, an operation consisting of a series of one or more coating applicators and any associated flash-off areas, drying areas, and ovens ~~wherein~~ in which a coating is applied, dried, and/or cured. A coating line ends at the point ~~where~~ at which the coating is dried or cured, or ~~prior to~~before any subsequent application of a different coating. It is not necessary for an operation to have an oven or a flash-off area in order to be included in this definition.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1250 Coating Plant

"Coating plant" means any building, structure, or installation that contains a coating line, ~~and which~~ is located on one or more contiguous or adjacent properties, and ~~which~~ is owned or operated by the same person ~~(~~or by persons under common control~~)~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1270 Coil Coating

"Coil coating" means any protective, decorative, or functional coating which is applied onto any flat metal sheet or strip which is delivered to the coating line as a roll or coil, unwound, and coated as a continuous substrate.

For purposes of Subpart F of 35 Ill. Adm. Code Parts 218 and 219, the definition does not include protective, decorative, or functional materials that consist only of protective oils for metal, acids, bases, or any combination of these substances. For this purpose, "protective oil" means an organic material that is applied to metal for the purpose of providing lubrication or protection from corrosion without forming a solid film and includes lubricating oils, evaporative oils (including those that evaporate completely), and extrusion oils. Protective oils used on miscellaneous metal parts and products include magnet wire lubricants and soft temporary

protective coatings that are removed before installation or further assembly of a part or component.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1290 Coil Coating Line

"Coil coating line" means a coating line in which any protective, decorative, or functional coating is applied onto any flat metal sheet or strip which is delivered to the coating line as a roll or coil, unwound, and coated as a continuous substrate.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1310 Cold Cleaning

"Cold cleaning" means the process of cleaning and removing soils from surfaces by spraying, brushing, flushing, or immersion while maintaining the organic solvent below its boiling point. ~~Wipe~~ This definition does not include wipe cleaning ~~is not included in this definition~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1312 Combined Cycle System

"Combined ~~Cycle System~~cycle system" means a system comprised of one or more combustion turbines, heat recovery steam generators, and steam turbines configured to improve overall efficiency of electricity generation or steam production.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1315 Combustion Tuning

"Combustion tuning" means, for purposes of Part 217, ~~review and adjustment of~~reviewing and adjusting a combustion process to maintain combustion efficiency of an emission unit, as performed in compliance with procedures provided by the manufacturer or by a trained technician.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1316 Combustion Turbine

"Combustion ~~Turbine~~turbine" means an enclosed fossil or other fuel-fired device that is comprised of a compressor, a combustor, and a turbine, and in which the flue gas resulting from the combustion of fuel in the combustor passes through the turbine, rotating the turbine.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1320 Commence Commercial Operation

For purposes of ~~allocation of~~allocating allowances ~~as described in~~under 35 Ill. Adm. Code 217, "commence commercial operation" means, with regard to an EGU that serves a generator, to have begun to produce steam, gas, or other heated medium used to generate electricity for sale or use, including test generation. ~~Such~~ This date ~~shall~~ must remain the unit's date of ~~commencement of~~commencing operation even if the EGU is subsequently modified, reconstructed, or repowered.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1324 Commence Operation

For purposes of ~~allocation of~~allocating allowances ~~as described in~~under 35 Ill. Adm. Code 217, "commence operation" means, with regard to a stationary boiler, combustion turbine, or combined cycle system, to have begun any mechanical, chemical, or electronic process, including~~,~~ start-up of the unit's combustion chamber. ~~Such~~ This date ~~shall~~ must remain the unit's date of ~~commencement of~~commencing operation even if the unit is subsequently modified, reconstructed, or repowered.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1326 Commercial Exterior Aerodynamic Structure Primer

"Commercial exterior aerodynamic structure primer" means a primer used on aerodynamic components and structures that protrude from the fuselage, such as wings and attached components, control surfaces, horizontal stabilizers, vertical fins, wing-to-body fairings, antennae, and landing gear and doors, for the purpose of extended corrosion protection and enhanced adhesion.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1327 Commercial Interior Adhesive

"Commercial interior adhesive" means materials used in the bonding of passenger cabin interior components that are subject to the Federal Aviation Administration fireworthiness requirements.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1328 Common Stack

"Common stack" means a single flue through which emissions from two or more units are exhausted.

(Source: Added at 25 Ill. Reg. 108, effective December 26, 2000)

Section 211.1329 Compatible Substrate Primer

"Compatible substrate primer" means either compatible epoxy primer or adhesive primer. Compatible epoxy primer is primer that is compatible with the filled elastomeric coating and is epoxy-based. The compatible substrate primer is an epoxypolyamide primer used to promote adhesion of elastomeric coatings such as impact-resistant coatings. Adhesive primer is a coating that:

inhibits corrosion and serves as a primer applied to bare metal surfaces or ~~prior to~~before adhesive application; or

is applied to surfaces that can be expected to contain fuel.

Fuel tank coatings are excluded from this category.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1330 Complete Combustion

"Complete combustion" means a process in which all carbon contained in a fuel or gas stream is converted to carbon dioxide.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.1350 Component

"Component" means any piece of equipment which has the potential to leak volatile organic material (VOM), including~~, but not limited to,~~ pump seals, compressor seals, seal oil degassing vents, pipeline valves, pressure relief devices, process drains and open ended valves and lines, and flanges. For purposes of Subparts Q and R in 35 Ill. Adm. Code 215, 218 and 219, this definition excludes valves which are not externally regulated, flanges, and equipment in heavy liquid service. For purposes of Subpart Q of 35 Ill. Adm. Code 215, 218 and 219, this definition also excludes bleed ports of gear pumps in polymer service.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1370 Concrete Curing Compounds

"Concrete curing compounds" means any coating applied to freshly poured concrete to retard the evaporation of water.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.1390 Concentrated Nitric Acid Manufacturing Process

"Concentrated nitric acid manufacturing process" means any acid producing facility manufacturing nitric acid with a concentration equal to or greater than 70 percent by weight.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.1410 Condensate

"Condensate" means volatile organic liquid separated from its associated gases, which condenses due to changes in the temperature or pressure and remains liquid at standard conditions.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.1430 Condensible PM-10

"Condensible PM-10" means PM-10 formed immediately or shortly after discharge to the atmosphere, as measured by the applicable test method ~~specified in~~under 35 Ill. Adm. Code 212.110. Condensible particulate matter exists in gaseous and/or vapor form ~~prior to~~before release to the atmosphere, e.g., in the stack, and forms particulate matter upon condensation when subject to conditions of cooling and dilution in the atmosphere.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1432 Confined Space

"Confined space" means a space that is large enough and so configured that an employee can bodily enter and perform assigned work; has limited or restricted means for entry or exit (for example, fuel tanks, fuel vessels, and other spaces that have limited means of entry); and is not suitable for continuous employee occupancy.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1435 Container Glass

"Container glass" means, for purposes of Part 217, glass made of soda-lime recipe, clear or colored, which is pressed or blown, or both, into bottles, jars, ampoules, and other products listed in Standard Industrial Classification 3221.

(Source: Added at 33 Ill. Reg. 15754, effective August 31, 2009)

Section 211.1455 Contact Adhesive

"Contact adhesive" means, for purposes of 35 Ill. Adm. Code 218 and 219, an adhesive that meets the qualifying criteria ~~in this Section. "Contact adhesive" does not include rubber cements that are primarily intended for use on paper substrates or vulcanizing fluids that are designed and labeled for tire repair only. The qualifying criteria are~~:

The adhesive is designed for application to both surfaces to be bonded together;

The adhesive is allowed to dry before the two surfaces are placed in contact with each other;

The adhesive forms an immediate bond that is impossible, or difficult, to reposition after both adhesive-coated surfaces are placed in contact with each other; and

The adhesive does not need sustained pressure or clamping of surfaces after the adhesive-coated surfaces have been brought together using sufficient momentary pressure to establish full contact between both surfaces.

"Contact adhesive" does not include rubber cements that are primarily intended for use on paper substrates or vulcanizing fluids that are designed and labeled for tire repair only.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1465 Continuous Automatic Stoking

"Continuous automatic stoking" means ~~the automatic~~automatically moving ~~of~~ animal pathological waste during burning~~,~~ by moving the hearth in a pulse cycle manner.~~, which~~ This process is designed to provide a continuous burning rate in which the design charging rate per hour equals the burning rate every hour without limitation.~~, and results~~ This process is designed to result in emission rates which are similar over any hour of the burning process.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1467 Continuous Coater

"Continuous coater" means a finishing system that continuously applies coating onto wood furniture parts moving along a conveyor system. Coatings that are not transferred to the part are recycled in the finishing system reservoir.

(Source: Added at 22 Ill. Reg. 3497, effective February 2, 1998)

Section 211.1470 Continuous Process

"Continuous process" means, with respect to ~~manufacture of~~manfacturing polystyrene resin, a method ~~of manufacture~~ in which the styrene raw material is delivered on a continuous basis to the reactor in which the styrene is polymerized to polystyrene.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1490 Control Device

"Control device" means equipment ~~(~~such as an afterburner, adsorber, fabric filter, or scrubber~~)~~ used to remove or prevent the emission of an air contaminant from a contaminated exhaust stream.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1510 Control Device Efficiency

"Control device efficiency" means, for purposes of 35 Ill. Adm. Code 218 and 219, the weight of VOM generated by an emission unit which is destroyed or removed by a control device, divided by the weight of VOM generated by ~~such~~ the unit entering the control device, during a particular time period, expressed as a percentage.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1515 Control Period

For purposes of 35 Ill. Adm. Code 217, "control period" means the period beginning May 1 of a year and ending ~~on~~ September 30 of the same year, inclusive, except that in 2004, "control period" means May 31 through September 30.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1520 Conventional Air Spray

"Conventional air spray" means a spray coating method in which the coating is atomized by mixing it with compressed air at an air pressure greater than 10 pounds per square inch (gauge) at the point of atomization. Airless, air assisted airless, and electrostatic spray technologies are not conventional air spray.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1530 Conventional Soybean Crushing Source

"Conventional soybean crushing source" means any hexane extraction soybean crushing equipment that uses direct contact steam for desolventizing and producing toasted soy meals.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.1550 Conveyorized Degreasing

"Conveyorized degreasing" means the continuous process of cleaning and removing soils from surfaces ~~utilizing~~ using either cold or vaporized solvents.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1555 Corrosion Prevention System

"Corrosion prevention system" means a coating system that provides corrosion protection by displacing water and penetrating mating surfaces, forming a protective barrier between the metal surface and moisture. Coatings containing oils or waxes are excluded from this definition.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1560 Cove Base

"Cove base" means, for purposes of Subparts JJ of 35 Ill. Adm. Code 218 and 219, a flooring trim unit, generally made of vinyl or rubber, having a concave radius on one edge and a convex radius on the opposite edge that is used ~~in forming a junction between~~to join the bottom wall course and the floor or ~~to~~ form an inside corner.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1565 Cove Base Installation Adhesive

"Cove base installation adhesive" means, for purposes of 35 Ill. Adm. Code 218 and 219, any adhesive used ~~for the installation of~~to install cove base or wall base on a wall or vertical surface at floor level.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1567 Critical Use and Line Sealer Maskant

"Critical use and line sealer maskant" means a temporary coating, not covered under other maskant categories, used to protect selected areas of aerospace parts from:

strong acid or alkaline solutions such as those used in anodizing, plating, chemical milling, and processing of magnesium, titanium, or high strength steel;

high-precision aluminum chemical milling of deep cuts; and

aluminum chemical milling of complex shapes.

~~Materials~~ This definition also includes materials used for repairs or to bridge gaps left by scribing operations (i.e., line sealer) ~~are also included in this definition~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1570 Crude Oil

"Crude oil" means a naturally occurring mixture ~~which consists~~consisting of hydrocarbons and sulfur, nitrogen, or oxygen derivatives of hydrocarbons and which is a liquid at standard conditions.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1590 Crude Oil Gathering

"Crude oil gathering" means ~~the transportation of~~transporting crude oil or condensate after transferring custody ~~transfer~~ between a production site and a reception point.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1610 Crushing

"Crushing" means ~~the fragmentation of~~fragmenting non-metallic minerals by a machine such as a jaw, gyratory, cone, roll, rod, mill, hammermill, ~~and~~ or impactor.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1620 Cryogenic Flexible Primer

"Cryogenic flexible primer" means a primer designed to provide corrosion resistance, flexibility, and adhesion of subsequent coating systems when exposed to loads up to and surpassing the yield point of the substrate at cryogenic temperatures (-275 °F and below).

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1625 Cryoprotective Coating

"Cryoprotective coating" means a coating that insulates cryogenic or subcooled surfaces to limit propellant boil-off, maintain structural integrity of metallic structures during ascent or re-entry, and prevent ice formation.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1630 Custody Transfer

"Custody transfer" means ~~the transfer of~~transferring produced petroleum and/or condensate after processing and/or treating in the producing operations~~,~~ from storage tanks or automatic transfer systems to pipelines or any other ~~forms~~ form of transportation.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1650 Cutback Asphalt

"Cutback asphalt" means any asphalt which has been ~~liquified~~ liquefied by blending with petroleum solvents other than residual fuel oil and has not been emulsified with water.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1655 Cyanoacrylate Adhesive

"Cyanoacrylate adhesive" means, for purposes of 35 Ill. Adm. Code 218 and 219, any adhesive with a cyanoacrylate content of at least 95 percent by weight.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.1670 Daily-Weighted Average VOM Content

"Daily-weighted average VOM content" means the average VOM content of two or more coatings as applied on a coating line during any day, taking into account the fraction of total coating ~~volume~~ that each coating represents determined according to the following formulas:~~.~~

~~$$VOMw = [\Sigma_{i=1} Vi Ci] /VT$$~~

~~where: VOMw =~~	~~The average VOM content of two or more coatings as applied each day on a coating line in units of kg VOM/l (lbs VOM/gal) of coating (minus water and any compounds which are specifically exempted from the definition of VOM);~~
~~n =~~	~~The number of different coatings as applied each day on a coating line;~~
~~Vi =~~	~~The volume of each coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each day on a coating line in units of l (gal).~~
~~Ci =~~	~~The VOM content of each coating as applied each day on a coating line in units of kg VOM/l (lbs VOM/gal) of coating~~

~~(minus water and any compounds which are specifically exempted from the definition of VOM), and~~

~~VT =).~~ ~~The total volume of all coatings (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each day on a coating line in units of 1 (gal).~~

a) Daily-weighted average VOM content in units of kg VOM/l (lbs VOM/gal) of coatings applied (minus water and any compounds which are specifically exempt from the definition of VOM) must be determined using the equation:

$$VOM_{DWA,Vc} = \frac{\sum_{i=1}^{n}(Vc_i)(VOMv_i)}{Vc_T}$$

where:

$VOM_{DWA,Vc}$ = The daily weighted average VOM content, by volume of coating, of two or more coatings applied each day on the coating line in units of kg VOM/l (lbs VOM/gal) coatings as applied (minus water and any compounds which are specifically exempted from the definition of VOM);

i = Subscript denoting a coating, i;

n = The number of different coatings applied each day on the coating line;

Vc_i = The volume of a coating, i, (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each day on the coating line in units of 1 (gal);

$VOMv_i$ = The VOM content, by volume of coating, of a coating, i, as applied each day on the coating line in units of kg VOM/1 (lbs VOM/gal) of coating (minus water and any compounds which are specifically exempted from the definition of VOM);

Vc_T = The total volume of all coatings (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each day from all coatings applied on the coating line in units of l (gal), determined using the equation:

$$Vc_T = \sum_{i=1}^{n} Vc_i$$

b) Daily-weighted average VOM content in units of kg VOM/kg solids (lbs VOM/lb solids) must be determined using the equation:

$$VOM_{DWA,Ms} = \frac{\sum_{i=1}^{n} Ms_i VOMs_i}{Ms_T}$$

where:

$VOM_{DWA,Ms}$ The daily-weighted average VOM content, by mass of solids applied, of two or more coatings applied each day on the coating line in units of kg VOM/kg solids (lbs VOM/lb solids);

i = Subscript denoting a coating, i;

n = The number of different coatings applied each day on the coating line;

Ms_i= The mass of solids of a coating, i, applied each day on the coating line in units of kg (lb);

$VOMs_i$ = The VOM content, by mass of solids applied, of a coating, i, applied each day on a coating line in units of kg VOM/kg solids (lbs VOM/lb solids) of each coating;

Ms_T= The total weight of solids in kg (lb) applied each day from all coatings applied on the coating line, determined using the equation:

$$Ms_T = \sum_{i=1}^{n} Ms_i$$

c) Daily-weighted average VOM content in units of kg VOM/kg coating (lbs VOM/lb coating) applied must be determined using the equation:

$$VOM_{DWA,Mc} = \frac{\sum_{i=1}^{n}(Mc_i)(VOMm_i)}{Mc_T}$$

where:

VOM $_{DWA,Mc}$ = The average VOM content, by mass of coating, of two or more coatings applied each day on the coating line in units of kg VOM/kg coating (lbs VOM/lb coating) applied;

i = Subscript denoting a coating, i;

n = The number of different coatings applied each day on the coating line;

Mc_i = The mass of each coating, i, applied each day on a coating line in units of kg (lb);

$VOMm_i$ = The VOM content, mass of coating, of a coating, i, applied each day on a coating line in units of kg VOM/kg coating (lbs VOM/lb coating)

Mc_T = The total mass of all coatings applied each day on the coating line in units of kg (lb), determined using the equation:

$$Mc_T = \sum_{i=1}^{n} Mc_i$$

d) Daily-weighted average VOM content in units of kg VOM/l solids (lbs VOM/gal solids) applied must be determined using the equation below:

$$VOM_{DWA,Vs} = \frac{\sum_{i=1}^{n}(Vs_i)(VOMvs_i)}{Vs_T}$$

where:

VOM $_{DWA,vs}$ = The daily-weighted average VOM content, by volume of solids, of two or more coatings applied each day on the coating line in units of kg VOM/l solids (lbs VOM/gal solids);

i = Subscript denoting a coating, i;

n = The number of different coatings applied each day on the coating line;

Vs_i = The volume of solids of a coating, i, applied each day on a coating line in units of 1iter (gallon);

$VOMvs_i$ = The VOM content, by volume of solids, of a coating, i, applied each day on the coating line in units of kg VOM/1 solids (lbs VOM/gal solids);

Vs_T = The total volume of all solids applied each day on the coating line in units of 1iter (gallon), determined using the equation:-

$$Vs_T = \sum_{i=1}^{n} Vs_i$$

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1690 Day

"Day" means, for purposes of Part 218 or Part 219, the consecutive 24 hours beginning at 12:00 AM (midnight) local time ~~or beginning at a fixed time consistent with the source's operating schedule, as provided below~~. A source may use a 24-hour day beginning at a fixed time other than midnight which is consistent with its operating schedule ~~provided that~~if the owner or operator of the source first notifies the Agency in writing of ~~such~~ that alternative~~, describing~~ and describes why it would be more reasonable to maintain records on this basis. ~~The owner or operator shall notify the Agency in writing prior to any change in the time at which a day begins.~~

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1700 Deadener

"Deadener" means, for purposes of 35 Ill. Adm. Code 218 and 219, a coating applied to selected vehicle surfaces primarily for the purpose of reducing the sound of road noise in the passenger compartment.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.1710 Degreaser

"Degreaser" means any equipment or system used in solvent cleaning.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.1730 Delivery Vessel

"Delivery vessel" means any tank truck or trailer equipped with a storage tank that is used ~~for the~~to transport ~~of~~ gasoline to a stationary storage tank at a gasoline dispensing operation, bulk gasoline plant, or bulk gasoline terminal.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1735 Department of Defense Classified Coating

"Department of Defense classified coating" means a coating that has been determined ~~pursuant to~~under federal Executive Order 13526, "Classified National Security Information", December 29, 2009, or any successor order to require protection against unauthorized disclosure and is marked in documentary form to indicate its classified status ~~when in documentary form~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1740 Diesel Engine

"Diesel engine" means, for the purposes of 35 Ill. Adm. Code 217, Subpart Q, a compression ignited two- or four-stroke engine in which liquid fuel injected into the combustion chamber ignites when the air charge is compressed to a temperature sufficiently high for auto-ignition.

(Source: Added at 31 Ill. Reg. 14271, effective September 25, 2007)

Section 211.1745 Digital Printing

"Digital ~~Printing~~printing" means, for purposes of 35 Ill. Adm. Code 218.187 and 219.187, the transfer of electronic files directly from a computer to an electronically driven output device that prints the image directly on the selected media (substrate). ~~Printing~~ This definition does not include using home and office equipment ~~is excluded from this definition~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1750 Dip Coating

"Dip coating" means a method of applying coatings in which the part is submerged in a tank filled with the coating.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.1770 Distillate Fuel Oil

"Distillate fuel oil" means fuel oils of grade No. 1 or 2 as specified in ~~detailed~~ requirements for fuel oil under ASTM D-369-69 (1971), incorporated by reference in 35 Ill. Adm. Code 218.112 and 219.112.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1780 Distillation Unit

"Distillation unit" means a device or vessel in which one or more feed streams are separated into two or more exit streams, each exit stream having component concentrations different from those in the feed stream(s). Separation is achieved by ~~a redistribution of the~~redistributing components between the liquid and the vapor phases by vaporization and condensation as they approach equilibrium within the distillation unit. A distillation unit includes~~, but is not limited to,~~ the distillate receiver, reboiler, vacuum pump, steam jet, and any associated recovery system.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1790 Drum

"Drum" means any cylindrical shipping container of 13 to 110-gallon capacity.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.1810 Dry Cleaning Operation or Dry Cleaning Facility

"Dry cleaning operation" or "Dry cleaning facility" means the cleaning of fabrics using an essentially nonaqueous solvent by means of one or more solvent washes, extraction of excess solvent by spinning, and drying by tumbling in an airstream. The dry cleaning operation or facility includes~~, but is not limited to,~~ washers, dryers, filter and purification systems, waste disposal systems, holding tanks, pumps, and attendant piping and valves.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1820 Dry Lubricative Material for Aerospace Applications

"Dry lubricative material for aerospace applications" means a coating consisting of lauric acid, cetyl alcohol, waxes, or other noncrosslinked or resin-bound materials that act as a dry lubricant.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1830 Dump-Pit Area

"Dump-pit area" means any area where grain is received at a grain-handling or grain-drying operation.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.1850 Effective Grate Area

"Effective grate area" means that area of a dump-pit grate through which air passes, or would pass, when aspirated.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.1870 Effluent Water Separator

"Effluent water separator" means any tank, box, sump, or other apparatus in which any organic material floating on or entrained or contained in water entering ~~such~~ the tank, box, sump, or other apparatus is physically separated and removed from ~~such~~ the water ~~prior to~~before outfall, drainage, or recovery of ~~such~~ the water.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1872 Ejection Cartridge Sealant

"Ejection cartridge sealant" means, for purposes of 35 Ill. Adm. Code 218.204(q) and 219.204(q), a sealant applied during the assembly of an ejection cartridge to provide a waterproof barrier between a shellcase and primer, and between a shellcase and the wad.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.1876 Electric Dissipating Coating

"Electric dissipating coating" means, for purposes of 35 Ill. Adm. Code 218 and 219, a coating that rapidly dissipates a high-voltage electric charge.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.1877 Electric-Insulating Varnish

"Electric-insulating varnish" means, for purposes of 35 Ill. Adm. Code 218 and 219, a non-convertible coating applied to electric motors, components of electric motors, or power transformers to provide electrical, mechanical, and environmental protection or resistance.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.1875 Elastomeric Materials

"Elastomeric materials" means topcoats and primers that are specifically formulated for application over flexible parts such as filler panels and elastomeric bumpers.

(Source: Added at 19 Ill. Reg. 6823, effective May 9, 1995)

Section 211.1878 Electrical Apparatus Component

"Electrical ~~Apparatus Component~~apparatus component" means, for purposes of 35 Ill. Adm. Code 218.187 and 219.187, an internal component such as wires, windings, stators, rotors,

magnets, contacts, relays, energizers, and connections in an apparatus that generates or transmits electrical energy, including~~, but not limited to,~~ alternators, generators, transformers, electric motors, cables, and circuit breakers, except for the actual cabinet in which the components are housed. ~~Electrical~~ This definition also includes components of graphic arts application equipment and hot-line tools~~ are also included in this category~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1880 Electrical Switchgear Compartment Coatings

"Electrical switchgear compartment coatings" means coatings applied to metal-enclosed compartments that house assemblies of medium/high voltage switchgear~~,~~ of greater than 1,000 volts AC~~,~~ for utility distribution in outdoor use.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1882 Electrodeposition Primer (EDP)

"Electrodeposition primer" or "EDP" means, for purposes of 35 Ill. Adm. Code 218 and 219, a process of applying a protective, corrosion-resistant waterborne primer on exterior and interior surfaces that provides thorough coverage of recessed areas. It is a dip coating method that uses an electrical field to apply or deposit the conductive coating onto the part. The object being painted acts as an electrode that is oppositely charged from the particles of paint in the dip tank. Electrodeposition primer is also referred to as E-Coat, Uni-Prime, and ELPO Primer.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.1883 Electromagnetic Interference/Radio Frequency Interference (EMI/RFI) Shielding Coatings

"Electromagnetic interference/radio frequency interference coatings" or "EMI/RFI coatings" means:

~~Prior to~~Before May 1, 2012, coatings used on business machine plastic housings to attenuate electromagnetic and radio frequency interference signals that would otherwise pass through the plastic housing;

On and after May 1, 2012, coatings used on electrical or electronic equipment to provide shielding against electromagnetic interference, radio frequency interference, or static discharge.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1885 Electronic Component

"Electronic ~~Component~~component" means, for the purposes of 35 Ill. Adm. Code 218.182(f), 219.182(f), 218.187, and 219.187, all portions of an electronic assembly, including~~, but not limited to,~~ circuit board assemblies, printed wire assemblies, printed circuit boards, soldered joints, ground wires, bus bars, and associated electronic component manufacturing equipment such as screens and filters, except for the actual cabinet ~~in which~~housing the components ~~are housed~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1890 Electrostatic Bell or Disc Spray

"Electrostatic bell or disc spray" means an electrostatic spray coating method in which a rapidly-spinning bell- or disc-shaped applicator is used to create a fine mist and apply the coating with high transfer efficiency.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.1895 Electrostatic Discharge and Electromagnetic Interference Coating

"Electrostatic discharge and electromagnetic interference coating" means a coating applied to space vehicles, missiles, aircraft radomes, and helicopter blades to disperse static energy or reduce electromagnetic interference.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1900 Electrostatic Prep Coat

"Electrostatic prep coat" means a coating that is applied to a plastic part solely to provide conductivity for the subsequent application of a prime coat, a topcoat, or other coating through the use of electrostatic application methods. An electrostatic prep coat is clearly identified as an electrostatic prep coat on its accompanying material safety data sheet.

(Source: Added at 19 Ill. Reg. 6823, effective May 9, 1995)

Section 211.1910 Electrostatic Spray

"Electrostatic spray" means a spray coating method in which opposite electrical charges are applied to the substrate and the coating. The coating is attracted to the object due to the electrostatic potential between them.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.1915 Elevated-Temperature Skydrol-Resistant Commercial Primer

"Elevated-temperature Skydrol-resistant commercial primer" means a primer applied primarily to commercial aircraft (or commercial aircraft adapted for military use) that must withstand

immersion in phosphate-ester hydraulic fluid (Skydrol 500b or equivalent) at 150 °F or higher for at least 1,000 hours.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1920 Emergency or Standby Unit

"Emergency or ~~Standby Unit~~standby unit" means, for a stationary gas turbine or a stationary reciprocating internal combustion engine, a unit that:

a) Supplies power for the source at which it is located but operates only when the normal supply of power has been rendered unavailable by circumstances beyond the control of the owner or operator of the source and only as necessary to assure the availability of the engine or turbine. An emergency or standby unit may not be operated to supplement a primary power source when the load capacity or rating of the primary power source has been reached or exceeded.

b) Operates exclusively for firefighting or flood control or both.

c) Operates in response to and during the existence of any officially declared disaster or state of emergency.

d) Operates for the purpose of testing, repair, or routine maintenance to verify its readiness for emergency or standby use.

e) Notwithstanding any other subsection in this Section, emergency or standby units may operate an additional 50 hours per year in non-emergency situations.

The term does not include equipment used for purposes other than emergencies, as described above, such as to supply power during high electric demand days.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1930 Emission Rate

"Emission rate" means, if not otherwise stated in a specific provision, the total quantity of a particular specified air contaminant discharged into the atmosphere in any one-hour period. For example, if not otherwise specified in 35 Ill. Adm. Code 218 or 219, emission rate means the total quantity of volatile organic material discharged into the atmosphere in any one-hour period.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.1950 Emission Unit

"Emission unit" means any part or activity at a stationary source that emits or has the potential to emit any air pollutant.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.1970 Enamel

"Enamel" means a coating that cures by chemical cross-linking of its base resin. Enamels ~~can be distinguished~~ differ from lacquers because enamels are not readily resoluble in their original solvent.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.1990 Enclose

"Enclose" means, for purpose of 35 Ill. Adm. Code 215.481(c), 215.482(b), 218.481(c), 218.482(b), 219.481(c), and 219.482(b), to cover any volatile organic liquid surface that is exposed to the atmosphere.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.2010 End Sealing Compound Coat

"End sealing compound coat" means a can coating applied to can ends which functions as a gasket when the end is assembled onto the can.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.2030 Enhanced Under-the-Cup Fill

"Enhanced under-the-cup fill" means an improved under-the-cup technique, such as ~~use of~~using Kartridg Pak Low Pressure Sequencing Springs ~~in conjunction~~ with process temperature gradient control, which forces most propellant which would otherwise remain in the headspace of the fill machine fitting into the aerosol can by using either a compressed non-VOM gas such as nitrogen or vaporization of the propellant itself. Enhanced under-the-cup fill may require ~~adjustment of~~ adjusting the fill machine to reduce the hold-down pressure on the cup during the period in the filling cycle when remaining propellant in the fitting is forced into the can.

(Source: Added at 18 Ill. Reg. 1253, effective January 18, 1994)

Section 211.2035 Epoxy Polyamide Topcoat

"Epoxy polyamide topcoat" means a coating used where harder films are required or in some areas where engraving is accomplished in camouflage colors.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2040 Etching Filler

"Etching filler" means, for purposes of 35 Ill. Adm. Code 218 and 219, a coating that contains less than 23 percent solids by weight and at least 0.50 percent acid by weight, and is used instead of applying a pretreatment coating followed by a primer.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.2050 Ethanol Blend Gasoline

"Ethanol blend gasoline" means a mixture of gasoline and at least 9% ethanol by volume.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.2055 Ethylene Propylenediene Monomer (EPDM) Roof Membrane

"Ethylene propylenediene monomer roof membrane" or "EPDM roof membrane" means, for purposes of 35 Ill. Adm. Code 218 and 219, a prefabricated single sheet of elastomeric material composed of ethylene propylenediene monomer and that is field applied to a building roof using one layer or membrane material.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.2070 Excess Air

"Excess air" means air supplied in addition to the theoretical quantity necessary for complete combustion of all fuel and/or combustible waste material.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.2080 Excess Emissions

"Excess emissions" means any tonnage of NO_x emitted by a NO_x budget unit during a control period that exceeds the NO_x allowances available for compliance deduction for the unit and for a control period.

(Source: Added at 25 Ill. Reg. 108, effective December 26, 2000)

Section 211.2090 Excessive Release

"Excessive release" means, for purposes of 35 Ill. Adm. Code 215.144, 218.144, and 219.144, a discharge of more than 295 g (0.65 lbs) of mercaptans and/or hydrogen sulfide into the atmosphere in any 5-minute period.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2110 Existing Grain-Drying Operation (Repealed)

(Source: Repealed at 20 Ill. Reg. 7590, effective May 22, 1996

Section 211.2130 Existing Grain-Handling Operation (Repealed)

(Source: Repealed at 20 Ill. Reg.7590, effective May 22, 1996)

Section 211.2150 Exterior Base Coat

"Exterior base coat" means a can coating applied to the exterior of a two-piece can body to provide protection to the metal or to provide background for any lithographic or printing operation.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.2170 Exterior End Coat

"Exterior end coat" means a can coating applied to the exterior end of a can to provide protection to the metal.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.2180 Exterior Primer for Large Commercial Aircraft

"Exterior primer for large commercial aircraft" means an aerospace primer~~,~~ applied to an aircraft of more than 110,000 pounds maximum certified take-off weight~~,~~ manufactured for non-military use.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2190 External Floating Roof

"External floating roof" means a cover over an open top storage tank consisting of a double deck or pontoon single deck which rests upon and is supported by the volatile organic liquid being contained and is equipped with a closure seal or seals to close the space between the roof edge and tank shell.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.2200 Extreme High-Gloss Coating

"Extreme high-gloss coating" means:

For purposes of 35 Ill. Adm. Code 218.204(q)(1) and 219.204(q)(1) regarding metal parts and products coatings, a coating that, when tested by ASTM D 523-80, incorporated by

reference in ~~Section~~ 35 Ill. Adm. Code 211.101(a)(3) ~~of this Part~~, shows a reflectance of 75 or more on a 60° meter;

For purposes of 35 Ill. Adm. Code 218.204(q)(5) and 219.204(q)(5) regarding pleasure craft coatings, any coating that achieves greater than 90 percent reflectance on a 60° meter when tested using ASTM D 523-89, incorporated by reference in ~~Section~~ 35 Ill. Adm. Code 211.101(a)(3) ~~of this Part~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2210 Extreme Performance Coating

"Extreme performance coating" means:

Except for purposes of 35 Ill. Adm. Code 218.204(q) or 219.204(q), any coating that ~~during intended use~~ is exposed during intended use to any or all of the following: ambient weather conditions, temperatures consistently above ~~95°C (203°F)~~95 ºC (203 ºF)~~,~~ detergents, abrasive and scouring agents, solvents, or corrosive atmospheres;

For purposes of 35 Ill. Adm. Code 218.204(q) and 219.204(q), a coating used on a metal or plastic surface where the coated surface meets~~,~~ in its intended use~~,~~ one or more of the criteria ~~listed~~ below. Extreme performance coatings include~~, but are not limited to,~~ coatings applied to locomotives, railroad cars, farm machinery, and heavy duty trucks:

Chronic exposure to corrosive, caustic, or acidic agents, chemicals, chemical fumes, chemical mixtures, or solutions;

Repeated exposure to temperatures in excess of ~~121°C (250°F)~~121 ºC (250 ºF); or

Repeated heavy abrasion, including mechanical wear and repeated scrubbing with industrial grade solvents, cleansers, or scouring agents.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2230 Fabric Coating

"Fabric coating" means any protective, decorative, or functional coating which is applied onto or impregnated into a textile fabric which is delivered to the coating line as a roll, unwound, and coated as a continuous substrate.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2250 Fabric Coating Line

"Fabric coating line" means a coating line in which any protective, decorative, or functional coating is applied onto or impregnated into a textile fabric which is delivered to the coating line as a roll, unwound, and coated as a continuous substrate.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2270 Federally Enforceable Limitations and Conditions

"Federally enforceable limitations and conditions" means all limitations and conditions which are enforceable by the Administrator of the USEPA, including ~~those~~ requirements developed ~~pursuant to~~under 40 CFR Parts 60 and 61; requirements within any applicable implementation plan; and any permit requirements established ~~pursuant to~~under 40 CFR 52.21 or 40 CFR 52.737 or under regulations approved ~~pursuant to~~under 40 CFR Part 51 Subpart I, 40 CFR 51.166 and 40 CFR Part 70.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2285 Feed Mill

"Feed mill" means a source or equipment at a source that produces food, including premixes, supplements, and concentrates~~,~~ for animal (non-human) consumption from grain, grain byproducts, or alfalfa and other ingredients~~,~~ without cooking, but not including wet or dry corn mills, soybean mills, flour mills, and ethanol plants.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2290 Fermentation Time

"Fermentation time" means the time elapsed between adding yeast to the dough and placing the product into the oven, expressed in hours to the nearest one-tenth hour.

(Source: Added at 19 Ill. Reg. 6823, effective May 9, 1995)

Section 211.2300 Fill

"Fill", for purposes of 35 Ill. Adm. Code 218.119 through 218.129 and 219.119 through 219.129, means ~~introduction of~~introducing VOL into a storage vessel but not necessarily to complete capacity.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2310 Final Repair Coat

"Final repair coat" means:

With respect to automobile or light-duty truck assembly or manufacturing ~~described in~~under 35 Ill. Adm. Code 215.204(a), 218.204(a)(1), and ~~218.219(a)(1)~~219.204(a)(1), a coating that is used to repaint topcoat that is damaged during vehicle assembly;

With respect to automobile or light-duty truck assembly or manufacturing ~~described in~~under 35 Ill. Adm. Code 218.204(a)(2) and ~~218.219(a)(2)~~219.204(a)(2), a coating applied to completely assembled motor vehicles or to parts that are not yet on a completely assembled vehicle to correct damage or imperfections in the coating. The curing of the coatings applied in these operations is accomplished at a lower temperature than that used for curing primer surfacer and topcoat.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2320 Finish Primer Surfacer

"Finish primer surfacer" means, for purposes of 35 Ill. Adm. Code 218 and 219, a coating applied with a wet film thickness of less than 10 mils ~~prior to~~before the application of a topcoat for purposes of providing corrosion resistance, adhesion of subsequent ~~coating~~coating s, a moisture barrier, or ~~promotion of~~promoting a uniform surface necessary for filling in surface imperfections.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2330 Firebox

"Firebox" means the chamber or compartment of a boiler or furnace in which materials are burned, but not the combustion chamber or afterburner of an incinerator.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.2340 Fire-Resistant Interior Coating

"Fire-resistant interior coating" means:

for civilian aircraft, fire-resistant interior coatings used on passenger cabin interior parts that are subject to the Federal Aviation Administration fireworthiness requirements;

for military aircraft, fire-resistant interior coatings used on parts subject to the flammability requirements of military specifications for aircraft; and

for space applications, fire-resistant interior coatings used on parts subject to NASA flammability requirements for space shuttles and space stations.

(Source: Added at 45 Ill. Reg. 3509, effective March 4, 2021)

Section 211.2350 Fixed-Roof Tank

"Fixed-roof tank" means a cylindrical shell with a permanently affixed roof.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.2355 Flare

"Flare" means an open combustor without enclosure or shroud.

(Source: Added at 33 Ill. Reg. 15754, effective August 31, 2009)

Section 211.2357 Flat Glass

"Flat glass" means, for purposes of Part 217, glass made of soda-lime recipe and produced into continuous flat sheets and other products listed in Standard Industrial Classification 3211.

(Source: Added at 33 Ill. Reg. 15754, effective August 31, 2009)

Section 211.2358 Flat Wood Paneling

"Flat ~~Wood Paneling~~wood paneling" means natural finish hardwood plywood panels, hardwood panels with Class II finishes, tileboard, exterior siding, and printed interior panels made of hardwood plywood or thin particleboard.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2359 Flat Wood Paneling Coating Line

"Flat ~~Wood Paneling Coating Line~~wood paneling coating line" means a coating line in which any protective, decorative, or functional coating is applied to flat wood paneling.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2360 Flexible Coating

"Flexible coating" means:

~~Prior to~~Before May 1, 2012, a paint with the ability to withstand dimensional changes.

On and after May 1, 2012, a coating that is required to comply with engineering specifications for impact resistance, mandrel bend, or elongation as defined by the original manufacturer of the equipment being coated.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2365 Flexible Operation Unit

"Flexible operation unit" means a chemical manufacturing process unit that manufactures different chemical products periodically by alternating raw materials or operating conditions.

(Source: Added at 19 Ill. Reg. 6823, effective May 9, 1995)

Section 211.2368 Flexible Packaging

"Flexible ~~Packaging~~packaging" means any package or part of a package, the shape of which can be readily changed. Flexible packaging includes~~, but is not limited to,~~ bags, pouches, liners, and wraps utilizing paper, plastic, film, aluminum foil, metalized or coated paper or film, or any combination of these materials. Shrink-wrap labels or wrappers (but not self-adhesive labels) printed on or in-line with a flexible packaging printing press are also considered to be flexible packaging. Flexible packaging does not include folding cartons, gift wraps, hot stamp foils, wall coverings, vinyl products, decorative laminates, floor coverings, or tissue products.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2369 Flexible Vinyl

"Flexible vinyl" means, for purposes of 35 Ill. Adm. Code 218 and 219, non-rigid polyvinyl chloride plastic with a 5 percent by weight plasticizer content.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.2370 Flexographic Printing

"Flexographic printing" means a roll printing technique in which the pattern to be applied is raised above the printing roll and the image carrier is made of rubber or other elastomeric materials.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.2390 Flexographic Printing Line

"Flexographic printing line" means a printing line performing flexographic printing.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.2400 Flight Test Coating

"Flight test coating" means a coating applied to aircraft other than missiles or single-use aircraft ~~prior to~~before flight testing to protect the aircraft from corrosion and to provide required marking during flight test evaluation.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2410 Floating Roof

"Floating roof" means a roof on a stationary tank, reservoir, or other container which moves vertically upon change in volume of the stored material.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.2412 Flush Cleaning at Aerospace Facilities

"Flush cleaning at aerospace facilities" means removal of contaminants, such as dirt, grease, oil, and coatings~~,~~ from an aerospace vehicle or component or from coating equipment by passing solvent over, into, or through the item being cleaned. The solvent may simply be poured into the item being cleaned and then drained~~,~~ or assisted by air or hydraulic pressure~~,~~ or by pumping. ~~Hand-wipe~~This definition does not include cleaning operations ~~in which~~using wiping, scrubbing, mopping, or other hand action~~ are used are not included in this definition~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2415 Fog Coat

"Fog coat" means, for purposes of 35 Ill. Adm. Code 218 and 219, a coating that is applied to a plastic part for the purpose of color matching without masking a molded-in texture. A fog coat ~~shall~~ must not be applied at a thickness of more than 0.5 mils of coating solids.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2420 Fossil Fuel

"Fossil fuel" means natural gas, petroleum, coal, or any form of solid, liquid, or gaseous fuel derived from such material.

(Source: Added at 25 Ill. Reg. 108, effective December 26, 2000)

Section 211.2425 Fossil Fuel-Fired

"Fossil fuel-fired" means the combustion of fossil fuel, alone or in combination with any other fuel, where fossil fuel actually combusted comprises or is projected to comprise more than 50 percent of the annual heat input on a btu basis during any year.

(Source: Added at 25 Ill. Reg. 108, effective December 26, 2000)

Section 211.2430 Fountain Solution

"Fountain solution" means the solution used in certain methods of printing which is applied to the image plate to maintain hydrophilic properties of the non-image areas.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.2450 Freeboard Height

"Freeboard height" means, for open top vapor degreasers, the distance from the top of the vapor zone to the top of the degreaser tank, and for cold cleaning degreasers, the distance from the solvent to the top of the degreaser tank.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.2470 Fuel Combustion Emission Unit or Fuel Combustion Emission Source

"Fuel combustion emission unit" or "Fuel combustion emission source" means any furnace, boiler, or similar equipment used for the primary purpose of producing heat or power by indirect heat transfer.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.2480 Fuel Tank Adhesive for Aerospace Applications

"Fuel tank adhesive for aerospace applications" means an adhesive used to bond components exposed to fuel. The adhesive must be compatible with fuel tank coatings.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2485 Fuel Tank Coating for Aerospace Applications

"Fuel tank coating for aerospace applications" means a coating applied to fuel tank components on an aerospace vehicle for the purpose of inhibiting corrosion and/or bacterial growth ~~inhibition~~ and to assure sealant adhesion in extreme environmental conditions.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2490 Fugitive Particulate Matter

"Fugitive particulate matter" means any particulate matter emitted into the atmosphere other than through a stack, provided that nothing in this definition or in 35 Ill. Adm. Code 212, Subpart K ~~shall exempt~~exempts any emission unit from ~~compliance~~ complying with ~~other~~ otherwise applicable provisions of 35 Ill. Adm. Code 212 ~~otherwise applicable~~ merely because of the absence of a stack.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2510 Full Operating Flowrate

"Full operating flowrate" means maximum operating capacity of the source, emission unit, or process unit, as applicable.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2525 Gasket/Gasket Sealing Material

"Gasket/gasket sealing material" means, for purposes of 35 Ill. Adm. Code 218 and 219, a fluid applied to coat a gasket or replace and perform the same function as a gasket, including room temperature vulcanization seal material.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.2530 Gas Service

"Gas service" means ~~that the~~ equipment or component that contains process fluid ~~that is~~ in the gaseous state at operating conditions.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2550 Gas/Gas Method

"Gas/gas method" means either of two methods ~~for determining~~relying only on gas phase measurements to determine VOM capture efficiency ~~which rely only on gas phase measurements~~. The first method requires construction of a temporary total enclosure (TTE) to ensure that all would-be fugitive emissions are measured. The second method uses the building or room which houses the coating line, printing line, or other emission unit as an enclosure. The second method requires that all other VOM lines or emission units within the building or room be shut down while the test is performed, but all fans and blowers within the building or room must be operated according to normal procedures.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2570 Gasoline

"Gasoline" means any petroleum distillate or petroleum distillate/alcohol blend having a Reid vapor pressure of 27.6 kPa or greater which is used as a fuel for internal combustion engines.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.2590 Gasoline Dispensing Operation or Gasoline Dispensing Facility

"Gasoline dispensing operation" or "Gasoline dispensing facility" means any site where gasoline is transferred from a stationary storage tank to a motor vehicle gasoline tank used to provide fuel to the engine of that motor vehicle.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.2610 Gel Coat

"Gel coat" means a resin coating, either pigmented or clear, applied to the surface of a mold~~,~~ that becomes an integral part of a polyester resin product~~,~~ and that provides a cosmetic enhancement and improves resistance to degradation from exposure to the elements.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2612 General Aviation

"General aviation" means that segment of civil aviation that encompasses all facets of aviation except air carriers, commuters, and military. General aviation includes charter and corporate-executive transportation, instruction, rental, aerial application, aerial observation, business, pleasure, and other special uses.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2613 General Aviation Rework Facility

"General aviation rework facility" means any aerospace facility with the majority of its revenues resulting from the reconstruction, repair, maintenance, repainting, conversion, or alteration of general aviation aerospace vehicles or components.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2615 General Work Surface

"General ~~Work Surface~~work surface" means, for purposes of 35 Ill. Adm. Code 218.187 and 219.187, an area of a medical device or pharmaceutical manufacturing facility where solvent cleaning is performed on work surfaces, but for which cleaning specifications are not required to be maintained in ~~accordance~~ compliance with criteria and procedures established to meet requirements of the United States Food and Drug Administration and/or other applicable regulatory agencies with authority over manufacturing operations for medical devices and/or pharmaceuticals. General work surfaces ~~shall~~ do not include items defined under "Janitorial Cleaning".

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2620 Generator

"Generator" means a device that produces electricity.

(Source: Added at 25 Ill. Reg. 108, effective December 26, 2000)

Section 211.2622 Glass Bonding Primer

"Glass bonding primer" means, for purposes of 35 Ill. Adm. Code 218 and 219, a primer applied to windshield or other glass~~,~~ or to body openings~~,~~ to prepare the glass or body opening for the application of glass bonding adhesives or the installation of adhesive bonded glass, including glass bonding/cleaning primers that perform both functions (cleaning and priming of the windshield or other glass or body openings) ~~prior to the application of~~before applying adhesive or ~~the installation of~~installing adhesive bonded glass.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2625 Glass Melting Furnace

"Glass melting furnace" means, for purposes of Part 217, a unit comprising a refractory vessel in which raw materials are charged and melted at high temperature to produce molten glass.

(Source: Added at 33 Ill. Reg. 15754, effective August 31, 2009)

Section 211.2630 Gloss Reducers

"Gloss reducers" means a low-gloss coating formulated to eliminate glare ~~for safety purposes~~ on interior surfaces of a vehicle~~,~~ for safety purposes as specified in the U.S. Department of Transportation Motor Vehicle Safety Standards.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2650 Grain

"Grain" means the whole kernel or seed of corn, wheat, oats, soybeans, and any other cereal or oil seed plant and the normal fines, dust, and foreign matter which ~~results~~ result from harvesting, handling, or conditioning. The grain ~~shall~~ must be unaltered by grinding or processing.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2670 Grain-Drying Operation

"Grain-drying operation" means any operation, excluding aeration, by which moisture is removed from grain and which typically uses forced ventilation with the addition of heat.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.2690 Grain-Handling and Conditioning Operation

"Grain-handling and conditioning operation" means a grain storage facility and its associate grain transfer, cleaning, drying, grinding, and mixing operations.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2710 Grain-Handling Operation

"Grain-handling operation" means any operation where one or more of the following grain-related processes (other than grain-drying operation, portable grain-handling equipment, and one-turn storage space, and excluding flour mills and feed mills) are performed: receiving, shipping, transferring, storing, mixing, or treating ~~of~~ grain or other processes ~~pursuant to~~under normal grain operations.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2730 Green-Tire Spraying

"Green tire spraying" means ~~the~~ spraying ~~of~~ green tires, both inside and outside, with release compounds which help remove air from the tire during molding and prevent the tire from sticking to the mold after curing.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2750 Green Tires

"Green tires" means assembled tires before molding and curing have occurred.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.2770 Gross Heating Value

"Gross heating value" means amount of heat produced when a unit quantity of fuel is burned to carbon dioxide and water vapor, and the water vapor condensed as described in ASTM D2015-66, D900-55, D1826-64, and D240-64, each incorporated by reference in Section 211.101(a)(3) ~~of this Part~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2790 Gross Vehicle Weight Rating

"Gross vehicle weight rating" means the value specified by the manufacturer as the maximum design loaded weight of a single vehicle.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.2795 Hand-Wipe Cleaning Operation at Aerospace Facilities

"Hand-wipe cleaning at aerospace facilities" means removing contaminants~~,~~ such as dirt, grease, oil, and coatings~~,~~ from an aerospace vehicle or component by physically rubbing it with ~~a~~ material such as a rag, paper, or cotton swab that has been moistened with a cleaning solvent.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2800 Hardwood Plywood

"Hardwood ~~Plywood~~plywood" means plywood whose surface layer is a veneer of hardwood.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2810 Heated Airless Spray

"Heated airless spray" means an airless spray coating method in which the coating is heated just ~~prior to~~before application.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2815 Heat Input

"Heat input" means the product of the gross heating value of the fuel and the amount of fuel combusted in a combustion device. Heat input does not include the heat derived from preheated combustion air, recirculated flue gases, or exhaust from other sources.

(Source: Added at 25 Ill. Reg. 108, effective December 26, 2000)

Section 211.2820 Heat Input Rate

"Heat input rate" means the amount of heat input used by a combustion device, divided by its operating time (in hrs).

(Source: Added at 25 Ill. Reg. 108, effective December 26, 2000)

Section 211.2825 Heat-Resistant Coating

"Heat-resistant coating" means, for purposes of 35 Ill. Adm. Code 218 and 219, a coating that must withstand a temperature of at least ~~204°C (400°F)~~204 °C (400 °F) during normal use.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2830 Heatset

"Heatset" means a class of lithography or letterpress that requires a heated dryer to solidify the printing inks.

(Source: Amended at 34 Ill. Reg. 9069, effective June 25, 2010)

Section 211.2840 Heatset Web Letterpress Printing Line

"Heatset ~~Web Letterpress Printing Line~~web letterpress printing line" means a letterpress printing line in which a continuous roll of substrate is fed through the printing press and an oven is used to solidify the printing inks.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2850 Heatset Web Offset Lithographic Printing Line

"Heatset web offset lithographic printing line" means a lithographic printing line in which a blanket cylinder is used to transfer ink from a plate cylinder to a substrate continuously fed from a roll or an extension process and an oven is used to solidify the printing inks.

(Source: Amended at 19 Ill. Reg. 6823, effective May 9, 1995)

Section 211.2965 High Precision Optic

"High ~~Precision Optic~~precision optic" means, for purposes of 35 Ill. Adm. Code 218.187 and 219.187, an optical element used in an electro-optical device that is designed to sense, detect, or transmit light energy, including specific wavelengths of light energy and changes in light energy levels.

(Source: Added at 34 Ill. Reg. 9069, effective June 25, 2010)

Section 211.2870 Heavy Liquid

"Heavy liquid" means liquid with a true vapor pressure of less than 0.3 kPa (0.04 psi) at ~~294.3°K (70°F)~~294.3 °K (70 °F) established in a standard reference text or as determined by ASTM method D2879-86, ~~(~~incorporated by reference in 35 Ill. Adm. Code 218.112 and 219.112~~)~~; or which has 0.1 Reid Vapor Pressure as determined by ASTM method D323-08, ~~(~~incorporated by reference in 35 Ill. Adm. Code 218.112 and 219.112~~)~~; or which when distilled requires a temperature of ~~421.95°K (300°F)~~421.95 °K (300 °F) or greater to recover 10 percent of the liquid as determined by ASTM method D86-82, ~~(~~incorporated by reference in 35 Ill. Adm. Code 215.105, 218.112 and 219.112~~)~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2890 Heavy Metals

"Heavy metals" means, for the purposes of Section 9.4 of the Act, elemental, ionic, or combined forms of arsenic, cadmium, mercury, chromium, nickel, and lead.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2910 Heavy Off-Highway Vehicle Products

"Heavy off-highway vehicle products" means heavy construction, mining, farming, or material handling equipment; heavy industrial engines; diesel-electric locomotives and associated power generation equipment; and the constituent parts of such equipment or engines.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.2930 Heavy Off-Highway Vehicle Products Coating

"Heavy off-highway vehicle products coating" means any protective, decorative, or functional coating applied onto the surface of heavy off-highway vehicle products. ~~However, a~~A high temperature aluminum coating applied to a diesel-electric locomotive in Cook County is not a heavy off-highway vehicle products coating.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2950 Heavy Off-Highway Vehicle Products Coating Line

"Heavy off-highway vehicle products coating line" means a coating line in which any protective, decorative, or functional coating is applied onto the surface of heavy off-highway vehicle ~~products~~. ~~However, application of~~Applying a high temperature aluminum coating to a diesel-electric locomotive in Cook County is not a heavy off-highway vehicle products coating line or part of a heavy off-highway vehicle products coating line.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2955 High Bake Coating

"High bake coating" means, for purposes of 35 Ill. Adm. Code 218 and 219, a coating that is designed to cure only at temperatures of more than ~~90°C (194°F)~~90 ºC (194 ºF).

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2956 High Build Primer Surfacer

"High build primer surfacer" means, for purposes of 35 Ill. Adm. Code 218 and 219, a coating applied with a wet film thickness of 10 mils or more ~~prior to the application of~~before applying a topcoat for purposes of providing corrosion resistance, adhesion of subsequent coatings, or a moisture barrier, or ~~promotion of~~promoting a uniform surface necessary for filling in surface imperfections.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2958 High Gloss Coating

"High gloss coating" means, for purposes of 35 Ill. Adm. Code 218 and 219, any coating that achieves at least 85 percent reflectance on a 60° meter when tested using ASTM Method D 523-89, incorporated by reference in Section 211.101 ~~of this Part~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2960 High-Performance Architectural Coating

"High-performance architectural coating" means, for purposes of 35 Ill. Adm. Code 218 and 219, a coating used to protect architectural subsections and that meets the requirements of the American Architectural Manufacturers Association~~Architectural Aluminum Manufacturer Association's~~ publication number AAMA 2604-05 (Voluntary Specification, Performance Requirements and Test Procedures for High Performance Organic Coatings on Aluminum Extrusions and Panels), incorporated by reference in Section 211.101 ~~of this Part~~, or 2605-05 (Voluntary Specification, Performance Requirements and Test Procedures for Superior Performing Organic Coatings on Aluminum Extrusions and Panels), incorporated by reference in Section 211.101 ~~of this Part~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2970 High Temperature Aluminum Coating

"High temperature aluminum coating" means a coating that is certified to withstand a temperature of ~~537.8°C (1000°F)~~537.8 °C (1000 °F) for 24 hours.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2980 High Temperature Coating

For purposes of 35 Ill. Adm. Code 218 and 219, "high temperature coating" means a coating that is certified to withstand a temperature of 538 °C (1000 °F) for 24 hours.

For purposes of 35 Ill. Adm. Code 219.204(r), "high temperature coating" means a coating designed to withstand temperatures of more than 177 °C (350 °F)

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.2990 High Volume Low Pressure (HVLP) Spray

"High volume low pressure (HVLP) spray" means equipment used to apply coatings by means of a spray gun which operates between 0.1 and 10 psig air pressure.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.3010 Hood

"Hood" means a partial enclosure or canopy for capturing and exhausting~~,~~ by means of a draft~~,~~ the organic vapors or other fumes produced from a coating line, printing line, or other emission unit.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3030 Hot Well

"Hot well" means the reservoir of a condensing unit receiving the condensate from a barometric condenser.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.3050 Housekeeping Practices

"Housekeeping practices" means those activities ~~specifically~~ defined in ~~the list of~~ housekeeping practices developed by the Joint EPA - Industry Task Force and ~~included herein~~listed under 35 Ill. Adm. Code 212.461.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3070 Incinerator

"Incinerator" means a combustion apparatus in which refuse is burned.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.3090 Indirect Heat Transfer

"Indirect heat transfer" means transfer of heat in such a way that the source of heat does not come into direct contact with process materials.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.3095 Indoor Floor Covering Installation Adhesive

"Indoor floor covering installation adhesive" means, for purposes of 35 Ill. Adm. Code 218 and 219, any adhesive intended by the manufacturer for use in ~~the installation of~~installing wood flooring, carpet, resilient tile, vinyl tile, vinyl backed carpet, resilient sheet and roll, or artificial grass. ~~Adhesives~~ This definition does not include adhesives used to install ceramic tile and perimeter bonded sheet flooring with vinyl backing onto a non-porous substrate, such as flexible vinyl~~, are excluded from this category~~.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.3100 Industrial Boiler

"Industrial boiler" means, for purposes of Part 217, an enclosed vessel in which water is heated and circulated either as hot water or as steam for heating, ~~or~~ for power~~,~~ or for both. This term does not include a heat recovery steam generator that captures waste heat from a combustion turbine and boilers serving a generator that has a nameplate capacity greater than 25 MWe and produces electricity for sale~~,~~ if ~~such~~ the boilers meet the applicability criteria under Subpart M of Part 217.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3110 Ink

"Ink" means a coating used in printing, impressing, or transferring words, pictures, designs, or other images onto a substrate.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3120 In-Line Repair

"In-line repair" means, for purposes of 35 Ill. Adm. Code 218 and 219, the operation performed and coatings applied to correct damage or imperfections in the topcoat on parts that are not yet on a completely assembled vehicle. The curing of the coatings applied in these operations is accomplished at essentially the same temperature as that used for curing the previously applied topcoat. "In-line repair" is also referred to as high bake repair or high bake reprocess. In-line repair is considered part of the topcoat operation.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.3130 In-Process Tank

"In-process tank" means, with respect to ~~manufacture of~~manufacturing pharmaceuticals, a container used for mixing, blending, heating, reacting, holding, crystallizing, evaporating, or cleaning operations.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3150 In-Situ Sampling Systems

"In-situ sampling systems" means nonextractive samplers or in-line samplers.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.3160 Insulation Covering

"Insulation covering" means material ~~that is~~ applied to foam insulation to protect the insulation from mechanical or environmental damage.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3170 Interior Body Spray Coat

"Interior body spray coat" means a can coating applied by spray to the interior of a can body.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.3180 Intermediate Release Coating

"Intermediate release coating" means a thin coating applied beneath topcoats to assist in removing the topcoat in depainting operations and generally to allow the use of less hazardous depainting methods.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3190 Internal-Floating Roof

"Internal-floating roof" means a cover or roof in a fixed-roof tank which rests upon and is supported by the volatile organic liquid being contained and is equipped with a closure seal or seals to close the space between the roof edge and tank shell.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.3210 Internal Transferring Area

"Internal transferring area" means areas and associated equipment used for conveying grain among the various grain operations.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.3215 Janitorial Cleaning

"Janitorial ~~Cleaning~~cleaning" means, for purposes of 35 Ill. Adm. Code 218.187 and 219.187, the cleaning of building or facility components, including~~, but not limited to,~~ floors, ceilings, walls, windows, doors, stairs, bathrooms, furnishings, and exterior surfaces of office equipment.~~;~~ ~~and~~The definition excludes the cleaning of work areas where manufacturing or repair activity is performed.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3230 Lacquers

"Lacquers" means, with respect to coating ~~of~~ wood furniture, any clear wood finishes formulated with nitrocellulose or synthetic resins to dry by evaporation without chemical reaction, including clear lacquer sanding sealers.

For purposes of 35 Ill. Adm. Code 219.204(r), "lacquers" means a clear or pigmented coating formulated~~,~~ with a nitrocellulose or synthetic resin~~,~~ to dry by evaporation without a chemical reaction. Lacquers are resoluble in their original solvent.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3240 Laminate

"Laminate" means, for purposes of 35 Ill. Adm. Code 218 and 219, a product made by bonding together two or more layers of material.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.3250 Large Appliance

"Large appliance" means any residential and commercial washers, dryers, ranges, refrigerators, freezers, water heaters, dishwashers, trash compactors, air conditioners, and other similar products.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.3270 Large Appliance Coating

"Large appliance coating" means any protective, decorative, or functional coating applied onto the surface of large appliances or to the constituent metal parts of large appliances, ~~(~~including~~, but not limited to,~~ doors, cases, lids, panels, and interior support parts~~) of large appliances~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3290 Large Appliance Coating Line

"Large appliance coating line" means a coating line in which any protective, decorative, or functional coating is applied onto the surface of large appliances or to the constituent metal parts of large appliances, ~~(~~including ~~but not limited to~~ doors, cases, lids, panels, and interior parts~~) of large appliances~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3300 Lean-Burn Engine

"Lean-burn engine" means any spark-ignited engine that is not a rich-burn engine.

(Source: Added at 31 Ill. Reg. 14271, effective September 25, 2007)

Section 211.3305 Letterpress Printing Line

"Letterpress Printing Line" means a web or sheetfed printing line that does not constitute a flexographic printing line, in which the image area is raised relative to the non-image area, and the ink is transferred to the substrate directly from the image surface.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3310 Light Liquid

"Light liquid" means VOM in the liquid state which is not defined as heavy liquid.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.3330 Light-Duty Truck

"Light-duty truck" means any motor vehicle with a gross vehicle weight rating of 3,850 kg or less, designed mainly to transport property.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3350 Light Oil

"Light oil" means a liquid condensed or absorbed from coke oven gas composed of benzene, toluene, and xylene.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.3355 Lime Kiln

"Lime kiln" means, for purposes of Part 217, an enclosed combustion device used to calcine lime mud, which consists primarily of calcium carbonate, into calcium oxide.

(Source: Added at 33 Ill. Reg. 15754, effective August 31, 2009)

Section 211.3360 Limited Access Space

"Limited access space" means internal surfaces or passages of an aerospace vehicle or component that cannot be reached to apply coatings without the aid of an airbrush or a spray gun extension for the application of coatings.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3370 Liquid/Gas Method

"Liquid/gas method" means either of two methods ~~for determining~~both gas phase and liquid phase measurements and analysis to determine VOM capture efficiency ~~which require both gas phase and liquid phase measurements and analysis~~. The first method requires ~~construction of~~constructing a temporary total enclosure (TTE) to ensure that all would-be fugitive emissions are measured. The second method uses the building or room ~~which houses~~housingthe coating line, printing line, or other emission unit as an enclosure. The second method requires that all other VOM lines or emission units within the building ot room be shut down while the test is performed, but all fans and blowers within the building or room must be operated according to normal procedures.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3390 Liquid-Mounted Seal

"Liquid-mounted seal" means a primary seal mounted in continuous contact with the liquid between the tank wall and the floating roof edge around the circumference of the roof.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.3410 Liquid Service

"Liquid service" means ~~that the~~ equipment or component ~~contains~~ containing process fluid ~~that is~~ in a liquid state at operating conditions.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.3430 Liquids Dripping

"Liquids dripping" means any visible leaking from a seal, including spraying, misting, clouding, and ice formation.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3450 Lithographic Printing Line

"Lithographic printing line" means a web or ~~sheetfed~~ sheet-fed printing line in which each roll printer uses a roll ~~where~~ on which both the image and non-image areas are essentially in the same plane (planographic).

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3470 Load-Out Area

"Load-out area" means any area where grain is transferred from the grain-handling operation to any vehicle for shipment or delivery.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.3475 Load Shaving Unit

"Load shaving unit" means, for purposes of Part 217, a device used to generate electricity for sale or use during high electric demand days, including ~~but not limited to~~ stationary reciprocating internal combustion engines or turbines.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3480 Loading Event

"Loading event" begins with ~~the~~ connecting ~~of~~ marine terminal storage tanks to a marine vessel by ~~means of~~ piping or hoses, ~~and~~ includes ~~the transfer of~~transferring liquid from the storage tank into the marine vessel, and ends with ~~the~~ disconnecting ~~of~~ the pipes or hoses.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3483 Long Dry Kiln

"Long dry kiln" means a kiln 14 feet or larger in outside diameter~~,~~ and 400 feet or larger in length, which ~~employs no preheating of~~does not preheat the feed in the cyclone chambers, and ~~the~~ has dry inlet feed to the kiln ~~is dry~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3485 Long Wet Kiln

"Long wet kiln" means a kiln 14 feet or larger in outside diameter~~,~~ and 400 feet or greater in length, which ~~employs no preheating of~~does not preheat the feed in the cyclone chambers, and ~~the~~ has slurry inlet feed to the kiln ~~is a slurry~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3487 Low-NO_x Burner

"Low-NO_x burner" means, for the purpose of 35 Ill. Adm. Code 217, Subpart T, a type of cement kiln burner system designed to lower NO_x formation by controlling flame turbulence, delaying fuel/air mixing, and establishing fuel-rich zones for initial combusting, which for firing of solid fuel by a kiln's main burner includes an indirect firing system or comparable technique for the main burner to lower the amount of primary combustion air supplied with the pulverized fuel. In an indirect firing system, one air stream is used to convey pulverized fuel from the grinding equipment and another air stream is used to supply primary combustion air to the kiln burner with the pulverized fuel, with intermediate storage of the fuel. In contrast, in a direct firing system, the air stream used to convey pulverized coal is then directly used as primary

combustion air without any intermediate storage of fuel, resulting in more primary combustion air than with an indirect system.

(Source: Added at 25 Ill. Reg. 4582, effective March 15, 2001)

Section 211.3490 Low Solvent Coating

"Low solvent coating" means a coating which contains less organic solvent than the conventional coatings used by the industry. Low solvent coatings include water-borne, higher solids, electro-deposition, and powder coatings.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3500 Lubricating Oil

"Lubricating oil" means an oil manufactured from petroleum or used oil for a use other than fuel, including engine oil, gear oil, transmission oil, turbine oil, hydraulic oil, aviation oil, and heat transfer oil., ~~as well as~~ This definition also includes synthetic oils manufactured to serve ~~such~~ these functions, base stock, and additive packages and individual additives for ~~such~~ lubricating oil including viscosity index improvers, dispersants, corrosion inhibitors, antioxidants, detergents, wear inhibitors, friction modifiers, and pour point depressants. ~~, but not including~~This definition does not include used oil.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3505 Lubricating Wax/Compound

"Lubricating wax/compound" means, for purposes of 35 Ill. Adm. Code 218 and 219, a protective lubricating material applied to vehicle hubs and hinges.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.3510 Magnet Wire

"Magnet wire" means aluminum or copper wire which may ~~subsequently~~ be used in an electromagnetic device.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3530 Magnet Wire Coating

"Magnet wire coating" means any electrically insulating varnish or enamel or other protective, decorative, or functional coating applied onto the surface of magnet wire.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3550 Magnet Wire Coating Line

"Magnet wire coating line" means a coating line in which any electrically insulating varnish or enamel or other protective, decorative, or functional coating is applied onto the surface of magnet wire.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.3555 Maintenance Cleaning

"Maintenance ~~Cleaning~~cleaning" means, for purposes of 35 Ill. Adm. Code 218.187 and 219.187, a solvent cleaning operation or activity carried out to ensure that general work areas where manufacturing or repair activity is performed remain clean, and to clean tools, machinery, molds, forms, jigs, and equipment. This definition does not include the cleaning of coatings, adhesives, or ink application equipment.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3570 Major Dump Pit

"Major dump pit" means any dump pit with an annual grain through-put of more than 300,000 bushels, or which receives more than 40% of the annual grain through-put of the grain-handling operation.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.3590 Major Metropolitan Area (MMA)

"Major Metropolitan Area (MMA)" means any county or group of counties ~~which is defined by~~listed in the following Table:

MAJOR METROPOLITAN AREAS (MMAs) IN ILLINOIS ~~(MMA's)~~

MMA	COUNTIES INCLUDED IN MMA
Champaign-Urbana	Champaign
Chicago	Cook, Lake, Will, DuPage, McHenry, Kane, Grundy, Kendall, Kankakee
Decatur	Macon
Peoria	Peoria, Tazewell
Rockford	Winnebago
Rock Island - Moline	Rock Island
Springfield	Sangamon
St. Louis (Illinois)	St. Clair, Madison
Bloomington - Normal	McLean

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3610 Major Population Area (MPA)

"Major Population Area (MPA)" means areas of major population concentration in Illinois, as described below:

The area within the counties of Cook; Lake; DuPage; Will; the townships of Burton, Richmond, McHenry, Greenwood, Nunda, Door, Algonquin, and Grafton and the municipality of Woodstock, plus a zone extending two miles beyond the boundary ~~of said municipality~~Woodstock, ~~located~~ in McHenry County; the townships of Dundee, Rutland, Elgin, Plato, St. Charles, Campton, Geneva, Blackberry, Batavia, Sugar Creek, and Aurora ~~located~~ in Kane County; and the municipalities of Kankakee, Bradley, and Bourbonnais, plus a zone extending two miles beyond the boundaries of ~~said~~ those municipalities, in Kankakee County.

The area within the municipalities of Rockford and Loves Park, plus a zone extending two miles beyond the boundaries of ~~said~~ those municipalities. The area within the municipalities of Rock Island, Moline, East Moline, Carbon Cliff, Milan, Oak Grove, Silvis, Hampton, Greenwood, and Coal Valley, plus a zone extending two miles beyond the boundaries of ~~said~~ those municipalities.

The area within the municipalities of Galesburg and East Galesburg, plus a zone extending two miles beyond the boundaries of ~~said~~ those municipalities.

The area within the municipalities of Bartonville, Peoria, and Peoria Heights, plus a zone extending two miles beyond the boundaries of ~~said~~ those municipalities.

The area within the municipalities of Pekin, North Pekin, Marquette Heights, Creve Coeur, and East Peoria, plus a zone extending two miles beyond the boundaries of ~~said~~ those municipalities.

The area within the municipalities of Bloomington and Normal, plus a zone extending two miles beyond the boundaries of ~~said~~ those municipalities. The area within the municipalities of Champaign, Urbana, and Savoy, plus a zone extending two miles beyond the boundaries of ~~said~~ those municipalities.

The area within the municipalities of Decatur, Mt. Zion, Harristown, and Forsyth, plus a zone extending two miles beyond the boundaries of ~~said~~ those municipalities.

The area within the municipalities of Springfield, Leland Grove, Jerome, Southern View, Grandview, Sherman, and Chatham, plus a zone extending two miles beyond the boundaries of ~~said~~ those municipalities.

The area within the townships of Godfrey, Foster, Wood River, Fort Russell, Chouteau, Edwardsville, Venice, Nameoki, Alton, Granite City, and Collinsville ~~located~~ in Madison County; and the townships of Stites, Canteen, Centreville, Caseyville, St. Clair, Sugar Loaf, and Stookey ~~located~~ in St. Clair County.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3620 Manually Operated Equipment

"Manually operated equipment" means a machine or tool that is handheld, such as a handheld circular saw or compressed air chisel; a machine or tool where the workpiece is held or manipulated by hand, such as a bench grinder; a machine or tool where the tool or bit is manipulated by hand, such as a lathe or drill press; and any dust collection system which is part of such machine or tool~~; but not including~~. This definition does not include any machine or tool where the extent of manual operation is to control power to the machine or tool ~~and not including~~or any central dust collection system serving more than one machine or tool.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3630 Manufacturing Process

"Manufacturing process" means a method ~~whereby~~ through which a process emission unit or series of process emission units is used to convert raw materials, feed stocks, subassemblies, or other constituent parts into a product, either for sale or for use in a subsequent manufacturing process.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3650 Marine Terminal

"Marine terminal" means a source that loads and unloads water craft.

(Source: Amended at 18 Ill. Reg. 16379, effective October 25, 1994)

Section 211.3660 Marine Vessel

"Marine vessel" means any tanker, freighter, barge, or other watercraft which transports solid or liquid freight, including grain, coal, rock, petroleum liquid, or crude oil in bulk.

(Source: Added at 18 Ill. Reg. 16379, effective October 25, 1994)

Section 211.3665 Mask Coating

"Mask coating" means, for purposes of 35 Ill. Adm. Code 218 and 219, a thin film coating applied through a template to coat a small portion of a substrate.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.3670 Material Recovery Section

"Material recovery section" means, with respect to ~~manufacture of~~manufacturing polystyrene resin, any equipment designed to transport and recover styrene monomer and other impurities from other products and by-products in a polystyrene plant, including ~~but not limited to~~ the styrene ~~devolatizer~~ devolatilizer unit and styrene recovery unit.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3690 Maximum Theoretical Emissions

"Maximum theoretical emissions" means the quantity of volatile organic material emissions that theoretically could be emitted by a stationary source before add-on controls based on the design capacity or maximum production capacity of the source and 8760 hours per year. The design capacity or maximum production capacity includes use of coating(s) or ink(s) with the highest volatile organic material content actually used in practice by the source~~, provided,~~; however, the Agency ~~shall~~must, when appropriate, and ~~upon request by~~when the permit applicant requests, limit the "maximum theoretical emissions" of a source by ~~the imposition of~~imposing conditions in a federally enforceable operating permit for ~~such~~ the source. ~~Such~~ These conditions ~~shall~~ must not be inconsistent with requirements of the Clean Air Act, as amended, or any applicable requirements established by the Board. ~~Such~~ These conditions ~~shall~~ must be established in place of design capacity or maximum production capacity in calculating the "maximum theoretical emissions" for ~~such~~ the source and may include~~, among other things, the establishment of~~ establishing production limitations, capacity limitations, or limitations on the volatile organic material content of coatings or inks, or the hours of operation of any emission unit, or a combination of any such limitations. Production or capacity limitations ~~shall~~ must be established ~~on a basis of~~for no longer than one month except ~~in those cases where a limit spanning~~ when a longer period of time is appropriate. In such cases, a limit or limitation must not exceed an annual limit rolled on a basis of at most a month. ~~; that is, for~~For example, a monthly production or a capacity level must be determined for each parameter subject to a production or capacity limitation and added to the eleven prior monthly levels for monthly comparison with the annual limit. Any production or capacity limitations ~~shall~~ must be verified through appropriate recordkeeping.

~~(Board Note~~BOARD NOTE: ~~The~~ USEPA may deem operating permits which do not conform to the operating permit program requirements and the requirements of USEPA's underlying regulations, including the requirement that limitations be quantifiable and enforceable as a practical matter, not "federally enforceable."~~)~~

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3695 Maximum True Vapor Pressure

"Maximum true vapor pressure" means the equilibrium partial pressure exerted by stored VOL at the temperature equal to the highest calendar-month average of the VOL storage temperature for VOLs stored above or below the ambient temperature or at the local maximum monthly average temperature of 75 °F for the Chicago area as defined at 35 Ill. Adm. Code 218.100 or 79 °F for the Metro-East area as defined at 35 Ill. Adm. Code 219.100 for VOLs stored at the ambient temperature, as determined:

a) In ~~accordance~~ compliance with methods ~~described~~ in American Petroleum Institute bulletin 2517, Evaporation Loss from External Floating Roof Tanks, incorporated by reference at 35 Ill. Adm. Code 218.112 and 219.112; or

b) By ASTM Method D2879-83, incorporated by reference at 35 Ill. Adm. Code 218.112(a)(1) and 219.112(a)(1).

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3705 Medical Device

"Medical ~~Device~~device~~"~~" means, for purposes of 35 Ill. Adm. Code 218.187 and 219.187, an instrument, apparatus, implement, machine, contrivance, implant, in vitro reagent, or other similar article, including any component or accessory, that meets one or more of the following conditions:

a) it is intended for use in the diagnosis of disease or other conditions, or in the cure, mitigation, treatment, or prevention of disease;

b) it is intended to affect the structure or any function of the body; or

c) it is defined in the National Formulary or the United States Pharmacopeia, or any supplement to them.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3707 Medical Device and Pharmaceutical Manufacturing

"Medical ~~Device~~ device and ~~Pharmaceutical Manufacturing~~pharmaceutical manufacturing" means, for purposes of 35 Ill. Adm. Code 218.187 and 219.187, the collection of equipment and activities to prepare, utilize, maintain, and repair work areas~~,~~ in order to accomplish one or more steps in preparing a medical device or pharmaceutical for its intended use. Manufacturing is typically, but not always, conducted in accordance with criteria and procedures established to meet requirements of the United States Food and Drug Administration and/or other applicable regulatory agencies with authority over manufacturing operations for global sales of medical

devices and/or pharmaceuticals. Work areas and equipment ~~shall~~ must include all machinery, tools, equipment, rooms, tables, countertops, and facilities for maintaining employee health and safety that are subject to ~~such~~ those criteria and procedures.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3710 Metal Furniture

"Metal furniture" means a piece of furniture ~~piece~~ including~~, but not limited to,~~ tables, chairs, waste baskets, beds, desks, lockers, benches, shelving, file cabinets, lamps, and room dividers made in whole or in part of metal.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3730 Metal Furniture Coating

"Metal furniture coating" means any protective, decorative, or functional coating applied onto the surface of any metal furniture or any metal part which will be assembled with other metal, wood, fabric, plastic, or glass parts to form metal furniture. ~~However,~~This definition does not include an adhesive ~~is not a metal furniture coating~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3750 Metal Furniture Coating Line

"Metal furniture coating line" means a coating line in which any protective, decorative, or functional coating is applied onto the surface of any metal furniture or any metal part which will be assembled with other metal, wood, fabric, or glass parts to form metal furniture. However, ~~application of~~applying an adhesive is not a metal furniture coating line or part of a metal furniture coating line.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3755 Metalized Epoxy Coating

"Metalized epoxy coating" means an epoxy coating that contains relatively large quantities of metallic pigmentation for appearance and/or added protection.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3760 Metallic Coating

"Metallic coating" means, for purposes of 35 Ill. Adm. Code 218 and 219, a coating that contains more than 5 grams of pure elemental metal, or a combination of elemental metals, per liter of coating as applied.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.3770 Metallic Shoe-Type Seal

"Metallic shoe-type seal" means a primary or secondary seal constructed of metal sheets (shoes) ~~which are~~ joined together to form a ring, springs or levers which attach the shoes to the floating roof and hold the shoes against the tank wall, and a coated membrane ~~which is~~ suspended from the shoes to the floating roof.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3775 Metal to Urethane/Rubber Molding or Casting Adhesive

"Metal to urethane/rubber molding or casting adhesive" means, for purposes of 35 Ill. Adm. Code 218 and 219, any adhesive intended by the manufacturer to bond metal to high density or elastomeric urethane or molded rubber materials~~,~~ in heater molding or casting processes~~,~~ to fabricate products such as rollers for computer printers or other paper handling equipment.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.3780 Mid-Kiln Firing

"Mid-kiln firing" means, for the purposes of 35 Ill. Adm. Code 217, Subpart T, a secondary firing in a kiln system by injecting fuel at an intermediate point in the kiln system using a specially designed fuel injection mechanism for the purposes of decreasing NO_x emissions through burning part of the fuel at a lower temperature, and reducing conditions at the fuel injection point that may destroy some of the NO_x formed upstream in the kiln system.

(Source: Added at 25 Ill. Reg. 4582, effective March 15, 2001)

Section 211.3785 Military Specification Coating

"Military specification coating" means, for purposes of 35 Ill. Adm. Code 218 and 219, a coating that has a formulation approved by a United States military agency for use on military equipment.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.3790 Miscellaneous Fabricated Product Manufacturing Process

"Miscellaneous fabricated product manufacturing process" means:

A manufacturing process involving one or more of the following applications, including any drying and curing of formulations, and capable of emitting VOM:

Adhesives to fabricate or assemble parts or products;

Asphalt solutions to paper or fiberboard;

Asphalt to paper or felt;

Coatings or dye to leather;

Coatings to plastic;

Coatings to rubber or glass;

Disinfectant material to manufactured items;

Plastic foam scrap or "fluff" from the manufacture of foam containers and packaging material to form resin pellets;

Resin solutions to fiber substances;

Rubber solutions to molds; or

Viscose solutions for food casings.

~~The storage~~This definition includes storing and handling ~~of~~ formulations and using and handling organic liquids and other substances used for clean-up operations associated with ~~the~~ a process described above ~~and the use and handling of organic liquids and other substances for clean-up operations associated with the process described in this definition would be included~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3810 Miscellaneous Formulation Manufacturing ~~Pocess~~Process

"Miscellaneous formulation manufacturing process" means:

A manufacturing process which compounds one or more of the following and is capable of emitting VOM:

Adhesives;

Asphalt solutions;

Caulks, sealants, or waterproofing agents;

Coatings, other than paint and ink;

Concrete curing compounds;

Dyes;

Friction materials and compounds;

Resin solutions;

Rubber solutions; or

Viscose solutions.

~~The storage~~This definition includes storing and handling ~~of~~ formulations and using and handling organic liquids and other substances for clean-up operations associated with ~~the~~ a process described above~~, and the use and handling of organic liquids and other substances for clean-up operations associated with the process described in this definition would be included~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3820 Miscellaneous Industrial Adhesive Application Operation

"Miscellaneous industrial adhesive application operation" means, for purposes of Subparts JJ of 35 Ill. Adm. Code 218 and 219, a regularly occurring industrial process consisting of one or more adhesive applicators and any associated drying area and/or oven in which an adhesive is applied, dried, and/or cured.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.3830 Miscellaneous Metal Parts and Products

"Miscellaneous metal parts and products" means, for the purpose of 35 Ill. Adm. Code 215~~.~~, Subpart F, ~~shall include~~ farm machinery, garden machinery, small appliances, commercial machinery, industrial machinery, fabricated metal products, and any other industrial category in which metal parts or products under the Standard Industrial Classification Code for Major Groups 33, 34, 35, 36, 37, 38, or 39 are coated, ~~with the exception of~~except the following: coating lines subject to 35 Ill. Adm. Code 215.204(a) through (i) and (k), architectural coatings, automobile or light-duty truck refinishing, the exterior of marine vessels, and the customized top coating of automobiles and trucks if production is less than thirty-five vehicles per day.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3850 Miscellaneous Metal Parts and Products Coating

"Miscellaneous metal parts and products coating" means, for purposes of 35 Ill. Adm. Code 218 and 219, any protective, decorative, or functional coating applied onto the surface of any metal part or metal product, even if attached to or combined with a nonmetal part or product;

a) Including underbody anti-chip (e.g., underbody plastisol) automobile and light-duty truck coatings;

b) Not including the following coatings, which are subject to separate regulations: can coatings; coil coatings; metal furniture coatings; large appliance coatings; magnet wire coatings; prime coat, primer surfacer coat, topcoat, and final repair coat for automobile and light-duty trucks; and aerospace coatings subject to the requirements of 35 Ill. Adm. Code 219.204(r); and

c) Not including the following coatings: architectural coatings, automobile or light-duty truck refinishing coatings, coatings applied to the exterior of marine vessels, coatings applied to the exterior of airplanes, customized topcoat for automobiles and trucks if production is less than 35 vehicles per day, and high temperature aluminum coating applied to diesel-electric locomotives in Cook County.

d) For purposes of 35 Ill. Adm. Code Parts 218 and 219, Subpart F, the definition does not include decorative, protective, or functional materials that consist only of protective oils for metal, acids, bases, or any combination of these substances. For this purpose, "protective oil" means an organic material that is applied to metal for the purpose of providing lubrication or protection from corrosion without forming a solid film, and includes lubricating oils, evaporative oils (including those that evaporate completely), and extrusion oils. Protective oils used on miscellaneous metal parts and products include magnet wire lubricants and soft temporary protective coatings that are removed before installation or further assembly of a part or component.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3870 Miscellaneous Metal Parts or Products Coating Line

"Miscellaneous metal parts or products coating line" means, for purposes of 35 Ill. Adm. Code 218 and 219, a coating line in which any protective, decorative, or functional coating is applied onto the surface of any metal part or metal product, even if attached to or combined with a nonmetal part or product:

a) Including underbody anti-chip (e.g., underbody plastisol) automobile and light-duty truck coatings;

b) Not including the following coatings, which are subject to separate regulations: can coatings; coil coatings; metal furniture coatings; large appliance coatings; magnet wire coatings; prime coat, primer surfacer coat, topcoat, and final repair

coat for automobile and light-duty trucks; and aerospace coatings subject to the requirements of 35 Ill. Adm. Code 219.204(r); and

c) Not including the following coatings: architectural coatings, automobile or light-duty truck refinishing coatings, coatings applied to the exterior of marine vessels, coatings applied to the exterior of airplanes, customized topcoat for automobiles and trucks if production is less than 35 vehicles per day, and high temperature aluminum coating applied to diesel-electric locomotives in Cook County.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3890 Miscellaneous Organic Chemical Manufacturing Process

"Miscellaneous organic chemical manufacturing process" means:

A manufacturing process which produces~~,~~ by chemical reaction~~,~~ one or more of the following organic compounds or mixtures of organic compounds and which is capable of emitting volatile organic material (VOM):

Chemicals listed in Appendix A of 35 Ill. Adm. Code 215, 218, or 219, as applicable;

Chlorinated and sulfonated compounds;

Cosmetic, detergent, soap, or surfactant intermediaries or specialties and products;

Disinfectants;

Food additives;

Oil and petroleum product additives;

Plasticizers;

Resins or polymers;

Rubber additives;

Sweeteners; or

Varnishes.

~~The storage~~This definition includes storing and handling ~~of~~ formulations and using and handling organic liquids and other substances for clean-up

operations associated with ~~the~~ a process described above ~~and the use and handling of organic liquids and other substances for clean-up operations associated with the process described in this definition would be included~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3910 Mixing Operation

"Mixing operation" means the operation of combining two or more ingredients, of which at least one is a grain.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.3915 Mobile Equipment

"Mobile equipment" means any equipment which may be drawn or is capable of being driven on a roadway, other than motor vehicles, including~~, but not limited to~~ truck or automobile trailers, farm machinery, construction equipment, street cleaners, and golf carts.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3920 Mold Release Coating for Aerospace Applications

"Mold release coating for aerospace applications" means a coating applied to a mold surface to prevent the molded piece from sticking to the mold as it is removed.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3925 Mold Seal Coating

"Mold seal coating" means, for purposes of 35 Ill. Adm. Code 218 and 219, the initial coating applied to a new mold or a repaired mold to provide a smooth surface that, when coated with a mold release coating, prevents products from sticking to the mold.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.3930 Monitor

"Monitor" means to measure and record.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.3950 Monomer

"Monomer" means a relatively low-molecular-weight organic compound that may combine with itself or other similar compounds by a cross-linking reaction to become a polymer.

(Source: Added at 18 Ill. Reg. 1253, effective January 18, 1994)

Section 211.3960 Motor Vehicles

"Motor vehicles" means automobiles, trucks, vans, motorcycles, or buses.

(Source: Added at 19 Ill. Reg. 6823, effective May 9, 1995)

Section 211.3961 Motor Vehicle Adhesive

"Motor vehicle adhesive" means, for purposes of 35 Ill. Adm. Code 218 and 219, an adhesive, including glass bonding adhesive, used at a facility that is not an automobile or light-duty truck assembly coating facility, applied for the purpose of bonding two vehicle surfaces together without regard to the substrates involved.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.3965 Motor Vehicle Refinishing

"Motor vehicle refinishing" means any application of coatings to motor vehicles, mobile equipment, or their parts and components, which is subsequent to the original coating applied at an original equipment manufacturing plant.

(Source: Added at 19 Ill. Reg. 6823, effective May 9, 1995)

Section 211.3966 Motor Vehicle Weatherstrip Adhesive

"Motor vehicle weatherstrip adhesive" means, for purposes of 35 Ill. Adm. Code 218 and 219, an adhesive, used at a facility that is not an automobile or light-duty truck assembly coating facility, applied to weatherstripping materials for the purpose of bonding the weatherstrip material to the surface of the vehicle.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.3967 Mouth Waterproofing Sealant

"Mouth waterproofing sealant" means~~, for purposes of 35 Ill. Adm. Code 218.204(q)(1) and 219.204(q)(1),~~ a coating applied in the manufacture of ammunition to provide a waterproof barrier between a shellcase mouth and bullet.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3968 Multi-Colored Coating

"Multi-colored coating" means, for purposes of 35 Ill. Adm. Code 218 and 219, a coating that exhibits more than one color when applied, and which is packaged in a single container and applied in a single coat.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.3969 Multi-Component Coating

"Multi-component coating" means, for purposes of 35 Ill. Adm. Code 218 and 219, a coating requiring the addition of a separate reactive resin, commonly known as a catalyst or hardener, before application to form an acceptable dry film.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.3970 Multiple Package Coating

"Multiple package coating" means a coating made from more than one different ingredient which must be mixed ~~prior to~~before using and has a limited pot life due to the chemical reaction which occurs upon mixing.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.3975 Multipurpose Construction Adhesive

"Multipurpose construction adhesive" means, for purposes of 35 Ill. Adm. Code 218 and 219, any adhesive used in the installation or repair of various construction materials, including ~~but not limited to~~ drywall, subfloor, panel, fiberglass reinforced plastic (FRP), ceiling tile, and acoustical tile.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3980 Nameplate Capacity

"Nameplate capacity" means the maximum electrical generating output (in MWe) that a generator can sustain over a specified period of time when not restricted by seasonal or other deratings as measured in ~~accordance~~ compliance with ~~the~~ United States Department of Energy standards.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3985 Natural Finish Hardwood Plywood Panel

"Natural ~~Finish Hardwood Plywood Panel~~finish hardwood plywood panel" means a panel whose original grain pattern is enhanced by essentially transparent finishes frequently supplemented by filters and toners.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.3990 New Grain-Drying Operation (Repealed)

(Source: Repealed at 20 Ill. Reg.7590, effective May 22, 1996)

Section 211.4010 New Grain-Handling Operation (Repealed)

(Source: Repealed at 20 Ill. Reg.7590, effective May 22, 1996)

Section 211.4030 No Detectable Volatile Organic Material Emissions

"No detectable volatile organic material emissions" means a discharge of volatile organic material into the atmosphere as indicated by an instrument reading of less than 500 ppm above background as determined in ~~accordance~~ compliance with 40 CFR 60.485(c)~~,~~ ~~(~~incorporated by reference in 35 Ill. Adm. Code 215.105, 218.112 and 219.112~~)~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.4050 Non-Contact Process Water Cooling Tower

"Non-contact process water cooling tower" means a towerlike device in which water is cooled by contact with atmospheric air and evaporation, where ~~such~~ the water has been or will be used for cooling ~~of~~ a process stream where VOM is present without intentional direct contact of the cooling water and process stream.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.4052 Non-Convertible Coating

"Non-convertible coating" means, for purposes of Section 211.1877, a coating that dries by solvent evaporation with no change in the chemical nature of the binder. The coating remains soluble in the original solvent after drying.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.4055 Non-Flexible Coating

"Non-flexible coating" means a paint without the ability to withstand dimensional changes.

(Source: Added at 19 Ill. Reg. 6823, effective May 9, 1995)

Section 211.4065 Non-Heatset

""Non-heatset" means a class of lithography or letterpress that does not require a heated dryer to solidify the printing inks. Ultraviolet-cured and electron beam-cured inks are considered non-heatset.

(Source: Amended at 34 Ill. Reg. 9069, effective June 25, 2010)

Section 211.4066 Nonstructural Adhesive for Aerospace Applications

"Nonstructural adhesive for aerospace applications" means an adhesive that bonds nonload bearing aerospace components in noncritical applications and is not ~~covered~~ included in any other specialty adhesive categories ~~listed~~ in 35 Ill. Adm. Code 219.204(r)(2).

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.4067 NO_X Trading Program

For the purposes of 35 Ill. Adm. Code 217, Subparts U and W, ~~the~~ "NO_X Trading Program" ~~shall mean~~means the requirements of 35 Ill. Adm. Code 217, Subparts U and W, and those provisions of the federal NO_X Trading Program, 40 CFR 96, incorporated by reference ~~therein~~at 35 Ill. Adm. Code 217.104.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.4070 Offset

"Offset" means, with respect to printing, use of a blanket cylinder to transfer ink from the plate cylinder to the surface to be printed.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.4080 One-Component Coating

"One-component coating" means, for purposes of 35 Ill. Adm. Code 218 and 219, a coating that is ready for application as it comes out of its container to form an acceptable dry film. A thinner added to a coating to reduce the viscosity is not considered a component~~,~~ and ~~therefore~~ does not ~~impact~~ affect the coating's classification as a one-component coating or multi-component coating.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.4090 One Hundred Percent Acid

"One hundred percent acid" means, with respect to sulfuric and nitric acids, acid with a specific gravity of 1.8205 at ~~30° C~~30 °C in the case of sulfuric acid and 1.4952 at ~~30° C~~30 °C in the case of nitric acid.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.4110 One-Turn Storage Space

"One-turn storage space" means ~~that~~ space used to store grain with a total annual through-put not ~~in excess of~~exceeding the total bushel storage of that space.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.4130 Opacity

"Opacity" means ~~that~~ the fraction of light, expressed in percent, which when transmitted from a source through a smoke-obscured path, is prevented from reaching the observer or instrument receiver.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.4150 Opaque Stains

"Opaque stains" means all stains that are not semi-transparent stains.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.4170 Open Top Vapor Degreasing

"Open top vapor degreasing" means the batch process of cleaning and removing soils from surfaces by condensing hot solvent vapor on the colder metal parts.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.4190 Open-Ended Valve

"Open-ended valve" means any valve, except pressure relief devices, having one side of the valve in contact with process fluid and one side open to the atmosphere, either directly or through open piping.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.4210 Operator of a Gasoline Dispensing Operation or Operator of a Gasoline Dispensing Facility

"Operator of gasoline dispensing operation" or "Operator of a gasoline dispensing facility" means any person who is the lessee of or operates, controls, or supervises a gasoline dispensing operation or a gasoline dispensing facility.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.4215 Optical Antireflection Coating

"Optical antireflection coating" means a coating with a low reflectance in the infrared and visible wavelength ranges that is used for antireflection on or near optical and laser hardware.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.4220 Optical Coating

"Optical coating" means, for purposes of 35 Ill. Adm. Code 218 and 219, a coating applied to an optical lens.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.4230 Organic Compound

"Organic compound" means any compound of carbon, excluding carbon monoxide, carbon dioxide, carbonic acid, metallic carbides or carbonates, and ammonium carbonate.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.4250 Organic Material and Organic Materials

a) "Organic materials" means, for the purposes of Section 9.4 of the Act, any chemical compound of carbon, including diluents and thinners which are liquids at standard conditions and which are used as dissolvers, viscosity reducers, or cleaning agents, including polychlorinated dibenzo-p-dioxins, polychlorinated dibenzofurans, and polynuclear aromatic hydrocarbons but excluding methane, carbon monoxide, carbon dioxide, carbonic acid, metallic carbonic acid, metallic carbide, metallic carbonates, and ammonium carbonate ~~are not organic materials~~.

b) "Organic material" means, for the purposes of 35 Ill. Adm. Code 210, 211, 215, 218, and 219, any chemical compound of carbon including diluents and thinners which are liquids at standard conditions and which are used as dissolvers, viscosity reducers, or cleaning agents, but excluding methane, acetone, carbon monoxide, carbon dioxide, carbonic acid, metallic carbonic acid, metallic carbide, metallic carbonates, and ammonium carbonate.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.4260 Organic Solvent

"Organic solvent" means a solvent that consists of organic mineral spirits, methyl ethyl ketone, ethanol, ether, toluene, or other organic materials other than soap, detergent, surfactants, lubricating oil, wax, vegetable oil, grease, glycerin, or animal fat. For purposes of 35 Ill. Adm.

Code 201, Subpart F, a solvent which is a mixture ~~shall be~~is an organic solvent if it contains more than 5 percent by volume of such organic materials.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.4270 Organic Vapor

"Organic vapor" means the gaseous phase of an organic material or a mixture of organic materials present in the atmosphere.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.4280 Other Glass

"Other glass" means, for purposes of Part 217, glass that is neither container glass, as ~~that term is~~ defined in Section 211.1435, nor flat glass, as ~~that term is~~ defined in Section 211.2357.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.4285 Outdoor Floor Covering Installation Adhesive

"Outdoor floor covering installation adhesive" means, for purposes of 35 Ill. Adm. Code 218 and 219, any adhesive intended by the manufacturer for use in ~~the installation of~~installing floor covering that is not in an enclosure and that is exposed to ambient weather conditions during normal use.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.4290 Oven

"Oven" means, with respect to a coating line or printing line, a chamber within which heat is used for one or more of the following purposes: dry, bake, cure, or polymerize a coating or ink.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.4310 Overall Control

"Overall control" means the product of the capture efficiency and the control device efficiency.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.4330 Overvarnish

"Overvarnish" means a transparent coating applied directly over ink or coating.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.4350 Owner of a Gasoline Dispensing Operation or Owner of a Gasoline Dispensing Facility

"Owner of a gasoline dispensing operation" or "Owner of a gasoline dispensing facility" means any person who has legal or equitable title to a stationary storage tank at a gasoline dispensing operation.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.4370 Owner or Operator

"Owner or operator" means any person who owns, operates, leases, controls, or supervises a source, an emission unit, or air pollution control equipment.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.4390 Packaging Rotogravure Printing

"Packaging rotogravure printing" means rotogravure printing upon paper, paper board, metal foil, plastic film, and other substrates~~,~~ which ~~are~~is, in subsequent operations, formed into packaging products or labels for articles to be sold.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.4410 Packaging Rotogravure Printing Line

"Packaging rotogravure printing line" means a rotogravure printing line performing packaging rotogravure printing.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.4430 Pail

"Pail" means any cylindrical shipping container of 1 to 12-gallon capacity and constructed of 29-gauge and heavier material.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.4450 Paint Manufacturing Source or Paint Manufacturing Plant

"Paint manufacturing source" or "Paint manufacturing plant" means a source that mixes, blends, or compounds enamels, lacquers, sealers, shellacs, stains, varnishes, or pigmented surface coatings.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.4455 Pan-Backing Coating

"Pan-backing coating" means, for purposes of 35 Ill. Adm. Code 218 and 219, a coating applied to the surface of pots, pans, or other cooking implements that are exposed directly to a flame or other heating elements.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.4460 Panel

"Panel" means a flat piece of wood or wood product usually rectangular and used inside homes and mobile homes for wall decorations.

(Source: Added at 35 Ill. Reg. 13451, effective July 27, 2011)

Section 211.4470 Paper Coating

"Paper coating" means any protective, decorative, or functional coating applied on paper, plastic film, or metallic foil to make certain products, including ~~but not limited to~~ adhesive tapes and labels, book covers, post cards, office copier paper, drafting paper, or pressure sensitive tapes. For purposes of 35 Ill. Adm. Code 218 and 219, paper coating includes coatings applied by impregnation or saturation.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.4490 Paper Coating Line

"Paper coating line" means a coating line in which any protective, decorative, or functional coating is applied on, saturated into, or impregnated into paper, plastic film, or metallic foil to make certain products, including ~~but not limited to~~ adhesive tapes and labels, book covers, post cards, office copier paper, drafting paper, and pressure sensitive tapes. For purposes of 35 Ill. Adm. Code 218 and 219, a paper coating line includes saturation or impregnation.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.4510 Particulate Matter

"Particulate matter" means any solid or liquid material, other than water, which exists in finely divided form.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.4530 Parts Per Million (Volume) or PPM (Vol)

"Parts per million (volume)" or "PPM (vol)" means a volume/volume ratio which expresses the volumetric concentration of gaseous air contaminant in a million unit volume of gas.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.4535 Part Marking Aerospace Coating

"Part marking aerospace coating" means coatings or inks used to make identifying markings on aerospace materials, components, or assemblies. These markings may be either permanent or temporary.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.4540 Perimeter Bonded Sheet Flooring

"Perimeter bonded sheet flooring" means, for purposes of 35 Ill. Adm. Code 218 and 219, sheet flooring with vinyl backing installed onto a nonporous substrate using an adhesive designed to be applied only to a strip of up to four inches wide around the perimeter of the sheet flooring.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.4550 Person

"Person" means any individual; corporation; partnership; firm; association; trust; estate; public or private institution; group; state; municipality; political subdivision of a state; any agency, department, or instrumentality of the United States; and any officer, agent, or employee of any of the above.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.4590 Petroleum

"Petroleum" means the crude oil removed from the earth and the oils derived from tar sands, shale, and coal.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.4610 Petroleum Liquid

"Petroleum liquid" means crude oil, condensate, or any finished or intermediate product manufactured at a petroleum refinery, but not including acetone~~, and~~; Number 2 through Number 6 fuel oils as specified in ASTM D-396-69, ~~(~~incorporated by reference in 35 Ill. Adm. Code 218.112 and 219.112~~),~~; gas turbine fuel oils Numbers 2-GT through 4-GT as specified in ASTM D-2880-71, ~~(~~incorporated by reference in 35 Ill. Adm. Code 218.112 and 219.112~~)~~; or diesel fuel oils Numbers 2-D and 4-D, as specified in ASTM D-975-68, ~~(~~incorporated by reference in 35 Ill. Adm. Code 218.112 and 219.112~~)~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.4630 Petroleum Refinery

"Petroleum refinery" means any source engaged in producing gasoline, kerosene, distillate fuel oils, residual fuel oils, lubricants, or other products through distillation of petroleum, or through redistillation, cracking, or reforming of unfinished petroleum derivatives.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.4650 Pharmaceutical

"Pharmaceutical" means any compound or mixture, other than food, used in ~~the prevention, diagnosis, alleviation, treatment~~preventing, diagnosing, alleviating, treating, or ~~cure of~~curing disease in ~~human~~ humans and ~~animal~~animals.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.4670 Pharmaceutical Coating Operation

"Pharmaceutical coating operation" means a device in which a coating is applied to a pharmaceutical, including air drying or curing ~~of~~ the coating.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.4690 Photochemically Reactive Material

"Photochemically reactive material" means any organic material with an aggregate of more than 20 percent of its total volume composed of the chemical compounds ~~classified~~ below or the composition of which exceeds any of the following individual percentage composition limitations. Whenever any photochemically reactive material or any constituent of any organic material may be classified from its chemical structure into more than one ~~of the above groups of organic materials~~category of compounds defined as "organic material" at Section 211.4250, it ~~shall~~ must be considered as a member of the most reactive group, that is, the group having the least allowable percent of the total organic materials.

A combination of hydrocarbons, alcohols, aldehydes, esters, ethers, or ketones having an olefinic or cyclo-olefinic types of unsaturation: 5 percent. This definition does not apply to perchloroethylene or trichloroethylene.

A combination of aromatic compounds with eight or more carbon atoms to the molecule except ethylbenzene: 8 percent.

A combination of ethylbenzene, ketones having branched hydrocarbon structures, or toluene: 20 percent.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.4710 Pigmented Coatings

"Pigmented coatings" means opaque coatings containing binders and colored pigments which are formulated to conceal the wood surface either as an undercoat or topcoat.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.4720 Pipeline Natural Gas

"Pipeline natural gas" means a naturally-occurring fluid mixture of hydrocarbons (e.g., methane, ethane, or propane) produced in geological formations beneath the Earth's surface that maintains a gaseous state at standard atmospheric temperature and pressure under ordinary conditions, and that is provided by a supplier through a pipeline. Pipeline natural gas contains 0.5 grains or less of total sulfur per 100 standard cubic feet. Additionally, pipeline natural gas must either be composed of at least 70 percent methane by volume or have a gross calorific value between 950 and 1100 Btu per standard cubic foot.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.4730 Plant

"Plant" means, for purposes other than 35 Ill. Adm. Code 215, 218, and 219, all of the pollutant-emitting activities which belong to the same industrial grouping, are located on one or more contiguous or adjacent properties, and are under the control of the same person ~~(~~or persons under common control~~)~~, except the activities of any marine vessel. Pollutant-emitting activities ~~shall~~ must be considered as part of the same industrial grouping if they belong to the same major group (i.e., ~~which~~ have the same two-digit code) as described in the "Standard Industrial Classification Manual," 1987, ~~(~~incorporated by reference in 35 Ill. Adm. Code 218.112 and 219.112~~)~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.4735 Plastic

"Plastic" means, for purposes of Subparts JJ of 35 Ill. Adm. Code 218 and 219, a synthetic material chemically formed by the polymerization of organic (carbon-based) substances. Plastics are usually compounded with modifiers, extenders, and/or reinforcers and are capable of being molded, extruded, cast into various shapes and films, or drawn into filaments.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.4740 Plastic Part

"Plastic part" means a product, or piece of a product, made from a substance that has been formed from resin through the application of pressure or heat or both.

(Source: Added at 19 Ill. Reg. 6823, effective May 9, 1995)

Section 211.4750 Plasticizers

"Plasticizers" means substances added to a polymer composition to soften and add flexibility to the product.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.4760 Plastic Solvent Welding Adhesive

"Plastic solvent welding adhesive" means, for purposes of 35 Ill. Adm. Code 218 and 219, any adhesive used to dissolve the surface of plastic to form a bond between mating surfaces.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.4765 Plastic Solvent Welding Adhesive Primer

"Plastic solvent welding adhesive primer" means, for purposes of 35 Ill. Adm. Code 218 and 219, any primer used to prepare plastic substrates prior to bonding or welding.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.4768 Pleasure Craft

"Pleasure craft" means, for purposes of 35 Ill. Adm. Code 218 and 219, a vessel that is manufactured or operated primarily for recreational purposes, or leased, rented, or chartered to a person or business for recreational purposes.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.4769 Pleasure Craft Surface Coating

"Pleasure craft surface coating" means, for purposes of 35 Ill. Adm. Code 218 and 219, any coating, except unsaturated polyester resin (fiberglass) coatings, containing volatile organic materials and applied by brush, spray, roller, or other means to a pleasure craft.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.4770 PM-10

"PM-10" means particulate matter with an aerodynamic diameter less than or equal to a nominal 10 micrometers, as measured by the applicable test methods specified by rule. Ambient air concentrations for PM-10 are usually expressed in micrograms per cubic meter (ug/m^3).

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.4790 Pneumatic Rubber Tire Manufacture

"Pneumatic rubber tire manufacture" means the production of pneumatic rubber tires with a bead diameter up to but not including 20.0 inches and cross section dimension up to 12.8 inches, but not including specialty tires for antique or other vehicles when produced on equipment separate from normal production lines for passenger or truck type tires.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.4810 Polybasic Organic Acid Partial Oxidation Manufacturing Process

"Polybasic organic acid partial oxidation manufacturing process" means any process involving partial oxidation of hydrocarbons with air to manufacture polybasic acids or their anhydrides, such as maleic anhydride, phthalic anhydride, terephthalic acid, isophthalic acid, or ~~trimelletic~~ trimellitic anhydride.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.4830 Polyester Resin Material(s)

"Polyester resin material(s)" means gel coat and unsaturated polyester resin, such as isophthalic, orthophthalic, halogenated, bisphenol A, vinyl ester, or furan resins; cross-linking agents; catalysts; inhibitors; accelerators; promoters; and any other material containing VOM used in polyester resin operations, including the following polyester resin materials:

a) Corrosion ~~resistent~~ resistant and fire retardant polyester resin materials used to make products for corrosive and fire retardant applications;

b) High-strength polyester resin materials with a tensile strength of 10,000 psi or more;

c) Gel coat.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.4850 Polyester Resin Products Manufacturing Process

"Polyester resin products manufacturing process" means a manufacturing process that fabricates or reworks products for commercial, military, or industrial use by mixing, pouring, hand laying-

up, impregnating, injecting, pultruding, forming, winding, spraying, and/or curing by using unsaturated polyester resin materials with fiberglass, filters, or any other reinforcement materials.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.4870 Polystyrene Plant

"Polystyrene plant" means any collection of process units and associated storage facilities at a source engaged in using styrene to manufacture polystyrene resin.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.4890 Polystyrene Resin

"Polystyrene resin" means a substance consisting of styrene polymer and additives which is manufactured at a polystyrene plant.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.4895 Polyvinyl Chloride Plastic (PVC Plastic)

"Polyvinyl chloride plastic" or "PVC plastic" means, for purposes of 35 Ill. Adm. Code 218 and 219, a polymer of the chlorinated vinyl monomer that contains 57 percent or more chlorine.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.4900 Porous Material

"Porous material" means, for purposes of 35 Ill. Adm. Code 218 and 219, a substance that has tiny openings, often microscopic, in which fluids may be absorbed or discharged, including~~, but not limited to,~~ paper and corrugated paperboard. Porous material does not include wood.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.4910 Portable Grain-Handling Equipment

"Portable grain-handling equipment" means any equipment (excluding portable grain dryers) that is designed and maintained to be movable primarily for use in a non-continuous operation for loading and unloading one-turn storage space and is not physically connected to the grain elevator, ~~provided that~~if the manufacturer's rated capacity of the equipment does not exceed 10,000 bushels per hour.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.4930 Portland Cement Manufacturing Process Emission Source

"Portland cement manufacturing process emission source" means any items of process equipment or manufacturing processes used in or associated with the production of portland cement, including~~, but not limited to,~~ a kiln, clinker cooler, raw mill system, finish mill system, raw material dryer, material storage bin or system, material conveyor belt or other transfer system, material conveyor belt transfer point, bagging operation, bulk unloading station, or bulk loading station.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.4950 Portland Cement Process or Portland Cement Manufacturing Plant

"Portland cement process" or "Portland cement manufacturing plant" means any facility or plant manufacturing portland cement by either the wet or dry process.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.4960 Potential Electrical Output Capacity

"Potential electrical output capacity" means the MWe capacity rating for the units which ~~shall~~ must be equal to 33% of the maximum design heat input capacity of the steam generating unit.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.4970 Potential to Emit

"Potential to emit (PTE)" means the maximum capacity of a stationary source to emit any air pollutant under its physical and operational design. Any physical or operational limitation on the capacity of a source to emit an air pollutant, including air pollution control equipment and restriction on hours of operation or on the type or amount of material combusted, stored, or processed, ~~shall~~ must be treated as part of its design if the limitation is federally enforceable.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.4990 Power Driven Fastener Coating

"Power driven fastener coating" means the coating of nail, staple, brad, and finish nail fasteners where ~~such~~ the fasteners are fabricated from wire or rod of 0.0254 inch diameter or greater, ~~where such fasteners are~~ bonded into coils or strips~~, such coils and strips~~ containing a number of ~~such~~ these fasteners, ~~which fasteners are~~ manufactured for use in power tools, and ~~which fasteners~~ must conform with ~~formal~~ standards for specific uses established by ~~various~~ federal and national organizations including Federal Specification FF-N-105b of the General Services Administration dated August 23, 1977 (does not include any later amendments or editions; U.S. Army Armament Research and Development Command, Attn: DRDAR-TST, Rock Island, IL 61201), Bulletin UM-25d of the U.S. Department of Housing and Urban Development - Federal Housing Administration dated September 5, 1973 (does not include any later amendments or editions; Department of HUD, 547 W. Jackson Blvd., Room 1005, Chicago, IL 60606), and the

Model Building Code of the Council of American Building Officials, and similar standards. For the purposes of this definition, the terms "brad" and "finish nail" refer to single leg fasteners fabricated in the same manner as staples. The application of coatings to staple, brad, and finish nail fasteners may be associated with the incremental forming ~~of such~~ the fasteners in a cyclic or repetitious manner (incremental fabrication) or with ~~the~~ forming ~~of~~ strips of ~~such~~ the fasteners as a unit from a band of wires (unit fabrication).

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5010 Precoat

"Precoat" means any coating which is applied to bare metal primarily to deactivate the metal surface for corrosion resistance to a subsequent water-base primer.

(Source: Added at 19 Ill. Reg. 6823, effective May 9, 1995)

Section 211.5012 Prefabricated Architectural Coatings

"Prefabricated architectural coatings" means, for purposes of 35 Ill. Adm. Code 218 and 219, coatings applied to metal parts and products that are to be used as an architectural structure.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.5015 Preheater Kiln

"Preheater kiln" means, for the purposes of 35 Ill. Adm. Code 217, Subpart T, a kiln where the feed to the kiln is preheated in cyclone chambers ~~prior to~~before the final reactions in a kiln which forms clinker.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5020 Preheater/Precalciner Kiln

"Preheater/precalciner kiln" means, for the purposes of 35 Ill. Adm. Code 217, Subpart T, a kiln where the feed to the kiln is preheated in cyclone chambers and ~~utilizes~~ uses a second burner to calcine material in a separate vessel attached to the preheater ~~prior to~~before the final fusion in a kiln which forms clinker.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5030 Pressure Release

"Pressure release" means the emission of materials resulting from system pressure being greater than set pressure of the pressure relief device.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.5050 Pressure Tank

"Pressure tank" means a tank in which fluids are stored at a pressure greater than atmospheric pressure.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.5060 Pressure/Vacuum Relief Valve

"Pressure/vacuum relief valve" means a device affixed to the storage tank vent pipe to prevent the escape or intrusion of gases.

(Source: Added at 18 Ill. Reg. 14962, effective September 21, 1994)

Section 211.5061 Pretreatment Coating

"Pretreatment coating" means, for purposes of 35 Ill. Adm. Code 218 and 219, a coating that contains no more than 12 percent solids by weight and at least 0.50 percent acid by weight, is used to provide surface etching, and is applied directly to metal surfaces to provide corrosion resistance, adhesion, and ease of stripping.

(Source: Old Section 211.5061 renumbered to Section 211.5062; new Section 211.5061 added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.5062 Pretreatment Wash Primer

"Pretreatment wash primer" means:

For purposes of Subparts HH of 35 Ill. Adm. Code 218 and 219, the first coating applied to bare metal if ~~solventborne~~ solvent-borne primers will be applied. This coating contains a minimum of 0.5 percent acid~~,~~ by weight, is necessary to provide surface etching, and provides corrosion resistance and adhesion;

For purposes of Subparts F of 35 Ill. Adm. Code 218 and 219, a coating that contains no more than 12 percent solids by weight and at least 0.50 percent acids by weight, is used to provide surface etching, and is applied directly to fiberglass and metal surfaces to provide corrosion resistance and adhesion of subsequent coatings.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5065 Primary Product

"Primary ~~Product~~product" means a product of a chemical manufacturing process unit that ~~shall~~ must be determined according to the following procedures ~~specified as follows~~:

a) If a chemical manufacturing process unit produces more than one intended chemical product, the product with the greatest annual design capacity on a mass basis ~~determines~~ is the primary product of the process.

b) If a chemical manufacturing process unit has two more products that have the same maximum annual design capacity on a mass basis, and if one of those chemicals is listed in Appendix A of 35 Ill. Adm. Code 218 or 219, then the listed chemical is considered the primary product. If more than one of the products is listed in Appendix A of 35 Ill. Adm. Code 218 or 219, then the owner or operator may designate any of the listed chemicals as the primary product ~~any of the listed chemicals~~.

c) For a chemical manufacturing process unit that is designed and operated as a flexible operation unit and is used predominantly to produce one or more of the listed chemicals in Appendix A of 35 Ill. Adm. Code 218 or 219, the primary product ~~shall~~ must be determined based on the expected ~~utilization~~ production for the five years following promulgation for existing sources and based on the expected ~~utilization~~ production for the first five years after initial start-up for new sources.

1) If the flexible operation unit produces one product for the greatest annual operating time, then that product ~~shall~~ must represent the primary product of the flexible operation unit.

2) If the flexible operation unit produces multiple chemicals equally based on operating time, then the product with the greatest annual production on a mass basis ~~shall~~ must represent the primary product of the flexible operation unit.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5070 Prime Coat

"Prime coat" means the first of two or more coatings applied to a substrate in a multiple coat operation.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.5072 Primer for General Aviation Rework Facility

"Primer for general aviation rework facility" means an aerospace primer applied at a general aviation rework facility.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5075 Primer Sealant

"Primer sealant" means, for purposes of 35 Ill. Adm. Code 218.204(q) and 219.204(q), a sealant applied in the manufacture of ammunition to assembled primers to maintain the primer assembly and prevent explosive priming mix from dusting during the transfer of primers.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.5080 Primer Sealer

"Primer sealer" means an undercoat that improves the adhesion of the topcoat, provides corrosion resistance, and promotes color uniformity.

(Source: Added at 19 Ill. Reg. 6823, effective May 9, 1995)

Section 211.5090 Primer Surfacer Coat

"Primer surfacer coat" means, for purposes of 35 Ill. Adm. Code 215.204(a), 218.204(a)(1), and 219.204(a)(1), a coating used to touch up areas on the surface of automobile or light-duty truck bodies not adequately covered by the prime coat before application of the top coat. The primer surfacer coat is applied between the prime coat and topcoat. An anti-chip coating applied to main body parts (e.g., rocker panels, bottom of doors and fenders, and leading edge of roof) is a ~~primer/surfacer~~primer surfacer coat. The primer surfacer coat is also referred to as a "guide coat."

"Primer surfacer coat" means, for purposes of 35 Ill. Adm. Code 218, Subpart HH and 219, Subpart HH, a coating applied to motor vehicles, mobile equipment, or their parts and components at motor vehicle refinishing operations that fills in surface imperfections and builds a thickness in order to allow sanding.

"Primer surfacer coat" means, for purposes of 35 Ill. Adm. Code 218.204(a)(2) and 219.204(a)(2), an intermediate protective coating applied over the electrodeposition primer and under the topcoat. Primer surfacer provides adhesion, protection, and appearance properties to the total finish. Primer surfacer may also be called guide coat or surfacer. Primer surfacer operations may include other coatings (e.g., anti-chip, lower-body anti-chip, chip-resistant edge primer, spot primer, blackout, deadener, interior color, basecoat replacement coating, etc.) that are applied in the same spray booths.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5110 Primer Surfacer Operation

"Primer surfacer operation" means the application ~~area(s)~~area or areas, flashoff ~~area(s)~~area or areas, and ~~oven(s)~~oven or ovens that are used to apply and dry or cure primer surfacer coat on a single assembly line.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5130 Primers

"Primers" means any coatings formulated and applied to substrates to provide a firm bond between the substrate and subsequent coats.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.5140 Printed Interior Panel

"Printed ~~Interior Panel~~interior panel" mean a panel whose grain or natural surface is obscured by fillers and basecoats upon which a simulated grain or decorative pattern is printed.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5150 Printing

"Printing" means the application of words, designs, pictures, or other images to a substrate using ink.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5170 Printing Line

"Printing line" means an operation consisting of a series of one or more roll printers and any associated roll coaters, drying areas, and ovens ~~wherein~~ in which one or more coatings are applied, dried, and/or cured.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5185 Process Emission Source

"Process emission source" means any stationary emission source other than a fuel combustion emission unit or an incinerator.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.5190 Process Emission Unit

"Process emission unit" means any stationary emission unit other than a fuel combustion emission unit or an incinerator.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.5195 Process Heater

"Process heater" means, for purposes of Part 217, an enclosed combustion device that burns only gaseous or liquid fuels ~~only~~ and that indirectly transfers heat to a process fluid or a heat transfer medium other than water. This ~~term~~ definition does not include pipeline heaters and storage tank heaters that are primarily meant to maintain fluids at a certain temperature or viscosity.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5210 Process Unit

"Process unit" means equipment and components assembled to produce, as intermediate or final products, one or more chemicals. A process unit can operate independently if supplied with sufficient feed or raw materials and sufficient storage facilities for the product. For purposes of Subpart Q of Parts 215, 218, and 219, a process unit must produce one or more of the chemicals listed in Appendix A of 35 Ill. Adm. Code 215, 218, or 219, as applicable.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.5230 Process Unit Shutdown

"Process unit shutdown" means a work practice or operational procedure that stops production from a process unit or part of a process unit. An unscheduled work practice or operational procedure that stops production from a process unit or part of a process unit for less than 24 hours is not a process unit shutdown. The use of spare equipment and components and technically feasible bypassing of equipment and components without stopping production is not a process unit shutdown.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.5245 Process Vent

"Process vent" means, for purposes of 35 Ill. Adm. Code ~~218 and 219, Sections~~ 218.500 ~~through~~ 218.506 and 219.500 ~~through~~ 219.506, any non-fugitive source of VOM emissions to the atmosphere resulting from non-combustion emission units. A process vent begins at the inlet to the control device~~,~~ or, in the absence of a control device, at the point of discharge to the atmosphere. This definition includes all emission units vents and stacks. ~~Not included in this~~This definition ~~are~~ does not include exhaust streams from exhaust hoods and building ventilation fans which are used to provide ventilation for workers and not to collect and discharge emissions from specific emission units.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5250 Process Weight Rate

"Process weight rate" means the actual weight or engineering approximation ~~thereof~~ of it of all materials except liquid and gaseous fuels and combustion air introduced into any process per hour. For a cyclical or batch operation, the process weight rate ~~shall~~ must be determined by

dividing ~~such~~ the actual weight or engineering approximation ~~thereof~~ of it by the number of hours of operation excluding any time during which the equipment is idle. For continuous processes, the process weight rate ~~shall~~ must be determined by dividing ~~such~~ the actual weight or engineering approximation ~~thereof~~ of it by the number of hours in one complete operation, excluding any time during which the equipment is idle.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5270 Production Equipment Exhaust System

"Production equipment exhaust system" means a system for collecting and directing into the atmosphere emissions of volatile organic material from reactors, centrifuges, and other process emission units.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.5310 Publication Rotogravure Printing Line

"Publication rotogravure printing line" means a rotogravure printing line printing upon paper ~~which is~~ subsequently formed into books, magazines, catalogues, brochures, directories, newspaper supplements, or other types of non-packaging printed materials.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5330 Purged Process Fluid

"Purged process fluid" means liquid or vapor from a process unit that contains volatile organic material and that results from flushing or cleaning the sample ~~line(s)~~line or lines of a process unit so that an uncontaminated sample may then be taken for testing or analysis.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.5335 Radiation Effect Coating

"Radiation ~~Effect Coating~~effect coating" means, for purposes of 35 Ill. Adm. Code 218.187 and 219.187, a coating or coating system engineered to interact, through absorption or reflection, with specific regions of the electromagnetic energy spectrum, such as the ultraviolet, visible, infrared, or microwave regions. Uses include~~, but are not limited to,~~ lightning strike protection, electromagnetic pulse protection, and radar avoidance. ~~Coatings~~ This definition does not include coating that have been designated "classified" by the Department of Defense ~~are not included in this definition~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5336 Radiation-Effect or Electric Coating

"Radiation-effect or electric coating" means a coating or coating system engineered to interact, through absorption or reflection, with specific regions of the electromagnetic energy spectrum, such as the ultraviolet, visible, infrared, or microwave regions. Uses include lightning strike protection, electromagnetic pulse protection, and radar avoidance. This definition does not include coatings~~Coatings~~ that have been designated as "classified" by the Department of Defense ~~are exempt from this definition~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5338 Radome

"Radome" means, for purposes of the definitions of "electrostatic discharge and electromagnetic interference" and "rain erosion-resistant coating", the nonmetallic protective housing for electromagnetic transmitters and receivers (e.g., radar, electronic countermeasures, etc.).

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5339 Rain Erosion-Resistant Coating

"Rain erosion-resistant coating" means a coating or coating system used to protect the leading edges of aerospace parts, such as flaps, stabilizers, radomes, engine inlet nacelles, etc., against erosion caused by rain impact during flight.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5340 Rated Heat Input Capacity

"Rated heat input capacity" means the ability of an emission unit to combust a maximum amount of fuel on a steady state basis, as limited by a federally enforceable permit condition~~,~~ or ~~otherwise~~ as stated by the manufacturer of the unit~~,~~ based on the physical design and characteristics of the unit, or, if higher than the manufacturer's stated maximum amount, as demonstrated by the actual operation of the unit.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5350 Reactor

"Reactor" means a vat, vessel, or other device in which chemical reactions take place.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.5370 Reasonably Available Control Technology (RACT)

"Reasonably available control technology (RACT)" means the lowest emission limitation that an emission unit is capable of meeting by ~~the application of~~ applying control technology that is reasonably available considering technological and economic feasibility.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5390 Reclamation System

"Reclamation system" means equipment which reclaims spent solvents, surplus propellants, waste materials, and other materials generated by an emission unit to produce solvent, propellant, or other materials which may be reused in the emission unit.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5400 Red Coating

"Red coating" means, for purposes of 35 Ill. Adm. Code 218 and 219, a coating that meets all of the following criteria:

Yellow limit: the hue of hostaperm scarlet;

Blue limit: the hue of monastral red-violet;

Lightness limit for metallics: 35 percent aluminum flake;

Lightness limit for solids: 50 percent titanium dioxide white;

Solid reds: hue angle of -11 to 38° and maximum lightness of 23 to 45 units; and

Metallic reds: hue angle of -16 to 35° and maximum lightness of 28 to 45 units.

These criteria are based on Cielab color space, 0/45 geometry. For spherical geometry, specular included, the upper limit is 49 units.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.5410 Refiner

"Refiner" means any person who owns, leases, operates, controls, or supervises a refinery.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.5430 Refinery Fuel Gas

"Refinery fuel gas" means any gas which is generated by a petroleum refinery process unit and which is combusted at the refinery, including any gaseous mixture of natural gas and fuel gas.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.5450 Refinery Fuel Gas System

"Refinery fuel gas system" means a system for ~~collection of~~collecting refinery fuel gas including~~, but not limited to,~~ piping for collecting tail gas from various process units, mixing drums and controls, and distribution piping.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5470 Refinery Unit or Refinery Process Unit

"Refinery unit" or "Refinery process unit" means a set of equipment which ~~are~~ is a part of a basic process operation such as ~~distillation~~distilling, hydrotreating, cracking, or reforming ~~of~~ hydrocarbons.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5480 Reflective Argent Coating

"Reflective argent coating" means a silver-colored coating that will reflect light.

(Source: Added at 19 Ill. Reg. 6823, effective May 9, 1995)

Section 211.5490 Refrigerated Condenser

"Refrigerated condenser" means a surface condenser in which the coolant supplied to the condenser has been cooled by a mechanical device~~,~~ other than ~~by~~ a cooling tower or evaporative spray cooling, such as a refrigeration unit or steam chiller unit.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.5500 Regulated Air Pollutant

a) "Regulated air pollutant" means the following:

1) Nitrogen oxides (NOx) or any volatile organic compound.

2) Any pollutant for which a national ambient air quality standard has been promulgated.

3) Any pollutant that is subject to any standard promulgated under Section 111 of the Clean Air Act.

4) Any Class I or II substance subject to a standard promulgated under Section 112 of the Clean Air Act, including Sections 112(g), (j) and (r).

A) Any pollutant subject to requirements under Section 112(j) of the Clean Air Act. Any pollutant listed under Section 112(b) ~~shall~~ must be considered to be regulated 18 months after the date on which ~~United States Environmental Protection Agency ("~~USEPA~~")~~ was required to promulgate an applicable standard ~~pursuant to~~under Section 112(e) of the Clean Air Act, if USEPA fails to promulgate such standard.

B) Any pollutant for which the requirements of Section 112(g)(2) of the Clean Air Act have been met, but only with respect to the individual source subject to Section 112(g)(2) ~~requirement~~.

5) Greenhouse Gases, which are the group of six long-lived and directly emitted greenhouse gases: carbon dioxide, methane, nitrous oxide, hydrofluorocarbons, perfluorocarbons, and sulfur hexafluoride.

b) "Regulated air pollutant" ~~shall~~means, for the purposes of 35 Ill. Adm. Code 201.180(a), ~~mean~~ any air contaminant ~~as to~~for which this Subtitle contains emission standards or other specific limitations and any contaminant regulated in Illinois ~~pursuant to~~under Section 9.1 of the Act.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5510 Reid Vapor Pressure

""Reid vapor pressure" means the absolute vapor pressure of volatile crude oil and volatile nonviscous petroleum liquids except ~~liquified~~ liquefied petroleum gases as determined by the method ~~referenced~~ in the Section where the term is used or, if the Section where the term is used does not specify a method, by ASTM D323-08 ~~(if not referenced in the Section where the term is used)~~, incorporated by reference in 35 Ill. Adm. Code 218.112 and 219.112.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5520 Reinforced Plastic Composite

"Reinforced plastic composite" means, for purposes of 35 Ill. Adm. Code 218 and 219, a composite material consisting of plastic reinforced with fibers.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.5530 Repair

"Repair" means, with respect to polyester resin product manufacturing processes, a portion of the fabrication process that requires the addition of polyester resin materials to portions of a previously fabricated product immediately after normal fabrication operations in order to mend damage ~~immediately following normal fabrication operations~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5535 Repair Cleaning

"Repair ~~Cleaning~~cleaning" means, for purposes of 35 Ill. Adm. Code 218.187 and 219.187, a solvent cleaning operation or activity carried out during a repair process.

(Source: Added at 34 Ill. Reg. 9069, effective June 25, 2010)

Section 211.5550 Repair Coat

"Repair coat" means:

With respect to coating wood furniture, coatings used to correct imperfections or damage to furniture surface;

For purposes of 35 Ill. Adm. Code 218.204(q) and 219.204(q), a coat used to re-coat portions of a previously coated product that has sustained mechanical damage to the coating ~~following~~ after normal coating operations.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5570 Repaired

"Repaired" means, for the purpose of Subpart Q of 35 Ill. Adm. Code 215, 218, and 219, that equipment or a component has been adjusted~~,~~ or otherwise altered~~,~~ to eliminate a leak.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5580 Repowering

For purposes of 35 Ill. Adm. Code 217, Subpart W, "repowering" means ~~the conversion or replacement of~~converting or replacing an existing budget EGU~~, as~~ identified in Appendix F~~,~~ with a technology capable of controlling NO_x and other combustion emissions simultaneously with improved boiler or generation efficiency and with waste reduction~~,~~ or any other replacement generation technology as determined by the Illinois Environmental Protection Agency. Repowering ~~shall~~ must be considered a control technology for purposes of 35 Ill. Adm. Code 217.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5585 Research and Development Operation

"Research and development operation" means, for purposes of 35 Ill. Adm. Code 218.187, 219.187, and 219.204(r), an operation:

whose purpose is ~~for research and development of~~researching and developing new processes and products;

that is conducted under the close supervision of technically trained personnel; and

that is not involved in ~~the manufacture of~~manfacturing final or intermediate products for commercial purposes, except in a de minimis manner.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5590 Residual Fuel Oil

"Residual fuel oil" means fuel oils of grade No. 4, 5, and 6 as specified in ~~detailed~~ requirements for fuel oils in ASTM D-396-69 (1971), incorporated by reference in 35 Ill. Adm. Code 218.112 and 219.112.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5600 Resist Coat

"Resist coat" means a coating that is applied to a plastic part before metallic plating to prevent deposits of metal on portions of the plastic part.

(Source: Added at 19 Ill. Reg. 6823, effective May 9, 1995)

Section 211.5610 Restricted Area

"Restricted area" means the area within the boundaries of any "municipality" as defined in Section 1-1-2 of the Illinois Municipal Code [65 ILCS 5/1-1-2], plus a zone extending one mile beyond the boundaries of any such municipality having a population of 1000 or more according to the latest federal census.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.5630 Retail Outlet

"Retail outlet" means any gasoline dispensing operation at which gasoline is sold or offered for sale for use in motor vehicles.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.5640 Rich-Burn Engine

"Rich-burn engine" means a spark-ignited engine where the oxygen content in the exhaust stream of the engine before any dilutions is 1 percent or less by volume measured on a dry basis.

(Source: Added at 31 Ill. Reg. 14271, effective September 25, 2007)

Section 211.5650 Ringelmann Chart

"Ringelmann chart" means the chart ~~published and described~~ in the Bureau of Mines, U.S. Department of Interior, Information Circular 8333 (Revision of IC7718) May 1, 1967, or any adaptation ~~thereof which has been approved by~~of it that the Agency has approved.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5670 Roadway

"Roadway" means any street, highway, road, alley, sidewalk, parking lot, airport, rail bed or terminal, bikeway, pedestrian mall, or other structure used for transportation purposes.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5675 Rocket Motor Bonding Adhesive

"Rocket motor bonding adhesive" means an adhesive used in rocket motor bonding applications.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5680 Rocket Motor Nozzle Coating

"Rocket motor nozzle coating" means a catalyzed epoxy coating system used in elevated temperature applications on rocket motor nozzles.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5690 Roll Coater

"Roll coater" means an apparatus used for roll coating.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.5710 Roll Coating

"Roll coating" means a method of applying a coating to a moving substrate by means of rotating hard rubber, elastomeric, or metal rolls.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5730 Roll Printer

"Roll printer" means an apparatus used for roll printing.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.5750 Roll Printing

"Roll printing" means the method of printing by means of a series of rolls, usually of hard rubber or metal, each with only partial coverage.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.5770 Rotogravure Printing

"Rotogravure printing" means roll printing in which the pattern to be applied is recessed in the roll relative to the non-image area.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.5790 Rotogravure Printing Line

"Rotogravure printing line" means a printing line performing rotogravure printing.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.5800 Rubber

"Rubber" means, for purposes of Subparts JJ of 35 Ill. Adm. Code 218 and 219, any natural or manmade rubber substrate, including~~, but not limited to,~~ styrene-butadiene rubber, polychloroprene (neoprene), butyl rubber, nitrile rubber, chlorosulfonated polyethylene, and ethylene propylene diene terpolymer.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5805 Rubber-Based Adhesive

"Rubber-based adhesive" means a quick setting contact cement that provides a strong~~,~~ yet flexible~~,~~ bond between two mating surfaces that may be of dissimilar materials.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5810 Safety Relief Valve

"Safety relief valve" means a valve which is normally closed and which is designed to open in order to relieve excessive pressures within a vessel or pipe.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.5830 Sandblasting

"Sandblasting" means the use of a mixture of sand and air at high pressures for cleaning and/or polishing any type of surface.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.5850 Sanding Sealers

"Sanding sealers" means any coatings formulated for and applied to bare wood for sanding and to seal the wood for subsequent application of varnish. To be considered a sanding sealer, a coating must be clearly labelled as ~~such~~one.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5855 Scale Inhibitor

"Scale inhibitor" means, for the purposes of 35 Ill. Adm. Code 219.204(r), a coating that is applied to the surface of a part ~~prior to~~before thermal processing to inhibit the formation of scale.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5860 Scientific Instrument

"Scientific ~~Instrument~~instrument" means, for purposes of 35 Ill. Adm. Code 218.187 and 219.187, an instrument, including the components, assemblies, and subassemblies used in their manufacture, and associated accessories and reagents that are used for the detection, measurement, analysis, separation, synthesis, or sequencing of various compounds.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5870 Screening

"Screening" means separating material according to size by pressing undersized material through one or more mesh surfaces (screens) in series, and retaining oversized material on the mesh surfaces ~~(screens)~~.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.5875 Screen Printing

"Screen ~~Printing~~printing" means, for purposes of 35 Ill. Adm. Code 218.187 and 219.187, a process in which the printing ink passes through a taut screen or fabric to which a refined form of stencil has been applied. The stencil openings determine the form and dimensions of the imprint.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5880 Screen Printing on Paper

"Screen ~~Printing~~ printing on ~~Paper~~paper" means a process that would otherwise be paper coating as defined in Section 211.4470 ~~of this Part~~, except ink is passed through a taut screen or fabric to which a refined form of stencil has been applied. The stencil openings determine the form and dimensions of the imprint.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5883 Screen Print Ink for Aerospace Applications

"Screen print ink for aerospace applications" means, for purposes of 35 Ill. Adm. Code 219.204(r), an ink used in screen printing processes during fabrication of decorative laminates and decals at aerospace facilities.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5885 Screen Reclamation

"Screen ~~Reclamation~~reclamation" means, for purposes of 35 Ill. Adm. Code 218.187 and 219.187, a solvent cleaning activity carried out in a screen printing operation in which the screen is completely cleaned and the stencil removed for recycling or reuse of the screen for other production runs.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5887 Sealant for Aerospace Applications

"Sealant for aerospace applications" means a material used to prevent the intrusion of water, fuel, air, or other liquids or solids from certain areas of aerospace vehicles or components. There are two categories of sealants: extrudable/rollable/brushable sealants and sprayable sealants.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5890 Sealer

Except for purposes of 35 Ill. Adm. Code 218.204(a) and (q) and 219.204(a) and (q), "sealer" means a coating containing binders that seals wood ~~prior to~~ before the application of the subsequent coatings.

For purposes of 35 Ill. Adm. Code 218.204(a) and (q) and 219.204(a) and (q), "sealer" means a high viscosity material generally, but not always, applied in the paint shop after the body has received an electrodeposition primer coating and before the application of subsequent coatings (e.g., primer surfacer). The primary purpose of sealer is to fill body joints completely so that

there is no intrusion of water, gases, or corrosive materials into the passenger area of the body compartment. These materials are also referred to as sealant, sealant primer, or caulk.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5895 Seal Coat Maskant

"Seal coat maskant" means an overcoat applied over a maskant to improve abrasion and chemical resistance during production operations.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5900 Self-Priming Topcoat for Aerospace Applications

"Self-priming topcoat for aerospace applications" means a topcoat that is applied directly to an uncoated aerospace vehicle or component for purposes of corrosion prevention, environmental protection, and functional fluid resistance. More than one layer of identical coating formulation may be applied to the vehicle or component. ~~Self-priming~~This definition does not include self-priming topcoats for general aviation rework facilities ~~are not included in this definition~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5905 Self-Priming Topcoat for General Aviation Rework Facility

"Self-priming topcoat for general aviation rework facility" means a self-priming topcoat applied at a general aviation rework facility.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5907 Semi-Aqueous Cleaning Solvent

"Semi-aqueous cleaning solvent" means a solution in which water is ~~a~~ the primary ingredient (at least 60 percent of the solvent solution, as applied, must be water).

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5910 Semi-Transparent Stains

"Semi-transparent stains" means stains containing dyes or semi-transparent pigments which are formulated to enhance wood grain and change the color of the surface but not to conceal the surface, including~~, but not limited to,~~ sap stain, toner, non-grain raising stains, pad stain, or spatter stain.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.5930 Sensor

"Sensor" means a device that measures a physical quantity or the change in a physical quantity such as temperature, pressure, flow rate, pH, or liquid level.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.5950 Set of Safety Relief Valves

"Set of safety relief valves" means one or more safety relief valves designed to open in order to relieve excessive pressures in the same vessel or pipe.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.5970 Sheet Basecoat

"Sheet basecoat" means a coating applied to metal when the metal is in sheet form to serve as either the exterior or interior of a can for either two-piece or three-piece cans.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.5980 Sheet-Fed

"Sheet-fed" means a printing or coating line where individual sheets of substrate are fed to the line sequentially.

(Source: Added at 19 Ill. Reg. 6823, effective May 9, 1995)

Section 211.5985 Sheet Rubber Lining Installation

"Sheet rubber lining installation" means, for purposes of 35 Ill. Adm. Code 218 and 219, the process of applying sheet rubber liners by hand to metal or plastic substrates to protect the underlying substrate from corrosion or abrasion. These operations also include laminating sheet rubber to fabric by hand.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.5987 Shock-Free Coating

"Shock-free coating" means, for purposes of 35 Ill. Adm. Code 218 and 219, a coating applied to electrical components to protect the user from electric shock. The coating has characteristics of ~~being of~~ low capacitance~~, and~~ high resistance~~,~~ and ~~having~~ resistance to breaking down under high voltage.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.5990 Shotblasting

"Shotblasting" means the use of a mixture of any metallic or non-metallic substance and air at high pressures for cleaning and/or polishing any type of surface.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.6010 Side-Seam Spray Coat

"Side-seam spray coat" means a can coating applied to the seam of a three-piece can.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.6012 Silicone-Release Coating

"Silicone-release coating" means, for purposes of 35 Ill. Adm. Code 218 and 219, any coating that contains silicone resin and is intended to prevent food from sticking to metal surfaces such as baking pans.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.6013 Silicone Insulation Material

"Silicone insulation material" means an insulating material applied to exterior metal aerospace surfaces for protection from high temperatures caused by atmospheric friction or engine exhaust. These materials differ from ablative coatings in that they are not "sacrificial".

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.6015 Single-Ply Roof Membrane

"Single-ply roof membrane" means, for purposes of 35 Ill. Adm. Code 218 and 219, a prefabricated single sheet of rubber, normally ethylene-propylenediene terpolymer, that is field applied to a building roof using one layer of membrane material. Single-ply roof membrane does not include membranes prefabricated from EPDM.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.6017 Single-Ply Roof Membrane Adhesive Primer

"Single-ply roof membrane adhesive primer" means, for purposes of 35 Ill. Adm. Code 218 and 219, any primer labeled for use to clean and promote adhesion of the single-ply roof membrane seams or splices ~~prior to~~before bonding.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.6020 Single-Ply Roof Membrane Installation and Repair Adhesive

"Single-ply roof membrane installation and repair adhesive" means, for purposes of 35 Ill. Adm. Code 218 and 219, any adhesive labeled for use in the installation or repair of single-ply roof membrane. Installation includes, as a minimum, attaching the edge of the membrane to the edge of the roof and applying flashings to vents, pipes, and ducts that protrude through the membrane. Repair includes gluing the edges of ~~A 4~~ torn membrane together, attaching a patch over a hole, and reapplying flashings to vents, pipes, or ducts installed through the membrane.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.6025 Single Unit Operation

"Single unit operation" means, for purposes of 35 Ill. Adm. Code ~~218 and 219, Sections~~ 218.500 ~~through~~ 218.506 and 219.500 ~~through~~ 219.506, a distinct piece of equipment in a batch operation within which one or more discrete processing steps occur. ~~Such~~ These discrete processing steps include~~, but are not limited to, the preparation of~~preparing reactants, ~~facilitation of~~facilitating reactions, ~~separation and purification of~~separating and purifying products or intermediates, and recycling ~~of~~ materials.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.6030 Smoke

"Smoke" means small gas-borne particles resulting from incomplete combustion, consisting predominantly but not exclusively of carbon, ash, and other combustible material~~,~~ that form a visible plume in the air.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.6050 Smokeless Flare

"Smokeless flare" means a combustion unit and the stack to which it is affixed in which organic material achieves combustion by burning in the atmosphere ~~such~~ so that the smoke or other particulate matter emitted to the atmosphere from ~~such~~ the combustion does not have an appearance density or shade darker that No. 1 of the RingelmannRinglemann Chart.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.6055 Smoothing and Caulking Compounds

"Smoothing and caulking compounds" means semi-solid materials that are applied by hand application methods and ~~are~~ used to aerodynamically smooth exterior vehicle surfaces or fill cavities such as bolt hole accesses. A material ~~shall~~ must not be classified as a smoothing and caulking compound if it can also be classified as a sealant.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.6060 Soft Coat

"Soft coat" means any coating that provides a soft tactile feel similar to leather and a rich leather-like appearance when applied to plastic interior automotive parts and exterior business machine parts.

(Source: Added at 19 Ill. Reg. 6823, effective May 9, 1995)

Section 211.6063 Solar-Absorbent Coating

"Solar-absorbent coating" means, for purposes of 35 Ill. Adm. Code 218 and 219, a coating that has as its prime purpose the absorption of solar radiation.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.6064 Solid Film Lubricant

"Solid film lubricant" means, for purposes of 35 Ill. Adm. Code 219.204(r), a very thin coating consisting of a binder system containing as its chief pigment material one or more of the following: molybdenum, graphite, polytetrafluoroethylene (PTFE), or other solids that act as a dry lubricant between faying (i.e., closely or tightly fitting) surfaces in aerospace applications.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.6065 Solids Turnover Ratio (R_T)

"Solids turnover ratio" or "Solids R_T" means, for purposes of 35 Ill. Adm. Code 218 and 219, the ratio of total volume of coating solids that is added to the EDP system in a calendar month to the total volume design capacity of the EDP system.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.6070 Solvent

"Solvent" means a liquid substance that is used to dissolve or dilute another substance. This term includes~~, but is not limited to~~ organic materials used as dissolvers, viscosity reducers, degreasing agents, or cleaning agents.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.6090 Solvent Cleaning

"Solvent cleaning" means the process of cleaning soils from surfaces by cold cleaning, open top vapor degreasing, or conveyorized degreasing.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.6110 Solvent Recovery System

"Solvent recovery system" means equipment which processes spent solvents, surplus propellants, and other ~~VOM containing~~VOM-containing waste materials generated by an emission unit to recover VOM which can be productively used, either in the original unit or for another purpose, reducing the amount of ~~such~~ the material which must be disposed of as waste.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.6130 Source

"Source" means any stationary source (or any group of stationary sources) that ~~are~~ is located on one or more contiguous or adjacent properties that are under common control of the same person (or persons under common control) and that belongs to a single major industrial grouping. For the purposes of defining "source," a stationary source or group of stationary sources shall be considered part of a single major industrial grouping if all of the pollutant emitting activities at such source or group of sources located on contiguous or adjacent properties and under common control belong to the same Major Group (i.e., all have the same two-digit code) as described in the Standard Industrial Classification Manual, 1987 (incorporated by reference in 35 Ill. Adm. Code 218.112 and 219.112), *or such pollutant emitting activities at a stationary source (or group of sources) located on contiguous or adjacent properties and under common control constitute a support facility* as defined in Section 39.5 of the Environmental Protection Act [415 ILCS 5/39.5]. *The determination as to whether any group of stationary sources ~~are~~ is located on contiguous or adjacent properties, and/or ~~are~~ is under common control, and/or whether the pollutant emitting activities at such group of stationary sources constitute a support facility shall be made on a case by case basis* [415 ILCS 5/39.5].

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.6133 Space Vehicle

"Space vehicle" means a man-made device, either manned or unmanned, designed for operation beyond earth's atmosphere. This definition includes integral equipment such as models, mockups, prototypes, molds, jigs, tooling, hardware jackets, and test coupons. ~~Also included is~~This definition also includes auxiliary equipment associated with test, transport, and storage, that, through contamination, can compromise the space vehicle performance.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.6137 Specialized Function Coating

"Specialized function coating" means, for purposes of 35 Ill. Adm. Code 219.204(r), a coating that fulfills extremely specific engineering requirements in aerospace applications that are

limited in use and are characterized by low volume usage. This category excludes coatings covered in other specialty coating categories in 35 Ill. Adm. Code 219.204(r)(2).

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.6140 Specialty Coatings

"Specialty coatings" means, for the purposes of 35 Ill. Adm. Code 218 and 219, plastic parts coatings used for unusual job performance requirements. These products include adhesion primers, resist coatings, soft coatings, reflective coatings, electrostatic prep coatings, headlamp lens coatings, ink pad printing coatings, stencil coatings, vacuum metalizing coatings, gloss reducers, plating resist coatings, and plating sensitizer coatings.

(Source: Added at 19 Ill. Reg. 6823, effective May 9, 1995)

Section 211.6145 Specialty Coatings for Motor Vehicles

"Specialty coatings for motor vehicles" means, for purposes of 35 Ill. Adm. Code Part 218 and Part 219, Subpart HH, a coating used for unusual job performance requirements, including~~, but not limited to,~~ adhesion promoters, uniform finish blenders, elastomeric materials, gloss flatteners, and bright metal trim repair.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.6150 Specialty High Gloss Catalyzed Coating

"Specialty high gloss catalyzed coating" means commercial contract finishing of material prepared for printers and lithographers where the finishing process uses a solvent-borne coating~~,~~ formulated with a catalyst~~,~~ in a quantity of no more than 12,000 gallons/year as supplied, ~~where~~ the coating machines are sheet fed and the coated sheets are brought to a minimum surface temperature of ~~190º F~~190 ºF, and ~~where~~ the coated sheets are to achieve the minimum specular reflectance index of 65 measured at a 60 degree angle with a gloss meter.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.6170 Specialty Leather

"Specialty leather" means leather in one of the following categories:

a) "Specialty shoe leather," such as "CHROMEXCEL" (TM) leather, that is:

1) A select grade of chrome tanned, bark retanned leather;

2) Retanned to over 25% by weight grease, wax, and oils by direct contact with such materials in liquefied form at elevated temperature without the presence of water;

3) Finished with coating materials which adhere to the leather surface to provide color and a rich visual luster while allowing a surface that feels oily; and

4) Used primarily for manufacture of shoes.

b) "~~Speciality~~ Specialty football leather," such as "TANNED IN TACK" (TM) leather, that is:

1) Top grade, chrome tanned, bark retanned, and fat liquored leather;

2) Finished with coating materials which impregnate into the leather to produce a permanent non-slip "tacky" exterior surface on the leather. This "tacky" characteristic continues to exist with wear; and

3) Used primarily for the manufacture of footballs.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.6190 Specialty Soybean Crushing Source

"Specialty soybean crushing source" means any hexane extraction soybean crushing equipment using indirect steam heat in flash or vapor desolventizers as the primary method of desolventizing and producing specialty solvent extracted soy flakes, grits, or flour.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.6210 Splash Loading

"Splash loading" means a method of loading a tank, railroad tank car, tank truck, or trailer by use of other than a submerged loading pipe.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.6230 Stack

"Stack" means a flue or conduit, free-standing or with exhaust port above the roof of the building on which it is mounted, by which air contaminants are emitted into the atmosphere.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.6250 Stain Coating

"Stain coating" means a non-protective coating containing dye or pigment which is applied to a substrate to impart color without obscuring the grain of the substrate, i.e., the appearance and

texture of the surface of the substrate due to its physical structure, or for a transparent substrate, without blocking the passage of light through the substrate.

(Source: Added at 18 Ill. Reg. 1253, effective January 18, 1994)

Section 211.6270 Standard Conditions

"Standard conditions" means a temperature of ~~70º F~~70 ºF and a pressure of 14.7 psia.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.6290 Standard Cubic Foot (scf)

"Standard cubic foot (scf)" means the volume of one cubic foot of gas at standard conditions.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.6310 Start-Up

"Start-up" means the setting an emission unit in operation ~~of an emission unit~~ for any purpose.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.6330 Stationary Emission Source

"Stationary emission source" means an emission source which is not self-propelled.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.6350 Stationary Emission Unit

"Stationary emission unit" means an emission unit which is not self-propelled.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.6355 Stationary Gas Turbine

"Stationary gas turbine" means any simple cycle gas turbine, regenerative cycle gas turbine, or any gas turbine portion of a combined cycle steam/electric generating system that is not ~~self propelled~~self-propelled. It may, however, be mounted on wheels for portability.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.6360 Stationary Reciprocating Internal Combustion Engine

"Stationary reciprocating internal combustion engine" means any internal combustion engine, except a gas turbine, that is not self-propelled. It may, however, be mounted on wheels for portability.

(Source: Added at 18 Ill. Reg. 15744, effective October 17, 1994)

Section 211.6370 Stationary Source

"Stationary source" means any building, structure, facility, or installation that emits or may emit any air pollutant.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.6390 Stationary Storage Tank

"Stationary storage tank" means any container of liquid or gas which is designed and constructed to remain at one site.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.6400 Stencil Coat

"Stencil coat" means:

~~Prior to~~Before May 1, 2012, a coating that is applied over a stencil on a plastic part at a thickness of 1 mil or less of coating solids. Stencil coats are most frequently letters, numbers, or decorative designs;

On and after May 1, 2012, an ink or pigmented coating that is rolled or brushed onto a template or stamp in order to add identifying letters, symbols, and/or numbers.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.6405 Sterilization Indicating Ink

"Sterilization Indicating Ink" means, for purposes of 35 Ill. Adm. Code 218.187 and 219.187, an ink that changes color to indicate that sterilization has occurred. ~~Such~~ This ink is used to monitor the sterilization of medical instruments, autoclave efficiency, and the thermal processing of foods ~~for prevention of~~to prevent spoilage.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.6410 Storage Tank or Storage Vessel

"Storage tank or storage vessel" means any tank, reservoir, or container used for ~~the storage of~~to store liquid or gaseous material.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.6420 Strippable Spray Booth Coating

"Strippable spray booth coating" means a coating that is applied to a spray booth wall to provide a protective film to receive overspray during finishing operations and that is subsequently peeled off and disposed of.

(Source: Added at 22 Ill. Reg. 3497, effective February 2, 1998)

Section 211.6425 Stripping

"Stripping" means, for purposes of 35 Ill. Adm. Code 218.187 and 219.187, the removal of cured coatings, cured inks, or cured adhesives.

(Source: Added at 34 Ill. Reg. 9069, effective June 25, 2010)

Section 211.6426 Structural Autoclavable Adhesive for Aerospace Applications

"Structural autoclavable adhesive for aerospace applications" means an adhesive used to bond load-carrying aerospace components that is cured by heat and pressure in an autoclave.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.6427 Structural Glazing

"Structural glazing" means, for purposes of 35 Ill. Adm. Code 218 and 219, a process that includes the application of adhesive to bond glass, ceramic, metal, stone, or composite panels to exterior building frames.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.6428 Structural Nonautoclavable Adhesive for Aerospace Applications

"Structural nonautoclavable adhesive for aerospace applications" means an adhesive cured under ambient conditions that is used to bond load-carrying aerospace components or for other critical functions, such as nonstructural bonding in the proximity of engines.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.6430 Styrene Devolatilizer Unit

"Styrene devolatilizer unit" means equipment performing the function of separating unreacted styrene monomer and other volatile components from polystyrene in a vacuum devolatilizer.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.6450 Styrene Recovery Unit

"Styrene recovery unit" means equipment performing the function of separating styrene monomer from other less volatile components of the styrene devolatilizer unit's output. The separated styrene monomer may be reused as a raw material in the polystyrene plant.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.6460 Subfloor

"Subfloor" means, for purposes of 35 Ill. Adm. Code 218 and 219, subflooring material over floor joists, including any load bearing joists. Subflooring is covered by a finish surface material.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.6470 Submerged Loading Pipe

a) "Submerged loading pipe" means, for purposes of 35 Ill. Adm. Code 215, any loading pipe the discharge opening of which is entirely submerged when the liquid level is 6 inches above the bottom of the tank. When applied to a tank which is loaded from the side, "submerged loading pipe" means any loading pipe the discharge of which is entirely submerged when the liquid level is 18 inches or two times the loading pipe diameter, whichever is greater, above the bottom of the tank. The definition ~~shall~~ also ~~apply~~ applies to any loading pipe which is continuously submerged during loading operations.

b) "Submerged loading pipe" means, for purposes of 35 Ill. Adm. Code 218 and 219, any discharge pipe or nozzle which meets either of the following conditions:

1) Where the tank is filled from the top, the end of the discharge pipe or nozzle must be totally submerged when the liquid level is 15 cm (6 in.) above the bottom of the tank.

2) Where the tank is filled from the side, the discharge pipe or nozzle must be totally submerged when the liquid level is 46 cm (18 in.) above the bottom of the tank.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.6490 Substrate

"Substrate" means the surface onto which a coating is applied or into which a coating is impregnated.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.6510 Sulfuric Acid Mist

"Sulfuric acid mist" means sulfuric acid mist as measured according to the method specified in 35 Ill. Adm. Code 214.101(b).

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.6530 Surface Condenser

"Surface condenser" means a device which removes a substance from a gas stream by reducing the temperature of the stream~~,~~ without direct contact between the coolant and the stream.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.6535 Surface Preparation

"Surface ~~Preparation~~preparation" means, for purposes of 35 Ill. Adm. Code 218.187 and 219.187, ~~the removal of~~ removing contaminants such as dust, soil, oil, and grease ~~prior to~~before applying coating, adhesive, or ink ~~applications~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.6540 Surface Preparation Materials

"Surface preparation materials" means materials that are used to remove foreign matter~~,~~ such as wax, tar, grease, and silicone~~,~~ from the surface to be coated.

(Source: Added at 19 Ill. Reg. 6823, effective May 9, 1995)

Section 211.6550 Synthetic Organic Chemical or Polymer Manufacturing Plant

"Synthetic organic chemical or polymer manufacturing plant" means a source that produces, as intermediates or final products, chemicals or polymers.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.6570 Tablet Coating Operation

"Tablet coating operation" means a pharmaceutical coating operation in which tablets are coated.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.6575 Temporary Protective Coating for Aerospace Applications

"Temporary protective coating for aerospace applications" means a coating applied to aerospace surfaces to provide scratch or corrosion protection during manufacturing, storage, or transportation. Two types include peelable protective coatings and alkaline removable coatings. These materials are not intended to protect against strong acid or alkaline solutions. ~~Coatings~~ This definition does not include coatings that provide this type of protection from chemical processing~~ are not included in this category~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.6580 Texture Coat

"Texture coat" means a coating applied to a plastic part which, in its finished form, consists of discrete raised spots of the coating.

(Source: Added at 19 Ill. Reg. 6823, effective May 9, 1995)

Section 211.6583 Thermal Control Coating for Aerospace Applications

"Thermal control coating for aerospace applications" means a coating formulated with specific thermal conductive or radiative properties to permit temperature control of the aerospace substrate.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.6585 Thin Metal Laminating Adhesive

"Thin metal laminating adhesive" means, for purposes of 35 Ill. Adm. Code 218 and 219, any adhesive intended by the manufacturer for use in bonding multiple layers of metal to metal or metal to plastic in the production of electronic or magnetic components in which the thickness of the bond lines is less than 0.25 millimeters.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.6587 Thin Particleboard

"Thin ~~Particleboard~~particleboard" ~~is~~ means a manufactured board ¼ inch or less in thickness made of individual wood particles that have been coated with a binder and formed into flat sheets by pressure.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.6590 Thirty Day Rolling Average

"Thirty day rolling average" means any value arithmetically averaged over any consecutive thirty days.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.6610 Three-Piece Can

"Three-piece can" means a can which is made from a rectangular sheet and two circular ends.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.6620 Three or Four Stage Coating System

"Three or four stage coating system" means a topcoat system composed of a colored basecoat, one or two semi-transparent midcoats, and a transparent clearcoat.

(Source: Added at 19 Ill. Reg. 6823, effective May 9, 1995)

Section 211.6630 Through-the-Valve Fill

"Through-the-value fill" means, with respect to filling ~~of~~ aerosol cans with propellant, a method ~~of filling cans by~~ injecting propellant into the can through and around the outlet tube of the can and aerosol valve. Through-the-valve fill is a different method ~~of fill~~ than under-the-cup fill.

(Source: Added at 18 Ill. Reg. 1253, effective January 18, 1994)

Section 211.6635 Tileboard

"Tileboard" means paneling that has a colored waterproof surface coating.

(Source: Added at 35 Ill. Reg. 13451, effective July 27, 2011)

Section 211.6640 Tire Repair

"Tire repair" means, for purposes of 35 Ill. Adm. Code 218 and 219, a process that includes expanding a hole, tear, fissure, or blemish in a tire casing by grinding or gouging, applying adhesive, and filling the hole or crevice with rubber.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.6650 Tooling Resin

"Tooling resin" means resins used to fabricate molds and fixtures used in manufacturing ~~of~~ fiberglass products.

(Source: Added at 18 Ill. Reg. 1253, effective January 18, 1994)

Section 211.6670 Topcoat

"Topcoat" means:

Except as used in 35 Ill. Adm. Code 218.204(a)(2) and (q)(5) and 219.204(a)(2), (q)(5), and (r), a coating applied to a substrate in a multiple coat operation other than prime coat, primer surfacer coat, or final repair coat;

For purposes of 35 Ill. Adm. Code 218.204(a)(2) and 219.204(a)(2), the final coating system applied to provide the final color and/or a protective finish. The topcoat may be a monocoat color or basecoat/clearcoat system. In-line repair and two-tone are part of topcoat;

For purposes of 35 Ill. Adm. Code 218.204(q)(5) and 219.204(q)(5), any final coating applied to the interior or exterior of a pleasure craft;

For the purposes of 35 Ill. Adm. Code 219.204(r), a coating that is applied over a primer on an aerospace vehicle or component for appearance, identification, camouflage, or protection. ~~Topcoats~~ This definition does not include topcoats that are listed as specialty coatings in 35 Ill. Adm. Code ~~in~~ 219.204(r)(2) ~~are not included in this definition~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.6685 Topcoat for General Aviation Rework Facility

"Topcoat for general aviation rework facility" means a topcoat applied at a general aviation rework facility.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.6690 Topcoat Operation

"Topcoat operation" means the application areas, flash-off areas, and ovens used to apply and dry or cure the topcoat (except final off-line repair) on automobile or light-duty truck bodies or body parts on a single assembly line. A topcoat operation may include other coatings (e.g., blackout, interior color, etc.) that are applied in the same spray booths.

(Source: Amended at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.6695 Topcoat System

"Topcoat system" means the final film or series of films of coating applied to a motor vehicle refinishing surface~~,~~ and includes basecoat/clearcoat systems and three or four stage coating systems.

(Source: Added at 19 Ill. Reg. 6823, effective May 9, 1995)

Section 211.6710 Touch-Up

"Touch-up" means, with respect to polyester resin product manufacturing processes, a portion of the fabrication process that is necessary to cover minor imperfections.

(Source: Added at 18 Ill. Reg. 1253, effective January 18, 1994)

Section 211.6720 Touch-Up Coating

"Touch-up coating" means:

Except as used in 35 Ill. Adm. Code 218.204(q), 219.204(q), and 219.204(r), a coating applied by brush or hand held~~,~~ non-refillable aerosol cans to repair minor surface damage and imperfections;

For purposes of 35 Ill. Adm. Code 218.204(q), 219.204(q), and 219.204(r), a coating used to cover minor coating imperfections appearing after the main coating operation.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.6730 Transfer Efficiency

"Transfer efficiency" means the ratio of the amount of coating solids deposited onto a part or product to the total amount of coating solids used~~,~~ during a particular time period.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.6740 Translucent Coating

"Translucent coating" means, for purposes of 35 Ill. Adm. Code 218 and 219, a coating that contains binders and pigment~~,~~ and is formulated to form a colored, but not opaque, film.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.6750 Tread End Cementing

"Tread end cementing" means the application of a solvent-based cement to the tire tread ends.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.6770 True Vapor Pressure

"True vapor pressure" means the equilibrium partial pressure exerted by a volatile organic liquid as determined in ~~accordance~~ compliance with methods ~~described~~ in American Petroleum Institute Bulletin 2517, "Evaporation Loss From Floating Roof Tanks," second edition, February 1980, ~~(~~incorporated by reference in 35 Ill. Adm. Code 218.112 and 219.112~~)~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.6780 Trunk Interior Coating

"Trunk interior coating" means, for purposes of 35 Ill. Adm. Code 218 and 219, a coating outside of the primer surfacer and topcoat operations applied to the trunk interior to provide chip protection.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.6790 Turnaround

"Turnaround" means, with respect to a refinery process unit, the procedure of shutting down an operating refinery unit~~,~~; emptying gaseous and liquid contents to do inspection, maintenance, and repair work~~,~~; and putting the unit back into production.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.6810 Two-Piece Can

"Two-piece can" means a can that consists of a body manufactured, i.e., drawn, from a single piece of metal and one top or end.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.6825 Underbody Coating

"Underbody coating" means, for purposes of 35 Ill. Adm. Code 218 and 219, a coating applied to the undercarriage or firewall to prevent corrosion and/or provide chip protection.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.6830 Under-the-Cup Fill

"Under-the-cup fill" means, with respect to filling ~~of~~ aerosol cans with propellant, a method ~~of filling cans whereby~~ in which the propellant is introduced through the junction between the annular top of the can and the metal cup which holds the outlet tube and aerosol valve. Under-the-cup fill is a different method ~~of fil~~l than through-the-valve fill.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.6850 Undertread Cementing

"Undertread cementing" means the application of a solvent-based cement to the underside of a tire tread.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.6860 Uniform Finish Blender

"Uniform finish blender" means a thinner or low solids clear solution ~~which is~~ used to melt overspray from a repaired area into the unrepaired color.

(Source: Added at 19 Ill. Reg. 6823, effective May 9, 1995)

Section 211.6870 Unregulated Safety Relief Valve

"Unregulated safety relief valve" means a safety relief valve which cannot be ~~actuated~~ activated ~~by a means~~ other than by high pressure in the pipe or vessel which it protects.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.6880 Vacuum Metallizing

"Vacuum metallizing" means a process ~~whereby~~ in which metal is vaporized and deposited on a substrate in a vacuum chamber.

(Source: Added at 19 Ill. Reg. 6823, effective May 9, 1995)

Section 211.6885 Vacuum Metalizing Coating

"Vacuum metalizing coating" means:

For purposes of 35 Ill. Adm. Code 218.204(q)(1) and (q)(2) and 219.204(q)(1) and (q)(2), the undercoat applied to the substrate on which the metal is deposited or the overcoat applied directly to the metal film;

For purposes of 35 Ill. Adm. Code 218.204(q)(3) and (q)(4) and 219.204(q)(3) and (q)(4), the topcoat and basecoat used in a vacuum-metalizing operation.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.6890 Vacuum Producing System

"Vacuum producing system" means any reciprocating, rotary, or centrifugal blower or compressor or any jet ejector or device that creates suction from a pressure below atmospheric and discharges against a greater pressure.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.6910 Vacuum Service

"Vacuum service" means, for the purpose of Subpart Q of ~~this~~ 35 Ill. Adm. Code 215, 218, and 219, equipment or a component which is operating at an internal pressure that is at least 5 kPa (0.73 psia) below ambient pressure.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.6930 Valves Not Externally Regulated

"Valves not externally regulated" means valves that have no provision for external adjustment or governance, such as in-line check valves, during their operation~~, such as in-line check valves~~.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.6950 Vapor Balance System

"Vapor balance system" means any combination of pipes or hoses which creates a closed system between the vapor spaces of an unloading tank and a receiving tank such that vapors displaced from the receiving tank are transferred to the tank being unloaded.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.6970 Vapor Collection System

"Vapor collection system" means all piping, seals, hoses, connections, pressure-vacuum vents, and other components between the gasoline delivery vessel or marine vessel and the vapor processing unit and/or the storage tanks.

(Source: Amended at 18 Ill. Reg. 16379, effective October 25, 1994)

Section 211.6990 Vapor Control System

"Vapor control system" means any system that limits or prevents release to the atmosphere of organic material in the vapors displaced from a tank or marine vessel during the transfer of gasoline or other volatile organic liquid.

(Source: Amended at 18 Ill. Reg. 16379, effective October 25, 1994)

Section 211.7010 Vapor-Mounted Primary Seal

"Vapor-mounted primary seal" means a primary seal mounted with an air space bounded by the bottom of the primary seal, the tank wall, the liquid surface and the floating roof.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.7030 Vapor Recovery System

"Vapor recovery system" means, with respect to a storage tank~~,~~ storing a volatile organic liquid, a vapor gathering system capable of collecting all ~~volatile organic material (~~VOM~~)~~ vapors and gases discharged from the storage tank and a vapor disposal system capable of processing ~~such~~ these VOM vapors and gases ~~so as~~ to prevent their emission to the atmosphere.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.7050 Vapor Suppressed Polyester Resin

"Vapor suppressed polyester resin" means a polyester resin material which contains catalysts or additives designed to reduce monomer evaporation loss during application and curing.

(Source: Added at 18 Ill. Reg. 1253, effective January 18, 1994)

Section 211.7070 Vinyl Coating

"Vinyl coating" means any protective, decorative, or functional coating or ink applied to vinyl or urethane or vinyl- or ~~urethane~~ urethane-coated fabric which is delivered to a coating line or printing line as a roll, unwound, and coated as a continuous substrate. ~~However,~~This definition does not include a plastisol ~~is not a vinyl coating~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.7090 Vinyl Coating Line

"Vinyl coating line" means a coating line in which any protective, decorative, or functional coating or ink is applied onto vinyl or urethane or vinyl- or ~~urethane~~ urethane-coated fabric which is delivered to a coating line or printing line as a roll, unwound, and coated as a continuous substrate. ~~However,~~This definition does not include application of a plastisol to vinyl or urethane or vinyl- or ~~urethane~~ urethane-coated fabric ~~is not a vinyl coating line or part of a vinyl coating line~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.7110 Volatile Organic Liquid (VOL)

"Volatile organic liquid (VOL)" means any substance which is liquid at storage conditions and ~~which~~ contains volatile organic material.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.7130 Volatile Organic Material Content (VOMC)

"Volatile organic material content (VOMC)" means, for the purpose of 35 Ill. Adm. Code 215, the emissions of volatile organic material which would result from the exposure of a coating,

printing ink, fountain solution, tire spray, dry cleaning waste, or other similar material to the air, including any drying or curing, in the absence of any control equipment. VOMC is typically expressed as kilogram (kg) VOM/liter (lb VOM/gallon) of coating or coating solids, or kg VOM/kg (lb VOM/lb) of coating solids, coating, or material.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.7150 Volatile Organic Material (VOM) or Volatile Organic Compound (VOC)

"Volatile organic material" (~~also~~ "VOM") or "volatile organic compound" (~~also~~ "VOC") means any compound of carbon, excluding carbon monoxide, carbon dioxide, carbonic acid, metallic carbides or carbonates, and ammonium carbonate, that participates in atmospheric photochemical reactions.

a) This definition of VOM includes any organic compound that participates in atmospheric photochemical reactions, other than the compounds listed in this subsection (a). USEPA has determined that the compounds listed in this subsection (a) have negligible photochemical reactivity.

2-Amino-2-methylpropan-1-0l (CAS No. 124-68-5)
Bis(difluoromethoxy)difluoromethane (HFE-235ca12~~HFE-236cal2~~, CAS No. 78522-47-1)
1,2-Bis(difluoromethoxy)-1,1,2,2-tetrafluoroethane (HFE-338pcc13, CAS No. 188690-78-0)
tertiary-Butyl acetate (1,1-dimethylethyl acetic acid ester, CAS No. 540-88-5)
1-Chloro-1,1-difluoroethane (HCFC-142b, CAS No. 75-68-3)
Chlorodifluoromethane (CFC-22, CAS No. 75-45-6)
1-Chloro-1-fluoroethane (HCFC-151a, CAS No. 1615-75-4)
Chlorofluoromethane (HCFC-31, CAS No. 593-70-4)
Chloropentafluoroethane (CFC-115, CAS No. 76-15-3)
2-Chloro-1,1,1,2-tetrafluoroethane (HCFC-124, CAS No. 2837-89-0)
1-Chloro-4-(trifluoromethyl)-benzene (parachlorobenzotrifluoride (PCBTF), CAS No. 98-56-6)
(1E)-1-Chloro-3,3,3-trifluoroprop-1-ene (trans-1-chloro-3,3,3-trifluoroprop-1-ene, CAS No. 102687-65-0)
1,1,1,2,2,3,4,5,5,5-Decafluoro-3-methoxy-4-trifluoromethylpentane (HFE-7300, CAS No. 132182-92-4)
1,1,1,2,3,4,4,5,5,5-Decafluoropentane (HFC 4310mee, CAS No. 138495-42-8)
Dichlorodifluoromethane (CFC-12, CAS No. 75-71-8)
1,1-Dichloro-1-fluoroethane (HCFC-141b, CAS No. 1717-00-6)
Dichloromethane (methylene chloride, CAS No. 75-09-2)
1,3-Dichloro-1,1,2,2,3-pentafluoropropane (HCFC-225cb, CAS No. 507-55-1)

3,3-Dichloro-1,1,1,2,2-pentafluoropropane (HCFC-225ca, CAS No. 422-56-0)
1,2-Dichloro-1,1,2,2-tetrafluoroethane (CFC-114, CAS No. 76-14-2)
1,1-Dichloro-2,2,2-trifluoroethane (HCFC-123, CAS No. 306-83-2)
1,2-Dichloro-1,1,2-trifluoroethane (HCFC-123a, CAS No. 354-23-4)
1,1-Difluoroethane (HFC-152a, CAS No. 75-37-6)
Difluoromethane (HFC-32, CAS No. 75-10-5)
(Difloromethoxy)difluoromethane (HFE-134, CAS No. 1691-17-4)
1-(Difloromethoxy)-2-[(difluoromethoxy)(difluoro)methoxy]-1,1,2,2-tetrafluoroethane (HFE-43-10pccc124, CAS No. 188690-77-9)
2-(Difluoromethoxymethyl)-1,1,1,2,3,3,3-heptafluoropropane (CAS No. 163702-06-5)
Dimethyl carbonate (CAS No. 616-38-6)
Ethane (CAS No. 74-84-0)
2-(Ethoxydifluoromethyl)-1,1,1,2,3,3,3-heptafluoropropane (CAS No. 163702-06-5)
3-Ethoxy-1,1,1,2,3,4,4,5,5,6,6,6-dodecafluoro-2-(trifluoromethyl)hexane (HFE-7500, CAS No. 297730-93-9)
1-Ethoxy-1,1,2,2,3,3,4,4,4-nonafluorobutane (HFE-7200, CAS No. 163702-05-4)
Fluoroethane (ethyl fluoride, HFC-161, CAS No. 353-36-6)
1,1,1,2,2,3,3-Heptafluoro-3-methoxypropane (HFE-7000, CAS No. 375-03-1)
1,1,1,2,3,3,3-Heptafluoropropane (HFC-227ea, CAS No. 431-89-0)
(Z)-1,1,1,4,4,4-Hexafluorobut-2-ene (HFO-1336mzz-Z, CAS No. 692-49-9)
1,1,1,2,3,3-Hexafluoropropane (HFC-236ea, CAS No. 431-63-0)
1,1,1,3,3,3-Hexafluoropropane (HFC-236fa, CAS No. 690-39-1)
Methane (CAS No. 74-82-8)
Methyl acetate (methyl ethanoate, CAS No. 79-20-9)
4-Methyl-1,3-dioxolan-2-one (propylene carbonate, CAS No. 108-32-7)
Methyl formate (methyl methanoate, CAS No. 107-31-3)
1,1,1,2,2,3,3,4,4-Nonafluoro-4-methoxybutane (HFE-7100, CAS No. 163702-07-6)
1,1,1,3,3-Pentafluorobutane (HFC-365mfc, CAS No. 406-58-6)
Pentafluoroethane (HFC-125, CAS No. 354-33-6)
1,1,1,2,3-Pentafluoropropane (HFC-245eb, CAS No. 431-31-2)
1,1,1,3,3-Pentafluoropropane (HFC-245fa, CAS No. 460-73-1)
1,1,2,2,3-Pentafluoropropane (HFC-245ca, CAS No. 679-86-7)
1,1,2,3,3-Pentafluoropropane (HFC-245ea, CAS No. 24270-66-4)
Perfluorocarbon compounds that fall into the following classes:
    Cyclic, branched, or linear, completely fluorinated alkanes
    Cyclic, branched, or linear, completely fluorinated ethers with no unsaturations
    Cyclic, branched, or linear, completely fluorinated tertiary amines with no unsaturations

Sulfur-containing perfluorocarbons with no unsaturations and with sulfur bonds only to carbon and fluorine
Propan-2-one (acetone or dimethylketone, CAS No. 67-64-1)
Siloxanes: cyclic, branched, or linear completely-methylated
Tetrachloroethene (perchloroethylene, CAS No. 127-18-4)
1,1,1,2-Tetrafluoroethane (HFC-134a, CAS No. 811-97-2)
1,1,2,2-Tetrafluoroethane (HFC-134, CAS No. 359-35-3)
(1E)-1,3,3,3-Tetrafluoropropene (trans-1,3,3,3-tetrafluoropropene, (HFO-1234ze, CAS No. 29118-24-9)
2,3,3,3-Tetrafluoroprop-1-ene (HFO-1234yf, CAS No. 754-12-1)
1,1,2,2-tetrafluoro-1-(2,2,2-trifluoroethoxy)ethane (HFE-347pcf2, CAS No. 406-78-0)
Trans-1,1,1,4,4,4-hexafluorobut-2-ene (also known as HFO-1336mzz(E); CAS number 66711-86-2))
1,1,1-Trichloroethane (methyl chloroform, CAS No. 71-55-6)
Trichlorofluoromethane (CFC-11, CAS No. 75-69-4)
1,1,2-Trichloro-1,2,2-trifluoroethane (CFC-113, CAS No. 76-13-1)
1,1,1-Trifluoroethane (HFC-143a, CAS No. 420-46-2)
Trifluoromethane (HFC-23, CAS No. 75-46-7)

b) For purposes of determining VOM emissions and compliance with emissions limits, VOM ~~will~~ must be measured by the test methods in the approved implementation plan or 40 CFR 60, appendix A, incorporated by reference at 35 Ill. Adm. Code 215.105, 218.112, and 219.112, as applicable, or by source-specific test methods ~~that have been~~ established under a permit issued under a program approved or promulgated under Title V of the Clean Air Act; under 35 Ill. Adm. Code 203; or under Section 9.1(d) of the Act. If such a method also measures compounds with negligible photochemical reactivity, these negligibly-reactive compounds may be excluded as VOM if the amount of those compounds is accurately quantified and the Agency approves the ~~exclusion is approved by the Agency~~.

c) As a precondition to excluding these negligibly-reactive compounds as VOM, or at any time after exclusion, the Agency may require an owner or operator to provide monitoring or testing methods and results demonstrating, to the satisfaction of the Agency, the amount of negligibly reactive compounds in the source's emissions.

d) The USEPA will not be bound by any State determination as to appropriate methods for testing or monitoring negligibly reactive compounds if the determination is not ~~reflected in~~ any of the test methods in subsection (b).

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.7170 Volatile Petroleum Liquid

"Volatile petroleum liquid" means any petroleum liquid with a true vapor pressure that is greater than 1.5 psia (78 millimeters of mercury) at standard conditions.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.7190 Wash Coat

"Wash coat" means a coating containing binders which seals wood surfaces, prevents undesired staining, and controls penetration.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.7200 Washoff Operations

"Washoff operations" means those operations in which organic solvent is used to remove coating from a substrate.

(Source: Added at 22 Ill. Reg. 3497, effective February 2, 1998)

Section 211.7210 Wastewater (Oil/Water) Separator

"Wastewater (oil/water) separator" means any device or piece of equipment which ~~utilizes~~ uses the difference in density between oil and water to remove oil and associated chemicals from water, or any device, such as a flocculation tank or a clarifier, which removes ~~petroleum derived~~petroleum-derived compounds from waste water.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.7220 Waterproof Resorcinol Glue

"Waterproof resorcinol glue" means, for purposes of 35 Ill. Adm. Code 218 and 219, a two-part ~~resoreinol~~ resorcinal resin-based adhesive designed for applications where the bond line must be resistant to conditions of continuous immersion in fresh or salt water.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.7230 Weak Nitric Acid Manufacturing Process

"Weak nitric acid manufacturing process" means any ~~acid producing~~acid-producing facility manufacturing nitric acid with a concentration of less than 70 percent by weight.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.7240 Weatherstrip Adhesive

"Weatherstrip adhesive" means, for purposes of Subparts F of 35 Ill. Adm. Code 218 and 219, an adhesive~~,~~ used at an automobile or light-duty truck assembly coating facility~~,~~ applied to weatherstripping materials for the purpose of bonding the weatherstrip material to the surface of the vehicle.

(Source: Added at 34 Ill. Reg. 14119, effective September 14, 2010)

Section 211.7250 Web

"Web" means a substrate which is coated or printed as a continuous substrate after being unrolled from the roll in which the substrate is delivered to a line.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.7260 Wet Fastener Installation Coating

"Wet fastener installation coating" means a primer or sealant applied by dipping, brushing, or daubing to fasteners that are installed before the coating is cured.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.7270 Wholesale Purchase - Consumer

"Wholesale purchase - consumer" means any person or organization that purchases or obtains gasoline from a supplier for ultimate consumption or use in motor vehicles and receives delivery of gasoline into a storage tank with a capacity of at least 2082 liters (550 gallons) owned and controlled by that person.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.7275 Wing Coating

"Wing coating" means a corrosion-resistant topcoat that is resilient enough to withstand the flexing of the wings.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.7290 Wood Furniture

"Wood furniture" means room furnishings, including cabinets (kitchen, bath~~,~~ and vanity), tables, chairs, beds, sofas, shutters, art objects, wood paneling other than flat wood paneling, wood flooring~~,~~ and any other coated furnishings made of wood, wood composition~~,~~ or fabricated wood materials.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.7310 Wood Furniture Coating

"Wood furniture coating" means any protective, decorative, or functional coating applied to wood furniture or wood furniture parts.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.7330 Wood Furniture Coating Line

"Wood furniture coating line" means a coating line in which any protective, decorative, or functional coating is applied to wood furniture or wood furniture parts.

(Source: Added at 17 Ill. Reg. 16504, effective September 27, 1993)

Section 211.7350 Woodworking

"Woodworking" means the shaping, sawing, grinding, smoothing, polishing, and making into products of any form or shape of wood.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 211.7400 Yeast Percentage

"Yeast percentage" means lbs of yeast per hundred lbs of total flour in the recipe, expressed as a percentage.

(Source: Added at 19 Ill. Reg. 6823, effective May 9, 1995)

~~BOARD NOTE: This Part implements the Illinois Environmental Protection Act as of July 1, 1994.~~

SUBPART A: GENERAL

Section 212.100 Scope and Organization

a) This Part contains standards and limitations for visible and particulate matter emissions from stationary emission units.

b) Permits for sources subject to this Part may be required ~~pursuant to~~under 35 Ill. Adm. Code 201.

c) Notwithstanding the provisions of this Part, the air quality standards ~~contained in~~under 35 Ill. Adm. Code 243 may not be violated.

d) This Part includes the following Subparts ~~which are arranged as follows~~:

1) Subpart A: General Provisions;

2) Subpart B: Visible Emissions;

3) Subparts C-J: Incinerators and Fuel Combustion Emission Units;

4) Subparts K-M: Fugitive and Process Emission Units;

5) Subparts N-T: ~~Site specific~~Site-specific and ~~industry specific~~industry-specific rules; and

6) Subpart U: Additional control measures.

~~e) Rules have been grouped for the convenience of the public; the scope of each is determined by its language and history.~~

BOARD NOTE: While subsection (d) describes the organization of this Part, the rules themselves establish their applicability and effect.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.107 Measurement Method for Visible Emissions

For both fugitive and nonfugitive particulate matter emissions, ~~a determination as to~~determining the presence or absence of visible emissions from emission units ~~shall~~ must be conducted in ~~accordance~~ compliance with Method 22, 40 CFR part 60, Appendix A, incorporated by reference in Section 212.113 ~~of this Subpart~~, except that the length of the observing period ~~shall be~~is at the discretion of the observer~~,~~ but must not be less than one minute. This Subpart ~~shall~~ does not apply to Section 212.301 ~~of this Part~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.108 Measurement Methods for PM-10 Emissions and Condensible PM-10 Emissions

a) Emissions of PM-10 ~~shall~~ must be measured by any of the following methods at the option of the owner or operator of an emission unit.

1) Method 201, 40 CFR part 51, Appendix M, incorporated by reference in Section 212.113 ~~of this Subpart~~.

2) Method 201A, 40 CFR part 51, Appendix M, incorporated by reference in Section 212.113 ~~of this Subpart~~.

3) Method 5, 40 CFR part 60, Appendix A, incorporated by reference in Section 212.113 ~~of this Subpart~~, provided that all particulate matter measured by Method 5 ~~shall~~ must be considered to be PM-10.

b) Emissions of ~~condensible~~ condensable PM-10 ~~shall~~ must be measured by Method 202, 40 CFR part 51, Appendix M, incorporated by reference in Section 212.113 ~~of this Subpart~~.

c) The volumetric flow rate and gas velocity for stack test methods ~~shall~~ must be determined in ~~accordance~~ compliance with Methods 1, 1A, 2, 2A, 2C, 2D, 3, or 4, 40 CFR part 60, Appendix A, incorporated by reference in Section 212.113 ~~of this Subpart~~.

d) ~~Upon~~ After a written notification by the Illinois Environmental Protection Agency ~~(Agency)~~, the owner or operator of a PM-10 emission unit subject to this Section ~~shall~~ must conduct the applicable testing for PM-10 emissions, ~~condensible~~ condensable PM-10 emissions, opacity~~,~~ or visible emissions at ~~such person's~~the owner's or operator's own expense~~,~~ to demonstrate compliance. ~~Such~~ These test

results ~~shall~~ must be submitted to the Agency within ~~thirty (~~30~~)~~ days after conducting the test unless the Agency agrees to an alternative time to submit them ~~for submittal is agreed to by the Agency~~.

e) A person planning to conduct testing for PM-10 or ~~condensible~~ condensable PM-10 emissions to demonstrate compliance ~~shall~~ must give written notice of that intent to the Agency ~~of that intent. Such notification shall be given~~ at least ~~thirty (~~30~~)~~ days ~~prior to initiation of~~before initiating the test unless the Agency agrees to a shorter pre-notification ~~is agreed to by the Agency~~. ~~Such~~ The notification ~~shall~~ must state the specific test methods from subsection (a) ~~of this Section~~ that will be used.

f) The owner or operator of an emission unit subject to this Section ~~shall~~ must retain records of all tests which are performed. These records ~~shall~~ must be retained for at least three ~~(3)~~ years after the date a test is performed.

g) This Section ~~shall~~ must not affect the authority of the United States Environmental Protection Agency ~~(USEPA)~~ under Section 114 of the Clean Air Act ~~(CAA)~~ (42 U.S.C. § 7414 (1990)).

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.109 Measurement Methods for Opacity

Except as otherwise provided in this Part, and except for the methods of data reduction when applied to Sections 212.122 and 212.123 ~~of this Part~~, measurements of opacity ~~shall~~ must be conducted in ~~accordance~~ compliance with Method 9, 40 CFR part 60, Appendix A, and the procedures in 40 CFR 60.675(c) and (d), if applicable, incorporated by reference in Section 212.113 ~~of this Subpart~~, except that for roadways and parking areas the number of readings required for each vehicle pass will be three taken at 5-second intervals. The first reading ~~shall~~ must be at the point of maximum opacity, and second and third readings ~~shall~~ must be made at the same point, the observer standing at right angles to the plume at least 15 feet away from the plume and observing 4 feet above the surface of the roadway or parking area. After four vehicles have passed, the 12 readings will be averaged.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.110 Measurement Methods ~~For~~ for Particulate Matter

a) Measurement of particulate matter emissions from stationary emission units subject to this Part ~~shall~~ must be conducted in ~~accordance~~ compliance with 40 CFR part 60, Appendix A, Methods 5, 5A, 5D, or 5E, ~~as~~ incorporated by reference in Section 212.113 ~~of this Subpart~~.

b) The volumetric flow rate and gas velocity ~~shall~~ must be determined in ~~accordance~~ compliance with 40 CFR part 60, Appendix A, Methods 1, 1A, 2, 2A, 2C, 2D, 3, and 4, incorporated by reference in Section 212.113~~ of this Subpart~~.

c) ~~Upon a~~After written notification by the Agency, the owner or operator of a particulate matter emission unit subject to this Part ~~shall~~ must conduct the applicable testing for particulate matter emissions, opacity, or visible emissions at ~~such person's~~the owner's or operator's own expense~~,~~ to demonstrate compliance. ~~Such~~ The test results ~~shall~~ must be submitted to the Agency within ~~thirty (~~30~~)~~ days after conducting the test unless the Agency agrees to an alternative time ~~for submittal is agreed to by the Agency~~to submit them.

d) A person planning to conduct testing for particulate matter emissions to demonstrate compliance ~~shall~~ must give written notice of that intent to the Agency ~~of that intent. Such notification shall be given~~ at least ~~thirty (~~30~~)~~ days ~~prior to the initiation of~~before initiating the test unless the Agency agrees to a shorter period ~~is agreed to by the Agency~~to submit them. ~~Such~~ This notification ~~shall~~ must state the specific test methods from this Section that will be used.

e) The owner or operator of an emission unit subject to this Part ~~shall~~ must retain records of all tests which are performed~~. These records shall be retained~~ for at least three ~~(3)~~ years after the date the owner or operator performs a test ~~is performed~~.

f) This Section ~~shall~~ must not affect the authority of the USEPA under Section 114 of the CAA.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.111 Abbreviations and Units

a) ~~The~~ This Part uses the following abbreviations ~~are used in this Part~~:

btu	British thermal units (~~60 1/4~~¼°~~F~~60 ¼ °F)
dscf	dry standard cubic foot
ft	foot
ft^2	square feet
fpm	feet per minute
gal	gallon
gr	grains
gr/scf	grains per standard cubic foot
gr/dscf	grains per dry standard cubic foot
hr	hour
J	Joule
kg	kilogram
kg/MW-hr	kilograms per megawatt-hour

km	kilometer
L or l or ℓ	liter
lbs	pounds
lbs/hr	pounds per hour
lbs/mmbtu	pounds per million btu
m	meter
m^2	square meters
mph	miles per hour
mg	milligram
mg/scm	milligrams per standard cubic meter
mg/dscm	milligrams per dry standard cubic meter
mg/L	milligrams per liter
Mg	megagram, metric ton or tonne
mi	mile
mmbtu	million British thermal units
mmbtu/hr	million British thermal units per hour
MW	megawatt; one million watts
MW-hr	megawatt-hour
ng	nanogram; one billionth of a gram
ng/J	nanograms per Joule
scf	standard cubic foot
scfm	standard cubic feet per minute
scm	standard cubic meter
T	short ton (2000 lbs)
yd^2	square yards

b) ~~The~~ This Part uses the following conversion factors ~~have been used in this Part~~:

English	Metric
2.205 lb	1 kg
1 T	0.907 Mg
1 lb/T	0.500 kg/Mg
mmbtu/hr	0.293 MW
1 lb/mmbtu	1.548 kg/MW-hr or 430 ng/J
1 mi	1.61 km
1 gr	64.81 mg
1 gr/scf	2289 mg/scm
1 ft^2	0.0929 m^2
1 ft	0.3048 m
1 gal	3.785 L

Section 212.112 Definitions

The definitions of 35 Ill. Adm. Code 201 and 211 apply to this Part.

(Source: Added and codified at 7 Ill. Reg. 13591)

Section 212.113 Incorporations by Reference

The following materials are incorporated by reference. These incorporations do not include any later amendments or editions.

a) 40 CFR part 60, Appendix A (1991):

1) Method 1: Sample and Velocity Traverses for Stationary Sources;

2) Method 1A: Sample and Velocity Traverses for Stationary Source with Small Stacks or Ducts;

3) Method 2: Determination of Stack Gas Velocity and Volumetric Flow Rate (Type S pitot tube);

4) Method 2A: Direct Measurement of Gas Volume Through Pipes and Small Ducts;

5) Method 2C: Determination of Stack Gas Velocity and Volumetric Flow Rate in Small Stacks or Ducts (Standard Pitot Tube);

6) Method 2D: Measurement of Gas Volumetric Flow Rates in Small Pipes and Ducts;

7) Method 3: Gas Analysis for Carbon Dioxide, Oxygen, Excess Air, and Dry Molecular Weight;

8) Method 4: Determination of Moisture Content in Stack Gases;

9) Method 5: Determination of Particulate Emissions From Stationary Sources;

10) Method 5A: Determination of Particulate Emissions From the Asphalt Processing and Asphalt Roofing Industry;

11) Method 5D: Determination of Particulate Matter Emissions From Positive Pressure Fabric Filters;

12) Method 5E: Determination of Particulate Emissions From the Wool Fiberglass Insulation Manufacturing Industry;

13) Method 9: Visual Determination of the Opacity of Emissions from Stationary Sources;

14) Method 22: Visual Determination of Fugitive Emissions from Material Sources and Smoke Emissions from Flares.

b) 40 CFR part 51 Appendix M (1994):

1) Method 201: Determination of PM-10 Emissions;

2) Method 201A: Determination of PM-10 Emissions (Constant Sampling Rate Procedure);

3) Method 202: Determination of Condensible Particulate Emissions from Stationary Sources.

c) 40 CFR 60.672(b), (c), (d) and (e) (1991).

d) 40 CFR 60.675(c) and (d) (1991).

SUBPART B: VISIBLE EMISSIONS

Section 212.121 Opacity Standards (Repealed)

(Source: Repealed at 20 Ill. Reg.7605, effective May 22, 1996)

Section 212.122 Visible Emissions Limitations for Certain Emission Units For Which Construction or Modification Commenced On or After April 14, 1972

a) ~~No~~ A person ~~shall~~ must not cause or allow the emission of smoke or other particulate matter having an opacity greater than 20 percent into the atmosphere from any fuel combustion emission unit with actual heat input greater than 73.2 MW (250 mmbtu/hr) for which construction or modification commenced on or after April 14, 1972, ~~with actual heat input greater than 73.2 MW (250 mmbtu/hr), having an opacity greater than 20 percent~~.

b) The emissions of smoke or other particulate matter from any such emission unit may have an opacity greater than 20 percent but not greater than 40 percent for a period or periods aggregating 3 minutes in any ~~60 minute~~60-minute period, ~~providing that such~~if opaque emission permitted during any ~~60 minute~~60-minute period ~~shall~~ occur from only one ~~such~~ emission unit located within a 305 m (1000 ft) radius from the center point of any other ~~such~~ emission unit owned or operated by ~~such~~ that person and ~~provided further that such~~if opaque emissions ~~permitted~~ from each ~~such~~ fuel combustion emission unit ~~shall be~~are limited to 3 times in any ~~24 hour~~24-hour period.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.123 Visible Emissions Limitations for All Other Emission Units

a) ~~No~~ A person ~~shall~~ must not cause or allow the emission of smoke or other particulate matter~~,~~ with an opacity greater than 30 percent~~,~~ into the atmosphere from any emission unit other than those ~~emission units~~ subject to Section 212.122 ~~of this Subpart~~.

b) The emission of smoke or other particulate matter from any such emission unit may have an opacity greater than 30 percent but not greater than 60 percent for a period or periods aggregating 8 minutes in any ~~60 minute~~60-minute period ~~provided that such~~if opaque emissions permitted during any ~~60 minute~~60-minute period ~~shall~~ occur from only one ~~such~~ emission unit located within a 305 m (1000 ft) radius from the center point of any other ~~such~~ emission unit owned or operated by ~~such~~ that person~~,~~ and ~~provided further that such~~if opaque emissions ~~permitted~~ from each ~~such~~ emission unit ~~shall be~~are limited to 3 times in any ~~24 hour~~24-hour period.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.124 Exceptions

a) Sections 212.122 and 212.123 will not apply to emissions of water or water vapor from an emission unit.

b) An emission unit that has obtained an adjusted opacity standard in compliance with Section 212.126 will be subject to that standard rather than the limitations of Section 212.122 or 212.123.

c) Compliance with the particulate regulations of this Part will constitute a defense.

1) For all emission units that are not subject to Chapters 111 or 112 of the CAA and Sections 212.201, 212.202, 212.203, or 212.204 but are subject to Sections 212.122 or 212.123~~:~~, the opacity limitations of Sections 212.122 and 212.123 will not apply if it is shown that the emission unit was, at the time of emission, in compliance with the applicable particulate emissions limitations of Subparts D through T.

2) For all emission units that are not subject to Chapters 111 or 112 of the CAA but are subject to Sections 212.201, 212.202, 212.203, or 212.204:

A) An exceedance of the limitations of Section 212.122 or 212.123 will constitute a violation of the applicable particulate limitations of Subparts D through T. It will be a defense to a violation of the applicable particulate limitations if, during a subsequent performance test conducted within a reasonable time not to exceed 60 days, under the same operating conditions for the unit and the control devices, and in ~~accordance~~ compliance with Method 5, 40 CFR 60, incorporated by reference in Section 212.113, the owner or operator shows that the emission unit is in compliance with the particulate emission limitations.

B) It will be a defense to an exceedance of the opacity limit if, during a subsequent performance test conducted within a reasonable time not to exceed 60 days, under the same operating conditions of the emission unit and the control devices, and in ~~accordance~~ compliance with Method 5, 40 CFR ~~part~~ 60, Appendix A, incorporated by reference in Section 212.113, the owner or operator shows that the emission unit is in compliance with the allowable particulate emissions limitation while, simultaneously, having visible emissions equal to or greater than the opacity exceedance as originally observed.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.125 Determination of Violations

Violations of Sections 212.122 and 212.123 ~~of this Subpart shall~~must be determined by:

a) ~~By visual~~Visual observations conducted in ~~accordance~~ compliance with Section 212.109~~ of this Part~~; or

b) ~~By the use~~Use of a calibrated smoke evaluation device approved by the Agency ~~as specified in~~under Subpart J of 35 Ill. Adm. Code 201; or

c) ~~By the use~~Use of a smoke monitor located in the stack and approved by the Agency ~~as specified in~~under Subpart J or L of 35 Ill. Adm. Code 201.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.126 Adjusted Opacity Standards Procedures

a) ~~Pursuant to~~Under Section 28.1 of the Environmental Protection Act (Act) [415 ILCS 5/28.1], and in ~~accordance~~ compliance with 35 Ill. Adm. Code 106, Subpart E, ~~provisions for~~ adjusted standards for visible emissions for emission units subject to Sections 212.201, 212.202, 212.203, or 212.204 ~~of this Part shall~~may be granted by the Board to the extent consistent with federal law based upon a demonstration by ~~such~~ an owner or operator that the results of a performance test conducted ~~pursuant to~~under this Section, Section 212.110~~ of this Part~~, and Methods 5 and 9 of 40 CFR ~~part~~ 60, Appendix A, incorporated by reference in Section 212.113~~ of this Part~~, show that the emission unit meets the applicable particulate emission limitations at the same time that the visible emissions exceed the otherwise applicable standards of Sections 212.121 through 212.125~~ of this Subpart~~. ~~Such adjusted~~Adjusted opacity limitations must:

1) ~~Shall be~~Be specified as a condition in operating permits issued ~~pursuant to~~under 35 Ill. Adm. Code 201 and Section 39.5 of the Act;

2) ~~Shall substitute~~Substitute for that limitation otherwise applicable;

3) ~~Shall not~~Not allow an opacity greater than 60 percent at any time; and

4) ~~Shall allow~~Allow opacity for one six-minute averaging period in any ~~60 minute~~60-minute period to exceed the adjusted opacity standard.

b) ~~For the purpose of establishing~~To establish an adjusted opacity standard, any owner or operator of an emission unit which meets the requirements of subsection (a) ~~of this Section,~~ may request the Agency to determine the average opacity of the emissions from the emission unit during any performance tests conducted ~~pursuant to~~under Section 212.110 ~~of this Part~~ and Methods 5 and 9 of 40 CFR ~~part~~ 60, Appendix A, incorporated by reference in Section 212.113~~ of this Part~~.

The Agency ~~shall~~ must refuse to accept the results of emissions tests if not conducted ~~pursuant to~~in compliance with this Section.

c) Any request ~~for the determination of~~to determine the average opacity of emissions ~~shall~~ must be made in writing, ~~shall~~ must include the time and place of the performance test and test specifications and procedures, and ~~shall~~ must be submitted to the Agency at least ~~thirty (~~30~~)~~ days before the proposed test date.

d) The Agency will advise the owner or operator of an emission unit which has requested an opacity determination of any deficiencies in the proposed test specifications and procedures as expeditiously as practicable but no later than ~~ten (~~10~~)~~ days ~~prior to~~before the proposed test date ~~so as~~ to minimize any disruption of the proposed testing schedule.

e) The owner or operator ~~shall~~ must allow Agency personnel to be present during the performance test.

f) The method for determining an adjusted opacity standard is as follows:

1) A minimum of 60 consecutive minutes of opacity readings obtained in ~~accordance~~ compliance with Test Method 9, 40 CFR ~~part~~ 60, Appendix A, incorporated by reference in Section 212.113 ~~of this Part~~, ~~shall~~ must be taken during each sampling run. ~~Therefore, for~~For each performance test, ~~(~~which normally consists of three sampling runs~~)~~, a total of three sets of opacity readings totaling three hours or more ~~shall~~ must be obtained. Concurrently, the particulate emissions data from three sampling runs obtained in ~~accordance~~ 433ortland4331 with Test Method 5, 40 CFR ~~part~~ 60, Appendix A, incorporated by reference in Section 212.113 ~~of this Part~~, ~~shall~~ must also be obtained.

2) After the results of the performance tests are received from the emission unit, the Agency must determine the status of compliance with the applicable particulate emissions limitation ~~shall be determined by the Agency~~. In ~~accordance~~ compliance with Test Method 5, 40 CFR ~~part~~ 60, Appendix A, incorporated by reference in Section 212.113 ~~of this Part~~, the average of the results of the three sampling runs must be less than the allowable particulate emission rate in order for the emission unit to be considered in compliance. If compliance is demonstrated, then only those test runs with results which are less than the allowable particulate emission rate ~~shall~~ must be considered as acceptable test runs for the purpose of establishing an adjusted opacity standard.

3) The opacity readings for each acceptable sampling run ~~shall~~ must be divided into sets of 24 consecutive readings. The ~~six (6) minute~~six-minute average opacity for each set ~~shall~~ must be determined by dividing the sum of the 24 readings within each set by 24.

4) The second highest ~~six (6) minute~~six-minute average opacity obtained ~~in~~ under subsection (f)(3) ~~of this Section shall~~must be selected as the adjusted opacity standard.

g) The owner or operator ~~shall~~ must submit a written report of the results of the performance test to the Agency at least ~~thirty (~~30~~)~~ days ~~prior to~~before filing a petition for an adjusted standard with the Board.

h) If, upon review of ~~such~~ the owner~~'~~'s or operator~~'~~'s written report of the results of the performance tests, the Agency determines that the emission unit is in compliance with all applicable emission limitations for which the performance tests were conducted, but fails to comply with ~~the requirements of~~ Section 212.122 or 212.123 ~~of this Subpart~~, the Agency ~~shall~~ must notify the owner or operator as expeditiously as practicable, but no later than ~~twenty (~~20~~)~~ days after receiving the written report of any deficiencies in the results of the performance tests.

i) The owner or operator may petition the Board for an adjusted visible emission standard ~~pursuant to~~under 35 Ill. Adm. Code 106.Subpart E. In addition to the requirements of 35 Ill. Adm. Code 106.Subpart E, the petition ~~shall~~ must include the following information:

1) A description of the business or activity of the petitioner, including its location and relevant pollution control equipment;

2) The quantity and type of materials discharged from the emission unit or control equipment for which the adjusted standard is requested;

3) A copy of any correspondence between the petitioner and the Agency regarding the performance tests which form the basis of the adjusted standard request;

4) A copy of the written report submitted to the Agency ~~pursuant to~~under subsection (g) ~~of this Section~~;

5) A statement that the performance tests were conducted in ~~accordance~~ compliance with this Section and the conditions and procedures accepted by the Agency ~~pursuant to~~under Section 212.110 ~~of this Part~~;

6) A statement regarding the specific limitation requested; and

7) A statement ~~as to~~ whether the Agency has sent notice of deficiencies in the results of the performance test ~~pursuant to~~under subsection (h) ~~of this Section~~ and, if so, a copy of ~~said~~ that notice.

j) ~~In order to~~To qualify for an adjusted standard, the owner or operator must justify ~~as follows~~:

1) That the performance tests were conducted in ~~accordance~~ compliance with Test Methods 5 and 9, 40 CFR ~~part~~ 60, Appendix A, incorporated by reference in Section 212.113 ~~of this Part~~, and the conditions and procedures accepted by the Agency ~~pursuant to~~under Section 212.110 ~~of this Part~~;

2) That the emission unit and associated air pollution control equipment were operated and maintained in a manner so as to minimize the opacity of the emissions during the performance tests; and

3) That the proposed adjusted opacity standard was determined in ~~accordance~~ compliance with subsection (f) ~~of this Section~~.

k) Nothing in this Section ~~shall~~ must prevent any person from initiating or participating in a rulemaking, variance, or permit appeal proceeding before the Board.

(Source: Amended at 48 Ill. Reg._____, effective _____)

SUBPART D: PARTICULATE MATTER EMISSIONS FROM INCINERATORS

Section 212.181 Limitations for Incinerators

a) ~~No~~ A person ~~shall~~ must not cause or allow the emission of particulate matter into the atmosphere from any incinerator burning more than 27.2 Mg/hr (60,000 lbs/hr) of refuse to exceed 115 mg (0.05 gr/scf) of effluent gases corrected to 12 percent carbon dioxide.

b) ~~No~~ A person ~~shall~~ must not cause or allow the emission of particulate matter into the atmosphere from any incinerator burning more than 0.907 Mg/hr (2000 lbs/hr) but less than 27.2 Mg/hr (60,000 lbs/hr) of refuse to exceed 183 mg/scm (0.08 gr/scf) of effluent gases corrected to 12 percent carbon dioxide.

c) ~~No~~ A person ~~shall~~ must not cause or allow the emission of particulate matter into the atmosphere from all other incinerators for which construction or modification commenced ~~prior to~~before April 14, 1972, to exceed 458 mg/scm (0.2 gr/scf) of effluent gases corrected to 12 percent carbon dioxide.

d) ~~No~~ A person ~~shall~~ must not cause or allow the emission of particulate matter into the atmosphere from all other incinerators for which construction or modification commenced on or after April 14, 1972, to exceed 229 mg/scm (0.1 gr/scf) of effluent gases corrected to 12 percent carbon dioxide.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.182 Aqueous Waste Incinerators

Section 212.181(d) ~~of this Subpart shall~~must not apply to aqueous waste incinerators which, when corrected to 50 percent excess air for combined fuel and charge incineration, produce stack gas containing carbon dioxide dry-basis volume concentrations of less than 1.2 percent from the charge alone, if all the following conditions are met:

a) The emission of particulate matter into the atmosphere from any such incinerator does not exceed 229 mg/scm (0.1 gr/scf), dry basis, when corrected to 50 percent excess air for combined fuel and charge incineration; and

b) The waste charge to the incinerator does not exceed 907 kg/hr (2000 lbs/hr).

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.183 Certain Wood Waste Incinerators

~~Exception:~~ Section 212.181(a), (b), and (d) ~~of this Subpart shall~~must not apply to incinerators which burn wood wastes exclusively, if all the following conditions are met:

a) The emission of particulate matter from such incinerator does not exceed 458 mg (0.2 gr/scf) of effluent gases corrected to 12 percent carbon dioxide;

b) The location of such incinerator is not in a restricted area, and is more than 305 m (1000 ft) from residential or other populated areas; and

c) ~~When it~~It can be affirmatively demonstrated that no economically reasonable alternative method of disposal is available.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.184 Explosive Waste Incinerators

a) Section 212.181 ~~of this Subpart shall~~must not apply to certain existing small explosive waste incinerators if all of the following conditions are met:

1) The incinerator burns explosives or explosive contaminated waste exclusively;

2) The incinerator burns 227 kg/hr (500 lbs/hr) or less of waste;

3) All incinerators on the same site operate a total of six ~~(6)~~ hours or less in any day; and

4) The incinerator was in existence ~~prior to~~before December 6, 1976, and is located in Williamson County in Section 3, Township 9 South, Range 2 East of the Third Principal Meridian.

b) ~~No~~ A person ~~shall~~ must not cause or allow the emission of particulate matter into the atmosphere from any such existing small explosive waste incinerator to exceed 7140 mg/kg (50.0 gr/lb) of combined waste and auxiliary fuel burned.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.185 Continuous Automatic Stoking Animal Pathological Waste Incinerators

a) Section 212.181 ~~of this Subpart shall~~does not apply to continuous automatic stoking pathological waste incinerators if all of the following conditions are met.

1) The incinerator burns animal pathological waste exclusively, except as otherwise prescribed by the Agency during specified test operation.

2) The incinerator burns no more than 907 kg/hr (2000 lbs/hr) of waste.

3) The incinerator ~~shall be~~is a multi-stage controlled air combustion incinerator having cyclical pulsed stoking hearth.

b) ~~No~~ A person ~~shall~~ must not cause or allow the emission of particulate matter into the atmosphere from any continuous automatic stoking pathological waste incinerator to exceed 1 gram of emission per 1 kg of animal pathological waste charge (0.1 lb/100 lb).

c) The particulate matter emissions produced when burning animal pathological waste using gaseous auxiliary fuel~~,~~ such as natural gas~~, shall~~ must not exceed the lbs/hr emission rate equivalent to the maximum concentration rate ~~set forth~~ in Section 212.181(d) ~~of this Subpart,~~ when applied to burning a maximum of 2000 lb of mixed charge animal pathological waste plus solid waste for demonstration of compliance. ~~"~~"Mixed charge~~"~~" ~~shall~~ must contain no more than 25 percent by weight of solid waste other than animal pathological waste.

(Source: Amended at 48 Ill. Reg._____, effective _____)

SUBPART E: PARTICULATE MATTER EMISSIONS FROM FUEL COMBUSTION EMISSION UNITS

Section 212.201 Emission Units For Which Construction or Modification Commenced Prior to April 14, 1972, Using Solid Fuel Exclusively Located in the Chicago Area

~~No~~ A person ~~shall~~ must not cause or allow the emission of particulate matter into the atmosphere from any fuel combustion emission unit for which construction or modification commenced ~~prior~~

~~to~~before April 14, 1972, using solid fuel exclusively, located in the Chicago major metropolitan area, to exceed 0.15 kg of particulate matter per MW-hr of actual heat input in any ~~one hour~~one-hour period (0.10 lbs/mmbtu/hr) except as provided in Section 212.203 ~~of this Subpart~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.202 Emission Units For Which Construction or Modification Commenced Prior to April 14, 1972, Using Solid Fuel Exclusively Located Outside the Chicago Area

~~No~~ A person ~~shall~~ must not cause or allow the emission of particulate matter into the atmosphere from any fuel combustion emission unit for which construction or modification commenced ~~prior to~~before April 14, 1972, using solid fuel exclusively, ~~which is~~ located outside the Chicago major metropolitan area, to exceed the limitations ~~specified~~ in the table below in any ~~one hour~~one-hour period except as provided in Section 212.203 ~~of this Subpart~~.

METRIC UNITS

H (Range) MW	S Kg/MW
Less than or equal to 2.93	1.55
Greater than 2.93 but smaller than 73.2	$3.33\ H^{-0.715}$
Greater than or equal to 73.2	0.155

ENGLISH UNITS

H (Range) mmbtu/hr	S lbs/mmbtu
Less than or equal to 10	1.0
Greater than 10 but smaller than 250	$5.18H^{-0.715}$
Greater than or equal to 250	0.1

where:
S = Allowable emission standard in lbs/mmbtu/hr or kg/MW of actual heat input, and
H = Actual heat input in mmbtu/hr or MW-hr

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.203 Controlled Emission Units For Which Construction or Modification Commenced Prior to April 14, 1972, Using Solid Fuel Exclusively

Notwithstanding Sections 212.201 and 212.202 ~~of this Subpart~~, any fuel combustion emission unit for which construction or modification commenced ~~prior to~~before April 14, 1972, using solid fuel exclusively may, in any ~~one hour~~one-hour period, emit up to~~,~~ but not exceed 0.31 kg/MW-hr (0.20 lbs/mmbtu)~~,~~ if, as of April 14, 1972, any one of the following conditions was met:

a) The emission unit had an hourly emission rate based on original design or equipment performance test conditions, whichever is stricter, which was less than 0.31 kg/MW-hr (0.20 lbs/mmbtu) of actual heat input, and the emission control of ~~such~~ the emission unit is not allowed to degrade more than 0.077 kg/MW-hr (0.05 lbs/mmbtu) from ~~such~~ the original design or acceptance performance test conditions; or

b) The emission unit was in full compliance with the terms and conditions of a variance granted by the Pollution Control Board ~~(Board)~~ sufficient to achieve an hourly emission rate less than 0.31 kg/MW-hr (0.20 lbs/mmbtu), and construction has commenced on equipment or modifications prescribed under that program; and emission control of ~~such~~ the emission unit is not allowed to degrade more than 0.077 kg/MW-hr (0.05 lbs/mmbtu) from original design or equipment performance test conditions, whichever is stricter; or

c) The emission unit had an hourly emission rate based on original design or equipment performance test conditions, whichever is stricter, which was less than 0.31 kg/MW-hr (0.20 lbs/mmbtu) of actual heat input, and the emission control of ~~such~~ the emission unit is not allowed to degrade more than 0.077 kg/MW-hr (0.05 lbs/mmbtu) from that rate demonstrated by the most recent stack test, submitted to and accepted by the Agency ~~prior to~~before April 1, 1985, ~~provided that~~if:

1) Owners and operators of emission units subject to this subsection ~~shall~~ must have applied for a new operating permit by January 9, 1987; and

2) The application for a new operating permit ~~shall~~ must have included a demonstration that the proposed emission rate, if greater than the emission rate allowed by subsections (a) or (b) ~~of this Section~~, will not under any foreseeable operating conditions and potential meteorological conditions cause or contribute to a violation of any applicable primary or secondary ambient air quality standard for particulate matter, or violate any applicable prevention of significant deterioration (PSD) increment, or violate 35 Ill. Adm. Code 201.141.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.204 Emission Units For Which Construction or Modification Commenced On or After April 14, 1972, Using Solid Fuel Exclusively

~~No~~ A person ~~shall~~ must not cause or allow the emission of particulate matter into the atmosphere from any fuel combustion emission unit for which construction or modification commenced on or after April 14, 1972, using solid fuel exclusively to exceed 0.15 kg of particulate matter per MW-hr of actual heat input (0.1 lbs/mmbtu) in any ~~one hour~~one-hour period unless Section 212.202, 212.203, or 212.205 applies.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.205 Coal-fired Industrial Boilers For Which Construction or Modification Commenced Prior to April 14, 1972, Equipped with Flue Gas Desulfurization Systems

Notwithstanding Sections 212.201 through 212.204 ~~of this Subpart~~, ~~no~~ a person ~~shall~~ must not cause or allow the emission of particulate matter into the atmosphere from coal-fired industrial boilers equipped with flue gas desulfurization systems for which construction or modification commenced ~~prior to~~before April 14, 1972, to exceed 0.39 kg of particulate matter per MW-hr of actual heat input in any one-hour period (0.25 lbs/mmbtu). ~~Nothing in this~~This rule ~~shall~~ must not be construed to prevent compliance with applicable regulations promulgated by the USEPA under Section 111 of the CAA as amended. *The provisions of Section 111 of the Clean Air Act relating to standards of performance for new stationary sources . . . are applicable in this State and are enforceable under* the *Act* [415 ILCS 5/9.1(b)].

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.206 Emission Units Using Liquid Fuel Exclusively

~~No~~ A person ~~shall~~ must not cause or allow the emission of particulate matter into the atmosphere in any ~~one hour~~one-hour period to exceed 0.15 kg of particulate matter per MW-hr of actual heat input from any fuel combustion emission unit using liquid fuel exclusively (0.10 lbs/mmbtu).

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.207 Emission Units Using More Than One Type of Fuel

a) ~~No~~ A person, while simultaneously burning more than one type of fuel in a fuel combustion emission unit, ~~shall~~ must not cause or allow the emission of particulate matter into the atmosphere in any ~~one hour~~one-hour period in excess of the rate established by following equation:

E = AS + BL

where

E = Allowable emission rate;

A = ~~Solid~~ Applicable solid fuel particulate emission standard ~~which is applicable~~;
B = Constant ~~determined~~ from ~~the table in~~ subsection (b);
S = Actual heat input from solid fuel;
L = Actual heat input from liquid fuel.

b) The following metric and English units ~~to~~ must be used in the equation of subsection (a) ~~of this Section are as follows~~:

Parameter	Metric	English
E	kg/hr	lbs/hr
A	kg/MW-hr	lbs/mmbtu
B	0.155	0.10
S	MW	mmbtu/hr
L	MW	mmbtu/hr

Section 212.208 Aggregation of Emission Units For Which Construction or Modification Commenced Prior to April 14, 1972

Section 212.207 ~~of this Subpart~~ may be applied to the aggregate of all fuel combustion emission units for which construction or modification commenced ~~prior to~~before April 14, 1972, vented to a common stack ~~provided that~~if, after January 26, 1972:

a) Ductwork has not been modified ~~so as~~ to interconnect fuel combustion emission units;

b) The actual heat input to any ~~such~~ fuel combustion emission units is not increased; and

c) No new fuel combustion emission unit is added to reduce the degree of control of emissions of particulate matter required by this Subpart.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.209 Village of Winnetka Generating Station (Repealed)

(Source: Repealed at 20 Ill. Reg. 7605, effective May 22, 1996)

Section 212.210 Emissions Limitations for Certain Fuel Combustion Emission Units Located in the Vicinity of Granite City

a) ~~No~~ A person ~~shall~~ must not cause or allow emissions of PM-10 into the atmosphere to exceed 12.9 ng/J (0.03 lbs/mmbtu) of heat input from fuels other than natural gas during any ~~one hour~~one-hour period from any industrial fuel

combustion emission units, other than in an integrated iron and steel plant, located in the ~~vicinity of Granite City, which~~ area ~~is~~ defined in Section 212.324(a)(1)(C) ~~of this Subpart~~.

b) Emission units ~~shall~~ must comply with the emissions limitations of this Section by May 11, 1993, or upon initial start-up, whichever occurs later.

(Source: Amended at 48 Ill. Reg._____, effective _____)

SUBPART K: FUGITIVE PARTICULATE MATTER

Section 212.301 Fugitive Particulate Matter

~~No~~ A person ~~shall~~ must not cause or allow the emission of fugitive particulate matter from any process, including any material handling or storage activity, that is visible by an observer looking generally toward the zenith at a point beyond the property line of the source.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.302 Geographical Areas of Application

a) Sections 212.304 through 212.310 and 212.312 ~~of this Subpart shall~~ apply to all mining operations (SIC major groups 10 through 14), manufacturing operations (SIC major groups 20 through 39 except for those operations subject to Subpart S ~~of this Part~~ (Grain-Handling and Grain-Drying Operations) that are outside the areas defined in Section 212.324(a)(1) ~~of this Part~~), and electric generating operations (SIC group 491)~~, which are~~ located in ~~the areas defined by the boundaries of~~ the following townships in the following counties, notwithstanding any political subdivisions ~~contained therein~~within them, as the township boundaries were defined on October 1, 1979~~, in the following counties~~:

Cook:	All townships
Lake:	Shields, Waukegan, Warren
DuPage:	Addison, Winfield, York
Will:	DuPage, Plainfield, Lockport, Channahon, Peotone, Florence, Joliet
Peoria:	Richwoods, Limestone, Hollis, Peoria, City of Peoria
Tazewell:	Fondulac, Pekin, Cincinnati, Groveland, Washington
Macon:	Decatur, Hickory Point
Rock Island:	Blackhawk, Coal Valley, Hampton, Moline, South Moline, Rock Island, South Rock Island
LaSalle:	LaSalle, Utica
Madison:	Alton, Chouteau, Collinsville, Edwardsville, Fort Russell, Godfrey, Granite City, Nameoki, Venice, Wood River
St. Clair	Canteen, Caseyville, Centerville, St. Clair, Stites, Stookey, Sugar Loaf, Millstadt.

b) In ~~the geographical~~ areas ~~defined~~ listed in Section 212.324(a)(1) ~~of this Part~~, Sections 212.304 through 212.310, 212.312, and 212.316 ~~of this Subpart shall~~ apply to all emission units identified in subsection (a) ~~of this Section, and shall further apply to~~at the following operations: grain-handling and grain-drying (Subpart S ~~of this Part),~~) and transportation, communications, electric, gas, and sanitary services (SIC major groups 40 through 49). ~~Additionally,~~ Sections 212.304 through 212.310, 212.312, and 212.316 ~~of this Subpart shall~~also apply to wholesale trade-farm supplies (SIC Industry No. 5191) located in the vicinity of Granite City~~,~~ as defined in Section 212.324(a)(1)(C) ~~of this Part~~.

c) Emission units must comply with subsection (b) ~~of this Section~~ by May 11, 1993, or upon initial start-up, whichever occurs later.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.304 Storage Piles

a) All storage piles of materials with uncontrolled emissions of fugitive particulate matter in excess of 45.4 Mg per year (50 T/yr) which are located within a source whose potential particulate emissions from all emission units exceed 90.8 Mg/yr (100 T/yr) ~~shall~~ must be protected by a cover or sprayed with a surfactant solution or water on a regular basis~~,~~ as needed~~,~~ or treated by an equivalent method, in ~~accordance~~ compliance with the operating program required by Sections 212.309, 212.310, and 212.312 ~~of this Subpart~~.

b) Subsection (a) ~~of this Section shall~~does not apply to a specific storage pile if the owner or operator of that pile proves to the Agency that fugitive particulate emissions from that pile do not cross the property line either by direct wind action or reentrainment.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.305 Conveyor Loading Operations

All conveyor loading operations to storage piles specified in Section 212.304 ~~of this Subpart shall utilize~~must use spray systems, telescopic chutes, stone ladders, or other equivalent methods in ~~accordance~~ compliance with the operating program required by Sections 212.309, 212.310, and 212.312 ~~of this Subpart~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.306 Traffic Areas

All normal traffic pattern access areas surrounding storage piles specified in Section 212.304 ~~of this Subpart~~ and all normal traffic pattern roads and parking facilities ~~which are~~ located on

mining or manufacturing property ~~shall~~ must be paved or treated with water, oils, or chemical dust suppressants. All paved areas ~~shall~~ must be cleaned on a regular basis. All areas treated with water, oils, or chemical dust suppressants ~~shall~~ must have the treatment applied on a regular basis, as needed, in ~~accordance~~ compliance with the operating program required by Sections 212.309, 212.310, and 212.312 ~~of this Subpart~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.307 Materials Collected by Pollution Control Equipment

All operations unloading and transporting ~~operations of~~ materials collected by pollution control equipment ~~shall~~ must be enclosed or ~~shall utilize~~must use spraying, pelletizing, screw conveying, or other equivalent methods.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.308 Spraying or Choke-Feeding Required

Crushers, grinding mills, screening operations, bucket elevators, conveyor transfer points, conveyors, bagging operations, storage bins, and fine product truck and railcar loading operations ~~shall~~ must be sprayed with water or a surfactant solution, utilize choke-feeding, or be treated by an equivalent method in ~~accordance~~ compliance with an operating program.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.309 Operating Program

a) The emission units described in Sections 212.304 through 212.308 and Section 212.316 ~~of this Subpart shall~~must be operated under ~~the provisions of~~ an operating program~~,~~ consistent with the requirements ~~set forth~~ in Sections 212.310 and 212.312 ~~of this Subpart,~~ and prepared by the owner or operator and submitted to the Agency for its review. ~~Such~~ This operating program ~~shall~~ must be designed to significantly reduce fugitive particulate matter emissions.

b) The amendment to this Section incorporating the applicability of Section 212.316 ~~shall~~ must apply by May 11, 1993, or upon initial start-up, whichever occurs later.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.310 Minimum Operating Program

As a minimum, the operating program ~~shall~~ must include ~~the following~~:

a) The name and address of the source;

b) The name and address of the owner or operator responsible for ~~execution of~~executing the operating program;

c) A map or diagram of the source showing approximate locations of storage piles, conveyor loading operations, normal traffic pattern access areas surrounding storage piles, and all normal traffic patterns within the source;

d) Location of unloading and transporting operations with pollution control equipment;

e) A detailed description of the best management practices ~~utilized~~ used to ~~achieve compliance~~comply with this Subpart, including an engineering specification of particulate collection equipment~~,~~; application systems for water, oil, chemicals, and dust suppressants ~~utilized~~ used; and equivalent methods ~~utilized~~used;

f) Estimated frequency of application of dust suppressants by location of materials; and

g) ~~Such other~~Other information ~~as may be~~ necessary to facilitate the Agency~~'~~'s review of the operating program,

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.312 Amendment to Operating Program

The operating program ~~shall~~ must be amended from time to time by the owner or operator so that the operating program is current. ~~Such~~ These amendments ~~shall~~ must be consistent with this Subpart and ~~shall~~ must be submitted to the Agency for its review.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.313 Emission Standard for Particulate Collection Equipment

If particulate collection equipment is operated ~~pursuant to~~under Sections 212.304 through 212.310 and 212.312 ~~of this Subpart~~, emissions from ~~such~~ that equipment ~~shall~~ must not exceed 68 mg/dscm (0.03 gr/dscf).

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.314 Exception for Excess Wind Speed

Section 212.301 ~~of this Subpart shall~~must not apply and spraying ~~pursuant to~~under Sections 212.304 through 212.310 and 212.312 ~~of this Subpart shall~~must not be required when the wind speed is greater than 40.2 km/hr (25 mph). ~~Determination of~~Determining wind speed for the purposes of this rule ~~shall~~ must be by a one-hour average or hourly recorded value at the nearest official station of the U.S. Weather Bureau or by wind speed instruments operated on the site. ~~In~~

~~cases where~~When the duration of operations subject to this rule is less than one hour, wind speed may be averaged over the duration of the operations on the basis of on-site wind speed instrument measurements.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.315 Covering for Vehicles

~~No~~ A person ~~shall~~ must not cause or allow the operation of a vehicle of the second division as defined by 625 ILCS 5/1-217~~,~~ or a semi-trailer as defined by 625 ILCS 5/1-187, without a covering sufficient to prevent the release of particulate matter into the atmosphere.~~, provided that this~~This rule ~~shall~~ must not ~~pertain~~ apply to automotive exhaust emissions.

(~~Board Note: Pursuant to~~BOARD NOTE: Under Section 10(E) of the Act, Section 212.315 cannot be more strict than Section 15-109 of the Vehicle Code [625 ILCS 5/15-109.1].)

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.316 Emission Limitations for Emission Units in Certain Areas

a) Applicability. This Section ~~shall apply~~applies to ~~those~~ operations specified in Section 212.302 ~~of this Subpart~~ and that are located in areas defined in Section 212.324(a)(1) ~~of this Part~~.

b) Emission Limitation for Crushing and Screening Operations. ~~No~~ A person ~~shall~~ must not cause or allow fugitive particulate matter emissions generated by the crushing or screening of slag, stone, coke, or coal to exceed an opacity of 10 percent.

c) Emission Limitations for Roadways or Parking Areas. ~~No~~ A person ~~shall~~ must not cause or allow fugitive particulate matter emissions from any roadway or parking area to exceed an opacity of 10 percent, except that the opacity ~~shall~~ must not exceed 5 percent at quarries with a capacity to produce more than 1 million T/yr of aggregate.

d) Emission Limitations for Storage Piles. ~~No~~ A person ~~shall~~ must not cause or allow fugitive particulate matter emissions from any storage pile to exceed an opacity of 10 percent~~, to be~~ measured four ~~ft~~ feet from the pile surface.

e) Additional Emissions Limitations for the Granite City Vicinity as Defined in Section 212.324(a)(1)(C) ~~of this Part~~.

1) Emissions Limitations for Roadways or Parking Areas Located at Slag Processing Facilities or Integrated Iron and Steel Manufacturing Plants. ~~No~~ A person ~~shall~~ must not cause or allow fugitive particulate matter emissions from any roadway or parking area located at a slag processing

facility or integrated iron and steel manufacturing plant to exceed an opacity of 5 percent.

2) Emissions Limitations for Marine Terminals.

A) ~~No~~ A person ~~shall~~ must not cause or allow fugitive particulate matter emissions from any loading spouts for truck or railcar to exceed an opacity of 10 percent; and

B) ~~No~~ A person ~~shall~~ must not cause or allow fugitive particulate matter emissions generated at barge unloading, dump pits, or conveyor transfer points, including~~, but not limited to,~~ transfer onto and off of a conveyor, to exceed an opacity of 5 percent.

f) Emission Limitation for All Other Emission Units. Unless an emission unit has been assigned a particulate matter, PM-10, or fugitive particulate matter emissions limitation elsewhere in this Section or in Subparts R or S ~~of this Part~~, ~~no~~ a person ~~shall~~ must not cause or allow fugitive particulate matter emissions from any emission unit to exceed an opacity of 20 percent.

g) Recordkeeping and Reporting

1) The owner or operator of any fugitive particulate matter emission unit subject to this Section ~~shall~~ must keep written records of the application of control measures ~~as may be~~ needed ~~for compliance~~to comply with the opacity limitations of this Section and ~~shall~~ must submit to the Agency an annual report containing a summary of ~~such~~ that information.

2) The records required under this subsection ~~shall~~ must include at least ~~the following~~:

A) The name and address of the source;

B) The name and address of the owner and/or operator of the source;

C) A map or diagram showing the location of all emission units controlled, including the location, identification, length, and width of roadways;

D) For each application of water or chemical solution to roadways by truck: the name and location of the roadway controlled, application rate of each truck, frequency of each application, width of each application, identification of each truck used, total quantity of water or chemical used for each application and, for each application of chemical solution, the concentration and identity of the chemical;

E) For application of physical or chemical control agents: the name of the agent, application rate and frequency, and total quantity of agent, and, if diluted, percent of concentration, used each day; and

F) A log recording incidents when control measures were not used and a statement of explanation.

3) Copies of all records required by this Section ~~shall~~ must be submitted to the Agency within ~~ten (~~10~~)~~ working days after a written request by the Agency and ~~shall~~ must be transmitted to the Agency by a company-designated person with authority to release ~~such~~ the records.

4) The records required under this Section ~~shall~~ must be kept and maintained for at least three ~~(~~3~~)~~ years and ~~shall~~ must be available for inspection and copying by Agency representatives during working hours.

5) A quarterly report ~~shall~~ must be submitted to the Agency stating the following: the dates any necessary control measures were not implemented, a listing of those control measures, the reasons that the control measures were not implemented, and any corrective actions taken. This information includes~~, but is not limited to,~~ those dates when controls were not applied based on a belief that application of ~~such~~ the control measures would have been unreasonable given prevailing atmospheric conditions, which ~~shall constitute~~constitutes a defense to the requirements of this Section. This report ~~shall~~ must be submitted to the Agency ~~thirty (~~30~~)~~ calendar days from the end of a quarter. Quarters end March 31, June 30, September 30, and December 31.

h) Compliance Date. Emission units ~~shall~~ must comply with the emissions limitations and recordkeeping and reporting requirements of this Section by May 11, 1993, or upon initial start-up, whichever occurs later.

(Source: Amended at 48 Ill. Reg._____, effective _____)

SUBPART L: PARTICULATE MATTER EMISSIONS FROM PROCESS EMISSION UNITS

Section 212.321 Process Emission Units For Which Construction or Modification Commenced On or After April 14, 1972

a) Except as further provided in this Part, ~~no~~ a person ~~shall~~ must not cause or allow the emission of particulate matter into the atmosphere in any ~~one hour~~one-hour period from any new process emission unit which, either alone or in combination with the emission of particulate matter from all other similar process emission units for which construction or modification commenced on or after April 14,

1972, at a source or premises, exceeds the allowable emission rates ~~specified~~ in subsection (c) ~~of this Section~~.

b) Interpolated and extrapolated values of the data in subsection (c) ~~of this Section shall~~must be determined by using the equation:

$$E = A(P)^B$$

where

P = Process weight rate; and
E = Allowable emission rate; and,

1) Up to process weight rates of 408 MG/hr (450 T/hr):

	Metric	English
P	Mg/hr	T/hr
E	kg/hr	lbs/hr
A	1.214	2.54
B	0.534	0.534

2) For process weight rate greater than or equal to 408 Mg/hr (450 T/hr):

	Metric	English
P	Mg/hr	T/hr
E	kg/hr	lbs/hr
A	11.42	24.8
B	0.16	0.16

c) Limits for Process Emission Units For Which Construction of Modification Commenced On or After April 14,1972

Metric		English	
P	E	P	E
Mg/hr	kg/hr	T/hr	lbs/hr
0.05	0.25	0.05	0.55
0.1	0.29	0.10	0.77
0.2	0.42	0.20	1.10
0.3	0.64	0.30	1.35

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.323 Stock Piles

Sections 212.321 and 212.322 ~~of this Subpart shall~~must not apply to emission units~~,~~ such as ~~stock piles~~stockpiles of particulate matter~~,~~ to which~~,~~ to those rules cannot reasonably apply because of the disperse nature of ~~such~~ those emission units~~, such rules cannot reasonably be applied~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.324 Process Emission Units in Certain Areas

a) Applicability

1) This Section applies to any process emission unit located in any of the following areas:

A) That area bounded by lines from Universal ~~Transmercator~~ Transverse Mercator (UTM) coordinate 428000mE, 4631000mN, east to 435000mE, 4631000mN, south to 435000mE, 4623000mN, west to 428000mE, 4623000mN, north to 428000mE, 4631000mN, in the vicinity of McCook in Cook County, as shown in Illustration D ~~of this Part~~;

B) That area bounded by lines from Universal ~~Transmercator~~ Transverse Mercator (UTM) coordinate 445000mE, 4622180mN, east to 456265mE, 4622180mN, south to 456265E, 4609020N, west to 445000mE, 4609020mN, north to 445000mE, 4622180mN, in the vicinity of Lake Calumet in Cook County, as shown in Illustration E ~~of this Part~~; and

C) That area bounded by lines from Universal ~~Transmercator~~ Transverse Mercator (UTM) coordinate 744000mE, 4290000mN, east to 753000mE, 4290000mN, south to 753000mE, 4283000mN, west to 744000mE, 4283000mN, north to 744000mE, 4290000mN, in the vicinity of Granite City in Madison County, as shown in Illustration F ~~of this Part~~.

2) This Section does not alter the applicability of Sections 212.321 and 212.322.

3) The emission limitations of this Section ~~are not applicable~~do not apply to any emission unit subject to a specific emissions standard or limitation ~~contained~~ in any of the following Subparts:

A) Subpart N, Food Manufacturing;

B) Subpart Q, Stone, Clay, Glass and Concrete Manufacturing;

C) Subpart R, Primary and Fabricated Metal Products and Machinery Manufacture; and

D) Subpart S, Agriculture.

b) General Emission Limitation. Except as otherwise provided in this Section, a person must not cause or allow the emission into the atmosphere of PM-10 from any process emission unit to exceed 68.7 mg/scm (0.03 gr/scf) during any one-hour period.

c) Alternative Emission Limitation. In lieu of the emission limit of 68.7 mg/scm (0.03 gr/scf) ~~contained~~ in subsection (b), a person must not cause or allow the emissions from the following emission units to exceed the corresponding limitations:

	Emissions Units	Emissions Limit	
		Metric	English
1)	Shotblasting emission units in the Village of McCook equipped with fabric filters as of June 1, 1991	22.9 mg/scm	0.01 gr/scf

2)	All process emission units at manufacturers of steel wool with soap pads located in the Village of McCook	5% opacity	5% opacity

d) Exceptions. The mass emission limits ~~contained~~ in subsections (b) and (c) will not apply to ~~those~~ emission units with no visible emissions other than fugitive particulate matter; however, if a stack test is performed, this subsection is not a defense to a finding of a violation of the mass emission limits ~~contained~~ in subsections (b) and (c).

e) Special Emissions Limitation for Fuel-Burning Process Emission Units in the Vicinity of Granite City. A person must not cause or allow emissions of PM-10 into the atmosphere to exceed 12.9 ng/J (0.03 lbs/MMBtu) of heat input from the burning of fuel other than natural gas at any process emission unit located in the vicinity of Granite City as defined in subsection (a)(1)(C).

f) Maintenance and Repair. For any process emission unit subject to subsection (a), the owner or operator must maintain and repair all air pollution control equipment in a manner that assures that the emission limits and standards in this Section will be met at all times. Proper maintenance must include ~~the following requirements~~:

1) Visual inspections of air pollution control equipment;

2) Maintenance of an adequate inventory of spare parts; and

3) Expeditious repairs, unless the emission unit is shutdown.

g) Recordkeeping of Maintenance and Repair.

1) Written records of inventory and documentation of inspections, maintenance, and repairs of all air pollution control equipment must be kept in compliance with subsection (f).

2) The owner or operator must document any period during which any process emission unit was in operation when the air pollution control equipment was not in operation or was malfunctioning so as to cause an emissions level ~~in excess of~~exceeding the emissions limitation. These records must include documentation of causes for pollution control equipment not operating or ~~such malfunction~~malfunctioning and state what corrective actions were taken and what repairs were made.

3) A written record of the inventory of all spare parts not readily available from local suppliers must be kept and updated.

4) Copies of all records required by this Section must be submitted to the Agency within ten working days after a written request by the Agency.

5) The records required under this Section must be kept and maintained for at least three years and must be available for inspection and copying by Agency representatives during working hours.

6) Upon written request by the Agency, a report must be submitted to the Agency for any period specified in the request stating the following: the dates during which any process emission unit was in operation when the air pollution control equipment was not in operation or was not operating properly, documentation of causes for pollution control equipment not operating or not operating properly, and a statement of what corrective actions were taken and what repairs were made.

h) Compliance Date. Emission units must comply with the emissions limitations and recordkeeping and reporting requirements of this Section by May 11, 1993, or upon initial start-up, whichever occurs later.

SUBPART N: FOOD MANUFACTURING

Section 212.361 Corn Wet Milling Processes

Sections 212.321 and 212.322 ~~of this Part shall~~must not apply to feed and gluten dryers in corn wet milling processes~~,~~ where the exit gases have a dew point higher than the ambient temperature and the specific gravity of the material processed is less than 2.0. ~~No~~ A person ~~shall~~ must not cause or allow the emission of particulate matter into the atmosphere from any such process so as to exceed the emission standards and limitations ~~specified~~ in Section 212.322 ~~of this Part~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.362 Emission Units in Certain Areas

a) Applicability.

1) Subsections (b)(1) through (b)(4) ~~of this Section shall~~must apply to ~~those~~ emission units engaged in food manufacturing and located in the Village of Bedford Park west of Archer Avenue and in the area defined in Section 212.324(a)(1)(A) ~~of this Part~~.

2) Subsection (b)(5) ~~of this Section~~ applies to an instant tea manufacturing plant in Granite City, as defined in Section 212.324(a)(1)(C) ~~of this Part~~.

b) Emission Limitation. ~~No~~ A person ~~shall~~ must not cause or allow the emission of PM-10~~,~~ other than ~~that of~~ fugitive particulate matter~~,~~ into the atmosphere to exceed the following limits during any ~~one hour~~one-hour period:

1) 22.9 mg/scm (0.01 gr/scf) for dextrose dryers, dextrose melt tank systems, bulk dextrose loading systems, house dry dextrose dust systems, ~~dextorse~~ dextrose bagging machine dust systems, dextrose expansion dryer/cooler and packing systems, and ~~2034~~ dextrose dryer/cooler dust collecting systems;

2) 34.3 mg/scm (0.015 gr/scf) for feed dryers, gluten dryers, germ dryers, and heat recovery scrubbers;

3) 68.7 mg/scm (0.03 gr/scf) for germ cake transport systems, spent flake transport/cooling systems, bleaching clay systems, dust pickup bin systems in Building 26, and pellet cooler systems;

4) 45.8 mg/scm (0.02 gr/scf) for germ transport systems, starch dust collection systems, dicalite systems, starch processing/transport systems, starch dryers, starch transport systems, calcium carbonate storage systems, starch loading systems, corn unloading systems, germ transfer towers, dextrose transport systems, soda ash unloading systems, corn silo systems, filter aid systems, spent flake storage systems, corn cleaning transport systems, feed transport cooling systems, gluten cooling systems, gluten transport systems, feed dust systems, gluten dust systems, pellet dust systems, spent flake transport systems, rail car maintenance system buildings, and dextrose expansion milling and storage systems;

5) 22.9 mg/scm (0.01 gr/scf) for any process emission unit at an instant tea manufacturing plant in Granite City, except the spray dryer, raw tea storage silo, and instant tea filling machines.

c) Exceptions. The mass emission limits ~~contained~~ in subsection (b) ~~of this Section shall~~must not apply to ~~those~~ emission units with no visible emissions other than fugitive matter; however, if a stack test is performed, this subsection is not a defense to a finding of a violation of the mass emission limits ~~contained~~ in subsection (b) ~~of this Section~~.

d) Maintenance, Repair, and Recordkeeping. ~~The requirements of~~ Sections 212.324(f) and (g) ~~of this Part shall~~must also apply to this Section.

e) Compliance Date. Emission units ~~shall~~ must comply with the emissions limitations and recordkeeping and reporting requirements of this Section by May 11, 1993, or upon initial start-up, whichever occurs later.

SUBPART O: PETROLEUM REFINING, PETROCHEMICAL AND CHEMICAL MANUFACTURING

Section 212.381 Catalyst Regenerators of Fluidized Catalytic Converters

Sections 212.321 and 212.322 ~~of this Part shall~~must not apply to catalyst regenerators of fluidized catalytic converters. ~~No~~ A person ~~shall~~ must not cause or allow the emission rate from catalyst regenerators of fluidized catalytic converters to exceed in any ~~one hour~~one-hour period the rate determined using the following equations:

$E = 4.10\ (P)^{0.67}$ for P less than or equal to 30 T/hr

$E = (55.0\ (P)^{0.11})-40.0$ for P greater than 30 T/hr.

where:

E = allowable emission rate in lbs/hr, and
P = catalyst recycle rate, including the amount of fresh catalyst added, in T/hr.

(Source: Amended at 48 Ill. Reg._____, effective _____)

SUBPART Q: STONE, CLAY, GLASS AND CONCRETE MANUFACTURING

Section 212.421 Portland Cement Processes for~~For~~ Which Construction or Modification Commenced On or After April 14, 1972

~~No~~ A person ~~shall~~ must not cause or allow the emission of smoke or other particulate matter from any portland cement process for which construction or modification commenced on or after April 14, 1972, into the atmosphere having an opacity greater than 10 percent.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.422 Portland Cement Manufacturing Processes

Section 212.321 ~~of this Part shall~~must not apply to the kilns and coolers of ~~portland~~ cement manufacturing processes.

a) The kilns and clinker coolers of portland cement manufacturing processes for which construction or modification commenced ~~prior to~~before April 14, 1972, ~~shall~~ must comply with the emission standards and limitations of Section 212.322 ~~of this Part~~.

b) The kilns and clinker coolers of portland cement manufacturing processes for which construction or modification commenced on or after April 14, 1972, ~~shall~~ must comply with the following emission standards and limitations:

1) ~~No~~ A person ~~shall~~ must not cause or allow the emission of particulate matter into the atmosphere from any such kiln to exceed 0.3 lbs/T of feed to the kiln.

2) ~~No~~ A person ~~shall~~ must not cause or allow the emission of particulate matter into the atmosphere from any such clinker cooler to exceed 0.1 lbs/T of feed to the kiln.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.423 Emission Limits for the Portland Cement Manufacturing Plant Located in LaSalle County, South of the Illinois River (Repealed)

~~a) This Section shall apply to the portland~~458ortland~~ cement manufacturing plant in operation before September 1, 1990, located in LaSalle County, south of the Illinois River. This Section shall not alter the applicability of Sections 212.321 and 212.322 of this Part to portland~~458ortland~~ cement manufacturing processes other than those for which alternate emission limits are specified in subsection (b) of this Section. This Section shall not become effective until April 30, 1992.~~

~~b) No person shall cause or allow emissions to exceed the emission limits set forth below for each process.~~

~~1) PM-10 Emission Limits~~

		~~Rate kg/hr (lbs/hr)~~	~~Concentration mg/scm (gr/scf)~~
~~A)~~	~~Clinker Cooler~~	~~4.67 (10.3)~~	~~28.147 (0.012)~~
~~B)~~	~~Finish Mill High Efficiency Air Separator~~	~~2.68 (5.90)~~	~~26.087 (0.011)~~

~~2) PM-10 Emissions Limits Including Condensible PM-10~~

		~~Rate kg/hr kg/hr (lbs/hr)~~	~~Concentration mg/scm (gr/scf)~~
~~A)~~	~~Raw Mill Roller Mill(RMRM)~~	~~6.08 (13.4)~~	~~27.5 (0.012)~~
~~B)~~	~~Kiln without RMRM Operating~~	~~19.19 (42.3)~~	~~91.5 (0.040)~~

C)	Kiln with RMRM	11.43 (25.2)	89.2 (0.039)

c) No person shall cause or allow any visible emissions from any portland cement manufacturing process emission unit not listed in subsection (b) of this Section.

d) The owner or operator of any process emission unit subject to subsection (b) or (c) of this Section shall maintain and repair all air pollution control equipment in a manner that assures that the applicable emission limits and standards in subsection (b) or (c) of this Section shall be met at all times. Proper maintenance shall include at least the following requirements:

1) Visual inspections of air pollution control equipment shall be conducted;

2) An adequate inventory of spare parts shall be maintained;

3) Prompt and immediate repairs shall be made upon identification of the need; and

4) Written records of inventory and documentation of inspections, maintenance, and repairs of all air pollution control equipment shall be kept in accordance with subsection (e) of this Section.

e) Recordkeeping of Maintenance and Repair.

1) Written records shall be kept documenting inspections, maintenance, and repairs of all air pollution control equipment. All such records required under this Section shall be kept and maintained for at least three (3) years, shall be available for inspection by the Agency, and, upon request, shall be copied and furnished to Agency representatives during working hours.

2) The owner or operator shall document any period during which any process emission unit was in operation when the air pollution control equipment was not in operation or was not operating properly. These records shall include documentation of causes for pollution control equipment not operating or not operating properly, and shall state what corrective actions were taken and what repairs were made. In any quarter during which such a malfunction should occur, the owner or operator shall mail one copy of the documentation to the Agency.

3) A written record of the inventory of all spare parts not readily available from local suppliers shall be kept and updated.

4) Upon written request by the Agency, the owner or operator shall submit any information required pursuant to this Subpart, for any period of time

~~specified in the request. Such information shall be submitted within ten (10) working days from the date on which the request is received.~~

~~f) Testing to determine compliance with the emission limits specified for PM-10, condensible PM-10, and detection of visible emissions shall be in accordance with the measurement methods specified in Sections 212.107 and 212.108 (a) and (b) of this Part. Ammonium chloride shall be excluded from the measurement of condensible PM-10.~~

(Source: Repealed at 48 Ill. Reg. _____, effective _____)

Section 212.424 Fugitive Particulate Matter Control for the Portland Cement Manufacturing Plant and Associated Quarry Operations Located in LaSalle County, South of the Illinois River. (Repealed)

~~a) Applicability. This Section shall apply to the portland cement manufacturing plant in operation before September 1, 1990, and associated quarry operations located in LaSalle County, south of the Illinois River. Associated quarry operations are those operations involving the removal and disposal of overburden, and the extraction, crushing, sizing, and transport of limestone and shale for usage at the portland cement manufacturing plant. This Section shall not become effective until April 30, 1992.~~

~~b) Applicability of Subpart K of this Part. This Section shall not alter the applicability of Subpart K: Fugitive Particulate Matter.~~

~~c) Fugitive Particulate Matter Control Measures For Roadways at the Plant.~~

~~1) For the unpaved access roadway to the Illinois Central Silos Loadout, the owner or operator shall spray a 30 percent solution of calcium chloride once every 16 weeks at an application rate of at least 1.58 $L/m^{(2)}$ (0.35 $gal/yd^{(2)}$) followed by weekly application of water at a rate of at least 1.58 $L/m^{(2)}$ (0.35 $gal/yd^{(2)}$). This subsection shall not apply after the roadway is paved.~~

~~2) The owner or operator of the portland cement manufacturing plant shall keep written records in accordance with subsection (e) of this Section.~~

~~d) Fugitive Particulate Matter Control Measures for Associated Quarry Operations.~~

~~1) For the primary crusher, the primary screen, the #3 conveyor from the primary screen to the surge pile, and the surge pile feeders to the #4 conveyor, the owner or operator shall spray a chemical foam spray of at least 1 percent solution of chemical foaming agent in water continuously during operations at a rate of at least 1.25 L/Mg (0.30 gal/T) of rock processed.~~

2) The owner or operator shall water all roadways traveled by trucks to and from the primary crusher in the process of transporting raw limestone and shale to the crusher at an application rate of at least 0.50 L/m^2 (0.10 gal/yd^2) applied once every eight hours of operation except under conditions specified in subsection (d)(3) of this Section. Watering shall begin within one hour of commencement of truck traffic each day.

3) Subsection (d)(2) of this Section shall be followed at all times except under the following circumstances:

A) Precipitation is occurring such that there are no visible emissions or if precipitation occurred during the previous 2 hours such that there are no visible emissions;

B) If the ambient temperature is less than or equal to 0°C (32° F); or

C) If ice or snow build-up has occurred on roadways such that there are no visible emissions.

4) The owner or operator of the associated quarry operations shall keep written records in accordance with subsection (e) of this Section.

e) Recordkeeping and Reporting

1) The owner or operator of any portland cement manufacturing plant and/or associated quarry operations subject to this Section shall keep written daily records relating to the application of each of the fugitive particulate matter control measures required by this Section.

2) The records required under this Section shall include at least the following:

A) The name and address of the plant;

B) The name and address of the owner or operator of the plant and associated quarry operations;

C) A map or diagram showing the location of all fugitive particulate matter emission units controlled including the location, identification, length, and width of roadways;

D) For each application of water or calcium chloride solution, the name and location of the roadway controlled, the water capacity of each truck, application rate of each truck, frequency of each application, width of each application, start and stop time of each application, identification of each water truck used, total quantity

~~of water or calcium chloride used for each application, including the concentration of calcium chloride used for each application;~~

~~E) For application of chemical foam spray solution, the application rate and frequency of application, name of foaming agent, and total quantity of solution used each day;~~

~~F) Name and designation of the person applying control measures; and~~

~~G) A log recording all failures to use control measures required by this Section with a statement explaining the reasons for each failure and, in the case of a failure to comply with the roadway watering requirements of subsection (d)(2) of this Section, a record showing that one of the circumstances for exceptions listed in subsection (d)(3) of this Section existed during the period of the failure. Such record shall include, for example, the periods of time when the measured temperature was less than or equal to 0°C (32°F).~~

~~3) Copies of all records required by this Section shall be submitted to the Agency within ten (10) working days after a written request by the Agency.~~

~~4) The records required under this Section shall be kept and maintained for at least three (3) years and shall be available for inspection and copying by Agency representatives during working hours.~~

~~5) A quarterly report shall be submitted to the Agency stating the following: the dates required control measures were not implemented, the required control measures, the reasons that the control measures were not implemented, and the corrective actions taken. This report shall include those times when subsection (d) of this Section is involved. This report shall be submitted to the Agency thirty (30) calendar days from the end of a quarter. Quarters end March 31, June 30, September 30, and December 31.~~

(Source: Repealed at 48 Ill. Reg. _____, effective _____)

Section 212.425 Emission Units in Certain Areas

a) This Section ~~shall~~ must apply to ~~those~~ emission units located in ~~those~~ areas defined in Section 212.324(a)(1) ~~of this Part~~.

b) ~~No~~ A person ~~shall~~ must not cause or allow the emission of PM-10, other than ~~that of~~ fugitive particulate matter, into the atmosphere to exceed the following limits during any ~~one hour~~one-hour period:

1) 57.2 mg/scm (0.025 gr/scf) for coater and cooling loop ventilator at a roofing asphalt manufacturing plant located in the Village of Summit;

2) 34.3 mg/scm (0.015 gr/scf) for mineral filler handling emission units at a roofing asphalt manufacturing plant located in the Village of Summit;

3) 0.03 kg/Mg (0.06 lb/T) of asphalt mixed for asphalt mixer at a roofing asphalt manufacturing plant located in the Village of Summit

4) 91.6 mg/scm (0.04 gr/scf) for roofing asphalt blowing stills, except stills Nos. 1 and 2, at a roofing asphalt manufacturing plant located in the Village of Summit;

5) 45.8 mg/scm (0.02 gr/scf) for kilns in the lime manufacturing industry;

6) 22.9 mg/scm (0.01 gr/scf) for all other process emission units in the lime manufacturing industry;

7) 0.325 kg/Mg (0.65 lb/T) of glass produced for all glass melting furnaces.

c) The mass emission limits ~~contained~~ in subsection (b) ~~of this Section shall~~must not apply to ~~those~~ emission units with no visible emissions other than fugitive particulate matter; however, if a stack test is performed, this subsection is not a defense to a finding of a violation of the mass emission limits ~~contained~~ in subsection (b) ~~of this Section~~.

d) ~~The requirements of~~ Section 212.324(f) and (g) ~~of this Part shall~~must also apply to this Section.

e) Emission units ~~shall~~ must comply with the emissions limitations and recordkeeping and reporting requirements of this Section by May 11, 1993, or upon initial start-up, whichever occurs later.

(Source: Amended at 48 Ill. Reg._____, effective _____)

SUBPART R: PRIMARY AND FABRICATED METAL PRODUCTS AND MACHINERY MANUFACTURE

Section 212.441 Steel Manufacturing Processes

Except where noted, Sections 212.321 and 212.322 ~~of this Part shall~~must not apply to the steel manufacturing processes subject to Sections 212.442 through 212.452 ~~of this Subpart~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.442 Beehive Coke Ovens

~~No~~ A person ~~shall~~ must not cause or allow the use of beehive ovens in any coke manufacturing process.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.443 Coke Plants

a) Subpart B ~~of this Part shall~~must not apply to coke plants.

b) Charging.

1) Uncaptured Emissions:

A) ~~No~~ A person ~~shall~~ must not cause or allow the emission of visible particulate matter from any coke oven charging operation, from the introduction of coal into the first charge port~~,~~ as indicated by the first mechanical movement of the coal feeding mechanism on the larry car~~,~~ to the replacement of the final charge port lid for more than a total of 125 seconds over 5 consecutive charges~~; provided however that 1~~. However, one charge out of any 20 consecutive charges may be deemed an uncountable charge at the option of the operator.

B) Compliance with the limitation ~~set forth~~ in subsection (b)(1)(A) ~~of this Section shall~~must be determined in the following manner:

i) Observation of charging emissions ~~shall~~ must be made from any point or points on the topside of a coke oven battery from which a qualified observer can obtain an unobstructed view of the charging operation.

ii) The qualified observer ~~shall~~ must time the visible emissions with a stopwatch while observing the charging operation. Only emissions from the charge port and any part of the larry car ~~shall~~ must be timed. The observation ~~shall~~ must commence as soon as coal is introduced into the first charge port as indicated by the first mechanical movement of the coal feeding mechanism on the larry car and ~~shall~~ must terminate when the last charge port lid has been replaced. Simultaneous emissions from more than one emission point ~~shall~~ must be timed and recorded as one

emission and ~~shall~~ must not be added individually to the total time.

iii) The qualified observer ~~shall~~ must determine and record the total number of seconds that charging emissions are visible during the charging of coal to the coke oven.

iv) For each charge observed, the qualified observer ~~shall~~ must record the total number of seconds of visible emissions, the clock time for the initiation and completion of the charging operation, and the battery identification and oven number.

v) The qualified observer ~~shall~~ must not record any emissions observed after all charging port lids have been firmly seated following removal of the larry car, such as emissions occurring when a lid has been temporarily removed to permit spilled coal to be swept into the oven.

vi) In the event that observations from a charge are interrupted, the data from the charge ~~shall~~ must be invalidated and the qualified observer ~~shall~~ must note on ~~his~~ their observation sheet the reason for invalidating the data. The qualified observer ~~shall~~ must then resume observation of the next consecutive charge or charges and continue until a set of five charges has been recorded. Charges immediately preceding and following interrupted observations ~~shall~~ must be considered consecutive.

2) Emissions from Control Equipment

A) Emissions of particulate matter from control equipment used to capture emissions during charging ~~shall~~ must not exceed 0.046 g/dscm (0.020 gr/dscf). Compliance ~~shall~~ must be determined in ~~accordance~~ compliance with the procedures ~~set forth~~ in 40 CFR ~~part~~ 60, Appendix A, Methods 1 through 5, incorporated by reference in Section 212.113 ~~of this Part~~. *The provisions of Section 111 of the federal Clean Air Act . . . relating to standards of performance for new stationary sources . . . are applicable in this State and are enforceable under ~~the~~ the Act* [415 ILCS 5/9.1(b)].

B) The opacity of emissions from control equipment ~~shall~~ must not exceed an average of 20 percent, averaging the total number of readings taken. Opacity readings ~~shall~~ must be taken at 15-second intervals from the introduction of coal into the first charge port as indicated by the first mechanical movement of the coal feeding

mechanism on the larry car to the replacement of the final charge port lid. Compliance, except for the number of readings required, ~~shall~~ must be determined in ~~accordance~~ compliance with 40 CFR ~~part~~ 60, Appendix A, Method 9, incorporated by reference in Section 212.113 ~~of this Part~~. *The provisions of Section 111 of the federal Clean Air Act . . . relating to standards of performance for new stationary sources . . . are applicable in this State and are enforceable under ~~the~~ the Act.* [415 ILCS 5/9.1(b)].

C) Opacity readings of emissions from control equipment ~~shall~~ must be taken concurrently with observations of fugitive particulate matter. Two qualified observers ~~shall~~ must be required.

3) Qualified observers ~~referenced in~~under subsection (b) ~~of this Section shall~~must be certified ~~pursuant to~~under 40 CFR ~~part~~ 60, Appendix A, Method 9, incorporated by reference in Section 212.113. *The provisions of Section 111 of the federal Clean Air Act . . . relating to standards of performance for new stationary sources . . . are applicable in this State and are enforceable under ~~this~~ the Act* [415 ILCS 5/9.1(b)].

c) Pushing:

1) Uncaptured Emissions:

A) Emissions of uncaptured particulate matter from pushing operations ~~shall~~ must not exceed an average of 20 percent opacity for ~~4~~ four consecutive pushes considering the highest average of six consecutive readings in each push. Opacity readings ~~shall~~ must be taken at 15-second intervals, beginning from the time the coke falls into the receiving car or is first visible as it emerges from the coke guide, whichever occurs earlier, until the receiving car enters the quench tower or quenching device. For a push of less than 90 seconds duration, the actual number of 15-second readings ~~shall~~ must be averaged.

B) Opacity readings ~~shall~~ must be taken by a qualified observer located in a position where the oven being pushed, the coke receiving car, and the path to the quench tower are visible. The opacity ~~shall~~ must be read as the emissions rise and clear the top of the coke battery gas mains. The qualified observer ~~shall~~ must record opacity readings of emissions originating at the receiving car and associated equipment and the coke oven, including the standpipe on the coke side of the oven being pushed. Opacity readings ~~shall~~ must be taken in ~~accordance~~ compliance with ~~the procedures set forth in~~ 40 CFR ~~part~~ 60, Appendix A, Method 9, incorporated by reference in Section 212.113 ~~of this Part~~, except

that Section 2.5 for date reduction ~~shall~~ must not be used. The qualified observer referenced in this subsection ~~shall~~ must be certified ~~pursuant to~~under 40 CFR ~~part~~ 60, Appendix A, Method 9, incorporated by reference in Section 212.113. *The provisions of Section 111 of the federal Clean Air Act . . . relating to standards of performance for new stationary sources . . . are applicable in this State and are enforceable under ~~this~~ the Act* [415 ILCS 5/9.1(b)].

2) Emissions from Control Equipment

A) The particulate emissions from control equipment used to control emissions during pushing operations ~~shall~~ must not exceed 0.040 pounds per ton of coke pushed. Compliance ~~shall~~ must be determined in ~~accordance~~ compliance with ~~the procedures set forth in~~ 40 CFR ~~part~~ 60, Appendix A, Methods 1-5, incorporated by reference in Section 212.113~~ of this Part~~. *The provisions of Section 111 of the federal Clean Air Act . . . relating to standards of performance for new stationary sources . . . are applicable in this State and are enforceable under ~~this~~ the Act* [415 ILCS 5/9.1(b)]. Compliance ~~shall~~ must be based on an arithmetic average of three runs (stack tests), and the calculations ~~shall~~ must be based on the duration of a push as defined in subsection (c)(1)(A)~~ of this Section~~.

B) The opacity of emissions from control equipment used to control emissions during pushing operations ~~shall~~ must not exceed 20%. For a push of less than six minutes duration, the actual number of 15-second readings taken ~~shall~~ must be averaged. Compliance ~~shall~~ must be determined in ~~accordance~~ compliance with 40 CFR ~~part~~ 60, Appendix A, Method 9, incorporated by reference in Section 212.113~~ of this Part~~. *The provisions of Section 111 of the federal Clean Air Act . . . relating to standards of performance for new stationary sources . . . are applicable in this State and are enforceable under ~~this~~ the Act*. [415 ILCS 5/9.1(b)]. Section 2.5 of 40 CFR ~~part~~ 60, Appendix A, Method 9, incorporated by reference in Section 212.113~~ of this Part~~, for data reduction ~~shall~~ must not be used for pushes of less than six minutes duration.

d) Coke Oven Doors.

1) ~~No~~ A person ~~shall~~ must not cause or allow visible emissions from more than 10 percent of all coke oven doors at any time. Compliance ~~shall~~ must be determined by a one pass observation of all coke oven doors on any one battery.

2) ~~No~~ A person ~~shall~~ must not cause or allow the operation of a coke oven unless there is on the plant premises at all times an adequate inventory of spare coke oven doors and seals and unless there is a readily available coke oven door repair facility.

e) Coke Oven Lids. ~~No~~ A person ~~shall~~ must not cause or allow visible emission from more than 5 percent of all coke oven lids at any time. Compliance ~~shall~~ must be determined by a one pass observation of all coke oven lids.

f) Coke Oven Offtake Piping. ~~No~~ A person ~~shall~~ must not cause or allow visible emissions from more than 10 percent of all coke oven offtake piping at any time. Compliance ~~shall~~ must be determined by a one pass observation of all coke oven offtake piping.

g) Coke Oven Combustion Stack.

1) ~~No~~ A person ~~shall~~ must not cause or allow the emissions of particulate matter from a coke oven combustion stack to exceed 110 mg/dscm (0.05 gr/dscf); and

2) ~~No~~ A person ~~shall~~ must not cause or allow the emission of particulate matter from a coke oven combustion stack to exceed 30% opacity. Compliance ~~shall~~ must be determined in ~~accordance~~ compliance with 40 CFR ~~part~~ 60, Appendix A, Method 9, incorporated by reference in Section 212.113 ~~of this Part~~. However, the opacity limit ~~shall~~ must not apply to a coke oven combustion stack when a leak between any coke oven and the oven~~'~~'s vertical or crossover flues is being repaired, after pushing coke from the oven is completed but before resumption of charging. The exemption from the opacity limit ~~shall~~ must not exceed three ~~(3)~~ hours per oven repaired. The owner of operator ~~shall~~ must keep written records identifying the oven repaired~~,~~ and the date, time, and duration of all repair periods. These records ~~shall~~ must be subject to the requirements of Section 212.324(g)(4) and (g)(5) ~~of this Part~~.

h) Quenching.

1) All coke oven quench towers ~~shall~~ must be equipped with grit arrestors or equipment of comparable effectiveness. Baffles ~~shall~~ must cover 95 percent or more of the cross sectional area of the exhaust vent or stack and must be maintained. Quench water ~~shall~~ must not include untreated coke by-product plant effluent. All water placed on the coke being quenched ~~shall~~ must be quench water.

2) Total dissolved solids concentrations in the quench water ~~shall~~ must not exceed a weekly average of 1200 mg/L.

3) The quench water ~~shall~~ must be sampled for total dissolved solids concentrations in ~~accordance~~ compliance with the methods ~~specified~~ in Standard Methods for the Examination of Water and Wastewater, Section 209C, ~~"~~"Total ~~Filtrable~~ Filterable Residue Dried at ~~103-105°C~~103-105 °C~~"~~" 15th Edition, 1980, incorporated by reference in Section 212.113 ~~of this Part~~. Analyses ~~shall~~ must be performed on grab samples of the quench water as applied to the coke. Samples ~~shall~~ must be collected a minimum of five days per week per quench tower and analyzed to report a weekly concentration. The samples for each week ~~shall~~ must be analyzed either:

i) Separately~~,~~ with the average of the individual daily concentrations determined; or

ii) As one composite sample~~,~~ with equal volumes of the individual daily samples combined to form the composite sample.

4) The records required under this subsection ~~shall~~ must be kept and maintained for at least three ~~(3)~~ years and upon ~~prior~~ notice ~~shall~~ must be available for inspection and copying by Agency representatives during work hours.

i) Work Rules: ~~No~~ A person ~~shall~~ must not cause or allow the operation of a by-product coke plant except in ~~accordance~~ compliance with operating and maintenance work rules approved by the Agency.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.444 Sinter Processes

Emissions of particulate matter from sinter processes ~~shall~~ must be controlled as follows:

a) Breaker Box. ~~No~~ A person ~~shall~~ must not cause or allow the emission of particulate matter into the atmosphere from the breaker stack of any sinter process to exceed the allowable emission rate ~~specified by~~under Section 212.321 ~~of this Part~~.

b) Main Windbox. ~~No~~ A person ~~shall~~ must not cause or allow the emission of particulate matter into the atmosphere from the main windbox of any existing sinter process to exceed 1.2 times the allowable emission rate ~~specified by~~under Section 212.321 ~~of this Part~~.

c) Balling Mill Drum, Mixing Drum, Pug Mill, and Cooler. ~~No~~ A person ~~shall~~ must not cause or allow the emission of visible particulate matter into the atmosphere from any balling mill drum, mixing drum, pug mill, or cooler to exceed 30 percent opacity.

d) Hot and Cold Screens.

1) Particulate matter emissions from all hot and cold screens ~~shall~~ must be controlled by air pollution control equipment or an equivalent dust suppression system. Emissions from ~~said~~ that air pollution control equipment ~~shall~~ must not exceed 69 mg/dscm (0.03 gr/dscf).

2) If the owner or operator can establish that the particulate matter emissions from the hot screens and cold screens do not exceed the aggregate of the allowable emissions ~~as specified by~~under Section 212.321 ~~of this Part~~ or ~~Section~~ 212.322 ~~of this Part~~, whichever is applicable, then subsection (d)(1) ~~of this Section shall~~must not apply.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.445 Blast Furnace Cast Houses

a) Uncaptured Emissions

1) Emissions of uncaptured particulate matter from any opening in a blast furnace cast house ~~shall~~ must not exceed 20 percent opacity on a six ~~(6)~~ minute rolling average basis beginning from initiation of the opening of the tap hole ~~up~~ to the point where the iron and slag stops flowing in the trough.

2) Opacity readings ~~shall~~ must be taken in ~~accordance~~ compliance with the observation procedures ~~set out~~ in 40 CFR ~~part~~ 60, Appendix A, Method 9, incorporated by reference in Section 212.113 ~~of this Part~~.

b) Emissions from Control Equipment

1) Particulate matter emissions from control equipment used to collect any of the emissions from the tap hole, trough, iron or slag runners, or iron or slag spouts ~~shall~~ must not exceed 0.023 g/dscm (0.010 gr/dscf). Compliance ~~shall~~ must be determined in ~~accordance~~ compliance with ~~the procedures set out in~~ 40 CFR ~~part~~ 60, Appendix A, Methods 1 through 5, incorporated by reference in Section 212.113 ~~of this Part~~, and ~~shall~~ must be based on the arithmetic average of three runs. Calculations ~~shall~~ must be based on the duration of a cast defined in subsection (a)(1) ~~of this Section~~.

2) The opacity of emissions from control equipment used to collect any of the particulate matter emissions from the tap hole, trough, iron or slag runners, or iron or slag spouts ~~shall~~ must not exceed 10 percent on a six ~~(6)~~ minute rolling average basis. Opacity readings ~~shall~~ must be taken in ~~accordance~~ compliance with the observation procedures ~~set out~~ in 40 CFR

~~part~~ 60, Appendix A, Method 9, incorporated by reference in Section 212.113~~ of this Part~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.446 Basic Oxygen Furnaces

Emissions of particulate matter from basic oxygen processes shall be controlled as follows:

a) Charging, Refining and Tapping. Particulate matter emissions from all basic oxygen furnaces (BOF) ~~shall~~ must be collected and ducted to pollution control equipment. Unless subsection (c) ~~of this Section~~ applies, emissions from ~~basic oxygen furnace~~BOF operations during the entire cycle (operations from the beginning of the charging process through the end of the tapping process) ~~shall~~ must not exceed the allowable emission rate ~~specified by~~under Section 212.321 or ~~Section~~ 212.322~~ of this Part~~, whichever is applicable. For purposes of computing the process weight rate for this subsection, nongaseous material charged to the furnace and process oxygen ~~shall~~ must be included. ~~No~~ The computation must not include any material ~~shall be included~~ more than once.

b) Hot Metal Transfer, Hot Metal Desulfurization, and Ladle Lancing.

1) Particulate matter emissions from hot metal transfers to a mixer or ladle, hot metal desulfurization operations, and ladle lancing ~~shall~~ must be collected and ducted to pollution control equipment, and emissions from the pollution control equipment ~~shall~~ must not exceed 69 mg/dscm (0.03 gr/dscf).

2) If the owner or operator can establish that the total particulate matter emissions from hot metal transfers, hot metal desulfurization operations, and ladle lancing operations combined do not exceed the allowable emissions ~~as specified by~~under Section 212.321 or ~~Section~~ 212.322, whichever is applicable, where the process weight rate (P) is the hot metal charged to the BOF vessel, then subsection (b)(1) ~~above shall~~must not apply.

c) ~~No~~ A person ~~shall~~ must not cause or allow uncaptured emissions from any opening in the building housing the BOF shop to exceed an opacity of 20 percent at integrated iron and steel plants in the vicinity of Granite City, as described in Section 212.324(a)(1)(C)~~ of this Part~~. Compliance with this subsection ~~shall~~ must be determined in ~~accordance~~ compliance with 40 CFR ~~part~~ 60, Appendix A, Method 9, incorporated by reference in Section 212.113~~ of this Part~~, except that compliance ~~shall~~ must be determined by averaging any 12 consecutive observations taken at 15 second intervals.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.447 Hot Metal Desulfurization Not Located in the BOF

The particulate matter emissions from hot metal desulfurization ~~shall~~ must be collected and ducted to pollution control equipment, and emissions from the pollution control equipment ~~shall~~ must not exceed 69 mg/dscm (0.03 gr/dscf).

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.448 Electric Arc Furnaces

The total particulate emissions from meltdown and refining, charging, tapping, slagging, electrode port leakage, and ladle lancing ~~shall~~ must not exceed the allowable emission rate ~~specified by~~under Section 212.321 or 212.322 ~~of this Part~~, whichever is applicable.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.449 Argon-Oxygen Decarburization Vessels

The total particulate matter emissions from all charging, refining, alloy addition, and tapping operations ~~shall~~ must not exceed the allowable emission rate ~~specified by~~under Section 212.321 or ~~Section~~ 212.322 ~~of this Part~~, whichever is applicable.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.450 Liquid Steel Charging

Particulate matter emissions from liquid steel charging in continuous casting operations ~~shall~~ must be controlled by chemical or mechanical shrouds or methods of comparable effectiveness.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.451 Hot Scarfing Machines

All hot scarfing machines ~~shall~~ must be controlled by pollution control equipment. Emissions from ~~said~~ that pollution control equipment ~~shall~~ must not exceed 69 mg/dscm (0.03 gr/dscf) during hot scarfing operations. ~~Provided, however, that the~~The hot scarfing machine existing on January 1, 1987, and operated by the LTV Steel Company, Inc., at its Chicago Works, which employs wet scrubbers, may emit particulate matter in amounts not exceeding 138 mg/dscm (0.06 gr/dscf) during hot scarfing operations so long as emissions do not exceed 23 mg/dscm (0.01 gr/dscf) as an hourly average, as measured per hour.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.452 Measurement Methods

Particulate matter emissions from emission units subject to Sections 212.441 through 212.451 ~~of this Subpart shall~~must be determined in ~~accordance~~ compliance with procedures ~~published~~ in 40 CFR ~~part~~ 60, Appendix A, Methods 1 through 5, front one-half of the sampling train, incorporated by reference in Section 212.113~~ of this Part~~. Visible emission evaluation for determining compliance ~~shall~~ must be conducted in ~~accordance~~ complian with procedures ~~published~~ in 40 CFR ~~part~~ 60, Appendix A, Method 9, incorporated by reference in Section 212.113~~ of this Part~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.455 Highlines on Steel Mills

Section 212.308 ~~of this Part shall~~must not apply to highlines at steel mills.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.456 Certain Small Foundries

Sections 212.321 and 212.322 ~~of this Part shall~~must not apply to foundry cupolas if all the following conditions are met:

a) The cupola was in existence ~~prior to~~before April 15, 1967;

b) The cupola process weight rate is less than or equal to 20,000 lbs/hr;

c) The cupola as of April 14, 1972, either:

1) ~~Is in compliance~~Complies with the following allowable emissions from small foundries ~~covered by~~under this Section:

Process Weight Rate lbs/hr	Allowable Emission Rate lbs/hr
1,000	3.05
2,000	4.70
3,000	6.35
4,000	8.00
5,000	9.58
6,000	11.30
7,000	12.90
8,000	14.30
9,000	15.50
10,000	16.65
12,000	18.70
16,000	21.60
18,000	23.40

20,000	25.10

(~~Board Note~~BOARD NOTE: For process weight rates not listed, straight line interpolation between two consecutive process weight rates ~~shall~~ must be used to determine allowable emission rates.); or

2) ~~Is in compliance~~Complies with the terms and conditions of a variance granted by the Pollution Control Board ~~(Board)~~; and construction has commenced on equipment or modifications sufficient to achieve compliance with subsection (c)(1) ~~of this Section~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.457 Certain Small Iron-Melting Air Furnaces

Section 212.322 ~~of this Part shall~~must not apply to iron-melting air furnaces if all the following conditions are met:

a) The air furnace was in existence ~~prior to~~before April 15, 1967, and is located in Hoopeston, Vermilion County, Illinois;

b) The air furnace process weight rate is less than or equal to 5,000 lbs/hr;

c) The air furnace as of November 23, 1977, either:

1) ~~Is in compliance~~Complies with the following allowable emissions from small iron-melting air furnaces ~~covered by~~under this Section:

Process Weight Rate lbs/hr	Allowable Average Emission Rate lbs/hr
1,000	6.10
2,000	9.40
3,000	12.70
4,000	16.00
5,000	19.16

(~~Board Note~~BOARD NOTE: The average emission rate is computed by dividing the sum of the emissions during operation by the number of hours of operation, excluding any time during which the equipment is idle. For process weight rates not listed, straight line interpolation between two consecutive process weight rates ~~shall~~ must be used to determine allowable average emission rates.); or

2) ~~Is in compliance~~Complies with the terms and conditions of a variance granted by the Pollution Control Board; and construction has commenced on equipment or modifications sufficient to achieve compliance with subsection (c)(1) ~~of this Section~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.458 Emission Units in Certain Areas

a) Applicability. This Section ~~shall~~ must apply to ~~those~~ emission units located in those areas defined in Section 212.324(a)(1) ~~of this Part~~.

b) Emission Limitation. ~~No~~ A person ~~shall~~ must not cause or allow emissions of PM-10, other than ~~that of~~ fugitive particulate matter, into the atmosphere to exceed the following limits during any ~~one hour~~one-hour period:

1) 15.9 ng/J (0.037 lbs/mmbtu) of heat input from any fuel combustion emission unit located at the steel plant between 106th and 111th Streets in City of Chicago;

2) 22.9 mg/scm (0.01 gr/scf) for the basic oxygen furnace additive systems in the Village of Riverdale;

3) 4.3 ng/J (0.01 lbs/mmbtu) of heat input from the burning of fuel in the soaking pits in the Village of Riverdale;

4) 64.08 mg/scm (0.028 gr/scf) from the electrostatic precipitator discharge of the basic oxygen process in the Village of Riverdale;

5) 45.8 mg/scm (0.02 gr/scf) from the pickling process at a steel plant in the Village of Riverdale;

6) 5 percent opacity for coal handling systems equipped with fabric filters at a steel plant located in the City of Chicago;

7) 22.9 mg/scm (0.01 gr/scf) from any process emissions unit located at integrated iron and steel plants in the vicinity of Granite City, as defined in Section 212.324(a)(1)(C) ~~of this Part~~, except as otherwise provided in this Section or in Sections 212.443 and 212.446 ~~of this Subpart~~;

8) 5 percent opacity for continuous caster spray chambers or continuous casting operations at steel plants in the vicinity of Granite City, as defined in Section 212.324(a)(1)C) ~~of this Subpart~~;

9) 32.25ng/J (0.075 lbs/mmbtu) of heat input from the burning of coke oven gas at all emission units~~,~~ other than coke oven combustion stacks~~,~~ at steel

plants in the vicinity of Granite City, as defined in Section 212.324(a)(1)(C) ~~of this Subpart~~;

10) 38.7 ng/J (0.09 lbs/mmbtu) of heat input from the slab furnaces at steel plants in the vicinity of Granite City, as defined in Section 212.324(a)(1)(C) ~~of this Subpart~~;

11) 22.9 mg/scm (0.01 gr/scf) for all process emission units at secondary lead processing plant located in Granite City, except the salt flux crusher;

12) 22.9mg/scm (0.01 gr/scf) for any melting furnace at a secondary aluminum smelting and refining plant in the vicinity of Granite City, as defined in Section 212.324(a)(1)(C) ~~of this Part~~;

13) 45.8 mg/scm (0.02 gr/scf) from No. 6 mill brusher~~,~~ and metal chip handling system at a secondary aluminum smelting and refining plant located in the vicinity of Granite City, as defined in Section 212.324(a)(1)(C) ~~of this Part~~;

14) 0.05 kg/Mg (0.10 lb/T~~0.01 lb/T~~) of sand processed from molding sand forming systems at a steel foundry plant located in Granite City;

15) 0.01 kg/Mg (0.02 lbs/T) of sand processed from recycle sand shakeouts at a steel foundry plant located in Granite City;

16) At a steel foundry plant located in Granite City:

A) 20 percent opacity for all emission units; and

B) 22.9 mg/scm (0.01 gr/scf) for all other process emission units, except the sand dryer, sand cooler, chill tumbler, paint booth, chromite reclamation, core baking ovens, electric arc shop roof ventilators, and emission units listed in subsections (b)(14) and (b)(15) ~~of this Section~~;

17) 41.2 mg/scm (0.018 gr/scf) for cold rolling mill emission units at a metal finishing plant located in the Village of McCook;

18) 2.15 ng/J (0.005 lbs/mmbtu) of heat input from the burning of fuel in any process emission unit at a secondary aluminum smelting and refining plant and/or aluminum finishing plant;

19) 22.9 mg/scm (0.01 gr/scf) from dross pad, dross cooling, and dross mixing units at a secondary aluminum smelting and refining plant and/or aluminum finishing plant;

20) 12.9 ng/J (0.03 lbs/mmbtu) of heat input from any fuel combustion emission unit that heats air for space heating purposes at a secondary aluminum smelting and refining plant located in the vicinity of Granite City, as defined in Section 212.324(a)(1)(C) ~~of this Part~~;

21) 68.7 mg/scm (0.03 gr/scf) for any holding furnace at a secondary aluminum smelting and refining plant in the vicinity of Granite City, as defined in Section 212.324(a)(1)(C) ~~of this Part~~;

22) 2.15 ng/J (0.005 lb/mmbtu) of heat input from the steel works boilers located at the steel making facilities at steel plant in the vicinity of Granite City, as defined in Section 212.324(a)(1)(C);

23) 27.24 kg/hr (60 lbs/hr) and 0.1125 kg/Mg (.225 lbs/T) of total steel in process, whichever limit is more stringent for the total of all basic oxygen furnace processes described in Section 212.446(a) ~~of this Subpart~~ and measured at the BOF stack located at steel plant in the vicinity of Granite City, as defined in Section 212.324(a)(1)(C) ~~of this Part~~;

24) North and south melting furnaces at a secondary aluminum smelting and refining plant located in the vicinity of Granite City, as defined in Section 212.324(a)(1)(C) ~~of this Part~~, cannot be operated simultaneously;

25) Magnesium pot furnaces at a secondary aluminum smelting and refining plant located in the vicinity of Granite City, as defined in Section 212.324(a)(1)(C) ~~of this Part~~, can be operated no more than two lines at a time;

26) 2.15 ng/J (0.005 lbs/mmbtu) of heat input from any fuel combustion emission unit at a secondary aluminum smelting and refining plant and/or aluminum finishing plant except as provided in subsection (b)(20) ~~of this Section~~;

27) 91.6 mg/scm (0.040 gr/scf) and 0.45 kg/hr (1 lb/hr) for melting furnaces Nos. 6, 7, and 8 at a metal finishing plant in the Village of McCook, with operation limited to no more than two of these furnaces at one time;

28) 183 mg/scm (0.080 gr/scf) and 0.91 kg/hr (2 lbs/hr) for holding furnaces Nos. 6, 7, and 8 at a metal finishing plant in the Village of McCook, with operation limited to no more than two of these furnaces at one time;

29) 54.9 mg/scm (0.024 gr/scf) and 1.81 kg/hr (4 lbs/hr) for melting furnaces Nos. 24, 25, and 26 at a metal finishing plant in the Village of McCook;

30) 34.3 mg/scm (0.015 gr/scf) and 1.81 kg/hr (4 lbs/hr) for melting furnaces Nos. 27, 28, 29, and 30 at a metal finishing plant in the Village of McCook;

31) 32.0 mg/scm (0.014 gr/scf) and 0.45 kg/hr (1 lb/hr) for holding furnaces Nos. 24, 25, and 26 at a metal finishing plant in the Village of McCook, except that during fluxing operation those furnaces may emit 195 mg/scm (0.085 gr/scf) and 2.72 kg/hr (6 lbs/hr);

32) 34.3 mg/scm (0.015 gr/scf) and 0.45 kg/hr (1 lb/hr) for holding furnaces Nos. 27, 28, 29, and 30 at a metal finishing plant in the Village of McCook, except that during fluxing operation those furnaces may emit 217 mg/scm (0.095 gr/scf) and 2.72 kg/hr (6 lbs/hr);

33) Fluxing operations at holding furnaces Nos. 24, 25, 26, 27, 28, 29, and 30 at a metal finishing plant in the Village of McCook ~~shall~~ must be limited to no more than three at any one time.

c) Exceptions. The mass emission limits ~~contained~~ in subsection (b) ~~of this Section~~ ~~shall~~must not apply to ~~those~~ emission units with no visible emissions other than ~~that of~~ fugitive particulate matter; however, if a stack test is performed, this subsection is not a defense to a finding of a violation of the mass emission limits ~~contained~~ in subsection (b) ~~of this Section~~.

d) Maintenance, Repair, and Recordkeeping. ~~The requirements of~~ Section 212.324 (f) and (g) ~~of this Part shall~~must also apply to this Section.

e) Compliance with this Section is required by December 10, 1993, or upon initial start-up, whichever occurs later.

(Source: Amended at 48 Ill. Reg._____, effective _____)

SUBPART S: AGRICULTURE

Section 212.461 Grain Handling and Drying in General

a) Sections 212.302(a), 212.321, and 212.322 ~~of this Part shall~~must not apply to grain-handling and grain-drying operations, portable grain-handling equipment, and one-turn storage space.

b) Housekeeping Practices. All grain-handling and grain-drying operations, regardless of size, must implement and use the following housekeeping practices:

1) Air pollution control devices ~~shall~~ must be checked daily and cleaned as necessary to insure proper operation.

2) Cleaning and Maintenance.

A) Floors ~~shall~~ must be kept swept and cleaned from boot pit to cupola floor. Roof or bin decks and other exposed flat surfaces ~~shall~~ must be kept clean of grain and dust that would tend to rot or become airborne.

B) Cleaning ~~shall~~ must be handled in such a manner as not to permit dust to escape to the atmosphere.

C) The yard and surrounding open area, including ~~but not limited to~~ ditches and curbs, ~~shall~~ mustl be cleaned to prevent the accumulation of rotting grain.

3) Dump Pit.

A) Aspiration equipment ~~shall~~ must be maintained and operated.

B) Dust control devices ~~shall~~ must be maintained and operated.

4) Head House. The head house ~~shall~~ must be maintained in such a fashion that visible quantities of dust or dirt are not allowed to escape to the atmosphere.

5) Property. The yard and driveway of any source ~~shall~~ must be asphalted, oiled, or equivalently treated to control dust.

6) Housekeeping Check List. Housekeeping check lists to be developed by the Agency ~~shall~~ must be completed by the manager and maintained on the premises for inspection by Agency personnel.

c) Exemptions. Any grain-handling operation for which construction or modification commenced ~~prior to~~before June 30, 1975, having a grain through-put of not more than 2 million bushels per year and located inside a major population area and any grain-handling operation or grain-drying operation for which construction or modification commenced ~~prior to~~before June 30, 1975, located outside of a major population area which is required to apply for a permit ~~pursuant to~~under Sections 212.462 and 212.463 ~~of this Subpart~~, respectively, ~~shall~~ must receive ~~such~~ that permit notwithstanding the control requirements of those respective rules ~~provided said~~if the operation can demonstrate that the following conditions exist upon application for, or renewal of, an operating permit:

1) The requirements of subsection (b) ~~of this Section~~ are being met; and

2) No certified investigation is on file with the Agency indicating that there is an alleged violation ~~prior to~~before issuance of the permit.

A) If a certified investigation is on file with the Agency indicating an alleged violation, any applicant may obtain an exemption for certain operations if ~~said~~ the applicant can prove to the Agency that those parts of ~~his~~ the operation for which ~~he seeks~~they seek exemption are not the probable cause of the alleged violation.

B) Applicants requesting an exemption in ~~accordance~~ compliance with ~~the provisions of~~ subsection (c)(2)(A) ~~of this Section~~ may be granted an operating permit for a limited time, not to exceed ~~twelve (~~12~~)~~ months in duration, if an objection is on file with the Agency on which a certified investigation has not been made ~~prior to~~before issuance of the permit.

C) An applicant may consider denial of an exemption under this rule as a refusal by the Agency to issue a permit. This ~~shall entitle~~denial entitles the applicant to appeal the Agency~~!~~'s decision to the Board ~~pursuant to~~under Section 40 of the Act [415 ILCS 5/40].

d) Loss of Exemption. Any grain-handling operation or grain-drying operation for which construction or modification commenced ~~prior to~~before June 30, 1975, that has received an operating permit ~~pursuant to the provisions of~~under subsection (c) ~~of this Section shall~~must apply for an operating and/or construction permit ~~pursuant to~~under 35 Ill. Adm. Code 201 within ~~sixty (~~60~~)~~ days after receipt of written notice from the Agency that a certified investigation is on file with the Agency indicating that there is an alleged violation against the operation. The construction permit application ~~shall~~ must include a compliance plan and project completion schedule showing the grain-handling operation~~!~~'s program or grain-drying operation~~!~~'s program for complying with the standards and limitations of Section 212.462 or 212.463 ~~of this Subpart as the case may be,~~ within a reasonable time after the date on which notice of a certified investigation indicating alleged pollution was received by ~~said~~ the operation~~; provided, however,~~. However, any such operation ~~shall~~ must not be required to reduce emissions from those parts of the operation that the applicant can prove to the Agency are not the probable cause of the pollution alleged in the certified investigation.

1) The written notice of loss of exemption is not a final action of the Agency appealable to the Board.

2) Denial of a permit requested ~~pursuant to~~under this subsection is a final action appealable to the Board under Section 40 of the Act [415 ILCS 5/40].

e) Circumvention. It ~~shall~~ must be a violation of this regulation for any person or persons to attempt to circumvent the requirements of this regulation by establishing a pattern of ownership or source development which, except for such pattern of ownership or source development, would otherwise require application of Section 212.462 or 212.463 ~~of this Subpart~~.

f) Standard on Appeal to Board. In ruling on any appeal of a permit denial under subsection (c) or (d) ~~of this Section~~, the Board ~~shall~~ must not order the permit to be issued by the Agency unless the applicant who has appealed the permit denial has proved to the Board that the grain-handling operation or grain-drying operation which is the subject of the denied application is not injurious to human, plant or animal life, to health, or to property, and does not unreasonably interfere with the enjoyment of life or property.

g) Alternate Control of Particulate Emissions.

1) Grain-handling or grain-drying operations~~,~~ which were in numerical compliance with Section 212.322 ~~of this Part,~~ as of April 14, 1972, and continue to ~~be in compliance~~comply with Section 212.322 ~~of this Part~~ need not comply with the provisions under this Subpart, except the housekeeping practices in this subsection and subsection (b) ~~of this Section~~.

2) Grain-handling or grain-drying operations~~,~~ which were not in numerical compliance with Section 212.322 ~~of this Part,~~ as of April 14, 1972, but which came into compliance with Section 212.321 ~~of this Part prior to~~before April 14, 1972, and continue to ~~be in compliance~~comply with Section 212.321 ~~of this Part~~ need not comply with ~~the provisions under~~ this Subpart, except the housekeeping practices in this subsection and in subsection (b) ~~of this Section~~.

3) Proof of compliance with ~~said~~ this rule ~~shall~~ must be made by stack sampling and/or material balance results obtained from actual testing of the subject emission unit or process and be submitted at the time of an application for, or renewal of, an operating permit.

h) Severability. If any provision of these rules and regulations is adjudged invalid, ~~such~~ that invalidity ~~shall~~ must not affect the validity of ~~this~~ 35 Ill. Adm. Code, Subtitle B, Chapter I as a whole or of any Part, Subpart, sentence, or clause ~~thereof~~ of it not adjudged invalid.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.462 Grain Handling Operations

Unless otherwise exempted ~~pursuant to~~under Section 212.461(c) or (d) ~~of this Subpart~~, or allowed to use alternate control ~~according to~~under Section 212.461(g) ~~of this Subpart~~, existing grain-handling operations with a total annual grain through-put of 300,000 bushels or more ~~shall~~ must apply for an operating permit ~~pursuant to~~under 35 Ill. Adm. Code 201, and ~~shall~~ must demonstrate compliance with the following:

a) Cleaning and Separating Operations.

1) Particulate matter generated during cleaning and separating operations ~~shall~~ must be captured to the extent necessary to prevent visible particulate matter emissions directly into the atmosphere.

2) For grain-handling sources having a grain through-put of not more than 2 million bushels per year or located outside a major population area, air contaminants collected from cleaning and separating operations ~~shall~~ must be conveyed through air pollution control equipment which has a rated and actual particulate removal efficiency of not less than 90 percent by weight ~~prior to~~before release into the atmosphere.

3) For grain-handling sources having a grain through-put exceeding 2 million bushels per year and located within a major population area, air contaminants collected from cleaning and separating operations ~~shall~~ must be conveyed through air pollution control equipment which has a rated and actual particulate removal efficiency of not less than 98 percent by weight ~~prior to~~before release into the atmosphere.

b) Major Dump-Pit Area.

1) Induced Draft~~.~~

A) Induced draft ~~shall~~ must be applied to major dump pits and their associated equipment ~~(~~including~~, but not limited to,~~ boots, hoppers. And legs~~)~~ to such an extent that a minimum face velocity is maintained~~,~~ at the effective grate surface~~,~~ sufficient to contain particulate emissions generated in unloading operations. The minimum face velocity at the effective grate surface ~~shall~~ must be at least 200 fpm, which ~~shall~~ must be determined by using the equation:

$$V = Q/A$$

where:
V = face velocity; and
Q = induced draft volume in scfm; and
A = effective grate area in ft^2; and

B) The induced draft air stream for grain-handling sources having a grain through-put of not more than 2 million bushels per year or located outside a major population area ~~shall~~ must be confined and conveyed through air pollution control equipment which has an overall rated and actual particulate collection efficiency of not less than 90 percent by weight; and

C) The induced draft air stream for grain-handling sources having a grain through-put exceeding 2 million bushels per year and located in a major population area ~~shall~~ must be confined and conveyed through air pollution control equipment which has an overall rated and actual particulate collection efficiency of not less than 98 percent by weight; and

D) Means or devices ~~(~~including~~, but not limited to,~~ quick-closing doors, air curtains, or wind deflectors~~) shall~~ must be employed to prevent a wind velocity in excess of 50 percent of the induced draft face velocity at the pit; ~~provided,~~ however, ~~that~~ such means or devices do not have to achieve the same degree of prevention when the ambient air wind exceeds 25 mph. The wind velocity ~~shall~~ must be measured~~,~~ with the induced draft system not operating~~,~~ at a point midway between the dump-pit area walls at the point where the wind exits the dump-pit area~~,~~ and at a height above the dump-pit area floor of approximately 2 ft; or

2) Any equivalent method, technique, system, or combination ~~thereof~~ adequate to achieve~~,~~ at a minimum~~,~~ a particulate matter emission reduction equal to the reduction ~~which could be~~ achieved by compliance with subsection (b)(1)~~ of this Section~~.

(~~Board Note~~BOARD NOTE: ~~Pursuant to~~Under Section 9 of the Act, ~~certain country~~ grain elevators meeting specified conditions and "located outside of a major population area, as defined in Section 211.3610 of Title 35 of the Illinois Administrative Code, shall be exempt from the requirements of Section 212,462 of Title 35 of the Illinois Administrative Code."~~are exempt from subsection (b) of this Section.~~)

c) Internal Transferring Area~~.~~

1) Internal transferring area ~~shall~~ must be enclosed to the extent necessary to prohibit visible particulate matter emissions directly into the atmosphere.

2) Air contaminants collected from internal transfer operations for grain-handling sources having a grain through-put of not more than 2 million bushels per year or located outside a major population area ~~shall~~ must be conveyed through air pollution control equipment which has a rated and

actual particulate removal efficiency of not less than 90 percent by weight ~~prior to~~before release into the atmosphere.

3) Air contaminants collected from internal transfer operations for grain-handling sources having a grain through-put exceeding 2 million bushels per year and located in a major population area ~~shall~~ must be conveyed through air pollution control equipment which has a rated and actual particulate removal efficiency of not less than 98 percent by weight ~~prior to~~before release into the atmosphere.

d) Load-Out Area~~.~~

1) Truck and hopper car loading ~~shall~~ must employ socks, sleeves, or equivalent devices which extend 6 inches below the sides of the receiving vehicle, except for topping off. Choke loading ~~shall~~ must be considered an equivalent method as long as the discharge is no more than 12 inches above the sides of the receiving vehicle.

2) Box car loading ~~shall~~ must employ means or devices to prevent the emission of particulate matter into the atmosphere to the fullest extent ~~which is~~ technologically and economically feasible.

3) Watercraft Loading.

A) Particulate matter emissions generated during loading for grain-handling sources having a grain through-put of not more than 2 million bushels per year or located outside a major population area ~~shall~~ must be captured in an induced draft air stream, which ~~shall~~ must be ducted through air pollution control equipment that has a rated and actual particulate matter removal efficiency of not less than 90 percent by weight ~~prior to~~before release into the atmosphere.

B) Particulate matter emissions generated during loading for grain-handling sources having a grain through-put exceeding 2 million bushels per year and located in a major population area ~~shall~~ must be captured in an induced draft air stream, which ~~shall~~ must be ducted through air pollution control equipment that has a rated and actual particulate removal efficiency of not less than 98 percent by weight ~~prior to~~before release into the atmosphere; except for the portion of grain loaded by trimming machines for which particulate matter emission reductions~~,~~ must at a minimum~~, shall~~ equal the reduction achieved by compliance with subsection (d)(3)(A) ~~of this Section~~.

e) New and Modified Grain-Handling Operations. Grain-handling operations for which construction or modification commenced on or after June 30, 1975, ~~shall~~ must file applications for construction and operating permits ~~pursuant to~~under 35 Ill. Adm. Code 201, and ~~shall~~ must comply with the control equipment requirements of this Section, except for grain-handling operations for which construction or modification commenced on or after June 30, 1975, which will handle an annual grain through-put of less than 300,000 bushels.~~; provided, however, that~~ However, for the purpose of this Subpart, an increase in the annual grain through-put~~,~~ without physical alterations or additions to the grain-handling operation~~, shall~~ must not be considered a modification unless ~~such~~ the increase exceeds 30 percent of the annual grain through-put on which the operation~~'~~'s original construction and/or operating permit was granted. If the grain-handling operation has been operating lawfully without a permit, its annual grain through-put ~~shall~~ must be determined ~~as set forth~~under in the definition of the term ~~"~~"annual grain through-put.~~"~~" At 35 Ill. Adm. Code 211.490.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.463 Grain Drying Operations

Unless otherwise exempted ~~pursuant to~~under Section 212.461(c) or (d) ~~of this Subpart~~ or allowed to use alternate control ~~according to~~under Section 212.461(g) ~~of this Subpart~~, grain-drying operations for which construction or modification commenced ~~prior to~~before June 30, 1975, with a total grain-drying capacity in excess of 750 bushels per hour for 5 percent moisture extraction at manufacturer~~'~~'s rated capacity ~~(~~using the American Society of Agricultural Engineers Standard 248.2, Section 9, Basis for Stating Drying Capacity of Batch and Continuous-Flow Grain Dryers, incorporated by reference in Section 212.113 ~~of this Part),~~ ~~shall~~ must be operated in such a fashion as to preclude the emission of particulate matter larger than 300 microns mean particle diameter, ~~shall~~ must apply for an operating permit ~~pursuant to~~under 35 Ill. Adm. Code 201, and ~~shall~~ must comply with the following:

a) Column Dryers. The largest effective circular diameter of transverse perforations in the external sheeting of a column dryer ~~shall~~ must not exceed 0.094 inch, and the grain inlet and outlet ~~shall~~ must be enclosed.

b) Rack Dryers. No portion of the exhaust air of rack dryers ~~shall~~ may be emitted to the ambient atmosphere without having passed through a particulate collection screen having a maximum opening of 50 mesh, U.S. Sieve Series.

1) All such screens ~~will~~ must have adequate self-cleaning mechanisms, the exhaust gas of which for grain-handling facilities having a grain through-put of not more than 2 million bushels per year or located outside a major population area ~~shall~~ must be ducted through air pollution control equipment which has a rated and actual particulate removal efficiency of 90 percent by weight ~~prior to~~before release into the atmosphere.

2) All such screens ~~will~~ must have adequate self-cleaning mechanisms, the exhaust gas of which for grain-handling sources having a grain through-put exceeding 2 million bushels per year and located in a major population area ~~shall~~ must be ducted through air pollution control equipment which has a rated and actual particulate removal efficiency of 98 percent by weight ~~prior to~~before release into the atmosphere.

c) Other Types of Dryers. All other types of dryers ~~shall~~ must be controlled in a manner ~~which shall result~~resulting in the same degree of control required for rack dryers ~~pursuant to~~under subsection (b) ~~of this Section~~.

d) New and Modified Grain-Drying Operations. Grain-drying operations constructed or modified on or after June 30, 1975, ~~shall~~ must file applications for construction and operating permits ~~pursuant to~~under 35 Ill. Adm. Code 201, and ~~shall~~ must comply with the control equipment requirements of this Section, except for new and modified grain-drying operations which do not result in a total grain-drying capacity in excess of 750 bushels per hour for 5 percent moisture extraction at manufacturer~~'~~'s rated capacity, using the American Society of Agricultural Engineer Standard 248.2, Section 9, Basis for Stating Drying Capacity of Batch and Continuous-Flow Grain Dryers, incorporated by reference at Section 212.113.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.464 Sources in Certain Areas

a) Applicability. Notwithstanding Section 212.461 ~~of this Subpart~~, this Section ~~shall apply~~applies to ~~those~~ sources located in the Lake Calumet area as defined in Section 212.324(a)(1)(B) ~~of this Part~~.

b) Emission Limitations

1) ~~No~~ A person ~~shall~~ must not cause or allow the emission of PM-10, other than ~~that of~~ fugitive particulate matter, into the atmosphere to exceed 22.9 mg/scm (0.01 gr/scf) during any ~~one hour~~one-hour period from any process emission unit engaged in the drying, storing, mixing, or treating of grain except for column grain dryers. ~~;~~ ~~in~~In addition, ~~no~~ a person ~~shall~~ must not cause or allow visible emissions of PM-10 other than fugitive particulate matter from grain conveying, transferring, loading, or unloading operations, including garners, scales, and cleaners.

2) ~~No~~ A person ~~shall~~ must not cause or allow the emission of fugitive particulate matter into the atmosphere from barges and other watercraft, truck, or rail loading or unloading systems to exceed the limits ~~specified~~ in Section 212.123 ~~of this Part~~.

3) Column grain dryers ~~shall~~ must not be eligible for the exemptions ~~as provided in~~under Section 212.461(g) ~~of this Part~~.

c) Exceptions. The mass emission limits ~~contained~~ in subsection (b) ~~of this Section~~ ~~shall~~must apply to ~~those~~ sources with no visible emissions other than that of fugitive particulate matter. ~~; however~~However, if a stack test is performed, this subsection is not a defense to a finding of a violation of the mass emission limits ~~contained~~ in subsection (b) ~~of this Section~~.

d) Maintenance, Repair, and Recordkeeping. ~~The requirements of~~ Section 212.324 (f) and (g) ~~of this Part shall~~ also apply to this Section.

e) Compliance Date. Emission units ~~shall~~ must comply with the emission limitations and recordkeeping and reporting requirements of this Section on May 11, 1993, or upon initial start-up, whichever occurs later.

(Source: Amended at 48 Ill. Reg._____, effective _____)

SUBPART T: CONSTRUCTION AND WOOD PRODUCTS

Section 212.681 Grinding, Woodworking, Sandblasting, and Shotblasting

Sections 212.321 and 212.322 ~~of this Part shall~~must not apply to the following industries, which ~~shall~~ must be subject to Subpart K ~~of this Part~~:

a) Grinding;

b) Woodworking; and

c) Sandblasting or shotblasting.

(Source: Amended at 48 Ill. Reg._____, effective _____)

SUBPART U: ADDITIONAL CONTROL MEASURES

Section 212.700 Applicability

a) This Subpart ~~shall apply~~applies to ~~those~~ sources in the areas designated in and subject to Sections 212.324(a)(1) ~~or 212.423(a)~~ and that have actual annual source-wide emissions of PM-10 of at least ~~fifteen (~~15~~)~~ tons per year.

b) A source~~'~~'s actual annual source-wide emissions of PM-10 ~~shall~~ must be the total of its fugitive emissions and its stack emissions from process emission units and fuel combustion emission units and as set forth in the source~~'~~'s Annual Emissions Report submitted ~~pursuant to~~under 35 Ill. Adm. Code 254 or, for a newly-

constructed source or emission unit, the estimated emissions included in the permit application.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 212.701 Contingency Measure Plans, Submittal, and Compliance Date

a) ~~Those sources~~Sources subject to this Subpart ~~shall~~ must prepare contingency measure plans reflecting the PM-10 emission reductions ~~set forth~~ in Section 212.703 ~~of this Subpart~~. These plans ~~shall~~ must become federally enforceable permit conditions. ~~Such~~ These plans ~~shall~~ must be submitted to the Agency by November 15, 1994. Notwithstanding the foregoing, sources that become subject to ~~the provisions of~~ this Subpart after July 1, 1994, ~~shall~~ must submit a contingency measure plan to the Agency for review and approval within ~~ninety (~~90~~)~~ days after the date ~~such~~ on which the source or sources became subject to ~~the provisions of~~ this Subpart or by November 15, 1994, whichever is later. The Agency ~~shall~~ must notify those sources requiring contingency measure plans, based on the Agency's current information; however, the Agency's failure to notify any source of its requirement to submit contingency measure plans ~~shall~~ must not be a defense to a violation of this Subpart and ~~shall~~ must not relieve the source of its obligation to timely submit a contingency measure plan.

b) If the Agency disapproves the initial submittal of a contingency measure plan or a source fails to revise a plan so that it is approvable, the Agency ~~shall~~ must so notify the source in writing, and the source may treat ~~such~~ that notice as a permit denial.

c) Sources having operational changes subject to Sections 212.304, 212.305, 212.306, 212.308, 212.316(a) through (e), 212.424, or 212.464 which require either a new permit or a revision to an existing permit ~~shall~~must, within 30 days after ~~such~~ those changes, submit a request to modify its permit in order to include a new~~,~~ appropriate contingency measure plan. ~~Such~~ The new plan ~~shall~~ must be subject to the requirements of this Subpart.

d) A source may, consistent with the requirements of this Subpart and any applicable permitting requirements, propose revisions to its contingency measure plan.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.702 Determination of Contributing Sources

a) If the review of monitoring data reveals an ~~exceedence~~ exceedance of the 24-hour ambient air quality standard for PM-10 ~~found~~ at 35 Ill. Adm. Code 243.120, the Agency ~~shall~~ must attempt to determine the source or sources causing or contributing to the ~~exceedence~~exceedance.

b) In determining whether a source has caused or contributed to an ~~exceedence~~ exceedance of the 24-hour ambient air quality standard for PM-10, the Agency may take whatever steps are necessary to determine which source or sources are culpable for the ~~exceedence~~exceedance, including~~, but not limited to~~:

1) Evaluating whether the ~~exceedence~~ exceedance can be classified as an "exceptional event" ~~pursuant to~~under the "Guideline on the Identification and Use of Air Quality Data Affected by Exceptional Events," incorporated by reference in Section 212.113~~ of this Part~~;

2) Reviewing operating records of the source or sources identified ~~pursuant to~~under subsections (b)(3) and (b)(4) ~~below~~ to determine whether any source or sources so identified experienced a malfunction or breakdown or violated any term or condition of its operating permit which contributed to the ~~exceedence~~exceedance;

3) Evaluating the monitoring equipment filter evidencing the ~~exceedence~~ exceedance to determine the types of sources that contributed to the ~~exceedence~~exceedance; and

4) Evaluating meteorological data and conducting dispersion analyses ~~pursuant to~~under the "Guideline on Air Quality Models (Revised)," incorporated by reference in Section 212.113~~ of this Part~~, to determine which source or sources caused or contributed to the ~~exceedence~~exceedance.

c) If the Agency determines that the ~~exceedence~~ exceedance can be classified as an exceptional event, the Agency ~~shall~~ must make a written request to USEPA to void the ~~exceedence~~exceedance. If the ~~exceedence~~ exceedance has been caused by an "exceptional event," the Agency ~~shall~~ must make no requests upon any source for Level I or Level II controls ~~pursuant to~~under Section 212.704(a) or (b) ~~of this Subpart~~ until ~~such time as~~ USEPA has denied the Agency's request to void the ~~exceedence~~ exceedance or until an additional ~~exceedence~~ exceedance of the 24-hour ambient air quality standard which is not due to an exceptional event, as determined by the Agency, has been monitored for the same area.

d) If the Agency determines that the ~~exceedence~~ exceedance was due to a malfunction or breakdown or violation of any term or condition of a source's operating permit, the Agency ~~shall~~ must contact ~~such~~ the source and may pursue appropriate action under 35 Ill. Adm. Code 103.

e) The Agency's determination of culpability of a source is appealable to the Board ~~pursuant to the procedures set forth at~~under 35 Ill. Adm. Code 106, Subpart J.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.703 Contingency Measure Plan Elements

a) All sources subject to this Subpart ~~shall~~ must submit a contingency measure plan. The contingency measure plan ~~shall~~ must contain two levels of control measures:

1) Level I measures are measures that will reduce total actual annual source-wide fugitive emissions of PM-10 subject to control under Sections 212.304, 212.305, 212.306, 212.308, 212.316(a) through (e), 212.424, or 212.464 by at least 15%.

2) Level II measures are measures that will reduce total actual annual source-wide fugitive emissions of PM-10 subject to control under Sections 212.304, 212.305, 212.306, 212.308, 212.316(a) through (e), 212.424, or 212.464 by at least 25%.

b) A source may comply with this Subpart through an alternative compliance plan that provides for reductions in emissions equal to the level of reduction of fugitive emissions as required at subsection (a) ~~above~~ and which has been approved by the Agency and USEPA as federally enforceable permit conditions. If a source elects to include controls on process emission units, fuel combustion emission units, or other fugitive emissions of PM-10 not subject to Sections 212.304, 212.305, 212.306, 212.308, 212.316(a) through (e), 212.424, or 212.464 at the source in its alternative control plan, the plan must include a reasonable schedule for implementation of ~~such~~ the controls, not to exceed two ~~(2)~~ years. This implementation schedule is subject to Agency review and approval.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.704 Implementation

a) Following any ~~exceedence~~ exceedance of the 24-hour ambient air quality standard for PM-10, the Agency ~~shall~~ must notify the source or sources the Agency has identified as likely to be causing or contributing to an ~~exceedence~~ exceedance detected by monitoring. Within ~~ninety (~~90~~)~~ days after ~~receipt of such~~receiving notification, each source ~~so notified~~ may implement Level I or Level II measures, as determined ~~pursuant to~~under subsection (d) ~~below~~.

b) If there is a violation of the ambient air quality standard for PM-10 as determined in ~~accordance~~ compliance with 40 CFR ~~Part~~ 50, Appendix K, incorporated by reference in Section 212.113 ~~of this Part~~, the Agency ~~shall~~ must notify the source or sources the Agency has identified as likely to be causing or contributing to one or more of the ~~exceedences~~ exceedances leading to ~~such~~ the violation, and ~~such~~ the source or sources ~~shall~~ must implement Level I or Level II measures, as determined ~~pursuant to~~under subsection (e) ~~below~~. The notified source or sources ~~so identified shall~~must implement ~~such~~ the measures corresponding to fugitive emissions within ~~ninety (~~90~~)~~ days after ~~receipt of such~~receiving notification and

~~shall~~ must implement ~~such~~ measures corresponding to any nonfugitive emissions according to the approved schedule ~~set forth~~ in ~~such~~ the source's alternative control plan. Any source identified as causing or contributing to a violation of the ambient air quality standard for PM-10 may appeal any finding of culpability by the Agency to the Board ~~pursuant to~~under 35 Ill. Adm. Code 106, Subpart J.

c) ~~Upon~~ After the finding of a failure to attain by the Administrator of USEPA, the Agency ~~shall~~ must notify all sources in the applicable area required to submit contingency measure plans ~~pursuant to~~under Section 212.700 ~~of this Subpart~~ of ~~such~~ the finding by the Administrator; however, the Agency's failure to notify a source of its requirement to implement its contingency measure plan because of the Administrator's finding of a failure to attain ~~shall~~ must not be a defense to a violation of this Subpart and ~~shall~~ must not relieve the source of its obligation to timely comply with this Section. All such sources subject to this Subpart ~~shall~~must, within ~~sixty (~~60~~)~~ days after ~~receipt of such~~receiving notification, implement any Level II measures corresponding to fugitive emissions subject to control under Sections 212.304, 212.305, 212.306, 212.308, 212.316(a) through (e), 212.424, or 212.464 and ~~shall~~ must implement any Level II measures corresponding to any nonfugitive emissions of PM-10 according to the approved schedule ~~set forth~~ in ~~such~~ the source's alternative control plan, unless ~~such~~ the corresponding Level II controls have been previously implemented by ~~such~~ the source or sources ~~pursuant to~~under subsection (a) or (b) ~~above~~.

d) The Agency ~~shall~~ must request that sources comply with the Level I or Level II measures of their contingency measure plans~~, pursuant to~~ under subsection (a) above~~,~~ as follows:

1) Level I measures ~~shall~~ must be requested when the magnitude of the monitored ~~exceedence~~ exceedance at a given air quality monitor is less than or equal to 170 ug/m(3).

2) Level II measures ~~shall~~ must be requested when the magnitude of the monitored ~~exceedence~~ exceedance at a given air quality monitor exceeds 170 ug/m(3).

e) The Agency ~~shall~~ must require that sources comply with the Level I or Level II measures of their contingency measure plans~~, pursuant to~~ under subsection (b) ~~above,~~ as follows:

1) Level I measures ~~shall~~ must be required when the design value of a violation of the 24-hour ambient air quality standard, as computed ~~pursuant to~~under 40 CFR 50, Appendix K, incorporated by reference in Section 212.113 ~~of this Part~~, is less than or equal to 170 ug/m^3.

2) Level II measures ~~shall~~must be required when the design value of a violation of the 24-hour ambient air quality standard, as computed

~~pursuant to~~under 40 CFR 50, Appendix K, incorporated by reference in Section 212.113~~ of this Part~~, exceeds 170 ug/m^3.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.705 Alternative Implementation

~~Should~~ If the Agency ~~determine~~ determines that more than one source is a contributing source ~~pursuant to~~under Section 212.702~~ of this Subpart~~, the Agency may accept controls from fewer than all of the sources identified as culpable where greater than the required levels of control for all culpable sources are achieved at some of the culpable sources.

a) For the purposes of this Section, an "identified source" is a source determined to be culpable for an ~~exceedence~~ exceedance of the 24-hour ambient air quality standard.

b) For the purposes of this Section, a "participating source" is another source that is also identified as culpable by the Agency for the monitored ~~exceedence~~exceedance.

c) For the purposes of this Section, "equivalent air quality benefits" ~~shall~~ must be determined by conducting one or more dispersion analyses in ~~accordance~~ compliance with the "Guideline on Air Quality Models (revised)," incorporated by reference in Section 212.113~~ of this Part~~.

d) An identified source may elect to achieve compliance with ~~the provisions of~~ this Subpart by obtaining equivalent air quality benefits from PM-10 emissions reductions by a participating source as would be achieved at the identified source~~, provided, however, that~~ if the PM-10 emissions reductions to be achieved by the participating source under this Section are in addition to any other obligation it may have under this Subpart to reduce PM-10 emissions.

e) If an identified source elects to rely on this Section to demonstrate compliance with this Subpart, the identified source must:

1) Demonstrate to the Agency that it will achieve equivalent air quality benefits from PM-10 emission reductions at the participating source as would be achieved from the identified source subject to this Subpart;

2) The PM-10 emissions reductions from the participating source that the identified source is relying upon to demonstrate compliance with this Subpart must be reflected as federally enforceable permit conditions of the participating source's permit;

3) The participating source implements any emissions reductions for fugitive emissions of PM-10 within ~~ninety (~~90~~)~~ days after the identified source

would have been required to implement Level I or Level II measures ~~pursuant to~~under this Subpart; and

4) The participating source submits a reasonable schedule ~~for implementation of~~ to implement any PM-10 emission reductions from controls on process emission units, fuel combustion emission units, or other fugitive emissions of PM-10 at the participating source not subject to control under Sections 212.304, 212.305, 212.306, 212.308, 212.316(a) through (e), 212.424, or 212.464, not to exceed two ~~(2)~~ years from the date of notification to the identified source that Level I or Level II measures, as appropriate, are required.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 212.APPENDIX C Past Compliance Dates

Rule 202(e)

Owners or operators of new emission sources were required to comply with ~~the emission standards and limitations of~~ Rule 202 by April 14, 1972.

Owners or operators of existing emission sources were required to comply with ~~the emission standards and limitations of~~ Rule 202 by December 31, 1972; except that owners or operators of emission sources subject to Rule 203(g) were required to comply with ~~the emission standards and limitations of~~ Rule 203 by May 30, 1975.

Rule 203(c)

Except as otherwise provided in Rule 203, every existing process emission source which was not in compliance with Rule 203(b) as of April 14, 1972, was required to comply with Rule 203(a), unless both of the following conditions were met:

a) The source was in compliance~~,~~ as of April 14,1972, with the terms and conditions of a variance granted by the Board~~,~~ or, by June 13, 1972, the source was the subject of a variance petition filed with the Board~~,~~ which ~~variance~~ was subsequently granted; and

b) As of April 14, 1972, construction was commenced on equipment or modifications sufficient to achieve compliance with Rule 203(b).

Rule 203(d)(3)(A) and (B)

Corn wet milling processes subject to Rule 203(d)(3) were subject to a standard of 0.3 gr/scf of effluent gas from April 14, 1972 to May 30, 1975.

Rule 203(d)(5)(L) and (M)

Every owner or operator of an emission source the construction or modification of which was commenced after September 6, 1979, was required to comply with ~~the emission standards and limitations of~~ Rule 203(d)(5) upon commencement of operation.

Every owner or operator of an emission source the construction or operation of which was commenced ~~prior to~~before September 6, 1979, was required to comply with ~~the emission standards and limitations of~~ Rule 203(d)(5) no later than December 31, 1982. From the effective date of this Rule 203(d)(5) through December 31, 1982, full compliance with an approved compliance program and project completion schedule ~~pursuant to~~under Rule 104 for all sources of particulate emissions subject to Rule 203(d)(5) and 203(f), as amended, under common ownership or control in the same air quality control region constituted compliance with the emission standards and limitations ~~contained~~ in Part II if ~~such~~ the Compliance Program and Project Completion Schedule;

a) provided for compliance by all sources of particulate matter subject to Rules 203(d)(5) and 203(f), as amended, under common ownership or control in the same air quality region, as expeditiously as practicable considering what was economically reasonable and technically feasible, and

b) provided for reasonable further progress in achieving the reductions in particulate emissions required by Rule 203(d)(5) and 203(f), as amended, including annual increments of reductions such that at least one-third of the total reductions were achieved by December 31, 1980, and at least two-thirds of the total reduction were achieved by December 31, 1981, unless the owner or operator demonstrated in a hearing before the Board that ~~such~~ these increments were technically infeasible or economically unreasonable or unless the owner or operator demonstrated in a hearing before the Board that some alternate schedule represents reasonable further progress within the meaning of Section 172(b) of the Clean Air Act, 42 ~~U.S.C.~~USC Section 7502(b).

~~The provisions of~~ Rule 203(d)(5)(L)(iii) did not apply to any facility subject to a rule which was not in full force and effect as a matter of state law because of judicial action, and in ~~such~~ that event the facility ~~shall~~ must remain subject to the regulations in effect at the time these amendments were adopted.

The ~~Provision~~ provisions of Rule 203(d)(5)(L) were not severable. ~~Should~~ If any portion ~~thereof have~~of it has been found invalid or been disapproved by USEPA as a revision of the state implementation plan ~~pursuant to~~under the Clean Air Act, then the entire Rule 203(d)(5)(L) would have been null and void, ~~the provisions of~~ Rule 203(d)(5)(A) and (B) were to have become immediately effective, and ~~the provisions of~~ existing Rules 203(a), (b), and (c) and prior Rule 203(d)(2) (in effect from April 14, 1972 to the effective date of this Rule) were to have been reinstated.

Rule 203(d)(8)(J)

Existing grain-handling and grain-drying operations subject to Rule 203(d)(8)(B), (C) and (D) were required to achieve compliance on or before April 30, 1977, except that all

such operations were required to achieve compliance with Rule 203(d)(8)(A) by June 30, 1975.

New grain-handling and grain-drying operations were required to comply with Rule 203(d)(8) by June 30, 1975.

Rule 203(f)(3) (Preamble)

Potential sources of fugitive particulate matter were required to be maintained and operated in ~~accordance~~ compliance with Rule 203(f)(3) on or after December 31, 1982.

Rule 203(i)

Every owner or operator of a new emission source was required to comply with ~~the standards and limitations of~~ Rule 203 by April14, 1972.

Except as otherwise provided in Rule 203(d)(4), (d)(6), (i)(3), (i)(4), and (i)(5), every owner or operator of an existing emission source was required to comply with ~~the standards and limitations of~~ Rule 203 by December 31, 1973.

Every owner or operator of an existing emission source subject to Rule 203(f) was required to comply with ~~the standards and limitations of~~ Rule 203:

a) by October 14, 1972, when the emissions from ~~such~~ the source were caused by the stockpiling of materials;

b) by October 14, 1972, for emission sources subject to Rule 203(f)(4); and

c) by April 14,1973, for all other emission sources subject to Rule 203(f).

Every owner or operator of an existing emission source subject to Rule 203(g) was required to comply with ~~the standards and limitations of~~ Rule 203 by May 30, 1975.

Notwithstanding any other provisions of Rule 203, every owner or operator of an existing emission source which:

a) was required to comply with Rules 2-2.51, 2-2.52, 2-2.54, 3-3.111, 3-3.2110, 3-3.2130 and 3-3.220 of Rules and Regulations Governing the Control of Air Pollution as amended August 19, 1969; and

b) which was in compliance with such rules, as of April 14, 1972, or is in compliance with Rules 203(c)(1) and (2);

was required to comply with the applicable emission standards and limitations of Rule 203 by May 30, 1975.

Notwithstanding the other dates specified in this Rule, grain handling and conditioning operations were required to comply with ~~the requirements of~~ Rule 203 by May 30, 1975.

SUBPART A: GENERAL PROVISIONS

Section 214.100 Scope and Organization

a) This Part sets standards and limitations for emission of sulfur from stationary sources.

b) ~~Permit for sources~~Sources subject to this Part may be required ~~pursuant to~~to obtain a permit under 35 Ill. Adm. Code 201.

c) Notwithstanding ~~the provisions of~~ this Part, the air quality standards ~~contained~~ in 35 Ill. Adm. Code 243 may not be violated.

d) This Part ~~is divided into~~includes Subparts ~~which are grouped~~organized as follows:

1) Subpart A: General Provisions

2) Subparts B - J: Fuel Combustion Emission Sources and Incinerators

3) Subparts K - M: Process Emission Sources

4) Subparts N - End: Industry and ~~site specific~~site-specific rules.

~~e) These rules have been grouped for the convenience of the public; the scope of each is determined by its language and history.~~

BOARD NOTE: While subsection (d) describes the organization of this Part, the rules themselves establish their applicability and effect.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 214.101 Measurement Methods

A determination of non-compliance based on any subsection of this Section ~~shall~~ must not be refuted by evidence of compliance with any other subsection.

a) Sulfur Dioxide Measurement. Measurement of sulfur dioxide emissions from stationary sources ~~shall~~ must be made according to an applicable method ~~specified~~ in 40 CFR 60, appendix A, Method 6, 6A, 6B, or 6C, incorporated by reference in Section 214.104(a), or by measurement procedures ~~established pursuant to~~under 40 CFR 60.8(b), incorporated by reference in Section 214.104(b), or by an installed certified continuous emissions monitoring system, or ~~by~~ an alternative monitoring method available under 40 CFR 75, incorporated by reference in Section 214.104(e).

b) Sulfuric Acid Mist and Sulfur Trioxide Measurement. Measurement of sulfuric acid mist and sulfur trioxide ~~shall~~ must be according to the barium-thorin titration method ~~specified~~ in 40 CFR 60, appendix A, Method 8, incorporated by reference in Section 214.104(a), or a controlled condensate method approved in writing by the Agency.

c) Solid Fuel Averaging Measurement Daily Analysis Method. This subsection applies to sources at plants with total solid fuel-fired heat input capacity exceeding 439.5 MW (1500 mmBtu/hr). If daily fuel analysis is used to demonstrate compliance or non-compliance with Sections 214.122, 214.141, 214.142(a) 214.162, 214.186, and 214.421, the sulfur dioxide emission rate to be compared to the emission limit ~~shall~~ must be ~~considered to be~~ the result of averaging daily samples taken over any consecutive two-month period, provided that no more than 5 percent of the sample values are greater than 20 percent above the sample average. If samples from a source cannot meet this statistical criterion, each individual daily sample analysis for ~~such~~ the source ~~shall~~ must be compared to the source's emission limit to determine compliance. The specific ASTM procedures incorporated by reference in Section 214.104(c)~~, shall~~ must be used for solid fuel sampling, sulfur, and heating value determinations.

d) Weekly Analysis Method. This subsection applies to sources at plants with total solid fuel-fired heat input capacity exceeding 146.5 MW (500 mmBtu/hr) but not exceeding 439.5 MW (1500 mmBtu/hr). These plants ~~shall~~ must demonstrate compliance or non-compliance with Sections 214.122, 214.141, 214.142(a), 214.162, 214.186, and 214.421 by either an analysis of calendar weekly composites of daily fuel samples or by compliance with subsection (c), at the option of the plant. The specific ASTM procedures incorporated by reference in Section 214.104(c)~~, shall~~ must be used for sulfur and heating value determinations.

e) Monthly Analysis Method. This subsection applies to sources at plants with total fuel-fired heat input capacity exceeding 14.65 MW (50 mmBtu/hr) but not exceeding 146.5 MW (500 mmBtu/hr). These plants ~~shall~~ must demonstrate compliance or non-compliance with Sections 214.122, 214.141, 214.142(a), 214.162, 214.186, and 214.421 by either an analysis of calendar monthly composites of daily fuel samples or by compliance with subsection (c), at the option of the plant. ASTM procedures incorporated by reference in Section 214.104(c)~~, shall~~ must be used for sulfur and heating value determinations.

f) Small Source Alternative Method. This subsection applies to sources at plants with total solid fuel-fired heat input capacity not exceeding 14.65 MW (50 mmBtu/hr). Compliance or non-compliance with Sections 214.122, 214.141, 214.142(a), 214.162, 214.186, and 214.421 ~~shall~~ must be demonstrated by a calendar month average sulfur dioxide emission rate.

g) Exemptions. Subsections (c) through (f) ~~shall~~ must not apply to sources

controlling sulfur dioxide emissions by flue gas desulfurization equipment or by sorbent injection.

h) Hydrogen Sulfide Measurement. ~~For purposes of determining~~To determine compliance with Section 214.382(c), the concentration of hydrogen sulfide in petroleum refinery fuel gas ~~shall~~ must be measured using the Tutwiler Procedure ~~specified~~ in 40 CFR 60.648, incorporated by reference in Section 214.104(d).

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 214.102 Abbreviations and Units

a) ~~The~~ This Part uses the following abbreviations ~~are used in this Part~~:

BTU or btu	British thermal units
ft	foot
gr	grains
J	Joule
kg	kilogram
kg/MW-hr	kilograms per megawatt-hour
km	kilometer
lbs	pounds
lbs/mmBtu	pounds per million Btu
m	meter
mg	milligram
Mg	megagram, metric ton or tonne
mi	mile
mmBtu	million British thermal units
mmBtu/hr	million British thermal units per hour
MW	megawatt; one million watts
MW-hr	megawatt-hour
ng	nanogram; one billionth of a gram
ng/J	nanograms per Joule
ppm	parts per million
scf	standard cubic foot
scm	standard cubic meter
T	English ton

b) ~~The~~ This Part uses the following conversion factors ~~have been used in this Part~~:

English	Metric

SUBPART B: NEW FUEL COMBUSTION EMISSION SOURCES

Section 214.120 Scope (Repealed)

~~Subparts B through F contain general rules for sulfur emissions from fuel combustion emission sources. These may be modified by industry and site specific rules in Subparts N et seq.~~

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 214.121 Large Sources

This Section applies to new fuel combustion emission sources with actual heat input greater than 73.2 MW (250 mmBtu/hr).

a) Solid Fuel Burned Exclusively. ~~No~~ A person ~~shall~~ must not cause or allow the emission of sulfur dioxide into the atmosphere in any ~~one hour~~one-hour period from any new fuel combustion emission source greater than 73.2 MW (250 mmBtu/hr), burning solid fuel exclusively, to exceed 1.86 kg of sulfur dioxide per MW-hr of actual heat input (1.2 lbs/mmBtu).

~~(~~BOARD NOTE: This Section was invalidated in Commonwealth Edison v. PCB, 25 Ill. App.3d 271, 62 Ill.2d 494, 43 N.E.2d 459, 323 N.E.2d 84 (1st Dist. 1974), Ashland Chemical Corp. v. PCB, 64 Ill. App.3d 169, 381 N.E.2d 56 (3rd Dist. 1978), and Illinois State Chamber of Commerce v. PCB, 67 Ill. App.3d 839, 384 N.E.2d 922, 78 Ill.2d 1, 398 N.E.2d 9 (Ill. 1979).~~)~~

b) Liquid Fuel Burned Exclusively.

1) ~~Prior to~~Before January 1, 2017, ~~no~~ a person ~~shall~~ must no cause or allow the emission of sulfur dioxide into the atmosphere in any ~~one hour~~one-hour period from any new fuel combustion emission source with actual heat input greater than 73.2 MW (250 mmBtu/hr), burning liquid fuel exclusively, to exceed the following:

A) 1.2 kg of sulfur dioxide per MW-hr of actual heat input when residual fuel oil is burned (0.8 lbs/mmBtu); and

B) 0.46 kg of sulfur dioxide per MW-hr of actual heat input when distillate fuel oil is burned (0.3 lbs/mmBtu);

2) On and after January 1, 2017, the owner or operator of a new fuel combustion emission source with actual heat input greater than 73.2 MW (250 mmBtu/hr), burning liquid fuel exclusively, must comply with the following:

A) The sulfur content of all residual fuel oil used by the fuel combustion emission source must not exceed 1000 ppm;

B) The sulfur content of all distillate fuel oil used by the fuel combustion emission source must not exceed 15 ppm; and

C) The owner or operator must:

i) Maintain records demonstrating that the fuel oil used by the fuel combustion emission source complies with ~~the requirements in~~ subsections (b)(2)(A) and (b)(2)(B), such

as records from the fuel supplier indicating the sulfur content of the fuel oil;

ii) Retain the records for at least 5 years, and provide copies of the records to the Agency within 30 days after ~~receipt of~~receiving a request by the Agency; and

iii) Notify the Agency within 30 days after discovery of deviations from any of the requirements in this subsection (b)(2). ~~At minimum, and in addition to any permitting obligations~~In addition to information required by the source's permit, the notification must ~~include a description of~~describe the deviations~~, a discussion of~~ and discuss the possible cause of the deviations~~,~~ and any corrective actions ~~taken,~~ and ~~any~~ preventative measures taken.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 214.122 Small Sources

This Section applies to new fuel combustion emission sources with actual heat input ~~smaller~~ less than~~,~~ or equal to~~,~~ 73.2 MW (250 mmBtu/hr).

a) Solid Fuel Burned Exclusively. ~~No~~ A person ~~shall~~ must not cause or allow the emission of sulfur dioxide into the atmosphere in any ~~one hour~~one-hour period from any new fuel combustion source with actual heat input ~~smaller~~ less than~~,~~ or equal to~~,~~ 73.2 MW (250 mmBtu/hr), burning solid fuel exclusively, to exceed 2.79 kg of sulfur dioxide per MW-hr of actual heat input (1.8 lbs/mmBtu).

b) Liquid Fuel Burned Exclusively.

1) ~~Prior to~~Before January 1, 2017, ~~no~~ a person ~~shall~~ must not cause or allow the emission of sulfur dioxide into the atmosphere in any ~~one hour~~one-hour period from any new fuel combustion emission source with actual heat input ~~smaller~~ less than~~,~~ or equal to~~,~~ 73.2 MW (250 mmBtu/hr), burning liquid fuel exclusively, to exceed the following:

A) 1.55 kg of sulfur dioxide per MW-hr of actual heat input when residential fuel oil is burned (1.0 lbs/mmBtu); and

B) 0.46 kg of sulfur dioxide per MW-hr of actual heat input when distillate fuel oil is burned (0.3 lbs/mmBtu);

2) On and after January 1, 2017, the owner or operator of a new fuel combustion emission source with actual heat input ~~smaller~~ less than~~,~~ or

equal to~~,~~ 73.2 MW (250 mmBtu/hr), burning liquid fuel exclusively, must comply with the following:

A) The sulfur content of all residual fuel oil used by the fuel combustion emission source must not exceed 1000 ppm;

B) The sulfur content of all distillate fuel oil used by the fuel combustion emission source must not exceed 15 ppm; and

C) The owner or operator must:

i) Maintain records demonstrating that the fuel oil used by the fuel combustion emission source complies with ~~the requirements in~~ subsections (b)(2)(A) and (b)(2)(B), such as records from the fuel supplier indicating the sulfur content of the fuel oil;

ii) Retain the records for at least 5 years, and provide copies of the records to the Agency within 30 days after ~~receipt of~~receiving a request by the Agency; and

iii) Notify the Agency within 30 days after discovery of deviations from any of the requirements in this subsection (b)(2). ~~At minimum, and in addition to any permitting obligations~~In addition to information required by the source's permit, the notification must ~~include a description of~~describe the deviations, ~~a discussion of~~and discuss the possible cause of the deviations~~,~~ and any corrective actions ~~taken,~~ and ~~any~~ preventative measures taken.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART C: EXISTING SOLID FUEL COMBUSTION EMISSION SOURCES

Section 214.140 Scope (Repealed)

~~This Subpart contains rules which establish general sulfur emissions standards for existing solid fuel emission sources. These may be modified by industry and site-specific rules in Subparts N, et seq.~~

(Source: Repealed at 48 Ill. Reg. _____, effective _____)

Section 214.141 Sources Located in Metropolitan Areas

Except as otherwise provided in this Part, ~~no~~ a person ~~shall~~ must not cause or allow the emission of sulfur dioxide into the atmosphere in any ~~one hour~~one-hour period from any existing fuel

combustion source, burning solid fuel exclusively, located in the Chicago, St. Louis (Illinois), or Peoria major metropolitan areas, to exceed 1.8 pounds of sulfur dioxide per mmBtu of actual heat input (774 nanograms per joule).

a) Sources ~~located~~ in Kankakee or McHenry Counties ~~shall~~ must not exceed 6.8 pounds of sulfur dioxide per mmBtu of actual heat input (2,924 nanograms per joule) in any ~~one hour~~one-hour period.

b) Existing industrial sources~~,~~ not equipped with flue gas desulfurization systems as of December 1, 1980, located in the Peoria major metropolitan area~~, shall~~ must not exceed 5.5 pounds of sulfur dioxide per mmBtu of actual heat input (2,365 nanograms per joule) in any ~~one hour~~one-hour period~~, provided~~ if the emissions from any such source ~~located~~ in the City of Peoria exit from a stack which is at least 154 feet (47 meters) in height.

c) Sections 214.122 and 214.101(c) ~~shall~~ must not apply to any fuel combustion emission sources equipped with flue gas desulfurization systems as of December 1, 1980, and located in the City of East Peoria as the city boundaries were then defined. ~~No~~ A person ~~shall~~ must not cause or allow the emission of sulfur dioxide into the atmosphere in any ~~one hour~~one-hour period from any such sources to exceed 1.4 pounds of sulfur dioxide per mmBtu of actual heat input (602 nanograms per joule).

d) Sections 214.122 and 214.101(c) ~~shall~~ must not apply to any fuel combustion emission sources which are capable of firing solid fuel at a heat input of more than 125 mmBtu per hour (36.6 megawatts)~~; and which~~ as of December 1, 1980, ~~are~~ equipped with flue gas desulfurization systems; and ~~are~~ located in Hollis Township, Peoria County, as the township boundaries were then defined. ~~No~~ A person ~~shall~~ must not cause or allow the emission of sulfur dioxide into the atmosphere in any ~~one hour~~one-hour period from any such sources to exceed 1.1 pounds of sulfur dioxide per mmBtu of actual heat input (473 nanograms per joule).

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 214.142 Small Sources Located Outside Metropolitan Areas

This section applies to existing fuel combustion sources with actual heat input less than~~,~~ or equal to~~,~~ 73.2 MW (250 mmbtu/hr) located outside the Chicago, St. Louis (Illinois), or Peoria major metropolitan areas. ~~No~~ A person ~~shall~~ must not cause or allow the emission of sulfur dioxide into the atmosphere in any ~~one hour~~one-hour period from any existing fuel combustion source with actual heat input less than~~,~~ or equal to~~,~~ 73.2 MW (250 mmbtu/hr), burning solid fuel exclusively, located outside the Chicago, St. Louis (Illinois), or Peoria major metropolitan areas~~,~~ to exceed either of the following, whichever ~~such~~ the person determines shall apply:

a) 10.5 kg of sulfur dioxide per MW-hr of actual heat input (6.8 lbs/mmbtu), ~~provided such~~if the owner or operator complies with all applicable provisions of Section 214.186, or

b) The emission limit ~~provided by~~under Subpart E.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 214.143 Large Sources Located Outside Metropolitan Areas

This section applies to existing fuel combustion sources with actual heat input greater than 73.2 MW (250 mmbtu/hr) located outside the Chicago, St. Louis (Illinois), or Peoria major metropolitan areas. ~~No~~ A person ~~shall~~ must not cause or allow the emission of sulfur dioxide into the atmosphere in any ~~one hour~~one-hour period from any existing fuel combustion source with actual heat input greater than 73.2 MW (250 mmbtu/hr), burning solid fuel exclusively, located outside the Chicago, St. Louis (Illinois), or Peoria major metropolitan areas, to exceed the emission limit ~~provided by~~under Subpart E.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART D: EXISTING LIQUID OR MIXED FUEL COMBUSTION EMISSION SOURCES

Section 214.161 Liquid Fuel Burned Exclusively

a) ~~Prior to~~Before January 1, 2017, ~~no~~ a person ~~shall~~ must not cause or allow the emission of sulfur dioxide into the atmosphere in any ~~one hour~~one-hour period from any existing fuel combustion emission source, burning liquid fuel exclusively, to exceed the following:

1) 1.55 kg of sulfur dioxide per MW-hr of actual heat input when residual fuel oil is burned (1.0 lbs/mmBtu); and

2) 0.46 kg of sulfur dioxide per MW-hr of actual heat input when distillate fuel oil is burned (0.3 lbs/mmBtu).

b) Except as provided in subsections (c) and (d), on and after January 1, 2017, the owner or operator of an existing fuel combustion emission source, burning liquid fuel exclusively, must comply with the following:

1) The sulfur content of all residual fuel oil used by the fuel combustion emission source must not exceed 1000 ppm;

2) The sulfur content of all distillate fuel oil used by the fuel combustion emission source must not exceed 15 ppm; and

3) The owner or operator must:

A) Maintain records demonstrating that the fuel oil used by the fuel combustion emission source complies with ~~the requirements in~~ subsections (b)(1) and (b)(2), such as records from the fuel supplier indicating the sulfur content of the fuel oil;

B) Retain the records for at least 5 years, and provide copies of the records to the Agency within 30 days after ~~receipt of~~ receiving a request by the Agency; and

C) Notify the Agency within 30 days after discovery of deviations from any of the requirements in this subsection (b). ~~At minimum, and in addition to any permitting obligations~~In addition to information required by the source's permit, the notification must ~~include a description of~~describe the deviations~~, a discussion of~~ and discuss the possible cause of the deviations~~,~~ and any corrective actions ~~taken,~~ and ~~any~~ preventative measures taken.

c) The sulfur content limitation for distillate fuel oil in subsection (b)(2) does not apply to existing electric generating units at Midwest Generation's Joliet station (~~located~~ at or near 1800 Channahon Road, Joliet IL), Powerton station (~~located~~ at or near 13082 E. Manito Road, Pekin IL), Waukegan station (~~located~~ at or near 401 E. Greenwood Avenue, Waukegan IL), and Will County station (~~located~~ at or near 529 E. 135th, Romeoville IL). The owner or operator of ~~such~~ these electric generating units must instead comply with the following:

1) From January 1, 2016, through December 31, 2018, the sulfur content of all distillate fuel oil purchased for use by ~~such~~ these electric generating units must not exceed 15 ppm;

2) From January 1, 2017, through December 31, 2018, the sulfur content of all distillate fuel oil used by ~~such~~ these electric generating units must not exceed 500 ppm;

3) On and after January 1, 2019, the sulfur content of all distillate fuel oil used by ~~such~~ these electric generating units must not exceed 15 ppm;

4) The owner or operator must:

A) Maintain records demonstrating that the distillate fuel oil purchased from January 1, 2016, through December 31, 2018, for use by the electric generating units complies with ~~the requirements in~~ subsection (c)(1), such as records from the fuel supplier indicating the sulfur content of the fuel oil, and maintain records indicating the date of purchase of the fuel oil;

B) Maintain records demonstrating that the distillate fuel oil used from January 1, 2017, through December 31, 2018, by the electric generating units~~,~~ complies with ~~the requirements in~~ subsection (c)(2), such as records from the fuel supplier indicating the sulfur content of the fuel oil;

C) On and after January 1, 2019, maintain records demonstrating that the distillate fuel oil used by the electric generating units complies with ~~the requirements in~~ subsection (c)(3), such as records from the fuel supplier indicating the sulfur content of the fuel oil;

D) Retain all records required by this subsection (c) for at least 5 years, and provide copies of the records to the Agency within 30 days after ~~receipt of~~receiving a request by the Agency; and

E) Notify the Agency within 30 days after discovery of deviations from any of the requirements in this subsection (c). ~~At minimum, and in addition to any permitting obligations~~In addition to information required by the source's permit, the notification must ~~include a description of~~describe the deviations~~, a discussion of~~ and discuss the possible cause of the deviations~~,~~ and any corrective actions ~~taken,~~ and ~~any~~ preventative measures taken.

d) The sulfur content limitation for distillate fuel oil in subsection (b)(2) does not apply to existing fuel combustion emission sources at Caterpillar's Montgomery facility (~~located~~ at or near 325 South Route 31, Montgomery IL). The owner or operator of the fuel combustion emission sources must instead comply with the following:

1) On and after January 1, 2016:

A) The sulfur content of all distillate fuel oil purchased for use by the fuel combustion emission sources must not exceed 15 ppm; and

B) The sulfur content of all distillate fuel oil used by the fuel combustion emission sources must not exceed 500 ppm;

2) The owner or operator must:

A) Maintain records demonstrating that the distillate fuel oil purchased on and after January 1, 2016, for use by the fuel combustion emission sources complies with ~~the requirements in~~ subsection (d)(1)(A), such as records from the fuel supplier indicating the sulfur content of the fuel oil, and maintain records indicating the date of purchase of the fuel oil;

B) Maintain records demonstrating that the distillate fuel oil used on and after January 1, 2016, by the fuel combustion emission sources complies with ~~the requirements in~~ subsection (d)(1)(B), such as records from the fuel supplier indicating the sulfur content of the fuel oil;

C) Retain all records required by this subsection (d) for at least 5 years, and provide copies of the records to the Agency within 30 days after ~~receipt of~~receiving a request by the Agency; and

D) Notify the Agency within 30 days after discovery of deviations from any of the requirements in this subsection (d). ~~At minimum, and in addition to permitting obligations~~In addition to information required by the source's permit, the notification must ~~include a description of~~describe the deviations~~, a discussion of~~ and discuss the possible cause of the deviations~~,~~ and any corrective actions ~~taken,~~ and ~~any~~ preventative measures taken.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 214.162 Combination of Fuels

a) ~~No~~ A person ~~shall~~ must not cause or allow the emission of sulfur dioxide into the atmosphere in any ~~one hour~~one-hour period from any fuel combustion emission source burning simultaneously any combination of solid, liquid, and gaseous fuels to exceed the allowable emission rate determined by the following equation:

$$E = S_S H_S + S_d H_d + S_R H_R$$

b) Symbols in the equation mean ~~the following~~:

E = allowable sulfur dioxide emission rate;
S_S = solid fuel sulfur dioxide emission standard which is applicable;
S_d = distillate oil sulfur dioxide emission standard determined from the table in subsection (d);
S_R = residual fuel oil sulfur dioxide emission standard;
H_S = actual heat input from solid fuel;
H_d = actual heat input from distillate fuel oil;
H_R = actual heat input from residual fuel oil.

c) ~~That~~ The portion of the actual heat input that is derived:

1) From the burning of gaseous fuels produced by the gasification of solid fuels ~~shall~~ must be included in H_S;

2) From the burning of gaseous fuels produced by the gasification of distillate fuel oil ~~shall~~ must be included in H_d;

3) From the burning of gaseous fuels produced by the gasification of residual fuel oil ~~shall~~ must be included in H_R;

4) From the burning of gaseous fuels produced by the gasification of any other liquid fuel ~~shall~~ must be included in H_R; and

5) From the burning of by-product gases such as those produced from a blast furnace or a catalyst regeneration unit in a petroleum refinery ~~shall~~ must be included in H_R.

d) Metric or English units may be used in the equation of subsection (a) as follows:

Parameter	Metric	English
E	kg/hr	lbs/hr
S_S, S_R	kg/MW-hr	lbs/mmBtu
S_d ~~prior to~~before January 1, 2017	0.46 kg/MW-hr	0.3 lbs/mmBtu
S_d on and after January 1, 2017	0.0023 kg/MW-hr	0.0015 lb/mmBtu
H_S, H_d, H_R	MW	mmBtu

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART E: AGGREGATION OF SOURCES OUTSIDE METROPOLITAN AREAS

Section 214.181 Dispersion Enhancement Techniques

~~No~~ An owner or operator of an existing fuel combustion emission source ~~shall~~ must comply with the emission standards of this Subpart by ~~the use of~~using dispersion enhancement techniques. Dispersion enhancement techniques ~~shall~~ include~~, but not be limited to,~~ an intermittent control system or an increase of~~:~~ stack height in excess of good engineering practice necessary to prevent downwash or fumigation conditions, stack diameter, exit gas velocity, or exit gas temperature, except as provided by Section 123 of the Clean Air Act (42 ~~U.S.C.~~USC 7423) and regulations promulgated ~~thereunder~~under it. Flue gas may be reheated where air pollution control equipment results in a reduction of flue gas temperature, ~~provided that~~if the degree of reheat does not exceed the temperature drop across ~~such~~ that air pollution control equipment.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 214.182 Prohibition

~~No~~ A person ~~shall~~ must not cause or allow the total emissions of sulfur dioxide into the atmosphere in any ~~one hour~~one-hour period from all fuel combustion emission sources~~,~~ located outside of the Chicago, St. Louis (Illinois), or Peoria major metropolitan areas~~,~~ owned or

operated by that person and located within a one mile (1.6 km) radius ~~(1.6 km)~~ from the center point of any such fuel combustion emission source to exceed the emissions determined by ~~the following~~ Sections 214.183 through 214.185, whichever ~~is applicable~~applies.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 214.183 General Formula

a) The general formula is:

$$E = \frac{(H_A)^{0.11}(H_E)^2}{128} \quad \text{(in English units)}$$

$$E = 0.04347(H_A)^{0.11}(H_E)^2 \quad \text{(in Metric units)}$$

b) Symbols used in the general formula mean the following:

E = Total allowable emission of sulfur dioxide (in lbs/hr or kg/hr) into the atmosphere in any one-hour period from all fuel combustion emission sources owned or operated by ~~such~~ a person and located within a 1.6 km (1 mile) radius from the center point of any such emission source.

H_A = Average actual stack height as determined by ~~method outlined in~~ Appendix C.

H_E = Effective height of effluent release as determined by ~~method outlined in~~ Appendix C.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 214.184 Special Formula

a) If the maximum total emissions of sulfur dioxide into the atmosphere in any ~~one hour~~one-hour period from all fuel combustion emission sources owned or operated by any person and located within a 1 mile (1.6 km) radius from the center point of any such fuel combustion emission sources exceed, during normal cyclical variations in firing rate and fuel, the emissions allowed under Section 214.183 but, as of April 1, 1978, were in compliance with either the formula ~~detailed below~~in subsection (b) or a Pollution Control Board ~~(Board)~~ order, then the owner or operator of the emission sources ~~shall~~ must not cause or allow ~~such~~ the emissions to exceed the emissions allowed under Section 214.183 or the formula ~~detailed below~~in subsection (b), whichever the owner or operator of the emission sources determines shall apply.

b)

$$E = 20{,}000\left(\frac{H_S}{300}\right)^2 \quad \text{(in English units)}$$

$$E = 4.8824 \times 20{,}000\left(\frac{H_S}{300}\right)^2 \quad \text{(in Metric units)}$$

$H = P_1 H_1 + P_2 H_2 + \ldots P_n H_n$

(Note: $P_1 + P_2 \ldots P_n = 1$)

c) As used in these equations, symbols mean the following:

E = total emission of sulfur dioxide (in lbs/hr or kg/hr) into the atmosphere in any ~~one hour~~one-hour period from all fuel combustion emission sources owned or operated by ~~such~~ a person and located within a 1 mile (1.6 km) radius from the center point of any such emission source;

P_i= (for i=1, 2, . . ., n) percentage of total emissions E emitted from source i expressed as decimal equivalents (e.g., 21% = 0.21), and

H_i= (for i=1, 2, . . ., n) physical height (in feet or meters) above grade of stack i.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 214.185 Alternative Emission Rate

Any owner or operator of a fuel combustion emission source may petition the Board for approval of an emission rate applicable to any ~~one hour~~one-hour period for all fuel combustion emission sources owned or operated by ~~such~~ that person and located within a one mile (1.6 km) radius from the center point of any such fuel combustion emission source. ~~Such~~ That person ~~shall~~ must prove in an adjudicative hearing before the Board that the proposed emission rate will not under any ~~forseeable~~ foreseeable operating conditions and potential meteorological conditions cause or contribute to a violation of any applicable primary or secondary sulfur dioxide ambient air quality standard or violate any applicable prevention of significant deterioration (PSD) increment. An emission rate approved ~~pursuant to~~under this Section ~~shall~~ must be a substitute for ~~that~~ the standard determined by Section 214.183 or 214.184.

a) Every owner or operator of a fuel combustion emission source petitioning the Board for approval of an emission standard ~~pursuant to~~under this Section ~~shall~~ must follow the applicable procedures ~~described~~ in 35 Ill. Adm. Code Subtitle A, Chapter I.

b) Any emission standard approved ~~pursuant to~~under this Section ~~shall~~ must be included as a condition to operating permits issued ~~pursuant to~~under 35 Ill. Adm.

Code 201. Any owner or operator of a fuel combustion emission source who receives Board approval of an emission standard ~~pursuant to~~under this Section ~~shall~~ must apply to the Illinois Environmental Agency (Agency) within 30 days of approval of ~~such~~ the standard for a revision of its operating permit for ~~such~~ the source.

c) The Agency ~~shall~~ must impose as a condition to a permit to operate a source ~~pursuant to~~under an emission standard approved ~~pursuant to~~under this Section an ambient sulfur dioxide monitoring and dispersion modeling program designed to verify that ~~such~~ the emission standard will not cause or contribute to violations of any applicable primary or secondary sulfur dioxide ambient air quality standard. ~~Such~~ The ambient monitoring and dispersion modeling program ~~shall~~ must be operated for at least one year ~~commencing~~ beginning no later than 6 months after the date ~~of approval of~~on which an emission rate ~~pursuant to~~is approved under this Section.

d) No more than 15 months after ~~the commencement of~~beginning the ambient monitoring and dispersion modeling program ~~of~~ under subsection (c), the owner or operator ~~shall~~ must apply for a new operating permit. The owner or operator ~~shall~~ must submit~~,~~ at the time of the application~~,~~ a report containing the results of the ambient monitoring and dispersion modeling program.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 214.186 New Operating Permits

~~No~~ An owner or operator of a fuel combustion emission source whose sulfur dioxide emission limitation is determined by Section 214.142, 214.183, or 214.184 ~~shall~~ must not cause or allow the total emissions of sulfur dioxide into the atmosphere from all fuel combustion emission sources owned or operated by ~~such~~ that person and located within 1 mile (1.6 km) radius ~~(1.6 km)~~ from the center point of any such fuel combustion source to exceed the level of sulfur dioxide emission allowed under the previous Rule 204 (effective April 14, 1972 until December 14, 1978) without first obtaining a new operating permit from the Agency. The application for a new operating permit ~~shall~~ must include a demonstration that ~~such~~ the total emissions will not violate any applicable PSD increment.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART F: ALTERNATIVE STANDARDS FOR SOURCES INSIDE METROPOLITAN AREAS

Section 214.201 Alternative Standards for Sources in Metropolitan Areas

Any owner or operator of an existing fuel combustion emission source located in the Chicago, St. Louis (Illinois), or Peoria major metropolitan areas may petition the Board ~~for approval of~~to approve an alternate emission rate ~~specified~~ in emissions of pounds of sulfur dioxide per mmBtu

of actual heat input for any such fuel combustion emission source, up to a maximum ~~or~~ of 6.8 pounds of sulfur dioxide per mmBtu of actual heat input (10.5 kg/MW-hr). ~~Such person shall~~The owner operator must prove in an adjudicative hearing before the Board that the proposed emission rate will not~~,~~ under predictable worst case conditions cause or contribute to a violation of any applicable primary or secondary sulfur dioxide ambient air quality standard or ~~of~~ any applicable prevention of significant deterioration increment. An emission rate approved ~~pursuant to~~under this Section ~~shall be a substitute~~substitutes for ~~that~~ the standard otherwise required by this Part. Nothing in this Section, however, excuses a source subject to Subpart AA from complying with ~~the requirements set forth in~~ that Subpart.

a) Every owner or operator of an existing fuel combustion emission source ~~so~~ petitioning the Board ~~for approval of~~to approve an emission standard ~~shall~~ must follow the applicable procedures ~~described~~ in 35 Ill. Adm. Code, Subtitle A, Chapter I.

b) Any emission standard so approved ~~shall~~ must be included as a condition in operating permits issued ~~pursuant to~~under 35 Ill. Adm. Code 201. Any owner or operator of a fuel combustion emission source who receives Board approval of such an emission standard ~~shall~~ must apply to the Agency within 30 days after approval of that standard ~~for a revision of~~to revise its operating permit for the source.

c) ~~No~~ An owner or operator of an existing fuel combustion emission source ~~shall~~ must not seek an alternate emission rate under this Section~~,~~ or comply with an alternate emission rate granted under this Section~~,~~ by ~~the use of~~using dispersion enhancement techniques ~~referred to in~~under Section 214.202.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 214.202 Dispersion Enhancement Techniques

~~No~~ An owner or operator of an existing fuel combustion emission source ~~shall~~ must not comply with the emission standards of this Subpart by ~~the use of~~using dispersion enhancement techniques. Dispersion enhancement techniques ~~shall~~ include~~, but not be limited to,~~ an intermittent control system or an increase of~~:~~ stack height in excess of good engineering practice necessary to prevent downwash or fumigation conditions, stack diameter, exit gas velocity, or exit gas temperature, except ~~as provided by~~under Section 123 of the Clean Air Act (42 ~~U.S.C.A.~~USCA 7423) and regulations promulgated ~~thereunder~~under it. Flue gas may be reheated where air pollution control equipment results in a reduction of flue gas temperature~~, provided that~~if the degree of reheat does not exceed the temperature drop across such air pollution control equipment.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART K: PROCESS EMISSION SOURCES

Section 214.300 Scope (Repealed)

~~Subpart K contains general rules for sulfur emissions from process sources. These may be modified by industry and site specific rules in other Subparts of this Part. Subpart K also contains sulfur content limitations for fuel oil used by process emission sources. These sulfur content limitations apply regardless of industry and site specific rules set forth in other Subparts of this Part.~~

(Source: Repealed at 48 Ill. Reg. _____, effective _____)

Section 214.301 General Limitation

Except as ~~further~~ provided by this Part, ~~no~~ a person ~~shall~~ must not cause or allow the emission of sulfur dioxide into the atmosphere from any process emission source to exceed 2000 ppm.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 214.302 Exception for Air Pollution Control Equipment

Section 214.301 ~~shall~~ must not apply to processes designed to remove sulfur compounds from the flue gases of fuel combustion emission sources.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 214.303 Use of Sulfuric Acid

~~With the exception of~~Except for fuel combustion emission sources and acid manufacturing, a~~no~~ person using sulfuric acid ~~shall~~ must not cause or allow the emission of sulfuric acid and/or sulfur trioxide from all other similar emission sources at a plant or premises to exceed:

a) 45.4 grams in any ~~one hour~~one-hour period for sulfuric acid usage less than 1180 Mg/yr (100 percent acid basis) (0.10 lbs/hr up to 1300 T/yr);

b) 250 grams per metric ton of acid used for sulfuric acid usage greater than or equal to 1180 Mg/yr (100 percent acid basis) (0.50 lbs/T over 1300 T/yr).

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 214.304 Fuel Burning Process Emission Source

The emissions from the burning of fuel at process emission sources located in the Chicago or St. Louis (Illinois) major metropolitan areas ~~shall~~ must comply with applicable Subparts B through F, except as follows: ~~No~~ a person ~~shall~~ must not cause or allow the emissions of sulfur into the atmosphere in any ~~one hour~~one-hour period from burning tea leaves as fuel to exceed 0.70 pounds of sulfur dioxide per mmbtu of actual heat input.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 214.305 Fuel Sulfur Content Limitations

a) Except as provided in subsections (b), (c), and (d), on and after January 1, 2017, the owner or operator of a process emission source must comply with the following:

1) The sulfur content of all residual fuel oil used by the process emission source must not exceed 1000 ppm;

2) The sulfur content of all distillate fuel oil used by the process emission source must not exceed 15 ppm; and

3) The owner or operator must:

A) Maintain records demonstrating that the fuel oil used by the process emission source complies with ~~the requirements in~~ subsections (a)(1) and (a)(2), such as records from the fuel supplier indicating the sulfur content of the fuel oil;

B) Retain the records for at least 5 years, and provide copies of the records to the Agency within 30 days after ~~receipt of~~receiving a request by the Agency; and

C) Notify the Agency within 30 days after discovery of deviations from any of the requirements in this subsection (a). ~~At minimum, and in~~In addition to any ~~permitting obligations~~information required by the source's permit, ~~such~~ the notification must ~~include a description of~~describe the deviations~~, a discussion of~~ and discuss the possible cause of the deviations~~,~~ and any corrective actions ~~taken,~~ and ~~any~~ preventative measures taken.

b) The sulfur content limitation for distillate fuel oil in subsection (a)(2) does not apply to distillate fuel oil used by "TC-F/TC-L/TCL Wing 5" and "TC-F/TC-L Alternative" at Caterpillar Technical Center ~~(~~located at ~~or near~~ 1311 E. Cedar Hills Dr., Mossville, IL~~)~~ for ~~purposes of~~ research and development or testing of equipment intended for sale outside of Illinois. This exemption is limited to a combined total of 150,000 gallons of distillate fuel oil per calendar year. The sulfur content of the fuel oil must not exceed 500 ppm. The owner or operator of the process emission sources described in this subsection must also comply with the following:

1) Maintain records indicating the amount of distillate fuel oil used by the process emission sources each calendar year for ~~purposes of~~ research and development or testing of equipment for sale outside of Illinois, as well as

records demonstrating that the fuel oil complies with ~~the requirements in~~ this subsection (b), such as records from the fuel supplier indicating the sulfur content of the fuel oil;

2) Retain the records for at least 5 years, and provide copies of the records to the Agency within 30 days after ~~receipt of~~receiving a request by the Agency; and

3) Notify the Agency within 30 days after discovery of deviations from any of the requirements in this subsection (b). ~~At minimum, and in~~In addition to any ~~permitting obligations~~information required by the source's permit, the notification must ~~include a description of~~describe the deviations~~, a discussion of~~ and discuss the possible cause of the deviations~~,~~ and any corrective actions ~~taken,~~ and ~~any~~ preventative measures taken.

c) The sulfur content limitation for distillate fuel oil in subsection (a)(2) does not apply to existing process emission sources at Caterpillar's Montgomery facility ~~(~~located at ~~or near~~ 325 South Route 31, Montgomery IL~~)~~. The owner or operator of these process emission sources must instead comply with the following:

1) On and after January 1, 2016:

A) The sulfur content of all distillate fuel oil purchased for use by the process emission sources must not exceed 15 ppm; and

B) The sulfur content of all distillate fuel oil used by the process emission sources must not exceed 500 ppm;

2) The owner or operator must:

A) Maintain records demonstrating that the distillate fuel oil purchased on and after January 1, 2016, for use by the process emission sources~~,~~ complies with ~~the requirements in~~ subsection (c)(1)(A), such as records from the fuel supplier indicating the sulfur content of the fuel oil, and ~~maintain records~~ indicating the date of purchase of the fuel oil;

B) Maintain records demonstrating that the distillate fuel oil used on and after January 1, 2016, by the process emission sources~~,~~ complies with ~~the requirements in~~ subsection (c)(1)(B), such as records from the fuel supplier indicating the sulfur content of the fuel oil;

C) Retain all records required by this subsection (c) for at least 5 years, and provide copies of the records to the Agency within 30 days after ~~receipt of~~receiving a request by the Agency; and

D) Notify the Agency within 30 days after discovery of deviations from any of the requirements in this subsection (c). ~~At minimum, and in~~In addition to any ~~permitting obligations~~information required by the source's permit, the notification must ~~include a description of~~describe the deviations~~, a discussion of~~ and discuss the possible cause of the deviations~~,~~ and any corrective actions ~~taken,~~ and ~~any~~ preventative measures taken.

d) The sulfur content limitation for distillate fuel oil in subsection (a)(2) does not apply to existing electric generating units at Midwest Generation's Fisk station ~~(~~located at ~~or near~~ 1111 W. Cermak Road, Chicago IL~~)~~ or Waukegan station ~~(~~located at ~~or near~~ 401 E. Greenwood Avenue, Waukegan IL~~)~~. The owner or operator of these electric generating units must instead comply with the following:

1) From January 1, 2016, through December 31, 2018, the sulfur content of all distillate fuel oil purchased for use by these electric generating units must not exceed 15 ppm;

2) From January 1, 2017, through December 31, 2018, the sulfur content of all distillate fuel oil used by these electric generating units must not exceed 500 ppm;

3) On and after January 1, 2019, the sulfur content of all distillate fuel oil used by these electric generating units must not exceed 15 ppm;

4) The owner or operator must:

A) Maintain records demonstrating that the distillate fuel oil purchased from January 1, 2016, through December 31, 2018, for use by the electric generating units~~,~~ complies with ~~the requirements in~~ subsection (d)(1), such as records from the fuel supplier indicating the sulfur content of the fuel oil, and ~~maintain records~~ indicating the date of purchase of the fuel oil;

B) Maintain records demonstrating that the distillate fuel oil used from January 1, 2017, through December 31, 2018, by the electric generating units~~,~~ complies with ~~the requirements in~~ subsection (d)(2), such as records from the fuel supplier indicating the sulfur content of the fuel oil;

C) On and after January 1, 2019, maintain records demonstrating that the distillate fuel oil used by the electric generating units complies with ~~the requirements in~~ subsection (d)(3), such as records from the fuel supplier indicating the sulfur content of the fuel oil;

D) Retain all records required by this subsection (d) for at least 5 years, and provide copies of the records to the Agency within 30 days after ~~receipt of~~receiving a request by the Agency; and

E) Notify the Agency within 30 days after discovery of deviations from any of the requirements in this subsection (d). ~~At minimum, and in~~In addition to any ~~permitting obligations~~information required by the source's permit, the notification must ~~include a description of~~describe the deviations~~, a discussion of~~ and discuss the possible cause of the deviations~~,~~ and any corrective actions ~~taken,~~ and ~~any~~ preventative measures taken.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART O: PETROLEUM REFINING, PETROCHEMICAL AND CHEMICAL MANUFACTURING

Section 214.380 Scope (Repealed)

~~a) This Subpart contains rules which modify the general sulfur emission rules of Subparts A through M as applied to a given industry or at a given site. General rules include:~~

~~1) Subparts B through I, fuel combustion emission sources and incinerators;~~

~~2) Subparts K through M, process emission sources.~~

~~b) These rules have been grouped for the convenience of the public; the scope of each is determined by its language and history. Rules placed in this Subpart include those which appear to be primarily directed at the following major industry groups:~~

~~1) Chemicals and allied products;~~

~~2) Petroleum refining and related industries;~~

~~3) Rubber and miscellaneous plastics products.~~

(Source: Repealed at 48 Ill. Reg. _____, effective _____)

Section 214.381 Sulfuric Acid Manufacturing

a) ~~No~~ A person ~~shall~~ must not cause or allow the emission of sulfur dioxide into the atmosphere from any new sulfuric acid manufacturing plant to exceed 4.0 pounds of sulfur dioxide per ton of acid produced (2.0 kg/Mg).

b) ~~No~~ A person ~~shall~~ must not cause or allow the emission of sulfuric acid mist into the atmosphere from any process emission source to exceed 0.15 pounds of acid mist per ton of acid manufactured (75 g/Mg).

c) ~~No~~ A person ~~shall~~ must not cause or allow the emission of sulfur dioxide into the atmosphere from any sulfuric acid manufacturing process in the City of Chicago to exceed 500 ppm.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 214.382 Petroleum and Petrochemical Processes

a) Section 214.301 ~~shall~~ must not apply to existing processes designed to remove sulfur compounds from the flue gases of petroleum and petrochemical processes.

b) ~~No~~ A person ~~shall~~ must not cause or allow the emission of more than 1,000 ppm of sulfur dioxide into the atmosphere from any process emission source in the St. Louis (Illinois) major metropolitan area designed to remove sulfur compounds from the flue gases of petroleum and petrochemical processes.

c) The following limitations apply to any petroleum refinery in the Village of Roxana:

1) ~~No~~ A person ~~shall~~ must not cause or allow the combustion of refinery flasher pitch containing more than 3.0% ~~(three percent)~~ sulfur by weight. This ~~shall~~ must be demonstrated by daily sampling of refinery flasher pitch.

2) ~~No~~ A person ~~shall~~ must not burn petroleum refinery fuel gas in any fuel gas combustion device if that refinery fuel gas contains more than 39 grains hydrogen sulfide per 100 dry standard cubic feet (893 mg/scm). This ~~shall~~ must be demonstrated by sampling the refinery fuel gas once every eight hours~~, pursuant to~~ under the Tutwiler Procedure, incorporated by reference at ~~(~~Section ~~214.104(c))~~214.104(d).

3) ~~No~~ A person ~~shall~~ must not cause or allow the total emission of sulfur dioxide into the atmosphere from the following source groupings to exceed the following amounts:

A) All process heaters at distilling unit No. 1 - 459 lbs/hr (208 kg/hr).

B) All process heaters at distilling unit No. 2 - 1260 lbs/hr (571 kg/hr).

C) All gas plant process heaters - 159 lbs/hr (72.1 kg/hr).

D) All vacuum flasher unit heaters - 378 lbs/hr (171 kg/hr).

E) All process heaters at the alkylation, benzene extraction unit and catalytic feed hydrotreating units - 346 lbs/hr (157 kg/hr).

F) All boilers generating steam for general plant use - 2,400 lbs/hr (1,090 kg/hr).

G) All heaters serving the hydrocracker unit catalytic reformer No. 1, and the saturates gas plant - 1,660 lbs/hr (753 kg/hr).

H) All process heaters at the aromatics east process - 768 lbs/hr (348 kg/hr).

I) All catalytic cracking units - 3,430 lbs/hr (1,560 kg/hr).

J) All asphalt converters, distilling unit No. 1, the aromatics east process, all boilers generating steam for general plant use, and all gas plant process heaters - 2,710 lbs/hr (1,230 kg/hr).

d) Compliance with the emission limitations of subsections (b) and (c)(3) ~~of this Section shall~~must be demonstrated on a three-hour block average basis. ~~Such~~ These demonstrations ~~shall~~ must require~~,~~ as a permit condition~~,~~ that data ~~as~~ required by the Illinois Environmental Protection Agency ~~(~~under 35 Ill. Adm. Code 201.161~~)~~ must be maintained ~~in order~~ to adequately determine the sulfur dioxide emission rate from each source operations group.

e) Sources in the Village of Roxana are not subject to the emission limitations of Section 214.162 when burning refinery flasher pitch or refinery fuel gas.

f) Individual process emission sources in the Village of Roxana are ~~still~~ subject to the emission limitation of Section 214.301 notwithstanding their inclusion in a source operations group.

g) Notwithstanding ~~the provisions of~~ 35 Ill. Adm. Code 201.102 ~~of this Chapter~~, any physical change in any emission source subject to subsection (b), (c), (d), or (e) ~~of this Section~~ which alters the height of release, temperature, or volumetric flow rate of the effluent gases of ~~such~~ the source~~,~~ or alters the diameter of the exit stack~~,~~ ~~shall~~ must be deemed a modification ~~for the purposes of~~under 35 Ill. Adm. Code 201.142 ~~of this Chapter~~.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 214.383 Chemical Manufacturing

Section 214.301 ~~shall~~ must not apply to existing hydrogen sulfide flares at a chemical manufacturing plant ~~provided~~if:

a) ~~Said~~ The flares ~~are operative~~operate on existing batch type processes; and

b) The hydrogen sulfide emissions being flared are not, as of September 11, 1975, passed through existing processes designed to remove sulfur compounds from the flue gases ~~as provided in~~under Section 214.382(a); and

c) The emission of sulfur dioxide into the atmosphere from ~~said~~ the flares does not exceed 500 pounds per hour and 3500 pounds per eight-hour period (230 kg/hr and 1590 kg/8 hrs); and

d) Provided, ~~however,~~ that, if emission controls for ~~said~~ the flares become economically reasonable and technically feasible, the owner/operator of ~~such~~ the hydrogen sulfide flares ~~shall~~ must install ~~such~~ the controls.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 214.384 Sulfate and Sulfite Manufacturing

Section 214.301 ~~shall~~ must not apply to sodium aluminum sulfate and sodium sulfite manufacturing process emission sources in the St. Louis (Illinois) major metropolitan area.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART P: STONE, CLAY, GLASS, AND CONCRETE PRODUCTS

Section 214.400 Scope (Repealed)

~~a) This Subpart contains rules which modify the general sulfur emission rules of Subparts A through M as applied to a given industry or at a given site. General rules include:~~

~~1) Subparts B through I, fuel combustion emission sources and incinerators;~~

~~2) Subparts K through M, process emission sources.~~

~~b) These rules have been grouped for the convenience of the public; the scope of each is determined by its language and history. Rules placed in this Subpart include those which appear to be primarily directed at the following major industry group: stone, clay, glass and concrete products.~~

(Source: Repealed at 48 Ill. Reg. _____, effective _____)

Section 214.401 Glass Melting and Heat Treating

Section 214.301 ~~shall~~ must not apply to:

a) Glass melting furnaces in the Chicago or St. Louis (Illinois) major metropolitan areas.

b) Glass heat treating with sulfur dioxide in the St. Louis (Illinois) major metropolitan area.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 214.402 Lime Kilns

Notwithstanding Section 214.304 ~~notwithstanding~~, lime kilns (Standard Industrial Code 32) are not subject to limitations for sulfur dioxide emission.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART Q: PRIMARY AND SECONDARY METAL MANUFACTURING

Section 214.420 Scope (Repealed)

~~a) This Subpart contains rules which modify the general sulfur emission rules of Subparts A through M as applied to a given industry or at a given site. General rules include:~~

~~1) Subparts B through I, fuel combustion emission sources and incinerators;~~

~~2) Subparts K through M, process emission sources.~~

~~b) These rules have been grouped for the convenience of the public; the scope of each is determined by its language and history. Rules placed in this Subpart include those which appear to be primarily directed at the following major industry groups:~~

~~1) Primary metal industries (including primary and secondary production of ferrous and nonferrous metals);~~

~~2) Fabricated metal products.~~

(Source: Repealed at 48 Ill. Reg. _____, effective _____)

Section 214.421 Combination of Fuels at Steel Mills in Metropolitan Areas

a) Notwithstanding Section 214.162 ~~notwithstanding~~, ~~no~~ a person ~~shall~~ must not cause or allow the emission of sulfur dioxide into the atmosphere in any ~~one~~

~~hour~~one-hour period from any existing fuel combustion emission source at a steel mill located in the Chicago or St. Louis (Illinois) major metropolitan area burning any solid, liquid, or gaseous fuel~~,~~ or any combination ~~thereof~~of them~~,~~ to exceed the allowable emission rate determined by the following equation:

$$E = S_S H_S + S_d H_d + S_R H_R + S_G H_G$$

b) Symbols in the equation mean the following:

E	=	allowable sulfur dioxide emission rate;
S_S	=	applicable solid fuel sulfur dioxide emission standard ~~which is applicable~~;
S_d	=	distillate oil sulfur dioxide emission standard determined from the table in subsection (d);
S_R	=	applicable residual oil sulfur dioxide emission standard ~~which is applicable~~;
S_G	=	maximum by-product gas sulfur dioxide emissions which would result if the applicable by-product gas which was burned had been burned alone at any time during the 12 months preceding the latest operation, on or before March 28, 1983, of an emission source using any by-product gas;
H_S	=	actual heat input from solid fuel;
H_d	=	actual heat input from distillate fuel oil;
H_R	=	actual heat input from residual fuel oil;
H_G	=	actual heat input from by-product gases, such as those produced from a blast furnace.

c) ~~That~~ The portion of the actual heat input ~~that is~~ derived:

1) From the burning of gaseous fuels produced by the gasification of solid fuels ~~shall~~ must be included in H_S;

2) From the burning of gaseous fuels produced by the gasification of distillate fuel oil ~~shall~~ must be included in H_d;

3) From the burning of gaseous fuels produced by the gasification of residual fuel oil ~~shall~~ must be included in H_R; and

4) From the burning of gaseous fuels produced by the gasification of any other liquid fuel ~~shall~~ must be included in H_G.

d) The equation in subsection (a) may use the following metric~~Metric~~ or English units ~~may be used in the equation of subsection (a) as follows~~:

Parameter	Metric	English
E	kg/hr	lbs/hr

S_S, S_R, S_G	kg/MW-hr	lbs/mmBtu
S_d ~~prior to~~before January 1, 2017	0.46 kg/MW-hr	0.3 lbs/mmBtu
S_d on and after January 1, 2017	0.0023 kg/MW-hr	0.0015 lb/mmBtu
H_S, H_d, H_R, H_G	MW	mmBtu

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 214.422 Secondary Lead Smelting in Metropolitan Areas

Section 214.301 ~~shall~~ must not apply to secondary lead smelting process emission sources in the Chicago or St. Louis (Illinois) major metropolitan areas.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 214.423 Slab Reheat Furnaces in St. Louis Area

Notwithstanding Section 214.304 ~~notwithstanding~~, slab reheat furnaces in the St. Louis (Illinois) major metropolitan area with fuel burning capacities ~~in excess of~~exceeding 650 mmbtu/hr and burning any residual fuel ~~shall~~ must not be subject to the applicable Subpart B through F ~~so long as~~if the total sulfur dioxide emissions resulting from the burning of residual fuel oil in all such furnaces at any one steel mill do not exceed 730 lbs/hr.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART V: ELECTRIC POWER PLANTS

Section 214.521 Winnetka Power Plant (Repealed)

~~Notwithstanding Sections 214.101 and 214.141, the Village of Winnetka Electric Utility Plant shall not cause or allow the emission of sulfur dioxide into the atmosphere in any one hour period from its existing fuel combustion sources, burning solid fuel exclusively, to exceed 5.7 pounds of sulfur dioxide per mmbtu of actual heat input (8.8 kg/MW-hour). Compliance with this limitation shall be demonstrated on the basis of a daily average.~~

(Source: Repealed at 48 Ill. Reg._____, effective_____)

SUBPART X: UTILITIES

Section 214.560 Scope (Repealed)

~~a) This Subpart contains rules which modify the general sulfur emission rules of Subparts A through M as applied to a given industry or at a given site. General rules include:~~

~~1) Subparts B through I: Fuel combustion emission sources and incinerators;~~

~~2) Subparts K through M: Process emission sources.~~

~~b) These rules have been grouped for the convenience of the public; the scope of each is determined by its language and history. Rules placed in this Subpart include those which appear to be primarily directed at the following major industry groups: electric, gas and sanitary services.~~

(Source: Repealed at 48 Ill. Reg. _____, effective _____)

Section 214.561 E.D. Edwards Electric Generating Station (Repealed)

~~Sulfur dioxide emissions from Boiler Nos. 1, 2, and 3 at the Edwards Station may not exceed the limits listed in this Section. CILCO must determine compliance with these limits on a daily basis using the sulfur dioxide methodology of the Phase II Acid Rain Program set forth in 40 CFR 75.~~

~~a) The average sulfur dioxide emissions from Boiler Nos. 1, 2, and 3, as a group may not exceed 4.71 pounds per million British thermal units (lb/mmBtu) of actual heat input;~~

~~b) The average sulfur dioxide emissions from any one boiler may not exceed 6.6 lb/mmBtu of actual heat input; and~~

~~c) Sulfur dioxide emissions for all three boilers, as a group, may not exceed 34,613 pounds per hour, on a 24-hour average basis.~~

(Source: Repealed at 48 Ill. Reg._____, effective_____)

Section 214.562 Coffeen Generating Station

a) The emission standards of this subsection apply only if an owner of operator satisfies subsections (b), (c), and (d) ~~are fulfilled~~. Notwithstanding any other limitation ~~contained~~ in this Part, whenever the coal burned is mined exclusively from the mine ~~that is~~ presently known as Monterey Coal Company's No. 1 Mine located south of Carlinville, emission of sulfur dioxide from Units 1 and 2 at the Central Illinois Public Service Company's (CIPS) Coffeen Generating Station (Coffeen), located in Montgomery County, ~~shall~~ must not exceed either of the following emission standards:

1) 29,572 kilograms of sulfur dioxide in any one hour (65,194 lbs/hr); and

2) 11.29 kilograms of sulfur dioxide per megawatt-hour of heat input (7.29 lbs/mmbtu).

b) CIPS ~~shall~~ must conduct an ambient sulfur dioxide monitoring and dispersion modeling program designed to demonstrate that the emission standards of subsection (a) will not cause or contribute to violations of any applicable primary or secondary sulfur dioxide ambient air quality standard ~~as set forth in~~under Section 243.122. ~~Such~~ The ambient monitoring and dispersion modeling program ~~shall~~ must be operated for at least one year commencing no later than 6 months after Coffeen is legally able and begins to operate at an emission rate greater than 55,555 pounds of sulfur dioxide per hour.

c) No more than 15 months after ~~the commencement of~~commencing the ambient monitoring and dispersion modeling program ~~of~~ under subsection (b), CIPS ~~shall~~ must apply for a new operating permit. When applying, CIPS ~~shall~~ must submit to the Environmental Protection Agency (Agency)~~, at the time of the application,~~ a report containing the results of the ambient monitoring and dispersion modeling program ~~of~~ under subsection (b) and the results of all relevant stack tests conducted ~~prior to the report's submission~~before submitting the report.

d) No later than six months after Coffeen is legally able and begins to operate at an emission rate greater than 55,555 pounds of sulfur dioxide per hour, a stack test ~~shall~~ complying with Section 214.101(a) must be conducted ~~in accordance with Section 214.101(a), in order~~ to determine compliance with ~~emission standards set forth in~~ subsection (a). After the stack test is conducted, the results ~~shall~~ must be submitted to the Agency within 90 days. ~~The requirements of this~~This subsection ~~do~~ does not preclude the Agency from requiring additional stack tests.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART AA: REQUIREMENTS FOR CERTAIN SO_2 SOURCES

Section 214.600 Definitions

~~For purposes of this Subpart, the~~The following definitions apply for this Subpart. Unless a different meaning for a term is clear from its context, all terms not defined in this Section have the meanings ~~given to them~~ in the Illinois Environmental Protection Act and in 35 Ill. Adm. Code 201 and 211.

"Agency" means the Illinois Environmental Protection Agency.

"Aventine Renewable Energy" means the ethanol production source located at or near 1300 S. 2nd Street, Pekin IL.

"Illinois Power Resources Generating E.D. Edwards" means the electrical power generation source located at or near 7800 S. Cilco Lane, Bartonville IL.

"Ingredion Bedford Park" means the corn wet milling source located at or near 6400 S. Archer Road, Bedford Park IL.

"Midwest Generation Joliet" means the electrical power generation source located at or near 1800 Channahon Road, Joliet IL.

"Midwest Generation Powerton" means the electrical power generation source located at or near 13082 E. Manito Road, Pekin IL.

"Midwest Generation Will County" means the electrical power generation source located at or near 529 E. 135th, Romeoville IL.

"Owens Corning" means the asphalt and roofing products manufacturing source located at or near 5824 S. Archer Road, Summit IL.

"Oxbow Midwest Calcining" means the petroleum coke product source located at or near 12308 S. New Avenue, Lemont IL.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 214.601 Applicability

a) This Subpart applies to the following sources:

1) Aventine Renewable Energy;

2) Illinois Power Resources Generating E.D. Edwards;

3) Ingredion Bedford Park;

4) Midwest Generation Joliet;

5) Midwest Generation Powerton;

6) Midwest Generation Will County;

7) Owens Corning; and

8) Oxbow Midwest Calcining.

b) Once a source is subject to this Subpart, it is always subject to this Subpart, regardless of change in ownership or unit designation, or any other modification at the source.

c) Nothing in this Subpart relieves a source of the obligation to comply with the air quality standards ~~set forth~~ in 35 Ill. Adm. Code 243, or with any other applicable requirement ~~set forth~~ in this Part.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 214.602 Compliance Deadline

On and after January 1, 2017, the owner or operator of a source identified in Section 214.601(a) must comply with ~~the provisions in~~ this Subpart.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 214.603 Emission Limitations

The owner or operator of a source must comply with the following emission limitations, as applicable, expressed in terms of pounds of SO_2 emitted per clock hour.

a)	Aventine Renewable Energy		lb/hr
	1)	Cyclone East controlling First Germ Drying System	0.27
	2)	Cyclone West controlling First Germ Drying System	0.37
	3)	Second Germ Drying System	0.01
	4)	Gluten Dryer 4	3.12
	5)	Gluten Dryer 9	10.50
	6)	Germ Dryer 1	4.98
	7)	Germ Dryer 3	4.26
	8)	Yeast Dryer	1.50
	9)	Scrubber controlling Steep Acid Tower	1.79
	10)	Biogas Flare	0.001
	11)	Boiler A	0.00
	12)	Boiler B	0.00
	13)	Boiler C	0.00
b)	Illinois Power Resources Generating		

	E.D. Edwards		lb/hr
	1)	Units 1 and 2 combined	2100.00
	2)	Unit 3	2756.00
	3)	Unit 3, if both Units 1 and 2 permanently shut down	4000.00
c)	Ingredion Bedford Park		lb/hr
	1)	Feed Transport System	24.38
	2)	Wet Milling: Inside In-Process Tanks	107.26
	3)	Wet Milling: Molten Sulfur Burner and Absorption System	7.01
	4)	Wet Milling: Outside In-Process Tanks	2.69
	5)	Germ Processing Facility Channel 1 System	13.36
	6)	Germ Processing Facility Channel 2 System	7.07
	7)	Germ Processing Facility Channel 3 System	7.07
	8)	Germ Processing Facility Channel 4 System	7.07
d)	Midwest Generation Joliet		lb/hr
	1)	Joliet 9: Unit 6	189.82
	2)	Joliet 29: Unit 7	323.29
	3)	Joliet 29: Unit 8	342.15
e)	Midwest Generation Powerton		lb/hr
	1)	Boilers 51, 52 (Unit 5) and 61, 62 (Unit 6) combined	3452.00

2) The owner or operator must comply with the emission limitation ~~set forth in~~under subsection (e)(1) on a 30-operating day rolling average basis. For ~~purposes of~~ this Subpart, an operating day is a calendar day in which any emission unit ~~addressed~~ in subsection (e)(1) combusts any fuel;

3) Within 24 hours after the end of each averaging period, the owner or operator must use the following equation to determine the combined SO_2 emission rate of the emission units ~~addressed~~ in subsection (e)(1) for each averaging period, which concludes at the end of each operating day. The SO_2 emission rate must not exceed the limitation ~~set forth~~ in subsection (e)(1):

$$E_{avg} = \frac{\sum_{h=1}^{n} E_h}{n}$$

Where:

E_{avg} = SO_2 emission rate for the averaging period, in lb/hr.

E_h = SO_2 emission rate for stack operating hour "h" in the averaging period. For ~~purposes of~~ this Subpart, a stack operating hour is a clock hour in which valid data is obtained, and in which gases flow through the monitored stack or duct for the emission units ~~addressed~~ in subsection (e)(1) ~~(either for~~for either part of the hour or for the entire hour~~)~~ while at least one of the units is combusting fuel.

n = Number of stack operating hours in the averaging period in which valid data is obtained.

4) The SO_2 emission rate for the emission units ~~addressed~~ in subsection (e)(1) must not exceed 6,000 lb/hr in more than 5% of the stack operating hours ("n" in the equation in subsection (e)(3)) in any averaging period.

f)	Midwest Generation Will County	lb/hr
1)	Unit 3	145.14
2)	Unit 4	5000.00
g)	Owens Corning	lb/hr
1)	Preheater Incinerator System 1, including emissions from: Storage Tanks 9, 9A, 10,	44.69

	10A, 11, 17, 18, 19, 20, 40, 41, 42, and 43; Loading Racks 1, 2, and 9; and Convertors 10 and 11	
2)	Preheater Incinerator System 3, including emissions from: Converters 8, 9, 12, 13, 14, and 15; and Loading Racks 1, 2, and 9	27.23
3)	Regenerative Thermal Oxidizer 3 controlling: Storage Tanks 27, 28, 31, 32, 33, 34, 35, and 36	4.33
4)	Regenerative Thermal Oxidizer 4 controlling: Storage Tank 98; Loading Rack PV1	6.38
5)	Coating Operations combined	0.15
h)	Oxbow Midwest Calcining	lb/hr
	All Calcining Units combined	187.00

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 214.604 Monitoring and Testing

a) The owner or operator of a source must, for each emission unit at the source ~~that is addressed~~ in Section 214.603, demonstrate compliance with the applicable emission limitations in Section 214.603 ~~via~~ through the monitoring and testing requirements ~~set forth in~~of this Section.

b) The owners or operators of the following sources must, for each emission unit at the source ~~that is addressed~~ in Section 214.603, install, calibrate, maintain, and operate a continuous emissions monitoring system for the measurement of SO_2 emissions in ~~accordance~~ compliance with 40 CFR 75 (except 40 CFR 75.31 through 34), incorporated by reference in Section 214.104, and subsection (d), or ~~utilize~~ use an alternative monitoring method available to the emission unit under 40 CFR 75:

1) Illinois Power Resources Generating E.D. Edwards;

2) Midwest Generation Joliet;

3) Midwest Generation Powerton; and

4) Midwest Generation Will County.

c) The owner or operator of all sources not ~~addressed~~ in subsection (b) must, for each emission unit at the source ~~that is addressed~~ in Section 214.603, either conduct performance testing in ~~accordance~~ compliance with subsection (e) or install, calibrate, maintain, and operate a continuous emissions monitoring system for the measurement of SO_2 emissions in ~~accordance~~ compliance with 40 CFR 60 or 40 CFR 75 (except 40 CFR 75.31 through 34), incorporated by reference in Section 214.104, and subsection (d) ~~of this Section~~.

d) The owner or operator of a source with an emission unit demonstrating compliance through the use of a continuous emissions monitoring system must comply with the following for each unit:

1) If two or more of the emission units ~~addressed~~ in Section 214.603 are served by a common stack, the owner or operator may ~~utilize~~ use a single continuous emissions monitoring system for those units;

2) If the owner or operator of an emission unit subject to Section 214.604(c) changes the method of demonstrating compliance for that unit from performance testing to use of a continuous emissions monitoring system, the owner or operator must install, calibrate, and begin operating the continuous emissions monitoring system on or before the performance testing deadline ~~determined in accordance with~~under subsection (e)(2); and

3) ~~The provisions in~~Missing data substitution under 40 CFR 75.31 through 34 ~~regarding missing data substitution~~ must not be used ~~for purposes of demonstrating~~to demonstrate compliance with ~~the requirements set forth in~~ this Subpart.

e) The owner or operator of a source with an emission unit demonstrating compliance through performance testing must comply with the following for each unit. All testing done ~~pursuant to~~under this Section must be conducted at the owner's or operator's own expense:

1) Conduct an initial performance test after January 1, 2015, and ~~prior to~~before January 1, 2017. If the owner or operator of an emission unit subject to Section 214.604(c) changes the method of demonstrating compliance for that unit from use of a continuous emissions monitoring system to performance testing, the owner or operator must demonstrate compliance by conducting an initial performance test ~~prior to~~before discontinuing the continuous emissions monitoring system;

2) Conduct subsequent performance tests at least once every 5 years from the date of the last performance test. The date of the initial performance test conducted ~~pursuant to~~under subsection (e)(1) begins the 5-year period;

3) Conduct additional performance testing when, in the opinion of the Agency or USEPA, that testing is necessary to demonstrate compliance with ~~the requirements in~~ Section 214.603. The test must be conducted within 90 days after ~~receipt of~~receiving a notice to test from the Agency or USEPA, unless the notice specifies an alternative testing deadline;

4) Submit a testing protocol as described in USEPA's Emission Measurement Center Guideline Document (GD-042), incorporated by reference in Section 214.104, to the Agency at least 45 days ~~prior to~~before a scheduled emissions test, unless the Agency waives that deadline ~~is waived~~ in writing ~~by the Agency~~;

5) Submit ~~a~~ written notification of a scheduled emissions test to the Agency at least 30 days ~~prior to~~before the test date and again 5 days ~~prior to~~before testing, unless the Agency waives those deadlines ~~are waived~~ in writing ~~by the Agency~~. If, after sending the 30 days' notice of a test ~~is sent~~, there is a delay in conducting the test as scheduled (e.g., due to operational problems), the owner or operator must notify the Agency as soon as practicable of the delay, either by providing at least 7 days' notice of the rescheduled test date or by arranging a new test date with the Agency by mutual agreement;

6) Conduct each performance test using Method 1, 2, 3, 4, 6, 6A, 6B, 6C, or 19, incorporated by reference in Section 214.104, or other alternative USEPA methods approved by the Agency. Each test must consist of at least 3 separate runs, each lasting a minimum of 60 minutes, and must be conducted during conditions representative of maximum SO_2 emissions. Compliance with the applicable limitation in Section 214.603 must be determined in ~~accordance~~ compliance with 35 Ill. Adm. Code 283;

7) If the unit has combusted more than one type of fuel in the prior year, a separate performance test is required for each fuel; and

8) ~~Subsequent to~~After each performance test used to demonstrate compliance, continue operating the emission unit within the parameters enumerated in the testing results submitted to the Agency for each test, and monitor the parameters regularly to ensure ongoing compliance.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 214.605 Recordkeeping and Reporting

a) By January 1, 2017, the owner or operator of a source must submit to the Agency the following:

1) A certification that the source will be in compliance with ~~the provisions in~~ this Subpart by January 1, 2017;

2) For a source with an emission unit demonstrating compliance through performance testing:

A) The results of the initial performance test conducted ~~pursuant to~~under Section 214.604(e)(1);

B) The calculations necessary to demonstrate that the emission unit will be in initial compliance; and

C) A description of the measures the source will take to ensure the emission unit continues to operate within the parameters ~~enumerated~~ in the testing results submitted to the Agency for each test used to demonstrate compliance, including how those parameters will ensure ongoing compliance with the applicable limitation in Section 214.603 and the specific monitoring procedures that will be implemented for each parameter;

3) For a source with an emission unit demonstrating compliance through the use of a continuous emissions monitoring system, a certification of the installation and operation of the continuous emissions monitoring system and the monitoring data necessary to demonstrate that the emission unit will be in initial compliance;

4) For a source with an emission unit demonstrating compliance through the use of an alternative monitoring method under 40 CFR 75, a description of the alternative monitoring method being used and the monitoring data necessary to demonstrate that the emission unit will be in initial compliance; and

5) A description of the method or methods the source will use to comply with all applicable emission limitations in Section 214.603, including a description of all control devices used and, for sources with emission units demonstrating compliance through performance testing, the operating parameters for those devices.

b) The owner or operator of a source must keep and maintain records that demonstrate ongoing compliance with ~~the requirements of~~ this Subpart. The records must include the following:

1) The calendar date of the record;

2) Reports for all performance tests conducted ~~pursuant to~~under Section 214.604(e), including the date of the test and the results;

3) A log of the date, time, nature, and results of all parametric monitoring conducted ~~pursuant to~~under Section 214.604(e)(8);

4) For each SO_2 continuous emissions monitoring system, a log indicating any periods when the device was not in service, maintenance and inspection activities performed on the device, and all information necessary to demonstrate compliance with the monitoring requirements in Section 214.604;

5) The date, time, and duration of any malfunction in the operation of an emission unit ~~addressed~~ in Section 214.603 or any SO_2 control equipment for that unit, if the malfunction causes an exceedance of any applicable emission limitation in Section 214.603, and the date, time, and duration of any malfunction in the operation of any SO_2 emissions monitoring equipment for that unit. The records must include a description of the malfunction, the probable cause of the malfunction, the date and nature of the corrective action taken, and any preventative action taken to avoid future malfunctions;

6) A log of all inspections, cleaning, maintenance, and repair activities performed on SO_2 control equipment for an emission unit ~~addressed~~ in Section 214.603, including the date and nature of those activities. The log must indicate any changes made to the control equipment, including removal or replacement of the equipment; and

7) For emission units subject to ~~the emission limitation in~~ Section 214.603(e), the SO_2 emission rate of the units for each averaging period and supporting calculations.

c) Except as otherwise indicated in this Subpart, the owner or operator of a source with an emission unit demonstrating compliance through performance testing must submit the results of all tests conducted ~~pursuant to~~under Section 214.604(e) within 60 days after ~~completion of~~completing the test.

d) The owner or operator of a source must notify the Agency at least 30 days ~~prior to~~before changing the method of demonstrating compliance for an emission unit ~~addressed~~ in Section 214.603. The owner or operator must also comply with the following, as applicable:

1) For an emission unit changing the method of demonstrating compliance from performance testing to use of a continuous emissions monitoring system, submit to the Agency a certification of the installation and

operation of the continuous emissions monitoring system and the monitoring data necessary to demonstrate compliance. The submittal must be made within 30 days after beginning operation of the continuous emissions monitoring system, and on or before the performance testing deadline determined ~~in accordance with~~under Section 214.604(e)(2);

2) For an emission unit changing the method of demonstrating compliance from use of a continuous emissions monitoring system to performance testing, submit to the Agency before discontinuing operation of the continuous emissions monitoring system the following~~. The submittal must be made prior to discontinuing operation of the continuous emissions monitoring system~~:

A) The results of the initial performance test conducted ~~pursuant to~~under Section 214.604(e)(1);

B) The calculations necessary to demonstrate compliance; and

C) A description of the measures the source will take to ensure the emission unit continues to operate within the parameters ~~enumerated~~ in the testing results submitted to the Agency for each test used to demonstrate compliance, including how the parameters will ensure ongoing compliance with the applicable limitation in Section 214.603 and the specific monitoring procedures that will be implemented for each parameter;

3) For an emission unit changing the method of demonstrating compliance from use of a continuous emissions monitoring system to an alternative monitoring method under 40 CFR 75, submit to the Agency before discontinuing operation of the continuous emissions monitoring system a description of the alternative monitoring method ~~being used~~ and the monitoring data necessary to demonstrate compliance. ~~The submittal must be made prior to discontinuing operation of the continuous emissions monitoring system.~~

e) The owner or operator of a source must notify the Agency within 30 days after discovery of deviations from any of the requirements in this Subpart or any exceedance of an applicable emission limitation in Section 214.603. ~~At minimum, and in~~In addition to any ~~permitting obligations~~information required by a source's permit, the notification must ~~include a description of~~describe the deviations or exceedances~~, a discussion of~~ and discuss the possible cause of the deviations or exceedances~~,~~ and any corrective actions ~~taken,~~ and ~~any~~ preventative measures taken.

f) The owner or operator of a source must maintain all records required by this Section at the source for a minimum of 5 years~~,~~ and provide copies of the records to the Agency within 30 days after ~~receipt of~~receiving a request by the Agency.

Section 214.APPENDIX C Method ~~used~~ Used to Determine Average Actual Stack Height and Effective Height of Effluent Release

Q_H = Heat emission rate (in btu/sec or Kcal/sec) as determined by method outlined below.

ΔH = Plume rise (in feet or meters).

H = Physical height (in feet or meters) above grade of each stack, except that for purposes of this calculation the value used for ~~such~~ stack height ~~shall~~ must not exceed good engineering practice as defined by Section 123 of the Clean Air Act and ~~Regulations~~ regulations promulgated ~~thereunder~~under it, unless the owner or operator of the source demonstrates to the Agency that a greater height is necessary to prevent downwash or fumigation conditions.

T = Exit temperature of stack gases (in degrees Rankine or degrees Kelvin) from each source during operating conditions which would cause maximum emissions.

V = Exit velocity of stack gases (in feet/sec or meters/sec) from each source under operating conditions which would cause maximum emissions.

D = Diameter of stack (in feet or meters).

P = Percentage of total emissions expressed as decimal equivalents emitted from each source. (Example: 21% = 0.21.)
NOTE: The sum of $P_1 + P_2 ... + P_n = 1$. The emission values to be used are those which occur during operating conditions which would cause maximum emissions.

H_A = Average actual stack height (in feet or meters).

H_E = Effective height of effluent release (in feet or meters).

STEP 1: Determine weighted average stack parameters ~~utilizing~~ using the following formulae:

$$D = P_1 D_1 + P_2 D_2 + ... + P_n D_n$$

$$V = P_1 V_1 + P_2 V_2 + ... + P_n V_n$$

$$T = P_1 T_1 + P_2 T_2 + ... + P_n T_n$$

$$H_A = P_1 H_1 + P_2 H_2 + ... + P_n H_n$$

NOTE: P_1, D_1, V_1, T_1, and H_1 are the percentage of total emissions, stack diameter, exit velocity of gases, exit temperature of stack gases, and physical stack height, respectively, for the first source; P_2, D_2, V_2, T_2, and H_2 are the respective values for the second source; similarly, P_n, D_n, V_n, T_n, and H_n are the respective values for the nth source, where n is the number of the last source.

STEP 2: Calculate heat emission rate ~~utilizing~~ using the following formula and the weighted average stack parameters obtained in Step 1:

$$Q_H = 7.54 D^2 V \frac{(T - 515)}{T} \text{ (in English units)}$$

$$Q_H = 66.8 D^2 V \frac{(T - 286)}{T} \text{ (in Metric units)}$$

STEP 3: Calculate plume rise ~~utilizing~~ using the appropriate formula ~~given~~ below and the total heat emission rate obtained in Step 2:

$$\Delta H = \frac{2.58 (Q_H)^{0.6}}{(H_A)^{0.11}} \text{ (in English Units for } Q_H \geq 6000 \text{ btu/sec)}$$

$$\Delta H = \frac{1.58 (Q_H)^{0.6}}{(H_A)^{0.11}} \text{ (in Metric Units for } Q_H \geq 1500 \text{ kcal/sec)}$$

$$\Delta H = \frac{0.718 (Q_H)^{0.75}}{(H_A)^{0.11}} \text{ (in English Units for } Q_H < 6000 \text{ btu/sec)}$$

$$\Delta H = \frac{0.54 (Q_H)^{0.75}}{(H_A)^{0.11}} \text{ (in Metric Units for } Q_H < 1500 \text{ kcal/sec)}$$

STEP 4: Calculate the weighted average facility effective height of effluent release ~~utilizing~~ using the plume rise obtained in Step 3, the average stack height obtained in Step 1, and the formula ~~given below~~:

$$H_E = H_A + \Delta H$$

STEP 5: Calculate the total facility hourly emission limitation ~~utilizing~~ using the weighted actual stack height obtained in Step 1, the effective stack height given in Step 4, and the following formula:

$$E = \frac{(H_A)^{0.11}(H_E)^2}{128} \quad \text{(in English units)}$$

$$E = 0.04347(H_A)^{0.11}(H_E)^2 \quad \text{(in Metric units)}$$

Section 214.APPENDIX D Past Compliance Dates

Rule	Type of Source	Compliance Date
204(b)	New fuel combustion emission sources.	April 14, 1972
204(c)	St. Louis (Illinois) and Peoria MMA's with actual heat input less than, or equal to, 250 million Btu per hour	
	(a) Sources determining that the 6.8 lbs/MMBTU standard ~~shall apply~~applies	December 14, 1978
	(b) Sources determining that Rule 204(e) ~~shall apply~~applies	See Rule 204(e)
204(d)	Existing sources outside the Chicago, St. Louis (Illinois), and Peoria MMA's with actual heat input greater than 250 million Btu per hour	See Rule 204(e)
204(e)(1) and (2)	Fuel combustion sources located outside Chicago, St. Louis (Illinois), and Peoria MMA's which obtain an alternate emission rate	December 14, 1978
	(a) If source is in compliance with the previous Rule 204(e) (effective April 14, 1972 until December 14, 1978) ~~prior to~~before December 14, 1978	Date of commencement of monitoring and modeling ~~pursuant to~~under Rule 204(e)(3)(C)
	(b) If source is not in compliance with the previous Rule 204(e) (effective from April 14, 1972 until December 14, 1978) ~~prior to~~before December 14, 1978	Date of approval of alternate standard
204(f)	Existing sources in the Chicago, St. Louis (Illinois), or Peoria MMA's burning solid fuel exclusively	March 28, 1983

204(g)	Existing sources in the Chicago, St. Louis (Illinois), or Peoria MMA's burning solid fuel exclusively which obtain an alternate emission rate	Date of approval of alternate standard
204(h)	Existing sources burning liquid fuel exclusively	May 30, 1975
204(i)	Combination of fuels sources except at a steel mill Combination of fuels sources at a steel mill	April 14, 1972 March 28, 1983
204(j)	Fuel burning process emission sources	March 28, 1983
204(k)(1)(a)-(C)	Process emission sources	
	Existing sources New sources	December 31, 1973 December 14, 1978
204(k)(1)(D)-(H)	Process emission sources	March 28, 1983
204(k)(2) and (3)	New sources in the St. Louis (Illinois) MMA designed to remove sulfur compounds from the flue gases of petroleum and petrochemical processes and sulfuric acid manufacturing processes in the City of Chicago	March 28, 1983
204(l)	Sources having emissions of sulfuric acid mist	
	Existing sources New sources	December 31, 1973 December 14, 1978

Reg. 15032, effective September 4, 2020; amended in R18-21 at 48 Ill. Reg. _____, effective _____.

SUBPART A: GENERAL PROVISIONS

Section 215.100 Introduction

a) This Part contains standards and limitations for emissions of organic material from stationary sources located in areas other than the Chicago area counties of Cook, DuPage, Kane, Lake, McHenry, and Will~~,~~; the Townships of Aux Sable and Goose Lake in Grundy County~~,~~; and the Township of Oswego in Kendall County~~,~~ and the Metro East area counties of Madison, Monroe, and St. Clair. Standards and limitations applying in the Chicago area are ~~set forth~~ in 35 Ill. Adm. Code 218. Standards and limitations applying in the Metro East area are ~~set forth~~ in 35 Ill. Adm. Code 219.

1) Notwithstanding any other provision of this Part, ~~the provisions of~~ this Part ~~shall~~ must not apply to sources located in the Chicago area counties ~~of Cook, DuPage, Kane, Lake, McHenry, and Will, the Townships of Aux Sable and Goose Lake in Grundy County, and the Township of Oswego in Kendall County,~~ in subsection (a) unless the provisions of 35 Ill. Adm. Code Part 218 applicable to ~~such~~ those sources are voided or otherwise made ineffective ~~pursuant to Section~~under 35 Ill. Adm. Code 218.100 ~~of 35 Ill. Adm. Code Part 218~~.

2) Notwithstanding any other provision of this Part, ~~the provisions of~~ this Part ~~shall~~ must not apply to sources in the Metro East area counties ~~of Madison, Monroe and St. Clair~~in subsection (a) unless the provisions of 35 Ill. Adm. Code Part 219 applicable to ~~such~~ those sources are voided or

otherwise made ineffective ~~pursuant to Section~~under 35 Ill. Adm. Code 219.100 ~~of 35 Ill. Adm. Code Part 219~~.

b) Sources subject to this Part may be subject to the following:

1) Permits required under 35 Ill. Adm. Code 201;

2) Air quality standards under 35 Ill. Adm. Code 243.

c) This Part is ~~divided~~ organized into Subparts ~~which are grouped~~ as follows:

1) Subpart A: General Provisions;

2) Subpart B - J: Emissions from equipment and operations in common to more than one industry;

3) Subparts K - M: Emissions from use of organic material;

4) Subpart N - end: Special rules for ~~various~~ industry groups.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.101 Clean-up and Disposal Operations

Emission of organic material released during clean-up operations and disposal ~~shall~~ must be included with other emissions of organic material from the related emission source or air pollution control equipment in determining total emissions.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.102 Testing Methods

Volatile organic material or organic material concentrations in a stream ~~is~~ must be measured by Method 18, Measurement of gaseous organic compound emissions by gas chromatography, 40 CFR 60, Appendix A, incorporated by reference in Section 215.105~~, Mearuserement of Gaseous Organic Compounds, incorporated by reference in 215.105~~ except as follows. ASTM ~~d-4457~~D-4457, incorporated by reference in Section 215.105, may be used for halogenated organic compounds. Method 25, 25A, or 25B, 40 CFR 60, Appendix A, incorporated by reference in 215.105, may be substituted for Method 18 ~~provided~~ if the source owner or operator submits calibration data and other proof that this method provides the information in the emission units of the applicable standard. The volumetric flow rate and gas velocity ~~is~~ must be determined in ~~accordance~~ compliance with Methods 1, 1A, 2, 2A, 2C, 2D, 3, and 4, 40 ~~CF Part~~CFR 60, Appendix A, incorporated by reference in 215.105. Any other alternate test method must be approved by the Agency, which ~~shall~~ must consider data comparing the performance of the proposed alternative to the performance of the approved test ~~method(s)~~method or methods. If the Agency determines that ~~such~~ the data ~~demonstrates~~ demonstrate that the proposed alternative

will achieve results equivalent to the approved test ~~method(s)~~method or methods, the Agency ~~shall~~ must approve the proposed alternative.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.103 Abbreviations and Conversion Factors

a) ~~The~~ This Part uses the following abbreviations ~~are used in this Part~~:

bbl	barrels (42 gal)
º C~~C~~	degrees Celsius or centigrade
cu in	cubic inches
º F~~F~~	degrees Fahrenheit
ft	foot
g	gram
g/mole	grams per mole
gal	gallon
hr	hour
in	inch
º K~~K~~	degrees Kelvin
kcal	kilocalorie
kg	kilogram
kg/hr	kilograms per hour
kPa	kilopascals; one thousand newtons per square meter
L or L or ℓ	liter
lb	pound
lbs/hr	pounds per hour
lbs/gal	pounds per gallon
m	meter
Mg	megagram, metric ton or tonne
min	minute
MJ	megajoules
mm Hg	millimeters of mercury
ml	milliliter
ppm	parts per million
ppmv	parts per million by volume
psi	pounds per square inch
psia	pounds per square inch absolute
psig	pounds per square inch ~~guage~~gauge
scm	standard cubic meters
T	English ton

b) ~~The~~ This Part uses the following conversion factors ~~have been used in this Part~~:

English	Metric

1 gal	3.785 1
1000 gal	3,785 1 or 3.785 cubic meters
1 psia	6.897 kPa (51.71 mm Hg)
2.205 lbs	1 kg
1 bbl	159.01 1
1 cu in	16.39 ml
1 lb/gal	119,800 mg/l
1T	0.907 mg

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.104 Definitions

The definitions ~~of~~ in this section and in 35 Ill. Adm. Code 201 and 211 apply to this Part~~, as well as the definitions contained in this Section~~. When the definition ~~contained~~ in this Section is more specific than ~~that found~~the corresponding definition in 35 Ill. Adm. Code 201 or 211, ~~it shall take precedence in application of this Part~~then the more specific definition in this section applies.

"Furniture Coating Application Line"~~: The~~ means the combination of coating application equipment, flash-off area, spray booths, ovens, conveyors, and other equipment operated in a predetermined sequence for ~~purpose of~~ applying coating to wood furniture.

"In Vacuum Service"~~: For~~ means, the purposes of ~~Subpart Q,~~ Sections 215.430 through 215.438, equipment that is operating at an internal pressure ~~that is~~ at least 5 kPa (0.73 psia) below ambient pressure.

"Opaque Stains"~~: All~~ means all stains containing pigments not classified as semi-transparent stains, including stains, glazes, and other opaque material to give character to wood.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.105 Incorporation by Reference

The following materials are incorporated by reference~~:~~. These incorporations do not include any later amendments or additions.

a) American Society for Testing and Materials, 100 Barr Harbor Drive, West Conshohocken PA 19428-9555:

1) ASTM D 1644-59 Method A

2) ASTM D 1475-60

3) ASTM D 2369-81

4) ASTM D 2879-83 (Approved 1983); ASTM D 2879-86 (Approved 1986)

5) ASTM D 86-82 (Approved 1982)

6) ASTM E 260-73 (Approved 1973), E 168 - 67 (Reapproved 1977), E 169 - 63 (Reapproved 1981), E 20 (Approved 1985)

7) ASTM D 97-66

8) ASTM D 1946-67

9) ASTM D 2382-76

10) ASTM D 2504-83

11) ASTM D 2382-83

12) ASTM D-4953-89

13) ASTM D-4457-85

b) Federal Standard 141a, Method 4082.1.

c) National Fire Codes, National Fire Protection Association, Battery March Park, Quincy, Massachusetts ~~02269~~ 02169 (1979).

d) United States Environmental Protection Agency, Washington, D.C.,

1) Control of Hydrocarbons from Tank Truck Gasoline Loading Terminals, EPA-450/2-77-026, Appendix A (October 1977).

~~e~~2) ~~United States Environmental Protection Agency, Washington, D.C.,~~ Control of Volatile Organic Compound Leaks from Gasoline Tank Trucks and Vapor Collection Systems, EPA-450/2-78-051 Appendix A and Appendix B (December 1978).

3) Measurement of Volatile Organic Compounds, EPA-450/2-78-041 (October 1978).

4) Control of Volatile Organic Emissions from Manufacture of Synthesized Pharmaceutical Products, EPA-450/2-78-029 (December 1978).

~~f~~e) ~~Standards~~ Standard Industrial Classification Manual, published by Executive Office of the President, Office of Management and Budget, Washington, D.C.,

1972.

gf) 40 CFR 60 (1989).

h) United States Environmental Protection Agency, Washington D.C., EPA-450/2-78-041 .

ig) Elsevier Scientific Publishing Co., New York, "The Vapor Pressure of Pure Substances" (1973), Boublik, T., V. Fried and E. Hala.

jh) McGraw-Hill Book Company, "Perry's Chemical Engineer's Handbook" (1984).

ki) Chemical Rubber Publishing Company, "CRC Handbook of Chemistry and Physics" (1968-87).

lj) McGraw-Hill Book Company, "Lange's Handbook of Chemistry" (1985) John A. Dean, editor.

m) United States Environmental Protection Agency, Washington D.C., "Control of Volatile Organic Emissions from Manufacture of Synthesized Pharmaceutical Products", (EPA-450/2-78-029).

BOARD NOTE: The incorporations by reference listed in this Section contain no later amendments or editions.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.106 Afterburners

The operation of any oil firedoil-fired or natural gas firedgas-fired after-burner and capture system used to comply with this Part of any section thereof is not required during the period ofbetween November 1 of any year to and April 1 of the following year provided thatif:

a) The operation of such the devices is not required for purposes of occupational safety or health, or for the control of toxic substances, odor nuisances, or other regulated pollutants; and

b) Such The devices are operated for the duration of any period for which an ozone advisory, alert. or emergency has been declared pursuant tounder 35 Ill. Adm. Code 244.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.107 Determination of Applicability

a) In determining the applicability of regulations in this Part which are qualified by "when averaged over the preceding three calendar years", the "preceding three calendar years" ~~shall mean~~means:

1) The three years preceding the date by which compliance is required for ~~purposes of~~ determining initial applicability to existing sources;

2) Any consecutive ~~three year~~three-year period for ~~purposes of~~ determining applicability to sources not previously subject to the regulation on the date by which compliance is required.

b) Sources to which the regulation has been applicable at any time ~~shall~~ must continue to be subject to the applicable limitations even if operations change so as to result in an average ~~which is~~ below that which initially made the regulation applicable to those sources' operations.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.108 Measurement of Vapor Pressures

a) Vapor Pressure of Volatile Organic Liquids

1) If the volatile organic liquid consists of only a single compound, the vapor pressure ~~shall~~ must be determined by ASTM Method D 2879-86, or the vapor pressure may be obtained from a published source such as "The Vapor Pressure of Pure Substances," "Perry's Chemical Engineer's Handbook," "CRC Handbook of Chemistry and Physics," or "Lange's Handbook of Chemistry," each source incorporated by reference at Section 215.105.

2) If the volatile organic liquid is a mixture, the vapor pressure ~~shall~~ must be determined by ASTM Method D 2879-86 or by the ~~following~~ equation:

$$P_{vol} = \sum_{i=1}^{n} P_i X_i$$

where:

P_{vol} = Total vapor pressure of the mixture.

n = Number of components in the mixture.

i = Subscript denoting an individual component.

P_i = Vapor pressure of a component determined in ~~accordance~~ compliance with subsection (a)(1).

X_i = Mole fraction of the component in the total mixture.

b) Vapor Pressure of Organic Material or Solvent

1) If the organic material or solvent consists of only a single compound, the vapor pressure ~~shall~~ must be determined by ASTM Method D2879-86, or the vapor pressure may be obtained from a published source such as "The Vapor Pressure of Pure Substances," "Perry's Chemical Engineer's Handbook," "CRC Handbook of Chemistry and Physics," or "Lange's Handbook of Chemistry," each source incorporated by reference at Section 215.105.

2) If the organic material or solvent is a mixture ~~made up~~ of both organic material compounds and compounds which are not organic material, the vapor pressure ~~shall~~ must be determined by the ~~following~~ equation:

$$P_{om} = \frac{\sum_{i=1}^{n} P_i X_i}{\sum_{i=1}^{n} X_i}$$

where:

P_{om} = Total vapor pressure of the portion of the mixture which is composed of organic material.

n = Number of organic material components in the mixture.

i = Subscript denoting an individual component.

P_i = Vapor pressure of an organic material component determined in ~~accordance~~ compliance with subsection (b)(1).

X_i = Mole fraction of the organic material component of the total mixture.

3) If the organic material or solvent is a mixture made up of only organic material compounds, the vapor pressure ~~shall~~ must be determined by ASTM Method D2879-86 or by the ~~above~~ equation in subsection (b)(2).

c) Vapor Pressure of Volatile Organic Material

1) If the volatile organic material consists of only a single compound, the vapor pressure ~~shall~~ must be determined by ASTM Method D2879-86, or the vapor pressure may be obtained from a published source such as "The Vapor Pressure of Pure Substances," "Perry's Chemical Engineer's Handbook," "CRC Handbook of Chemistry and Physics," or "Lange's Handbook of Chemistry," each source incorporated by reference at Section 215.105.

(2) If the volatile organic material is a mixture made up of both volatile organic material compounds and compounds which are not volatile organic material, the vapor pressure ~~shall~~ must be determined by the ~~following~~ equation:

$$P_{vom} = \frac{\sum_{i=1}^{n} P_i X_i}{\sum_{i=1}^{n} X_i}$$

where:

P_{vom} = Total vapor pressure of the portion of the mixture which is composed of volatile organic material.

n = Number of volatile organic material components in the mixture.

i = Subscript denoting an individual component.

P_i = Vapor pressure of a volatile organic material component determined in ~~accordance~~ compliance with subsection (c)(1).

X_i = Mole fraction of the volatile organic material component of the total mixture.

3) If the volatile organic material is a mixture made up of only volatile organic material compounds, the vapor pressure ~~shall~~ must be determined by ASTM D2879-86 or by the ~~above~~ equation in subsection (c)(2).

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.109 Monitoring for Negligibly-Reactive Compounds

~~Any~~ Notwithstanding any provision of 35 Ill. Adm. Code 211 ~~notwithstanding~~, the Agency may require an owner or operator to submit, for any ~~of the compounds~~compound listed at 35 Ill. Adm. Code 211.7150 as exempted from the definition of "volatile organic material", monitoring or

testing methods and results ~~for any of the compounds listed at 35 Ill. Adm. Code 211.7150 as exempted from the definition of "volatile organic material"~~ demonstrating the amount of exempted compounds in the source's emissions, as a precondition to ~~such~~ the exemption, where direct quantification of volatile organic material emissions is not possible due to any of the following circumstances which make it necessary to quantify the emissions of exempt ~~compound emissions in order~~compounds to quantify volatile organic material emissions:

a) VOMs and exempted compounds are mixed together in the same emissions;

b) There ~~are~~ is a large number of exempted compounds in the same emissions; or

c) The chemical composition of the exempted compounds in the emissions is not known.

~~Board Note~~BOARD NOTE: Derived from the USEPA "Recommended Policy on the Control of Volatile Organic Compounds", as amended at 56 Fed. Reg. 11418, March 18, 1991, and subsequently codified as 40 CFR 51.100(s), as added at 57 Fed. Reg. 3941 (Feb. 3, 1992). See also 35 Ill. Adm. Code 211.7150 for the ~~basic~~ definition of "volatile organic material." USEPA is not bound by any state determination as to monitoring. 40 CFR 51.100(s)(4).

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART B: ORGANIC EMISSIONS FROM STORAGE AND LOADING OPERATIONS

Section 215.121 Storage Containers

~~No~~ A person ~~shall~~ must not cause or allow the storage of any volatile organic liquid with a vapor pressure of 17.24 kPa (2.5 psia) or greater at 294.3 K ~~(70º F)~~(70 ºF) or any gaseous organic material in any stationary tank, reservoir, or other container of more than 151 cubic meters (40,000 gal) capacity unless ~~such~~ the tank, reservoir, or other container:

a) Is a pressure tank capable of withstanding the vapor pressure of ~~such~~ the liquid or the pressure of the gas, so as to prevent vapor or gas loss to the atmosphere at all times; or,

b) Is designed and equipped with one of the following vapor loss control devices:

1) A floating roof which rests on the surface of the volatile organic liquid and is equipped with a closure seal or seals between the roof edge and the tank wall. ~~Such~~ The floating roof ~~shall~~ must not be permitted if the volatile organic liquid has a vapor pressure of 86.19 kPa (12.5 psia) or greater at 294.3 K ~~(70º F)~~(70 ºF). ~~No~~ A person ~~shall~~ must not cause or allow the emission of air contaminants into the atmosphere from any gauging or sampling devices attached to ~~such~~ the tanks, except during sampling or maintenance operations.

2) A vapor recovery system consisting of:

A) A vapor gathering system capable of collecting 85% or more of the uncontrolled volatile organic material that would be otherwise emitted to the atmosphere; and,

B) A vapor disposal system capable of processing ~~such~~ the volatile organic material so as to prevent its emission to the atmosphere. ~~No~~ A person ~~shall~~ must not cause or allow the emission of air contaminants into the atmosphere from any gauging or sampling devices attached to ~~such~~ the tank, reservoir, or other container except during sampling.

3) Other equipment or means of equal efficiency approved by the Agency ~~according to the provisions of~~under 35 Ill. Adm. Code 201.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.122 Loading Operations

a) ~~No~~ A person ~~shall~~ must not cause or allow the discharge of more than 3.6 kg/hr (8 lbs/hr) of organic material into the atmosphere during the loading of any organic material from the aggregate loading pipes of any loading facility having through-put of greater than 151 cubic meters per day (40,000 gal/day) into any railroad tank car, tank truck, or trailer unless ~~such~~ the loading facility is equipped with submerged loading pipes, submerged fill, or a device that is equally effective in controlling emissions and is approved by the Agency ~~according to the provisions of~~under 35 Ill. Adm. Code 201.

b) ~~No~~ A person ~~shall~~ must not cause or allow the loading of any organic material into any stationary tank having a storage capacity ~~of~~ greater than 946 1 (250 gal), unless ~~such~~ the tank is equipped with a permanent submerged loading pipe, submerged fill, or an equivalent device approved by the ~~Agency according to the provisions of~~under 35 Ill. Adm. Code 201 or unless ~~such~~ the tank is a pressure tank ~~as described in~~under Section 215.121(a) or is fitted with a recovery system ~~as described in~~under Section 215.121(b)(2).

c) ~~Exception:~~ If no odor nuisance exists, the limitations of this Section ~~shall~~ only apply to the loading of volatile organic liquid with a vapor pressure of 17.24 kPa (2.5 psia) or greater at 294.3 K ~~(70° F)~~(70 ºF).

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.123 Petroleum Liquid Storage Tanks

a) The requirements of subsection (b) ~~below shall~~must not apply to any stationary storage tank:

1) Equipped before January 1, 1979, with one of the vapor loss control devices ~~specified in~~under Section 215.121(b) ~~of this Part~~, except Section 215.121(b)(1) ~~of this Part~~;

2) With a capacity of less than 151.42 cubic meters;

3) With a capacity of less than 1,600 cubic meters (422,400 gallons) and used to store produced crude oil and condensate ~~prior to~~before custody transfer;

4) With a capacity of less than 1,430 cubic meters (378,000 gallons) and used to store produced oil or condensate in crude oil gathering;

5) Subject to new source performance standards for storage vessels of petroleum liquid, 40 CFR 60, incorporated by reference in Section 215.105 of this Part. *The provisions of Section 111 of the federal Clean Air Act . . . relating to standards of performance for new stationary sources . . . are applicable in this State and are enforceable under ~~[The Environmental Protection Act]~~* the Environmental Protection Act. ~~(Ill. Rev. Stat., ch. 111 1/2, par. 1009.1(b))~~[415 ILCS 5/9.1(b)].

6) In which volatile petroleum liquid is not stored; or

7) Which is a pressure tank ~~as described in~~under Section 215.121(a) ~~of this Part~~.

b) Subject to subsection (a), ~~above no~~an owner or operator of a stationary storage tank ~~shall~~ must not cause or allow the storage of any volatile petroleum liquid in the tank unless:

1) The tank is equipped with one of the vapor loss control devices ~~specified in~~under Section 215.121(b) ~~of this Part~~;

2) There are no visible holes, tears, or other defects in the seal or any seal fabric or material of any floating roof;

3) All openings of any floating roof deck~~,~~ except stub drains~~,~~ are equipped with covers, lids, or seals such that:

A) The cover, lid, or seal is in the closed position at all times except when petroleum liquid is transferred to or from the tank;

B) Automatic bleeder vents are closed at all times except when the roof is floated off or landed on the roof leg supports; and

C) Rim vents, if provided, are set to open when the roof is being floated off the roof leg supports or at the manufacturer's recommended setting;

4) Routine inspections of floating roof seals are conducted through roof hatches once every six months;

5) A complete inspection of the cover and seal of any floating roof tank is made whenever the tank is emptied for reasons other than the transfer of petroleum liquid during the normal operation of the tank, or whenever repairs are made as a result of any semi-annual inspection or incidence of roof damage or defect; and

6) A record of the results of each inspection conducted under subsection (b)(4) or (b)(5) ~~above~~ is maintained.

c) Owners and operators of petroleum liquid storage tanks were required to have compliance schedules ~~as summarized in~~under Appendix C ~~of this Part~~.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.124 External Floating Roofs

a) In addition to meeting the requirements of Section 215.123(b), ~~no~~ an owner or operator of a stationary storage tank equipped with an external floating roof ~~shall~~ must not cause or allow the storage of any volatile petroleum liquid in the tank unless:

1) The tank has been fitted with a continuous secondary seal extending from the floating roof to the tank wall (rim mounted secondary seal) or any other device which controls volatile organic material emissions with an effectiveness equal to or greater than a ~~rimmounted~~ rim-mounted secondary seal;

2) Each seal closure device meets the following requirements:

A) The seal is intact and uniformly in place around the circumference of the floating roof between the floating roof and tank wall; and

B) The accumulated area of gaps exceeding 0.32 centimeter (1/8 inch) in width between the secondary seal and the tank wall ~~shall~~ must not exceed 21.2 square centimeters per meter of tank diameter (1.0 square inches per foot of tank diameter).

3) Emergency roof drains are provided with slotted membrane fabric covers or equivalent covers across at least 90 percent of the area of the opening;

4) Openings are equipped with projections into the tank which remain below the liquid surface at all times;

5) Inspections are conducted ~~prior to~~before May 1 of each year to ~~insure~~ ensure compliance with subsection (a);

6) The secondary seal gap is measured ~~prior to~~before May 1 of each year;

7) Records of the types of volatile petroleum liquid stored, the maximum true vapor pressure of the liquid as stored, the results of the inspections, and the results of the secondary seal gap measurements are maintained and available to the Agency~~, upon~~ after verbal or written request~~,~~ at any reasonable time for a minimum of two years after the date on which the record was made.

b) Subsection (a) does not apply to any stationary storage tank equipped with an external floating roof:

1) Exempted under Section 215.123(a)(2) through 215.123(a)(6);

2) Of welded construction equipped with a metallic-type shoe seal having a secondary seal from the top of the shoe seal to the tank wall (shoe-mounted secondary seal);

3) Of welded construction equipped with a metallic-type shoe seal, a liquid-mounted foam seal, or a liquid-mounted liquid-filled-type seal, or other closure device of equivalent control efficiency approved by the Agency in which a petroleum liquid with a true vapor pressure less than 27.6 kPa (4.0 psia) at 294.3 K ~~(70º F)~~(70 ºF) is stored; or

4) Used to store crude oil.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.125 Compliance Dates and Geographical Areas

a) Except as otherwise stated in subsection (b), every owner or operator of an emission source subject to Sections 215.123 or 215.124 ~~shall~~ must comply with its standards and limitations by December 31, 1983.

b) If an emission source is not located in one of the counties listed below and is also not located in any county contiguous ~~thereto~~to one of them, the owner or operator

of the emission source ~~shall~~ must comply with ~~the requirements of~~ Sections 215.123 and 215.124 no later than December 31, 1987:

Cook	Macoupin
DuPage	Madison
Kane	Monroe
Lake	Saint Clair

(BOARD NOTE: These counties are proposed to be designated as nonattainment by the United States Environmental Protection Agency at 47 Fed. Reg. 31588, July 21, 1982).

c) Notwithstanding subsection (b), if any county is designated as nonattainment by the United States Environmental Protection Agency ~~(USEPA)~~ at any time ~~subsequent to the effective date of this Section~~after January 21, 1983, the owner or operator of an emission source located in that county or any county contiguous to that county who would otherwise be subject to the compliance date in subsection (b) ~~shall~~ musr comply with the requirements of Sections 215.123 and 215.124 within one year ~~from~~ after the date of redesignation but in no case later than December 31, 1987.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.126 Compliance Plan

a) The owner or operator of an emission source subject to Section 215.125(a) ~~shall~~ must submit to the Agency a compliance plan ~~as required by~~under 35 Ill. Adm. Code 201.241, including a project completion schedule where applicable, no later than April 21, 1983.

b) The owner or operator of an emission source subject to Section 215.125(b) ~~shall~~ must submit to the Agency a compliance plan, including a project completion schedule where applicable, no later than December 31, 1986.

c) The owner or operator of an emission source subject to Section 215.125(c) ~~shall~~ must submit a compliance plan~~,~~ including a project completion schedule within 90 days after the date of redesignation, but in no case later than December 31, 1986.

d) Unless the submitted compliance plan or schedule is disapproved by the Agency, the owner or operator of a facility or emission source subject to ~~the rules specified in~~ subsections (a), (b), or (c) may operate the emission source according to the plan and schedule as submitted.

e) The plan and schedule ~~shall~~ must meet the requirements of 35 Ill. Adm. Code 201.241 including specific interim dates ~~as required in~~under 35 Ill. Adm. Code 201.242.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.127 Emissions Testing

a) Any tests of organic material emissions, including tests conducted to determine control equipment efficiency, ~~shall~~ must be conducted in ~~accordance~~ compliance with the methods and procedures ~~specified~~ in Section 215.102.

b) ~~Upon~~ After a reasonable request by the Agency, the owner or operator of an organic material emission source required to comply with this Subpart ~~shall~~ must conduct emissions testing~~,~~ at ~~such person's~~its own expense~~,~~ to demonstrate compliance.

c) A person planning to conduct an organic material emission test to demonstrate compliance with this Subpart ~~shall~~ must notify the Agency of that intent not less than 30 days before the planned initiation of the ~~tests~~ test so the Agency may observe the test.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.128 Measurement of Seal Gaps

a) Any measurements of secondary seal gaps ~~shall~~ must be conducted in ~~accordance~~ compliance with the methods and procedures ~~specified~~ in 40 CFR 60, Subpart Kb, incorporated by reference in Section 215.105.

b) A person planning to ~~conduct a measurement of~~measure seal gaps to demonstrate compliance with this Subpart ~~shall~~ must notify the Agency of that intent not less than 30 days before the planned performance of the ~~tests~~ measurement so the Agency may observe the ~~test~~measurement.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART C: ORGANIC EMISSIONS FROM MISCELLANEOUS EQUIPMENT

Section 215.141 Separation Operations

a) ~~No~~ A person ~~shall~~ must not use any single or multiple compartment effluent water separator which receives effluent water containing 757 1/day (200 gal/day) or more of organic material from any equipment processing, refining, treating, storing, or handling organic material unless ~~such~~ the effluent water separator is equipped with air pollution control equipment capable of reducing by 85 percent or more the uncontrolled organic material emitted to the atmosphere. ~~Exception:~~ If no odor nuisance exists, ~~the limitations of this subparagraph shall~~this subsection

does not apply if the vapor pressure of the organic material is below 17.24 kPa (2.5 psia) at 294.3 K ~~(70 F)~~(70 ºF).

b) Subsection (a) ~~shall~~ does not apply to water and crude oil separation in the production of Illinois crude oil~~,~~ if the vapor pressure of ~~such~~ the crude oil is less than 34.5 kPa (5 psia).

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.142 Pumps and Compressors

~~No~~ A person ~~shall~~ must not cause or allow the discharge of more than 32.8 ml (2 cu in) of volatile organic liquid with vapor pressure of 17.24 kPa (2.5 psia) or greater at 294.3 K ~~(70 F)~~(70 ºF) into the atmosphere from any pump or compressor in any 15 minute period at standard conditions.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.143 Vapor Blowdown

~~No~~ A person ~~shall~~ must not cause or allow the emission of organic material into the atmosphere from any vapor blowdown system or any safety relief valve, except ~~such~~ safety relief valves not capable of causing an excessive release, unless ~~such~~ the emission is controlled:

a) To 10 ppm equivalent methane (molecular weight 16.0) or less; or,

b) By combustion in a smokeless flare; or,

c) By other air pollution control equipment approved by the Agency ~~according to the provisions of~~under 35 Ill. Adm. Code 201.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.144 Safety Relief Valves

Section 215.143 ~~shall~~ must not apply to any set of unregulated safety relief valves capable of causing excessive releases~~, provided~~ if the owner or operator ~~thereof,~~of the set of valves by October 1, 1972, provides the Agency with ~~the following~~:

a) A historical record of each ~~such~~ set ~~(~~or, if such records are unavailable, of similar sets which~~,~~ by virtue of operation under similar circumstances~~,~~ may reasonably be presumed to have the same or greater frequency of excessive releases~~)~~ for a three-year period immediately preceding October 1, 1972, indicating:

1) Dates on which excessive releases occurred from each ~~such~~ set; and,

2) Duration in minutes of each ~~such~~ excessive release; and,

3) Quantities ~~(~~in pounds~~)~~ of mercaptans and/or hydrogen sulfide emitted into the atmosphere during each ~~such~~ excessive release.

b) Proof, using ~~such~~ three-year historical records, that no excessive release is likely to occur from any ~~such~~ set either alone or in combination with ~~such~~ excessive releases from other sets owned or operated by the same person and located within a ten-mile radius from the center point of any ~~such~~ set~~,~~ more frequently than 3 times in any ~~12 month~~12-month period; and,

c) Accurate maintenance records ~~pursuant to the requirements of~~under subsection (a); and,

d) Proof, at three-year intervals, using ~~such~~ three-year historical records, that ~~such~~ the set conforms to ~~the requirements of~~ subsection (c).

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART E: SOLVENT CLEANING

Section 215.181 Solvent Cleaning in General

~~The requirements of~~ Sections 215.182 through 215.184 ~~shall~~ must not apply to sources:

a) ~~To sources whose~~Whose emissions of volatile organic material do not exceed 6.8 kg (15 lbs) in any one day~~, nor~~ or 1.4 kg (3 lbs) in any one hour; or

b) ~~To sources used~~Used exclusively for chemical or physical analysis or determination of product quality and commercial acceptance, ~~provided that~~if:

1) The operation of the sources is not an integral part of the production process;

2) The emissions from the source do not exceed 363 kg (800 lbs) in any calendar month; and,

3) The Agency approves the exemption ~~is approved~~ in writing ~~by the Agency~~.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.182 Cold Cleaning

a) Operating Procedures: ~~No~~ A person ~~shall~~ must not operate a cold cleaning degreaser unless:

1) Waste solvent is stored only in covered containers ~~only~~ and not disposed of in such a manner that more than 20 percent by weight of the waste solvent ~~(by weight)~~ is allowed to evaporate into the atmosphere;

2) The cover of the degreaser is closed when it is not handling parts ~~are not being handled~~; and

3) Parts are drained until dripping ceases.

b) Equipment Requirements: ~~No~~ A person ~~shall~~ must not operate a cold cleaning degreaser unless:

1) The degreaser is equipped with a cover which is closed whenever parts are not being handled in the cleaner. The cover ~~shall~~ must be designed to be easily operated with one hand or with the mechanical assistance of springs, counterweights, or a powered system if:

A) The solvent vapor pressure is greater than 2 kPa (15 mmHg or 0.3 psi) measured at ~~38° C (100° F)~~38 °C (100 °F);

B) The solvent is agitated; or

C) The solvent is heated above ambient room temperature;

2) The degreaser is equipped with a facility for draining cleaned parts. The drainage facility ~~shall~~ must be constructed so that parts are enclosed under the cover while draining unless:

A) The solvent vapor pressure is less than 4.3 kPa (32 mmHg or 0.6 psi) measured at 38 °C (100 °F)~~38° C (100° F)~~; or

B) An internal drainage facility cannot be fitted into the cleaning system, in which case the drainage facility may be external.

3) The degreaser is equipped with one of the following control devices if the vapor pressure of the solvent is greater than 4.3 kPa (32 mmHg or 0.6 psi) measured at ~~38 C (100 1/4 F)~~(38 °C (100 ¼ °F) or if the solvent is heated above ~~50° C (120° F)~~50 °C (120 °F) or its boiling point:

A) A freeboard height of 7/10 of the inside width of the tank or 91 cm (36 in), whichever is less; or

B) Any other equipment or system of equivalent emission control as approved by the Agency. ~~Such a~~The system may include a water cover, refrigerated chiller, or carbon adsorber.

4) A permanent conspicuous label summarizing the operating procedure is affixed to the degreaser; and

5) If a solvent spray is used, the degreaser is equipped with a solid fluid stream spray, rather than a fine, atomized, or shower spray.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.183 Open Top Vapor Degreasing

a) Operating Requirements: ~~No~~ A person ~~shall~~ must not operate an open top vapor degreaser unless:

1) The cover of the degreaser is closed when workloads are not being processed through the degreaser;

2) Solvent carryout emissions are minimized by:

A) Racking parts to allow complete drainage;

B) Moving parts in and out of the degreaser at less than 3.3 m/min (11 ft/min);

C) Holding the parts in the vapor zone until condensation ceases;

D) Tipping out any pools of solvent on the cleaned parts before removal from the vapor zone; and,

E) Allowing parts to dry within the degreaser until visually dry.

3) Porous or absorbent materials, such as cloth, leather, wood, or rope are not degreased;

4) Less than half of the degreaser's open top area is occupied with a workload;

5) The degreaser is not loaded to the point where the vapor level would drop more than 10 cm (4 in) when the workload is removed from the vapor zone;

6) Spraying is done below the vapor level only;

7) Solvent leaks are repaired immediately;

8) Waste solvent is stored only in covered containers ~~only~~ and not disposed of in such a manner that more than 20% by weight of the waste solvent ~~(by weight)~~ is allowed to evaporate into the atmosphere;

9) Water is not visually detectable in solvent exiting from the water separator; and

10) Exhaust ventilation exceeding 20 cubic meters per minute per square meter (65 cubic feet per minute per square foot) of degreaser open area is not used, unless necessary to meet the requirements of the Occupational Safety and Health Act (29 ~~U.S.C. Section~~USC 651 et seq.)

b) Equipment Requirements: ~~No~~ A person ~~shall~~ must not operate an open top vapor degreaser unless:

1) The degreaser is equipped with a cover designed to open and close easily without disturbing the vapor zone;

2) The degreaser is equipped with the following switches:

A) A device which shuts off the sump heat source if the amount of condenser coolant is not sufficient to maintain the designed vapor level; and

B) A device which shuts off the spray pump if the vapor level drops more than 10 cm (4 in) below the bottom condenser coil; and

C) A device which shuts off the sump heat source when the vapor level exceeds the design level.

3) A permanent conspicuous label summarizing the operating procedure is affixed to the degreaser;

4) The degreaser is equipped with one of the following devices:

A) A freeboard height of 3/4 of the inside width of the degreaser tank or 91 cm (36 in), whichever is less; and if the degreaser opening is greater than 1 square meter (10.8 square feet), a powered or mechanically assisted cover; or

B) Any other equipment or system of equivalent emission control ~~as~~ approved by the Agency. ~~Such~~ This equipment or system may include a refrigerated chiller, an enclosed design, or a carbon adsorption system.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.184 Conveyorized Degreasing

a) Operating Requirements: ~~No~~ A person ~~shall~~ must not operate a conveyorized degreaser unless:

1) Exhaust ventilation exceeding 20 cubic meters per minute per square meter (65 cubic feet per minute per square foot) of area of loading and unloading opening is not used, unless necessary to meet the requirements of the Occupational Safety and Health Act (29 ~~U.S.C. Section~~USC 651 et seq.)

2) Solvent carryout emissions are minimized by:

A) Racking parts for best drainage; and

B) Maintaining the vertical conveyor speed at less than 3.3 m/min (11 ft/min);

3) Waste solvent is stored only in covered containers ~~only~~ and not disposed of in such a manner that more than 20% by weight of the waste solvent ~~(by weight)~~ is allowed to evaporate into the atmosphere;

4) Solvent leaks are repaired immediately;

5) Water is not visually detectable in solvent exiting from the water separator; and

6) Downtime covers are placed over entrances and exits of conveyorized degreasers immediately after the conveyors and exhausts are shut down and not removed until just before startup.

b) Equipment Requirements: ~~No~~ A person ~~shall~~ must not operate a conveyorized degreaser unless:

1) The degreaser is equipped with a drying tunnel, rotating (tumbling) basket, or other equipment sufficient to prevent cleaned parts from carrying out solvent liquid or vapor;

2) The degreaser is equipped with the following switches:

A) A device which shuts off the sump heat source if the amount of condenser coolant is not sufficient to maintain the designed vapor level;

B) A device which shuts off the spray pump or the conveyor if the vapor level drops more than 10 cm (4 in) below the bottom condenser coil; and

C) A device which shuts off the sump heat source when the vapor level exceeds the design level;

3) The degreaser is equipped with openings for entrances and exits that silhouette workloads so that the average clearance between the parts and the edge of the degreaser opening is less than 10 cm (4 in) or less than 10 percent of the width of the opening;

4) The degreaser is equipped with downtime covers for closing ~~off~~ entrances and exits when the degreaser is shut down; and

5) The degreaser is equipped with one of the following control devices, if the air/vapor interface is larger than 2.0 square meters (21.6 square feet):

A) A carbon adsorption system with ventilation greater than or equal to 15 cubic meters per minute per square meter (50 cubic feet per minute per square foot) of air/vapor area ~~(~~when downtime covers are open and exhausting less than 25 ppm of solvent by volume averaged over a complete adsorption cycle; or

B) Any other equipment or system of equivalent emission control ~~as~~ approved by the Agency. ~~Such~~ This equipment or system may include a refrigerated chiller.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART E: SOLVENT CLEANING

Section 215.185 Compliance Plan (Repealed)

~~a) Solvent cleaning and degreasing were subject to certain compliance dates which are summarized in Appendix C. Compliance programs were required under 35 Ill. Adm. Code 201, Subpart H.~~

~~b) Cold cleaning degreasers were not required to submit a compliance plan or project completion schedule under 35 Ill. Adm. Code 201, Subpart H.~~

(Source: Repealed at 48 Ill. Reg._____, effective_____)

SUBPART F: COATING OPERATIONS

Section 215.202 Compliance Schedules (Repealed)

~~Owners or operators of coating lines were required to take certain actions to achieve compliance which are set forth in Appendix C.~~

(Source: Repealed at 48 Ill. Reg._____, effective_____)

Section 215.204 Emission Limitations for Manufacturing Plants

~~No~~ An owner or operator of a coating line ~~shall~~ must not cause or allow the emission of volatile organic material to exceed the following limitations on coating materials, excluding water and any compounds which are specifically exempted from the definition of volatile organic material ~~pursuant to~~under this Part, delivered to the coating applicator:

a) Automobile or Light Duty Truck Manufacturing Plants

1)	In Boone County	kg/l	lb/gal
	Prime coat	0.14	(1.2)
	Prime surfacer coat	0.34	(2.8)
	Top coat	0.34	(2.8)

~~(~~BOARD NOTE: The top coat limitation ~~shall~~ does not apply if by December 31, 1984, a limitation of 0.43 kg/1 (3.6 lb/gal) is achieved and the top coat is applied with a transfer efficiency of not less than 55 percent and by December 31, 1986, the top coat is applied with a transfer efficiency of not less than 65 percent~~).~~

	Final repair coat	0.58	(4.8)
2)	In the remaining counties	kg/l	lb/gal
	Prime coat	0.14	(1.2)
	Prime surfacer coat	0.34	(2.8)
	Top coat	0.34	(2.8)
	Final repair coat	0.58	(4.8)

b)	Can Coating	kg/l	lb/gal
1)	Sheet basecoat and ~~Overvarnish~~overvarnish	0.34	(2.8)
2)	Exterior basecoat and overvarnish	0.34	(2.8)
3)	Interior body spray coat	0.51	(4.2)
4)	Exterior end coat	0.51	(4.2)
5)	Side seam spray coat	0.66	(5.5)

	6)	End sealing compound coat	0.44	(3.7)
c)	Paper Coating		kg/l	lb/gal
	1)	All paper coating except as provided in subsection (c)(2)	0.35	(2.9)
	2)	Specialty High Gloss Catalyzed Coating	0.42	(3.5)

~~(~~BOARD NOTE: These limitations ~~shall~~ do not apply to equipment used for both printing and paper coating~~)~~.

d)	Coil Coating	0.31	(2.6)
e)	Fabric Coating	0.35	(2.9)
f)	Vinyl Coating	0.45	(3.8)
g)	Metal Furniture Coating	0.36	(3.0)
h)	Large Appliance Coating	0.34	(2.8)

~~(~~BOARD NOTE: The limitation ~~shall~~ does not apply to the use of quick-drying lacquers for repair of scratches and nicks that occur during assembly~~, provided that~~ if the volume of coating does not exceed 0.95 liters (1 quart) in any one eight-hour period~~)~~.

		Kg/l	lb/gal
i)	Magnet Wire Coating	0.20	(1.7)
j)	Miscellaneous Metal Parts and Products Coating		
	1) Clear coating	0.52	(4.3)
	2) Air dried coating	0.42	(3.5)
	3) Extreme performance coating	0.42	(3.5)
	4) Power driven fastener coating		
	A) Nail Coating	Refer to limits in (j) (1), (2), (3), and (5)	

	B)	Staple, brad, and finish nail unit fabrication bonding coating	0.64	(5.3)
	C)	Staple, brad, and finish nail incremental fabrication lubricity coating	0.64	(5.3)
	D)	Staple, brad, and finish nail incremental fabrication withdrawal resistance coating	0.60	(5.0)
	E)	Staple, brad, and finish nail unit fabrication coating	0.64	(5.3)
5)	All other coatings		0.36	(3.0)

(BOARD NOTE: The least restrictive limitation shall applyapplies if more than one limitation pertains to a specific coating).

k)	Heavy Off-highway Vehicle Products	kg/l	lb/gal
1)	In Macoupin County		
	Extreme performance prime coat	0.42	(3.5)
	Extreme performance top coat-air dried	0.42	(3.5)
	Final repair coat-air dried	0.42	(3.5)
	High-temperature aluminum coating used at existing diesel-electric locomotive manufacturing plants	0.72	(6.0)
2)	In the remaining counties		
	Extreme performance prime coat	0.42	(3.5)
	Extreme performance top coat-air dried	0.52	(4.3)
	Final repair coat- air dried	0.58	(4.8)

l)	Wood Furniture Coating	kg/l	lb/gal
1)	Clear topcoat	0.67	(5.6)
2)	Opaque stain	0.56	(4.7)
3)	Pigmented coat	0.60	(5.0)
4)	Repair coat	0.67	(5.6)
5)	Sealer	0.67	(5.6)

6)	Semi-transparent stain	0.79	(6.6)
7)	Wash coat	0.73	(6.1)

~~(~~BOARD NOTE: The repair coat has overall transfer efficiency of 30 percent; all others have ~~an~~ overall transfer efficiency of 65 percent.~~)~~

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.205 Alternative Emission Limitations

Owners or operators of coating lines subject to Section 215.204 may comply with this Section~~,~~ rather than ~~with~~ Section 215.204. The methods or procedures used to determine emissions of organic material under this Section ~~shall~~ must be approved by the Agency. Emissions of volatile organic material from emission units subject to Section 215.204~~,~~ are allowable, notwithstanding the limitations in Section 215.204, if:

a) For ~~those~~ emission units subject to Section 215.204(b), the emissions are controlled by an afterburner system which provides:

1) 75% reduction in the overall emissions of volatile organic material from the coating line, and

2) Oxidation to carbon dioxide and water of 90% of the nonmethane volatile organic material (measured as total combustible carbon) which enters the afterburner.

b) For all other emission units subject to Section 215.204, the emissions are controlled by an afterburner system which provides:

1) 81% reduction in the overall emissions of volatile organic material from the coating line, and

2) Oxidation to carbon dioxide and water of 90% of the nonmethane volatile organic material (measured at total combustible carbon) which enters the afterburner.

c) The system used to control ~~such~~ the emissions is demonstrated to have control efficiency equivalent to or greater than that provided under the applicable provision of Section 215.204 or subsection (a) or (b).

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.206 Exemptions from Emission Limitations

a) The limitations of this Subpart ~~shall~~ do not apply to:

1) Coating plants in which emissions of volatile organic material as limited by the operating permit will not exceed 22.7 Mg/year (25 T/year)~~,~~ in the absence of air pollution control equipment; or

2) Coating plants in which the total coating usage does not exceed 9,463 l/yr (2,500 gal/yr); or

3) Sources used exclusively for chemical or physical analysis or determination of product quality and commercial acceptance ~~provided that~~if:

A) The operation of the source is not an integral part of the production process;

B) The emissions from the source do not exceed 363 kg (800 lbs) in any calendar month; and

C) The Agency approves the exemption ~~is approved~~ in writing ~~by the Agency~~.

b) The limitations of this Subpart ~~shall~~ do not apply to touch-up and repair coatings used by a coating source described in Sections 215.204(b), (d), (f), (g), (i), and (j) ~~of this Subpart; provided that~~if the source-wide volume of ~~such~~ those coatings does not exceed 0.95 l (1 quart) per eight-hour period or exceed 209 l/yr (55 gal/yr) for any rolling twelve-month period. Recordkeeping and reporting for touch-up and repair coatings ~~shall~~ must be consistent with subsection (c) ~~of this Section~~.

c) The owner or operator of a coating line or a group of coating lines using touch-up and repair coatings that are exempted from the limitations of Sections 215.204(b), (d), (f), (g), (i), and (j) ~~of this Subpart because of the provisions of~~under subsection (b) ~~of this Section shall~~must:

1) Collect and record the name, identification number, and volume of each touch-up and repair coating, as applied on each coating line, per eight-hour period and per month;

2) Perform calculations on a daily basis~~,~~ and maintain at the source~~,~~ records of ~~such~~ calculations of the combined volume of touch-up and repair coatings used source-wide for each eight-hour period;

3) Perform calculations on a monthly basis~~,~~ and maintain at the source~~,~~ records of ~~such~~ calculations of the combined volume of touch-up and

repair coatings used source-wide for the month and the rolling twelve-month period;

4) Prepare and maintain at the source an annual summary of the information required to be compiled ~~pursuant to~~under subsection (b) ~~of this Section~~ on or before January 31 of the following year;

5) Maintain at the source for a minimum of three years all records required to be kept under this subsection (c) and make ~~such~~ the records available to the Agency upon request; and

6) Notify the Agency in writing if the use of touch-up and repair coatings at the source ever exceeds a volume of 0.95 l (1 quart) per eight-hour period or exceeds 209 l/yr (55 gal/yr) for any rolling twelve-month period within 30 days after any such ~~exceedence~~exceedance. ~~Such~~ This notification shall include a copy of any records of such ~~exceedence~~exceedance.

d) "Touch-up and repair coatings" means, for purposes of this Section, any coating used to cover minor scratches and nicks that occur during manufacturing and assembly processes.

e) Notwithstanding ~~the limitations of~~ Section 215.204(k)(2), the John Deere Harvester-Moline Works of Deere & Company, Moline, Illinois, ~~shall~~ must not cause or permit the emission of volatile organic material from its existing green and yellow ~~flocoating~~ flowcoating operations to exceed a weekly average of 6.2 lb/gal.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.207 Compliance by Aggregation of Emission Units

a) Owners or operators of coating lines subject to Section 215.204 may comply with this Section rather than ~~with~~ Section 215.204. The methods or procedures used to determine emissions of volatile organic material under this Section ~~shall~~ must be approved by the Agency in ~~accordance~~ compliance with 35 Ill. Adm. Code 201. Emissions of volatile organic material ~~form~~ from sources subject to Section 215.204 are allowable, notwithstanding the limitations in Section 215.204, if the combined actual emissions from selected coating lines at the coating plant, but not including coating lines or other emission sources constructed or modified after July 1, 1979, ~~is~~ are less than or equal to the combined allowable emissions ~~as~~ determined by the following equations:

$$E_{ALL} = \sum_{j=1}^{m} \sum_{i=1}^{n} \left(A_i B_i \right)_j$$

$$E_{ACT} = \sum_{j=1}^{m} \sum_{i=1}^{n} \left(C_i B_i \left(1 - D_i \right) \right)_j$$

b) A_i ~~shall~~ must be determined by the ~~following~~ formula:

$$A_i = \frac{R_i}{1 - \frac{R_i}{S_i}}$$

c) As used in subsection (a) and (b), symbols mean the following:

E_{ALL} = the allowable volatile organic material emissions from the coating plant in kg/day (lb/day).

A_i = the allowable emission limit for a coating ~~pursuant to~~under Section 215.204 expressed in kg/1 (lbs/gal) of coating solids.

B_i = the volume of coating solids in 1/day (gal/day) in a coating as delivered to the coating line.

m = the number of coating lines included in the combined emission rate.

n = the number of different coatings delivered to a coating line.

E_{ACT} = the actual volatile organic material emissions from the coating plant in kg/day (lbs/day).

C_i = the weight of volatile organic material per volume of solids in kg/l (lb/gal) for a coating.

D_i = the control efficiency by which emissions of volatile organic material from a coating are reduced through the use of control equipment.

R_i = the applicable volatile organic material emission limit ~~pursuant to~~under Section 215.204~~,~~ for a coating in kg/1 (lb/gal).

S_i = the density of the volatile organic material in a coating in kg/1 (lb/gal).

d) The owner or operator of the coating plant ~~shall~~ must maintain records of the density of the volatile organic material in each coating, the quantity and volatile organic material and solids content of each coating applied, and the line to which coating is applied~~, in such a manner so as~~ to demonstrate continuing compliance with the combined allowable emissions.

e) Except for emission units subject to Section 215.301 or 215.302, credits from emission units at the coating plant that are subject to this Part, other than coating lines, may be given to the extent that emissions are reduced from the allowable emission limits for ~~such~~ emission units ~~contained~~ in either this Part or any existing operating permit, whichever limit is less.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.208 Testing Methods for Volatile Organic Material Content

a) The VOM content of coatings ~~shall~~ must be determined by Method 24, 40 CFR ~~Part~~ 60, Appendix A, incorporated by reference in Section 215.105, except for glues and adhesive coatings, two component reactive coatings forming volatile reaction products, coatings requiring energy other than heat to initiate curing, and coatings requiring high temperature catalysis for curing, ~~providing~~ if the person proposing testing of the material submits to the Agency proof that the Method 24 results would not be representative and proof that a proposed alternative test method gives representative, accurate test results. For printing inks, the volatile organic material content ~~shall~~ must be determined by Method 24A, 40 CFR ~~Part~~ 60, Appendix, A incorporated by reference in Section 215.105. Any alternate test method must be approved by the Agency, which ~~shall~~ must consider data comparing the performance of the proposed alternative to the performance of the approved test ~~method(s)~~method or methods. If the Agency determines that ~~such~~ these data ~~demonstrates~~ demonstrate that the proposed alternative will achieve results equivalent to the approved test ~~method(s)~~method or methods, the Agency ~~shall~~ must approve the proposed alternative.

b) Transfer efficiency ~~shall~~ must be determined by a method, procedure, or standard approved by ~~the~~ USEPA~~,~~ under the applicable new source performance standard or, until ~~such time as~~ USEPA has approved and published such a method, procedure, or standard, by any appropriate method, procedure, or standard approved by the Agency.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.209 Exemption from General Rule on Use of Organic Material

No coating line subject to ~~the limitations of~~ Section 215.204 is required to meet Sections 215.301 or 215.302 after the date by which the coating line is required to meet Section 215.204.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.210 Alternative Compliance Schedule (Repealed)

~~The owner or operator of coating lines subject to Section 215.204(d)(2) may in lieu of compliance with Section 215.211 demonstrate compliance through the use of a low solvent coating technology by taking the following actions:~~

~~a) Submit to the Agency a compliance plan, including a project completion schedule, that meets the requirements of Section 201.241 on or before August 19, 1983; and~~

~~b) Meet the following increments of progress:~~

~~1) Submit to the Agency by July 1, 1984 and every six months thereafter a report describing in detail the progress made in the development, application testing, product quality, customer acceptance and United States Food and Drug Administration or government agency approval of the low solvent coating technology;~~

~~2) Initiate process modifications to allow the use of low solvent coatings as soon as coatings meeting Board requirements become commercially available for production use; and~~

~~3) Achieve final compliance as expeditiously as possible but no later than December 31, 1986.~~

(Source: Repealed at 48 Ill. Reg._____, effective _____)

Section 215.211 Compliance Dates and Geographical Areas

a) Except as otherwise stated in subsection (b), every owner or operator of an emission unit subject to Section 215.204(j), (k), (l), or (m) ~~shall~~ must comply with those subsections ~~in accordance with~~by the following dates:

1) For Section 215.204(j) and (k)(2) ~~Extreme performance prime coat and Final repair coat - air dried~~, by December 31, 1983.

2) For Section 215.204(k)(l) and (m), by December 31, 1987.

3) ~~For Section 215.204(k)(2) Extreme performance top coat - air dried, in accordance with Section 215.210.~~

~~4)~~ For Section 215.204(l), by December 31, 1985.

b) If an emission unit is not located in one of the nonattainment counties or counties contiguous to nonattainment counties listed below, the owner or operator of the emission unit ~~shall~~ must comply with ~~the requirements of~~ Section 215.204(j), (k), or (l) no later than December 31, 1987:

Bond	Madison
Clinton	McHenry
Cook	Monroe
DeKalb	Montgomery
DuPage	Morgan
Franklin	Pope
Greene	Randolph
Jackson	Saline
Jersey	Sangamon
Johnson	St. Clair
Kane	Union
Kendall	Washington
Lake	Will
Macoupin	Williamson

~~(~~BOARD NOTE: Counties are designated as attainment or nonattainment for ozone by the United States Environmental Protection Agency (USEPA). ~~The~~ USEPA noted ~~in its redesignation rulemaking,~~ that it will publish a rulemaking notice on Williamson County's attainment status. ~~(~~45 Fed. Reg. 21949~~,~~ (May 16, 1983~~.~~). ~~Should~~ If Williamson County ~~be~~ is redesignated as attainment ~~prior to~~before October 31, 1985, it and the counties contiguous to it will be considered deleted from the above list.~~)~~

c) Notwithstanding subsection (b), if any county is designated as nonattainment by ~~the~~ USEPA at any time ~~subsequent to~~after the effective date of this rule, the owner or operator of an emission source located in that county or any county contiguous to that county who would otherwise be subject to the compliance date in subsection (b) ~~shall~~ must comply with ~~the requirements of~~ Section 215.204(j), (k) or (l) within one year ~~from~~ after the date of redesignation but in no case later than December 31, 1987.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 215.212 Compliance Plan (Repealed)

~~a) The owner or operator of an emission unit subject to Section 215.211(a) (1) or (3) shall submit to the Agency a compliance plan on or before August 19, 1983.~~

~~b) The owner or operator of an emission unit subject to Section 215.211(a)(4) shall submit to the Agency a compliance plan on or before October 31, 1985.~~

~~c) The owner or operator of an emission unit subject to Section 215.211(b) shall submit to the Agency a compliance plan, no later than December 31, 1986.~~

~~d) The owner or operator of an emission unit subject to Section 215.211(c) shall submit a compliance plan within 90 days after the date of redesignation, but in no case later than December 31, 1986.~~

~~e) The owner or operator of an emission unit subject to Section 215.211(c) shall not be required to submit a compliance plan if redesignation occurs after December 31, 1986.~~

~~f) The plan and schedule shall meet the requirements of 35 Ill. Adm. Code 201.~~

(Source: Repealed at 48 Ill. Reg._____, effective _____)

Section 215.213 Special Requirements for Compliance Plan (Repealed)

~~For sources subject to Sections 215.204 through 215.209, an approvable compliance plan shall include:~~

~~a) A complete description of each coating line which is subject to an emission limitation in Sections 215.204 through 215.209;~~

~~b) Quantification of the allowable emissions from the coating plant determined under Section 215.207 where applicable; and,~~

~~c) A description of the procedures and methods used to determine the emissions of volatile organic material including a method of inventory, record keeping and emission calculation or measurement which will be used to demonstrate compliance with the allowable plant wide emission limitation.~~

(Source: Repealed at 48 Ill. Reg._____, effective _____)

Section 215.214 Roadmaster Emissions Limitations (Repealed)

(Source: Repealed at 22 Ill. Reg. 11427, effective June 19, 1998)

Section 215.215 DMI Emissions Limitations (Repealed)

~~Notwithstanding the limitation of Section 215.204(j)(3), the DMI, Inc., Goodfield, Illinois plant shall not cause or permit the emission of volatile organic material from its existing dip tank and bake oven as part of the paint deck operations, to exceed a daily average of 4.2 lb/gal in the dip top coat application tank, and a 30-day rolling average of 61 lb/day for the dip tank make-up solvent addition; DMI, Inc. shall fulfill all of the following conditions:~~

~~a) DMI, Inc. shall contact at least three (3) paint vendors each year in a continuing search for a compliant coating that it can successfully use in its existing paint deck operations, including any paint vendors suggested by the Agency in a writing delivered to DMI, Inc. by certified mail;~~

~~b) If any vendor provides DMI, Inc. with laboratory test results which demonstrate that DMI, Inc. may be able to use the vendor's paint in its existing paint deck operations as a substitute for the existing paint, DMI, Inc. will conduct production tests of that paint;~~

~~c) DMI, Inc. will submit a report to the Agency by March 1 of each year that includes a summary of its efforts during the preceding calendar year, as those efforts relate to DMI, Inc.'s compliance with the foregoing conditions contained in subsections (a) and (b), above;~~

~~d) If DMI, Inc. locates a compliant paint that it can successfully use in its existing paint deck operations, and the net annual expense of using the compliant paint is not more than ten percent (10%) greater than the then current net annual expense incurred in the existing painting process, DMI, Inc. shall convert its present paint deck operations to the use of that paint within 180 days after the final successful testing of such a paint; and~~

~~e) This Section shall expire within 180 days after final successful testing of a compliant paint in accordance with subsection (d) above, or on January 1, 2000, whichever is earlier, at which time DMI, Inc. shall comply with the provisions that generally apply to VOM emissions.~~

(Source: Repealed at 48 Ill. Reg._____, effective _____)

SUBPART H: SPECIAL LIMITATIONS FOR SOURCES IN MAJOR URBANIZED AREAS WHICH ARE NONATTAINMENT FOR OZONE

Section 215.240 Applicability

Notwithstanding any other limitations or exceptions in this Part ~~215~~, the ~~special~~ requirements of this Subpart ~~shall~~ apply to the affected sources in ~~the following counties;~~ Cook, DuPage, Kane, Lake, Macoupin, Madison, McHenry, Monroe, St. Clair, and Will Counties.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.241 External Floating Roofs

~~The requirements of subsection~~Section 215.124(a) ~~shall~~ does not apply to any stationary storage tank equipped with an external floating roof:

a) Exempted under Section 215.123(a)(2) through (a)(6);

b) Of welded construction equipped with a metallic-type shoe seal having a secondary seal from the top of the shoe seal to the tank wall (shoe-mounted secondary seal);

c) Of welded construction equipped with a metallic type shoe seal, a liquid-mounted foam seal, a liquid-mounted liquid-filled-type seal, or other closure device of equivalent control efficiency approved by the Agency in which a petroleum liquid with a true vapor pressure less than 27.6 kPa (4.0 psia) at 294.3 K ~~(70 F)~~(70 ºF) is stored; or

d) Used to store crude oil with a pour point of ~~50 F~~(50 ºF) or higher as determined by ASTM Standard D97-66, incorporated by reference in Section 215.105.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.245 Flexographic and Rotogravure Printing

a) ~~The limitations of~~ Subpart P ~~shall apply~~applies unless the facility's aggregate uncontrolled rotogravure and/or flexographic printing press emissions of volatile organic material are limited by operating permit conditions to 90.7 Mg (100 tons) per year or less in the absence of air pollution control equipment or whose actual emissions in the absence of air pollution control equipment would be less than or equal to 90.7 Mg (100 tons) per year when averaged over the preceding three calendar years.

b) If an owner or operator of a packaging rotogravure printing press proposes to comply with ~~the limitations of~~ Section 215.401 ~~pursuant to~~under subsection (d) of that Section, then the combined capture and control system must provide an overall reduction in volatile organic material emissions of at least 65 percent.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.249 Compliance Dates

Sources subject to this Subpart H ~~shall~~ must comply with the applicable limitations within one year ~~of~~ after ~~the effective date of the subpart~~June 29, 1987, or by December 31, 1987, whichever is sooner.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART I: ADJUSTED RACT EMISSIONS LIMITATIONS

Section 215.260 Applicability (Repealed)

~~Owners and operators of emission sources subject to Subparts PP, QQ, or RR may petition the Illinois Pollution Control Board for an Adjusted Reasonably Available Control Technology (RACT) Emissions Limitation for such emission sources. Owners and operators of emissions sources which are in existence on the effective date of this Subpart shall submit to the Illinois Pollution Control Board a Notice of Intent to Petition for an Adjusted RACT Emissions~~

~~Limitation within 60 days after the effective date of this Subpart. Petitions for an Adjusted RACT Emissions Limitation shall be filed within 120 days after the effective date of this Subpart or at the time a construction permit is applied for from the Agency for the emission source, or 60 days after the time an emission source meets the applicability criteria set forth in such Subparts. For the purposes of this Subpart, uncontrolled volatile organic material emissions are the emissions of volatile organic material which would result if no air pollution control equipment were used.~~

(Source: Repealed at 48 Ill. Reg._____, effective _____)

Section 215.261 Petition (Repealed)

~~A petition for an Adjusted RACT Emission Limitation shall contain:~~

~~a) A specific proposal of, and support for, an Adjusted RACT Emissions Limitation which would apply to the emission source that is the subject of the petition as well as a showing at a hearing held pursuant to Section 28,1 of the Environmental protection Act (Act) that the application of the applicable limits of Section 215.926(a)(1) and (2), 215.946(a)(1) or 215.966(a)(1) would be technically infeasible or economically unreasonable for that emission source.~~

~~b) Information on the technical feasibility of reducing emissions of volatile organic material from the emission source including, but not limited to:~~

~~1) A complete description of the operations of the emission source.~~

~~2) A discussion of all available compliance strategies for achieving the emissions reduction prescribed by the applicable section and the technical feasibility of each compliance strategy.~~

~~3) Comparisons of the nature and quantity of uncontrolled emissions to:~~

~~A) Emissions reductions which would be achieved pursuant to the applicable Section for each compliance strategy listed in Section 215.261(b)(2); and~~

~~B) Emissions reduction which would be achieved pursuant to the proposed Adjusted RACT Emissions Limitation.~~

~~4) The basis for determining that the proposed method of emissions reduction is RACT for the that emission source and all information supporting that determination.~~

~~c) Information on the economic reasonableness of reducing emissions of volatile organic material from the emission source including, but not limited to:~~

1) A comparison of the relative costs of achieving the emissions reduction pursuant to Section 215.926(a)(9) and (2), 215.946(a)(1) or 215.966(a)(1) and pursuant to the proposed Adjusted RACT Emissions Limitation including for each compliance strategy:

A) Capital costs;

B) Operating costs;

C) Any economic benefits, such as material recovery; and

D) Other costs and benefits.

2) An evaluation of the cost effectiveness in terms of annualized net cost per ton of volatile organic material reduction for each compliance strategy. Volatile organic material reduction is the amount of uncontrolled volatile organic material emissions less the amount of volatile organic material emissions after controls.

3) An evaluation of the effects of the cost of achieving emissions reduction in relation to:

A) The annualized capital and operating budgets of the emission source over the most recent five-year period; and

B) Such other costs and economic information as the petitioner believes may assist the Board in reaching a decision.

4) A discussion of other factors the petitioner may consider relevant such as:

A) Age of facility;

B) Quantity of emissions;

C) Nature of emissions;

D) Severity of existing air quality problems;

E) Extent of controls present;

F) Comparability to standard industry practice in related industries;

G) Cross media impacts; or

H) Potential for operational modifications

~~5) The basis for determining that the proposed method of emissions reduction is RACT for the emission source and all information supporting that determination.~~

(Source: Repealed at 48 Ill. Reg._____, effective _____)

Section 215.263 Public Hearing (Repealed)

~~In a public hearing before the Board noticed and held pursuant to the requirements of Section 28.1 of th Act, the petitioner for an Adjusted RACT Emissions Limitation shall prove:~~

~~a) That the emissions limitation prescribed pursuant to Section 215.926(a)(1) and (2), 215.946(a)(1) or 215.966(a)(1) does not constitute RACT for the specific emission source; and~~

~~b) That compliance with the proposed Adjusted RACT Emissions Limitation:~~

~~1) Is RACT for that emission source based on the information provided in the petition and at the hearing addressing subject described in Sections 215.261 and~~

~~2) Will not cause or contribute to an increase in emissions so as to prevent or interfere with the State's attainment of the air quality standards set forth in 35 Ill. Adm. Code 243.123 and 243.125.~~

(Source: Repealed at 48 Ill. Reg._____, effective _____)

Section 215.264 Board Action (Repealed)

~~The Board shall issue and maintain opinions and orders pursuant to the requirements of Section 28.1 of the Act. In addition, the Board shall publish a list of its determinations in accordance with Section 28.1 of the Act. If an owner or operator of an emission source meets the requirements of Sections 215.261 and 215.263 the Board may establish an Adjusted RACT Emissions Limitation. Such Adjusted RACT Emissions Limitation:~~

~~a) Shall substitute for that limitation otherwise prescribed by Section 215.926(a)(1) and (2), 215.946(a)(1) or 215.966(a)(1) and~~

~~b) Shall require compliance by a date certain as established by the Board for an existing source or prior to the operation of a new emission source.~~

(Source: Repealed at 48 Ill. Reg._____, effective _____)

Section 215.267 Agency Petition (Repealed)

~~The Agency may petition the Board for an Adjusted RACT Emission Limitation for an emission source subject to this Subpart at any time after the effective date of this Subpart. The provisions of Sections 215.261, 215.263, and 215.264 shall apply to such petitions.~~

(Source: Repealed at 48 Ill. Reg._____, effective _____)

SUBPART K: USE OF ORGANIC MATERIAL

Section 215.301 Use of Organic Material

~~No~~ A person ~~shall~~ must not cause or allow the discharge of more than 3.6 kg/hr (8 lbs/hr) of organic material into the atmosphere from any emission source, except as provided in Sections 215.302, 215.303, 215.304, and the following exception: ~~If~~ if no odor nuisance exists, then the limitation of this Subpart ~~shall~~ apply only to photochemically reactive material.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.302 Alternative Standard

Emissions of organic material ~~in excess of~~exceeding those permitted by Section 215.301 are allowable if ~~such~~ the emissions are controlled by one of the following methods:

a) Flame, thermal, or catalytic incineration ~~so as either to reduce such~~reducing the emissions to 10 ppm equivalent methane (molecular weight 16) or less, or ~~to convert~~converting 85 percent of the hydrocarbons to carbon dioxide and water; ~~or,~~

b) A vapor recovery system which adsorbs and/or condenses at least 85 percent of the total uncontrolled organic material that would otherwise be emitted to the atmosphere; or,

c) Any other air pollution control equipment approved by the Agency capable of reducing by 85 percent or more the uncontrolled organic material that would be otherwise emitted to the atmosphere.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.303 Fuel Combustion Emission Sources

~~The provisions of~~ Sections 215.301 and 215.302 ~~shall~~ do not apply to fuel combustion emission sources.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.304 Operations with Compliance Program

~~The provisions of Section~~Sections 215.301 and 215.302 ~~shall~~ do not apply to any owner, operator, user, or manufacturer of paint, varnish, lacquer, coatings, or printing ink whose

compliance program and project completion schedule, as required by 35 Ill. Adm. Code 201, provides for the reduction of organic material used in ~~such~~ that process to 20 percent or less of total volume by May 30, 1975.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.305 Viscose Exemption (Repealed)

(Source: Repealed at 9 Ill. Reg. 13960, effective August 28, 1985)

SUBPART N: VEGETABLE OIL PROCESSING

Section 215.340 Hexane Extraction Soybean Crushing (Repealed)

~~The owner or operator of a hexane extraction soybean crushing source, which would emit volatile organic material in excess of 100 tons per year in the absence of pollution control equipment or enforceable operating permit limitation, shall not cause or allow emissions to exceed:~~

~~a) 0.0026 lbs of volatile organic material per pound of conventional soybean crush, and~~

~~b) 0.0052 lbs of volatile organic material per pound of specialty soybean crush.~~

(Source: Repealed at 48 Ill. Reg._____, effective _____)

Section 215.342 Hexane Extraction Corn Oil Processing (Repealed)

~~The owner or operator of a hexane extraction corn oil source, which would emit volatile organic material in excess of 100 tons per year in the absence of control equipment or enforceable operating permit limitation, shall not cause or allow emissions to exceed more than 2.2 gals of volatile organic material per ton of raw corn germ processed.~~

(Source: Repealed at 48 Ill. Reg._____, effective _____)

Section 215.344 Recordkeeping For Vegetable Oil Processes (Repealed)

~~a) The owner or operator of sources subject to Section 215.340 and 215.342 shall maintain daily records of solvent storage inventory, and conventional and specialty soybean crush or raw corn germ. Each day the total decrease in solvent storage inventory, and total conventional and specialty soybean crush or raw corn germ for the previous 180 days shall be calculated.~~

~~b) The Agency shall have access to records required under this Section upon reasonable notice.~~

(Source: Repealed at 48 Ill. Reg._____, effective _____)

Section 215.345 Compliance Determination (Repealed)

~~a) Each day, the owner or operator of sources subject to Section 215.340 shall calculate the sum of:~~

~~1) total conventional soybean crush for the previous 180 days, in pounds, multiplied by 0.0026, plus~~

~~2) total specialty soybean crush for the previous 180 days, in pounds, multiplied by 0.0052.~~

~~b) Each day, the owner or operator of sources subject to Section 215.342 shall calculate the sum of the total raw corn germ processed for the previous 180 days, in tons multiplied by 2.2.~~

~~c) If such sum is less than the total decrease in solvent storage inventory over the previous 180 days, then the provisions of Section 215.340 or 215.342, whichever is applicable, shall be deemed to have been exceeded.~~

(Source: Repealed at 48 Ill. Reg._____, effective _____)

Section 215.346 Compliance Dates and Geographical Areas (Repealed)

~~a) Except as otherwise stated in subsection (b), every owner or operator of an emission source subject to Sections 215.340 through 215.345 shall comply with the standards and limitations of those Sections by December 31, 1985.~~

~~b) If an emission source is not located in one of the counties listed below, the owner or operator of the emission source shall comply with the requirements of Sections 215.340 through 215.345 no later than December 31, 1987:~~

~~Bond~~
~~Clinton~~
~~Cook~~
~~DeKalb~~
~~DuPage~~
~~Franklin~~
~~Greene~~
~~Jackson~~
~~Jersey~~
~~Johnson~~
~~Kane~~
~~Kendall~~
~~Lake~~
~~Macoupin~~
~~Madison~~
~~McHenry~~
~~Monroe~~
~~Montgomery~~
~~Morgan~~
~~Pope~~
~~Randolph~~
~~Saline~~
~~Sangamon~~
~~St. Clair~~
~~Union~~
~~Washington~~
~~Will~~
~~Williamson~~

~~(BOARD NOTE: The USEPA noted in its redesignation rulemaking, that it will publish a rulemaking notice on Williamson County's attainment status. (45 Fed. Reg. 21949, May 16, 1983) Should Williamson County be re-designated as attainment prior to December 31, 1984, it and the counties contiguous to it will be considered deleted from the above list.)~~

~~c) Notwithstanding subsection (b), if any county is redesignated as nonattainment by the USEPA at any time subsequent to the effective date of this Section, the owner or operator of an emission source located in that county or any county contiguous to that county who would otherwise by subject to the compliance date in subsection (b) shall comply with the requirements of Sections 215.340 through 215.345 within one year from the date of redesignation but in no case later than December 31, 1987.~~

(Source: Repealed at 48 Ill. Reg._____, effective _____)

Section 215.347 Compliance Plan (Repealed)

~~a) The owner or operator of an emission source subject to Section 215.346(a) or (b) shall submit to the Agency a compliance plan, no later than December 31, 1984.~~

~~b) The owner or operator of an emission source subject to Section 215.346(c) shall submit a compliance plan within 90 days after the date of redesignation, but in no case later than December 31, 1986.~~

~~c) The owner or operator of an emission source subject to Section 215.346(c) shall not be required to submit a compliance plan if redesignation occurs after December 31, 1986.~~

~~d) The plan and schedule shall meet the requirements of 35 Ill. Adm. Code 201, Subpart H.~~

(Source: Repealed at 48 Ill. Reg._____, effective _____)

SUBPART P: PRINTING AND PUBLISHING

Section 215.401 Flexographic and Rotogravure Printing

~~No~~ An owner or operator of a packaging rotogravure, publication rotogravure, or flexographic printing press subject to this rule and employing solvent-containing ink ~~may~~ must not cause or allow the operation of such press unless:

a) The volatile fraction of ink as it is applied to the substrate contains 25 percent or less by volume of organic solvent and 75 percent or more by volume of water; or

b) The volatile fraction of an ink as it is applied to the substrate, less water, is 40 percent or less by volume; or

c) The owner or operator installs and operates:

1) A carbon adsorption system which reduces the volatile organic emissions from the capture system by at least 90 percent by weight; or

2) An afterburning system which oxidizes at least 90 percent of the captured nonmethane volatile organic materials ~~(~~measured as total combustible carbon~~)~~ to carbon dioxide and water; or

3) An alternative volatile organic material emission reduction system demonstrated to have at least a 90 percent overall reduction efficiency and approved by the Agency; and

d) A capture system is used in conjunction with any of the emission control systems in subsection (c). The design and operation of the capture system must be consistent with good engineering practice and ~~shall~~ must provide, in combination with the control equipment, an overall reduction in volatile organic material emissions of at least:

1) 75 percent where a publication rotogravure process is employed; or

2) 65 percent or the maximum reduction achievable using good engineering design where a packaging rotogravure process is employed; or

3) 60 percent where a flexographic printing process is employed.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.402 Exemptions

The limitations of this Subpart ~~shall~~ do not apply to any facility whose aggregate uncontrolled rotogravure and/or flexographic printing press emissions of volatile organic material are limited by operating permit conditions to 907 Mg (1000 tons) per year or less in the absence of air pollution control equipment or whose actual emissions in the absence of air pollution control equipment would be less than or equal to 907 Mg (1000 tons) per year when averaged over the preceding three calendar years.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.403 Applicability of Subpart K

Upon achieving compliance with this Subpart, the emission source is not required to ~~meet~~ comply with Subpart K. Emission sources exempted from this Subpart are subject to Subpart K.

~~Roto- gravure~~Rotogravure or flexographic equipment used for both roll printing and paper coating are subject to this Subpart.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.404 Testing and Monitoring (Repealed)

(Source: Repealed at 14 Ill. Reg. 9173, effective May 23, 1990)

Section 215.405 Compliance Dates and Geographical Areas

a) Except as otherwise stated in subsection (b), every owner or operator of an emission source subject to:

1) Section 215.401 ~~shall~~ must comply with its standards and limitations by December 31, 1983; and

2) Section 215.408 ~~shall~~ must comply with its standards and limitations by December 31, 1987.

b) If an emission source subject to Section 215.401 is not located in one of the counties listed below ~~and is also not located~~or in any county contiguous ~~thereto~~to one of them, then the owner or operator of the emission source ~~shall~~ must comply with ~~the requirements of~~ this Subpart no later than December 31, 1987:

Cook	Macoupin
DuPage	Madison
Kane	Monroe
Lake	St. Clair

c) Notwithstanding subsection (b), if any county is designated as nonattainment by ~~the~~ USEPA at any time ~~subsequent to~~after ~~the effective date of this Subpart~~January 21, 1983, the owner or operator of an emission source located in that county or any county contiguous to that county who would otherwise be subject to the compliance date in subsection (b) ~~shall~~ must comply with the requirements of this Subpart within one year from the date of redesignation but in no case later than December 31, 1987.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.406 Alternative Compliance Plan (Repealed)

~~The owner or operator of an emission source subject to this Subpart may in lieu of compliance with Sections 215.405 and 215.407 demonstrate compliance through the use of a low solvent ink program by taking the following actions:~~

~~a) Submit to the Agency a compliance plan, including a compliance completion schedule, by December 31, 1983 which demonstrates:~~

~~1) Substantial emission reductions early in the compliance schedule;~~

~~2) Greater reductions in emissions than would have occurred without a low solvent ink program; and~~

~~3) Final compliance as expeditiously as possible but no later than December 31, 1987; and~~

~~b) Certify to the Agency that:~~

~~1) A low solvent ink compliance strategy is not technically available which would enable the emission source to achieve compliance by the date specified in Section 215.405; and~~

~~2) An unreasonable economic burden would be incurred if the owner or operator were required to demonstrate compliance by the date specified in Section 215.405; and~~

~~c) Agree to install one of the control alternatives specified in Section 215.401(c) by June 31, 1986 if the specified low-solvent ink strategy fails to achieve scheduled reductions by December 31, 1985.~~

(Source: Repealed at 48 Ill. Reg._____, effective _____)

Section 215.407 Compliance Plan (Repealed)

~~a) The owner or operator of an emission source subject to Section 215.405(a)(1) shall submit to the Agency a compliance plan, pursuant to 35 Ill. Adm. Code 201, Subpart H, including a project completion schedule where applicable, no later than April 21, 1983.~~

~~b) The owner or operator of an emission source subject to Section 215.405(b) shall submit to the Agency a compliance plan, including a project completion schedule where applicable, no later than December 31, 1986.~~

~~c) The owner or operator of an emission source subject to Section 215.405(c) shall submit a compliance plan, including a project completion schedule within 90 days after the date of redesignation, but in no case later than December 31, 1986.~~

~~d) Unless the submitted compliance plan or schedule is disapproved by the Agency, the owner or operator of a facility or emission source subject to the rules specified in subsections (a), (b) or (c) may operate the emission source according to the plan and schedule as submitted.~~

~~e) The plan and schedule shall meet the requirements of 35 Ill. Adm. Code 201, Subpart H, including specific interim dates as required in 35 Ill. Adm. Code 201.242.~~

(Source: Repealed at 48 Ill. Reg._____, effective _____)

Section 215.408 Heatset Web Offset Lithographic Printing

a) ~~No~~ An owner or operator of a heatset web offset lithographic printing facility~~,~~ located in Cook, DuPage, Kane, Lake, Macoupin, Madison, McHenry, Monroe, St. Clair, or Will County~~,~~ emitting over 100 tons/year of organic material~~,~~ in the absence of pollution control equipment~~, may~~ must not cause or allow the operation of a heatset web offset press unless:

1) An incinerator system is installed and operated that oxidizes at least 90 percent of the organic materials ~~(~~measured as total combustible carbon~~)~~ in the dryer exhaust airstream to carbon dioxide and water; or

2) The fountain solution contains no more than eight ~~(8)~~ percent~~,~~ by weight~~,~~ of volatile organic material, and a condensation recovery system is installed and operated that removes at least 75 percent of the non-isopropyl alcohol organic materials from the dryer exhaust airstream.

b) ~~No~~ An owner or operator of a heatset web offset lithographic printing facility~~,~~ located in a county other than Cook, DuPage, Kane, Lake, Macoupin, Madison, McHenry, Monroe, St. Clair, or Will County~~,~~ emitting over 100 tons/year of organic material~~,~~ in the absence of pollution control equipment~~,~~ may cause or allow the operation of a heatset web offset press unless the fountain solution contains no more than eight ~~(8)~~ percent~~,~~ by weight~~,~~ of volatile organic material.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.409 Testing Methods for Volatile Organic Material Content

The volatile organic material content of fountain solution and all coatings ~~shall~~ must be determined by Method 24, 40 CFR 60, Appendix A, incorporated by reference in Section 215.105. The volatile organic material content of printing inks ~~shall~~ must be determined by Method 24A, 40 CFR ~~Part~~ 60, Appendix A, incorporated by reference in Section 215.105. Any alternate test method must be approved by the Agency, which ~~shall~~ must consider data comparing the performance of the proposed alternative to the performance of the approved test ~~method(s)~~method or methods. If the Agency determines that ~~such~~ these data ~~demonstrates~~ demonstrate that the proposed alternative will achieve results equivalent to the approved test ~~method(s)~~method or methods, the Agency ~~shall~~ must approve the proposed alternative.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.410 Emissions Testing

a) Any tests of volatile organic material emissions, including tests conducted to determine control equipment efficiency or control device destruction efficiency, ~~shall~~ must be conducted in ~~accordance~~ compliance with the methods and procedures ~~specified~~ in Section 215.102.

b) ~~Upon~~ After a reasonable request by the Agency, the owner or operator of a volatile organic material emission source required to comply with ~~the limits of~~ this Subpart ~~shall~~ must conduct emissions testing~~,~~ at ~~his~~ its own expense~~,~~ to demonstrate compliance.

c) A person planning to conduct a volatile organic material emissions test to demonstrate compliance with this Subpart ~~shall~~ must notify the Agency of that intent not less than 30 days before the planned initiation of the ~~tests~~ test so the Agency may observe the test.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART Q: LEAKS FROM SYNTHETIC ORGANIC CHEMICAL AND POLYMER MANUFACTURING EQUIPMENT

Section 215.420 Applicability

~~The provisions of~~ Sections 215.421 through ~~215.429~~215.428 ~~of this subpart shall~~ apply to all plants in the State of Illinois which manufacture synthetic organic chemicals and polymers, except those located in ~~any of the following counties:~~ Will, McHenry, Cook, DuPage, Lake, Kane, Madison, St. Clair, Macoupin, and Monroe~~. The provisions of Section~~ to which Sections 215.430 through 215.439 ~~shall~~ apply ~~to the counties specifically enumerated above~~. ~~In addition, if~~If any county is redesignated as non-attainment by ~~the~~ USEPA ~~subsequent to~~after December 31, 1987, the owner or operator of a plant located in that county ~~shall~~ must comply with ~~the requirements of~~ Sections 215.430 through 215.439 upon the effective date of the redesignation.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 215.421 General Requirements

a) The owner or operator of a plant which has more than 1,500 components in gas or light liquid service, which components are used to manufacture the synthetic organic chemicals or polymers listed in Appendix D, ~~shall~~ must conduct leak inspection and repair programs in ~~accordance~~ compliance with this Subpart for ~~that~~ a component containing more than 10 percent volatile organic material as determined by ASTM ~~method~~ Methods E-260, E-168, and E-169, incorporated by reference in Section 215.105. The provisions of this Subpart ~~are not applicable~~do

not apply if the products listed in Appendix D are made from natural fatty acids for the production of hexadecyl alcohol.

b) A component ~~shall~~ must be considered to be leaking if the volatile organic material concentration exceeds 10,000 ~~parts per million~~ ppm when measured at a distance of 0 ~~centimeters~~ cm from the component as determined by Method 21, 40 CFR ~~Part~~ 60, Appendix A, incorporated by reference in Section 215.105.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.422 Inspection Program Plan for Leaks

The owner or operator of a synthetic organic chemical or polymer manufacturing plant subject to Section 215.421 ~~shall~~ must prepare an inspection program plan which contains, at a minimum:

a) An identification of all components and the period in which each will be monitored ~~pursuant to~~under Section 215.423;

b) The format for the monitoring log required by Section 215.424;

c) A description of the monitoring equipment to be used ~~pursuant to~~under Section 215.423; and

d) A description of the methods to be used to identify all pipeline valves, pressure relief valves in gaseous service, all leaking components, and the ball and plug valves and pumps exempted under Section 215.423(h) ~~such that~~so they are obvious and can be located by ~~both~~ plant personnel performing monitoring and Agency personnel performing inspections.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.423 Inspection Program for Leaks

The owner or operator of a synthetic organic chemical or polymer manufacturing plant subject to Section 215.420 ~~shall~~must, for the ~~purposes~~ purpose of detecting leaks, conduct a component inspection program consistent with the following provisions.

a) ~~Test annually those~~Annually test components operated near extreme temperature or pressure ~~such that they would be~~and unsafe to routinely monitor~~,~~ and ~~those~~ components located more than two meters above or away from permanent worker access structures or surfaces;

b) Test all other pressure relief valves in gaseous service, pump seals, pipelines valves, process drains, and compressor seals not earlier than March 1 or later than June 1 of each year;

c) If more than 2 percent of the components tested ~~pursuant to~~under subsection (b) are found to leak, again test all pressure relief valves in gaseous service, pipeline valves in gaseous service, and compressor seals by methods and procedures approved by the Agency not earlier than June 1 or later than September 1 of each year;

d) Observe visually all pump seals weekly;

e) Test immediately any pump seal from which liquids are observed dripping;

f) Test any relief valve within 24 hours after it has vented to the atmosphere; and

g) Test immediately after repair any component that was found leaking.

h) Ball and plug valves, inaccessible valves, storage tank valves, pumps equipped with mechanical seals, and pressure relief devices connected to an operating flare header or vapor recovery device are exempt from the monitoring requirements in this Section.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.424 Repairing Leaks

All leaking components must be repaired and retested as soon as practicable but no later than 21 days after the leak is found unless the leaking component cannot be repaired until the process ~~united~~ unit is shutdown or the repair part is received. Records of repairing and retesting must be maintained in ~~accordance~~ compliance with Sections 215.424 and 215.425.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.425 Recordkeeping for Leaks

a) The owner or operator of a synthetic organic chemical or polymer manufacturing plant ~~shall~~ must maintain a log of monitoring for leaking components, ~~monitoring log~~ which ~~shall~~ must contain~~,~~ at a minimum~~,~~ the following ~~information~~:

1) The name of the process unit where the component is located;

2) The type of component (e.g., valve, seal);

3) The identification number of the component;

4) The date on which a leaking component is discovered;

5) The date on which a leaking component is repaired;

6) The date and instrument reading of the recheck procedure after a leaking component is repaired;

7) A record of the calibration of the monitoring instrument;

8) The identification number of leaking components which cannot be repaired until process unit shutdown; and

9) The total number of components inspected and the total number of components found leaking during that monitoring period.

b) Copies of the monitoring log ~~shall~~ must be retained by the owner or operator for a minimum of two years after the date on which the record was made or the report prepared.

c) Copies of the monitoring log ~~shall~~ must be made available to the Agency, upon verbal or written request, at any reasonable time.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.426 Report for Leaks

The owner or operator of a synthetic organic chemical or polymer manufacturing plant subject to Section 215.420 ~~shall~~must:

a) Submit ~~a report~~ to the Agency ~~prior to~~before the 1st day of July and October a report listing all leaking components identified ~~pursuant to~~under Section 215.423 but not repaired within 21 days, all leaking components awaiting process unit shutdown, the total number of components inspected, and the total number of components found leaking;

b) Submit a signed statement with the report attesting that all monitoring and repairs were performed as required under Sections 215.421 through 215.427.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.427 Alternative Program for Leaks

The Agency ~~shall~~ must approve an alternative program of monitoring, recordkeeping, and/or reporting to that ~~prescribed in~~required by Sections 215.421 through 215.426~~,~~ upon a demonstration by the owner or operator of ~~such~~ the plant that the alternative program will provide plant personnel and Agency personnel with an equivalent ability to identify and repair leaking components. The owner or operator ~~utilizing~~ using an alternative monitoring program ~~shall~~ must submit to the Agency an alternative monitoring program plan consistent with ~~the provisions of~~ Section 215.422.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.428 Compliance Dates

Every owner or operator of a synthetic organic chemical or polymer manufacturing plant subject to Sections 215.421 through 215.427 ~~shall~~ must comply with ~~the standards and limitations of~~ those Sections beginning December 31, 1987.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.429 Compliance Plan ~~(Repealed)~~

~~a) The owner or operator of a synthetic organic chemical or polymer manufacturing plant subject to Section 215.428 shall submit to the Agency a compliance plan, no later than December 31, 1987.~~

~~b) The plan and schedule shall meet the requirements of 35 Ill. Adm. Code 201.~~

(Source: Repealed at 48 Ill. Reg._____, effective _____)

Section 215.430 General Requirements

The owner or operator of a plant which processes more than 3660 mg/yr (4033 tons/year) gaseous and light liquid volatile organic material, and whose components are used to manufacture the synthetic organic chemicals or polymers listed in Appendix D, ~~shall~~ must comply with Sections 215.430 to 215.439. ~~The provisions of~~ Sections 215.430 to 215.439 ~~are applicable~~apply to components containing 10 percent or more by weight volatile organic material as determined by ASTM ~~method~~ Methods E-168, E-169 and E-260, incorporated by reference in Section 215.105. ~~Those components~~Components that are not process unit components are exempt from Sections 215.430 to 215.439. A component ~~shall~~ must be considered to be leaking if the volatile organic material is equal to~~,~~ or ~~is~~ greater than 10,000 ppmv as methane or hexane as determined by USEPA Reference Method 21, ~~as specified at~~ 40 CFR 60, Appendix A, incorporated by reference in Section 215.105, and there is an indication of liquids dripping~~,~~ or indication by a sensor that a seal or barrier fluid system has failed. The provisions of this Subpart ~~are not applicable~~do not apply if the equipment components are used to produce heavy liquid chemicals only from heavy liquid feed or raw materials.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.431 Inspection Program Plan for Leaks

The owner or operator of a synthetic organic chemical or polymer manufacturing plant subject to Section 215.430 ~~shall~~ must prepare an inspection program plan which contains, at a minimum:

a) An identification of all components and the period in which each will be monitored ~~pursuant to~~under Section 215.432.

b) The format for the monitoring log required by Section 215.434.

c) A description of the monitoring equipment to be used when complying with Section 215.432, and

d) A description of the methods to be used to identify all pipeline valves, pressure relief valves in gaseous service, all leaking components, and components exempted under Section 215.432(i) ~~such that~~so they are obvious and can be located by both plant personnel performing monitoring and Agency personnel performing inspections.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.432 Inspection Program for Leaks

The owner or operator of a synthetic organic chemical or polymer manufacturing plant subject to ~~Section~~ Sections 215.430 through 215.439~~, shall~~ must, for the purpose of detecting leaks, conduct a component inspection program ~~utilizing the~~using test methods ~~specified~~ in USEPA Reference Method 21, 40 CFR 60, Appendix A (1986), incorporated by reference in Section 215.105, consistent with the following provisions:

a) Test annually those components operated near extreme temperature or pressure ~~such that they~~that would be unsafe to routinely monitor, and those components located more than two meters above permanent worker access structures or surfaces;

b) Test quarterly all other pressure relief valves in gas service, pumps in light liquid service, valves in light liquid service and in gas service, and compressors.

c) If less than or equal to 2 percent of the valves in light liquid service and in gas service tested ~~pursuant to~~under subsection (b) are found ~~not to leak~~leaking for 5 consecutive quarters, no leak tests ~~shall~~ will be required for three consecutive quarters~~. Thereafter,~~, after which leak tests ~~shall~~ must resume for the next quarter. If that test shows less than or equal to 2 percent of the valves in light liquid service and in gas service are leaking, then no tests are required for the next 3 quarters. If more than 2 percent are leaking, then tests are required for the next 5 quarters.

d) Observe visually all pump seals weekly.

e) Test immediately any pump seal in light liquid service from which liquids are observed dripping.

f) Test any relief valve within 24 hours after it has vented to the atmosphere.

g) Routine instrument monitoring of valves which are not externally regulated, flanges, and components in heavy liquid service~~,~~ is not required. However, any valve which is not externally regulated, flange, or component in heavy liquid service that is found to be leaking on the basis of sight, smell, or sound ~~shall~~ must be repaired as soon as practicable but no later than 30 days after the leak is found.

h) Test immediately after repair any component that was found leaking.

i) Within ~~1~~ one hour of its detection, a weatherproof, readily visible tag~~,~~ in bright colors such as red or yellow~~,~~ bearing an identification number and the date on which the leak was detected must be affixed on the leaking component and remain in place until the leaking component is repaired.

j) Any component that is in vacuum service or any pressure relief devices connected to an operating flare header or ~~to a~~ vapor recovery devices is exempt from the monitoring requirements in this Section.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.433 Repairing Leaks

All leaking components must be repaired and retested as soon as practicable but no later than 15 days after the leak is found unless the leaking component cannot be repaired until the process unit is shut down. Records of repairing and retesting must be maintained in ~~accordance~~ compliance with ~~Section~~ Sections 215.434 and 215.435.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.434 Recordkeeping for Leaks

a) The owner or operator of a synthetic organic chemical or polymer manufacturing plant ~~shall~~ must maintain a log of monitoring for leaking components ~~monitoring log,~~ which ~~shall~~ must contain, at a minimum, the following ~~information~~:

1) The name of the process unit where the component is located;

2) The type of component (e.g., valve, seal);

3) The identification number of the component;

4) The date on which a leaking component is discovered;

5) The date on which a leaking component is repaired;

6) The date and instrument reading of the recheck procedure after a leaking component is repaired;

7) A record of the calibration of the monitoring instrument;

8) The identification number of leaking components which cannot be repaired until process unit shutdown; and

9) The total number of valves in light liquid service and in gas service inspected~~;~~ and the total number and the percentage of these valves found leaking during the monitoring period.

b) Copies of the monitoring log ~~shall~~ must be retained by the owner or operator for a minimum of two years after the date on which the record was made or the report was prepared.

c) Copies of the monitoring log ~~shall~~ must be made available to the Agency upon verbal or written request ~~prior to~~before or at the time of inspection ~~pursuant to~~under Section 4(d) of the Environmental Protection Act ~~(Act) (Ill. Rev. Stat. 1985, ch. 111 1/2, pars. 1001 et seq.,~~[415 ILCS 5/4(d)] at any reasonable time.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.435 Report for Leaks

The owner or operator of a synthetic organic chemical or polymer manufacturing plant subject to ~~Section~~ Sections 215.430 through 215.439 ~~shall~~must:

a) Submit quarterly reports to the Agency on or before March 31, June 30, September 30, and December 31 of each year~~,~~ listing all leaking components identified ~~pursuant to~~under Section 215.432 but not repaired within 15 days, all leaking components awaiting process unit shutdown, the total number of components inspected, the type of components inspected, ~~and~~ the total number of components found leaking, the total number of valves in light liquid service and in gas service inspected, and the number and percentage of valves in light liquid service and in gas service found leaking.

b) Submit a signed statement with the report attesting that all monitoring and repairs were ~~preformed~~ performed as required under ~~Section~~ Sections 215.430 through 215.436.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.436 Alternative Program for Leaks

The Agency ~~shall~~ must approve an alternative program of monitoring, recordkeeping, or reporting to that ~~prescribed in~~under Sections 215.430 through 215.438~~,~~ upon a demonstration by the owner or operator of ~~such~~ a plant that the alternative program will provide plant personnel

and Agency personnel with ~~an~~ ability to identify and repair leaking components equivalent to the monitoring, recordkeeping, or reporting requirements of this Part ~~to identify and repair leaking components~~. The owner or operator ~~utilizing~~ using an alternative monitoring program ~~shall~~ must submit to the Agency an alternative monitoring program plan consistent with ~~the provisions of~~ Section 215.431.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.437 Open-Ended Valves

a) Each open-ended valve ~~shall~~ must be equipped with a cap, blind flange, plug, or a second valve, except during operations requiring fluid flow through the open-ended valve.

b) Each open-ended valve equipped with a second valve ~~shall~~ must be operated ~~in a manner such~~so that the valve on the process fluid end is closed before the second valve is closed.

c) Components which are open-ended valves and which serve as a sampling connection ~~shall~~ must be controlled ~~such~~ so that:

1) A closed purge system or closed vent system ~~shall~~ must return purged process fluid to the process line with no detectable volatile organic material emissions to the atmosphere, or

2) A closed purge system or closed vent system ~~shall~~ must collect and recycle purged process fluid to the process line with no detectable volatile organic material emissions to the atmosphere, or

3) Purged process fluid ~~shall~~ must be transported to a control device that complies with ~~the requirements of~~ Section 215.438.

d) In-situ sampling systems are exempt from subsection (c).

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.438 Standards for Control Devices

Control devices used to comply with Section 215.437(c) ~~shall~~ must comply with following:

a) If the control device is a vapor recovery system (for example, condensers and adsorbers) it ~~shall~~ must be designed and operated to recover the volatile organic material emissions vented to it with an efficiency of 95 percent or greater.

b) If the control device is an enclosed combustion device, it ~~shall~~ must be designed and operated to reduce the volatile organic material emissions vented to it with an

efficiency of 95 percent or greater, or to provide a minimum residence time of 0.75 seconds at a minimum temperature of ~~816°C~~(816 ºC).

c) If the control device is a flare, it ~~shall~~must:

1) Be designed for and operated with no visible emissions as determined by USEPA Reference Method 22, 40 CFR 60, Appendix A, 1986, incorporated by reference in Section 215.105, except for periods not to exceed a total of 5 minutes during any 2 consecutive hours.

2) Be operated with a pilot flame present at all times and ~~shall~~ must be monitored with a thermocouple or any other equivalent device to detect the presence of the pilot flame.

3) Be steam-assisted, air assisted, or nonassisted.

4) Be used only with the net heating value of the gas being combusted being 11.2 MJ/scm (300 Btu/scf) or greater if the flare is steam-assisted or air-assisted; or with the net heating value of the gas being combusted being 7.45 MJ/scm or greater if the flare is nonassisted. The net heating value of the gas being combusted ~~shall~~ must be calculated using the following equation:

$$H_r = K \sum_{i=1}^{n} C_i H_i$$

Where:

H_r = Net heating value of the sample, MJ/scm: where the net enthalpy per mole of offgas is based on combustion at ~~25°C~~25 ºC and 760 mm Hg, but the standard temperature for determining the value corresponding to one mole is ~~20°C~~20 ºC.

K = Constant,
1.740×10^{-7} (1/ppm)(gmole/scm)(MJ/kcal)

where

standard temperature for (g mole/scm) is ~~20°C~~20 ºC.

C_i = Concentration of sample component i, in ppm, as measured by USEPA Reference Method 18, 40 CFR 60, Appendix A (1986), and ASTM D 2504-83, both incorporated by reference in Section 215.105.

H_i = Net heat of combustion of sample component i, kcal/g mole. The heats of combustion may be determined using ASTM D 2382-83, incorporated by reference in Section 215.105, if published values are not available or cannot be calculated.

5) Steam-assisted and nonassisted flares ~~shall~~ must be designed and operated with an exit velocity, as determined by dividing the volumetric flowrate (in units of standard temperature and pressure), as determined by USEPA Reference Method 2 or 2A, 40 CFR 60, Appendix A (1986), incorporated by reference in Section 215.105, as appropriate; by the unobstructed (free) cross sectional area of the flare tip, less than 18 m/sec (60 ft/sec.).

6) Air-assisted flares ~~shall~~ must be designed and operated with an exit velocity less than the maximum permitted velocity, V_{max}, as determined by the following equation:

$$V_{max} = 8.706 + 0.7084(H_r)$$

V_{max} = Maximum permitted velocity, m/sec.
8.706 = Constant.
0.7084 = Constant.
H_r = The net heating value as determined in subsection (c)(4) ~~of this section~~.

d) If the control device is a closed container, it ~~shall~~ must be designed and operated to reduce the volatile organic material emissions, vented from purged process fluid after transfer, to no detectable volatile organic material emissions as determined by USEPA Reference Method 21, ~~as specified at~~ 40 CFR 60, Appendix A (1986), incorporated by reference in Section 215.105. For purposes of this Section, the phrase "after transfer" ~~shall refer to~~means the time at which the entire amount of purged process fluid resulting from a flushing or clearing of the sample line enters the closed container or containers including the final ~~container(s) prior to~~container or containers before disposal.

e) The owner or operator of a control device ~~shall~~ must monitor the control device to ensure that it is operated and maintained in ~~conformance~~ compliance with the manufacturer's specifications, modified to the particular process design.

f) The control device ~~shall~~ must be operated at all times when emissions may be vented to it.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.439 Compliance Date

The owner or operator of a synthetic organic chemical or polymer manufacturing plant subject to Sections 215.430 through 215.439 ~~shall~~ must comply with ~~the standards and limitations of~~ those Sections no later than December 31, 1987.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART R: PETROLEUM REFINING AND RELATED INDUSTRIES; ASPHALT MATERIALS

Section 215.441 Petroleum Refinery Waste Gas Disposal

a) Except as provided in subsections (b) or (c), ~~no~~ a person ~~shall~~ must not cause or allow the discharge of organic materials in excess of 100 ppm equivalent methane (molecular weight 16.0) into the atmosphere from:

1) Any catalyst regenerator of a petroleum cracking system; ~~or~~

2) Any petroleum fluid coker; or

3) Any other waste gas stream from any petroleum or petrochemical manufacturing process.

b) Exception. Existing sources subject to subsection (a)(3) may~~, alternatively, at their election,~~ comply with the organic material emission limitations ~~imposed by~~under Section 215.301 or 215.302~~, provided, however, that~~. However, there ~~shall~~ must be no increase in emissions from ~~such~~ those sources above the level of emissions in existence on May 3, 1979.

c) New Sources. Sources subject to subsection (a)(3), construction of which commenced on or after January 1, 1977, may~~, at their election,~~ comply with the following emission limitations:

1) A maximum of eight pounds per hour of organic material; or

2) Emission of organic material in excess of the limitation of subsection (c)(1) is allowable ~~is such~~if those emissions are controlled by air pollution control methods or equipment approved by the Agency capable of reducing by 85 percent or more the uncontrolled organic material that would otherwise be emitted to the atmosphere.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.442 Vacuum Producing Systems

~~No~~ An owner or operator of a petroleum refinery ~~shall~~ must not cause or allow the operation of any vacuum producing system unless the condensers, hot wells, and accumulators of ~~any such~~the

system are equipped with vapor loss control equipment including~~, but not limited to,~~ piping, valves, flame arrestors, and hot well covers to vent any volatile organic material with a vapor pressure of 10.34 kPa (1.5 psia) or greater at 294.3 K ~~(70 F)~~(70 ºF) to a heater, fire box, flare, refinery fuel gas system, or other equipment or system of equal emission control ~~as~~ approved by the Agency. This Section ~~shall~~ does not apply to vacuum producing systems on lube units.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.443 Wastewater (Oil/Water) Separator

~~No~~ An owner or operator of a petroleum refinery ~~shall~~ must not operate any wastewater (oil/water) separator at a petroleum refinery unless the separator is equipped with air pollution control equipment capable of reducing by 85 percent or more the uncontrolled organic material emitted to the atmosphere. If no odor nuisance exists, ~~the limitation of~~ this Section ~~shall~~ does not apply if the vapor pressure of the organic material is below 10.34 kPa (1.5 psia) at 204.3 K ~~(70 F)~~(70 ºF) at all times.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.444 Process Unit Turnarounds

a) ~~No~~ An owner or operator of a petroleum refinery ~~shall~~ must not cause or allow a refinery process unit turnaround except in compliance with an operating procedure ~~as~~ approved by the Agency.

b) Unless a procedure is already on file with the Agency as part of an approved operating permit no later than November 1, 1979, the owner or operator of a petroleum refinery ~~shall~~ must submit to the Agency for approval a detailed procedure for reducing emissions of volatile organic material during refinery process unit turnarounds from organic material with a vapor pressure of 10.34 kPa (1.5 psia) or greater at 294.3 K ~~(70 F)~~(70 ºF). The Agency ~~shall~~ must not approve the procedure unless it provides for:

1) Depressurization of the refinery process unit or vessel to a flare, refinery fuel gas system, or other equipment or system of equal emission control, as approved by the Agency, until the internal pressure from the vessel or unit is less than 5.0 psig before allowing the vessel to be vented to the atmosphere;

2) Recordkeeping of the following items:

A) Each date that a refinery unit or vessel is shut down; and

B) The total estimated quantity of volatile organic material emitted to the atmosphere and the duration of the emission in hours.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.445 Leaks: General Requirements

a) The owner or operator of a petroleum refinery ~~shall~~must:

1) Develop a monitoring program plan consistent with ~~the provisions of~~ Section 215.446;

2) Conduct a monitoring program consistent with ~~the provisions of~~ Section 215.447;

3) Conduct all tests for leaks in ~~accordance~~ compliance with Method 21, 40 CFR 60, Appendix A, incorporated by reference in Section 215.105.

4) Record all leaking components which have a volatile organic material concentration exceeding 10,000 ppm consistent with ~~the provisions of~~ Section 215.448;

5) Identify each component consistent with the monitoring program plan submitted ~~pursuant to~~under Section 215.446;

6) Repair and retest the leaking components as soon as possible within 22 days after the leak is found, but no later than June 1 for the purposes of Section 215.447(a)(1), unless the leaking components cannot be repaired until the unit is shut down for turnaround; and

7) Report to the Agency consistent with ~~the provisions of~~ Section 215.449.

b) A component ~~shall~~ must be considered to be leaking if the volatile organic material concentration exceeds 10,000 ppm when measured at a distance of 0 cm from the component ~~as determined by~~under Method 21, 40 CFR 60, Appendix A, incorporated by reference in Section 215.105.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.446 Monitoring Program Plan for Leaks

The owner or operator of a petroleum refinery ~~shall~~ must prepare a monitoring program plan which contains, at a minimum:

a) An identification of all refinery components and the period in which each will be monitored ~~pursuant to~~under Section 215.447;

b) The format for the monitoring log required by Section 215.448;

c) A description of the monitoring equipment to be used ~~pursuant to~~under Section 215.447; and

d) A description of the methods to be used to identify all pipeline valves, pressure relief valves in gaseous service, and all leaking components ~~such that~~so they are obvious to ~~both~~ refinery personnel performing monitoring and Agency personnel performing inspections.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.447 Monitoring Program for Leaks

a) The owner or operator of a petroleum refinery subject to Section 215.445 ~~shall~~must, for the purpose of detecting leaks, conduct a component monitoring program consistent with the following provisions:

1) Test all pressure relief valves in gaseous service, pump seals, pipeline valves, process drains, and compressor seals between March 1 and June 1 of each year by methods and procedures approved by the Agency ~~not earlier than March 1 or later than June 1 of each year~~;

2) Again test all pressure relief valves in gaseous service, pipeline valves in gaseous service, and compressor seals between June 1 and August 1 of each year by methods and procedures approved by the Agency ~~not earlier than June 1 or later than August 1 of each year~~;

3) Observe visually all pump seals weekly;

4) Test immediately any pump seal from which liquids are observed dripping;

5) Test any relief valve within 24 hours after it has vented to the atmosphere; and

6) Test immediately after repair any component that was found leaking.

b) Inaccessible valves, storage tank valves and pressure relief devices connected to an operating flare header or vapor recovery device are exempt from ~~the~~ monitoring requirements in Subsection (a).

c) The Agency may require more frequent monitoring than ~~would otherwise be~~ required by ~~Subsection~~ subsection (a) for components ~~which are~~ demonstrated to have a history of leaking.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.448 Recordkeeping for Leaks

a) The owner or operator of a petroleum refinery ~~shall~~ must maintain a log of monitoring for leaking components, ~~monitoring log~~ which ~~shall~~ must contain~~,~~ at a minimum~~, the following information~~:

1) The name of the process unit where the component is located;

2) The type of component (e.g., valve, seal);

3) The identification number of the component;

4) The date on which a leaking component is discovered;

5) The date on which a leaking component is repaired;

6) The date and instrument reading of the recheck procedure after a leaking component is repaired;

7) A record of the calibration of the monitoring instrument;

8) The identification number of leaking components which cannot be repaired until turn-around; and

9) The total number of components inspected and the total number of components found leaking during that monitoring period.

b) Copies of the monitoring log ~~shall~~ must be retained by the owner or operator for a minimum of two years after the date on which the record was made or the report prepared.

c) Copies of the monitoring log ~~shall~~ must be made available to the Agency, upon verbal or written request, at any reasonable time.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.449 Reporting for Leaks

The owner or operator of a petroleum refinery ~~shall~~must:

a) Submit a report to the Agency ~~prior to~~before the 1st day of both July and September listing all leaking components identified ~~pursuant to~~under Section 215.447 but not repaired within 22 days, all leaking components awaiting unit turnaround, the total number of components inspected, and the total number of components found leaking;

b) Submit a signed statement with the report attesting that all monitoring and repairs were performed as required under Sections 215.445 through 215.448.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.450 Alternative Program for Leaks

The Agency may approve an alternative program of monitoring, recordkeeping, and/or reporting to that ~~prescribed in~~required by Sections 215.446 through 215.449, upon a demonstration by the owner or operator of a petroleum refinery that the alternative program will provide refinery and Agency personnel with an equivalent ability to identify and repair leaking components. The owner or operator ~~utilizing~~ using an alternative monitoring program ~~shall~~ must submit to the Agency an alternative monitoring program plan consistent with ~~the provisions of~~ Section 215.446.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.451 Sealing Device Requirements

Except for safety pressure relief valves, ~~no~~ an owner or operator of a petroleum refinery ~~shall~~ must not install or operate a valve at the end of a pipe or line containing volatile organic materials unless the pipe or line is sealed with a second valve, blind flange, plug, cap, or other sealing device. The sealing device may be removed only when a sample is being taken or during maintenance operations.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.452 Compliance Schedule for Leaks

The owner or operator of a petroleum refinery ~~shall~~ must adhere to the increments of progress ~~contained~~ in the following schedule:

a) Submit to the Agency a monitoring program plan consistent with Section 215.446 ~~prior to~~before June 1, 1983.

b) Submit the first monitoring report ~~pursuant to~~under Section 215.449 to the Agency ~~prior to~~before July 1, 1983.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.453 Compliance Dates and Geographical Areas

a) Except as otherwise stated in subsection (b), every owner or operator of an emission source subject to Sections 215.445 through 215.451 ~~shall~~ must comply with those standards and limitations ~~in accordance with~~and the requirements of Section 215.452.

b) If an emission source is not located in one of the counties listed below and is also not located in any county contiguous ~~thereto~~to one them, the owner or operator of the emission source ~~shall~~ must comply with ~~the requirements of~~ Sections 215.445 through 215.451 no later than December 31, 1987:

Cook	Macoupin
DuPage	Madison
Kane	Monroe
Lake	Saint Clair

~~(~~BOARD NOTE: These counties are proposed to be designated as nonattainment by the USEPA~~, . at~~ 47 Fed. Reg. 31588, July 21, 1982~~).~~

c) Notwithstanding subsection (b), if any county is designated as nonattainment by ~~the~~ USEPA at any time ~~subsequent to the effective date of this Section~~after July 28, 1979, the owner or operator of an emission source located in that county or any county contiguous to that county who would otherwise be subject to the compliance date in subsection (b) ~~shall~~ must comply with ~~the requirements of~~ Sections 215.445 through 215.451 within one year ~~from~~ after the date of redesignation but in no case later than December 31, 1987.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART S: RUBBER AND MISCELLANEOUS PLASTIC PRODUCTS

Section 215.461 Manufacture of Pneumatic Rubber Tires

The owner or operator of an undertread cementing, treadend cementing, or bead dipping operation at a pneumatic rubber tire manufacturing facility ~~shall~~ must install and operate:

a) A capture system~~,~~ with minimum capture efficiency of 65 percent by weight of ~~volatile organic material~~VOM for treadend cementing or bead dipping operations and a capture system with a minimum capture efficiency of 55.5 percent by weight of ~~volatile organic material~~VOM for undertread cementing; and

b) A control device that meets the requirements of one of the following:

1) A carbon adsorption system designed and operated ~~in a manner such~~so that there is at least ~~a~~ 90 percent removal of ~~volatile organic material~~VOM by weight from the gases ducted to the control device;

2) An afterburning system that oxidizes at least 90 percent of the captured nonmethane ~~volatile organic materials~~VOM (VOM measured as total combustible carbon) to carbon dioxide and water; and

3) An alternative ~~volatile organic material~~VOM emission reduction system demonstrated to have at least a 90 percent overall reduction efficiency and approved by the Agency.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.462 Green Tire Spraying Operations

The owner or operator of a green tire spraying operation at a pneumatic rubber tire manufacturing facility ~~shall~~must:

a) Install and operate:

1) A capture system with a minimum capture efficiency of 90 percent by weight of ~~volatile organic material~~VOM; and

2) A control device that meets the requirements of one of the following:

A) A carbon adsorption system designed and operated ~~in a manner such that~~so there is at least 90 percent removal of ~~volatile organic material~~VOM by weight from the bases ducted to the control device;

B) An afterburning system that oxidizes at least 90 percent of the captured non-methane ~~volatile organic material~~VOM (measured as total combustible carbon) to carbon dioxide and water; or

C) An alternative ~~volatile organic material~~VOM emission reduction system demonstrated to have at least a 90 percent overall reduction efficiency and approved by the Agency.

b) Substitute for the normal solvent-based mold release compound water-based sprays containing:

1) No more than five percent by volume of ~~volatile organic material~~VOM as applied for the inside of tires;

2) No more than ten percent by volume of ~~volatile organic material~~VOM as applied for the outside of tires.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.463 Alternative Emission Reduction Systems

In lieu of complying with Section 215.461 or 215.462, the owner or operator of an emission source may ~~utilize~~ use an alternative volatile organic emission reduction system, including an

alternative production process, which is demonstrated to be equivalent to Section 215.461 or 215.462 on the basis of emissions of volatile organic matter. A treadend cementing operation ~~shall~~ must be considered equivalent to Section 215.461 or 215.462 for the purposes of this Section if the total volatile organic emission from ~~such~~ the operation is 10 grams or less per tire.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.464 Emissions Testing

a) Any tests of volatile organic material emissions, including tests conducted to determine control equipment efficiency or control device destruction efficiency, ~~shall~~ must be conducted in ~~accordance~~ compliance with the methods and procedures ~~specified~~ in Section 215.102.

b) Upon a reasonable request by the Agency, the owner or operator of a volatile organic material emission source required to comply with a limit of Sections 215.461 through 215.464 ~~shall~~ must conduct emissions testing~~,~~ at ~~such~~ that person's own expense~~,~~ to demonstrate compliance.

c) A person planning to conduct a volatile organic material emission test to demonstrate compliance ~~shall~~ must notify the Agency of that intent not less than 30 days before initiating the planned ~~initiation of the tests~~test so the Agency may observe the test.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.465 Compliance Dates and Geographical Areas

a) Except as otherwise stated in subsection (b), every owner or operator of an emission source subject to Sections 215.461 through 215.464 shall comply with the standards and limitations of this Part by December 31, 1983.

b) If an emission source is not located in one of the counties listed below and is also not located in any county contiguous ~~thereto~~those counties, the owner or operator of the emission source ~~shall~~ must comply with ~~the requirements of~~ Sections 215.461 through 215.464 no later than December 31, 1987:

Cook	Macoupin
DuPage	Madison
Kane	Monroe
Lake	Saint Clair

~~(~~BOARD NOTE: These counties are proposed to be designated as nonattainment by ~~the~~ USEPA. ~~at~~ 47 Fed. Reg. 31588, July 21, 1982~~)~~.

c) Notwithstanding subsection (b), if any county is designated as nonattainment by ~~the~~ USEPA at any time ~~subsequent to the effective date of this Section~~after January 21, 1983, the owner or operator of an emission source located in that county or any county contiguous to that county who would otherwise be subject to the compliance date in subsection (b) ~~shall~~ must comply with ~~the requirements of~~ Sections 215.461 through 215.464 within one year ~~from~~ after the date of redesignation but in no case later than December 31, 1987.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.466 Compliance Plan (Repealed)

~~a) The owner or operator of an emission source subject to Section 215.465(a) shall submit to the Agency a compliance plan, pursuant to 35 Ill. Adm. Code 201, Subpart H, including a project completion schedule where applicable, no later than April 21, 1983.~~

~~b) The owner or operator of an emission source subject to Section 215.465(b) shall submit to the Agency a compliance plan, including a project completion schedule where applicable, no later than December 31, 1986.~~

~~c) The owner or operator of an emission source subject to Section 215.465(c) shall submit a compliance plan, including a project completion schedule within 90 days after the date of redesignation, but in no case later than December 31, 1986.~~

~~d) Unless the submitted compliance plan or schedule is disapproved by the Agency, the owner or operator of a facility or emission source subject to the rules specified in subsections (a), (b) or (c) may operate the emission source according to the plan and schedule as submitted.~~

~~e) The plan and schedule shall meet the requirements of 35 Ill. Adm. Code 201, Subpart H, including specific interim dates as required in 35 Ill. Adm. Code 201.242.~~

(Source: Repealed at 48 Ill. Reg._____, effective _____)

Section 215.467 Testing Methods for Volatile Organic Material Content

The volatile organic material content for all VOM emitting materials except printing inks ~~shall~~ must be determined by Method 24, 40 CFR 60, Appendix A, incorporated by reference in Section 215.105. ~~Any~~ The Agency must approve any alternate test method ~~must be approved by the Agency, which shall~~and must consider data comparing the performance of the proposed alternative to the performance of the approved test ~~method(s)~~method or methods. If the Agency determines that ~~such~~ these data ~~demonstrates~~ demonstrate that the proposed alternative will achieve results equivalent to the approved test ~~method(s)~~method or methods, the Agency ~~shall approved~~must approve the proposed alternative.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART T: PHARMACEUTICAL MANUFACTURING

Section 215.480 Applicability of Subpart T

a) ~~The rules of this~~This Subpart, except for Sections 215.483 through 215.485, ~~apply~~ applies to all emission sources of volatile organic material, including ~~but not limited to~~ reactors, distillation units, dryers, storage tanks for volatile organic liquids, equipment for the transfer of volatile organic liquids, filters, crystallizers, washers, laboratory hoods, pharmaceutical coating operations, and mixing operations and centrifuges used in manufacturing, including packaging, of pharmaceuticals~~, and emitting~~ which emit more than 6.8 kg/day (15 lbs/day) ~~of volatile organic material~~ and more than 2268 kg/year (2.5 tons/year) of volatile organic material. If an emission source emits less than 2,268 kg/year (2.5 tons/year) of volatile organic material, ~~the requirements of~~ this Subpart, except for Sections 215.483 through 215.485, still ~~apply~~ applies to the emission source if volatile organic material emissions from the emission source exceed 45.4 kg/day (100 lbs/day).

b) Notwithstanding subsection (a), the air suspension coater/dryer, fluid bed dryers, tunnel dryers, and Accelacotas located in Libertyville Township, Lake County, Illinois ~~shall be~~are exempt from ~~the rules of~~ this Subpart, except for Sections 215.483 through 215.485, if emissions of volatile organic material not vented to air pollution control equipment do not exceed the following levels: for the air suspension coater/dryer~~:~~, 2268 kg/year (2.5 tons per year); for each fluid bed dryer~~:~~, 4535 kg per year (5.0 tons per year); ~~and~~ for each tunnel driver~~:~~, 6803 kg per year (7.5 tons per year); and for each Accelacota~~:~~, 6803 kg per year (7.5 tons per year).

c) Sections 215.483 through 215.485 apply to a plant having one or more emission sources that:

1) are used to manufacture pharmaceuticals; and

2) emit more than 6.8 kg/day (15 lbs/day) of volatile organic material and more than 2268 kg/year (2.5 tons/year) of volatile organic material. If these emission sources at a plant emit~~, or, if~~ less than 2.5 tons/year, these sections still apply if emissions from one or more emission sources exceed 45.4 kg/day (100 lbs/day).

d) ~~No~~ A person ~~shall~~ must not violate any condition in a permit when the condition ~~results in exclusion of~~excludes an emission source from this Subpart.

e) Emissions subject to this Subpart ~~shall~~ must be controlled at all times, consistent with the requirements ~~set forth in~~of this Subpart.

f) Control devices required ~~pursuant to~~under Section 215.483 ~~shall~~ must be operated at all times.

g) If a pharmaceutical manufacturing emission source becomes subject to ~~the provisions of~~ Section 215.481, 215.482, or 215.486 on or after the compliance date ~~specified~~ in Section 215.490(a), ~~the requirements of such~~that section ~~shall continue~~continues to apply to the emission source even if ~~there is a reduction in emissions as to bee~~missions are reduced below the applicability criteria of this Section.

h) Determinations of daily ~~and/or~~and annual emissions

1) Determinations of daily ~~and/or~~and annual emissions for purposes of this Section ~~shall~~ must be made using:

(A) data on the hourly emission rate or the emission per unit of throughput, and

(B) appropriate daily and annual data from records of emission source operation or material throughput, ~~or~~ material consumption.

2) In the absence of representative test data ~~pursuant to~~under Section 215.487 for the hourly emission rate or emission rate per unit of throughput, ~~such items shall~~these data must be determined using engineering calculations, including the methods ~~described~~ in Appendix B of "Control of Volatile Organic Emissions from Manufacture of Synthesized Pharmaceutical Products", incorporated by reference at Section 215.105.

3) This subsection ~~shall~~ must not affect the Agency's authority to require emissions tests to be performed ~~pursuant to~~under Section 215.487.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.481 Control of Reactors, Distillation Units, Crystallizers, Centrifuges and Vacuum Dryers

a) The owner or operator ~~shall~~ must equip all reactors, distillation units, crystallizers, centrifuges, and vacuum dryers that are used to manufacture pharmaceuticals with surface condensers or other air pollution control equipment listed in subsection (a)(2).

1) If a surface condenser is used, it ~~shall~~ must be operated ~~such~~ so that the condenser outlet gas temperature does not exceed:

A) 248.2 K ~~(-13 F)~~(-13 ºF) when condensing volatile organic material of vapor pressure greater than 40.0 kPa (5.8 psi) at 294.3 K ~~(70 F)~~(70 ºF); or

B) 258.2 K ~~(5 F)~~(5 ºF) when condensing volatile organic material of vapor pressure greater than 20.0 kPa (2.9 psi) at 294.3 K ~~(70 F)~~(70 ºF); or

C) 273.2 K ~~(32 F)~~(32 ºF) when condensing volatile organic material of vapor pressure greater than 10.0 kPa (1.5 psi) at 294.3 K ~~(70 F)~~(70 ºF); or

D) 283.2 K ~~(50 F)~~(50 ºF) when condensing volatile organic material of vapor pressure greater than 7.0 kPa (1.0 psi) at 294.3 K ~~(70 F)~~(70 ºF); or

E) 298.2 K ~~(77 F)~~(77 ºF) when condensing volatile organic material of vapor pressure greater than 3.45 kPa (0.5 psi) at 294.3 K ~~(70 F)~~(70 ºF).

2) If a scrubber, carbon adsorber, thermal incinerator, catalytic incinerator, or other air pollution control equipment other than a surface condenser is used, ~~such~~ that equipment ~~shall~~ must provide a reduction in the emissions of volatile organic material of 90 percent or more.

b) The owner or operator ~~shall~~ must enclose all centrifuges used to manufacture pharmaceuticals and that have an exposed volatile organic liquid surface, where the volatile organic material in the volatile organic liquid has a vapor pressure of 3.45 kPa (0.5 psi) or more at 294.3 K ~~(70 F)~~(70 ºF), except as production, sampling, maintenance, or inspection procedures require operator access.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.482 Control of Air Dryers, Production Equipment Exhaust Systems and Filters

a) The owner or operator of an air dryer or production equipment exhaust system used to manufacture pharmaceuticals ~~shall~~ must control the emissions of volatile organic material from ~~such~~ the emission sources by air pollution control equipment which reduces by 90 percent or more the volatile organic material that would otherwise be emitted into the atmosphere.

b) The owner or operator ~~shall~~ must enclose all rotary vacuum filters and other filters used to manufacture pharmaceuticals and that have an exposed volatile organic liquid surface, where the volatile organic material in the volatile organic liquid has a vapor pressure of 3.45 kPa (0.5 psi) or more at 294.3 K ~~(70 F)~~(70 ºF),

except as production, sampling, maintenance, or inspection procedures require operator access.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.483 Material Storage and Transfer

The owner or operator of a pharmaceutical manufacturing plant ~~shall~~must:

a) Provide a vapor balance system that is at least 90.0 percent effective in reducing volatile organic material emissions from truck or railcar deliveries to storage tanks with capacities equal to or greater than 7.57m (2,000 gallons) that store volatile organic liquids with vapor pressures greater than 28.0 kPa (4.1 psi) at 294.3 K ~~(70 F)~~(70 ºF); and

b) Install, operate, and maintain pressure/vacuum conservation vents set at 0.2 kPa (0.03 psi) or greater on all storage tanks that store volatile organic liquids with vapor pressures greater than 10 kPa (1.5 psi) at 294.3 K ~~(70 F)~~(70 ºF).

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.484 In-Process Tanks

The owner or operator ~~shall~~ must install covers on all in-process tanks used to manufacture pharmaceuticals and containing a volatile organic liquid at any time. These covers must remain closed, except as production, sampling, maintenance, or inspection procedures require operator access.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.485 Leaks

The owner or operator of a pharmaceutical manufacturing plant ~~shall~~ must repair any component from which a leak of volatile organic liquid can be observed. The repair ~~shall~~ must be completed as soon as practicable but no later than 15 days after the leak is found unless the leaking component cannot be repaired until the process unit is shut down, and the leaking component must then be repaired before the unit is restarted.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.486 Other Emission Sources

The owner or operator of a washer, laboratory hood, tablet coating operation, mixing operation, or any other process emission source not subject to Section 215.481 through 215.485 ~~of this Subpart,~~ and used to manufacture pharmaceuticals ~~shall~~ must control the emissions of volatile organic material from ~~such~~ those emission sources by:

a) Air pollution control equipment which reduces by 81 percent or more the volatile organic material that would otherwise be emitted to the atmosphere, or

b) A surface condenser which captures all the volatile organic material which would otherwise be emitted to the atmosphere and which meets the requirements of Section 215.481(a) ~~of this Subpart~~.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.487 Testing

a) ~~Upon~~ After reasonable request by the Agency, the owner or operator of any volatile organic material emission source subject to this Subpart or exempted from this Subpart by ~~provisions of~~ Section 215.480(a), (b), or (c) ~~shall,~~must at ~~his~~ its own expense~~,~~ demonstrate compliance to the Agency by methods or procedures ~~listed~~ in Section 215.487(c); and

b) A person planning to conduct a volatile organic material emissions test to demonstrate compliance with or determine applicability of ~~provisions of~~ this Subpart ~~shall~~ must notify the Agency of that ~~intent to test~~plan not less than 30 calendar days ~~prior to~~before the planned initiation of the test.

c) Test procedures to determine compliance with and applicability of this Subpart are in 40 CFR ~~Part~~ 60, Appendix A, incorporated by reference at Section 215.105, and ~~shall~~ musy be used as ~~delineated below~~follows:

1) 40 CFR 60, Appendix A, Methods 18, 25, or 25A, as appropriate to the conditions at the site, ~~shall~~ must be used to determine VOM concentration. Method selection ~~shall be based on consideration of~~must consider the diversity of organic species present and their total concentration and ~~on consideration of~~ the potential presence of interfering gases. Except as indicated in subsections (c)(1)(A) and (c)(1)(B), the test ~~shall~~ must consist of three separate runs, each lasting a minimum of 60 minutes, unless the Agency determines that process variables dictate shorter sampling times.

A) When the method is to be used to determine the efficiency of a fixed-bed carbon adsorption system with a common exhaust stack for all the individual adsorber vessels, the test ~~shall~~ must consist of three separate runs, each coinciding with one or more complete sequences through the adsorption cycles of all the individual adsorber vessels.

B) When the method is to be used to determine the efficiency of a fixed-bed carbon adsorption system with individual exhaust stacks for each adsorber vessel, each adsorber vessel ~~shall~~ must be tested

individually. The test for each adsorber vessel ~~shall~~ must consist of three separate runs. Each run ~~shall~~ must coincide with one or more complete adsorption cycles.

2) 40 CFR ~~Part~~ 60, Appendix A, Method 1 or 1A ~~shall~~, must be used for sample and velocity traverses.

3) 40 CFR ~~Part~~ 60, Appendix A, Method 2, 2A, 2C, or 2D ~~shall~~, must be used for velocity and volumetric flow rates.

4) 40 CFR ~~Part~~ 60, Appendix A, Method 3 ~~shall~~, must be used for gas analysis.

5) 40 CFR ~~Part~~ 60, Appendix A, Method 4 ~~shall~~, must be used for stack gas moisture.

6) 40 CFR ~~Part~~ 60, Appendix A, Methods 2, 2A, 2C, 2D, 3, and 4 ~~shall~~, must be performed, as applicable, at least twice during each test run.

d) This section ~~shall~~ must not affect the authority of the U.S. Environmental Protection Agency under Section 114 of the Clean Air Act.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.488 Monitors for Air Pollution Control Equipment

a) At a minimum, continuous monitors for the following parameters ~~shall~~ must be installed on air pollution control equipment subject to this Subpart:

1) Destruction device combustion temperature;

2) Temperature rise across a catalytic afterburner bed;

3) Breakthrough of volatile organic material on a carbon adsorption unit;

4) Outlet gas temperature of a refrigerated condenser;

5) Temperature of a non-refrigerated condenser coolant supply system.

b) Each monitor ~~shall~~ must be equipped with a recording device.

c) Each monitor ~~shall~~ must be calibrated quarterly.

d) Each monitor ~~shall~~ must operate at all times while the associated control equipment is operating.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.489 Recordkeeping (Renumbered)

a) The owner or operator of a pharmaceutical manufacturing plant ~~shall~~ must maintain the following records:

1) The parameters ~~listed~~ in Section 215.488 ~~shall~~ must be recorded.

2) For sources subject to Section 215.482, the vapor pressure of the volatile organic material being controlled ~~shall~~ must be recorded for every process.

b) For any leak subject to Section 215.485 which cannot be readily repaired within one hour after detection, the following records ~~shall~~ much be kept:

1) The name of the leaking equipment.

2) The date and time the leak is detected.

3) The action taken to repair the leak.

4) The date and time the leak is repaired.

c) The following records ~~shall~~ must be kept for emission sources subject to Section 215.484 which contain volatile organic liquid:

1) For maintenance and inspection:

A) The date and time each cover is opened.

B) The length of time the cover remains open.

C) The reason why the cover is opened.

2) For production and sampling, written procedures or manufacturing directions specifying the circumstances under which covers may be opened and the procedures for opening covers.

d) For each emission source used in manufacture of pharmaceuticals for which the owner or operator of a pharmaceutical manufacturing plant claims emission standards are not applicable because the emissions are below the applicability cutoff in Section 215.480(a) or (b), the owner or operator ~~shall~~must:

1) Maintain a demonstration, including detailed engineering calculations, of the maximum daily and annual emissions for each such emission source

showing that the emissions are below the applicability cutoffs in Section 215.480(a) or (b), as appropriate, for the current and prior calendar years;

2) Maintain operating records for each emission source to identify whether the cutoffs in Section 215.480(a) or (b), as appropriate, are ever exceeded; and

3) Provide written notification to the Agency within 30 days ~~of~~ after a determination that ~~such~~ an emissions source has exceeded the applicability cutoff of Section 215.480(a) or (b), as appropriate.

e) Records required under this section ~~shall~~ must be maintained by the owner or operator for a minimum of two years after the date on which they are made.

f) Copies of the records ~~shall~~ must be made available to the Agency upon verbal or written request.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.490 Compliance Schedule (Renumbered)

a) The owner or operator of an emission source subject to this Subpart, the construction or modification of which ~~has~~ commenced ~~prior to (the effective date of these amendments)~~before April 11, 1988, must complete on-site construction, modification, or installation of the emission control ~~and/or~~or process equipment or complete any necessary production process changes so as to operate in compliance with this Subpart by April 30, 1991.

b) The owner and operator of any emission source subject to this Subpart, the construction or modification of which has not commenced ~~prior to (the effective date of these amendments)~~before April 11, 1988, ~~shall~~ must construct ~~such~~ the source so that it will operate in compliance with this Subpart.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART U: COKE MANUFACTURE AND BY-PRODUCT RECOVERY

Section 215.500 Exceptions

~~The provisions of~~ Subpart K ~~shall~~ does not apply to coke by-product recovery plant.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.510 Coke By-Product Recovery Plants

The owner or operator of a coke by-product recovery plant ~~shall~~ must reduce the uncontrolled emissions of volatile organic materials by at least 85 percent from the following sources, as defined:

a) Tar decanter, which is a rectangular vessel used to separate tar and flushing liquor by means of gravity;

b) Light oil sump, which receives wastewater from process equipment from the light oil recovery portion of a coke by-product recovery plant;

c) Light oil condensor/separator, which is a device used to condense or separate light oil from which the non-condensable constituents are vented; and

d) Tar condensate sump, which receives water condensate streams from the tar recovery process equipment.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.512 Coke By-Product Recovery Plant Leaks

a) The owner or operator of a coke by-product recovery plant ~~shall~~ must conduct a visual inspection program designed to detect, identify, and facilitate repair of leaks from components in light oil liquid service. Components servicing coke oven gas lines, operating flare headers, or vapor recovery devices (including pressure relief devices) are exempt from the inspection program.

b) In conducting ~~such a~~this program, the owner or operator of a coke by-product recovery plant ~~shall~~must:

1) Develop and conduct a weekly inspection program consistent with ~~the provisions of~~ Section 215.513.

2) Record all visible leaking components in light oil liquid service and identify consistent with Section 215.513 each component observed leaking ~~consistent with the provisions of Section 215.513~~.

3) Repair the leaking components as soon as practicable, but no later than 21 days after the leak is discovered unless the leaking component cannot be required until the unit is shut down or until parts needed to correct the leak are available.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.513 Inspection Program

The owner or operator ~~shall~~ must prepare and conduct an inspection program which, at a minimum, ~~shall require~~requires the owner or operator to:

a) Observe visually for leaks from all components subject to Section 215.512 on a weekly basis;

b) Identify all leaking components so that they are obvious and can be located by plant personnel performing visual inspections and Agency personnel performing inspections; and

c) Record in the monitoring log~~,~~ the information for each leaking component ~~as~~ required by ~~the provisions of~~ Sections 215.514

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.514 Recordkeeping Requirements

a) The owner or operator of a coke by-product recovery plant ~~shall~~ must maintain a monitoring log that ~~shall~~ must contain, at a minimum, the following information for each component found leaking:

1) The name of the process unit where the observed leaking component is located;

2) Identification of the type of component (e.g., valve, seal);

3) The date on which the leaking component is first observed;

4) The date on which a leaking component is repaired;

5) Identification of the type of leaking components which cannot be repaired until unit shutdown; and

6) Identification of component leaks which are not repaired within 21 days after discovery because of the unavailability of replacement parts, including the date the repair part was ordered and the date the repair part was received.

b) The monitoring log ~~shall~~ must be retained by the owner or operator for a minimum of two years after the date on which the record was made.

c) Copies of the monitoring log ~~shall~~ must be made available to the Agency upon verbal or written request at a reasonable time.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.515 Reporting Requirements

The owner or operator of a coke by-product recovery plant ~~shall~~ must submit to the Agency, ~~prior to~~before the first day of May and August of each year~~,~~ a signed statement attesting that all monitoring and repairs were performed as required under Section 215.512.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.516 Compliance Dates

The owner or operator of an emission source subject to:

a) Section 215.510 ~~shall~~ must comply with the Section by December 31, 1986;

b) Sections 215.512 through 215.514 ~~shall~~ must comply with those Sections by December 31, 1985.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.517 Compliance Plan (Repealed)

~~The owner or operator of a facility or emission source subject to this Subpart shall submit to the Agency, a compliance plan and project completion schedule for:~~

~~a) Section 215.510 by August 31, 1986;~~

~~b) Section 215.514 by October 31, 1985.~~

(Source: Repealed at 48 Ill. Reg._____, effective _____)

SUBPART V: AIR OXIDATION PROCESSES

Section 215.520 Applicability

This Subpart applies to plants using air oxidation processes ~~which are~~and located in ~~any of the following counties:~~ Will, McHenry, Cook, DuPage, Lake, Kane, Madison, St. Clair, Macoupin ~~and~~, or Monroe County.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.521 Definitions

In addition to the definitions of 35 Ill. Adm. Code 211, the following definitions apply to this Subpart:

"Air ~~Oxidation Process~~oxidation process~~":~~ " means any unit process including ammoxidation and oxychlorination which uses air or a combination of air and oxygen as an oxidant in combination with one or more organic reactants to produce one or more organic compounds.

"Cost ~~Effectiveness~~effectiveness~~":~~ " means the annual expense for cost of control of a given process stream divided by the reduction in emissions of organic material of that stream.

"Flow (F)"~~: Vent~~ means vent stream flowrate (scm/min) at a standard temperature of ~~20C~~20 ºC.

"Full ~~Operating Flowrate~~operating flowrate"~~: Maximum~~ means maximum operating capacity of the facility.

"Hourly ~~Emissions~~ emissions (E)"~~: Hourly~~ means hourly emissions reported in kg/hr measured at full operating flowrate.

"Net ~~Heating Value~~heating value (H)~~": Vent~~ means vent stream net heating value (MJ/scm), where the net enthalpy per mole of offgas is based on combustion at ~~25º C~~25 ºC and 760 mm Hg, but the standard temperature for determining the volume corresponding to one mole is ~~20º C~~20 ºC, as in the definition of "Flow."

"Process vent ~~Stream~~stream~~":~~ " means an emission stream resulting from an air oxidation process.

"Total Resource Effectiveness Index (TRE)"~~: Cost~~ means cost effectiveness in dollars per megagram of controlling any gaseous stream vented to the atmosphere from an air oxidation process divided by $1600/Mg, using the criteria and methods ~~set forth~~ in this Subpart and Appendices E and F.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.525 Emission Limitations for Air Oxidation Processes

a) ~~No~~ A person ~~shall~~ must not cause or allow the emission of volatile organic material (VOM) from any process vent stream unless the process vent stream is vented to a combustion device which is designed and operated either:

1) To reduce the volatile organic emissions vented to it with an efficiency of at least ~~ninety-eight percent (~~98%~~)~~ by weight; or

2) To emit volatile organic material at a concentration less than twenty parts per million by volume, dry basis.

b) Air oxidation facilities for which an existing combustion device is employed to control process VOM emissions are not required to meet the 98 percent emissions limit until the combustion device is replaced for other reasons, which ~~shall be considered to~~ include~~, but not be limited to,~~ normal maintenance, malfunction, accident, and obsolescence. The combustion device is considered to be replaced when:

1) All of the device is replaced; or

2) When the cost of the repair of the device or the cost of replacement of part of the device exceeds 50% of the cost of replacing the entire device with a device which complies.

c) The limitations of subsection (a) do not apply to any process vent stream or combination of process vent streams which has a Total Resource Effectiveness Index (TRE) greater than 1.0, as determined by the following methods:

1) If an air oxidation process has more than one process vent stream, TRE ~~shall~~ must be based upon a combination of the process vent stream.

2) TRE of a process vent stream ~~shall~~ must be determined according to the following equation:

$$TRE = E^{-1}[a + bF^{n} + cF + dFH + e(FH)^{n} + fF^{0.5}]$$

where:

$n = 0.88$

TRE = Total resource effectiveness index.

F = Vent stream flowrate (scm/min), at a standard temperature of ~~20 C~~20 ºC.

E = Hourly measured emissions in kg/hr.

H = Net heating value of the vent stream (MJ/scm), where the net enthalpy per mole of offgas is based on combustion at ~~25 C~~25 ºC and 760 mm Hg, but the standard temperature for determining the volume corresponding to one mole is ~~20 C~~20 ºC, as in the definition of "Flow".

a,b,c,d,e and f = Coefficients obtained by use of Appendix F

3) For nonchlorinated process vent streams, if the net heating value~~,~~ H~~,~~ is greater than 3.6 MJ/scm, F shall be replaced by F' for purposes of calculating TRE. F' is computed as follows:

F' = FH / 3.6

where f and H are as defined in subsection (c)(2).

4) The actual numerical values used in the equation ~~described~~ in subsection (c)(2) ~~shall~~ must be determined as follows:

A) All reference methods and procedures for determining the flow~~,~~ (F), hourly emissions~~,~~ (E), and net heating~~,~~ value (H)~~, value shall~~ must be in ~~accordance~~ compliance with Appendix E.

B) All coefficients ~~described~~ in subsection (c)(2) ~~shall~~ must be in ~~accordance~~ compliance with Appendix F.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.526 Testing and Monitoring

a) Upon request by the Agency during the permitting process under Section 39 of the Act, the owner or operator of an air oxidation process ~~shall~~ must demonstrate compliance with this Subpart by ~~use of~~using the methods ~~specified~~ in Appendix E. This Section does not limit the USEPA's authority~~,~~ under the ~~Clear~~ Clean Air Act~~,~~ to require demonstrations of compliance.

b) A person planning to conduct a volatile organic material emissions test to demonstrate compliance with this Subpart ~~shall~~ must notify the Agency of that intent not less than 30 days before the planned initiation of the ~~tests~~ test so ~~that~~ the Agency may observe the test.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.527 Compliance Date

Each owner or operator of an emission source subject to this Subpart ~~shall~~ must comply with ~~the standards and limitations of~~ this Subpart by December 31, 1987.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART W: AGRICULTURE

Section 215.541 Pesticide Exception

~~The provisions of~~ Sections 215.301 and 215.302 ~~shall~~ do not apply to the spraying or use of insecticides, herbicides, or other pesticides.

(Source: Amended at 48 Ill. Reg. _____, effective _____)
)

SUBPART X: CONSTRUCTION

Section 215.561 Architectural Coatings

~~No~~ A person ~~shall~~ must not cause or allow the sale or use in the Chicago or St. Louis (Illinois) major metropolitan areas of any architectural coating containing more than 20 percent by volume of photochemically reactive material in containers having a capacity of more than one gallon.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.562 Paving Operations

~~The provisions of~~ Sections 215.301 and 215.302 ~~shall~~ do not apply to the application of paving asphalt and pavement marking paint from sunrise to sunset.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.563 Cutback Asphalt

a) ~~No~~ A person ~~shall~~ must not cause or allow the use or application of cutback asphalt for paving, resurfacing, reconditioning, repairing, or otherwise maintaining a roadway unless:

1) The use or application of the cutback asphalt commences on or after October 1 of any year and ~~such~~ the use or application is completed by April 30 of the following year; or

2) The cutback asphalt is a long-life stockpile material which remains in stock after April 30 of each year ~~and as such~~, in which case it may be used until depleted for patching potholes and for other similar repair work; or

3) The cutback asphalt is to be used solely as an asphalt prime coat.

b) Sources subject to this section are not required to submit or obtain an Agency approved compliance plan or project completion schedule under 35 Ill. Adm. Code 201, Subpart H.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART Y: GASOLINE DISTRIBUTION

Section 215.581 Bulk Gasoline Plants

a) Subject to subsection (e), ~~no~~ a person ~~may~~ must not cause or allow the transfer of gasoline from a delivery vessel into a stationary storage tank located at a bulk gasoline plant unless:

1) The delivery vessel and the stationary storage tank are each equipped with a vapor collection system that meets the requirements of subsection (d)(4);

2) Each vapor collection system is operating;

3) The delivery vessel displays the appropriate sticker ~~pursuant to the requirements of~~under Section 215.584(b) or (d);

4) The pressure relief ~~valve(s)~~valve or valves on the stationary storage tank and the delivery vessel are set to release at no less than 0.7 psi or the highest pressure allowed by state or local fire codes or the guidelines of the National Fire Prevention Association; and

5) The stationary storage tank is equipped with a submerged loading pipe.

b) Subject to subsection (f), ~~no~~ a person ~~may~~ must not cause or allow the transfer of gasoline from a stationary storage tank located at a bulk gasoline plant into a delivery vessel unless:

1) The requirements ~~set forth~~ in subsections (a)(1) through (a)(4) are met; and

2) Equipment is available at the bulk gasoline plant to provide for the submerged filling of the delivery vessel, or the delivery vessel is equipped for bottom loading.

c) Subject to subsection (e), each owner of a stationary storage tank located at a bulk gasoline plant ~~shall~~must:

1) Equip each stationary storage tank with a vapor control system that meets the requirements of subsection (a) or (b), whichever is applicable;

2) Provide instructions to the operator of the bulk gasoline plant describing necessary maintenance operations and procedures for prompt notification of the owner in case of any malfunction of a vapor control system; and

3) Repair, replace, or modify any worn out or malfunctioning component or element of design.

d) Subject to subsection (e), each operator of a bulk gasoline plant ~~shall~~must:

1) Maintain and operate each vapor control system in ~~accordance~~ compliance with the owner's instructions;

2) Promptly notify the owner of any scheduled maintenance or malfunction requiring replacement or repair of a major component of a vapor control system; and

3) Maintain gauges, meters, or other specified testing devices in proper working order;

4) Operate the bulk plant vapor collection system and gasoline loading equipment in a manner that prevents:

A) Gauge pressure from exceeding 18 inches of water and vacuum from exceeding 6 inches of water, as measured as close as possible to the vapor hose connection; and

B) A reading equal to or greater than 100 percent of the lower explosive limit (LEL measured as propane) when tested in ~~accordance~~ compliance with the procedure described in EPA 450/2-78-051 Appendix B, incorporated by reference in Section 215.105(e); and

C) Avoidable leaks of liquid during loading or unloading operations.

5) Provide a pressure tap or equivalent on the bulk plant vapor collection system in order to allow the determination of compliance with Section 215.581(d)(4)(A); and

6) Within 15 business days after discovery of the leak by the owner, operator, or the Agency, repair and retest a vapor collection system which exceeds the limits of subsection (d)(4)(A) or (B).

e) ~~The requirements of subsection~~Subsections (a), (c), and (d) ~~shall~~ do not apply to:

1) Any stationary storage tank with a capacity of less than 575 gallons; or

2) Any bulk gasoline plant whose annual gasoline throughput is less than 350,000 gallons as averaged over the preceding three calendar years.

f) ~~The requirements of subsection~~Subsection (b) ~~shall only apply~~applies only to bulk gasoline plants:

1) That have an annual gasoline throughput greater than or equal to 1,000,000 gallons, as averaged over the preceding three calendar years; and

2) That either distribute gasoline to gasoline dispensing facilities subject to ~~the requirements of~~ Section 215.583(a)(2), 35 Ill. Adm. Code 218.583(b)(2)~~,~~ or 35 Ill. Adm. Code 219.583(a)(2) or that are located in ~~the following counties:~~ Boone, Peoria, Rock Island, Tazewell~~,~~ or Winnebago County.

g) Bulk gasoline plants were required to take certain actions summarized in Appendix C to achieve compliance ~~which are summarized in Appendix C~~.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.582 Bulk Gasoline Terminals

a) ~~No~~ A person ~~shall~~ must not cause or allow the transfer of gasoline into any delivery vessel from any bulk gasoline terminal unless:

1) The bulk gasoline terminal is equipped with a vapor control system that limits emission of volatile organic material to 80 mg/1 (0.00067 lbs/gal) of gasoline loaded;

2) The vapor control system is operating~~,~~ and all vapors displaced in the loading of gasoline to the delivery vessel are vented only to the vapor control system;

3) There is no liquid drainage from the loading device when it is not in use;

4) All loading and vapor return lines are equipped with fittings which are vapor tight; and

5) The delivery vessel displays the appropriate sticker ~~pursuant to the requirements of~~under Section 215.584(b) or (d); or, if the terminal is driver-loaded, the terminal owner or operator ~~shall~~ must be deemed to be in compliance with this section when terminal access authorization is limited to ~~those~~ owners ~~and/or~~or operators of delivery vessels who have provided a current certification ~~as required by~~under Section 215.584(c)(3).

b) Bulk gasoline terminals were required to take certain actions summarized in Appendix C to achieve compliance ~~which are summarized in Appendix C~~.

c) The operator of a bulk gasoline terminal ~~shall~~must:

1) Operate the terminal vapor collection system and gasoline loading equipment in a manner that prevents:

A) Gauge pressure from exceeding 18 inches of water and vacuum from exceeding 6 inches of water as measured as close as possible to the vapor hose connection; and

B) A reading equal to or greater than 100 percent of the lower explosive limit (LEL measured as propane) when tested in ~~accordance~~ compliance with the procedure described in EPA 450/2-78-051 Appendix B, incorporated by reference in Section 215.105(e); and

C) Avoidable leaks of liquid during loading or unloading operations.

2) Provide a pressure tap or equivalent on the terminal vapor collection system in order to allow the determination of compliance with Section 215.582(d)(1)(A); and

3) Within 15 business days after discovery of the leak by the owner, operator, or the Agency, repair and retest a vapor collection system which exceeds the limits of subsection (d)(1)(A) or (B).

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.583 Gasoline Dispensing Facilities - Storage Tank Filling Operations

a) Subject to subsection (b) ~~below~~, ~~no~~ a person ~~shall~~ must not cause or allow the transfer of gasoline from any delivery vessel into any stationary storage tank at a gasoline dispensing facility unless:

1) The tank is equipped with a submerged loading pipe; and

2) The vapors displaced from the storage tank during filling are processed by a vapor control system that includes one or more of the following:

A) A vapor collection system that meets the requirements of subsection (d)(4) ~~below~~; or

B) A refrigeration-condensation system or any other system approved by the Agency that recovers at least 90 percent by weight of all vaporized organic material from the equipment being controlled; and

C) The delivery vessel displays the appropriate sticker ~~pursuant to the requirements of~~under Section 215.584(b) or (d) ~~of this Part~~.

b) ~~The requirements of subsection~~Subsection (a)(2) ~~above shall~~does not apply to transfers of gasoline to a stationary storage tank at a gasoline dispensing facility if:

1) The tank is equipped with a floating roof or other system of equal or better emission control ~~as~~ approved by the Agency;

2) The tank has a capacity of less than 2000 gallons and is in place and operating before January 1, 1979;

3) The tank has a capacity of less than 575 gallons; or

4) The tank is not located in ~~any of the following counties:~~ Boone, Cook, DuPage, Kane, Lake, Madison, McHenry, Peoria, Rock Island, St. Clair, Tazewell, Will, or Winnebago County.

c) Subject to subsection (b) ~~above~~, each owner of a gasoline dispensing facility ~~shall~~must:

1) Install all control systems and make all process modifications required by subsection (a) ~~above~~;

2) Provide to the operator of the gasoline dispensing facility instructions ~~to the operator of the gasoline dispensing facility~~ describing necessary maintenance operations and procedures for prompt notification of the owner in the case of any malfunction of a vapor control system; and

3) Repair, replace, or modify any worn out or malfunctioning component or element of design.

d) Subject to subsection (b) ~~above~~, each operator of a gasoline dispensing facility and each delivery vessel operator ~~shall~~must:

1) Maintain and operate each vapor control system in ~~accordance~~ compliance with the owner's instructions;

2) Promptly notify the owner of any scheduled maintenance or malfunction requiring replacement or repair of a major component of a vapor control system;

3) Maintain gauges, meters, or other specified testing devices in proper working order;

4) Operate the vapor collection system and delivery vessel unloading points in a manner that prevents:

A) A reading equal to or greater than 100 percent of the lower explosive limit (LEL measured as propane) when tested in ~~accordance~~ compliance with ~~the procedure described in~~ EPA 450/2-78-051 Appendix B, incorporated by reference at Section 215.105(e), and

B) Avoidable leaks of liquid during the filling of storage tanks; and

5) Within 15 business days after discovery of the leak by the owner, operator, or the Agency, repair and retest a vapor collection system which exceeds the limits of subsection (d)(4)(A) above.

e) Gasoline dispensing facilities were required to take certain actions summarized in Appendix C to achieve ~~compliance which are summarized in Appendix C of this Part~~.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.584 Gasoline Delivery Vessels

a) Any delivery vessel equipped for vapor control by use of vapor collection equipment:

1) ~~Shall~~ Must have a vapor space connection ~~that is~~ equipped with fittings which are vapor tight;

2) ~~Shall~~ Must have its hatches closed at all times during loading or unloading operations, unless a top loading vapor recovery system is used;

3) ~~Shall~~ Must not internally exceed a gauge pressure of 18 inches of water or a vacuum of 6 inches of water;

4) ~~Shall~~ Must be designed and maintained to be vapor tight at all times during normal operations;

5) ~~Shall~~ Must not be refilled in Illinois at other than:

A) A bulk gasoline terminal that complies with ~~the requirements of~~ Section 215.582 or

B) A bulk gasoline plant that complies with ~~the requirements of~~ Section 215.581(b)(1) and (2).

6) ~~Shall~~ Must be tested annually in ~~accordance~~ compliance with Method 27, 40 CFR ~~Part~~ 60, Appendix A, incorporated by reference in Section

215.105. Each vessel must be repaired and retested with 15 business days after discovery of the leak by the owner, operator, or the Agency, when it fails to sustain:

A) A pressure drop of no more than three inches of water in five minutes; and

B) A vacuum drop of no more than three inches of water in five minutes.

b) Any delivery vessel meeting the requirements of subsection (a) ~~shall~~ must have a sticker affixed to the tank adjacent to the tank manufacturer's data plate which contains the tester's name, the tank identification number, and the date of the test. The sticker ~~shall~~ must be in a form prescribed by the Agency, and ~~shall~~ must be displayed no later than December 31, 1987.

c) The owner or operator of a delivery vessel ~~shall~~must:

1) Maintain copies of any test required under subsection (a)(6) for a period of 3 years;

2) Provide copies of these tests to the Agency upon request; and

3) Provide annual test result certification to bulk gasoline plants and terminals where the delivery vessel is loaded.

d) Any delivery vessel which has undergone and passed a test in another state which has a USEPA-approved leak testing and certification program will satisfy ~~the requirements of~~ subsection (a). Delivery vessels must display a sticker, decal, or stencil approved by the state where tested or comply with ~~the requirements of~~ subsection (b). All such stickers, decals, or stencils ~~shall~~ must be displayed no later than December 31, 1987.

Section 215.585 Gasoline Volatility Standards (Repealed)

(Source: Repealed at 37 Ill. Reg. 1683, effective January 28, 2013)

Section 215.586 Emissions Testing

a) Any tests of organic material emissions from bulk gasoline terminals, including tests conducted to determine control equipment efficiency or control device destruction efficiency, ~~shall~~ must be conducted in ~~accordance~~ compliance with the Test Methods and Procedures for the Standards of Performance for Bulk Gasoline Terminals, 40 CFR 60.503, incorporated by reference in Section 215.105. Any

alternate test method must be approved by the Agency, which ~~shall~~ must consider data comparing the performance of the proposed alternative to the performance of the approved ~~tst method(s)~~test method or methods. If the Agency determines that ~~such~~ the data ~~demonstrates the~~demonstrate that the proposed alternative will achieve results equivalent ~~ot~~ to the approved test ~~method(s)~~method or methods, the Agency ~~shall~~ must approve the proposed alternative.

b) Upon a reasonable request by the Agency, the owner or operator of a volatile organic material emission source subject to this Subpart ~~shall~~ must conduct emissions testing~~,~~ at ~~such person's~~its own expense~~,~~ to demonstrate compliance.

c) A person planning to conduct an organic material emissions test to demonstrate compliance with this Subpart ~~shall~~ must notify the Agency of that intent not less than 30 days before the planned initiation of the ~~tests~~ test so the Agency may observe the test.

Section 215.607 Standards for Petroleum Solvent Dry Cleaners

a) The owner or operator of a petroleum solvent dry cleaning dryer ~~shall~~ must either:

1) Limit emissions of volatile organic material to the atmosphere to an average of 3.5 kilograms of volatile organic material per 100 kilograms dry weight of articles dry cleaned, or

2) Install and operate a solvent recovery dryer ~~in a manner such~~so that the dryer remains closed and the recovery phase continues until a final solvent flow rate of 50 milliliters per minute is attained.

b) The owner or operator of a petroleum solvent filtration system ~~shall~~ must either:

1) Reduce the volatile organic material content in all filtration wastes to 1.0 kilogram or less per 100 kilograms dry weight of articles dry cleaned~~,~~ before disposal~~,~~ and exposure to the atmosphere, or

2) Install and operate a cartridge filtration system~~,~~ and drain the filter cartridges in their sealed housings for 8 hours or more before ~~their removal~~removing them.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.608 Operating Practices for Petroleum Solvent Dry Cleaners

~~In order to~~To minimize fugitive solvent emissions, the owner or operator of a petroleum solvent dry cleaning facility ~~shall~~ must employ good housekeeping practices including ~~the following~~:

a) General Housekeeping Requirements

1) Equipment containing solvent (washers, dryers, extractors, and filters) ~~shall~~ must remain closed at all times except during load transfer and maintenance. Lint filter and button trap covers ~~shall~~ must remain closed except when solvent-laden material is being removed.

2) Cans, buckets, barrels, and other containers of solvent or of solvent-laden material ~~shall~~ must be covered except when in use.

3) Solvent-laden material ~~shall~~ must be exposed to the atmosphere only for the minimum time necessary for load transfer.

b) Installation and operation of equipment

1) All cartridge filters ~~shall~~ must be installed and operated in ~~accordance~~ compliance with the procedures and specifications recommended by the manufacturer for the cartridge filter. After installation, the cartridges ~~shall~~

must be inspected, monitored, and maintained in ~~accordance~~ compliance with the manufacturer's recommendations; and

2) Vents on containers for new solvent and for solvent-containing waste ~~shall~~ must be constructed and maintained ~~so as~~ to minimize solvent vapor emissions. Criteria for ~~the minimization of~~minimizing solvent vapor emissions include ~~the elimination of~~eliminating solvent buckets and barrels standing open to the atmosphere~~,~~ and ~~the repair of~~repairing gaskets and seals that expose solvent-rich environments to the atmosphere, to be determined through visual inspection.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.609 Program for Inspection and Repair of Leaks

a) The owner or operator of a petroleum solvent dry cleaning facility ~~shall~~ must conduct the following visual inspections on a weekly basis:

1) Washers, dryers, solvent filters, settling tanks, vacuum stills, and containers and conveyors of petroleum solvent ~~shall~~ must be inspected for visible leaks of solvent liquid.

2) Pipes, hoses, and fittings ~~shall~~ must be inspected for active dripping or dampness.

3) Pumps and filters ~~shall~~ must be inspected for leaks around seals and access covers.

4) Gaskets and seals ~~shall~~ must be inspected for wear and defects.

b) Leaks of petroleum solvent liquid and vapors ~~shall~~ must be repaired within three working days ~~of~~ after detection, unless necessary replacement parts are not on site.

1) If necessary, repair parts ~~shall~~ must be ordered within three working days ~~of~~ after detection of the leak.

2) The leak ~~shall~~ must be repaired within three days ~~of~~ after delivery of necessary parts.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.610 Testing and Monitoring

a) Compliance with Sections 215.607(b)(2), 215.608, and 215.609 ~~shall~~ must be determined by visual inspection; and

b) Compliance with Sections 215.607(a)(2) and (b)(1) ~~shall~~ must be determined by methods ~~described~~ in EPA-450/3-82-009 (1982) and ~~does not include~~not including any later amendments or editions.

c) If a control device is used to comply with Section 215.607(a)(1), then compliance ~~shall~~ must be determined using 40 CFR 60 Appendix A, Method 25 (1984) and ~~does not include~~not including any later amendments or editions.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.611 Exemption for Petroleum Solvent Dry Cleaners

~~The provisions of~~ Sections 215.607 through 215.610 ~~shall~~ do not apply to petroleum solvent dry cleaning facilities whose emissions of volatile organic material do not exceed 91 megagrams (100 tons) per year in the absence of pollution control equipment or whose emissions of volatile organic material~~,~~ as limited by the operating permit~~,~~ will not exceed 91 megagrams (100 tons) per year in the absence of pollution control equipment.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.612 Compliance Dates and Geographical Areas

Owners and operators of emission sources located in the counties listed below ~~shall~~ must comply with ~~the requirements of~~ Sections 215.607 through 215.609 ~~as expeditiously as practicable but~~ no later than December 31, 1987:

Cook	Madison
DuPage	McHenry
Kane	Monroe
Lake	St. Clair
Macoupin	Will

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.613 Compliance Plan (Repealed)

~~a) The owner or operator of an emission source subject to Section 215.610(a) shall submit to the Agency a compliance plan, including a project completion schedule where applicable, no later than May 31, 1987.~~

~~b) The plan and schedule shall meet the requirements of 35 Ill. Adm. Code 201.~~

(Source: Repealed at 48 Ill. Reg._____, effective _____)

Section 215.614 Testing Method for Volatile Organic Material Content of Wastes

The volatile organic material content of wastes ~~shall~~ must be determined by Method 24, 40 CFR 60, Appendix A, incorporated by reference in Section 215.105. Any alternate test method must be approved by the Agency, which ~~shall~~ must consider data comparing the performance of the proposed alternative to the performance of the approved test ~~method(s)~~mehod or methods. If the Agency determines that ~~such~~ the data ~~demonstrates~~ demonstrate that the proposed alternative will achieve results equivalent to the approved test ~~method(s)~~method or methods, the Agency ~~shall~~ must approve the proposed alternative.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.615 Emissions Testing

a) Any tests of volatile organic material emissions, including tests conducted to determine control equipment efficiency or control device destruction efficiency, ~~shall~~ must be conducted in ~~accordance~~ compliance with the methods and procedures ~~specified~~ in Section 215.102.

b) Upon a reasonable request by the Agency, the owner or operator of a volatile organic material emissions source subject to this Subpart ~~shall~~ must conduct emissions testing~~,~~ at ~~such person's~~its own expense~~,~~ to demonstrate compliance.

c) A person planning to conduct a volatile organic material emissions test to demonstrate compliance with this Subpart ~~shall~~ must notify the Agency of that intent not less than 30 days before the planned initiation of the ~~tests~~ test so the Agency may observe the test.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART AA: PAINT AND INK MANUFACTURING

Section 215.620 Applicability

a) This Subpart ~~shall apply~~applies to ~~the following counties:~~ Cook, DuPage, Kane, Lake, Macoupin, Madison, McHenry, Monroe, St. Clair, and Will Counties.

b) This Subpart ~~shall apply~~applies to all paint and ink manufacturing plants which:

1) include process emission sources not subject to Subparts B, E, F, N, P, Q, R, S, U, V, X, Y, or Z ~~of this Part,~~ and which process emission sources as a group would emit 100 tons or more per year of volatile organic material if no air pollution control equipment were used, or

2) produce more than 2,000,000 gallons per year of paints or ink formulations, which contain less than 10 percent~~,~~ water by weight~~, water~~,

and ink formulations not containing as the primary solvents water, Magie oil, or glycol.

c) For the purposes of this Subpart, uncontrolled volatile organic material emissions are the emissions of volatile organic material which would result if no air pollution control equipment were used.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.621 Exemption for Waterbase Material and Heatset Offset Ink

~~The requirements of~~ Sections 215.624, 215.625, and 215.628(a) ~~shall~~ do not apply to equipment while it is being used to produce paint or ink formulations which contain 10 percent or more~~,~~ water by weight~~, water~~, or inks containing Magie oil and glycol as the primary solvent.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.623 Permit Conditions

~~No~~ A person ~~shall~~ must not violate any condition in a permit when the condition results in ~~exclusion of~~excluding the plant or an emission source from this Subpart.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.624 Open-top Mills, Tanks, Vats, or Vessels

~~No~~ A person ~~shall~~ must not operate an open-top mill, tank, vat, or vessel, with a volume of more than 12 gallons for the production of paint or ink unless:

a) The mill, tank, vat, or vessel is equipped with a cover which completely covers the mill, tank, vat, or vessel opening, except for an opening no larger than necessary to allow for safe clearance for a mixer shaft. ~~Such~~ The cover ~~shall~~ must extend at least 1/2 inch beyond the outer rim of the opening or be attached to the rim.

b) The cover remains closed, except when production, sampling, maintenance, or inspection procedures require access.

c) The cover is maintained in good condition~~,~~ such that, when in place, it maintains contact with the rim of the opening for at least 90% of the circumference of the rim.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.625 Grinding Mills

a) ~~No~~ A person ~~shall~~ must not operate a grinding mill for the production of paint or ink which is not maintained in ~~accordance~~ compliance with the manufacturer's specifications.

b) ~~No~~ A person ~~shall~~ must not operate a grinding mill fabricated or modified after the effective date of this Subpart which is not equipped with fully enclosed screens.

c) The manufacturer's specifications ~~shall~~ must be kept on file at the plant by the owner or operator of the grinding mill and ~~be~~ made available to any person upon verbal or written request during business hours.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.628 Leaks

The owner or operator of a paint or ink manufacturing plant ~~shall~~must, for the purpose of detecting leaks, conduct an equipment monitoring program consistent with the following:

a) Each pump ~~shall~~ must be checked by visual inspection each calendar week for indications of ~~leaks, that is,~~ liquids dripping from the pump seal~~. If there are indications of liquids dripping from the pump seal~~, in which case the pump ~~shall~~ must be repaired as soon as practicable, but no later than 15 calendar days after the leak is detected.

b) Any pump, valve, pressure relief valve, sampling connection, open-ended valve, and flange or connector containing a fluid which is at least 10 percent by weight volatile organic material which appears to be leaking on the basis of sight, smell, or sound ~~shall~~ must be repaired as soon as practicable, but no later than 15 calendar days after the leak is detected.

c) A weather proof, readily visible tag~~,~~ in bright colors such as red or yellow, bearing an identification number and the date on which the leak was detected, ~~shall~~ must be attached to leaking equipment. The tag may be removed when the equipment has been repaired by adjusting~~is adjusted~~ or otherwise ~~altered~~ altering it to allow operation without leaking.

d) When a leak is detected, the owner or operator ~~shall~~ must record the date of detection and repair, and the record ~~shall~~ must be retained at the plant for at least 2 years from the date of each detection or each repair attempt. The record ~~shall~~ must be made available to any person upon verbal or written request during business hours.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.630 Clean Up

a) No person shall clean paint or ink manufacturing equipment with organic solvent unless the equipment being cleaned is completely covered or enclosed except for an opening no larger than necessary to allow safe clearance for proper operation of the cleaning equipment, considering the method and materials being used.

b) ~~No~~ A person ~~shall~~ must store organic wash solvent only in ~~other than~~ closed containers, unless closed containers are demonstrated to be a safety hazard, ~~or~~ and must not dispose of organic wash solvent in a manner ~~such~~ so that more than 20 percent by weight is allowed to evaporate into the atmosphere.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.636 Compliance Date

Owners and operators of emission sources subject to this Subpart ~~shall~~ must comply with its requirements by April 1, 1989.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART BB: POLYSTYRENE PLANTS

Section 215.875 Applicability of Subpart BB

~~The provisions of this~~This Subpart ~~shall apply~~applies to polystyrene plants:

a) ~~Which are located~~Located in ~~any of the following counties:~~ Will, McHenry, Cook, DuPage, Lake, Kane, Madison, St. ~~Claire~~Clair, Monroe ~~and~~, or Macoupin County;

b) Which use continuous processes to manufacture polystyrene - polybutadiene co-polymer; and

c) Which fall within Standard Industrial Classification Group No. 282, Industry No. 2821, except that the manufacture of polystyrene resins need not be the primary manufacturing process at the plant.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.877 Emissions Limitation at Polystyrene Plants

~~No~~ A person ~~shall~~ must not cause or allow the emissions of volatile organic material from the material recovery section to exceed 0.12 kg of ~~Volatile Organic Material~~volatile organic material per 1000 kg of polystyrene resin produced.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.879 Compliance Date

Every owner and operator of an emission source subject to this Subpart ~~shall~~ must comply with its ~~standards and limitations~~requirements by December 31, 1987.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.881 Compliance Plan (Repealed)

~~a) The owner or operator of an emission source subject to the requirements of this Subpart shall submit to the Agency a compliance plan in accordance with 35 Ill. Adm. Code 201. Subpart H, including a project completion schedule on or before December 1, 1987.~~

~~b) Unless the submitted compliance plan or schedule is disapproved by the Agency, the owner or operator of a facility or emission source subject to this Subpart may operate the emission source according to the plan and schedule as submitted.~~

~~c) The plan and schedule shall meet the requirements of 35 Ill. Adm. Code 201. Subpart H and Section 215.883.~~

(Source: Repealed at 48 Ill. Reg._____, effective _____)

Section 215.883 Special Requirements for Compliance Plan (Repealed)

~~For sources subject to this Subpart, an approvable compliance plan shall include:~~

~~a) A description of each process which is subject to an emissions limitation;~~

~~b) Quantification of the emissions from each process;~~

~~c) A description of the procedures and methods used to determine the emissions of volatile organic material;~~

~~d) A description of the methods which will be used to demonstrate compliance with the allowable plantwide emission limitation (Section 215.877), including a method of inventory, recordkeeping and emission calculation or measurement.~~

(Source: Repealed at 48 Ill. Reg._____, effective _____)

Section 215.886 Emission Testing

a) Any tests of volatile organic material emissions, including tests conducted to determine control equipment efficiency or control device destruction efficiency,

~~shall~~ must be conducted in ~~accordance~~compliance with ~~the methods and procedures specified in~~ Section 215.102.

b) Upon a reasonable request by the Agency, the owner or operator of a polystyrene plant subject to this Subpart ~~shall~~ must conduct emissions testing~~,~~ at ~~his~~ its own expense~~,~~ to demonstrate compliance.

c) A person planning to conduct a volatile organic material emissions test to demonstrate compliance with this Subpart ~~shall~~ must notify the Agency of that intent not less than 30 days before the planned initiation of the ~~tests~~ test so the Agency may observe the test.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART PP: MISCELLANEOUS FABRICATED PRODUCT MANUFACTURING PROCESSES

Section 215.920 Applicability

a) ~~The requirements of this~~This Subpart ~~apply~~ applies to ~~the following counties:~~ Cook, DuPage, Kane, Lake, Macoupin, Madison, McHenry, Monroe, St. Clair, and Will Counties.

b) ~~The requirements of this~~This Subpart ~~apply~~ applies to a plant's miscellaneous fabricated product manufacturing process emission sources that are not regulated by Subparts B, E, F, N, P, Q, R, S, U, V, X, Y, or Z if the plant is subject to this Subpart. A plant is subject to this Subpart if it contains process emission sources~~,~~ not regulated by Subparts B, E, F, N, P, Q, R, S, U, V, X, Y, or Z, which as a group would emit 100 tons or more per year of volatile organic material if no air pollution control equipment were used.

c) If a plant ceases to fulfill the criteria of subsection (b), the requirements of this Subpart continue to apply to a miscellaneous fabricated products manufacturing process emission source which was subject to and met the control requirements of Section 215.926.

d) No limits under this Subpart apply to:

1) Emission sources with emissions of volatile organic material to the atmosphere less than or equal to 1.0 tons per year if the total emissions from those sources not complying with Section 215.926 ~~does~~ do not exceed 5.0 tons per year; and

2) Emission sources whose emissions of volatile organic material are subject to limits in 35 Ill. Adm. Code 230 or ~~35 Ill. Adm. Code~~ 231; or the Lowest Achievable Emission Rate~~,~~ under 35 Ill. Adm. Code 203; or Best

Available Control Technology~~,~~ under a permit issued under Section 9.1(d) ~~of the Act~~ or ~~under~~ Section 9.4 of the Act.

e) For the purposes of this Subpart, an emission source ~~shall~~ must be considered regulated by a Subpart if it is subject to the limits of that Subpart, or it would be subject to the limits of that Subpart if the emission sources~~,~~ emitting VOM~~,~~ had sufficient size, throughput, or emissions, or if the emission source did not meet a specific exemption ~~contained~~ in that Subpart.

f) For the purposes of this Subpart, uncontrolled volatile organic material emissions are the emissions of volatile organic material that would result if no air pollution control equipment were used.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.923 Permit Conditions

~~No~~ A person ~~shall~~ must not violate any condition in a permit when the condition results in ~~exclusion of~~excluding the plant or an emission source from this Subpart.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.926 Control Requirements

a) Every owner or operator of an emission source of volatile organic material ~~shall~~ must operate in compliance with RACT, which for emission sources subject to this Subpart ~~shall~~ must be:

1) Emission capture and control techniques which achieve an overall reduction in uncontrolled volatile organic material emissions of at least 81%; or

2) For coating lines, volatile organic material emissions not to exceed 0.42 kg/1 (3.5 lb/gal) of coating materials as applied, excluding water and any compounds which are specifically exempted from the definition of volatile organic material, on a daily basis. Owners and operators complying with this subsection are not required to comply with Section 215.301; or

3) An adjusted RACT emissions limitation obtained ~~pursuant to~~under Subpart I.

b) Owners and operators of emission sources subject to this Subpart ~~shall~~ must comply with its requirements by April 1, 1989.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART QQ: MISCELLANEOUS FORMULATION MANUFACTURING PROCESSES

Section 215.940 Applicability

a) ~~The requirements of this~~This Subpart ~~apply~~ applied to ~~the following counties:~~ Cook, DuPage, Kane, Lake, Macoupin, Madison, McHenry, Monroe, St. Clair, and Will Counties.

b) ~~The requirements of this~~This Subpart ~~apply~~ applies to a plant's miscellaneous formulation manufacturing process emission sources~~,~~ which are not regulated by Subpart B, E, F, N, P, Q, R, S, U, V, X, Y, or Z~~,~~ if the plant is subject to this Subpart. A plant is subject to this Subpart if it contains process emission sources~~,~~ not regulated by Subpart B, E, F, N, P, Q, R, S, U, V, X, Y, or Z~~,~~ which as a group would emit 100 tons or more per year of volatile organic material if no air pollution control equipment were used.

c) If a plant ceases to fulfill the criteria of subsection (b), ~~the requirements of~~ this Subpart ~~continue~~ continues to apply to a miscellaneous formulation manufacturing process emission source that was subject to and met the control requirements of Section 215.946.

d) No limits under this Subpart apply to:

1) Emission sources with emissions of volatile organic material to the atmosphere less than or equal to 2.5 tons per year if the total emissions from those sources not complying with Section 215.946 do not exceed 5.0 tons per year, and

2) Emission sources whose emissions of volatile organic material are subject to limits in 35 Ill. Adm. Code 230 or ~~35 Ill. Adm. Code~~ 231; or the Lowest Achievable Emission Rate~~,~~ under 35 Ill. Adm. 203; or Best Available Control Technology~~,~~ under a permit issued under Section 9.1(d) ~~of the Act~~ or ~~under~~ Section 9.4 of the Act.

e) For the purposes of this Subpart, an emission source ~~shall~~ must be considered regulated by a Subpart if it is subject to the limits of that Subpart, or it would be subject to the limits of that Subpart if the emission sources~~,~~ emitting VOM~~,~~ had sufficient size, throughput, or emissions, or if the emission source did not meet a specific exemption ~~contained~~ in that Subpart.

f) For the purposes of this Subpart, uncontrolled volatile organic material emissions are the emissions of volatile organic material that would result if no air pollution control equipment were used.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.943 Permit Conditions

~~No~~ A person ~~shall~~ must not violate any condition in a permit when the condition results in ~~exclusion of~~excluding the plant or an emission source from this Subpart.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.946 Control Requirements

a) Every owner or operator of an emission source of volatile organic material ~~shall~~ must operate in compliance with RACT, which for emission sources subject to this Subpart ~~shall~~ must be:

1) Emission capture and control techniques which achieve an overall reduction in uncontrolled volatile organic material emissions of at least 81%; or

2) An adjusted RACT emissions limitation obtained ~~pursuant to~~under Subpart I.

b) ~~Owner~~ Owners and operators of emission sources subject to this Subpart ~~shall~~ must comply with its requirements by April 1, 1989

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART RR: MISCELLANEOUS ORGANIC CHEMICAL MANUFACTURING PROCESSES

Section 215.960 Applicability

a) ~~The requirements of this~~This Subpart ~~apply~~ applies to ~~the following counties:~~ Cook, DuPage, Kane, Lake, Macoupin, Madison, McHenry, Monroe, St. Clair, and Will Counties.

b) ~~The requirements of this~~This Subpart ~~apply~~ applies to a plant's miscellaneous organic chemical manufacturing process emission sources which are not regulated by Subpart B, E, F, N, P, Q, R, S, U, V, X, Y, or Z if the plant is subject to this Subpart. A plant is subject to this Subpart if it contains process emission sources~~,~~ not regulated by Subpart B, E, F, N, P, Q, R, S, U, V, X, Y, or Z~~,~~ which as a group would emit 100 tons or more per year of volatile organic material if no air pollution control equipment were used.

c) If a plant ceases to fulfill the criteria of subsection (b), ~~the requirements of~~ this Subpart ~~shall continue~~continues to apply to a miscellaneous organic chemical manufacturing process emission source which was subject to and met the control requirements of Section 215.966.

d) No limits under this Subpart apply to:

1) Emission sources with emissions of volatile organic material to the atmosphere less than or equal to 1.0 ton per year if the total emissions from those sources not complying with Section 215.966 do not exceed 5.0 tons per year; and

2) Emission sources whose emissions of volatile organic material are subject to limits in 35 Ill. Adm. Code 230 or ~~35 Ill. Adm. Code~~ 231; or the Lowest Achievable Emission Rate~~,~~ under 35 Ill. Adm. Code 203; or Best Available Control Technology~~,~~ under a permit issued under Section 9.1(d) ~~of the Act~~ or ~~under~~ Section 9.4 of the Act.

e) For the purposes of this Subpart, an emission source ~~shall~~ must be considered regulated by a Subpart if it is subject to the limits of that Subpart, or it would be subject to the limits of that Subpart if the emission sources~~,~~ emitting VOM~~,~~ had sufficient size, throughout, or emissions, or if the emission source did not meet a specific exemption ~~contained~~ in that Subpart.

f) For the purposes of this Subpart, uncontrolled volatile organic material emissions are the emissions of volatile organic material that would result if no air pollution control equipment were used.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.963 Permit Conditions

~~No~~ A person ~~shall~~ must not violate any condition in a permit when the condition results in ~~exclusion of~~excluding the plant or an emission source from this Subpart.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.966 Control Requirements

a) Every owner or operator of an emission source of volatile organic material ~~shall~~ must operate in compliance with RACT, which for emission sources subject to this Subpart ~~shall~~ must be:

1) Emission capture and control techniques which achieve an overall reduction in uncontrolled volatile organic material emissions of at least 81%; or

2) An adjusted RACT emissions limitation obtained ~~pursuant to~~under Subpart I.

b) Owners and operators of emission sources subject to this Subpart ~~shall~~ must comply with its requirements by April 1, 1989.

Section 215.APPENDIX C Past Compliance Dates

~~Prior to~~Before codification, compliance programs, project completion schedules, compliance dates, and compliance schedules for all sources were regulated by Rules 104(a), 104(g), 109(h), 205(j), and 205(m). Past compliance date rules have been deleted from the text of the codified rules; future compliance date rules have been grouped with the rules governing the type of source. As an aid to the public, ~~the old text of the compliance date rules are set out at length in~~ this Appendix lists past compliance dates.

Rule 104(a)
Compliance Programs and Project Completion Schedules -- Applicability

1) ~~No~~ A person ~~shall~~ must not cause or allow the operation of an emission source which is not in compliance with ~~the requirements of~~ Rule 205(k) unless ~~such~~ the person is in compliance with a compliance program ~~as provided for in~~under Rule 104(g) or (h) or Rule 205(m).

2) Notwithstanding Rule 104(a)(1), cold cleaning degreasers, coin-operated dry cleaning operations, dry cleaning facilities consuming less than 30 gallons per month (360 gallons per year) of perchloroethylene, and sources subject to Rule 205(g) are not required to submit or obtain an Agency approved compliance plan or project completion schedule.

3) Any compliance plan or project completion schedule, where applicable, ~~shall~~ must be a binding condition of the operating permit for the source.

Rule 104(g)
Compliance Programs and Project Completion Schedules --
Submission and Approval Dates

The owner or operator of an emission source subject to the following rules ~~shall~~ must have a Compliance Plan and a Project Completion Schedule, where applicable, approved by the Agency by the following dates. A Compliance Plan and a Project Completion Schedule, where applicable, ~~shall~~ must be submitted at least 90 days before the following dates.

1) By February 1, 1980. Gasoline dispensing facilities subject to Rule 205(p) and degreasers subject to Rule 205(k) located in Cook, DuPage, Lake, Kane, McHenry, and Will ~~counties~~Counties.

2) By March 1, 1980. Petroleum refineries subject to Rule 205(1), except (1)(4)-(10). Gasoline dispensing facilities subject to Rule 205(p) in Boone, Madison, St. Clair, Peoria, Tazewell, Rock Island, and Winnebago ~~counties~~Counties.

3) By April 1, 1980. Degreasers subject to Rule 205(k) located in counties other than Cook, DuPage, Lake, Kane, McHenry, or Will. Bulk gasoline plants, bulk gasoline terminals, and petroleum liquid storage tanks subject to Rule 205(o), except (o)(3), located in Cook, DuPage, Lake, Kane, McHenry, and Will ~~counties~~Counties.

4) By April 1, 1980. Coating lines subject to Rule 205(n), except (n)(1)(J), and (K). Bulk gasoline plants, bulk gasoline terminals, and petroleum liquid storage tanks subject to Rule 205(o), except (o)(3), which are located in counties other than Cook, Lake, DuPage, Kane, McHenry, or Will.

Rule 104(h)
Compliance Programs and Project Completion Schedules --
RACT II Compliance Plan Submission and Approval

1) The owner or operator of an emission source subject to Rule 205(j)(1) ~~shall~~ must submit to the Agency a ~~compoiance~~ compliance plan, including a project completion schedule where applicable, no later than:

Rule	Days After Promulgation

(A) Rules 205(o)(3), 205(s), and 205(t)	90
(B) Rules 205(u)(1)(A) and (B)	90
(C) Rule 205(n)(1)(J) and (K)	210

2) The owner or operator of an emission source subject to Rule 205(j)(2) ~~shall~~ must submit to the Agency a compliance plan, including a project completion schedule where applicable, no later than December 31, 1986.

~~4)~~3) Unless the submitted compliance plan or schedule is disapproved by the Agency, the owner or operator of a facility or emission source subject to ~~the rules specified in~~ Rule 104(h)(1), (2), or (3) may operate the emission source according to the plan and schedule as submitted.

~~5)~~4) The plan and schedule ~~shall~~ must meet the requirements of Rule 104(b) including specific interim dates ~~as required in~~under Rule 104(b)(2).

Rule 205(j)
Compliance Dates

1) Except as otherwise stated in subsection (2), every owner or operator of an emission source ~~shall~~ must comply with the standards and limitations of Rule 205 in ~~accordance~~ compliance with the dates ~~shown~~ in the following table:

Rule	Type of Source	Compliance Date
205(a) - (i)	New Emission Sources	April 14, 1972
205(a) - (i)	Existing Emission Sources	December 31, 1973
205(k)	All Emission Sources	July 1, 1980
205(l)(1) - (3)	All Emission Sources	July 1, 1980
205(l)(4) - (10)	All Emission Sources	See Rule (m)
205(n)	All Emission Sources	December 31, 1982*

205(n)(1)(J) and (K)	All Emission Sources	December 31, 1983
205(n)(1)(K)(ii)	All Emission Sources	See Rule 205(m)(5)
205(o)(1) and (2) (o)(3)	All Emission Sources	July 1, 1981
205(p)	All Emission Sources	See ~~rule~~ Rule 205(m)
205(q)	All Emission Sources	December 31, 1980
205(s) and (t)	All Emission Source	December 31, 1983
205(u)(1)(A)-(C)	All Emission Sources	December 31, 1983
205(u)(1)(D)-(G)	All Emission Sources	May 1, 1983

*Except for automobile and light-duty truck manufacturing plants achieving final compliance under a footnote to Rule 205(n)(1).

2) If an emission source is not located in one of the counties listed below** and is also not located in any county contiguous ~~thereto~~to one of them, the owner or operator of the emission source ~~shall~~ must comply with ~~the requirements of rule~~Rule 205(1)(4)-(10), (n)(1)(J) or (K), (o)(3), (s), (t), or (u) no later than December 31, 1987:

Cook	Macoupin
DuPage	Madison
Kane	Monroe
Lake	Saint Clair

3) Notwithstanding subsection (2) ~~above~~, if any county is designated as non-attainment by the U.S. Environmental Protection Agency at any time ~~subsequ3nt to~~after the effective date of this Rule, the owner or operator of an ~~emissin~~ emission source located in that county or any county contiguous to that county who would otherwise be subject to the compliance date in subsection (2) ~~shall~~ must comply with ~~the requirements of~~ Rule 205(1)(4)-(10), (n)(1)(J) or (K), (o)(3), (s), (t), or (u) within one

year from the date of redesignation but in no case later than December 31, 1987.

** These counties are proposed to be designated as nonattainment by the U.S. Environmental Protection Agency in 47 Fed. Reg.~~Federal Register, Volume 47, page~~ 31588 (July 21, 1982).

Rule 205(m)
Compliance Schedules

~~The requirements of this~~This section ~~shall~~ must not apply to any source for which a Project Completion Schedule has been submitted to and approved by the Agency under Rule 104. The owner of any emission source subject to ~~the requirements of~~ this section ~~shall~~ must certify to the Agency by January 15 of each year beginning January 15, 1980, whether increments of progress required to be met in the previous year have been met.

1) Coating Lines

The owner or operator of coating lines subject to ~~the requirements of~~ Rule 205(n), except (n)(1)(J) and (K), ~~shall~~ must take the following actions:

(A) Submit to the Agency a Compliance Program that meets the requirements of Rule 104(b)(1) by January 1, 1980.

(B) For sources that~~,~~ under the approved Compliance Plan~~,~~ will comply with Rule 205(n) by use of low solvent coating technology, the following ~~encrements~~ increments of progress~~, shall~~ must be met:

i) Submit to the Agency by July 1, 1980, and every six months ~~thereafter~~ after it a report describing in detail the progress in the previous six months in the development, application testing, product quality, customer acceptance, and FDA or other government agency approval of the low solvent coating technology.

ii) Initiate process modifications to allow use of low solvent coatings by April 1, 1982.

iii) Complete process modifications to allow use of low solvent coatings by October 1, 1982.

C) For sources that~~,~~ under the approved Compliance Plan~~,~~ will comply with Rule 205(n) by installing ~~emissin~~ emission control equipment, the following increments of progress ~~shall~~ must be met:

i) Award contracts for the emission control ~~wquipment~~ equipment or issue orders for the purchase of component parts by July 1, 1980.

ii) Initiate on-site construction or ~~installagion~~ installation of the emission control equipment by July 1, 1982.

iii) Complete on-site construction or installation of the emission control equipment by October 1, 1982.

2) Bulk Gasoline Plants, Bulk Gasoline Terminals, and Petroleum Liquid Storage Tanks

The owner of an emission source subject to ~~the requirements of~~ Rule 205(o), except (o)(3), ~~shall~~ must take the following actions:

A) Submit to the Agency a ~~Complaice~~ Compliance Program that meets the requirements of Rule 104(b)(1) by the date specified in Rule 104(g);

B) Award contracts for emission control systems or issue orders for the purchase of component parts by July 1, 1980.

C) Initiate on-site construction or installation of the emission control system by January 1, 1981.

D) Complete on-site construction or installation of the emission control system and achieve final compliance by July 1, 1981.

3) Gasoline Dispensing Facilities

Owners of gasoline dispensing facilities subject to ~~the requirements of~~ Rule 205(p) ~~shall~~ must take the following actions:

A) Submit to the Agency a Compliance Program that meets the requirements of Rule 104(b)(1) by the date ~~specified~~ in Rule 104(g);

B) Achieve final compliance for 33 percent of all gasoline dispensing facilities owned by the ~~owenr~~ owner by July 1, 1980.

C) Achieve final ~~complinace~~ compliance for 66 percent of all gasoline dispensing facilities owned by the owner by July 1, 1981.

D) Achieve final compliance for 100 percent of all gasoline dispensing facilities owned by the ~~owenr~~ owner by July 1, 1982.

4) Petroleum Refinery Leaks

The owner or operator of a petroleum refinery ~~shall~~ must adhere to the increments of progress ~~contained~~ in the following schedule:

A) Submit to the Agency a monitoring program plan consistent with Rule 205(1)(5) ~~prior to~~before June 1, 1983.

B) Submit the first monitoring report ~~pursuant to~~under Rule 205(1)(6)(A)(i) to the Agency ~~prior to~~before July 1, 1983.

5) Coating Lines Subject to Rule 205(n)(1)(K)(ii)

The owner or operator of coating lines subject to Rule 205(n)(1)(k)(ii) may in lieu of compliance with Rule 205(j)(1) demonstrate compliance ~~through the use of~~by using a low solvent coating technology by taking the following actions:

A) Submit to the Agency a Compliance ~~Poan~~Plan, including project completion schedule~~,~~ that meets the requirements of Rule 104(b)(1) within 210 days after the effective date of this rule; and

B) Meet the following increments of progress:

i) Submit to the Agency by July 1, 1984, and every six months ~~thereafter~~ after it a report describing ~~indetail~~ in detial the progress made in the development, application testing, product quality, customer acceptance, and FDA or government agency approval of the low solvent coating technology;

ii) Initiate process modifications to allow the use of low solvent coatings as soon as coatings meeting Board requirements become commercially available for production use; and

iii) Achieve final compliance as expeditiously as possible ~~bur~~ but no later than December 31, 1984.

6) Rotogravure and Flexography Low Solvent Ink Alternative Compliance Plan

The owner or operator of an emission source subject to Rule 205(s) may in lieu of compliance with Rules 104(h)(1)(A) and 205(j) demonstrate

compliance ~~through the use of~~by using a low solvent ink program by taking the following actions:

A) Submit to the Agency a Compliance Plan, including a compliance schedule, by December 31, 1983, which demonstrates:

i) substantial emission reductions early in the compliance schedule;

ii) greater reductions in emissions than would have ~~occurre dwithout~~occurred without a low solvent ink program; and

iii) final compliance as expeditiously as possible but no later than December 31, 1987; and

B) Certify to the Agency that

i) a low solvent ink compliance strategy is not technically available, which would not enable the emission source to achieve compliance by the date ~~specified~~ in Rule 205(j); and

ii) an unreasonable economic burden would be incurred if the owner or operator were required to demonstrate compliance by the date ~~specified~~ in Rule 205(j); and

C) Agree to install one of the control alternatives ~~specified~~ in Rule 205(s)(1)(C) by June 31, 1986, if the specified low-solvent ink strategy fails to achieve scheduled reductions by December 31, 1985.

Section 215.APPENDIX D List of Chemicals Defining Synthetic Organic Chemical and Polymer Manufacturing

CAS No.	Chemical
105-57-7	Acetal
75-07-0	Acetaldehyde
107-89-1	Acetaldol
60-35-5	Acetamide
103-84-4	Acetanilide
64-19-7	Acetic acid
108-24-7	Acetic anhydride
67-64-1	Acetone

75-86-5	Acetone cyanohydrin
75-05-8	Acetonitrile
98-86-2	Acetophenone
75-36-5	Acetyl chloride
74-86-2	Acetylene
107-02-8	Acrolein
79-06-1	Acrylamide
79-10-7	Acrylic acid
107-13-1	Acrylonitrile
124-04-9	Adipic acid
111-69-3	Adiponitrile
(b)	Alkyl naphthalenes
107-18-6	Allyl alcohol
107-05-1	Allyl chloride
1321-11-5	Aminobenzoic acid
111-41-1	Aminoethylethanolamine
123-30-8	p-aminophenol
628-63-7, 123-92-2	Amyl acetates
71-41-0[c]	Amyl alcohols
110-58-7	Amyl amine
543-59-9	Amyl chloride
110-68-7[c]	Amyl mercaptans
1322-06-1	Amyl phenol
62-53-3	Aniline
142-04-1	Aniline hydrochloride
29191-52-4	Anisidine
100-66-3	Anisole
118-92-3	Anthranilic acid
84-65-1	Anthraquinone
100-52-7	Benzaldehyde
55-21-0	Benzamide
71-43-2	Benzene
98-48-6	Benzenedisulfonic acid
98-11-3	Benzenesulfonic acid
134-81-6	Benzil
76-93-7	Benzilic acid
~~134-81-6~~	~~Benzil~~
~~76-93-7~~	~~Benzilic acid~~
65-85-0	Benzoic acid
119-53-9	Benzoin
100-47-0	Bennzonitrile
119-61-9	Benzophenone
98-07-7	Benzotrichloride
98-88-4	Benzoyl chloride
100-51-6	Benzyl alcohol

100-46-9	Benzylamine
120-51-4	Benzyl benzoate
100-44-7	Benzyl chloride
98-87-3	Benzyl dichloride
92-52-4	Biphenyl
80-05-7	Bisphenol A
10-86-1	Bromobenzene
27497-51-4	Bromonaphthalene
106-99-0	Butadiene
106-98-9	l-butene
123-86-4	n-butyl acetate
141-32-2	n-butyl acrylate
71-36-3	n-butyl alcohol
78-92-2	s-butyl alcohol
75-65-0	t-butyl alcohol
109-73-9	n-butylamine
13952-84-6	s-butylamine
75-64-9	t-butylamine
98-73-7	p-tert-butyl benzoic acid
107-88-0	1,3-butylene glycol
123-72-8	n-butyraldehyde
107-92-6	Butyric acid
106-31-0	Butyric anhydride
109-74-0	Butyronitrile
105-60-2	Caprolactam
75-1-50	Carbon disulfide
558-13-4	Carbon tetrabromide
55-23-5	Carbon tetrachloride
9004-35-7	Cellulose acetate
79-11-8	Chloroacetic acid
108-42-9	m-chloroaniline
95-51-2	o-chloroaniline
106-47-8	p-chloroaniline
35913-09-8	Chlorobenzaldehyde
108-90-7	Chlorobenzene
118-91-2, 535-80-8, 74-11-3[c]	Chlorobenzoic acid
2136-81-4	Chlorobenzotrichloride
2136-89-2, 5216-25-1[c]	
1321-03-5	Chlorobenzoyl chloride
75-45-6	Chlorodifluoroethane
25497-29-4	Chlorodifluoromethane
67-66-3	Chloroform
25586-43-0	Chloronaphthalene

88-73-3	o-chloronitrobenzene
100-00-5	p-chloronitrobenzene
25167-80-0	Chlorophenols
126-99-8	Chloroprene
7790-94-5	Chlorosulfonic acid
108-41-8	m-chlorotoluene
95-49-8	o-chlorotoluene
106-43-4	p-chlorotoluene
75-72-9	Chlorotrifluoromethane
108-39-4	m-cresol
95-48-7	o-cresol
106-44-5	p-cresol
1319-77-3	Mixed cresols
1319-77-3	Cresylic acid
4170-30-0	Crotonaldehyde
3724-65-0	Crontonic acid
98-82-8	Cumene
80-15-9	Cumene hydroperoxide
372-09-8	Cyanoacetic acid
506-77-4	Cyanogen chloride
108-80-5	Cyanuric acid
108-77-0	Cyanuric chloride
110-82-7	Cyclohexane
108-93-0	Cyclohexanol
108-94-1	Cyclohexanone
110-83-8	Cyclohexene
108-91-8	Cyclohexylamine
111-78-4	Cyclooctadiene
112-30-1	Decanol
123-42-2	Diacetone alcohol
27576-04-1	Diaminobenzoic acid
95-76-1, 95-82-9, 554-00-7, 608-27-5, 608-31-1, 626-43-7, 27134-27-6, 57311-92-9[c]	Dichloroaniline
541-73-1	m-dichlorobenzene
95-50-1	o-dichlorobenzene
106-46-7	p-dichlorobenzene
75-71-8	Dichlorodifluoromethane
114-44-4	Dichloroethyl ether
107-06-2	1,2- dichloroethane (EDC)
96-23-1	Dichlorohydrin

26952-23-8	Dichloropropene
101-83-7	Dicyclohexylamine
109-89-7	Diethylamine
111-46-6	Diethylene glycol
112-36-7	Diethylene glycol diethyl ether
111-96-6	Diethylene glycol dimethyl ether
112-34-5	Diethylene glycol monobutyl ether
124-17-7	Diethylene glycol ~~mononbutyl~~ monobutyl ether acetate
111-90-0	Diethylene glycol monoethyl ether
112-15-2	Diethylene glycol monomethyl ether acetate
111-77-3	Diethylene glycol monomethyl ether

78-83-1	Isobutanol
110-19-0	Isobutyl acetate
115-11-7	Isobutylene
78-84-2	Isobutyraldehyde
79-31-2	Isobutyric acid
25339-17-7	Isodecanol
26952-21-6	Isooctyl alcohol
78-78-4	Isopentane
78-59-1	Isophorone
121-91-5	Isophthalic acid
78-79-5	Isoprene
67-63-0	Isopropanol
108-21-4	Isopropyl acetate
75-31-0	Isopropylamine
75-29-6	Isopropyl chloride
25168-06-3	Isopropylphenol
463-51-4	Ketene
(b)	Linear alkyl sulfonate
123-01-3	Linear alkylbenzene (Linear dodecylbenzene)
110-16-7	Maleic acid
108-31-6	Maleic anhydride
6915-15-7	Malic acid
141-79-7	Mesityl oxide
121-47-1	Metanilic acid
79-41-4	Methacrylic acid
563-47-3	Methallyl chloride
67-56-1	Methanol
79-20-9	Methyl acetate
105-45-3	Methyl acetoacetate
74-89-5	Methylamine
100-61-8	n-methylaniline
74-83-9	Methyl bromide
37365-71-2	Methyl butynol

74-87-3	Methyl chloride
108-87-2	Methyl cyclohexane
1331-22-2	Methyl cyclohexanone
75-09-2	Methylene chloride
101-77-9	Methylene dianiline
101-68-8	Methylene diphenyl diisocyanate
78-93-3	Methyl ethyl ketone
107-31-3	Methyl formate
108-11-2	Methyl isobutyl carbinol
108-10-1	Methyl isobutyl ketone
80-62-6	Methyl methacrylate
77-75-8	Methylpentynol
98-83-9	a-methylstyrene
110-91-8	Morpholine
85-47-2	a-naphthalene sulfonic acid
120-18-3	b-naphthalene sulfonic acid
90-15-3	a-naphthol
135-19-3	b-naphthol
75-98-9	Neopentanoic acid
88-74-4	o-nitroaniline
100-01-6	p-nitroaniline
91-23-6	o-nitroanisole
100-17-4	p-nitroanisole
98-95-3	Nitrobenzene
27178-83-2[c]	Nitrobenzoic acid (o, m & p)
79-24-3	Nitroethane
75-52-5	Nitromethane
88-75-5	2-Nitrophenol
25322-01-4	Nitropropane
1321-12-6	Nitrotoluene
27215-95-8	Nonene
25154-52-3	Nonylphenol
27193-28-8	Octylphenol
123-63-7	Paraldehyde
115-77-5	Pentaerythritol
109-66-0	n-pentane
109-67-1	l-pentene
127-18-4	Perchloroethylene
594-42-3	Perchloromethyl mercaptan
94-70-2	o-phenetidine
156-43-4	p-phenetidine
108-95-2	Phenol
98-67-9, 585-38-6, 609-46-1, 133-39-7[c]	Phenolsulfonic acids

91-40-7	Phenyl anthranilic acid
(b)	Phenylenediamine
75-44-5	Phosgene
85-44-9	Phthalic anhydride
85-41-6	Phthalimide
108-99-6	b-picoline
110-85-0	Piperazine
9003-29-6,	Polybutenes

1333-07-9	Toluene sulfonamide
104-15-4c	Toluenesulfonic acids
98-59-9	Toluene sulfonyl chloride
26915-12-8	Toluidines
87-61-6, 108-70-3, 120-82-1[c]	Trichlorobenzenes
71-55-6	1,1,1-trichloroethane
79-00-5	1,1,2-trichloroethane
79-01-6	Trichloroethylene
75-69-4	Trichlorofluoromethane
96-18-4	1,2,3-trichloropropane
76-13-1	1,1,2-trichloro 1,2,2-trifluoroethane
121-44-8	Triethylamine
112-27-6	Triethylene glycol
112-49-2	Triethylene glycol dimethyl ether
7756-94-7	Triisobutylene
75-50-3	Trimethylamine
57-13-6	Urea
108-05-4	Vinyl acetate
75-01-4	Vinyl chloride
75-35-4	Vinylidene chloride
25013-15-4	Vinyl toluene
1330-20-7	Xylenes (mixed)
95-47-6	o-xylene
106-42-3	p-xylene
1300-71-6	Xylenol
1300-73-8	Xylidine
(b)	methyl tertbutyl ether
9002-88-4	Polyethylene
(b)	Polypropylene
9009-53-6	Polystyrene

a) CAS numbers refer to the Chemical Abstracts Registry numbers assigned to specific chemicals, isomers, or mixtures of chemicals. Some isomers or mixtures that are covered by the standards do not have CAS numbers assigned to them. The standards apply to all of the chemicals listed, whether CAS numbers have been assigned or not.

b) ~~No CAS number(s) have been assigned to this chemical, to its isomers, or mixtures containing these chemicals.~~

~~c)~~ CAS numbers for some of the isomers are listed~~:~~. ~~the~~ The standards apply to all of the isomers and mixtures, even if CAS numbers have not been assigned.

Section 215.APPENDIX E Reference Methods and Procedures

INTRODUCTION

This Appendix ~~presents the~~provides reference methods and procedures required for implementing Reasonably Available Control Technology (RACT). Methods and procedures are identified for two types of ACT implementation:

a) Determination of VOC destruction efficiency for evaluating compliance with the 98 weight percent VOC reduction or 20 ppmv emission limit ~~specified~~ in Sections 215.520 through 215.527; and

b) Determination of offgas flowrate, hourly emissions, and stream net heating value for calculating TRE.

All reference methods ~~identified~~ in this Appendix refer to the reference methods ~~specified~~ at 40 CFR 60, Appendix A, incorporated by reference in Section 215.105.

VOC DESTRUCTION EFFICIENCY DETERMINATION

The following reference methods and procedures are required for determining compliance with the percent destruction efficiency ~~specified~~ in Sections 215.520 through 215.527.

a) Reference Method 1 or 1A for selection of the sampling site. The control device inlet sampling site for determination of vent stream molar composition or total organic compound destruction efficiency ~~shall~~ must be ~~prior to~~before the inlet of any control device and after all recovery devices.

b) Reference Methods 2, 2A, 2C, or 2D for determination of the volumetric flowrate.

c) Reference Method 3 to measure oxygen concentration of the air dilution correction. The emission sample ~~shall~~ must be corrected to 3 percent oxygen.

d) Reference Method 18 to determine the concentration of total organic compounds (minus methane and ethane) in the control device outlet and total organic compound reduction efficiency of the control device.

TRE DETERMINATION

The following reference methods and procedures are required for determining the offgas flowrate, hourly emissions, and the net heating value of the gas combusted to calculate the vent stream TRE.

a) Reference Method 1 or 1A for selection of the sampling site. The sampling site for the vent stream flowrate and molar composition determination ~~prescribed~~ in (b) and (c) ~~shall~~ must be ~~prior to~~before the inlet of any combustion device, ~~prior to~~before any post-reactor dilution of the stream with air, and ~~prior to~~before any post-reactor introduction of halogenated compounds into the vent stream. Subject to the preceding restrictions on the sampling site, it ~~shall~~ must be after the final recovery device. If any gas stream other than the air oxidation vent stream is normally conducted through the recovery system of the affected facility, ~~such~~ that stream ~~shall~~ must be rerouted or turned off while the vent stream is sampled~~,~~ but ~~shall~~ must be routed normally ~~prior to~~before the measuring of the initial value of the monitored parameters for determining compliance with the recommended RACT. If the air oxidation vent stream is normally routed through any equipment which is not a part of the air oxidation process as defined in 35 Ill. Adm. Code 211.122, ~~such~~ that equipment ~~shall~~ must be bypassed by the vent stream while the vent stream is sampled~~,~~ but ~~shall~~ must not be bypassed during the measurement of the initial value of the monitored parameters for determining compliance with Subpart V.

b) The molar composition of the vent stream ~~shall~~ must be determined using the following methods:

1) Reference Method 18 to measure the concentration of all organics, including those containing halogens, unless a significant portion of the compounds of interest are polymeric (high molecular weight), can polymerize before analysis, or have low vapor pressures, in which case Reference Method 25(a) ~~shall~~ must be used.

2) ASTM D1946-67 (reapproved 1977), incorporated by reference in Section 215.105, to measure the concentration of carbon monoxide and hydrogen.

3) Reference Method 4 to measure the content of water vapor, if necessary.

c) The volumetric flowrate ~~shall~~ must be determined using Reference Method 2, 2A, 2C, or 2D, as appropriate.

d) The net heating value of the vent stream ~~shall~~ must be calculated using the following equation:

$$H = K \sum_{n} C_i H_i$$

i=1

Where:

H = Net heating value of the sample, MJ/scm, where the net enthalpy per mole of offgas is based on combustion at ~~25 C~~25 º and 760 mm Hg, but the standard temperature for determining the volume corresponding to one mole is ~~20 C~~20 º, as in the definition of F (vent stream flowrate) below.

K = Constant, 1.740 x 10(-7) (1/ppm) (mole/scm) (MJ/kcal) where standard temperature for mole/scm is ~~20 C~~20 ºC.

Ci = Concentration of sample component i, reported on a wet basis~~,~~ in ppm, as measured by Reference Method 18 or ASTM D1946-67 (reapproved 1977), incorporated by reference in Section 215.105.

Hi = Net heat of combustion of sample component i, kcal/mole based on combustion at ~~25 C~~25 ºC and 760 mm Hg. If published values are not available or cannot be calculated, the heats of combustion of vent stream components ~~are required to~~must be determined using ASTM D2382-76, incorporated by reference in Section 215.105.

e) The emission rate of total organic compounds in the process vent stream ~~shall~~ must be calculated using the following equation:

$$E = K'F \sum_{i=1}^{n} CiMi$$

Where:

E = Emission rate of total organic compounds (minus methane and ethane) in the sample in kg/hr.

K' = constant, 2.494 x 10(-6) (1/ppm) (mole/scm) (kg/g) (min/hr), where standard temperature for (mole/scm) is ~~20 C~~20 ºC.

Mi = Molecular weight of sample component i (g/mole).

F = Vent stream flowrate (scm/min)~~,~~ at a standard temperature of ~~20 C~~20 ºC.

f) The total vent stream concentration ~~(~~by volume~~)~~ of compounds containing halogens (ppmv, by compound) ~~shall~~ must be summed from the individual concentrations of compounds containing halogens ~~which were~~ measured by Reference Method 18.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 215.APPENDIX F Coefficients for the Total Resource Effectiveness Index (TRE) Equation

This Appendix contains values for the total resource effectiveness index (TRE) equation in Subpart V.

If a flow rate falls exactly on the boundary between the indicated ranges, the operator ~~shall~~ must use the row in which the flow rate is maximum.

COEFFICIENTS FOR TRE EQUATION FOR CHLORINATED PROCESS VENT STREAMS WITH NET HEATING VALUE LESS THAN OR EQUAL TO 3.5 MJ/scm

FLOW RATE (scm/min)							
Min.	Max.	a	b	c	d	e	f

TITLE 35: ENVIRONMENTAL PROTECTION
SUBTITLE B: AIR POLLUTION
CHAPTER I: POLLUTION CONTROL BOARD
SUBCHAPTER c: EMISSION STANDARDS AND LIMITATIONS FOR STATIONARY SOURCES

PART 216
CARBON MONOXIDE EMISSIONS

SUBPART A: GENERAL PROVISIONS

SUBPART B: FUEL COMBUSTION EMISSION SOURCES

SUBPART C: INCINERATORS

SUBPART N: PETROLEUM REFINING AND CHEMICAL MANUFACTURE

SUBPART O: PRIMARY AND FABRICATED METAL PRODUCTS

AUTHORITY: Implementing Section 10 and authorized by Section 27 of the Environmental Protection Act ~~(Ill. Rev. Stat. 1991, ch. 111 1/2, pars. 1010 and 1027)~~[415 ILCS 5/10, 27].

SOURCE: Adopted as Chapter 2: Air Pollution, Rule 206: Carbon Monoxide Emissions, R71-23, 4 PCB 191, April 13, 1972, filed and effective April 14, 1972; amended at 3 Ill. Reg. 47, p. 92, effective November 8, 1979; amended at 4 Ill. Reg. 24, p. 514, effective June 4, 1980; codified at 7 Ill. Reg. 13607; amended in R87-18 at 12 Ill. Reg. 20774, effective December 6, 1988; amended in R90-23 at 16 Ill. Reg. 18075, effective November 13, 1992; amended in R18-21 at 48 Ill. Reg. _____, effective _____.

SUBPART A: GENERAL PROVISIONS

Section 216.100 Scope and Organization

a) This Part ~~contains~~ establishes standards and limitations for carbon monoxide emissions from stationary sources.

b) Permits for sources subject to this Part may be required ~~pursuant to~~under 35 Ill. Adm. Code 201.

c) Notwithstanding the provisions of this Part, the air quality standards ~~contained~~ in 35 Ill. Adm. Code 243 ~~may~~ must not be violated.

d) This Part includes the following Subparts ~~arranged as follows~~:

1) Subpart A: General Provisions;

2) Subparts B-J: Fuel Combustion Sources and Incinerators;

3) Subparts K-M: Reserved for Emission Process Sources;

4) Subparts N-End: Industry and ~~Site-specific~~Site-Specific rules.

~~e) Rules have been grouped for convenience of the public; the scope of each is determined by its language and history.~~

BOARD NOTE: While subsection (d) describes the organization of this Part, the rules themselves establish their applicability and effect.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 216.101 Measurement Methods

Carbon Monoxide concentrations in an effluent stream ~~shall~~ must be measured by the non-dispersive infrared method, 40 CFR 60, Appendix A, Method 10 (1982), incorporated by

reference in Section 216.104, or by other methods approved by the Illinois Environmental Protection Agency ~~(Agency) according to the provisions of~~under 35 Ill. Adm. Code 201.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 216.102 Abbreviations and Conversion Factors

a) ~~The~~ This Part uses the following abbreviations ~~are used in this Part~~:

btu	British thermal unit ~~(60°F)~~(60 ºF)
CO	carbon monoxide
~~ºC~~º C	degrees Centigrade
~~ºF~~º F	degrees Fahrenheit
kg	kilograms
lbs	pounds
mmbtu/hr	million btu per hour
MW	Megawatts; one million watts
ppm	parts per million

b) ~~The~~ This Part uses the following conversion factors ~~have been used in this Part~~:

English	Metric
1.0 mmbtu/hr	0.293 MW
2.205 lbs	1 kg

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 216.103 Definitions

The definitions ~~contained~~ in 35 Ill. Adm. Code 201 and 211 apply to this Part.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 216.104 Incorporations by Reference

The following materials are incorporated by reference: non-dispersive infrared method, 40 CFR 60, Appendix A, Method 10 (1982). This incorporation does not include any later amendments or editions.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART B: FUEL COMBUSTION EMISSION SOURCES

Section 216.121 Fuel Combustion Emission Sources

~~No~~ A person ~~shall~~ must not cause or allow the emission of ~~carbon monoxide (~~CO~~)~~ into the atmosphere from any fuel combustion emission source with actual heat input greater than 2.9 MW (10 mmbtu/hr) to exceed 200 ppm, corrected to 50 percent excess air.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 216.122 Exception, Midwest Grain Products

~~The standard for carbon monoxide of~~ Section 216.121 does not apply to emissions from the fluidized bed combustion boiler of Midwest Grain Products of Illinois~~, located~~ in Pekin, Illinois, where the emission of carbon monoxide ~~shall~~ must not exceed 700 parts per million, corrected to 50 percent excess air. Compliance ~~shall~~ must be based upon a one-hour average.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART C: INCINERATORS

Section 216.141 Incinerators

~~No~~ A person ~~shall~~ must not cause or allow the emission of carbon monoxide into the atmosphere from any incinerator to exceed 500 ppm, corrected to 50 percent excess air.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 216.142 Exceptions

Section 216.141 ~~shall~~ must not apply to:

a) Existing incinerators burning less than 907 kg (2000 lbs) of refuse per hour which are in compliance with 35 Ill. Adm. Code 212.181(c).

b) Existing small explosive waste incinerators which meet the conditions of 35 Ill. Adm. Code 212.184(a).

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART N: PETROLEUM REFINING AND CHEMICAL MANUFACTURE

Section 216.361 Petroleum and Petrochemical Processes

a) ~~No~~ A person ~~shall~~ must not cause or allow the emission of a carbon monoxide waste gas stream into the atmosphere from a petroleum or petrochemical process unless ~~such~~ the waste gas stream is burned in a direct flame afterburner or carbon monoxide boiler so that the resulting concentration of carbon monoxide in ~~such~~ the waste gas stream is less than or equal to 200 ppm corrected to 50 percent

excess air, or ~~such~~ the waste gas stream is controlled by other equivalent air pollution control equipment approved by the Agency ~~according to the provisions of~~under 35 Ill. Adm. Code 201.

b) Notwithstanding subsection (a), any existing petroleum or petrochemical process using catalyst regenerators of fluidized catalytic converters equipped for in situ combustion of carbon monoxide~~,~~ may emit a carbon monoxide waste gas stream into the atmosphere if the carbon monoxide concentration of ~~such~~ the waste gas stream is less than or equal to 750 ppm corrected to 50 percent excess air.

c) Notwithstanding subsection (a), any new petroleum or petrochemical process using catalyst regenerators of fluidized catalytic converters equipped for in situ combustion of carbon monoxide~~,~~ may emit a carbon monoxide waste gas stream into the atmosphere if the carbon monoxide concentration of ~~such~~ the waste gas stream is less than or equal to 350 ppm corrected to 50 percent excess air.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 216.362 Polybasic Organic Acid Partial Oxidation Manufacturing Processes

~~No~~ A person ~~shall~~ must not cause or allow the emission of any gases containing carbon monoxide into the atmosphere from any polybasic organic acid partial oxidation manufacturing process unless the total fuel value of the waste gas stream is less than 30 percent of that required for flame incineration of the waste gas stream at ~~793°C (1460°F)~~793 ºC (1460 ºF) without heat exchange. Polybasic organic acid partial oxidation manufacturing processes not meeting the above conditions ~~shall~~ must burn ~~such~~ the waste gas stream in a direct flame afterburner to achieve a resulting concentration of carbon monoxide in ~~such~~ the waste gas stream of less than or equal to 200 ppm or ~~shall~~ must employ ~~such~~ other equivalent control method or equipment ~~as may be~~ approved by the Agency ~~according to the provisions of~~under 35 Ill. Adm. Code 201.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

SUBPART O: PRIMARY AND FABRICATED METAL PRODUCTS

Section 216.381 Cupolas

~~No~~ A person ~~shall~~ must not cause or allow the emission of gases containing carbon monoxide into the atmosphere from any cupola with a manufacturer's rated melt rate ~~in excess of~~exceeding 5 tons per hour, unless ~~such~~ the gases are burned in a direct flame afterburner so that the resulting concentration of carbon monoxide in ~~such~~ the gases is less than or equal to 200 ppm corrected to 50 percent excess air or ~~such~~ the gas streams are controlled by other equivalent pollution control equipment approved by the Agency ~~according to the provisions of~~under 35 Ill. Adm. Code 201.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 216.382 Exception, General Motor's Ferrous Foundry in Vermilion County (Repealed)

~~The standard for carbon monoxide of 35 Ill. Adm. Code 216.381 shall not apply to the existing ferrous foundry located adjacent to Interstate 74 at G Street in Vermilion County, owned by General Motors Corporation on the effective date of this regulation. The emission of carbon monoxide from this foundry shall not exceed 2,000 ppm corrected to 50 percent excess air.~~

Reg. 16213, effective December 7, 2015; amended in R18-21 at 48 Ill. Reg._____, effective_____.

SUBPART A: GENERAL PROVISIONS

Section 217.100 Scope and Organization

a) This Part sets standards and limitations for emission of oxides of nitrogen from stationary sources.

b) Permits for sources subject to this Part may be required ~~pursuant to~~under 35 Ill. Adm. Code 201 or Section 39.5 of the Act.

c) Notwithstanding the provisions of this Part the air quality standards ~~contained~~ in

35 Ill. Adm. Code 243 may not be violated.

~~d) These rules have been grouped for convenience of the public; the scope of each is determined by its language and history.~~

BOARD NOTE: While these rules have been organized to clarify them for the public, the rules themselves establish their applicability and effect.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.101 Measurement Methods

Measurement of nitrogen oxides must be according to:

a) The phenol disulfonic acid procedures, 40 CFR 60, Appendix A, Method 7, ~~as~~ incorporated by reference in Section 217.104;

b) Continuous emissions monitoring ~~pursuant to~~under 40 CFR 75, ~~as~~ incorporated by reference in Section 217.104;

c) Determination of Nitrogen Oxides Emissions from Stationary Sources (Instrumental Analyzer Procedure), 40 CFR 60, Appendix A, Method 7E, ~~as~~ incorporated by reference in Section 217.104;

d) Monitoring with portable monitors ~~pursuant to~~under ASTM D6522-00, ~~as~~ incorporated by reference in Section 217.104; and

e) How do I conduct the initial and subsequent performance tests ~~(for turbines)~~, regarding NO_x ~~pursuant to~~under 40 CFR 60.4400, ~~as~~ incorporated by reference in Section 217.104.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.102 Abbreviations and Units

a) ~~The~~ This Part use the following abbreviations ~~are used in this Part~~:

ASTM	American Society for Testing and Materials
~~Btu~~	~~British thermal unit~~
bhp	brake horsepower
Btu	British thermal unit
CEMS	continuous emissions monitoring system
dscf	dry standard cubic feet
EGU	Electrical Generating Unit
~~dscf~~	~~dry standard cubic feet~~
g/bhp-hr	grams per brake horsepower-hour
kg	kilogram
kg/MW-hr	kilograms per megawatt-hour

lb	pound
lbs/mmBtu	pounds per million Btu
Mg	megagram or metric ton
mm	million
mmBtu	million British thermal units
mmBtu/hr	million British thermal units per hour
~~MWe~~	~~megawatt of electricity~~
MW	megawatt; one million watts
MWe	megawatt of electricity
MW-hr	megawatt-hour
NATS	NO_x Allowance Tracking System
NO_2	nitrogen dioxide
NO_x	nitrogen oxides
O_2	oxygen
peoc	potential electrical output capacity
psia	pounds per square inch absolute
~~peoc~~	~~potential electrical output capacity~~
~~PTE~~	~~potential to emit~~
ppm	parts per million
ppmv	parts per million by volume
PTE	potential to emit
T	English ton
TPY	tons per year

b) ~~The~~ This Part uses the following conversion factors ~~have been used in this Part~~:

English	Metric
2.205 lb	1 kg
1 T	0.907 Mg
1 lb/T	0.500 kg/Mg

SUBPART B: NEW FUEL COMBUSTION EMISSION SOURCES

Section 217.121 New Emission Sources (Repealed)

(Source: Repealed at 33 Ill. Reg. 13345, effective August 31, 2009)

SUBPART C: EXISTING FUEL COMBUSTION EMISSION SOURCES

Section 217.141 Existing Emission Sources in Major Metropolitan Areas

~~No~~ A person ~~shall~~ must not cause or allow the emission of nitrogen oxides into the atmosphere in any ~~one hour~~one-hour period from any existing fuel combustion emission unit with an actual heat input equal to or greater than 73.2 MW (250 mmbtu/hr)~~,~~ located in the Chicago or St. Louis (Illinois) major metropolitan areas to exceed the following limitations:

a) For gaseous and/or liquid fossil fuel firing, 0.46 kg/MW-hr (0.3 lbs/mmbtu) of actual heat input;

b) For solid fossil fuel firing, 1.39 kg/MW-hr (0.9 lbs/mmbtu) of actual heat input;

c) For fuel combustion emission units burning simultaneously any combination of solid, liquid, and gaseous fuel, the allowable emission rate ~~shall~~ must be determined by the following equation:

$$E = (AG + BL + CS)Q$$

Where:

E	=	allowable nitrogen oxides emissions rate
Q	=	actual heat input
G	=	percent of actual heat input derived from gaseous fossil fuel
L	=	percent of actual heat input derived from liquid fossil fuel
S	=	percent of actual heat input derived from solid fossil fuel
G + L + S	=	100.0

	Metric	English

E	Kg/hr	1ls/hr
Q	MW	Mmbtu/hr
A	0.023	0.003
B	0.023	0.003
C	0.068	0.009

d) Exceptions: This Section ~~shall~~ does not apply to ~~the following~~:

1) Existing fuel combustion sources that are either cyclone fired boilers burning solid or liquid fuel~~,~~ or horizontally opposed fired boilers burning solid fuel; or

2) Emission units that are subject to the emissions limitations of Subpart E, F, G, H, I, M, or Q ~~of this Part~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

SUBPART D: NO_x GENERAL REQUIREMENTS

Section 217.150 Applicability

a) Applicability

1) ~~The provisions of this~~This Subpart and Subparts E, F, G, H, I, and M ~~of this Part~~ apply to ~~the following~~:

A) All sources ~~that are~~ located in ~~either~~ one of the following areas and that emit or have the potential to emit NO_x in an amount equal to or greater than 100 tons per year:

i) The area ~~composed of~~including the Chicago area counties of Cook, DuPage, Kane, Lake, McHenry, and Will, the Townships of Aux Sable and Goose Lake in Grundy County, and the Township of Oswego in Kendall County; or

ii) The area ~~composed of~~including the Metro East area counties of Jersey, Madison, Monroe, and St. Clair, and the Township of Baldwin in Randolph County; and

B) Any industrial boiler~~,~~; process heater~~,~~; glass melting furnace~~,~~; cement kiln~~,~~; lime kiln~~,~~; iron and steel reheat, annealing, or galvanizing furnace~~,~~; aluminum reverberatory or crucible furnace~~,~~

; or fossil fuel-fired stationary boiler at ~~such~~ sources described in subsection (a)(1)(A) ~~of this Section~~ that emits NO_x in an amount equal to or greater than 15 tons per year and equal to or greater than five tons per ozone season.

2) For purposes of this Section, "potential to emit" means the quantity of NO_x that potentially could be emitted by a stationary source before add-on controls based on the design capacity or maximum production capacity of the source and 8,760 hours per year or the quantity of NO_x that potentially could be emitted by a stationary source as established in a federally enforceable permit.

b) If a source ceases to fulfill the emissions criteria of subsection (a) ~~of this Section~~, the requirements of this Subpart and Subpart E, F, G, H, I, or M ~~of this Part~~ continue to apply to any emission unit that was ever subject to ~~the provisions of~~ any of those Subparts.

c) The provisions of this Subpart do not apply to afterburners, flares, and incinerators.

d) Where a construction permit~~,~~ for which the application was submitted to the Agency ~~prior to~~before the adoption of this Subpart~~,~~ is issued that relies on decreases in emissions of NO_x from existing emission units for purposes of netting or emission offsets, ~~such~~ the NO_x decreases remain creditable notwithstanding any requirements that may apply to the existing emission units ~~pursuant to~~under this Subpart and Subpart E, F, G, H, I, or M ~~of this Part~~.

e) The owner or operator of an emission unit ~~that is~~ subject to this Subpart and Subpart E, F, G, H, I, or M ~~of this Part~~ must operate ~~such~~ the unit in a manner consistent with good air pollution control practice to minimize NO_x emissions.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.152 Compliance Date

a) Compliance with the requirements of Subparts E, F, G, H, I, and M by an owner or operator of an emission unit that is subject to any of those Subparts is required beginning January 1, 2015.

b) Notwithstanding subsection (a) ~~of this Section~~, compliance with ~~the requirements of~~ Subpart G ~~of this Part~~ by an owner or operator of an emission unit subject to Subpart G ~~of this Part shall~~must be extended until December 31, 2014, if the unit is required to meet emissions limitations for NO_x~~,~~ as measured using a continuous emissions monitoring system~~,~~ and included within a legally enforceable order on or before May 7, 2010, ~~whereby~~ under which the emissions limitations are less than 30 percent of the emissions limitations ~~set forth~~ under Section 217.204.

c) Notwithstanding subsection (a) ~~of this Section~~, the owner or operator of emission units subject to Subpart E or F ~~of this Part~~ and located at a petroleum refinery must comply with ~~the requirements of~~ this Subpart and Subpart E or F ~~of this Part~~, as applicable, for those emission units beginning January 1, 2015, except that the owner or operator of emission units ~~listed~~ in Appendix H must comply with the requirements of this Subpart, including the option of demonstrating compliance with the applicable Subpart through an emissions averaging plan under Section 217.158 and Subpart E or F ~~of this Part~~, as applicable, for the listed emission units beginning on the dates ~~set forth~~ in Appendix H. With Agency approval, the owner or operator of emission units ~~listed~~ in Appendix H may elect to comply with ~~the requirements of~~ this Subpart and Subpart E or F ~~of this Part~~, as applicable, by reducing the emissions of emission units other than those ~~listed~~ in Appendix H, ~~provided that~~if the emissions limitations of ~~such~~ the other emission units are equal to or more stringent than the applicable emissions limitations ~~set forth~~ in Subpart E or F ~~of this Part~~, as applicable, by the dates ~~set forth~~ in Appendix H.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.154 Performance Testing

a) Performance testing of NO_x emissions for emission units constructed on or before July 1, 2014, and subject to emissions limitations under Subpart E, F, G, H, or I ~~of this Part~~ must be conducted in ~~accordance~~ compliance with Section 217.157 ~~of this Subpart~~. Except as provided for under Section 217.157(a)(4) and (e)(1)~~. This~~, this subsection does not apply to owners and operators of emission units demonstrating compliance through a continuous emissions monitoring system.

b) Performance testing of NO_x emissions for emission units for which construction or modification occurs after July 1, 2014, and that are subject to emissions limitations under Subpart E, F, G, H, or I ~~of this Part~~ must be conducted within 60 days after achieving maximum operating rate but no later than 180 days after initial startup of the new or modified emission unit, in ~~accordance~~ compliance with Section 217.157 ~~of this Subpart~~. Except as provided for under Section 217.157(a)(4) and (e)(1), this subsection does not apply to owners and operators of emission units demonstrating compliance through a continuous emissions monitoring system, predictive emission monitoring system, or combustion tuning.

c) Notification of the initial startup of an emission unit subject to subsection (b) ~~of this Section~~ must be provided to the Agency no later than 30 days after initial startup.

d) The owner or operator of an emission unit subject to subsection (a) or (b) ~~of this Section~~ must notify the Agency of the scheduled date for the performance testing

in writing at least 30 days before ~~such~~ that date and five days before ~~such~~ that date.

e) If demonstrating compliance through an emissions averaging plan, at least 30 days before changing the method of compliance, the owner or operator of an emission unit must submit a written notification to the Agency describing the new method of compliance, the reason for the change in the method of compliance, and the scheduled date for performance testing, if required. ~~Upon~~ When changing the method of compliance, the owner or operator of an emission unit must submit to the Agency a revised compliance certification that meets the requirements of Section 217.155.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.155 Initial Compliance Certification

a) By the applicable compliance date ~~set forth~~ under Section 217.152, an owner or operator of an emission unit subject to Subpart E, F, G, H, or I ~~of this Part~~ who is not demonstrating compliance through the use of a continuous emissions monitoring system must certify to the Agency that the emission unit will be in compliance with the applicable emissions limitation of Subpart E, F, G, H, or I ~~of this Part~~ beginning on such applicable compliance date. The performance testing certification must include the results of the performance testing performed in ~~accordance~~ compliance with Section 217.154(a) and (b) and the calculations necessary to demonstrate that the subject emission unit will be in initial compliance.

b) By the applicable compliance date ~~set forth~~ under Section 217.152, an owner or operator of an emission unit subject to Subpart E, F, G, H, I, or M ~~of this Part~~ who is demonstrating compliance through the use of a continuous emissions monitoring system must certify to the Agency that the affected emission units will be in compliance with the applicable emissions limitation of Subpart E, F, G, H, I, or M ~~of this Part~~ beginning on ~~such~~ the applicable compliance date. The compliance certification must include a certification of the installation and operation of a continuous emissions monitoring system required under Section 217.157 and the monitoring data necessary to demonstrate that the subject emission unit will be in initial compliance.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.156 Recordkeeping and Reporting

a) The owner or operator of an emission unit subject to Subpart E, F, G, H, I, or M ~~of this Part~~ must keep and maintain all records used to demonstrate initial compliance and ongoing compliance with the requirements of those Subparts.

1) Except as otherwise provided under this Subpart or Subpart E, F, G, H, I, or M ~~of this Part~~, copies of ~~such~~ the records must be submitted by the owner or operator of the source to the Agency within 30 days after ~~receipt of~~receiving a written request by the Agency.

2) ~~Such~~ The records must be kept at the source and maintained for at least five years and must be available for immediate inspection and copying by the Agency.

b) The owner or operator of an emission unit subject to Subpart E, F, G, H, I, or M ~~of this Part~~ must maintain records that demonstrate compliance with ~~the requirements of~~ those Subparts, as applicable, that include the following:

1) Identification, type (e.g., gas-fired), and location of each unit.

2) Calendar date of the record.

3) Monthly, seasonal, and annual operating hours.

4) Type and quantity of each fuel used monthly, seasonally, and annually.

5) Product and material throughput, as applicable.

6) Reports for all applicable emissions tests for NO_x conducted on the unit, including results.

7) The date, time, and duration of any startup, shutdown, or malfunction in the operation of any emission unit subject to Subpart E, F, G, H, I, or M ~~of this Part~~ or any emissions monitoring equipment. The records must include a description of the malfunction and corrective maintenance activity.

8) A log of all maintenance and inspections related to the unit's air pollution control equipment for NO_x that is performed on the unit.

9) A log for the NO_x monitoring device, if present, including periods when not in service and maintenance and inspection activities that are performed on the device.

10) Identification of time periods for which operating conditions and pollutant data were not obtained by the continuous emissions monitoring system, including the reasons for not obtaining sufficient data and a description of corrective actions taken.

11) If complying with the emissions averaging plan provisions of Section 217.158, copies of the calculations used to demonstrate compliance with

the ozone season and annual control period limitations, noncompliance reports for the ozone season, and ozone and annual control period compliance reports submitted to the Agency.

c) The owner or operator of an industrial boiler subject to Subpart E ~~of this Part~~ must maintain records in order to demonstrate compliance with the combustion tuning requirements under Section 217.166.

d) The owner or operator of a process heater subject to Subpart F ~~of this Part~~ must maintain records in order to demonstrate compliance with the combustion tuning requirements under Section 217.186.

e) The owner or operator of an emission unit subject to Subpart E, F, G, H, I, or M ~~of this Part~~ must maintain records in order to demonstrate compliance with the testing and monitoring requirements under Section 217.157.

f) The owner or operator of an emission unit subject to Subpart E, F, G, H, or I ~~of this Part~~ must provide the following information with respect to performance testing ~~pursuant to~~under Section 217.157:

1) Submit a testing protocol to the Agency at least 60 days ~~prior to~~before testing;

2) Notify the Agency at least 30 days in writing ~~prior to~~before conducting performance testing for NO_x emissions and five days ~~prior to such~~before testing;

3) Not later than 60 days after ~~the completion of~~completing the test, submit the results of the test to the Agency; and

4) If, after the 30-days' notice for an initially scheduled test is sent, there is a delay (e.g., due to operational problems) in conducting the test as scheduled, the owner or operator of the unit must notify the Agency as soon as practicable of the delay in the original test date, either by providing at least seven days' prior notice of the rescheduled date of the test or by arranging a new test date with the Agency by mutual agreement.

g) The owner or operator of an emission unit subject to Subpart E, F, G, H, I, or M ~~of this Part~~ must notify the Agency of any exceedances of an applicable emissions limitation of Subpart E, F, G, H, I, or M ~~of this Part~~ by sending the applicable report with an explanation of the causes of ~~such~~ the exceedances to the Agency within 30 days ~~following~~ after the end of the applicable compliance period in which the emissions limitation was not met.

h) Within 30 days after ~~the receipt of~~receiving a written request by the Agency, the owner or operator of an emission unit that is exempt from the requirements of

Subpart E, F, G, H, I, or M ~~of this Part~~ must submit records that document that the emission unit is exempt from those requirements to the Agency.

i) If demonstrating compliance through an emissions averaging plan, by March 1 following the applicable calendar year, the owner or operator must submit to the Agency a report that demonstrates the following:

1) For all units that are part of the emissions averaging plan, the total mass of allowable NO_x emissions for the ozone season and for the annual control period;

2) The total mass of actual NO_x emissions for the ozone season and annual control period for each unit included in the averaging plan;

3) The calculations that demonstrate that the total mass of actual NO_x emissions are less than the total mass of allowable NO_x emissions using equations in Section 217.158(f); and

4) The information required to determine the total mass of actual NO_x emissions.

j) The owner or operator of an emission unit subject to ~~the requirements of~~ Section 217.157 and demonstrating compliance through the use of a continuous emissions monitoring system must submit to the Agency a report within 30 days after the end of each calendar quarter. This report must include the following:

1) Information identifying and explaining the times and dates when continuous emissions monitoring for NO_x was not in operation, other than for purposes of calibrating or performing quality assurance or quality control activities for the monitoring equipment; and

2) An excess emissions and monitoring systems performance report in ~~accordance~~ compliance with ~~the requirements of~~ 40 CFR 60.7(c) and (d) and 60.13, or 40 CFR 75, or an alternate procedure approved by the Agency and USEPA.

k) The owner or operator of an emission unit subject to Subpart M ~~of this Part~~ must comply with the compliance certification and recordkeeping and reporting requirements in ~~accordance~~ compliance with 40 CFR 96, or an alternate procedure approved by the Agency and USEPA.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.157 Testing and Monitoring

a) Industrial Boilers and Process Heaters

1) The owner or operator of an industrial boiler subject to Subpart E ~~of this Part~~ with a rated heat input capacity greater than 250 mmBtu/hr must install, calibrate, maintain, and operate a continuous emissions monitoring system on the emission unit for the measurement of NO_x emissions discharged into the atmosphere in ~~accordance~~ compliance with 40 CFR 75, ~~as~~ incorporated by reference in Section 217.104. However, the owner or operator of an industrial boiler subject to Subpart E ~~of this Part~~ with a rated heat input capacity greater than 250 mmBtu/hr that combusts blast furnace gas with up to 10% natural gas on an annual basis and located at a source that manufactures iron and steel is not required to install, calibrate, maintain, and operate a continuous emissions monitoring system on that industrial boiler~~, provided~~ if the heat input from natural gas does not exceed 10% on an annual basis and the owner or operator complies with the performance test requirements under this Section and demonstrates, during each performance test, that NO_x emissions from the industrial boiler are less than 70% of the applicable emissions limitation under Section 217.164. ~~In the event~~If the owner or operator is unable to meet the requirements of this exception, a continuous emissions monitoring system is required within 12 months after that event, or by January 1, 2015, whichever is later.

2) The owner or operator of an industrial boiler subject to Subpart E ~~of this Part~~ with a rated heat input capacity greater than 100 mmBtu/hr but less than or equal to 250 mmBtu/hr must install, calibrate, maintain, and operate a continuous emissions monitoring system on ~~such~~ the emission unit for the measurement of NO_x emissions discharged into the atmosphere in ~~accordance~~ compliance with 40 CFR 60, subpart A and appendix B, Performance Specifications 2 and 3, and appendix F, Quality Assurance Procedures, ~~as~~ incorporated by reference in Section 217.104.

3) The owner or operator of a process heater subject to Subpart F ~~of this Part~~ with a rated heat input capacity greater than 100 mmBtu/hr must install, calibrate, maintain, and operate a continuous emissions monitoring system on the emission unit for the measurement of NO_x emissions discharged into the atmosphere in ~~accordance~~ compliance with 40 CFR 60, subpart A and appendix B, Performance Specifications 2 and 3, and appendix F, Quality Assurance Procedures, ~~as~~ incorporated by reference in Section 217.104.

4) If demonstrating compliance through an emissions averaging plan, the owner or operator of an industrial boiler subject to Subpart E ~~of this Part,~~ or a process heater subject to Subpart F ~~of this Part,~~ with a rated heat input capacity less than or equal to 100 mmBtu/hr and not demonstrating compliance through a continuous emissions monitoring system must have an initial performance test conducted ~~pursuant to~~under subsection (a)(4)(B) ~~of this Section~~ and Section 217.154.

A) An owner or operator of an industrial boiler or process heater must have subsequent performance tests conducted ~~pursuant to~~under subsection (a)(4)(B) ~~of this Section~~ at least once every five years. When, in the opinion of the Agency or USEPA, it is necessary to conduct testing to demonstrate compliance with Section 217.164 or 217.184, as applicable, the owner or operator of an industrial boiler or process heater must, at ~~his or her~~its own expense, have ~~such~~ the test conducted in ~~accordance~~ compliance with the applicable test methods and procedures ~~specified~~ in this Section within 90 days after ~~receipt of~~receiving a notice to test from the Agency or USEPA.

B) The owner or operator of an industrial boiler or process heater must have a performance test conducted using 40 CFR 60, subpart A and appendix A, Method 1, 2, 3, 4, 7E, or 19, ~~as~~ incorporated by reference in Section 217.104, or other alternative USEPA methods approved by the Agency. Each performance test must consist of three separate runs, each lasting a minimum of 60 minutes. NO_x emissions must be measured while the industrial boiler is operating at maximum operating capacity or while the process heater is operating at normal maximum load. If the industrial boiler or process heater has combusted more than one type of fuel in the prior year, a separate performance test is required for each fuel. If a combination of fuels is typically used, a performance test may be conducted~~,~~ with Agency approval~~,~~ on ~~such~~ the combination of fuels typically used. Except as provided under subsection (e)~~ of this Section~~, this subsection ~~(a)(4)(B)~~ does not apply if ~~such~~ the owner or operator is demonstrating compliance with an emissions limitation through a continuous emissions monitoring system under subsection (a)(1), (a)(2), (a)(3), or (a)(5)~~ of this Section~~.

5) Instead of complying with ~~the requirements of~~ subsection (a)(4)~~ of this Section~~, an owner or operator of an industrial boiler subject to Subpart E ~~of this Part,~~ or a process heater subject to Subpart F ~~of this Part,~~ with a rated heat input capacity less than or equal to 100 mmBtu/hr may install and operate a continuous emissions monitoring system on ~~such~~ the emission unit in ~~accordance~~ compliance with the applicable requirements of 40 CFR 60, subpart A and appendix B, Performance Specifications 2 and 3, and appendix F, Quality Assurance Procedures, ~~as~~ incorporated by reference in Section 217.104. The continuous emissions monitoring system must be used to demonstrate compliance with the applicable emissions limitation or emissions averaging plan on an ozone season and annual basis.

6) Notwithstanding subsection (a)(2) ~~of this Section~~, the owner or operator of an auxiliary boiler subject to Subpart E ~~of this Part~~ with a rated heat input capacity less than or equal to 250 mmBtu/hr and a capacity factor of less than or equal to 20% is not required to install, calibrate, maintain, and operate a continuous emissions monitoring system on ~~such~~ the boiler for the measurement of NO_x emissions discharged into the atmosphere, but must comply with the performance test requirements under subsection (a)(4) ~~of this Section~~.

b) Glass Melting Furnaces; Cement Kilns; Lime Kilns; Iron and Steel Reheat, Annealing, and Galvanizing Furnaces; and Aluminum Reverberatory and Crucible Furnaces

1) An owner or operator of a glass melting furnace subject to Subpart G ~~of this Part~~, cement kiln or lime kiln subject to Subpart H ~~of this Part~~, iron and steel reheat, annealing, or galvanizing furnace subject to Subpart I ~~of this Part~~, or aluminum reverberatory or crucible furnace subject to Subpart I ~~of this Part~~ that has the potential to emit NO_x in an amount equal to or greater than one ton per day must install, calibrate, maintain, and operate a continuous emissions monitoring system on ~~such~~ the emission unit for the measurement of NO_x emissions discharged into the atmosphere in ~~accordance~~ compliance with 40 CFR 60, subpart A and appendix B, Performance Specifications 2 and 3, and appendix F, Quality Assurance Procedures, ~~as~~ incorporated by reference in Section 217.104.

2) An owner or operator of a glass melting furnace subject to Subpart G ~~of this Part~~, cement kiln or lime kiln subject to Subpart H ~~of this Part~~, iron and steel reheat, annealing, or galvanizing furnace subject to Subpart I ~~of this Part~~, or aluminum reverberatory or crucible furnace subject to Subpart I ~~of this Part~~ that has the potential to emit NO_x in an amount less than one ton per day must have an initial performance test conducted ~~pursuant to~~under subsection (b)(4) ~~of this Section~~ and Section 217.154.

3) An owner or operator of a glass melting furnace subject to Subpart G ~~of this Part~~, cement kiln or lime kiln subject to Subpart H ~~of this Part~~, iron and steel reheat, annealing, or galvanizing furnace subject to Subpart I ~~of this Part~~, or aluminum reverberatory or crucible furnace subject to Subpart I ~~of this Part~~ that has the potential to emit NO_x in an amount less than one ton per day must have subsequent performance tests conducted ~~pursuant to~~under subsection (b)(4) ~~of this Section~~ as follows:

A) For all glass melting furnaces subject to Subpart G ~~of this Part~~, cement kilns or lime kilns subject to Subpart H ~~of this Part~~, iron and steel reheat, annealing, or galvanizing furnace subject to Subpart I ~~of this Part~~, or aluminum reverberatory or crucible furnaces subject to Subpart I ~~of this Part~~, including all such units

included in an emissions averaging plan, at least once every five years; and

B) When, in the opinion of the Agency or USEPA, it is necessary to conduct testing to demonstrate compliance with Section 217.204, 217.224, or 217.244 ~~of this Part~~, as applicable, the owner or operator of a glass melting furnace~~,~~ ; cement kiln~~,~~ ; lime kiln~~,~~ ; iron and steel reheat, annealing, or galvanizing furnace~~,~~ ; or aluminum reverberatory or crucible furnace must~~,~~ at ~~his or her~~its own expense~~,~~ have ~~such~~ the test conducted in ~~accordance~~ compliance with the applicable test methods and procedures ~~specified~~ in this Section within 90 days after ~~receipt of~~receiving a notice to test from the Agency or USEPA.

4) The owner or operator of a glass melting furnace, cement kiln, or lime kiln must have a performance test conducted using 40 CFR 60, subpart A and appendix A, Methods 1, 2, 3, 4, and 7E, ~~as~~ incorporated by reference in Section 217.104 ~~of this Part~~, or other alternative USEPA methods approved by the Agency. The owner or operator of an iron and steel reheat, annealing, or galvanizing furnace, or aluminum reverberatory or crucible furnace must have a performance test conducted using 40 CFR 60, subpart A and appendix A, Method 1, 2, 3, 4, 7E, or 19, ~~as~~ incorporated by reference in Section 217.104 ~~of this Part~~, or other alternative USEPA methods approved by the Agency. Each performance test must consist of three separate runs, each lasting a minimum of 60 minutes. NO_x emissions must be measured while the glass melting furnace~~,~~ ; cement kiln~~,~~ ; lime kiln~~,~~ ; iron and steel reheat, annealing, or galvanizing furnace~~,~~ ; or aluminum reverberatory or crucible furnace is operating at maximum operating capacity. If the glass melting furnace~~,~~ ; cement kiln~~,~~ ; lime kiln~~,~~ ; iron and steel reheat, annealing, or galvanizing furnace~~,~~ ; or aluminum reverberatory or crucible furnace has combusted more than one type of fuel in the prior year, a separate performance test is required for each fuel. Except as provided under subsection (e) ~~of this Section~~, this subsection ~~(b)~~(4) does not apply if ~~such~~ the owner or operator is demonstrating compliance with an emissions limitation through a continuous emissions monitoring system under subsection (b)(1) or (b)(5) ~~of this Section~~.

5) Instead of complying with ~~the requirements of~~ subsections (b)(2), (b)(3), and (b)(4) ~~of this Section~~, an owner or operator of a glass melting furnace subject to Subpart G ~~of this Part~~, cement kiln or lime kiln subject to Subpart H ~~of this Part~~, iron and steel reheat, annealing, or galvanizing furnace subject to Subpart I ~~of this Part~~, or aluminum reverberatory or crucible furnace subject to Subpart I ~~of this Part~~ that has the potential to emit NO_x in an amount less than one ton per day may install and operate a continuous emissions monitoring system on ~~such~~ the emission unit in

~~accordance~~ compliance with the applicable requirements of 40 CFR 60, subpart A and appendix B, Performance Specifications 2 and 3, and appendix F, Quality Assurance Procedures, ~~as~~ incorporated by reference in Section 217.104 ~~of this Part~~. The continuous emissions monitoring system must be used to demonstrate compliance with the applicable emissions limitation or emissions averaging plan on an ozone season and annual basis.

c) Fossil Fuel-Fired Stationary Boilers. The owner or operator of a fossil fuel-fired stationary boiler subject to Subpart M ~~of this Part~~ must install, calibrate, maintain, and operate a continuous emissions monitoring system on ~~such~~ the emission unit for the measurement of NO_x emissions discharged into the atmosphere in ~~accordance~~ compliance with 40 CFR 96, subpart H.

d) Common Stacks. If two or more emission units subject to Subpart E, F, G, H, I, M, or Q ~~of this Part~~ are served by a common stack, and the owner or operator of ~~such~~ the emission units is operating a continuous emissions monitoring system, the owner or operator may, with written approval from the Agency, ~~utilize~~ use a single continuous emissions monitoring system for the combination of emission units subject to Subpart E, F, G, H, I, M, or Q ~~of this Part~~ that share the common stack, ~~provided such~~if the emission units are subject to an emissions averaging plan under this Part.

e) Compliance with the continuous emissions monitoring system (CEMS) requirements by an owner or operator of an emission unit ~~who is~~ required to install, calibrate, maintain, and operate a CEMS on the emission unit under subsection (a)(1), (a)(2), (a)(3), or (b)(1) ~~of this Section~~, or who has elected to comply with the CEMS requirements under subsection (a)(5) or (b)(5) ~~of this Section~~, or who has elected to comply with the predictive emission monitoring system (PEMS) requirements under subsection (f) ~~of this Section~~, is required by the applicable compliance date under Section 217.152 ~~of this Subpart~~.

f) As an alternative to complying with ~~the requirements of~~ this Section, other than the requirements under subsections (a)(1) and (c) ~~of this Section~~, the owner or operator of an emission unit who is not otherwise required by any other statute, regulation, or enforceable order to install, calibrate, maintain, and operate a CEMS on the emission unit may comply with the specifications and test procedures for a predictive emission monitoring system (PEMS) on the emission unit for the measurement of NO_x emissions discharged into the atmosphere in ~~accordance~~ compliance with the requirements of 40 CFR 60, subpart A and appendix B, Performance Specification 16. The PEMS must be used to demonstrate compliance with the applicable emissions limitation or emissions averaging plan on an ozone season and annual basis.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.158 Emissions Averaging Plans

a) Notwithstanding any other emissions averaging plan provisions under this Part, an owner or operator of a source with certain emission units subject to Subpart E, F, G, H, I, or M ~~of this Part~~, or subject to Subpart Q ~~of this Par~~t that are located in either one of the areas ~~set forth~~ under Section 217.150(a)(1)(A)(i) or (ii), may demonstrate compliance with the applicable Subpart through an emissions averaging plan. An emissions averaging plan can only address emission units that are located at one source, and each unit may only be covered by one emissions averaging plan. Such emission units at the source are affected units and are subject to the requirements of this Section.

1) The following units may be included in an emissions averaging plan:

A) Units that commenced operation on or before January 1, 2002.

B) Units that the owner or operator may claim as exempt ~~pursuant to~~under Section 217.162, 217.182, 217.202, 217.222, 217.242, or 217.342 ~~of this Part~~, as applicable, but does not claim exempt. For as long as such a unit is included in an emissions averaging plan, it will be treated as an affected unit and subject to the applicable emissions limitations~~,~~ and testing, monitoring, recordkeeping, and reporting requirements.

C) Units that commence operation after January 1, 2002, if the unit replaces a unit that commenced operation on or before January 1, 2002, or it replaces a unit that replaced a unit that commenced operation on or before January 1, 2002. The new unit must be used for the same purpose and have substantially equivalent or less process capacity or be permitted for less NO_x emissions on an annual basis than the actual NO_x emissions of the unit or units that are replaced. Within 90 days after permanently shutting down a unit that is replaced, the owner or operator of ~~such~~ the unit must submit a written request to withdraw or amend the applicable permit to reflect that the unit is no longer in service before the replacement unit may be included in an emissions averaging plan.

2) The following types of units may not be included in an emissions averaging plan:

A) Units that commence operation after January 1, 2002, except as provided by subsection (a)(1)(C) ~~of this Section~~.

B) Units that the owner or operator is claiming are exempt ~~pursuant to~~under Section 217.162, 217.182, 217.202, 217.222, 217.242, or 217.342 ~~of this Part~~, as applicable.

C) Units that are required to meet emission limits or control requirements for NO_x as provided for in an enforceable order, unless the order allows for emissions averaging. In the case of petroleum refineries, this subsection ~~(a)(2)(C)~~ does not prohibit including industrial boilers or process heaters, or both, in an emissions averaging plan when an enforceable order does not prohibit the reductions made under the order from also being used for compliance with any rules or regulations designed to address regional haze or the non-attainment status of any area.

b) An owner or operator must submit an emissions averaging plan to the Agency by January 1, 2015. The plan must include~~, but is not limited to, the following~~:

1) The list of affected units included in the plan by unit identification number; and

2) A sample calculation demonstrating compliance using the methodology ~~provided~~ in subsection (f) ~~of this Section~~ for the ozone season (May 1 through September 30) and calendar year (January 1 through December 31).

c) An owner or operator may amend an emissions averaging plan only once per calendar year. ~~Such an~~An amended plan must be submitted to the Agency by January 1 of the applicable calendar year. If an amended plan is not received by the Agency by January 1 of the applicable calendar year, the previous year's plan will be the applicable emissions averaging plan.

d) Notwithstanding subsection (c)~~ of this Section~~:

1) If a unit ~~that is listed~~ in an emissions averaging plan is taken out of service, the owner or operator must submit to the Agency, within 30 days after ~~such~~ that occurrence, an updated emissions averaging plan; or

2) If a unit that was exempt from ~~the requirements of~~ Subpart E, F, G, H, I, or M ~~of this Part pursuant to~~under Section 217.162, 217.182, 217.202, 217.222, 217.242, or 217.342~~ of this Part~~, as applicable, no longer qualifies for an exemption, the owner or operator may amend its existing averaging plan to include ~~such~~ the unit within 30 days after the unit no longer qualifies for the exemption.

e) An owner or operator must:

1) Demonstrate compliance for the ozone season (May 1 through September 30) and the calendar year (January 1 through December 31) by using the methodology and the units ~~listed~~ in the most recent emissions averaging plan submitted to the Agency ~~pursuant to~~under subsection (b)~~ of this~~

~~Section~~, the monitoring data or test data determined ~~pursuant to~~under Section 217.157, and the actual hours of operation for the applicable averaging plan period; and

2) Submit to the Agency~~,~~ by March 1 following each calendar year~~,~~ a compliance report containing the information required by Section 217.156(i).

f) The total mass of actual NO_x emissions from the units ~~listed~~ in the emissions averaging plan must be equal to or less than the total mass of allowable NO_x emissions for those units for both the ozone season and calendar year. The following equation must be used to determine compliance:

$$N_{act} \leq N_{all}$$

Where:

$N_{act} = \sum_{i=1}^{n}\sum_{j=1}^{k} EM_{act(i,j)}$

$N_{all} = \sum_{i=1}^{n}\sum_{j=1}^{k} EM_{all(i,j)}$

N_{act} = Total sum of the actual NO_x mass emissions from units included in the averaging plan for each fuel used (tons per ozone season and year).

N_{all} = Total sum of the allowable NO_x mass emissions from units included in the averaging plan for each fuel used (tons per ozone season and year).

$EM_{act(i)}$ = Total mass of actual NO_x emissions in tons for a unit as determined in subsection (f)(1)~~ of this Section~~.

i = Subscript denoting an individual unit.

j = Subscript denoting the fuel type used.

k = Number of different fuel types.

n = Number of different units in the averaging plan.

$EM_{all(i)}$ = Total mass of allowable NO_x emissions in tons for a unit as determined in subsection (f)(2)~~ of this Section~~.

For each unit in the averaging plan, and each fuel used by ~~such~~ the unit, determine actual and allowable NO_x emissions using the following equations:

1) Actual emissions must be determined as follows:

When emission limits are prescribed in lb/mmBtu,

$$EM_{act(i)} = E_{act(i)} \times H_i / 2000$$

When emission limits are prescribed in lb/ton of processed product,

$$EM_{act(i)} = E_{act(i)} \times P_i / 2000$$

2) Allowable emissions must be determined as follows:

When emission limits are prescribed in lb/mmBtu,

$$EM_{all(i)} = E_{all(i)} \times H_i / 2000$$

When emission limits are prescribed in lb/ton of processed product,

$$EM_{all(i)} = E_{all(i)} \times P_i / 2000$$

Where:

$EM_{act(i)}$ = Total mass of actual NO_x emissions in tons for a unit.

$EM_{all(i)}$ = Total mass of allowable NO_x emissions in tons for a unit.

E_{act} = Actual NO_x emission rate (lbs/mmBtu or lbs/ton of product) as determined by a performance test, a continuous emissions monitoring system, or an alternative method approved by the Agency.

E_{all} = Allowable NO_x emission rate (lbs/mmBtu or lbs/ton of product) as provided in Section 217.164, 217.184, 217.204, 217.224, 217.244, or 217.344, as applicable. For an affected industrial boiler subject to Subpart E ~~of this Part~~, or process heater subject to Subpart F ~~of this Part~~, with a rated heat input capacity less than or equal to 100 mmBtu/hr demonstrating compliance through an emissions averaging plan, the allowable NO_x emission rate is to be determined from a performance test after ~~such~~ the boiler or heater has undergone combustion tuning. For all other units in an emissions averaging plan, an uncontrolled NO_x emission rate from USEPA's AP-42, ~~as~~ incorporated by reference in Section 217.104, or an uncontrolled NO_x emission rate as determined by an alternative method approved by the Agency, will be used.

H = Heat input (mmBtu/ozone season or mmBtu/year) calculated from fuel flow meter and the heating value of the fuel used.

P = weight in tons of processed product.

g) An owner or operator of an emission unit subject to Subpart Q ~~of this Part~~ that is located in either ~~one~~ of the areas ~~set forth~~ under Section 217.150(a)(1)(A)(i) or (ii) that is complying through an emissions averaging plan under this Section must comply with the applicable provisions for determining actual and allowable emissions under Section 217.390, the testing and monitoring requirements under Section 217.394, and the recordkeeping and reporting requirements under Section 217.396.

h) The owner or operator of an emission unit located at a petroleum refinery who is demonstrating compliance with an applicable Subpart through an emissions averaging plan under this Section may exclude from the calculation demonstrating compliance those time periods when an emission unit included in the emissions averaging plan is shut down for a maintenance turnaround, ~~provided that such~~if the owner or operator ~~notify~~ notifies the Agency in writing at least 30 days ~~in advance of~~before the shutdown of the emission unit for the maintenance turnaround and the shutdown of the emission unit does not exceed 45 days per ozone season or calendar year and NO_x pollution control equipment, if any, continues to operate on all other emission units operating during the maintenance turnaround.

i) The owner or operator of an emission unit that combusts a combination of coke oven gas and other gaseous fuels and that is located at a source that manufactures iron and steel who is demonstrating compliance with an applicable Subpart through an emissions averaging plan under this Section may exclude from the calculation demonstrating compliance those time periods when the coke oven gas desulfurization unit included in the emissions averaging plan is shut down for maintenance, ~~provided that such~~if the owner or operator ~~notify~~ notifies the Agency in writing at least 30 days ~~in advance of~~before the shutdown of the coke oven gas desulfurization unit for maintenance and ~~such~~ the shutdown does not exceed 35 days per ozone season or calendar year and NO_x pollution control equipment, if any, continues to operate on all other emission units operating during the maintenance period.

j) The owner or operator of an emission unit located at a petroleum refinery who is demonstrating compliance with an applicable Subpart through an emissions averaging plan under this Section may exclude from the calculation demonstrating compliance those time periods when NO_x pollution control equipment that controls one or more emission units included in the emissions averaging plan is shut down for a maintenance turnaround, ~~provided that~~if:

1) the owner or operator ~~notify~~ notifies the Agency in writing, at least 30 days ~~in advance of~~before the shutdown, of the NO_x pollution control equipment for the maintenance turnaround;

2) the shutdown of the NO_x pollution control equipment does not exceed 45 days per ozone season or calendar year; and

3) except for those emission units vented to the NO_x pollution control equipment undergoing the maintenance turnaround, NO_x pollution control equipment, if any, continues to operate on all other emission units operating during the maintenance turnaround.

(Source: Amended at 48 Ill. Reg._____, effective _____)

SUBPART E: INDUSTRIAL BOILERS

Section 217.160 Applicability

a) ~~The provisions of~~ Subpart D ~~of this Part~~ and this Subpart apply to all industrial boilers located at sources subject to this Subpart ~~pursuant to~~under Section 217.150, except as provided in subsections (b) and (c) ~~of this Section~~.

b) ~~The provisions of this~~This Subpart ~~do~~ does not apply to boilers serving a generator that has a nameplate capacity greater than 25 MWe and produces electricity for sale, if ~~such~~ the boilers meet the applicability criteria under Subpart M ~~of this Part~~.

c) ~~The provisions of this~~This Subpart ~~do~~ does not apply to fluidized catalytic cracking units, their regenerator and associated CO boiler or boilers and CO furnace or furnaces where present, if ~~such~~ the units are located at a petroleum refinery and ~~such units~~ are required to meet emission limits or control requirements for NO_x as provided for in an enforceable order.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.162 Exemptions

Notwithstanding Section 217.160 ~~of this Subpart, the provisions of,~~ this Subpart ~~do~~ does not apply to an industrial boiler operating under a federally enforceable limit of NO_x emissions from ~~such~~ the boiler to less than 15 tons per year and less than five tons per ozone season.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.164 Emissions Limitations

a) Except as provided for under Section 217.152, on and after January 1, 2015, ~~no~~ a person ~~shall~~ must not cause or allow emissions of NO_x into the atmosphere from

any industrial boiler to exceed the following limitations. Compliance must be demonstrated with the applicable emissions limitation on an ozone season and annual basis.

Fuel	Emission Unit Type and Rated Heat Input Capacity (mmBtu/hr)	~~No$_x$~~ NO_x Emissions Limitation (lb/mmBtu) or Requirement
Natural Gas or Other Gaseous Fuels	Industrial boiler greater than 100	0.08
	Industrial boiler less than or equal to 100	Combustion tuning
Distillate Fuel Oil	Industrial boiler greater than 100	0.10
	Industrial boiler less than or equal to 100	Combustion tuning
Other Liquid Fuels	Industrial boiler greater than 100	0.15
	Industrial boiler less than or equal to 100	Combustion tuning
Solid Fuel	Industrial boiler greater than 100, circulating fluidized bed combustor	0.12
	Industrial boiler greater than 250	0.18
	Industrial boiler greater than 100 but less than or equal to 250	0.25
	Industrial boiler less than or equal to 100	Combustion tuning

b) For an industrial boiler combusting a combination of natural gas, coke oven gas, and blast furnace gas, the NO_x emissions limitation ~~shall~~ must be calculated using the following equation:

$$\text{NO}_x \text{ emissions limitation for period in lb/mmBtu} = \frac{(NO_{x_{NG}} * Btu_{NG}) + (NO_{x_{COG}} * Btu_{COG}) + (NO_{x_{BFG}} * Btu_{BFG})}{Btu_{NG} + Btu_{COG} + Btu_{BFG}}$$

Where:

$NO_{x_{NG}}$ = 0.084 lb/mmBtu for natural gas

Btu_{NG} = the heat ~~inpu~~ input of natural gas in Btu over that period

$NO_{x_{COG}}$ = 0.144 lb/mmBtu for coke oven gas

Btu_{COG} = the heat input of coke oven gas in Btu over that period

$NO_{x_{BFG}}$ = 0.0288 lb/mmBtu for blast furnace gas

Btu_{BFG} = the heat input of blast furnace gas in Btu over that period

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.165 Combination of Fuels

The owner or operator of an industrial boiler subject to this Subpart and operated with any combination of fuels must comply with a heat input weighted average emissions limitation to demonstrate compliance with Section 217.164.

(Source: Added at 33 Ill. Reg. 13345, effective August 31, 2009)

Section 217.166 Methods and Procedures for Combustion Tuning

The owner or operator of an industrial boiler subject to the combustion tuning requirements of Section 217.164 must have combustion tuning performed on the boiler at least annually. The combustion tuning must be performed by an employee of the owner or operator or a contractor who has successfully completed a training course on the combustion tuning of boilers firing the fuel or fuels that are fired in the boiler. The owner or operator must maintain the following records that must be made available to the Agency upon request:

a) The date the combustion tuning was performed;

b) The name, title, and affiliation of the person who performed the combustion tuning;

c) Documentation demonstrating the provider of the combustion tuning training course, the dates the training course was taken, and proof of successful completion of the training course;

d) Tune-up procedure followed and checklist of items (such as burners, flame conditions, air supply, scaling on heating surface, etc.) inspected ~~prior to~~before the actual tune-up; and

e) Operating parameters recorded at the start and ~~at~~ conclusion of combustion tuning.

(Source: Amended at 48 Ill. Reg._____, effective _____)

SUBPART F: PROCESS HEATERS

Section 217.180 Applicability

~~The provisions of~~ Subpart D ~~of this Part~~ and this Subpart apply to all process heaters located at sources subject to this Subpart ~~pursuant to~~under Section 217.150.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.182 Exemptions

Notwithstanding Section 217.180, ~~the provisions of~~ this Subpart ~~do~~ does not apply to a process heater operating under a federally enforceable limit of NO_x emissions from ~~such~~ the heater to less than 15 tons per year and less than five tons per ozone season.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.184 Emissions Limitations

Except as provided for under Section 217.152, on or after January 1, 2015, ~~no~~ a person ~~shall~~ must not cause or allow emissions of NO_x into the atmosphere from any process heater to exceed the following limitations. Compliance must be demonstrated with the applicable emissions limitation on an ozone season and annual basis.

Fuel	Emission Unit Type and Rated Heat Input Capacity (mmBtu/hr)	~~No~~$_x$ NO_x Emissions Limitation (lb/mmBtu) or Requirement
Natural Gas or Other Gaseous Fuels	Process heater greater than 100	0.08
	Process heater less than or equal to 100	Combustion tuning
Residual Fuel Oil	Process heater greater than 100, natural draft	0.10

	Process heater greater than 100, mechanical draft	0.15
	Process heater less than or equal to 100	Combustion tuning
Other Liquid Fuels	Process heater greater than 100, natural draft	0.05
	Process heater greater than 100, mechanical draft	0.08
	Process heater less than or equal to 100	Combustion tuning

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.185 Combination of Fuels

The owner or operator of a process heater subject to this Subpart and operated with any combination of fuels must comply with a heat input weighted average emissions limitation to demonstrate compliance with Section 217.184.

(Source: Added at 33 Ill. Reg. 13345, effective August 31, 2009)

Section 217.186 Methods and Procedures for Combustion Tuning

The owner or operator of a process heater subject to the combustion tuning requirements of Section 217.184 must have combustion tuning performed on the heater at least annually. The combustion tuning must be performed by an employee of the owner or operator or a contractor who has successfully completed a training course on the combustion tuning of heaters firing the fuel or fuels that are fired in the heater. The owner or operator must maintain the following records that must be made available to the Agency upon request:

a) The date the combustion tuning was performed;

b) The name, title, and affiliation of the person who performed the combustion tuning;

c) Documentation demonstrating the provider of the combustion tuning training course, the dates the training course was taken, and proof of successful completion of the training course;

d) Tune-up procedure followed and checklist of items (such as burners, flame conditions, air supply, scaling on heating surface, etc.) inspected ~~prior to~~before the actual tune-up; and

e) Operating parameters recorded at the start and ~~at~~ conclusion of combustion tuning.

(Source: Amended at 48 Ill. Reg._____, effective _____)

SUBPART G: GLASS MELTING FURNACES

Section 217.200 Applicability

~~The provisions of~~ Subpart D ~~of this Part~~ and this Subpart apply to all glass melting furnaces located at sources subject to this Subpart ~~pursuant to~~under Section 217.150.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.202 Exemptions

Notwithstanding Section 217.200, ~~the provisions of~~ this Subpart ~~do~~ does not apply to a glass melting furnace operating under a federally enforceable limit of NO_x emissions from ~~such~~ the furnace to less than 15 tons per year and less than five tons per ozone season.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.204 Emissions Limitations

a) On and after January 1, 2015, ~~no~~ a person ~~shall~~ must not cause or allow emissions of NO_x into the atmosphere from any glass melting furnace to exceed the following limitations. Compliance must be demonstrated with the emissions limitation on an ozone season and annual basis.

Product	Emission Unit Type	~~No$_x$~~ NO_x Emissions Limitation (lb/ton glass produced)
Container Glass	Glass melting furnace	5.0
Flat Glass	Glass melting furnace	7.9
Other Glass	Glass melting furnace	11.0

b) The emissions during glass melting furnace startup (not to exceed 70 days) or furnace idling (operation at less than 35% of furnace capacity) ~~shall~~ must be excluded from calculations for the purpose of demonstrating compliance with the seasonal and annual emissions limitations under this Section, ~~provided that~~if the owner or operator~~,~~ at all times, including periods of startup and idling, to the extent practicable, ~~maintain~~ maintains and ~~operate~~ operates any affected emission

unit, including associated air pollution control equipment, in a manner consistent with good air pollution control practice for minimizing emissions. The owner or operator of a glass melting furnace must maintain records that include the date, time, and duration of any startup or idling in the operation of the glass melting furnace.

(Source: Amended at 48 Ill. Reg._____, effective _____)

SUBPART H: CEMENT AND LIME KILNS

Section 217.220 Applicability

a) Notwithstanding Subpart T ~~of this Part~~, ~~the provisions of~~ Subpart D ~~of this Part~~ and this Subpart apply to all cement kilns located at sources subject to this Subpart ~~pursuant to~~under Section 217.150.

b) ~~The provisions of~~ Subpart D ~~of this Part~~ and this Subpart apply to all lime kilns located at sources subject to this Subpart ~~pursuant to~~under Section 217.150.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.222 Exemptions

Notwithstanding Section 217.220, ~~the provisions of~~ this Subpart ~~do~~ does not apply to a cement kiln or lime kiln operating under a federally enforceable limit of NO_x emissions from ~~such~~ the kiln to less than 15 tons per year and less than five tons per ozone season.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.224 Emissions Limitations

a) On and after January 1, 2015, ~~no~~ a person ~~shall~~ must not cause or allow emissions of NO_x into the atmosphere from any cement kiln to exceed the following limitations. Compliance must be demonstrated with the applicable emissions limitation on an ozone season and annual basis.

Emission Unit Type	~~No$_x$~~ NO_x Emissions Limitation (lb/ton clinker produced)
Long dry kiln	5.1
Short dry kiln	5.1
Preheater kiln	3.8
Preheater/precalciner kiln	2.8

b) On and after January 1, 2015, ~~no~~ a person ~~shall~~ must not cause or allow emissions of NO_x into the atmosphere from any lime kiln to exceed the following limitations. Compliance must be demonstrated with the applicable emissions limitation on an ozone season and annual basis.

Fuel	Emission Unit Type	~~No~~$_x$ NO_x Emissions Limitation (lb/ton lime produced)
Gas	Rotary kiln	2.2
Coal	Rotary kiln	2.5

(Source: Amended at 48 Ill. Reg._____, effective _____)

SUBPART I: IRON AND STEEL AND ALUMINUM MANUFACTURING

Section 217.240 Applicability

a) ~~The provisions of~~ Subpart D ~~of this Part~~ and this Subpart apply to all reheat furnaces, annealing furnaces, and galvanizing furnaces used in iron and steel making located at sources subject to this Subpart ~~pursuant to~~under Section 217.150.

b) ~~The provisions of~~ Subpart D ~~of this Part~~ and this Subpart apply to all reverberatory furnaces and crucible furnaces used in aluminum melting located at sources subject to this Subpart ~~pursuant to~~under Section 217.150.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.242 Exemptions

Notwithstanding Section 217.240, ~~the provisions of~~ this Subpart ~~do~~ does not apply to an iron and steel reheat furnace, annealing furnace, or galvanizing furnace, or aluminum reverberatory furnace or crucible furnace operating under a federally enforceable limit of NO_x emissions from such furnace to less than 15 tons per year and less than five tons per ozone season.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.244 Emissions Limitations

a) On and after January 1, 2015, ~~no~~ a person ~~shall~~ must not cause or allow emissions of NO_x into the atmosphere from any reheat furnace, annealing furnace, or galvanizing furnace used in iron and steel making to exceed the following limitations. Compliance must be demonstrated with the applicable emissions limitation on an ozone season and annual basis.

Emission Unit Type	~~No$_x$~~ NO_x Emissions Limitation (lb/mmBtu)
Reheat furnace, regenerative	0.18
Reheat furnace, recuperative, combusting natural gas	0.09
Reheat furnace, recuperative, combusting a combination of natural gas and coke oven gas	0.142
Reheat ~~furance~~furnace, cold-air	0.03
Annealing furnace, regenerative	0.38
Annealing furnace, recuperative	0.16
Annealing ~~furance~~furnace, cold-air	0.07
Galvanizing furnace, regenerative	0.46
Galvanizing furnace, recuperative	0.16
Galvanizing furnace, cold air	0.06

b) On and after January 1, 2015, ~~no~~ a person ~~shall~~ must not cause or allow emissions of NO_x into the atmosphere from any reverberatory furnace or crucible furnace used in aluminum melting to exceed the following limitations. Compliance must be demonstrated with the applicable emissions limitation on an ozone season and annual basis.

Emission Unit Type	~~No$_x$~~ NO_x Emissions Limitation (lb/mmBtu)
Reverberatory furnace	0.08
Crucible furnace	0.16

(Source: Amended at 48 Ill. Reg._____, effective _____)

SUBPART K: PROCESS EMISSION SOURCES

Section 217.301 Industrial Processes

a) New Industrial Processes. ~~No~~ A person ~~shall~~ must not cause or allow the emission of nitrogen oxides into the atmosphere from any new process producing products of organic nitrations and/or oxidations using nitric acid to exceed the following standards and limitations:

1) 2.5 kg of nitrogen oxides (expressed as nitrogen dioxide) per metric tonne of nitric acid (100 percent acid basis) used in ~~such~~ the new process (5.0 lbs/T).

2) Visible emissions in excess of 5 percent opacity.

b) Existing Industrial Processes. ~~No~~ A person ~~shall~~ must not cause or allow the emission of nitrogen oxides into the atmosphere from any existing process producing products of organic nitrations and/or oxidations using nitric acid to exceed 5.0 kg of nitrogen oxides (expressed as nitrogen dioxide) per metric tonne of nitric acid (100 percent acid basis) used in ~~such~~ the process (10.0 lbs/T).

c) Exemption. Subsections (a) and (b) ~~of this rule shall~~do not apply to any industrial process using less than 90.7 metric tonnes (100 tons) of nitric acid (100 percent acid basis) annually or which produces less than 907 kg (1 ton) of nitrogen oxides (expressed as nitrogen dioxide) per year.

(Source: Amended at 48 Ill. Reg._____, effective _____)

SUBPART M: ELECTRICAL GENERATING UNITS

Section 217.340 Applicability

Notwithstanding Subpart V or W ~~of this Part~~, ~~the provisions of~~ Subpart D ~~of this Part~~ and this Subpart apply to any fossil fuel-fired stationary boiler serving at any time a generator that has a nameplate capacity greater than 25 MWe and produces electricity for sale, excluding any units listed in Appendix D ~~of this Part~~, located at sources subject to this Subpart ~~pursuant to~~under Section 217.150.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.342 Exemptions

a) Notwithstanding Section 217.340, ~~the provisions of~~ this Subpart ~~do~~ does not apply to a fossil fuel-fired stationary boiler operating under a federally enforceable limit of NO_x emissions from ~~such~~ the boiler to less than 15 tons per year and less than five tons per ozone season.

b) Notwithstanding Section 217.340, ~~the provisions of~~ this Subpart ~~do~~ does not apply to a coal-fired stationary boiler that commenced operation before January 1, 2008, that is complying with 35 Ill. Adm. Code 225.Subpart B through the multi-pollutant standard.

c) Notwithstanding Section 217.340, ~~the provisions of~~ this Subpart ~~do~~ does not apply to a fossil fuel-fired stationary boiler that is subject to any of the

requirements in the combined pollutant standard in 35 Ill. Adm. Code ~~225.Subpart B (Sections~~ 225.291 through 225.299~~)~~, regardless of the type of fossil fuel combusted.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.344 Emissions Limitations

On and after January 1, 2015, ~~no~~ a person ~~shall~~ must not cause or allow emissions of NO_x into the atmosphere from any fossil fuel-fired stationary boiler to exceed the following limitations. Compliance must be demonstrated with the applicable emissions limitation on an ozone season and annual basis.

Fuel	Emission Unit Type	~~No_x~~ NO_x Emissions Limitation (lb/mmBtu)
Solid	Boiler	0.12
Natural gas	Boiler	0.06
Liquid	Boiler that commenced operation before January 1, 2008	0.10
	Boiler that commenced operation on or after January 1, 2008	0.08

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.345 Combination of Fuels

The owner or operator of a fossil fuel-fired stationary boiler subject to this Subpart and operated with any combination of fuels must comply with a heat input weighted average emissions limitation to demonstrate compliance with Section 217.344.

(Source: Added at 33 Ill. Reg. 13345, effective August 31, 2009)

SUBPART O: CHEMICAL MANUFACTURE

Section 217.381 Nitric Acid Manufacturing Processes

a) New Weak Nitric Acid Processes. ~~No~~ A person ~~shall~~ must not cause or allow the emission of nitrogen oxides into the atmosphere from any new weak nitric acid manufacturing process to exceed the following standards and limitations:

1) 1.5 kg of nitrogen oxides (expressed as nitrogen dioxide) per metric tonne of acid produced (100 percent acid basis) (3.0 lbs/T);

2) Visible emissions in excess of 5 percent opacity;

3) 0.05 kg of nitrogen oxides (expressed as nitrogen dioxide) per metric tonne of acid produced (100 percent acid basis) from any acid storage tank vents (0.1 lbs/T).

b) Existing Weak Nitric Acid Processes. ~~No~~ A person ~~shall~~ must not cause or allow the emission of nitrogen oxides into the atmosphere from any existing weak nitric acid manufacturing process to exceed the following standards and limitations:

1) 2.75 kg of nitrogen oxides (expressed as nitrogen dioxide) per metric tonne of acid produced (100 percent acid basis) (5.5 lbs/T);

2) Visible emissions in excess of 5 percent opacity;

3) 0.1 kg of nitrogen oxides (expressed as nitrogen dioxide) per metric tonne of acid produced (100 percent acid basis) from any acid storage tank vents (0.2 lbs/T).

c) Concentrated Nitric Acid Processes. ~~No~~ A person ~~shall~~ must not cause or allow the emission of nitrogen oxides into the atmosphere from any concentrated nitric acid manufacturing process to exceed the following standards and limitations:

1) 1.5 kg of nitrogen oxides (expressed as nitrogen dioxide) per metric tonne of acid produced (100 percent acid basis) (3.0 lbs/T);

2) 225 ppm of nitrogen oxides (expressed as nitrogen dioxide) in any effluent gas stream emitted into the atmosphere;

3) Visible emissions in excess of 5 percent opacity.

d) Nitric Acid Concentrating Processes. ~~No~~ A person ~~shall~~ must not cause or allow the emission of nitrogen oxides into the atmosphere from any nitric acid concentrating process to exceed the following limitations:

1) 1.5 kg of nitrogen oxides (expressed as nitrogen dioxide) per metric tonne of acid produced (100 percent acid basis) (3.0 lbs/T);

2) Visible emissions in excess of 5 percent opacity.

(Source: Amended at 48 Ill. Reg._____, effective _____)

SUBPART Q: STATIONARY RECIPROCATING INTERNAL COMBUSTION ENGINES AND TURBINES

Section 217.386 Applicability

a) ~~The provisions of this~~This Subpart ~~shall apply~~applies to all:

1) Stationary reciprocating internal combustion engines ~~listed~~ in Appendix G ~~of this Part~~.

2) Stationary reciprocating internal combustion engines and turbines located at a source that emits or has the potential to emit NO_x in an amount equal to or greater than 100 tons per year and is in either the area ~~composed of~~including the Chicago area counties of Cook, DuPage, Kane, Lake, McHenry, and Will, the Townships of Aux Sable and Goose Lake in Grundy County, and the Township of Oswego in Kendall County, or in the area ~~composed of~~including the Metro-East counties of Jersey, Madison, Monroe, and St. Clair, and the Township of Baldwin in Randolph County, where:

A) The engine at nameplate capacity is rated at equal to or greater than 500 bhp output; or

B) The turbine is rated at equal to or greater than 3.5 MW (4,694 bhp) output at 14.7 psia, ~~59°F~~59 °F and 60 percent relative humidity.

b) Notwithstanding subsection (a)(2) ~~of this Section~~, an affected unit is not subject to ~~the requirements of~~ this Subpart Q if the engine or turbine is or has been:

1) Used as an emergency or standby unit as defined by 35 Ill. Adm. Code 211.1920;

2) Used for research or for the purposes of performance verification or testing;

3) Used to control emissions from landfills, where at least 50 percent of the heat input is gas collected from a landfill;

4) Used for agricultural purposes, including the raising of crops or livestock that are produced on site, but not for associated businesses like packing operations, sale of equipment, or repair; or

5) An engine with nameplate capacity rated at less than 1,500 bhp (1,118 kW) output, mounted on a chassis or skids, designed to be moveable, and moved to a different source at least once every 12 months.

c) If an exempt unit ceases to fulfill the criteria ~~specified~~ in subsection (b) ~~of this Section~~, the owner or operator must notify the Agency in writing within 30 days after becoming aware that the exemption no longer applies and comply with the control requirements of ~~this~~ Subpart Q.

d) ~~The requirements of this~~ Subpart Q will continue to apply to any engine or turbine that has ever been subject to ~~the requirements of~~ Section 217.388, even if the affected unit or source ceases to fulfill the rating requirements of subsection (a) ~~of this Section~~ or becomes eligible for an exemption ~~pursuant to~~under subsection (b) ~~of this Section~~.

e) Where a construction permit, for which the application was submitted to the Agency ~~prior to~~before the adoption of this Subpart, is issued that relies on decreases in emissions of NO_x from existing emission units for purposes of netting or emissions offsets, ~~such~~ the NO_x decreases ~~shall~~ will remain creditable notwithstanding any requirements that may apply to the existing emissions units ~~pursuant to~~under this Subpart.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.388 Control and Maintenance Requirements

a) On and after the applicable compliance date in Section 217.392, an owner or operator of an affected unit must inspect and maintain affected units as required by subsection (a)(4) ~~of this Section~~ and comply with one of the following: the applicable emissions concentration ~~as set forth~~ in subsection (a)(1) ~~of this Section~~, the requirements for an emissions averaging plan ~~as specified~~ in subsection (a)(2) ~~of this Section~~, or the requirements for operation as a low usage unit ~~as specified~~ in subsection (a)(3) ~~of this Section~~.

1) Limits the discharge from an affected unit into the atmosphere of any gases that contain NO_x to no more than:

A) 150 ppmv (corrected to 15 percent O_2 on a dry basis) for spark-ignited rich-burn engines;

B) 210 ppmv (corrected to 15 percent O_2 on a dry basis) for spark-ignited lean-burn engines, except for existing spark-ignited Worthington engines that are not listed in Appendix G;

C) 365 ppmv (corrected to 15 percent O_2 on a dry basis) for existing spark-ignited Worthington engines that are not listed in Appendix G;

D) 660 ppmv (corrected to 15 percent O_2 on a dry basis) for diesel engines;

E) 42 ppmv (corrected to 15 percent O_2 on a dry basis) for gaseous fuel-fired turbines; and

F) 96 ppmv (corrected to 15 percent O_2 on a dry basis) for liquid fuel-fired turbines.

2) Complies with an emissions averaging plan ~~as provided for in~~under either subsection (a)(2)(A) or (a)(2)(B) ~~of this Section~~:

A) For any affected unit identified by Section 217.386: The requirements of the applicable emissions averaging plan ~~as set forth~~ in Section 217.390; or

B) For units identified in Section 217.386(a)(2). The requirements of an emissions averaging plan adopted ~~pursuant to~~under any other Subpart of this Part. For ~~such~~ the affected engines and turbines the applicable requirements of this Subpart apply, including~~, but not limited to,~~ calculation of NO_x allowable and actual emissions rates, compliance dates, monitoring, testing, reporting, and recordkeeping.

3) Operates, for units not listed in Appendix G, the affected unit as a low usage unit ~~pursuant to~~under subsection (a)(3)(A) or (a)(3)(B) ~~of this Section~~. Low usage units that are not part of an emissions averaging plan are not subject to ~~the requirements of this~~ Subpart Q except for the requirements to inspect and maintain the unit ~~pursuant to~~under subsection (a)(4) ~~of this Section~~, test as required by Section 217.394(f), and retain records ~~pursuant to~~under Section 217.396(b) and (d). Either the limitation in subsection (a)(3)(A) or (a)(3)(B) may be ~~utilized~~ used at a source, but not both:

A) The potential to emit (PTE) is no more than 100 TPY NO_x aggregated from all engines and turbines located at the source that are not otherwise exempt ~~pursuant to~~under Section 217.386(b), and not complying with ~~the requirements of~~ subsection (a)(1) or (a)(2) ~~of this Section~~, and the NO_x PTE limit is ~~contained~~ in a federally enforceable permit; or

B) The aggregate bhp-hrs/MW-hrs from all affected units located at the source that are not exempt ~~pursuant to~~under Section 217.386(b), and not complying with ~~the requirements of~~ subsection (a)(1) or (a)(2) ~~of this Section~~, are less than or equal to the bhp-hrs and MW-hrs operation limit ~~listed~~ in subsections (a)(3)(B)(i) and (a)(3)(B)(ii) ~~of this Section~~. The operation limits of subsections (a)(3)(B)(i) and (a)(3)(B)(ii) ~~of this Section~~ must be ~~contained~~ in a federally enforceable permit, except for units that drive a natural gas compressor located at a natural gas compressor station or storage facility. The operation limits are:

i) 8 mm bhp-hrs or less on an annual basis for engines; and

ii) 20,000 MW-hrs or less on an annual basis for turbines.

4) Inspects and performs periodic maintenance on the affected unit, in ~~accordance~~ compliance with a Maintenance Plan that documents:

A) For a unit not located at a natural gas transmission compressor station or storage facility, either:

i) The manufacturer's recommended inspection and maintenance of the applicable air pollution control equipment, monitoring device, and affected unit; or

ii) If the original equipment manual is not available or substantial modifications have been made that require an alternative procedure for the applicable air pollution control device, monitoring device, or affected unit, the owner or operator must establish a plan for inspection and maintenance in ~~accordance~~ compliance with what is customary for the type of air pollution control equipment, monitoring device, and affected unit.

B) For a unit located at a natural gas compressor station or storage facility, the operator's maintenance procedures for the applicable air pollution control device, monitoring device, and affected unit.

b) Owners and operators of affected units may change the method of compliance with this Subpart, as follows:

1) When changing the method of compliance from subsection (a)(3) ~~of this Section~~ to subsection (a)(1) or (a)(2) ~~of this Section~~, the owner or operator must conduct testing and monitoring according to ~~the requirements of~~ Section 217.394(a) through (e), as applicable. For this purpose, references to the "applicable compliance date" in Section 217.394(a)(2) and (a)(3) ~~shall~~ mean the date by which compliance with subsection (a)(1) or (a)(2) ~~of this Section~~ is to begin.

2) An owner or operator of an affected unit that is changing the method of compliance from subsection (a)(1) or (a)(2) ~~of this Section~~ to subsection (a)(3) ~~of this Section~~ must:

A) Continue to operate the affected unit's control device, if that unit relied upon a NO_x emissions control device for compliance with ~~the requirements of~~ subsection (a)(1) or (a)(2) ~~of this Section~~; and

B) ~~Prior to~~Before changing the method of compliance to subsection (c)~~ of this Section~~, complete any outstanding initial performance testing, subsequent performances testing, or monitoring as required by Section 217.394(a), (b), (c), (d), or (e) for the affected unit. If the deadline for ~~such~~ the testing or monitoring has not yet occurred (e.g., the five-year testing or monitoring sequence has not yet elapsed), the owner or operator must complete the test or monitoring ~~prior to~~before changing the method of compliance to subsection (a)(3)~~ of this Section~~. After changing the method of compliance to subsection (a)(3)~~ of this Section~~, no additional testing or monitoring will be required for the affected unit while it is complying with subsection (a)(3)~~ of this Section~~, except as provided for in Section 217.394(f).

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.390 Emissions Averaging Plans

a) An owner or operator of certain affected units may comply through an emissions averaging plan.

1) A unit or units that commenced operation before January 1, 2002, may be included in only one emissions averaging plan, as follows:

A) Units:

i) Located at a single source or at multiple sources in Illinois to address compliance for units identified in Section 217.386(a)(1), so long as the units are owned by the same company or parent company where the parent company has working control through stock ownership of its subsidiary corporations; or

ii) Located at a single source or at multiple sources in either the Chicago area counties or Metro-East area counties to address compliance for units identified in Section 217.386(a)(2), so long as the units are owned by the same company or parent company where the parent company has working control through stock ownership of its subsidiary corporations;

B) Units that have a compliance date later than the control period for which the averaging plan is being used for compliance;

C) Units that are not otherwise subject to this Subpart (so long as the units are owned by the same company or parent company where the parent company has working control through stock ownership

of its subsidiary corporations) or that the owner or operator may claim as exempt ~~pursuant to~~under Section 217.386(b) but does not claim as exempt. For as long as ~~such~~ the unit is included in an emissions averaging plan, it will be treated as an affected unit and subject to the applicable emission concentration, limits, testing, monitoring, recordkeeping, and reporting requirements; and

D) Units that comply with the requirements for low usage units ~~set forth~~ in Section 217.388(a)(3), so long as the unit or units operate NO_x emissions control technology. For as long as ~~such~~ the unit is included in an emissions averaging plan, it will be subject to the applicable emission concentration limits in subsection (g)(7) ~~of this Section~~, the applicable testing and monitoring requirements for affected units in Section 217.394(a) through (e), and the applicable recordkeeping and reporting requirements for affected and low usage units in Section 217.396(a) through (d).

2) The following types of units may not be included in an emissions averaging plan:

A) Units that commence operation after January 1, 2002, unless the unit or units replace a unit or units described in subsection (a)(1) ~~of this Section~~ that commenced operation on or before January 1, 2002, or the unit or units replace a unit or units described in subsection (a)(1) ~~of this Section~~ that replaced a unit or units described in subsection (a)(1) ~~of this Section~~ that commenced operation on or before January 1, 2002. The new unit must be used for the same purpose and have substantially equivalent or less process capacity or be permitted for less NO_x emissions on an annual basis than the actual NO_x emissions of the unit or units that are replaced. The owner or operator of a unit that is shut down and replaced must comply with ~~the provisions of~~ Section 217.396(c)(3) before the replacement unit may be included in an emissions averaging plan.

B) Units that the owner or operator is claiming are exempt ~~pursuant to~~under Section 217.386(b).

b) An owner or operator must submit an emissions averaging plan to the Agency by the applicable compliance date ~~set forth~~ in Section 217.392, or by May 1 of the year in which the owner or operator is using a new emissions averaging plan to comply.

1) The plan must include~~, but is not limited to~~:

A) The list of affected units included in the plan by unit identification number and permit number.

B) A sample calculation demonstrating compliance using the methodology ~~provided~~ in subsection (f) ~~of this Section~~ for both the ozone season and calendar year.

2) The plan will be effective as follows:

A) An initial plan for units required to comply by January 1, 2008, is effective January 1, 2008;

B) An initial plan for units required to comply by May 1, 2010, is effective May 1, 2010, for those units;

C) A new plan submitted ~~pursuant to~~under subsection (b) ~~of this Section~~ but not submitted by January 1, 2008, or May 1, 2010, is effective retroactively to January 1 of the applicable year;

D) An amended plan submitted ~~pursuant to~~under subsection (c) ~~of this Section~~ is effective retroactively to January 1 of the applicable year; or

E) An amended plan submitted ~~pursuant to~~under subsection (d) ~~of this Section~~ is effective on the date it is received by the Agency.

c) An owner or operator may amend an emissions averaging plan only once per calendar year. An amended plan must include the information from subsection (b)(1) and may change~~, but is not limited to changing,~~ the group of affected units or ~~reflecting~~ reflect changes in the operation of the affected units. An amended plan must be submitted to the Agency by May 1 of the applicable calendar year and is effective ~~as set forth in~~under subsection (b)(2) ~~of this Section~~. If an amended plan is not received by the Agency by May 1 of the applicable calendar year, the previous year's plan will be the applicable emissions averaging plan.

d) Notwithstanding subsection (c) ~~of this Section~~, an owner or operator, and the buyer or seller, if applicable:

1) Must submit an updated emissions averaging plan or plans to the Agency within 60 days if a unit that is listed in an emissions averaging plan is sold or taken out of service.

2) May amend its emissions averaging plan to include another unit within 30 days after discovering that the unit no longer qualifies as an exempt unit ~~pursuant to~~under Section 217.386(b) or as a low usage unit ~~pursuant to~~under Section 217.388(a)(3).

3) May submit an updated emissions averaging plan or plans to the Agency within 60 days after purchasing a new unit to include the new unit.

e) An owner or operator must:

1) Demonstrate compliance for both the ozone season (May 1 through September 30) and the calendar year (January 1 through December 31) by using the methodology and the units ~~listed~~ in the most recent emissions averaging plan submitted to the Agency ~~pursuant to~~under subsection (b), (c), or (d) ~~of this Section~~; the higher of the monitoring or test data determined ~~pursuant to~~under Section 217.394; and the actual hours of operation for the applicable control period;

2) Notify the Agency by October 31 ~~following~~ after the ozone season, if compliance cannot be demonstrated for that ozone season; and

3) Submit to the Agency by January 31 following each calendar year, a compliance report containing the information required by Section 217.396(c)(4).

f) The total mass of actual NO_x emissions from the units listed in the emissions averaging plan must be equal to or less than the total mass of allowable NO_x emissions for those units for both the ozone season and calendar year. The following equation must be used to determine compliance:

$$N_{act} \leq N_{all}$$

Where:

$$N_{act} = \sum_{i=1}^{n} EM_{act(i)}$$

$$N_{all} = \sum_{i=1}^{n} EM_{all(i)}$$

N_{act} = Total sum of the actual NO_x mass emissions from units ~~included~~ in the averaging plan for each fuel used (lbs per ozone season and calendar year).

N_{all} = Total sum of the allowable NO_x mass emissions from units ~~included~~ in the averaging plan for each fuel used (lbs per ozone season and calendar year).

$EM_{all(i)}$ = Total mass of allowable NO_x emissions in lbs for a unit as determined in subsection (g)(2) or (h)(2) ~~of this Section~~.

$EM_{act(i)}$ = Total mass of actual NO_x emissions in lbs for a unit as determined in subsection (g)(1) or (h)(1) ~~of this Section~~.

i = Subscript denoting an individual unit and fuel used.

n = Number of different units in the averaging plan.

g) For each unit in the averaging plan, and each fuel used by a unit, determine actual and allowable NO_x emissions using the following equations, except as provided for in subsection (h) ~~of this Section~~:

1) Actual emissions must be determined as follows:

$$EM_{act(i)} = E_{act(i)} \times H_i$$

$$E_{act(i)} = \frac{\sum_{j=1}^{m} C_{d(act(j))} \times F_d \times \left(\frac{20.9}{20.9 - \%O_{2d(j)}} \right)}{m}$$

2) Allowable emissions must be determined as follows:

$$EM_{all(i)} = E_{all(i)} \times H_i$$

$$E_{all(i)} = \frac{\sum_{j=1}^{m} C_{d(all(j))} \times F_d \times \left(\frac{20.9}{20.9 - \%O_{2d(j)}} \right)}{m}$$

Where:

$EM_{act(i)}$= Total mass of actual NO_x emissions in lbs for a unit, except as provided for in subsections (g)(3) and (g)(5) ~~of this Section~~.

$EM_{all(i)}$= Total mass of allowable NO_x emissions in lbs for a unit, except as provided for in subsection (g)(3) ~~of this Section~~.

E_{act} = Actual NO_x emission rate (lbs/mmBtu) calculated according to the above equation.

E_{all} = Allowable NO_x emission rate (lbs/mmBtu) calculated according to the above equation, as applicable.

H = Heat input (mmBtu/ozone season or mmBtu/year) calculated from fuel flow meter and the heating value of the fuel used.

$C_{d(act)}$ = Actual concentration of NO_x in lb/dscf (ppmv x 1.194 x10^{-7}) on a dry basis for the fuel used. Actual concentration is determined on each of the most recent test runs or monitoring passes performed ~~pursuant to~~under Section 217.394, whichever is higher.

$C_{d(all)}$ = Allowable concentration of NO_x in lb/dscf (allowable emission limit in ppmv specified in Section 217.388(a)(1), except as provided for in subsection (g)(4), (g)(5), (g)(6), or (g)(7) ~~of this Section~~, if applicable, multiplied by 1.194 x 10^{-7}) on a dry basis for the fuel used.

F_d = The ratio of the gas volume of the products of combustion to the heat content of the fuel (dscf/mmBtu) as given in the table of F Factors ~~included~~ in 40 CFR 60, appendix A, Method 19 or as determined using 40 CFR 60, appendix A, Method 19.

$\%O_{2d}$ = Concentration of oxygen in effluent gas stream measured on a dry basis during each of the applicable tests or monitoring runs used for determining emissions, as represented by a whole number percent, e.g., for 18.7%O_{2d}, 18.7 would be used.

i = Subscript denoting an individual unit and the fuel used.

j = Subscript denoting each test run or monitoring pass for an affected unit for a given fuel.

m = The number of test runs or monitoring passes for an affected unit using a given fuel.

3) For a replacement unit that is electric-powered, the allowable NO_x emissions from the affected unit that was replaced should be used in the averaging calculations and the actual NO_x emissions for the electric-powered replacement unit ($EM_{act\ elec(i)}$) are zero. Allowable NO_x emissions for the electric-powered replacement are calculated using the actual total bhp-hrs generated by the electric-powered replacement unit on an ozone season and on an annual basis multiplied by the allowable NO_x emission rate in lb/bhp-hr of the replaced unit. The allowable mass of NO_x emissions from an electric-powered replacement unit ($EM_{all\ elec(i)}$) must be determined by multiplying the nameplate capacity of the unit by the hours operated during the ozone season or annually and the allowable NO_x emission rate of the replaced unit ($E_{all\ rep}$) in lb/mmBtu converted to lb/bhp-hr. For this calculation the following equation should be used:

$$EM_{all\ \ elec(i)} = bhp \times OP \times F \times E_{all\ rep(i)}$$

Where:

$EM_{all\ elec(i)}$ = Mass of allowable NO_x emissions from the electric-powered replacement unit in pounds per ozone season or calendar year.

bhp = Nameplate capacity of the electric-powered replacement unit in brake horsepower.

OP = Operating hours during the ozone season or calendar year.

F = Conversion factor of 0.0077 mmBtu/bhp-hr.

$E_{all\ rep(i)}$ = Allowable NO_X emission rate (lbs/mmBtu) of the replaced unit.

i = Subscript denoting an individual electric unit and the fuel used.

4) For a replacement unit that is not electric, the allowable NO_x emissions rate used in the ~~above~~ equations ~~set forth~~ in subsection (g)(2) ~~of this Section~~ must be the higher of the actual NO_x emissions as determined by testing or monitoring data or the applicable uncontrolled NO_x emissions factor from Compilation of Air Pollutant Emission Factors: AP-42, Volume I: Stationary Point and Area Sources, ~~as~~ incorporated by reference in Section 217.104, for the unit that was replaced.

5) For a unit that is replaced with purchased power, the allowable NO_x emissions rate used in the equations ~~set forth~~ in subsection (g)(2) ~~of this Section~~ must be the emissions concentration ~~set forth~~ in Section 217.388(a)(1) or subsection (g)(6) ~~of this Section~~, when applicable, for the type of unit that was replaced. For owners or operators replacing units with purchased power, the annual hours of operations that must be used are the calendar year hours of operation for the unit that was shut down, averaged over the three-year period ~~prior to~~before the shutdown. The actual NO_x emissions for the units replaced by purchased power ($EM_{(i)act}$) are zero. These units may be included in any emissions averaging plan for no more than five years beginning with the calendar year that the replaced unit is shut down.

6) For units that have a later compliance date, allowable emissions rate used in the equations ~~set forth~~ in subsection (g)(2) ~~of this Section~~ must be:

A) ~~Prior to~~Before the applicable compliance date ~~pursuant to~~under Section 217.392, the higher of the actual NO_x emissions as determined by testing or monitoring data or the applicable uncontrolled NO_x emissions factor from Compilation of Air Pollutant Emission Factors: AP-42, Volume I: Stationary Point and Areas Sources, ~~as~~ incorporated by reference in Section 217.104; or

B) On and after the unit's applicable compliance date ~~pursuant to~~under Section 217.392, the applicable emissions concentration for that type of unit ~~pursuant to~~under Section 217.388(a)(1).

7) For a low usage unit complying with ~~the requirements of~~ Section 217.388(a)(3) and used in an emissions averaging plan, the allowable NO_x emissions rate used in the above equations ~~set forth~~ in subsection (g)(2) ~~of this Section~~ must be the higher of the actual NO_x emissions as determined by testing or monitoring data or the applicable uncontrolled NO_x emissions factor from Compilation of Air Pollutant Emission Factors: AP-42, Volume I: Stationary Point and Area Sources, ~~as~~ incorporated by reference in Section 217.104.

h) For units that use CEMS, the data must show that the total mass of actual NO_x emissions determined ~~pursuant to~~under subsection (h)(1) ~~of this Section~~ is less than or equal to the allowable NO_x emissions calculated in ~~accordance~~ compliance with the equations in subsections (f) and (h)(2) ~~of this Section~~ for both the ozone season and calendar year. The equations in subsection (g) ~~of this Section~~ will not apply.

1) The total mass of actual NO_x emissions in lbs for a unit (EM_{act}) must be the sum of the total mass of actual NO_x emissions from each affected unit using CEMS data collected in ~~accordance~~ compliance with 40 CFR 60 or 75, or alternate methodology that has been approved by the Agency or USEPA and included in a federally enforceable permit.

2) The allowable NO_x emissions must be determined as follows:

$$EM_{all(i)} = \sum_{j=1}^{m} (Cd_j \times flow_j \times 1.194 \times 10^{-7})$$

Where:

$EM_{all(i)}$ = Total mass of allowable NO_x emissions in lbs for a unit.

$flow_{ji}$ = Stack flow (dscf/hr) for a given stack.

Cd_j = Allowable concentration of NO_x (ppmv) ~~specified~~ in Section 217.388(a)(1) for a given stack (1.194×10^{-7} converts to lb/dscf).

j = subscript denoting each hour operation of a given unit.

m = Total number of hours of operation of a unit.

i = Subscript denoting an individual unit and the fuel used.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.392 Compliance

a) On and after January 1, 2008, an owner or operator of an affected engine listed in Appendix G may not operate the affected engine unless the requirements of this Subpart Q are met.

b) On and after May 1, 2010, an owner or operator of a unit identified by Section 217.386(a)(2), and that is not listed in Appendix G, may not operate the affected unit unless the requirements of this Subpart Q are met or the affected unit is exempt ~~pursuant to~~under Section 217.386(b).

c) Owners and operators of an affected unit may use NO_x allowances to meet the compliance requirements in Section 217.388 as specified in this subsection (c). A NO_x allowance is defined as an allowance used to meet the requirements of a NO_x trading program in which the State of Illinois participates ~~where~~ and in which one allowance is equal to one ton of NO_x emissions.

1) NO_x allowances may be used only under the following circumstances:

A) An anomalous or unforeseen operating scenario inconsistent with historical operations for a particular ozone season or calendar year that causes an exceedance of an emissions or operating hour limitation;

B) To achieve compliance for no more than two events in any rolling five-year period;

C) If the anomalous or unforeseen operating scenario occurs during an ozone season, it counts as a single event for purposes of the calendar year even if there is an exceedance of both an ozone season emission limitation and an annual emissions limitation as a result of ~~such~~ the operating scenario; and

D) For a unit that is not listed in Appendix G.

2) The owner or operator of the affected unit must surrender to the Agency a NO_x allowance for each ton or portion of a ton of NO_x by which actual emissions exceed allowed emissions, as follows:

A) Where a low usage limitation under Section 217.388(a)(3)(B) has been exceeded, the owner or operator of the affected unit must calculate the NO_x emissions resulting from the number of hours that exceeded the operating hour low usage limit and surrender to the Agency one NO_x allowance for each ton or portion of a ton of NO_x that was calculated.

B) For noncompliance with a limitation in an emissions averaging plan that includes low usage units, the owner or operator of the affected low usage unit must calculate the NO_x emissions using the applicable allowable emissions concentration from Section 217.388(a)(1).

C) For noncompliance with a seasonal limit in Section 217.388(a)(2), only a NO_x ozone season allowance must be used.

D) For noncompliance with the emissions concentration limits in Section 217.388(a)(1), low usage limitations in Section 217.388(a)(3), or an annual limitation in an emissions averaging plan in Section 217.388(a)(2), only a NO_x annual allowance may be used.

E) Notwithstanding the provisions of subsections (c)(2)(C) and (c)(2)(D) ~~of this Section~~, if a NO_x annual trading program does not exist, a NO_x ozone season allowance may be used for noncompliance with the emissions concentration limits in Section 217.388(a)(1), low usage limitations in Section 217.388(a)(3), or an annual limitation in an emissions averaging plan in Section 217.388(a)(2).

3) The owner or operator must submit a report documenting the circumstances that required the use of NO_x allowances and identify what actions will be taken in subsequent years to address these circumstances and must transfer the NO_x allowances to the Agency's federal NO_x retirement account. The report and the transfer of allowances must be submitted by October 31 for exceedances during the ozone season and March 1 for exceedances of the emissions concentration limits, the annual emissions averaging plan limits, or low usage limitations. The report must contain the NATS serial numbers of the NO_x allowances.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.394 Testing and Monitoring

a) An owner or operator must conduct an initial performance test ~~pursuant to~~under subsection (c)(1) or (c)(2) ~~of this Section~~ as follows:

1) By January 1, 2008, for affected engines listed in Appendix G. Performance tests must be conducted on units listed in Appendix G, even if the unit is included in an emissions averaging plan ~~pursuant to~~under Section 217.388(a)(2).

2) By the applicable compliance date ~~set forth~~ in Section 217.392, or within the first 876 hours of operation per calendar year, whichever is later:

A) For affected units not listed in Appendix G that operate more than 876 hours per calendar year; and

B) For units that are not affected units that are included in an emissions averaging plan and operate more than 876 hours per calendar year.

3) Once within the five-year period after the applicable compliance date ~~as set forth~~ in Section 217.392 or once within the five-year period following the date the unit commenced operation:

A) For affected units that operate fewer than 876 hours per calendar year; and

B) For units that are not affected units that are included in an emissions averaging plan and that operate fewer than 876 hours per calendar year.

b) An owner or operator of an engine or turbine must conduct subsequent performance tests ~~pursuant to~~under subsection (b)(1), (b)(2), and (b)(3) ~~of this Section~~ as follows:

1) For affected engines listed in Appendix G and all units included in an emissions averaging plan, once every five years. Testing must be performed in the calendar year by May 1 or within 60 days after starting operation, whichever is later;

2) If the monitored data shows that the unit is not in compliance with the applicable emissions concentration or emissions averaging plan, the owner or operator must report the deviation to the Agency in writing within 30 days and conduct a performance test ~~pursuant to~~under subsection (c) ~~of this Section~~ within 90 days ~~of~~ after the determination of noncompliance; and

3) When, in the opinion of the Agency or USEPA, it is necessary to conduct testing to demonstrate compliance with Section 217.388, the owner or operator of a unit must~~,~~ at ~~his or her~~its own expense~~,~~ conduct the test in ~~accordance~~ compliance with the applicable test methods and procedures ~~specified~~ in this Section within 90 days after ~~receipt of~~receiving a notice to test from the Agency or USEPA.

c) Testing Procedures:

1) For an engine: The owner or operator must conduct a performance test using Method 7 or 7E of 40 CFR 60, appendix A, ~~as~~ incorporated by reference in Section 217.104. Each compliance test must consist of three separate runs, each lasting a minimum of 60 minutes. NO_x emissions must be measured while the affected unit is operating at peak load. If the unit combusts more than one type of fuel (gaseous or liquid), including backup fuels, a separate performance test is required for each fuel.

2) For a turbine: The owner or operator must conduct a performance test using the applicable procedures and methods in 40 CFR 60.4400, ~~as~~ incorporated by reference in Section 217.104.

d) Monitoring: Except for those years in which a performance test is conducted ~~pursuant to~~under subsection (a) or (b) ~~of this Section~~, the owner or operator of an affected unit or a unit included in an emissions averaging plan must monitor NO_x concentrations annually, once between January 1 and May 1 or within the first 876 hours of operation per calendar year, whichever is later. If annual operation is less than 876 hours per calendar year, each affected unit must be monitored at least once every five years. Monitoring must be performed as follows:

1) A portable NO_x monitor ~~utilizing~~ using method ASTM D6522-00, ~~as~~ incorporated by reference in Section 217.104, or a method approved by the Agency must be used. If the engine or turbine combusts both liquid and gaseous fuels as primary or backup fuels, separate monitoring is required for each fuel.

2) NO_x and O_2 concentrations measurements must be taken three times for a duration of at least 20 minutes. Monitoring must be done at highest achievable load. The concentrations from the three monitoring runs must be averaged to determine whether the affected unit is in compliance with the applicable emissions concentration or emissions averaging plan, as specified in Section 217.388.

e) Instead of complying with ~~the requirements of~~ subsections (a), (b), (c), and (d) ~~of this Section~~, an owner or operator may install and operate on an affected unit a CEMS ~~on an affected unit~~ that meets the applicable requirements of 40 CFR 60, subpart A and appendix B, or 40 CFR 75, incorporated by reference in Section 217.104, and complies with the quality assurance procedures ~~specified~~ in 40 CFR 60, appendix F or 40 CFR 75, ~~as~~ incorporated by reference in Section 217.104, or an alternate procedure as approved by the Agency or USEPA in a federally enforceable permit. The CEMS must be used to demonstrate compliance with the applicable emissions concentration or emissions averaging plan only on an ozone season and annual basis.

f) The testing and monitoring requirements of this Section do not apply to affected units in compliance with ~~the requirements of~~ the low usage limitations ~~pursuant~~

~~to~~under Section 217.388(a)(3) or low usage units using NO_x allowances to comply with ~~the requirements of~~ this Subpart ~~pursuant to~~under Section 217.392(c), unless ~~such~~ the units are included in an emissions averaging plan. Notwithstanding the above circumstances, when~~,~~ in the opinion of the Agency or USEPA~~,~~ it is necessary to conduct testing to demonstrate compliance with Section 217.388, the owner or operator of a unit must~~,~~ at ~~his or her~~its own expense~~,~~ conduct the test in ~~accordance~~ compliance with the applicable test methods and procedures ~~specified~~ in this Section within 90 days after ~~receipt of~~receiving a notice to test from the Agency or USEPA.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.396 Recordkeeping and Reporting

a) Recordkeeping. The owner or operator of any unit included in an emissions averaging plan (e.g., affected units, nonsubject units, units that could be exempt ~~pursuant to~~under Section 217.386(b), and low usage units) or an affected unit that is not exempt ~~pursuant to~~under Section 217.386(b) and is not subject to the low usage exemption of Section 217.388(a)(3) must maintain records that demonstrate compliance with the requirements of this Subpart Q, which include~~, but are not limited to~~:

1) Identification, type (e.g., lean-burn, gas-fired), and location of each unit.

2) Calendar date of the record.

3) The number of hours the unit operated on a monthly basis and during each ozone season.

4) Type and quantity of the fuel used on a daily basis.

5) The results of all monitoring performed on the unit and reported deviations.

6) The results of all tests performed on the unit.

7) The plan for performing inspection and maintenance of the units, air pollution control equipment, and the applicable monitoring device ~~pursuant to~~under Section 217.388(a)(4).

8) A log of inspections and maintenance performed on the unit's air emissions, monitoring device, and air pollution control device. These records must include~~, at a minimum,~~ date, load levels, and any manual adjustments, along with the reason for the adjustment (e.g., air to fuel ratio, timing, or other settings).

9) If complying with the emissions averaging plan provisions of Sections 217.388(a)(2) and 217.390, copies of the calculations used to demonstrate compliance with the ozone season and annual control period limits, noncompliance reports for the ozone season, and ozone and annual control period compliance reports submitted to the Agency.

10) Identification of time periods for which operating conditions and pollutant data were not obtained by either the CEMS or alternate monitoring procedures, including the reasons for not obtaining sufficient data and a description of corrective actions taken.

11) Any NO_x allowance reconciliation reports submitted ~~pursuant to~~under Section 217.392(c)(3).

b) The owner or operator of an affected unit or unit included in an emissions averaging plan must maintain the records required by subsection (a) or (d) ~~of this Section~~, as applicable, for a period of five years at the source at which the unit is located. The records must be made available to the Agency and USEPA upon request.

c) Reporting Requirements

1) The owner or operator must notify the Agency in writing 30 days and five days ~~prior to~~before testing~~, pursuant to~~ under Section 217.394(a) and (b) and:

A) If, after the ~~30-days~~30-days' notice ~~for an initially scheduled test~~of testing is sent, there is a delay (e.g., due to operational problems) in conducting the performance test as scheduled, the owner or operator of the unit must notify the Agency as soon as possible of the delay ~~in the original test date~~, either by providing at least seven days ~~prior~~ notice of the rescheduled date of the performance test or by arranging a new test date with the Agency by mutual agreement;

B) Provide a testing protocol to the Agency 60 days ~~prior to~~before testing; and

C) Not later than 30 days after ~~the completion of~~completing the test, submit the results ~~of the test~~ to the Agency.

2) ~~Pursuant to~~Under the requirements for monitoring in Section 217.394(d), the owner or operator of the unit must report to the Agency any monitored exceedances of the applicable NO_x concentration from Section 217.388(a)(1) or (a)(2) within 30 days after performing the monitoring.

3) Within 90 days after permanently shutting down an affected unit or a unit included in an emissions averaging plan, the owner or operator of the unit must withdraw or amend the applicable permit to reflect that the unit is no longer in service.

4) If demonstrating compliance through an emissions averaging plan:

A) By October 31 following the applicable ozone season, the owner or operator must notify the Agency if ~~he or she~~it cannot demonstrate compliance for that ozone season; and

B) By January 31 following the applicable calendar year, the owner or operator must submit to the Agency a report that demonstrates ~~the following~~:

i) For all units that are part of the emissions averaging plan, the total mass of allowable NO_x emissions for the ozone season and for the annual control period;

ii) The total mass of actual NO_x emissions for the ozone season and annual control period for each unit included in the averaging plan;

iii) The calculations that demonstrate that the total mass of actual NO_x emissions are less than the total mass of allowable NO_x emissions using equations in Sections 217.390(f) and (g); and

iv) The information required to determine the total mass of actual NO_x emissions and the calculations performed in subsection (c)(4)(B)(iii) ~~of this Section~~.

5) If operating a CEMS, the owner or operator must submit an excess emissions and monitoring systems performance report in ~~accordance~~ compliance with ~~the requirements of~~ 40 CFR 60.7(c) and 60.13 or 40 CFR 75, incorporated by reference in Section 217.104, or an alternate procedure approved by the Agency or USEPA and included in a federally enforceable permit.

6) If using NO_x allowances to comply with ~~the requirements of~~ Section 217.388, reconciliation reports as required by Section 217.392(c)(3).

d) The owner or operator of an affected unit that is complying with the low usage provisions of Section 217.388(a)(3) must:

1) For each unit complying with Section 217.388(a)(3)(A), maintain a record

of the NO_x emissions for each calendar year;

2) For each unit complying with Section 217.388(a)(3)(B), maintain a record of bhp or MW-hours operated each calendar year; and

3) For each unit ~~utilizing~~ using NO_x allowances for compliance ~~pursuant to~~under Section 217.392(c)(3), maintain and submit any NO_x allowance reconciliation reports.

e) Instead of complying with ~~the requirements of subsections~~subsections (a)~~ of this Section~~, ~~subsection~~ (b)~~ of this Section~~, ~~subsections~~ (c)(1) through (c)(4)~~ of this Section~~, and ~~subsection~~ (d)~~ of this Section~~, an owner or operator of an affected unit complying with ~~the requirements of~~ Section 217.388(a)(1) and operating a CEMS on that unit may meet the applicable testing, monitoring, reporting, and recordkeeping requirements for that CEMS of 40 CFR 75, ~~as~~ incorporated by reference in Section 217.107.

(Source: Amended at 48 Ill. Reg._____, effective _____)

SUBPART T: CEMENT KILNS

Section 217.400 Applicability

~~The requirements of this~~This Subpart ~~shall apply~~applies to the types of cement kilns listed below with process rates in tons per hour (TPH) of clinker produced that are greater than or equal to the following:

a) Long dry kilns -- 12 TPH;

b) Long wet kilns -- 10 TPH;

c) Preheater kilns -- 16 TPH; and

d) Preheater/precalciner kilns -- 22 TPH.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.402 Control Requirements

a) After May 30, 2004, an owner or operator of any cement kiln subject to ~~the requirements of~~ this Subpart ~~shall~~ must not operate the kiln during the initial control period or any subsequent control period, unless the owner or operator complies with subsection (a)(1), (a)(2), (a)(3), (a)(5), or (a)(6) ~~of this Section~~ for kilns that commenced operation ~~prior to~~before January 1, 1996, or subsection (a)(4) or (a)(6) ~~of this Section~~ for kilns that commenced operation on or after January 1, 1996.

1) The kiln is operated with a low-NO_x burner or a mid-kiln firing system;

2) The kiln ~~shall~~ must not exceed the applicable NO_x emission limitation in pounds per ton of clinker (lb/T)~~, expressed~~ in the rates ~~listed~~ below:

A) Long dry kilns -- 5.1 lb NO_x/T of clinker;

B) Long wet kilns -- 6.0 lb NO_x/T of clinker;

C) Preheater kilns -- 3.8 lb NO_x/T of clinker; or

D) Preheater/precalciner kilns -- 2.8 lb NO_x/T of clinker.

3) The kiln achieves a 30 percent or greater reduction from its uncontrolled baseline, established ~~as set forth~~ in this subsection ~~(a)(3),~~ and complies with the following:

A) Uncontrolled baseline emissions ~~shall~~ must be determined using the following equation:

$$UBE = \frac{[EF \times SPR]}{2000 \text{ lbs } NO_x /T}$$

Where:

UBE = Uncontrolled Baseline NO_x emissions ~~expressed~~ in tons of NO_x per control period;

EF = Emissions factor, ~~expressed~~ in lbs of NO_x per ton of clinker produced per control period, based on one of the methods in subsection (a)(3)(B)~~ of this Section~~; and

SPR = Seasonal production rate, ~~expressed~~ in tons of clinker produced per control period, using the average of the two highest control period operating rates from the previous three-year period at the time the application for the permit with federally enforceable conditions is submitted to the Agency ~~pursuant to~~under subsection (a)(3)(C)~~ of this Section~~.

B) Emissions factors ~~shall~~ must be determined using one of the following methods:

i) The average of the emission factors for the type of kiln from the Compilation of Air Pollutant Emission Factors (AP-42) and the Alternative Control Techniques Document -- NO_x Emissions from Cement Manufacturing, ~~as~~ incorporated by reference in Section 217.104~~ of this Part~~;

ii) The site-specific emission factor developed from representative emissions testing~~, pursuant to~~ under 40 CFR 60, Appendix A, Method 7, 7A, 7C, 7D, or 7E, incorporated by reference in Section 217.104~~ of this Part~~, based on a range of typical operating conditions. The owner or operator must establish that these operating conditions are representative, subject to approval by the Agency, and must certify that the emissions testing is being conducted under representative conditions; or

iii) An alternate method for establishing the emissions factors, when submitted with supporting data to substantiate ~~such~~ the emissions factors and approved by the Agency ~~as set forth in~~under subsection (a)(3)(C)~~ of this Section~~.

C) The owner or operator must submit an emission reduction plan to the Agency and obtain Agency approval of that plan~~ by the Agency~~. ~~Such~~ The plan ~~shall~~ must be effective only when ~~contained~~ included in a permit as federally enforceable conditions ~~in a permit~~. ~~Such~~ The plan ~~shall~~ must include any alternate procedures for monitoring, testing, reporting, or recordkeeping approved by the Agency, or other provisions as appropriate.

4) Any kiln subject to this Subpart that commenced operation on or after January 1, 1996, must meet the more stringent of the requirements of this Subpart or other CAA requirements, or rules promulgated ~~thereunder~~under it, applicable to kilns. If a kiln is required to comply with a more stringent requirement ~~pursuant to~~under the CAA, and the owner or operator chooses to do so in lieu of complying with this Subpart, the owner or operator must submit an emissions reduction plan that demonstrates that compliance with the CAA requirement results in emissions reductions that are equal to or exceed the requirements of this Section and obtain a permit containing federally enforceable conditions addressing ~~such~~ the CAA requirement.

5) The owner or operator obtains an alternate emissions standard for operating the kiln ~~pursuant to~~under Section 28.1 of the Act [415 ILCS 5/28.1], and in ~~accordance~~ compliance with 35 Ill. Adm. Code 104, Subpart D~~,~~ provisions for adjusted standards. An adjusted standard or alternate emissions standard with an alternate compliance schedule ~~shall~~ must be granted by the Board to the extent consistent with federal law.

~~Such~~ The alternate ~~shall~~ must be effective only when included as a federally enforceable condition in a permit approved by USEPA or approved as a SIP revision. The adjusted standard ~~shall~~ must include any alternate procedures for control, compliance, monitoring, operation, testing, reporting, or recordkeeping that are appropriate. In addition, the owner or operator must demonstrate, as justification for the adjusted standard, that the control requirements ~~contained~~ in this Subpart, as they apply to cement kilns, meet one or more of the following criteria:

A) Unreasonable cost of control resulting from plant~~,~~ age, location or basic process design;

B) Physical impossibility of installing necessary control equipment; or

C) Other factors specific to the cement kiln that support an alternate emissions standard.

6) The owner or operator obtains approval by the Agency and USEPA to allow the kiln to participate in the federal NO_x Trading Program. ~~Such~~ The participation will be effective upon issuance of a permit containing all necessary federally enforceable permit conditions addressing the kiln's participation in the federal NO_x Trading Program ~~pursuant to~~under 40 CFR 96 and the Illinois NO_x Trading Program regulations at 35 Ill. Adm. Code 217. The owner or operator is not subject to ~~the requirements of~~ this Subpart for the duration of its participation in the NO_x Trading Program, except for the requirement to submit the initial compliance report ~~pursuant to~~under Section 217.408(a) ~~of this Subpart~~.

b) Notwithstanding any other provisions of this Subpart, a source and units at the source subject to ~~the provisions of~~ subsection (a) ~~of this Section~~ will become subject to this Subpart on *the first day of the control season subsequent to the calendar year in which all of the other states subject to the provisions of the NO_x SIP Call (63 Fed. Reg. 57,355 (October 27, 1998)) that are located in USEPA Region V or that are contiguous to Illinois have adopted regulations to implement NO_x trading programs and other required reductions of NO_x emissions pursuant to the NO_x SIP Call, and such regulations have received final approval by USEPA as part of the respective states' SIPS for ozone, or a final FIP for ozone promulgated by USEPA is effective for such other states*. [415 ILCS 5/9.9(f)]

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.404 Testing

a) Any owner or operator of a kiln that commenced operation ~~prior to~~before May 1, 2003, and using a low-NO_x burner or mid-kiln firing system to demonstrate compliance ~~pursuant to~~under Section 217.402(a)(1) ~~of this Subpart~~ must maintain

and operate the device according to the manufacturer's specifications as approved by the Agency.

b) Any owner or operator of a kiln that commenced operation ~~prior to~~before May 1, 2003, and demonstrating compliance ~~pursuant to~~under Section 217.402(a)(2), (a)(3)(C), or (a)(5) ~~of this Subpart~~ must complete an initial performance test between May 1, 2003, and May 30, 2004, and subsequent annual testing during each control period in which the kiln is operated. This testing must be consistent with ~~the requirements of~~ 40 CFR 60, Appendix A, Method 7, 7A, 7C, 7D, or 7E, incorporated by reference in Section 217.104 of this Part, or ~~such~~ an alternate test method ~~that has been~~ approved by the Agency ~~pursuant to~~under Section 217.402 (a)(3)(C) ~~of this Subpart~~ or the Board ~~pursuant to~~under Section 217.402(a)(5) ~~of this Subpart~~.

c) The owner or operator of a kiln that commences operation on or after May 1, 2003, must complete, as appropriate, an initial performance test within one year after initial startup and subsequent annual testing during each control period in which the kiln is operated. This testing must be consistent with the test methods ~~listed~~ in subsection (b) ~~of this Section~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.406 Monitoring

a) The owner or operator of a kiln subject to this Subpart must submit a complete monitoring plan addressing the applicable requirements of subsection (b) ~~of this Section~~ to the Agency and obtain Agency approval of ~~such~~ the plan ~~by the Agency~~. The monitoring plan ~~shall~~ must identify the operating conditions to be monitored and the records to be maintained under Section 217.410 ~~of this Subpart~~. For any kiln that commences operation on or before August 31, 2003, ~~such~~ the plan ~~shall~~ must be submitted on or before August 31, 2003. For any other kiln subject to this Subpart, ~~such~~ the plan ~~shall~~ must be submitted with the construction permit application for ~~such~~ the kiln. ~~Such~~ The plan will be effective only when included as federally enforceable conditions in a permit issued by the Agency.

b) The plan must:

1) Identify the specific operating conditions to be monitored and the correlation between the operating conditions and NO_x emission rates;

2) Include the data and information that the owner or operator used to identify the correlation between NO_x emission rates and these operating conditions;

3) Identify how the owner or operator will monitor these operating conditions on an hourly or other basis, as approved by the Agency, the quality assurance procedures or practices that will be employed to ensure that the data generated by monitoring these operating conditions will be representative and accurate, and the type and format of the records of these operating conditions that will be maintained by the owner or operator under Section 217.410 ~~of this Subpart~~;

4) If operating a low-NO_x burner or mid-kiln firing system, the plan must include only monitoring the parameters indicated in the manufacturer's specifications and recommendations for the low-NO_x burner or mid-kiln firing system as approved by the Agency; and

5) Notwithstanding ~~the requirements of~~ subsections (b)(1) and (b)(2) ~~of this Section~~ requiring the monitoring of operating parameters, if the owner or operator elects to monitor NO_x emissions using a continuous emissions monitoring system ~~(CEMS)~~, the owner or operator must submit a monitoring plan subject to approval by the Agency that contains the applicable provisions of 40 CFR 60.13 and of Method 7E in Appendix A ~~contained~~ in 40 CFR 60, ~~as~~ incorporated by reference in Section 217.104 ~~of this Part~~, and additional provisions regarding accuracy, data capture, and monitoring frequency.

c) The owner or operator must monitor the operating parameters of the emission unit and predict NO_x emission rates in ~~accordance~~ compliance with the plan ~~specified~~ in the applicable operating permit.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.408 Reporting

a) By May 31, 2004, or within one year after initial startup, whichever occurs later, the owner or operator of a kiln subject to ~~the requirements of~~ this Subpart must submit to the Agency an initial compliance certification for each kiln subject to ~~the requirements of~~ Section 217.402 ~~of this Subpart~~. This certification must contain the following information as applicable:

1) The identity and type of each kiln subject to this Subpart, the name and address of the plant where the kiln is located, and the name and telephone number of the person responsible for demonstrating compliance with this Subpart;

2) A demonstration that each kiln is in compliance with Section 217.402 ~~of this Subpart~~, identifying the provision with which it is complying, ~~and is~~ accompanied by a summary of the approved compliance method, e.g., performance test for the kiln and other supporting data being relied upon by the owner or operator;

3) If demonstrating compliance by use of a low-NO_x burner or mid-kiln firing system ~~pursuant to~~under Section 217.402(a)(1) ~~of this Subpart~~, a copy of the manufacturer's recommended maintenance and schedule for maintenance as approved by the Agency;

4) If demonstrating compliance ~~pursuant to~~under Section 217.402(a)(3)(C) or (a)(5) ~~of this Subpart~~, the date on which the permit containing the emission reduction plan or SIP revision was received as federally enforceable conditions; and

5) If demonstrating compliance ~~pursuant to~~under Section 217.402(a)(6) ~~of this Subpart~~, the date of issuance and the identification of the permit authorizing~~, through federally enforceable conditions,~~ participation in the federal NO_x Trading Program through federally enforceable conditions.

b) Beginning in 2004, by December 31 of each year, owners and operators complying with this Subpart ~~pursuant to~~under Section 217.402(a)(1), (a)(2), (a)(3), (a)(4), or (a)(5) must, as a seasonal component of its annual emission report ~~pursuant to~~under 35 Ill. Adm. Code 254, report the total NO_x emissions of each subject kiln during the control period of each year to the Agency, if the kiln operated during this period.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.410 Recordkeeping

a) Any owner or operator of a cement kiln subject to this Subpart must produce and maintain records that include~~, but are not limited to~~:

1) Emissions in pounds of NO_x per ton of clinker produced from each kiln subject to ~~the requirements of~~ Section 217.402(a)(2), (a)(3)(C), or (a)(5) ~~of this Subpart~~;

2) The date, time, and duration of any startup, shutdown, or malfunction in the operation of any cement kiln subject to this Subpart or any emissions monitoring equipment. The records ~~shall~~ must include a description of the malfunction and maintenance activity;

3) If operating a low-NO_x burner or mid-kiln firing system~~:~~, the date, time, and duration of any regularly scheduled maintenance, with a description of the activity, and tons of clinker produced from each kiln;

4) The results of any required performance testing;

5) Daily cement kiln clinker production in tons per day; and

6) The records of monitoring required by Section 217.406 ~~of this Subpart~~.

b) All records required to be produced or maintained ~~shall~~must be retained on site for a minimum of three years and be made available to the Agency upon request.

(Source: Amended at 48 Ill. Reg._____, effective _____)

SUBPART U: NO_x CONTROL AND TRADING PROGRAM FOR SPECIFIED NO_x GENERATING UNITS

Section 217.450 Purpose

The purpose of this Subpart is to cap the emissions of nitrogen oxides (NO_x) during the ozone control period from units subject to ~~the provisions of~~ this Subpart (budget units) by determining source allocations and by implementing the federal NO_x Trading Program, 40 CFR 96, consistent with the provisions of this Subpart.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.451 Sunset Provisions

Except for Sections 217.454(a) and (b) and 217.456(c), (e)(1)(B) through (D), and (e)(2), ~~the provisions of this~~ Subpart U ~~shall~~ does not apply for any control period in 2009 or ~~thereafter~~after it. Compliance for 2009 and after is required for these subsections. Noncompliance with the provisions of this Subpart that occurred ~~prior to~~before 2009 is subject to the applicable provisions of this Subpart.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.452 Severability

If any Section, subsection, or clause of this Subpart is found invalid, ~~such~~ the finding ~~shall~~ must not affect the validity of this Subpart as a whole or any Section, sentence, or clause not found invalid.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.454 Applicability

a) This Subpart applies to any fossil fuel-fired stationary boiler, combustion turbine, or combined cycle system~~,~~ with a maximum design heat input greater than 250 mmbtu/hr and that is:

1) A unit listed in Appendix E ~~of this Subpart~~, ~~irrespective~~ regardless of any subsequent changes in ownership, unit designation, or name of the unit; or

2) A unit not listed in Appendix E ~~of this Subpart~~ that:

A) At no time serves a generator producing electricity for sale;

B) At any time serves a generator producing electricity for sale~~,~~ if ~~such~~ the generator has a nameplate capacity of 25 MWe or less and has the potential to use no more than 50% of the potential electrical output capacity of the unit. Fifty percent of a unit's potential electrical output capacity ~~shall~~ must be determined by multiplying the unit's maximum design heat input by 0.0488 MWe/mmbtu. If the size of the generator is smaller than this calculated number, the unit is subject to ~~the provisions of~~ this Subpart, but if the size of the generator is greater than this calculated number, the unit is subject to ~~the provisions of~~ Subpart W ~~of this Part~~;

C) Is part of any source, as that term is defined in 35 Ill. Adm. Code Section 211.6130, listed in Appendix E ~~of this Part~~; or

D) Is a unit subject to Subpart W ~~of this Part~~ (excluding any unit listed in Appendix F ~~of this Part~~, regardless of any change in ownership or any change of operator), and the owner or operator makes a permanent election~~,~~ at the time of applying for a budget permit ~~pursuant to~~under this Part~~,~~ to subject the unit to the requirements of this Subpart rather than Subpart W ~~of this Part~~. Any unit for which such an election is made will not receive an allocation from the Subpart U or Subpart W NO_x Trading Budget.

b) ~~Those units that meet~~Units meeting the ~~above~~ criteria in subsection (a) are budget units.

c) Low-emitter status: Notwithstanding subsection (a) ~~of this Section~~, the owner or operator of a budget unit subject to ~~the requirements of~~ subsection (a) ~~of this Section~~ may elect low-emitter status by obtaining a permit with federally enforceable conditions that meet the requirements of Section 217.472(a). Starting with the effective date of ~~such~~ that permit, the unit ~~shall~~ must be subject only to the requirements of Section 217.472.

d) The owner or operator of any budget unit not listed in Appendix E ~~of this Part~~ but subject to this Subpart ~~shall~~ must not receive an allocation of NO_x allowances from the Subpart U or Subpart W NO_x Trading Budget, except for any allowance from the new source set-aside in ~~accordance~~ compliance with Section 217.468 ~~of this Subpart~~. ~~Such~~ The unit must acquire NO_x allowances in an amount not less than the NO_X emissions from ~~such~~ the budget unit during the control period (rounded to the nearest whole ton) in ~~accordance~~ compliance with the federal NO_x Trading Program, Subpart X, ~~of this Part~~ or ~~pursuant to~~under a permanent transfer of NO_x allocations ~~pursuant to~~under Section 217.462(b) ~~of this Subpart~~.

e) Notwithstanding any other provisions of this Subpart, a source and units at the source subject to ~~the provisions of~~ subsection (a) ~~of this Section~~ will become subject to this Subpart on *the first day of the control season subsequent to the calendar year in which all of the other states subject to the provisions of the* NO_x *SIP Call* (63 Fed. Reg. 57355 (October 27, 1998)) *that are located in USEPA Region V or are that contiguous to Illinois have adopted regulations to implement* NO_x *trading programs and other required reductions of* NO_x *emissions pursuant to the* NO_x *SIP Call, and such regulations have received final approval by USEPA as part of the respective states' SIPs for ozone, or a final FIP for ozone promulgated by USEPA is effective*. [415 ILCS 5/9.9(f)]

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.456 Compliance Requirements

All budget units subject to ~~the requirements of~~ this Subpart must comply with the following:

a) ~~The requirements of this~~This Subpart and 40 CFR 96, excluding 40 CFR 96.4(b), 96.55(c), and subparts C, E, and I, ~~as~~ incorporated by reference in Section 217.104 ~~of this Part~~. To the extent that this Subpart contains provisions which are inconsistent with any provisions of 40 CFR 96, the owner or operator of budget units subject to this Subpart ~~shall~~ must comply with the provisions of this Subpart ~~in lieu~~instead of ~~those~~ the provisions ~~which were~~ incorporated by reference.

b) Budget permit requirements:

1) The owner or operator of each source with one or more budget units at the source subject to this Subpart must submit a complete permit application for a budget permit in ~~accordance~~ compliance with ~~the provisions of~~ Section 217.458(a)(4), (a)(5), or (a)(6), as applicable, to be issued by the Agency with federally enforceable conditions covering the NO_x Trading Program (budget permit), and that complies with ~~the requirements of~~ Section 217.458 ~~of this Subpart~~.

2) The owner or operator of one or more budget units subject to this Subpart must operate each such budget unit in compliance with ~~such~~ the budget permit or complete budget permit application, as applicable.

3) The owner or operator of one or more budget units subject to this Subpart, at the time of filing an application for a permit under this Section, must submit a complete application for either a permit incorporating a source-wide overdraft account (as ~~such term is~~ defined in 40 CFR 96.2), or a permit incorporating ~~unit specific~~unit-specific compliance accounts for each budget unit at the source subject to this Subpart. ~~Such~~ This election ~~shall~~ must be at the sole discretion of the owner or operator of the source,

and the Agency ~~shall~~ must incorporate ~~such~~ the election into a permit issued to the source ~~pursuant to~~under this Subpart.

c) Monitoring requirements:

1) For budget units subject to ~~the requirements of~~ this Subpart~~,~~ and which commence operation on and after January 1, 2000, the owner or operator of each such budget unit at the source must comply with the monitoring requirements of 40 CFR 96, subpart H. The account representative of each such budget unit at the source ~~shall~~ must comply with ~~those sections of~~ the monitoring requirements of 40 CFR 96, subpart H, applicable to an account representative.

2) The compliance of each budget unit subject to ~~the requirements of~~ subsection (c)(1) or subsection (c)(3)(A) ~~of this Section~~ with the control period NO_x emissions limitation under subsection (d) ~~of this Section shall~~must be determined by the emissions measurements recorded and reported in ~~accordance~~ compliance with 40 CFR 96, subpart H.

3) For budget units which commenced operation ~~prior to~~before January 1, 2000:

A) The owner or operator of each such budget unit at the source must comply with ~~the requirements of~~ 40 CFR 96, subpart H; or

B) If the monitoring requirements of 40 CFR 96, subpart H, are demonstrated by the source to be technically infeasible as applied to a budget unit subject to ~~the requirements of~~ this Subpart, the owner or operator of such budget unit may monitor by an alternative monitoring procedure for the budget unit approved by the Agency and the Administrator of USEPA ~~pursuant to the provisions of~~under 40 CFR 75, subpart E. ~~Such~~ The alternative monitoring procedures must be ~~contained as~~ federally enforceable conditions in the unit's permit.

4) The compliance of each budget unit subject to ~~the requirements of~~ subsection (c)(3)(B) ~~of this Section shall~~must be determined by the emissions measurements recorded and reported in ~~accordance~~ compliance with the federally enforceable conditions in the budget unit's permit addressing monitoring as required by subsection (c)(3)(B) ~~of this Section~~.

d) Allowance requirements:

1) As of November 30 of each year, the allowance transfer deadline, the account representative of each source subject to ~~the requirements of~~ this Subpart must hold allowances available for compliance deductions under

40 CFR 96.54 for each budget unit at the source subject to this Subpart in the budget unit's compliance accounts, or the source's overdraft account. The number of allowances held in these accounts ~~shall~~ must not be less than the total NO_x emissions for the control period (rounded to the nearest whole ton), as determined in ~~accordance~~ compliance with subsection (c) ~~of this Section~~, plus any number of allowances necessary to account for actual ~~utilization~~ use (e.g., for testing, start-up, malfunction, and shut down) under 40 CFR 96.42(e) for all budget units at the source subject to this Subpart. Compliance with this provision ~~shall be~~is demonstrated if, as of the allowance transfer deadline, the sum of the allowances available for compliance deductions for all budget units at the source subject to this Subpart is equal to or greater than the total NO_x emissions (rounded to the nearest whole ton) from all budget units at the source subject to this Subpart.

2) Allowances ~~shall~~ must be held in, deducted from, or transferred among allowance accounts in ~~accordance~~ compliance with this Subpart and 40 CFR 96, subparts F and G.

3) Each ton of NO_x emitted by a source with one or more budget units subject to this Subpart in any control period in excess of the NO_x allowances held by the owner or operator for each budget unit at the source subject to this Subpart for each control period ~~shall constitute~~constitutes a separate violation of this Subpart and the Act.

4) ~~In order to~~To comply with ~~the requirements of~~ subsection (d)(1) ~~of this Section~~, an allowance may not be ~~utilized~~ used for a control period in a year ~~prior to~~before the year for which the allowance was allocated.

5) An allowance allocated by the Agency or USEPA under the NO_x Trading Program is a limited authorization to emit one ton of NO_x. No provision of the NO_x Trading Program, any permit issued or permit application submitted ~~pursuant to~~under this Subpart, or an exemption under 40 CFR 96.5 and no provision of law shall be construed to limit the authority of the United States or the State to terminate or limit this authorization.

6) An allowance allocated by the Agency or USEPA under the NO_x Trading Program or ~~pursuant to~~under this Subpart does not constitute a property right.

7) ~~Upon recordation~~Once it is recorded by USEPA under 40 CFR 96, subpart F or G, every allocation, transfer, or deduction of an allowance to or from a budget unit's compliance account or to or from the source's general or overdraft account where the budget unit is located is deemed to amend automatically and become a part of any budget permit of the budget unit.

This automatic amendment of the budget permit ~~shall~~ must occur by operation of law and will not require any further review.

e) Recordkeeping and reporting requirements:

1) Unless otherwise provided, the owner or operator of a source subject to ~~the requirements of~~ this Subpart must keep at the source each of the documents ~~listed~~ in subsections (e)(1)(A) through (e)(1)(D) ~~of this Section~~ for ~~a period of~~ 5 years from the date the document is created. This period may be extended for cause at any time ~~prior to~~before the end of 5 years in writing by the Agency or USEPA.

A) The account certificate of representation for the account representative for the source and each budget unit at the source subject to ~~the requirements of~~ this Subpart and all documents that demonstrate the truth of the statements in the account certificate of representation, in ~~accordance~~ compliance with 40 CFR 96.13~~, provided that the~~. The certificate and ~~such~~ supporting documents must be retained on site at the source beyond ~~such~~ the five-year period until ~~such~~ the documents are superseded ~~because of the submission of~~by submitting a new account certificate of representation changing the account representative.

B) All emissions monitoring information, in ~~accordance~~ compliance with subsection (c) ~~of this Section, provided that to~~. To the extent that 40 CFR 96, subpart H, provides for a three-year period for recordkeeping, the three-year period ~~shall~~ must apply.

C) Copies of all reports and other submissions and all records made or required under this Subpart or documents necessary to demonstrate compliance with ~~the requirements of~~ this Subpart.

D) Copies of all documents and any other submission under this Subpart.

2) The account representative of a source and each budget unit at the source subject to ~~the requirements of~~ this Subpart must submit to the Agency and USEPA the reports required under this Subpart, including those under 40 CFR 96, subpart H.

f) Liability:

1) ~~No~~ A revision of a budget permit ~~shall~~ must not excuse any violation of the requirements of the NO_x Trading Program or this Subpart that occurs ~~prior to~~before the date that the revision under such budget permit takes effect.

2) Each budget source and each budget unit at the source ~~shall~~ must meet the requirements of the NO_x Trading Program.

3) Any provision of this Subpart or the NO_x Trading Program that applies to a source subject to ~~the requirements of~~ this Subpart (including a provision applicable to the account representative of the source) ~~shall~~ must also apply to the owner and operator of ~~such~~ the source and to the owner and operator of the budget units subject to ~~the requirements of~~ this Subpart at the source.

4) Any provision of this Subpart or the NO_x Trading Program that applies to a budget unit subject to ~~the requirements of~~ this Subpart (including a provision applicable to the account representative of ~~such~~ the budget unit) ~~shall~~ must also apply to the owner and operator of ~~such~~ the budget unit. Except with regard to the requirements applicable to budget units with a common stack under 40 CFR 96, subpart H, the owner and operator and the account representative of one budget unit ~~shall~~ must not be liable for any violation by any other budget unit of which they are not an owner or operator or the account representative and that is located at a source of which they are not an owner or operator or the account representative.

5) Excess emissions requirements: The account representative of a source that has excess emissions in any control period ~~shall~~ must surrender the allowances as required for deduction under 40 CFR 96.54(d)(1).

6) The owner or operator of a budget EGU that has excess emissions in any control period ~~shall~~ must pay any fine, penalty, or assessment or comply with any other remedy imposed under 40 CFR 96.54(d)(3) and the Act.

g) Effect on other authorities: ~~No~~ A provision of this Subpart, the NO_x Trading Program, a budget permit application, a budget permit, or a retired budget unit exemption under 40 CFR 96.5 ~~shall~~ must not be construed as exempting or excluding the owner or operator and, to the extent applicable, the account representative of a source or budget unit from compliance with any other regulations promulgated under the CAA, the Act, an approved State implementation plan, or a federally enforceable permit.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.458 Permitting Requirements

a) Budget permit requirements~~:~~

1) The owner or operator of each source with one or more budget units subject to this Subpart is required to timely submit~~,~~ in ~~accordance~~

compliance with subsection (a)(4), (a)(5), or (a)(6) ~~of this Section~~, as applicable, a complete permit application addressing all requirements of this Subpart applicable to ~~such~~ the budget units.

2) Each budget permit (including a draft or proposed budget permit, if applicable) ~~shall~~ must contain federally enforceable conditions addressing all applicable requirements of the NO_x Trading Program and ~~requirements of~~ this Subpart and ~~shall~~ must be a complete and segregable portion of the source's entire permit.

3) ~~No~~ A budget permit ~~will~~ must not be issued, and no NO_x allowance account will be established, for any budget unit subject to this Subpart, until the Agency and USEPA have received a complete account certificate of representation under 40 CFR 96, subpart B, for an account representative of the source and each budget unit at the source subject to this Subpart.

4) For any budget unit subject to this Subpart that commenced operation before November 1, 2003, and for which a CAAPP permit is not required ~~pursuant to~~under Section 39.5 of the Act, the owner or operator of ~~such~~ the budget unit must submit a budget permit application meeting the requirements of this Subpart on or before November 1, 2003.

5) For any budget unit subject to this Subpart that commenced operation before August 1, 2003, and for which a CAAPP permit is required ~~pursuant to~~under Section 39.5 of the Act, the owner or operator of ~~such~~ the budget unit must submit a budget permit application meeting the requirements of this Subpart on or before August 1, 2003.

6) For any budget unit subject to this Subpart that is subject to Section 39.5 of the Act and that commences operation on or after August 1, 2003, and for any budget unit subject to this Subpart and not subject to Section 39.5 of the Act that commences operation on or after November 1, 2003, the owner or operator of ~~such~~ the budget units must submit applications for construction and operating permits ~~pursuant to~~under the requirements of Sections 39 and 39.5 of the Act and 35 Ill. Adm. Code 201, and ~~such~~ the applications must specify that they are applying for budget permits~~,~~ and ~~must~~ address the budget permit application requirements of this Subpart.

b) Budget permit applications:

1) Duty to apply: The owner or operator of any source with one or more budget units subject to this Subpart must submit to the Agency one or more complete budget permit applications under subsection (b)(2) ~~of this Section~~ for ~~such~~ the budget units by the applicable deadline in subsection (a)(4), (a)(5), or (a)(6) ~~of this Section~~. The owner or operator of any

source with such budget units must reapply for a budget permit as required by this Subpart, ~~and~~ 35 Ill. Adm. Code 201, and Sections 39 and 39.5 of the Act.

2) Information requirements for budget permit applications: A complete budget permit application must include the following elements concerning the budget units for which the application is submitted:

A) Identification of the source, including plant name. The ORIS (Office of Regulatory Information Systems) or facility code assigned to the source by the Energy Information Administration must also be included, if applicable;

B) Identification of each fossil fuel-fired combustion turbine, stationary boiler, or combined cycle system budget unit at the source;

C) An explanation why each budget unit is subject ~~to the requirements~~ of Section 217.454 ~~of this Subpart~~; and

D) The compliance requirements of Section 217.456 ~~of this Subpart~~.

3) Federally enforceable status of budget permit: An application for a budget permit ~~shall~~ must be treated as a modification of the source's existing federally enforceable permit, if ~~such~~ the permit has been issued for the source, and ~~shall~~ must be subject to the same procedural requirements as the original application. When the Agency issues a budget permit, it ~~shall~~ must be incorporated into and become a segregable part of the source's existing federally enforceable permit.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.460 Subpart U NO_X Trading Budget

a) The initial NO_x allowances available for allocation for each control period (the Subpart U NO_x Trading Budget) for budget units subject to ~~the provisions of~~ this Subpart ~~shall~~ must be 4,882 tons per control period, subject to adjustment in ~~accordance~~ compliance with subsections (b), (c), and (d) ~~of this Section~~, and subject to the new source set-aside for budget units subject to this Subpart~~, as set forth~~ in Sections 217.462 and 217.464 ~~of this Subpart~~. The Subpart U NO_x Trading Budget ~~shall~~ must be initially allocated ~~as set forth in~~under Appendix E ~~of this Part~~.

b) The Agency may adjust the Subpart U NO_x Trading Budget available for allocations in subsection (a) ~~of this Section~~ by adding allowances for budget units

subject to this Subpart opting to become subject to this Subpart ~~pursuant to~~under the requirements for opt-in units in Sections 217.474 and 217.476 ~~of this Subpart~~.

c) The Agency ~~shall~~ must adjust the Subpart U NO_x Trading Budget available for allocations in subsection (a) ~~of this Section~~ to remove allowances from units opting to become exempt ~~pursuant to~~under the requirements for low-emitters in Sections 217.454(c) and 217.472 ~~of this Subpart~~.

d) Except ~~as set forth in~~under subsection (e) ~~of this Section~~, if USEPA adjusts the base Subpart U NO_x Trading Budget of 4,882 allowances, the Agency will adjust the Subpart U NO_x Trading Budget pro-rata.

e) If USEPA adjusts the Subpart U NO_x Trading Budget as to any individual budget unit, the Subpart U NO_x Trading Budget ~~shall~~ must not be adjusted pro-rata, and only the allowance allocation for that budget unit will be adjusted.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.462 Methodology for Obtaining NO_x Allocations

a) Appendix E ~~of this Part~~ identifies the sources with existing budget units subject to this subpart and the number of NO_x allowance allocations that each such budget unit is eligible to receive each control period, subject to adjustment ~~in accordance with~~under Section 217.460 ~~of this subpart~~ and for transfers made in ~~accordance~~ compliance with subsection (b) ~~of this section~~. Each named budget unit's allocation will be adjusted proportionally based on the adjusted Subpart U NO_x Trading Budget ~~as provided by~~under Section 217.460 ~~of this Subpart~~.

b) The owner or operator of budget units subject to this Subpart may permanently transfer all or part of their allocation of allowances ~~pursuant to~~under Column 5 of Appendix E ~~of this part~~, subject to adjustment in ~~accordance~~ compliance with this Subpart, to another budget unit subject to this Subpart, or to a budget unit subject to Subpart W ~~of this Part~~. ~~Such~~ The transfer will be effective by submitting a written request to the Agency that is signed by the account representative for the transferring budget unit and containing the account number for the recipient budget unit. The owner or operator of budget units subject to this Subpart may not permanently transfer all or part of the new source set-aside indicated as the difference between Column 4 and Column 5 of Appendix E ~~of this Part~~.

c) Subject to adjustment in ~~accordance~~ compliance with this Subpart, or revocation or revision of the federal NO_x Trading Program or this Subpart, allocations ~~pursuant to~~under Appendix E ~~of this Part~~ exist for the life of the program, including all or a portion of any allocation transferred to another budget unit ~~pursuant to the provisions of~~under this Subpart.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.464 Methodology for Determining NO_X Allowances from the New Source Set-Aside

a) The methodology for calculating the allowances available to be allocated to new budget units subject to this Subpart from the new source set-aside is based on the more stringent emission rate of 0.15 lbs/mmbtu or the permitted NO_x emission rate, but not less than 0.055 lbs/mmbtu.

b) The general equation for determining allowances is:

$$A = \frac{HI \times ER}{2000}$$

Where HI = heat input (in mmbtu/control period) as determined in ~~accordance~~ compliance with subsection (c) ~~of this Section~~.

Where ER = The NO_X emission rate in lbs/mmbtu as determined in ~~accordance~~ compliance with subsection (a) ~~of this Section~~.

Where A = allowances of NO_X/control period.

c) The projected heat input ~~shall~~ must be determined ~~as set forth below~~under this subsection, divided by 2000 lbs/ton:

1) For "new" budget units subject to this Subpart that have seasonal heat input from at least 3 control periods ~~prior to~~before the allocation year, the average of the budget unit's 2 highest seasonal heat inputs from the control periods 1 to 3 years ~~prior to~~before the allocation year;

2) For "new" budget units subject to this Subpart that have seasonal heat input from only 2 control periods ~~prior to~~before the allocation year, the average of the budget unit's seasonal heat inputs from the control periods 1 and 2 years ~~prior to~~before the allocation year;

3) For "new" budget units subject to this Subpart that have seasonal heat input from only the control period ~~prior to~~before the allocation year, the heat input from that control period; or

4) For "new" budget units subject to this Subpart that have not operated for at least 77 days of the control period ~~prior to~~before the allocation year, the budget unit's maximum design heat input for the control period as designated in the construction permit.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.466 NO_X Allocations Procedure for Subpart U Budget Units

For each control period, the Agency will allocate the total number of NO_x allowances in the Subpart U NO_x Trading Budget apportioned to budget units under Section 217.460 ~~of this Subpart~~, subject to adjustment ~~as provided in~~under this Subpart. These allocations will be issued ~~as provided in~~under subsections (a) and (b) ~~of this Section~~, as follows:

a) The Agency will allocate to each budget unit ~~that is~~ listed in Appendix E ~~of this Part~~ the number of allowances ~~listed~~ in Column 5 of Appendix E ~~of this Part~~ for that budget unit for each 3-year period of the program. The Agency will report these allocations to USEPA by March 1, ~~of~~ 2004, and triennially thereafter.

b) The Agency will allocate allowances from the new source set-aside to "new" budget units ~~as set forth in~~under Section 217.468 ~~of this Subpart~~.

c) The Agency will report allocations from the new source set-aside to USEPA by April 1 of each year for the following year.

d) To the extent that allowances remain in the new source set-aside after any allocation ~~pursuant to~~under subsection (b) ~~of this Section~~, the Agency ~~shall~~ must allocate any ~~such~~ remaining allowances pro-rata to the owner or operator of the budget units ~~listed~~ in Appendix E ~~of this Part~~ to the extent a whole allowance may be allocated to any ~~such~~ owner or operator. The Agency will make ~~such~~ that allocation by April 15 of each year. If there are insufficient allowances to allocate a whole allowance to any ~~such~~ owner or operator of a budget unit ~~listed~~ in Appendix E ~~of this Part~~, ~~such~~ the allowances ~~shall~~ must be retained by the Agency in the new source set-aside. Any ~~such~~ allowances retained in the new source set-aside ~~shall~~ must be accumulated in the new source set-aside and may either:

1) Be available for allocation to new budget units for future control periods, subject to ~~the provisions of~~ Section 217.468 ~~of this Subpart~~; or

2) If, after any annual allocation to new budget units, there are sufficient allowances accumulated in the new source set-aside to allocate one or more whole allowances to the owner or operator of existing budget units ~~listed~~ in Appendix E ~~of this Part~~ on a pro-rata basis, ~~such~~ the accumulated whole allowances ~~shall~~ m be allocated pro-rata to such owner or operators.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.468 New Source Set-Asides for "New" Budget Units

a) For the 2004, 2005, and 2006 control periods, a "new" budget unit is one that commenced commercial operation on or after January 1, 2000. For the 2007 and later control periods, a "new" budget unit is one that commenced commercial operation no more than 3 control periods ~~prior to~~before the year the allocation is

requested ~~pursuant to~~under this Section. ~~Those units~~Units that commenced commercial operation on or after January 1, 2000, but before May 31, 2004, become "existing" budget units on October 1, 2004. ~~Those units~~Units that commenced commercial operation on or after May 31, 2004, become "existing" budget units the end of the third control period after they commenced commercial operation.

b) "New" budget units must have an allowance for every ton of NO_x emitted during the control period as provided in Section 217.456(d)~~ of this Subpart~~.

c) The Agency will establish a new source set-aside for each control period from which "new" budget units may purchase NO_x allowances. Each new source set-aside will be allocated allowances equal to 3% of each source's initial total Subpart U NO_x Trading Budget allocation ~~as reflected~~ in Column 5 of Appendix E~~ of this Part~~, which is 146 allowances, for each control period. The allocation for the new source set-aside from each source ~~shall~~ must be based on 3% of the source's initial allocation, without regard to subsequent adjustment to any ~~such~~ source's current allocation, including permanent transfer of allowances to another source or revision of the Subpart U NO_x Trading Budget by USEPA.

d) A "new" budget unit may request to purchase from the Agency a number of allowances that is not more than the number of allowances for which it is eligible, as determined in Section 217.464~~ of this Subpart~~, and subject to ~~the provisions of~~ this Section.

e) The account representative of a "new" budget unit under subsection (a) ~~of this Section~~ may purchase allowances from the new source set-aside by submitting to the Agency a request, in writing or in a format specified by the Agency, to be allocated allowances for the current control period from the new source set-aside. The allocation request for each applicable control period must be submitted after the date on which the Agency issues a construction permit to the "new" budget unit and before February 1 of the control period for which the allocation is requested.

f) The Agency will notify the account representative by March 1 of the applicable year of the number of allowances that are eligible for purchase for the "new" budget unit ~~pursuant to the requirements of~~under this Section. If the Agency does not receive payment by March 15 of the applicable year, the account representative will forfeit ~~his/her~~their eligibility to purchase the allowances offered. The Agency will make available for purchase those forfeited allowances on a pro-rata basis to "new" budget units requesting allocations ~~pursuant to~~under this Section, up to the number of allowances requested by each account representative. ~~Such~~ These additional allocations are subject to the purchase requirements of subsection (g)~~ of this Section~~.

g) The price of allowances from the new source set-aside ~~shall~~ will be:

1) For 2004 only, the price ~~shall~~ will be the average price at which NO_x allowances were traded in 2003 in the Ozone Transport Region; and

2) For all years other than 2004, the average price at which NO_x allowances were traded in the interstate NO_x Trading Program for the preceding control period.

h) The fees collected by the Agency from the sale of allowances will be distributed pro-rata to budget units receiving allowances ~~pursuant to~~under Appendix E ~~of this Part~~ on the basis of allocated allowances, subject to Agency administrative costs assessed ~~pursuant to~~under Section 9.9 of the Act.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.470 Early Reduction Credits (ERCs) for Budget Units

If a budget unit reduces its NO_x emission rate as required by the applicable provisions of subsection (c) ~~of this Section~~ in the 2001 or 2002 control period, or if approved by USEPA in the 2003 control period, for use in 2004 control period~~,~~ or later control periods authorized by USEPA~~,~~ the account representative may request early reduction credits (ERCs) for ~~such~~ the reductions, and the Agency will allocate ERCs to the budget unit in ~~accordance~~ compliance with the following:

a) Each budget unit for which the account representative requests any ERCs under subsection (d) ~~of this Section~~ must monitor NO_x emissions in ~~accordance~~ compliance with 40 CFR 96, subpart H, ~~as~~ incorporated by reference in Section 217.104 ~~of this Part~~, starting with the control period ~~prior to~~before the control period for which ERCs will first be requested and for each control period for which ERCs will be requested. For example, if ERCs are requested for reductions made in the 2001 control period, the budget unit must have implemented the applicable monitoring for the 2000 control period. The budget unit's monitoring system availability must be at least 90% during the control period ~~prior to~~before the control period in which the NO_x emissions reduction is made, and the budget unit must be in compliance with any applicable State or federal emissions or emissions-related requirements.

b) The NO_x emission rate and heat input under subsections (c) through (e) ~~of this Section shall~~must be determined in ~~accordance~~ compliance with 40 CFR 96, subpart H.

c) Each budget unit for which ERCs are requested under subsection (d) ~~of this Section~~ must have reduced its NO_x emission rate for each control period for which ERCs are requested by 30% or more below the actual NO_x emissions rate (lbs/mmbtu) for the first control period in which ERC's are requested.

d) The account representative of a budget unit that meets the requirements of subsections (a) through (c) ~~of this Section~~ may submit to the Agency a request for ERCs for the budget unit based on NO_x emission rate reductions made by the budget unit in control periods 2001, 2002, and 2003.

1) The number of ERCs that may be requested for any applicable control period ~~shall~~ must be an amount equal to the budget unit's heat input for ~~such~~ that control period multiplied by the difference between the budget unit's NO_x emission rate (meeting the requirements of subsection (c) ~~of this Section~~ for the applicable control period) and the budget unit's actual NO_x emission rate for the applicable control period, divided by 2000 lbs/ton, and rounded to the nearest ton;

2) Upon request of the account representative, the ERC allowance allocation for a particular budget unit may be deposited in the source's overdraft account rather than in the budget unit's compliance account; and

3) The early reduction request must be submitted by November 1 for reductions made in the previous control period~~,~~ in a format specified by the Agency.

e) ~~In the event that~~If the May 31, 2004 date for implementing the NO_x SIP Call is delayed, the early reduction request must be submitted in ~~accordance~~ compliance with any rulemaking or guidance by USEPA on the distribution of the Compliance Supplement Pool under the NO_x SIP Call, 63 Fed. Reg.57356 (October 27, 1998).

f) The Agency will allocate ERCs to the budget units meeting the requirements of subsections (a) through (c) ~~of this Section~~ and covered by ERC requests meeting the requirements of subsection (d) ~~of this Section~~ in ~~accordance~~ compliance with the following procedures:

1) The Agency ~~shall~~ must allocate no more than 2,427 ERCs over three years, as follows:

A) Not more than one-half of the total ERC allowances for reductions made in the control period in 2001;

B) Not less than one-half of the total ERC allowances for reductions made in the control period in 2002; and

C) If approved by USEPA, any ERC allowances not allocated ~~pursuant to~~under subsection (f)(1)(A) or (B) ~~of this Section~~, for reductions made in the control period in 2003.

2) If the number of ERC allowances requested for a reduction achieved in any control period is less than or equal to the number of ERC allowances designated for that control period in subsection (f)(1) ~~of this Section~~, the Agency will allocate one allowance for each accepted ERC request; and

3) If the number of ERC allowances requested for a reduction achieved in any control period is greater than the number of ERC allowances designated for that control period in subsection (f)(1) ~~of this Section~~, the Agency will allocate allowances for accepted requests on a pro-rata basis.

g) By April 1, the Agency will notify the account representative submitting an ERC request for the subsequent control period of the number of ERC allowances that will be allocated to each budget unit for that control period.

h) By May 1, 2004, the Agency will submit to USEPA the ERC allocations made by the Agency under this Section. USEPA will record such allocations to the extent that they are consistent with the requirements of this Section.

i) ERC allowances recorded under subsection (h) ~~of this Section~~ may be deducted under 40 CFR 96.54, ~~as~~ incorporated by reference in Section 217.104 ~~of this Part~~, for the control period in 2004 or ~~such~~ control periods ~~as may be~~ specified by USEPA. Notwithstanding 40 CFR 96.55(a), USEPA will deduct as retired any ERC allowances that are not deducted for compliance ~~in accordance with~~under 40 CFR 96.54 for the control period in 2004 or ~~such~~ control periods ~~as may be~~ specified by USEPA.

j) ERC allowances are treated as banked allowances in 2004 for the purposes of 40 CFR 96.55(a) and (b).

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.472 Low-Emitter Requirements

Starting with the effective date of the permit referred to in Section 217.454(c), the budget unit electing low-emitter status shaisll be subject only to the requirements of this Section.

a) For each control period the owner or operator elects low-emitter status, the federally enforceable permit conditions must:

1) Restrict the unit to burning only natural gas, fuel oil, or natural gas and fuel oil;

2) Limit the unit's potential NO_x mass emissions for the control period to 25 tons or less;

3) Restrict the unit's operating hours to the number calculated by dividing 25 tons of potential NO_x mass emissions by the unit's maximum potential hourly NO_x mass emissions;

4) Require that the unit's potential NO_x mass emissions ~~shall~~ must be calculated by using the monitoring provisions of 40 CFR 75, or if the unit does not rely on these monitoring provisions, as follows:

A) Select the applicable default NO_x emission rate: 0.7 lbs/mmbtu for combustion turbines burning natural gas exclusively during the control period; 1.2 lbs/mmbtu for combustion turbines burning any fuel oil during the control period; 1.5 lbs/mmbtu for boilers burning natural gas exclusively during the control period; or 2 lbs/mmbtu for boilers burning any fuel oil during the control period.

B) Multiply the default NO_x emission rate under subsection (a)(4)(A) ~~of this Section~~ by the unit's maximum rated hourly heat input, which is the higher of the manufacturer's maximum rated hourly heat input or the highest observed hourly heat input. The owner or operator of the unit may request in the permit application required by this subsection that the Agency use a lower value for the unit's maximum rated hourly heat input. The Agency may approve ~~such~~ the lower value if the owner or operator demonstrates that the maximum hourly heat input specified by the manufacturer or the highest observed hourly heat input, or both, are not representative. The owner or operator must demonstrate that ~~such~~ the lower value is representative of the unit's current capabilities because modifications have been made to the unit that permanently limit the unit's capacity;

5) Require that, for 5 years at the source that includes the unit, records demonstrating that the operating hours restriction, the fuel use restriction, and the other requirements of the permit related to these restrictions were met; and

6) Require that the owner or operator of the unit report to the Agency for each control period the unit's hours of operation (treating any partial hour of operation as a whole hour of operation), heat input, and fuel use by type. This report ~~shall~~ must be submitted by November 1 of each year the unit elects low-emitter status.

b) The Agency will notify the USEPA in writing of each unit electing low-emitter status ~~pursuant to the requirements of~~under subsection (a) ~~of this Section~~ and when any of the following occurs:

1) The permit with federally enforceable conditions that includes the restrictions in subsection (a) ~~of this Section~~ is issued by the Agency;

2) ~~Such~~ The permit is revised to remove any such restriction;

3) ~~Such~~ The permit includes any such restriction that is no longer applicable; or

4) The unit does not comply with any such restriction.

c) The unit ~~shall become~~becomes subject to ~~the requirements of~~ this Subpart if, for any control period under this Section, the fuel use restriction or the operating hours restriction under subsection (a) ~~of this Section~~ is removed from the unit's permit or otherwise is no longer applicable, or the unit does not comply with the fuel use restriction or the operating hours restriction under subsection (a) ~~of this Section~~. ~~Such~~ The unit ~~shall~~ must be treated as commencing operation on September 30 of the control period for which the fuel use restriction or the operating hours restriction is no longer applicable or during which the unit does not comply with the fuel use restriction or the operating hours restriction.

d) The owner or operator of a unit to which the Agency has ever allocated allowances under Appendix E ~~of this Part~~ may elect low-emitter status. In that case, the Agency will reduce the Subpart U NO_x budget by the number of allowances equal to the amount of NO_x emissions the unit is permitted to emit during the control period, ~~pursuant to~~under a federally enforceable condition in the unit's permit. The owner or operator of a unit electing low-emitter status may demonstrate that it holds sufficient allowances to cover the unit's NO_x emissions by offsetting the emissions from ~~such~~ the unit, not to exceed its permitted emission limit ~~as included~~ in its federally enforceable permit, with allowances issued for voluntary NO_x reductions meeting the requirements of Subpart X ~~of this Part~~. The Agency will not reduce the Subpart U NO_x budget by the allowances issued for NO_x reductions obtained in ~~accordance~~ compliance with Subpart X ~~of this Part~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.474 Opt-In Units

a) Any operating fossil fuel-fired stationary boiler, combustion turbine, combined cycle system, cement kiln, or stationary internal combustion engine in the State may qualify under this Subpart to become an opt-in budget unit if it:

1) Is not a budget EGU under Subpart W ~~of this Part~~;

2) Vents all of its emissions to a stack;

3) Has documented heat input for more than 876 hours in the six months immediately preceding the submission of an application for an initial budget permit under subsection (d) ~~of this Section~~;

4) Is not covered by a retired unit exemption under 40 CFR 96.5; and

5) Is not covered by the low-emitter exemption under Section 217.454(c) ~~of this Subpart~~.

b) Except as otherwise provided in this Subpart, an opt-in budget unit ~~shall~~ must be treated as a budget unit for purposes of applying this Subpart and 40 CFR 96.

c) Authorized Account Representative:

1) If an opt-in unit is located at the same source as one or more budget units, it ~~shall~~ must have the same account representative as those budget units.

2) If the opt-in unit is not located at the same source as one or more budget units, the owner or operator of the opt-in unit ~~shall~~ must submit a complete account certificate of representation under 40 CFR 96.13.

d) To apply for a budget permit, the account representative of a unit meeting the qualifications of subsection (a) ~~of this Section~~ must, except as provided under Section 217.478(f) ~~of this Subpart~~, submit to the Agency:

1) A budget permit application for the unit that:

A) Meets the requirements under Section 217.458 ~~of this Subpart~~; and

B) Contains provisions for a change in the regulatory status of the unit to an opt-in budget unit under Section 217.454 ~~of this Subpart pursuant to the provisions of~~under Section 217.480(b) ~~of this Subpart~~.

2) A monitoring plan for the unit in ~~accordance~~ compliance with 40 CFR 96, subpart H.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.476 Opt-In Process

The Agency will issue or deny a budget permit for an opt-in unit in ~~accordance~~ compliance with Section 217.458 ~~of this Subpart~~ and the following:

a) The Agency will determine, on an interim basis, the sufficiency of the monitoring plan accompanying the initial application for a budget permit for an opt-in unit. A monitoring plan is sufficient, for purposes of interim review, if the plan

contains information demonstrating that the NO_x emission rate and heat input of the unit are monitored and reported in ~~accordance~~ compliance with 40 CFR 96, subpart H. A determination of sufficiency ~~shall~~ must not be construed as acceptance or approval of that unit's monitoring plan.

b) If the Agency determines that the unit's monitoring plan is sufficient under subsection (a) ~~of this Section~~ and after completion of the monitoring system certification under 40 CFR 96, subpart H, the NO_x emission rate and the heat input of the unit ~~shall~~ must be monitored and reported in ~~accordance~~ compliance with 40 CFR 96, subpart H, for one full control period during which the monitoring system availability is not less than 90% and during which the unit is in full compliance with any applicable State or federal emissions or emissions-related requirements.

c) Based on the information monitored and reported under subsection (b) ~~of this Section~~, the unit's baseline heat rate ~~shall~~ must be calculated as the unit's total heat input (in mmbtu) for the control period, and the unit's baseline NO_x emission rate ~~shall~~ must be calculated as the unit's total NO_x emissions (in lbs) for the control period divided by the unit's baseline heat rate.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.478 Opt-In Budget Units: Withdrawal from the NO_X Trading Program

a) Requesting withdrawal: To withdraw from the NO_x Trading Program, the account representative of an opt-in budget unit ~~shall~~ must submit to the Agency a request to withdraw from the NO_x Trading Program and to withdraw the budget permit effective as of a specified date between (and not including) September 30 and May 1. The submission ~~shall~~ must be made no later than 90 days ~~prior to~~before the requested effective date of withdrawal.

b) Conditions for withdrawal: Before an opt-in budget unit may withdraw from the NO_x Trading Program and the budget permit may be withdrawn under this Section, the following conditions must be met:

1) For the control period immediately before the withdrawal is to be effective, the account representative must submit to the Agency an annual compliance certification report in ~~accordance~~ compliance with 40 CFR 96.30.

2) If the opt-in budget unit has excess emissions for the control period immediately before the withdrawal is to be effective, USEPA has deducted from the opt-in budget unit's compliance account, or the overdraft account of the NO_x budget source where the opt-in budget unit is located, the number of allowances required in ~~accordance~~ compliance with 40 CFR 96.54(d) for the control period.

3) After the requirements for withdrawal under subsections (b)(1) and (2) ~~of this Section~~ are met, USEPA will deduct from the opt-in unit's compliance account, or the overdraft account of the budget source where the opt-in budget unit is located, allowances equal in number to any allowances allocated to that unit under Section 217.782 ~~of this Subpart~~ for the control period for which the withdrawal is to be effective and earlier control periods. USEPA will close the opt-in budget unit's compliance account and will establish, and transfer any remaining allowances to, a new general account for the owners and operators of the opt-in unit. The account representative for the opt-in budget unit ~~shall~~ must become the account representative for the general account.

c) An opt-in budget unit that withdraws from the Subpart U NO_x Trading Program ~~shall~~ must comply with all requirements under the NO_x Trading Program concerning all years for which ~~such~~ the opt-in budget unit was an opt-in budget unit, even if ~~such~~ the requirements arise or must be complied with after the withdrawal takes effect.

d) Notification:

1) After the requirements for withdrawal under subsections (a) and (b) ~~of this Section~~ are met (including deduction of the full amount of allowances required), the Agency will revise the budget permit indicating a specified effective date for the withdrawal that is after the requirements in subsections (a) and (b) ~~of this Section~~ have been met and that is ~~prior to~~before May 1 or after September 30.

2) If the requirements for withdrawal under subsections (a) and (b) ~~of this Section~~ are not met, the Agency will issue a notification to the owner or operator and the account representative of the opt-in budget unit that the opt-in unit's request to withdraw its budget permit is denied. If the opt-in budget unit's request to withdraw is denied, the opt-in budget unit ~~shall~~ will remain subject to the requirements for an opt-in budget unit.

e) Reapplication upon failure to meet conditions of withdrawal: If the Agency denies the opt-in budget unit's request to withdraw, the account representative of the opt-in budget unit may submit another request to withdraw in ~~accordance~~ compliance with subsections (a) and (b) ~~of this Section~~.

f) Ability to return to the NO_x Trading Program: Once an opt-in unit withdraws from the NO_x Trading Program and its budget permit is withdrawn under this Section, the account representative may not submit another application for a budget permit under Section 217.474(d) ~~of this Subpart~~ for the unit ~~prior to~~before the date that is four years after the date on which the budget permit with opt-in conditions is withdrawn.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.480 Opt-In Units: Change in Regulatory Status

a) Notification: When an opt-in unit becomes an opt-in budget unit under Section 217.476 ~~of this Subpart~~, the owner or operator ~~shall~~ must notify the Agency and USEPA in writing of ~~such~~ the change in the opt-in unit's regulatory status within 30 days ~~of such~~afeter that change.

b) Any permit application that provides for a change in the regulatory status of a unit to an opt-in budget unit ~~pursuant to~~under Section 217.474(d)(1)(B) ~~of this Subpart~~ and included in a budget permit~~,~~ is effective on the date on which ~~such~~ the opt-in unit becomes an opt-in budget unit under Section 217.454 ~~of this Subpart~~.

c) USEPA's action:

1) USEPA will deduct from the compliance account for the opt-in budget unit under this Section, or the overdraft account of the budget source where the opt-in budget unit is located, allowances equal in number to and allocated for the same or a prior control period as:

A) Any allowances allocated to the budget unit (as an opt-in unit) under Section 217.482 ~~of this Subpart~~ for any control period after the last control period during which the unit's budget permit was effective; and

B) If the effective date of any budget permit under subsection (b) ~~of this Section~~ is during a control period, the allowances allocated to the opt-in budget unit (as an opt-in unit) under Section 217.482 ~~of this Subpart~~ for the control period multiplied by the ratio of the number of days in the control period, starting with the effective date of the budget permit under subsection (b) ~~of this Section~~, divided by the total number of days in the control period.

2) The account representative ~~shall~~ must ensure that the compliance account of the opt-in budget unit under subsection (b) ~~of this Section~~, or the overdraft account of the budget source where the opt-in budget unit is located, contains the allowances necessary ~~for completion of~~to complete the deduction under subsection (c)(1) ~~of this Section~~. If the compliance account or overdraft account does not contain sufficient allowances, USEPA will deduct the required number of allowances, regardless of the control period for which they were allocated, whenever allowances are recorded in either account.

3) For every control period during which any budget permit under subsection (b) ~~of this Section~~ is effective, the opt-in budget unit under subsection (b) ~~of this Section~~ will be treated, solely for purposes of allowance allocations under Section 217.466 or 217.468 ~~of this Subpart~~, as a unit that commenced operation on the effective date of the budget permit under subsection (b) ~~of this Section~~ and will be allocated allowances in ~~accordance~~ compliance with Section 217.466 or 217.468 ~~of this Subpart~~.

4) Notwithstanding subsection (c)(2) ~~of this Section~~, if the effective date of any budget permit under subsection (b) ~~of this Section~~ is during a control period, the following number of allowances will be allocated to the opt-in budget unit for the control period: the number of allowances otherwise allocated to the opt-in budget unit under Section 217.466 or 217.468 ~~of this Subpart~~ for the control period multiplied by the ratio of the number of days in the control period, starting with the effective date of the budget permit under subsection (b) ~~of this Section~~, divided by the total number of days in the control period.

d) When the owner or operator of an opt-in unit does not renew the budget permit for the opt-in budget unit issued ~~pursuant to~~under Section 217.474(d), USEPA will deduct from the opt-in budget unit's compliance account, or the overdraft account of the budget source where the opt-in budget unit is located, allowances equal in number to and allocated for the same or a prior control period as any allowances allocated to the opt-in budget unit under Section 217.482 ~~of this Subpart~~ for any control period after the last control period for which the budget permit is effective. The account representative ~~shall~~ must ensure that the opt-in budget unit's compliance account or the overdraft account of the budget source where the opt-in budget unit is located contains the allowances necessary ~~for completion of such~~to complete the deduction. If the compliance account or overdraft account does not contain sufficient allowances, USEPA will deduct the required number of allowances, regardless of the control period for which they were allocated, whenever allowances are recorded in either account.

e) After the deduction under subsection (d) ~~of this Section~~ is completed, USEPA will close the opt-in unit's compliance account. If any allowances remain in the compliance account after ~~completion of such~~completing the deduction and any deduction under 40 CFR 96.54, USEPA will close the opt-in unit's compliance account and will establish, and transfer any remaining allowances to, a new general account for the owner or operator of the opt-in unit. The account representative for the opt-in unit ~~shall~~ must become the account representative for the general account.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.482 Allowance Allocations to Opt-In Budget Units

a) Allowance allocations:

1) By the December 31 immediately before the first control period for which the budget permit is effective, the Agency will allocate allowances to the opt-in budget unit and submit to USEPA the allocation for the control period in ~~accordance~~ compliance with subsection (b) ~~of this Section~~.

2) By no later than the December 31 after the first control period for which the budget permit is in effect and December 31 of each year ~~thereafter~~after that, the Agency will allocate allowances to the opt-in budget unit and submit to USEPA allocations for the next control period~~,~~ in ~~accordance~~ compliance with subsection (b) ~~of this Section~~.

b) For the first control period, and for each subsequent control period for which the opt-in budget unit has a budget permit, the opt-in budget unit will be allocated allowances in ~~accordance~~ compliance with the following procedures:

1) The heat input (in mmbtu) used for calculating allowance allocations will be the lesser of:

A) The opt-in unit's baseline heat input determined ~~pursuant to~~under Section 217.476(c) ~~of this Subpart~~; or

B) The opt-in unit's heat input, for the control period in the year ~~prior to~~before the year of the first control period for which the allocations are being calculated, as determined in ~~accordance~~ compliance with 40 CFR 96, subpart H.

2) The Agency will allocate allowances to the opt-in budget unit in an amount equaling the heat input (in mmbtu) determined under subsection (b)(1) ~~of this Section~~ multiplied by the lesser of:

A) The unit's baseline NO_x emission rate (in lbs/mmbtu) determined ~~pursuant to~~under Section 217.476(c) ~~of this Subpart~~; or

B) The lowest NO_x emissions limitation (calculated in lbs/mmbtu) under State or federal law that is applicable to the budget opt-in unit for the year of the control period for which the allocations are being calculated, regardless of the averaging period to which the emissions limitation applies.

(Source: Amended at 48 Ill. Reg._____, effective _____)

SUBPART V: ELECTRIC POWER GENERATION

Section 217.521 Lake of Egypt Power Plant

a) The standard for nitrogen oxides of Section 217.121(d) does not apply when solid fossil fuel containing 25 percent ~~by weight~~ or more by weight of coal refuse is burned in Southern Illinois Power Cooperative's Unit No. 4 at its Lake of Egypt Power Plant.

b) The standard for nitrogen oxides of Section 217.121(e) does not apply when solid fossil fuel containing 25 percent ~~by weight~~ or more by weight of coal refuse is burned in combination with gaseous, liquid, or other solid fossil fuel in Southern Illinois Power Cooperative's Unit No. 4 at its Lake of Egypt Power Plant.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.700 Purpose

The purpose of this Subpart is to control the emissions of nitrogen oxides (NO_x) from electrical generating units (EGUs) during the ozone control period (~~for purposes of~~under Subpart V, the ozone control period is May 1 through September 30 of each year, beginning in 2003), by limiting the emissions of NO_x from EGUs to no more than 0.25 lbs/mmbtu of actual heat input during each ozone control period.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.702 Severability

If any section, subsection, or clause of this Subpart is found invalid, ~~such~~ that finding ~~shall~~ must not affect the validity of this Subpart as a whole or any Section, subsection, or clause not found invalid.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.704 Applicability

The following fossil fuel-fired stationary boilers, combustion turbines, or combined cycle systems are electrical generating units (EGUs) and ~~shall be~~are subject to this Subpart on and after May 1, 2003:

a) Any unit serving a generator that has a nameplate capacity greater than 25 MWe and produces electricity for sale, excluding those units ~~listed~~ in Appendix D ~~of this Part~~ and any new unit at a source ~~listed~~ in Appendix D ~~of this Part~~.

b) Any unit with a maximum design heat input ~~that is~~ greater than 250 mmbtu/hr that commences operation on or after January 1, 1999, serving at any time a generator that has a nameplate capacity of 25 MWe or less and has the potential to use more than 50% of the potential electrical output capacity of the unit. Fifty percent of a unit's potential electrical output capacity ~~shall~~ must be determined by multiplying

the unit's maximum design heat input by 0.0488 MWe/mmbtu. If the size of the generator is greater than this calculated number, the unit is an EGU subject to ~~the provisions of~~ this Subpart.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.706 Emission Limitations

a) On or after May 1, 2003, ~~no~~ an owner or operator subject to this Subpart ~~shall~~ must not cause or allow the emissions of NO_x into the atmosphere from any EGU to exceed 0.25 lbs/mmbtu of actual heat input during each ozone control period, based on a control period average for that unit.

b) Notwithstanding the emission limitation in subsection (a) ~~of this Section~~, any EGU subject to a more stringent NO_x emission limitation ~~pursuant to~~under any State or federal statute, including the Act, the Clean Air Act, or any regulations promulgated ~~thereunder~~under them, ~~shall~~ must comply with both the requirements of this Subpart and ~~that~~ the more stringent emission limitation.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.708 NO_X Averaging

a) Notwithstanding Section 217.706(a) ~~of this Subpart~~, the owners or operators of EGUs ~~listed~~ in Appendix F ~~of this Part~~ and the owner or operator of Soyland Power may elect to demonstrate compliance with this Subpart by averaging for the ozone control period the NO_x emission rates with any EGU ~~listed~~ in Appendix F or any EGU at Soyland Power's Alsey, Illinois facility that commenced commercial operation on or before January 1, 2000.

b) The average NO_x emission rate for all EGUs being averaged ~~pursuant to~~under this Section must not exceed 0.25 lbs/mmbtu and ~~shall~~ must be determined as follows:

$$ERavg = \frac{\sum_{i=1}^{n} (HI_i \times ER_i)}{\sum_{i=1}^{n} HI_i}$$

Where:

ERavg = average emission rate in lbs/mmbtu of all EGUs in averaging demonstration

HI_i	=	heat input for the ozone control period of EGU i, in mmbtu, as specified in the NO_x averaging demonstration
ER_i	=	actual NO_x emission rate of EGU i, in lbs/mmbtu, as specified in the NO_x averaging demonstration
n	=	number of EGUs that are averaging

c) Averaging under this Subpart must be authorized through federally enforceable permit conditions for ~~such~~ the EGU.

d) An EGU may be included in only one NO_x averaging demonstration during an ozone control period.

e) Compliance by averaging for each ozone control period must be demonstrated by November 30 following each ozone control period.

f) If averaging is used to demonstrate compliance with this Subpart, the effect of a failure to demonstrate ~~such~~ compliance ~~shall~~ must be that the compliance status of each EGU ~~shall~~ must be determined ~~pursuant to~~under Section 217.706(a) as if the NO_x emission rates of such EGUs were not averaged.

g) The owner or operator of any EGU that elects to participate in an averaging demonstration to demonstrate compliance with this Subpart cannot average with any other EGU for which the owner or operator of ~~such~~ theh EGU does not maintain the required records, data, and reports, or does not submit copies of ~~such~~ the records, data, or reports to the Agency upon request.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.710 Monitoring

a) The owner or operator of an EGU subject to this Subpart ~~shall~~ must install, calibrate, maintain, and operate continuous emissions monitoring systems (CEMS) for NO_x that meet the requirements of 40 CFR 75, subpart B.

b) Notwithstanding subsection (a), the owner or operator of a gas-fired peaking unit or oil-fired peaking unit as defined in 40 CFR 72.2 may determine NO_x emissions in ~~accordance~~ compliance with the emissions estimation protocol of 40 CFR 75, subpart E.

c) Notwithstanding subsection (a), the owner of operator of a combustion turbine that operates less than 350 ~~hour~~ hours per ozone control period may determine the heat input and NO_x emissions of the turbine as follows:

1) Heat input ~~shall~~ must be determined from the metered fuel usage to the turbine or the calculated heat input determined as the product of the turbine's maximum hourly heat input and hours of operation as recorded by operating instrumentation on the turbine;

2) NO_x emissions ~~shall~~ must be determined as the product of the heat input, as determined ~~above~~in subsection (c)(1), and the appropriate default NO_x emission factors below:

0.7 lbs/mmbtu - Natural gas
1.2 lbs/mmbtu - Fuel oil

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 217.712 Reporting and Recordkeeping

The owner or operator of an EGU subject to ~~the requirements of~~ this Subpart shall:

a) Comply with the recordkeeping and reporting requirements of 40 CFR 75 applicable to NO_x emissions during the ozone control period, including~~, but not limited to,~~ 40 CFR 75.54(b) and (d), incorporated by reference in Section 217.104 ~~of this Part~~.

b) Notwithstanding subsection (a), the owner or operator of a combustion turbine for which heat input and NO_x emissions are determined ~~pursuant to~~under subsection 217.710(c) ~~of this Subpart shall~~must comply with the following recordkeeping and reporting requirements:

1) Maintain records of the heat input and NO_X emissions of the turbine as determined in ~~accordance~~ compliance with Section 217.710(c) ~~of this Subpart,~~ and records of metered fuel use or operating hours used to determine heat input; and

2) Annually report the heat input and NO_x emissions of the turbine as determined in ~~accordance~~ compliance with Section 217.710(c) ~~of this Subpart,~~ for each ozone control period, by November 30 of each year.

c) Submit, with the report required under subsection ~~(c) of this Section~~(b), the following certification statement~~, to be~~ signed by a responsible official:

"I certify under penalty of law that this report and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons directly responsible for gathering the information, the information is, to the best of my knowledge and belief after due inquiry, true, accurate, and

complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."

Signature

Telephone No.

Date Signed

d) If demonstrating compliance through Section 217.706(a) ~~of this Subpart~~, by November 30 of each year beginning in 2003, submit to the Agency a report that demonstrates each EGU has not exceeded a NO_x emission rate of 0.25 lbs/mmbtu during the ozone control period.

e) If demonstrating compliance through Section 217.708 ~~of this Subpart~~, by November 30 of each year beginning in 2003, submit to the Agency a report that demonstrates the following:

1) For all EGUs participating in the averaging demonstration, the averaged ozone control period NO_x emission rate pursuant to the equation in Section 217.708(b) ~~of this Subpart~~;

2) The average ozone control period NO_x emission rate of each EGU participating in the averaging demonstration; and

3) The information required to determine the averaged NO_x emission rate ~~pursuant to~~under Section 217.708(b) ~~of this Subpart~~.

f) Keep and maintain~~,~~ for 5 years~~,~~ all records and data necessary to demonstrate compliance with the requirements of this Subpart, and upon request make ~~such~~ the records and data available to Agency and USEPA representatives for inspection and copying during working hours.

g) Submit copies of any records and data required by this Section to the Agency within 30 days after ~~receipt of~~receiving a written request by the Agency.

(Source: Amended at 48 Ill. Reg._____, effective _____)

SUBPART W: NO_x TRADING PROGRAM FOR ELECTRICAL GENERATING UNITS

Section 217.750 Purpose (Repealed)

~~The purpose of this Subpart is to control the emissions of nitrogen oxides (NO_x) during the ozone control period (May 1 through September 30 of each year, except that in 2004, "control period" means May 31 through September 30) from electrical generating units (EGUs) by determining source allocations and implementing the NO_x Trading Program pursuant to 40 CFR 96, as authorized by Section 9.9 of the Act [415 ILCS 5/9.9].~~

(Source: Repealed at 48 Ill. Reg. _____, effective _____)

Section 217.751 Sunset Provisions (Repealed)

~~The provisions of this Subpart W shall not apply for any control period in 2009 or thereafter. Noncompliance with the provisions of this Subpart that occurred prior to 2009 is subject to the applicable provisions of this Subpart.~~

(Source: Repealed at 48 Ill. Reg. _____, effective _____)

Section 217.752 Severability (Repealed)

~~If any Section, subsection or clause of this Subpart is found invalid, such finding shall not affect the validity of this Subpart as a whole or any Section, sentence or clause not found invalid.~~

(Source: Repealed at 48 Ill. Reg. _____, effective _____)

Section 217.754 Applicability (Repealed)

~~a) The following fossil fuel-fired stationary boilers, combustion turbines or combined cycle systems are electrical generating units (EGUs) and are subject to this Subpart:~~

~~1) Any unit serving a generator that has a nameplate capacity greater than 25 MWe and produces electricity for sale, excluding those units listed in Appendix D of this Part.~~

~~2) Any unit with a maximum design heat input that is greater than 250 mmbtu/hr that commences operation on or after January 1, 1999, serving at any time a generator that has a nameplate capacity of 25 MWe or less and has the potential to use more than 50% of the potential electrical output capacity of the unit. Fifty percent of a unit's potential electrical output capacity shall be determined by multiplying the unit's maximum design heat input by 0.0488 MWe/mmbtu. If the size of the generator is greater than this calculated number, the unit is an EGU subject to the provisions of this Subpart.~~

~~b) Those units that meet the above criteria and are subject to the NO_x Trading Program emissions limitations contained in this Subpart are budget EGUs.~~

c) Low-emitter status: Notwithstanding subsection (a) of this Section, the owner or operator of a budget EGU under subsection (a) of this Section may elect low-emitter status by obtaining a permit with federally enforceable conditions meeting the requirements of subsection (c)(1) of this Section. Starting with the effective date of such permit, the EGU shall not be a budget EGU and shall be subject only to the requirements of this subsection (c).

1) For each control period under this subsection (c), the federally enforceable permit conditions must:

A) Restrict the EGU to burning only natural gas, fuel oil, or natural gas and fuel oil;

B) Limit the EGU's potential NO_x mass emissions for the control period to 25 tons or less;

C) Restrict the EGU's operating hours during the control period to the number calculated by dividing 25 tons of potential NO_x mass emissions by the EGU's maximum potential hourly NO_x mass emissions;

D) Require that the EGU's potential NO_x mass emissions be calculated by using the monitoring provisions of 40 CFR 75 or, if the EGU does not rely on these monitoring provisions, by using the applicable default rate, as follows:

i) Select the applicable default NO_x emission rate from one of the following:

0.7 lb/mmbtu for combustion turbines burning natural gas exclusively during the control period;

1.2 lbs/mmbtu for combustion turbines burning any fuel oil during the control period;

1.5 lbs/mmbtu for boilers burning natural gas exclusively during the control period; or

2 lbs/mmbtu for boilers burning any fuel oil during the control period.

ii) Multiply the default NO_x emission rate under subsection (c)(1)(D)(i) of this Section by the EGU's unit-specific maximum rated heat input (mmbtu), which is the higher of the manufacturer's maximum rated hourly heat input or the highest observed hourly heat input. The owner or operator

of the EGU may request in the permit application required by this subsection (c) that the Agency use a lower value for the EGU's maximum rated hourly heat input. The Agency may approve such lower value if the owner or operator demonstrates that the maximum hourly heat input specified by the manufacturer or the highest observed hourly heat input, or both, are not representative. The owner or operator must also demonstrate that such lower value is representative of the EGU's current capabilities because modifications have been made to the EGU that permanently limit the EGU's capacity;

E) Require that the owner or operator of the EGU retain for five years, at the source that includes the EGU, records demonstrating that the operating hours restriction, the fuel use restriction, and the other requirements of the permit related to these restrictions were met; and

F) Require that the owner or operator of the EGU report to the Agency the EGU's hours of operation (treating any partial hour of operation as a whole hour of operation), heat input, and fuel use by type during each control period. This report shall be submitted by November 1 of each year the EGU elects low-emitter status.

2) The Agency will notify USEPA in writing of each EGU electing low-emitter status pursuant to the requirements of subsection (c)(1) of this Section and when any of the following occurs:

A) The permit with federally enforceable conditions that includes the restrictions in subsection (c)(1) of this Section is issued by the Agency;

B) Such permit is revised to remove any such restriction;

C) Such permit includes any such restriction that is no longer applicable; or

D) The EGU does not comply with any such restriction.

3) The EGU shall become a budget EGU, subject to the requirements of this Subpart if, for any control period under subsection (c) of this Section, the fuel use restriction or the operating hours restriction under subsection (c)(1) of this Section is removed from the EGU's permit or otherwise becomes no longer applicable, or the EGU does not comply with the fuel use restriction or the operating hours restriction under subsection (c)(1) of this Section. Such EGU shall be treated as commencing operation and, for

~~a unit under subsection (a)(1) of this Section, commencing commercial operation, on September 30 of the year prior to the control period for which the fuel use restriction or the operating hours restriction is no longer applicable or during which the EGU does not comply with the fuel use restriction or the operating hours restriction.~~

~~4) The owner or operator of an EGU to which the Agency has ever allocated allowances may elect low-emitter status. In that case, the Agency will reduce the EGU trading budget by the number of allowances corresponding to the amount of NO_x emissions the EGU is permitted to emit during the control period as set forth in the EGU's federally enforceable state operating permit.~~

~~d) Notwithstanding the provisions in subsection (a) of this Section, sources may opt-in to the NO_x Trading Program and will receive allowance allocations consistent with applicable requirements, if they meet the requirements for a budget opt-in unit pursuant to Sections 217.774 through 217.782 of this Part.~~

(Source: Repealed at 48 Ill. Reg. _____, effective _____)

Section 217.756 Compliance Requirements (Repealed)

~~All EGUs subject to the requirements of this Subpart must comply with the following:~~

~~a) The requirements of this Subpart and 40 CFR 96 (excluding 40 CFR 96.4(b) and 96.55(c), and excluding 40 CFR 96, Subparts C, E, and I) as incorporated by reference in Section 217.104 of this Part.~~

~~b) Permit requirements:~~

~~1) The owner or operator of each source with one or more budget EGUs at the source must apply for a permit issued by the Agency with federally enforceable conditions covering the NO_x Trading Program ("budget permit") that complies with the requirements of Section 217.758 of this Part.~~

~~2) The owner or operator of each budget source and each budget EGU at the source must operate the budget EGU in compliance with such budget permit.~~

~~c) Monitoring requirements:~~

~~1) The owner or operator of each budget source and each budget EGU at the source must comply with the monitoring requirements of 40 CFR 96, subpart H. The account representative of each budget source and each budget EGU at the source must comply with those sections of the~~

monitoring requirements of 40 CFR 96, subpart H, applicable to an account representative.

2) The compliance of each budget EGU with the budget emissions limitation under subsection (d) of this Section shall be determined by the emissions measurements recorded and reported in accordance with 40 CFR 96, subpart H.

d) NO_x requirements:

1) By November 30 of each year, the allowance transfer deadline, the account representative of each budget source and each budget EGU at the source shall hold allowances available for compliance deductions under 40 CFR 96.54 in the budget EGU's compliance account or the source's overdraft account. The number of allowances held shall not be less than the budget EGU's total tons of NO_x emissions for the control period, rounded to the nearest whole ton, as determined in accordance with 40 CFR 96, subpart H, plus any number necessary to account for actual utilization (e.g., for testing, start-up, malfunction, and shut down) under 40 CFR 96.42(e) for the control period.

2) Each ton of NO_x emitted in excess of the number of NO_x allowances held by the owner or operator for each budget EGU for each control period shall constitute a separate violation of this Part and the Act.

3) A budget EGU shall be subject to the monitoring and NO_x requirements of subsections (e)(1) and (d)(1) of this Section starting on the later of May 31, 2004, the date on which the EGU commences OR THE FIRST DAY OF THE CONTROL SEASON SUBSEQUENT TO THE CALENDAR YEAR IN WHICH ALL OF THE OTHER STATES SUBJECT TO THE PROVISIONS OF THE NO_X SIP CALL (63 Fed. Reg. 57355 (October 27, 1998)) THAT ARE LOCATED IN USEPA REGION V OR THAT ARE CONTIGUOUS TO ILLINOIS HAVE ADOPTED REGULATIONS TO IMPLEMENT NO_X TRADING PROGRAMS AND OTHER REQUIRED REDUCTIONS OF NO_X EMISSIONS PURSUANT TO THE NO_X SIP CALL, AND SUCH REGULATIONS HAVE RECEIVED FINAL APPROVAL BY USEPA AS PART OF THE RESPECTIVE STATES' SIPS FOR OZONE, OR A FINAL FIP FOR OZONE PROMULGATED BY USEPA IS EFFECTIVE. [415 ILCS 5/9.9(f)]

4) Allowances shall be held in, deducted from, or transferred among allowance accounts in accordance with this Subpart and 40 CFR 96, subparts F and G, and Sections 217.774 through 217.782 of this Part.

5) In order to comply with the requirements of subsection (d)(1) of this Section, an allowance may not be utilized for a control period in a year prior to the year for which the allowance is allocated.

6) An allowance allocated by the Agency or USEPA under the NO_x Trading Program is a limited authorization to emit one ton of NO_x in accordance with the NO_x Trading Program. No provision of the NO_x Trading Program, the budget permit application, the budget permit, or a retired unit exemption under 40 CFR 96.5, and no provision of law shall be construed to limit the authority of the United States or the State to terminate or limit this authorization.

7) An allowance allocated by the Agency or USEPA under the NO_x Trading Program does not constitute a property right.

8) Upon recordation by USEPA under 40 CFR 96, subpart F or G, or Section 217.782 of this Part, every allocation, transfer, or deduction of an allowance to or from a budget EGU's compliance account or to or from the overdraft account of the budget source where the budget EGU is located is deemed to amend automatically, and become a part of, any budget permit of the budget EGU. This automatic amendment of the budget permit shall be deemed an operation of law and will not require any further review.

e) Recordkeeping and reporting requirements:

1) Unless otherwise provided, the owner or operator of the budget source and each budget EGU at the source shall keep on site at the source each of the documents listed in subsections (e)(1)(A) through (e)(1)(D) of this Section for a period of five years from the date the document is created. This period may be extended for cause, at any time prior to the end of five years, in writing by the Agency or USEPA.

A) The account certificate of representation of the account representative for the source and each budget EGU at the source, all documents that demonstrate the truth of the statements in the account certificate of representation, in accordance with 40 CFR 96.13, provided that the certificate and documents must be retained on site at the source beyond such five-year period until such documents are superseded because of the submission of a new account certificate of representation changing the account representative.

B) All emissions monitoring information, in accordance with 40 CFR 96, subpart H, provided that to the extent that 40 CFR 96, subpart

H provides for a three-year period for recordkeeping, the three-year period shall apply.

C) Copies of all reports, compliance certifications, and other submissions and all records made or required under the NO_x Trading Program or documents necessary to demonstrate compliance with the requirements of the NO_x Trading Program or with the requirements of this Subpart.

D) Copies of all documents used to complete a budget permit application and any other submission under the NO_x Trading Program.

2) The account representative of a budget source and each budget EGU at the source must submit to the Agency and USEPA the reports and compliance certifications required under the NO_x Trading Program, including those under 40 CFR 96, subparts D and H, and Section 217.774 of this Part.

f) Liability:

1) No revision of a permit for a budget EGU shall excuse any violation of the requirements of the NO_x Trading Program that occurs prior to the date that the revision to such budget permit takes effect.

2) Each budget source and each budget EGU shall meet the requirements of the NO_x Trading Program.

3) Any provision of the NO_x Trading Program that applies to a budget source (including any provision applicable to the account representative of a budget source) shall also apply to the owner and operator of such budget source and to the owner and operator of each budget EGU at the source.

4) Any provision of the NO_x Trading Program that applies to a budget EGU (including any provision applicable to the account representative of a budget EGU) shall also apply to the owner and operator of such budget EGU. Except with regard to the requirements applicable to budget EGUs with a common stack under 40 CFR 96, subpart H, the owner and operator and the account representative of one budget EGU shall not be liable for any violation by any other budget EGU of which they are not an owner or operator or the account representative.

5) The account representative of a budget EGU that has excess emissions in any control period shall surrender the allowances as required for deduction under 40 CFR 96.54(d)(1).

6) The owner or operator of a budget EGU that has excess emissions in any control period shall pay any fine, penalty, or assessment or comply with any other remedy imposed under 40 CFR 96.54(d)(3) and the Act.

g) Effect on other authorities. No provision of the NO_x Trading Program, a budget permit application, a budget permit, a low-emitter exemption under Section 217.754(c) of this Subpart, or a retired unit exemption under 40 CFR 96.5 shall be construed as exempting or excluding the owner and operator and, to the extent applicable, the account representative of a budget source or budget EGU, from compliance with any other regulation promulgated under the CAA, the Act, an approved State implementation plan, or a federally enforceable permit.

(Source: Repealed at 48 Ill. Reg. _____, effective _____)

Section 217.758 Permitting Requirements (Repealed)

a) Budget permit requirements:

1) Each source with a budget EGU is required to submit a complete permit application addressing all applicable NO_x Trading Program requirements for a permit meeting the requirements of this Section, applicable to each budget EGU at the source. Each budget permit (including any draft or proposed budget permit, if applicable) will contain elements required for a complete budget permit application under subsection (b)(2) of this Section.

2) Each budget permit (including a draft or proposed budget permit, if applicable) shall contain federally enforceable conditions addressing all applicable NO_x Trading Program requirements and shall be a complete and segregable portion of the source's entire permit under subsection (a)(1) of this Section.

3) No budget permit shall be issued, and no NO_x allowance account shall be established for a budget EGU at a source, until the Agency and USEPA have received a complete account certificate of representation under 40 CFR 96, subpart B, for an account representative of the source and the budget EGU at the source.

4) For budget EGUs that commenced operation before November 1, 2003, and for which a CAAPP permit is not required pursuant to Section 39.5 of the Act, the owner or operator of such unit must submit a budget permit application meeting the requirements of this Section on or before November 1, 2003.

5) For budget EGUs that commenced operation before August 1, 2003, and for which a CAAPP permit is required pursuant to Section 39.5 of the Act,

the owner or operator of such unit must submit a budget permit application meeting the requirements of this Section on or before August 1, 2003.

6) For budget EGUs that are subject to Section 39.5 of the Act and that commence operation on or after August 1, 2003, and for budget EGUs not subject to Section 39.5 of the Act and that commence operation on or after November 1, 2003, the owner or operator of such units must submit applications for construction and operating permits pursuant to the requirements of Sections 39 and 39.5 of the Act and 35 Ill.Adm.Code 201 and such applications must specify that they are applying for budget permits, and must address the budget permit application requirements of this Section.

b) Budget permit applications:

1) Duty to apply. The owner or operator of any source with one or more budget EGUs shall submit to the Agency a complete budget permit application for the source under subsection (b)(2) of this Section by the applicable deadline in subsection (a)(4), (a)(5), or (a)(6) of this Section. The owner or operator of any source with one or more budget EGUs shall reapply for a budget permit for the source as required by this Subpart, 35 Ill. Adm. Code 201, and Sections 39 and 39.5 of the Act.

2) Information requirements for budget permit applications. A complete budget permit application shall include the following elements concerning the source for which the application is submitted:

A) Identification of the source, including plant name. The ORIS (Office of Regulatory Information Systems) or facility code assigned to the source by the Energy Information Administration shall also be included, if applicable;

B) Identification of each budget EGU at the source. An explanation of whether each EGU is a budget EGU under Section 217.754 or 217.774 of this Part;

C) The compliance requirements of Section 217.756 of this Part; and

D) For each opt-in unit at the source the following certification statements by the account representative:

i) "I certify that each unit for which this permit application is submitted under Section 217.774 of this Part is not a budget EGU under Section 217.754 of this Part and is not covered by a retired unit exemption that is in effect under 40 CFR 96.5."

ii) If the application is for an initial budget permit, "I certify that each unit for which this permit application is submitted under Section 217.774 of this Part, and has documented heat input for more than 876 hours in the six months immediately preceding the submission of an application for an initial budget permit under Section 217.774(d) of this Part."

3) An application for a budget permit shall be treated as a modification of the EGU's existing federally enforceable permit, if such a permit has been issued for that EGU, and shall be subject to the same procedural requirements. When the Agency issues a budget permit, it shall be incorporated into and become part of that EGU's existing federally enforceable permit.

(Source: Repealed at 48 Ill. Reg. _____, effective _____)

Section 217.760 NOx Trading Budget (Repealed)

The NO_x trading budget available for allowance allocations for each control period shall be determined as follows:

a) The total base EGU trading budget is 30,701 tons per control period subject, however, to the following:

1) In 2004 through 2006, 5% of this number shall be allocated to the new source set-aside under Section 217.768 of this Part, resulting in an EGU trading budget of 29,166 tons available for allocation per control period; and

2) In 2007 and thereafter, 2% of this amount shall be allocated to the new source set-aside, resulting in an EGU trading budget of 30,087 tons available for allocation per control period.

b) The Agency must adjust the total base EGU trading budget available for allocation in subsection (a) of this Section to remove allowances from budget EGUs opting to become exempt pursuant to the requirements for low-emitters in Section 217.754(c)(4) of this Part.

c) If USEPA adjusts the total base EGU trading budget for any reason, the Agency will adjust the budget pro rata.

(Source: Repealed at 48 Ill. Reg. _____, effective _____)

Section 217.762 Methodology for Calculating NOx Allocations for Budget Electrical Generating Units (EGUs) (Repealed)

~~The methodology for calculating the allowances to be allocated to budget EGUs is based on the following emission rates and heat inputs:~~

~~a) The applicable NO_x emission rates are as follows:~~

~~1) For budget EGUs listed in Appendix F: 0.15 lb/mmbtu.~~

~~2) For budget EGUs not listed in Appendix F: The more stringent of 0.15 lb/mmbtu or the permitted NO_x emission rate, but not less than 0.055 lb/mmbtu.~~

~~b) Heat input (HI) (in mmbtu/control period) is determined as follows:~~

~~1) The budget EGU's two highest heat inputs from the control periods four to six years prior to the year for which the allocation is being made are averaged. However, for a budget EGU that did not commence commercial operation at least six years prior to the control period for which the allocation is being made, the heat inputs for the following control periods shall be used:~~

~~A) If the budget EGU has heat input for the control period four years prior to the year for which the NO_x allocation is being made, but not for the control periods five and six years prior, the heat input for that control period four years prior shall be used; or~~

~~B) If the budget EGU has heat inputs for the control periods four and five years prior to the year for which the NO_x allocation is being made, but not for the control period six years prior, the heat input for the control periods four and five years prior shall be averaged.~~

~~2) The budget EGU's heat input in subsection (b)(1) of this Section for the control period in each year will be determined in accordance with:~~

~~A) 40 CFR 75, as incorporated by reference in Section 217.104 of this Part, if the budget EGU was otherwise subject to its requirements for the year; or~~

~~B) The best available data reported to the Agency for the budget EGU if the budget EGU was not subject to the requirements of 40 CFR 75, for the year.~~

~~c) The general equation for determining allowances is:~~

$$A = \frac{HI \times ER}{2000}$$

~~Where:~~

~~HI = heat input (in mmbtu/control period) as determined in Section 217.762(b) of this Part.~~

~~ER = The NO_x emission rate in lbs/mmbtu as determined in Section 217.762(a) of this Part.~~

~~A = allowances of NO_x/control period.~~

(Source: Repealed at 48 Ill. Reg. _____, effective _____)

Section 217.764 NOx Allocations for Budget EGUs (Repealed)

~~For each control period, the Agency will allocate the total number of NO_x allowances in the trading budget apportioned to budget EGUs under Section 217.760 of this Part. These allocations will be issued as provided in subsections (a) through (f) of this Section and Section 217.768 for this Part of new sources. Specifically:~~

~~a) In 2004, 2005, and 2006 (or the first three years of the program):~~

~~1) The Agency will allocate to each budget EGU that is listed in Appendix F of this Part the number of allowances listed in Column 7 of Appendix F of this Part for that budget EGU, as well as any allowances that are not allocated from the new source set-aside to budget EGUs in subsection (a)(2) of this Section. Any such allowances from the new source set-aside will be allocated to budget EGUs listed in Appendix F of this Part pursuant to 217.768(j) of this Part.~~

~~2) The Agency will allocate allowances from the new source set-aside to budget EGUs that commenced commercial operation on or after January 1, 1995, pursuant to Section 217.768 of this Part.~~

~~3) The Agency will report these allocations to USEPA at the time it submits the SIP.~~

~~b) In 2007 (or the fourth year of the program):~~

~~1) The Agency will allocate to each budget EGU that is listed in Appendix F of this Part the number of allowances listed in Column 8 of Appendix F for that budget EGU, and any allowances that are not allocated to budget EGUs under subsection (b)(2) of this Section will be allocated as provided in subsection (b)(4) of this Section.~~

2) The Agency will apportion to each budget EGU that commenced commercial operation on or after January 1, 1995, and before May 1, 2003, allowances as calculated in the following equation:

$$A = \frac{0.80 \times (HI \times ER)}{2000}$$

Where:

HI = heat input (in mmbtu/control period) as determined in Section 217.762(b) of this Part.

ER = the NO_x emission rate in lbs/mmbtu, as determined in Section 217.762(a)(2) of this Part.

A = allowances of NO_x/control period.

3) Notwithstanding subsection (b)(2) of this Section, if the total number of allowances determined by subsection (b)(2) of this Section is more than 6,017, which is the number of allowances remaining in the trading budget after allocations have been made to budget EGUs in subsection (b)(1) of this Section, the Agency will prorate the number of NO_x allowances available to budget EGUs pursuant to the criteria in subsection (b)(2) of this Section so that the total number of allowances allocated to these budget EGUs does not exceed 6,017.

4) If the total number of allowances allocated pursuant to subsection (b)(2) of this Section is less than 6,017, which is the number of allowances remaining in the trading budget after allocations have been made to budget EGUs in subsection (b)(1) of this Section, the Agency will allocate the remaining allowances to budget EGUs as follows:

A) For budget EGUs in subsection (b)(1) of this Section, the pro-rata allocation shall be determined by the heat input calculated pursuant to Section 217.762(b) of this Part, multiplied by the emission rate in Section 217.762(a)(1) of this Part.

B) For budget EGUs in subsection (b)(2) of this Section, the pro-rata allocation shall be determined by the heat input calculated pursuant to Section 217.762(b) of this Part, multiplied by the emission rate in Section 217.762(a)(2) of this Part.

5) The Agency will allocate allowances from the new source set-aside, pursuant to Section 217.768 of this Part, to budget EGUs that commenced commercial operation after May 1, 2003 and that have not operated for the full 2003 control period.

6) The Agency will report these allocations to USEPA by April 1, 2004, except for allocations from the new source set-aside, which the Agency will report by May 1, 2007.

c) In 2008 (or the fifth year of the program):

1) The Agency will allocate to each budget EGU that is listed in Appendix F of this Part the number of allowances listed in Column 8 of Appendix F for that budget EGU, and any allowances that are not allocated to budget EGUs under subsection (b)(2) of this Section will be allocated as provided in subsection (b)(4) of this Section.

2) The Agency will apportion to each budget EGU that commenced commercial operation on or after January 1, 1995, and before May 1, 2004, allowances as calculated in the following equation:

$$A = \frac{0.80 \times (HI \times ER)}{2000}$$

Where:

HI = heat input (in mmbtu/control period) as determined in Section 217.762(b) of this Part.

ER = the NO_x emission rate in lbs/mmbtu, as determined in Section 217.762(a)(2) of this Part.

A = allowances of NO_x/control period.

3) Notwithstanding subsection (c)(2) of this Section, if the total number of allowances determined by subsection (c)(2) of this Section is more than 6,017, which is the number of allowances remaining in the trading budget after allocations have been made to budget EGUs in subsection (c)(1) of this Section, the Agency will prorate the number of NO_x allowances available to budget EGUs pursuant to the criteria in subsection (c)(2) of this Section so that the total number of allowances allocated to these budget EGUs does not exceed 6,017.

4) If the total number of allowances allocated pursuant to subsection (c)(2) of this Section is less than 6,017, which is the number of allowances remaining in the trading budget after allocations have been made to budget EGUs in subsection (c)(1) of this Section, the Agency will allocate the remaining allowances to budget EGUs as follows:

A) For budget EGUs in subsection (c)(1) of this Section, the pro-rata allocation shall be determined by the heat input calculated pursuant to Section 217.762(b) of this Part, multiplied by the emission rate in Section 217.762(a)(1) of this Part.

B) For budget EGUs in subsection (c)(2) of this Section, the pro-rata allocation shall be determined by the heat input calculated pursuant to Section 217.762(b) of this Part, multiplied by the emission rate in Section 217.762(a)(2) of this Part.

5) The Agency will allocate allowances from the new source set-aside, pursuant to Section 217.768 of this Part, to budget EGUs that commenced commercial operation after May 1, 2004 and that have not operated for the full 2004 control period.

6) The Agency will report these allocations to USEPA by April 1, 2005, except for allocations from the new source set-aside, which the Agency will report by May 1, 2008.

d) In 2009 (or the sixth year of the program):

1) The Agency will allocate to each budget EGU that is listed in Appendix F of this Part the number of allowances listed in Column 9 of Appendix F for that budget EGU and any allowances that are not allocated to budget EGUs under subsection (d)(2) of this Section will be allocated as provided in subsection (d)(4) of this Section.

2) The Agency will apportion to each budget EGU that commenced commercial operation on or after January 1, 1995, and before May 1, 2005, allowances calculated in the following equation:

$$A = \frac{0.50 \times (HI \times ER)}{2000}$$

Where:

HI = heat input (in mmbtu/control period) as determined in Section 217.762(b) of this Part.

ER = the NO_x emission rate in lbs/mmbtu, as determined in Section 217.762(a)(2) of this Part.

A = allowances of NO_x/control period.

3) Notwithstanding subsection (d)(2) of this Section, if the total number of allowances determined by subsection (d)(2) of this Section is more than 15,043, which is the number of allowances remaining in the trading

budget after allocations have been made to budget EGUs in subsection (d)(1) of this Section, the Agency will prorate the total number of NO_x allowances available to budget EGUs that received allowances pursuant to the criteria in subsection (d)(2) of this Section so that the total number of allowances allocated to these budget EGUs does not exceed 15,043.

4) If the total number of allowances allocated pursuant to subsection (d)(2) of this Section is less than 15,043, which is the number of allowances remaining in the trading budget after allocations have been made to budget EGUs in subsection (d)(1) of this Section, the Agency will allocate the remaining allowances to budget EGUs as follows:

A) For budget EGUs in subsection (d)(1) of this Section, the pro-rata allocation shall be determined by the heat input calculated pursuant to Section 217.762(b) of this Part, multiplied by the emission rate in Section 217.762(a)(1) of this Part.

B) For budget EGUs in subsection (d)(2) of this Section, the pro-rata allocation shall be determined by the heat input calculated pursuant to Section 217.762(b) of this Part, multiplied by the emission rate in Section 217.762(a)(2) of this Part.

5) The Agency will allocate allowances from the new source set-aside, pursuant to Section 217.768 of this Part, to budget EGUs that commenced commercial operation after May 1, 2005 and that have not operated for the full 2005 control period.

6) As of April 30, 2009, if the number of allowances in the new source set-aside exceeds 3% of the total number of tons of NO_x emissions in the trading budget apportioned to budget EGUs as determined pursuant to Section 217.768(i) and (j) of this Part, the number of allowances above 3% will be allocated to budget EGUs receiving allowances pursuant to this subsection (d).

7) The Agency will report these allocations to USEPA by April 1, 2006, except for allocations from the new source set-aside, which the Agency will report by May 1, 2009.

e) In 2010 (or the seventh year of the program):

1) The Agency will allocate to each budget EGU that is listed in Appendix F of this Part the number of allowances listed in Column 9 of Appendix F for that budget EGU and any allowances that are not allocated to budget EGUs under subsection (e)(2) of this Section as provided in subsection (e)(4) of this Section.

2) The Agency will assign to each budget EGU that commenced commercial operation on or after January 1, 1995, and before May 1, 2006, allowances as calculated in the following equation:

$$A = \frac{0.50 \times (HI \times ER)}{2000}$$

Where:

HI = heat input (in mmbtu/control period) as determined in Section 217.762(b) of this Part.

ER = the NO_x emission rate in lbs/mmbtu, as determined in Section 217.762(a)(2) of this Part.

A = allowances of NO_x/control period.

3) Notwithstanding subsection (e)(2) of this Section, if the total number of allowances determined by subsection (e)(2) of this Section is more than 15,043, which is the number of allowances remaining in the trading budget after allocations have been made to budget EGUs in subsection (e)(1) of this Section, the Agency will prorate the total number of NO_x allowances allocated to budget EGUs that received allowances pursuant to the criteria in subsection (e)(2) of this Section so that the total number of allowances allocated to these budget EGUs does not exceed 15,043.

4) If the total number of allowances allocated pursuant to subsection (e)(2) of this Section is less than 15,043, which is the number of allowances remaining in the trading budget after allocations have been made to budget EGUs in subsection (e)(1) of this Section, the Agency will allocate the remaining allowances to budget EGUs as follows:

A) For budget EGUs in subsection (e)(1) of this Section, the pro-rata allocation shall be determined by the heat input calculated pursuant to Section 217.762(b) of this Part, multiplied by the emission rate in Section 217.762(a)(1) of this Part.

B) For budget EGUs in subsection (e)(2) of this Section, the pro-rata allocation shall be determined by the heat input calculated pursuant to Section 217.762(b) of this Part, multiplied by the emission rate in Section 217.762(a)(2) of this Part.

5) The Agency will allocate allowances from the new source set-aside, pursuant to Section 217.768 of this Part, to budget EGUs that commenced commercial operation after May 1, 2006 and that have not operated for the full 2006 control period.

6) As of April 30, 2010, if the number of allowances in the new source set-aside exceeds 3% of the total number of tons of NO_x emissions in the trading budget apportioned to budget EGUs as determined pursuant to Section 217.768(i) and (j) of this Part, the number of allowances above 3% will be allocated to budget EGUs receiving allowances pursuant to this subsection (e).

7) The Agency will report these allocations to USEPA by April 1, 2007, except for allocations from the new source set-aside, which the Agency will report by May 1, 2010.

f) In 2011 (or the eighth year) of the program and annually thereafter:

1) The Agency will apportion the available NO_x allowances to each budget EGU based on its heat input determined in Section 217.762(b) of this Part, multiplied by:

A) For budget EGUs that commenced commercial operation prior to January 1, 1995, the NO_x emission rate determined in Section 217.762(a)(1) of this Part.

B) For budget EGUs that commenced commercial operation on or after January 1, 1995, the NO_x emission rate determined in Section 217.762(a)(2) of this Part.

2) The Agency will allocate allowances from the new source set-aside, pursuant to Section 217.768 of this Part, to budget EGUs that commenced commercial operation after the control period four years prior to the year in which allocations are made and that have not operated for the full control period four years prior to the year in which the allocations are being made.

3) As of April 30, 2011, if the number of allowances in the new source set-aside exceeds 3% of the total number of tons of NO_x emissions in the trading budget apportioned to budget EGUs as determined pursuant to Section 217.768(e) and (f) of this Part, the number of allowances above 3% will be allocated to budget EGUs receiving allowances pursuant to this subsection (f).

4) The Agency will report these allocations to USEPA by April 1 of each year that is three years prior to the year in which the allocations are being made, except for allocations from the new source set-aside, which the Agency will report by May 1 of each year in which the allocations are being made.

~~BOARD NOTE: Because of litigation involving the NO_x SIP Call, Michigan v. EPA, No. 98-1497, 2000 WL 180650 (D.C. Cir. March 3, 2000), the years defining the control periods may change. Should this occur, the dates set forth under each year will be considered to adjust correspondingly.~~

(Source: Repealed at 48 Ill. Reg. _____, effective _____)

Section 217.768 New Source Set-Asides for "New" Budget EGUs (Repealed)

~~a) "New" budget EGUs~~

~~1) A "new" budget EGU is one that commenced commercial operation on or after January 1, 1995, and does not receive allowances pursuant to Section 217.764 of this Part.~~

~~2) "New" budget EGUs must have an allowance for every ton of NO_x emitted during the control period as provided in Section 217.756(d) of this Part.~~

~~3) A "new" budget EGU may request from the Agency a number of allowances that is not more than the number of allowances for which it is eligible, as determined in subsection (c) of this Section.~~

~~b) The Agency shall apportion allowances from the new source set-aside as follows:~~

~~1) For 2004, 2005, and 2006, to budget EGUs that commenced commercial operation on or after January 1, 1995; and~~

~~2) For 2007 and thereafter, to budget EGUs that have not operated the full control period four years prior to the control period for which the allocation is being made.~~

~~c) The Agency will establish a new source set-aside for each control period. Each new source set-aside will be allocated allowances equal to:~~

~~1) 5% of the EGU trading budget in 2004, 2005, and 2006, which is 1,535 allowances, subject to adjustment to reflect additions or deletions to the EGU trading budget;~~

~~2) 2% of the EGU of the trading budget in 2007 and thereafter, which is 614 allowances, subject to adjustment to reflect additions or deletions to the EGU trading budget.~~

~~3) As of April 30 of the applicable year, beginning in 2009 and thereafter, if the number of allowances in the new source set-aside is greater than or equal to 3% of the total number of tons of NO_x emissions in the trading budget apportioned to budget EGUs, which is 921 allowances, subject to adjustment to reflect additions or deletions to the EGU trading budget,~~

pursuant to subsections (i) and (j) of this Section, the number of allowances above 3% will be allocated to budget EGUs receiving allowances pursuant to Section 217.764 of this Part. These allowances shall be allocated on a pro-rata basis.

d) The account representative of a "new" budget EGU under subsection (a) of this Section may obtain allowances from the new source set-aside by submitting to the Agency a request, in writing or in a format specified by the Agency, to be allocated allowances for the current control period from the new source set-aside. The allocation request for each applicable control period must be submitted after the date on which the Agency issues a construction permit to the budget EGU and before March 1 of the control period for which the allocation is requested.

e) In an allocation request under subsection (d) of this Section, the account representative may request allowances for a control period in a number that does not exceed the projected heat input in mmbtu during the applicable control period multiplied by the more stringent of 0.15 lb/mmbtu or the permitted emission rate, but no more stringent than 0.055 lb/mmbtu. The projected heat input shall be determined as set forth below, divided by 2000 lbs/ton:

1) For "new" budget EGUs that have heat input from at least three control periods prior to the allocation year, the average of the budget EGU's two highest seasonal heat inputs from the control periods one to three years prior to the allocation year;

2) For "new" budget EGUs that have heat input from only two control periods prior to the allocation year, the average of the budget EGU's seasonal heat inputs from the control periods one and two years prior to the allocation year;

3) For "new" budget EGUs that have seasonal heat input from only the control period prior to the allocation year, the heat input from that control period; or

4) For "new" budget EGUs that have commenced commercial operation but have not operated for at least 77 days of the control period prior to the allocation year, the budget EGU's maximum design heat input for the control period as designated in the construction permit.

f) Beginning in 2007, the Agency will review and allocate allowances pursuant to each allocation request, contingent upon receiving payment pursuant to subsection (k) of this Section, by April 15 of the applicable year, as follows:

1) Upon receipt of the allocation request, the Agency will determine whether the request is consistent with the requirements of subsections (d) and (e) of this Section and will make any necessary adjustments to the request to

ensure that the control period and the number of allowances requested are consistent with those requirements of subsections (d) and (e) of this Section.

2) If the new source set-aside for the control period for which allowances are requested has a number of allowances greater than or equal to the total number requested by all "new" budget EGUs, the Agency will allocate the number of allowances requested to the "new" budget EGUs.

3) If the new source set-aside for the control period for which allowances are requested has a number of allowances less than the total number of allowances requested by all "new" budget EGUs, the Agency will allocate the available allowances to the "new" budget EGUs on a pro-rata basis, based on the number of allowances requested.

g) For "new" budget EGUs that commenced commercial operation on or after January 1, 1995, but prior to January 1, 2004, the Agency will notify the account representative of the number of allowances that have been allocated to the "new" budget EGU by March 30 of the applicable year. There will be no charge for allowances received under this subsection.

h) For "new" budget EGUs that commenced commercial operation on or after January 1, 2004, the Agency will notify by March 30 of the applicable year the account representative of the number of allowances that are eligible for purchase for the "new" budget EGU pursuant to the requirements of subsection (k) of this Section. If the Agency does not receive payment by April 15 of the applicable year, the account representative will forfeit his/her eligibility to purchase the allowances offered. The Agency will make available for purchase those forfeited allowances on a pro-rata basis to "new" budget EGUs that received allocations pursuant to subsection (f)(2) of this Section, up to the number of allowances requested by each account representative. Such additional allocations are subject to the purchase requirements of subsection (k) of this Section, to the extent applicable.

i) For "new" budget EGUs that have commenced commercial operation but have operated for 76 or fewer days of the control period in 2003, USEPA will deduct allowances to account for the actual utilization of the EGU during the 2004 control period consistent with the provisions of 40 CFR 96.42(e). Any allowances allocated by the Agency for such "new" budget EGUs that are not used for compliance during the 2004 control period shall be returned to the Agency's new source set-aside account.

j) For the years 2004, 2005, and 2006, any allowances that are not allocated pursuant to subsections (g), (h) and (i) of this Section will be allocated on a pro-rata basis to the budget EGUs listed in Appendix F of this Part. There will be no charge for allowances received under this subsection.

~~k) Fees for new source set-aside allowances:~~

~~1) "New" budget EGUs that commence commercial operation on or after January 1, 2004, that obtain allowances allocated from the new source set-aside shall pay for such allocations pursuant to Section 9.9 of the Act.~~

~~2) The price of allowances from the new source set-aside shall be:~~

~~A) The average price at which NO_x allowances are traded in the interstate NO_x Trading Program for the preceding control period; and~~

~~B) For 2004 only, the price shall be the average price at which NO_x allowances were traded in 2003 in the Ozone Transport Region.~~

~~3) The fees collected by the Agency from the sale of allowances will be distributed pro rata to budget EGUs receiving allowances pursuant to Section 217.764 of this Part on the basis of allocated allowances subject to Agency administrative costs assessed pursuant to Section 9.9 of the Act.~~

~~l) A "new" budget EGU will become an existing budget EGU and will receive allowances pursuant to the requirements of Section 217.764 of this Part, as follows:~~

~~1) For a budget EGU that commences commercial operation between and including January 1, 1995, and April 30, 2003, the budget EGU will be allocated allowances in 2004 for the 2007 control period and will become an existing budget EGU on May 1, 2007.~~

~~2) For a budget EGU that commences commercial operation after April 30, 2003, the budget EGU will become an existing budget EGU in the control period for which it receives an allocation pursuant to Section 217.764 of this Part. It will be considered a "new" budget EGU and will receive its allowances from the new source set-aside in the intervening years from start-up until it receives allocations pursuant to Section 217.764 of this Part.~~

~~BOARD NOTE: Because of litigation involving the NO_x SIP Call, Michigan v. EPA, No. 98-1497 2000 WL 180650 (D.C. Cir. March 3, 2000), the years defining the control periods may change. Should this occur, other dates in this Section will be considered to adjust as necessary.~~

(Source: Repealed at 48 Ill. Reg. _____, effective _____)

Section 217.770 Early Reduction Credits for Budget EGUs (Repealed)

~~If a budget EGU reduces its NO_x emission rate as required by the applicable provisions of subsection (c) of this Section in the 2001, 2002, or 2003 control period, for use in the 2004 control period, or later control periods authorized by USEPA, the account representative may request early reduction credits (ERCs) for such reductions, and the Agency will allocate ERCs to the budget EGU in accordance with the following:~~

~~a) Each budget EGU for which the account representative requests any ERCs under subsection (d) of this Section shall monitor NO_x emissions in accordance with 40 CFR 96, subpart H, as incorporated by reference in Section 217.104 of this Part, starting with the control period prior to the control period for which ERCs will first be requested and for each control period for which ERCs will be requested. For example, if ERCs are requested for reductions made in the 2001 control period, the budget EGU must have implemented the applicable monitoring for the 2000 control period. The unit's monitoring system availability shall be not less than 90% during the control period prior to the control period in which the NO_x emissions reduction is made and the unit must be in compliance with any applicable State or federal emissions or emissions-related requirements.~~

~~b) The NO_x emission rate and heat input under subsections (c) through (e) of this Section shall be determined in accordance with 40 CFR 96, subpart H.~~

~~c) Each budget EGU for which ERCs are requested under subsection (d) of this Section must have reduced its NO_x emission rate for each control period for which ERCs are requested, as follows:~~

~~1) For budget EGUs subject to the requirements of Title IV of the CAA and not included in a NO_x averaging plan pursuant to 40 CFR 72 and 76, as incorporated by reference in Section 217.104 of this Part, at least 30% less than the NO_x emission rate specified in the applicable Title IV permit or other applicable federally enforceable permit.~~

~~2) For budget EGUs subject to the requirements of Title IV of the CAA and included in a NO_x averaging plan pursuant to 40 CFR 72 and 76, at least 30% less than the annual emission rate required in the NO_x averaging plan in the applicable Title IV permit or other applicable federally enforceable permit.~~

~~3) For budget EGUs not subject to the requirements of Title IV of the CAA, at least 30% less than the actual NO_x emissions rate (lbs/mmbtu) for the 2000 control period.~~

~~d) The account representative of a budget EGU that meets the requirements of subsections (a) through (c) of this Section may submit to the Agency a request for ERCs for a EGU based on NO_x emission rate reductions made by the EGU in control periods 2001, 2002, and 2003, in accordance with subsection (c) of this Section.~~

1) The number of ERCs for any applicable control period shall be an amount equal to the unit's heat input for such control period multiplied by the difference between the EGU's NO_x emission rate (meeting the requirements of subsection (c) of this Section for the applicable control period) and the EGU's actual NO_x emission rate for the applicable control period, divided by 2000 lbs/ton, and rounded to the nearest ton.

2) Upon request of the account representative, the ERC allowance allocation for a particular EGU may be deposited in the source's general account rather than in the unit's compliance account.

3) The early reduction request must be submitted in a format specified by the Agency by:

A) November 1, 2001, for reductions made in the 2001 control period;

B) November 1, 2002, for reductions made in the 2002 control period; and

C) November 1, 2003, for reductions made in the 2003 control period.

e) In the event that the date for implementing the NO_x SIP Call, May 31, 2004, is delayed, the early reduction request must be submitted in accordance with any rulemaking or guidance by USEPA on the distribution of the Compliance Supplement Pool under the NO_x SIP Call (63 Fed. Reg. 57356).

f) The Agency will allocate ERCs to the budget EGUs meeting the requirements of subsections (a) through (c) of this Section and covered by ERC requests meeting the requirements of subsection (d) of this Section in accordance with the following procedures:

1) Upon receipt of each ERC request, the Agency will accept the request only if the requirements of subsections (a) through (d) of this Section are met and will make any necessary adjustment to the request to ensure that the amount of the ERCs requested meets the requirements of subsections (b) through (d) of this Section;

2) The Agency shall allocate at least 15,261 ERCs over three years, as follows:

A) If USEPA has approved this Subpart as a SIP revision, not more than one-half of the total ERC allowances for reductions made in the control period in 2001;

B) Not more than one-half of the total ERC allowances for reductions made in the control period in 2002; and

C) Any ERC allowances not allocated pursuant to subsection (f)(2)(A) or (B) of this Section, for reductions made in the control period in 2003.

3) If the number of ERC allowances requested for a reduction achieved in the control period in 2003 is less than or equal to the number of ERC allowances designated for that control period in subsection (f)(2)(A) of this Section, the Agency will allocate to each budget EGU one allowance for each accepted ERC request;

4) If the number of ERC allowances requested for a reduction achieved in the control period in 2003 is greater than the number of ERC allowances designated for that control period in subsection (f)(2)(A) of this Section, the Agency will allocate to each budget EGU allowances for accepted requests on a pro rata basis.

g) The Agency will notify the account representative submitting an ERC request for the subsequent control period of the number of ERC allowances that will be allocated to each budget EGU for that control period as follows:

1) By March 1, 2002, for ERCs requested for and earned in the 2001 control period;

2) By March 1, 2003, for ERCs requested for and earned in the 2002 control period; and

3) By March 1, 2004, for ERCs requested for and earned in the 2003 control period.

h) By May 1, 2004, the Agency will submit to USEPA the ERC allocations made by the Agency under this Section. USEPA will record such allocations to the extent that they are consistent with the requirements of this Section.

i) ERC allowances recorded under subsection (h) of this Section may be deducted for compliance under 40 CFR 96.54, as incorporated by reference in Section 217.104 of this Part, for the control period in 2004 or such additional control periods as may be specified by USEPA. Notwithstanding 40 CFR 96.55(a), USEPA will deduct as retired any ERC allowances that are not deducted for compliance in accordance with 40 CFR 96.54 for the control period in 2004.

j) ERC allowances are treated as banked allowances in 2004 for the purposes of 40 CFR 96.55(a) and (b).

(Source: Repealed at 48 Ill. Reg. _____, effective _____)

Section 217.774 Opt-In Units (Repealed)

~~a) Any operating fossil fuel-fired stationary boiler, combustion turbine, combined cycle system, cement kiln or stationary internal combustion engine in the State may qualify under this Subpart to become a budget opt-in unit if it:~~

~~1) Is not a budget EGU under Section 217.754 of this Part;~~

~~2) Vents all of its emissions to a stack;~~

~~3) Has documented heat input for more than 876 hours in the six months immediately preceding the submission of an application for an initial budget permit under subsection (d) of this Section;~~

~~4) Is not covered by a retired unit exemption under 40 CFR 96.5;~~

~~5) Is not covered by the low-emitter exemption under Section 217.754(c) of this Part; and~~

~~6) Is not located at a source listed in Appendix D of this Part.~~

~~b) Except as otherwise provided in this Part, a budget opt-in unit shall be treated as a budget EGU for purposes of applying this Subpart and 40 CFR 96.~~

~~c) Authorized account representative:~~

~~1) If an opt-in unit is located at the same source as one or more budget EGUs, it shall have the same account representative as those budget EGUs.~~

~~2) If the opt-in unit is not located at the same source as one or more budget EGUs, the owner or operator of the opt-in unit shall submit a complete account certificate of representation under 40 CFR 96.13.~~

~~d) To apply for a budget permit, the account representative of a unit meeting the qualifications of subsection (a) of this Section must, except as provided under Section 217.778(f) of this Part, submit to the Agency:~~

~~1) A budget permit application for the unit that:~~

~~A) Meets the requirements under Section 217.758 of this Part; and~~

~~B) Contains provisions for a change in the regulatory status of the unit to a budget opt-in unit under Section 217.754 of this Part pursuant to the provisions of Section 217.780(b) of this Part.~~

~~2) A monitoring plan for the unit in accordance with 40 CFR 96, subpart H.~~

(Source: Repealed at 48 Ill. Reg. _____, effective _____)

Section 217.776 Opt-In Process (Repealed)

~~The owner or operator of a unit meeting the qualifications of Section 217.774(a) of this Part may submit an application for a budget permit for a budget opt-in unit under Section 217.774(d) of this Part. The Agency will issue or deny a budget permit for such opt-in unit in accordance with Section 217.758 of this Part and the following:~~

~~a) The Agency will determine, on an interim basis, the sufficiency of the monitoring plan accompanying the initial application for a budget permit for an opt-in unit. A monitoring plan is sufficient, for purposes of interim review, if the plan contains information demonstrating that the NO_x emission rate and heat input of the unit are monitored and reported in accordance with 40 CFR 96, subpart H. A determination of sufficiency shall not be construed as acceptance or approval of that unit's monitoring plan.~~

~~b) If the Agency determines that the unit's monitoring plan is sufficient under subsection (a) of this Section and after completion of the monitoring system certification under 40 CFR 96, subpart H, the NO_x emission rate and the heat input of the unit shall be monitored and reported in accordance with 40 CFR 96, subpart H, for one full control period during which the monitoring system availability is not less than 90% and during which the unit is in full compliance with any applicable State or federal emissions or emissions-related requirements.~~

~~c) Based on the information monitored and reported under subsection (b) of this Section, the unit's baseline heat rate shall be calculated as the unit's total heat input (in mmbtu) for the control period and the unit's baseline NO_x emission rate shall be calculated as the unit's total NO_x emissions (in lbs) for the control period divided by the unit's baseline heat rate.~~

(Source: Repealed at 48 Ill. Reg. _____, effective _____)

Section 217.778 Budget Opt-In Units: Withdrawal from NOx Trading Program (Repealed)

~~a) Requesting withdrawal. To withdraw from the NO_x Trading Program, the account representative of a budget opt-in unit shall submit to the Agency a request to withdraw from the NO_x Trading Program and to withdraw the budget permit effective as of a specified date between (and not including) September 30 and May 1. The submission shall be made no later than 90 days prior to the requested effective date of withdrawal.~~

~~b) Conditions for withdrawal.~~

1) Before a budget opt-in unit may withdraw from the NO_x Trading Program and the budget permit may be withdrawn under this Section, the following conditions must be met:

A) For the control period immediately before the withdrawal is to be effective, the account representative must submit to the Agency an annual compliance certification report in accordance with 40 CFR 96.30.

B) If the budget opt-in unit has excess emissions for the control period immediately before the withdrawal is to be effective, USEPA has deducted from the budget opt-in unit's compliance account, or the overdraft account of the NO_x budget source where the budget opt-in unit is located, the number of allowances required in accordance with 40 CFR 96.54(d) for the control period.

2) After the requirements for withdrawal under subsection (b)(1) of this Section are met, USEPA will deduct from the opt-in unit's compliance account, or the overdraft account of the budget source where the budget opt-in unit is located, allowances equal in number to any allowances allocated to that unit under Section 217.782 of this Part for the same or earlier control period for which the withdrawal is to be effective. USEPA will close the budget opt-in unit's compliance account and will establish, and transfer any remaining allowances to, a new general account for the owners and operators of the opt-in unit. The account representative for the budget opt-in unit shall become the account representative for the general account.

c) A budget opt-in unit that withdraws from the NO_x Trading Program shall comply with all requirements under the NO_x Trading Program concerning all years for which such budget opt-in unit was a budget opt-in unit, even if such requirements arise or must be complied with after the withdrawal takes effect.

d) Notification.

1) After the requirements for withdrawal under subsections (a) and (b) of this Section are met (including deduction of the full amount of allowances required), the Agency will revise the budget permit indicating a specified effective date for the withdrawal that is after the requirements in subsections (a) and (b) of this Section have been met and that is prior to May 1 or after September 30.

2) If the requirements for withdrawal under subsections (a) and (b) of this Section are not met, the Agency will issue a notification to the owner or operator and the account representative of the budget opt-in unit that the

~~opt-in unit's request to withdraw its budget permit is denied. If the budget opt-in unit's request to withdraw is denied, the budget opt-in unit shall remain subject to the requirements for a budget opt-in unit.~~

~~e) Reapplication upon failure to meet conditions of withdrawal. If the Agency denies the budget opt-in unit's request to withdraw, the account representative of the budget opt-in unit may submit another request to withdraw in accordance with subsections (a) and (b) of this Section.~~

~~f) Ability to return to the NO_x Trading Program. Once an opt-in unit withdraws from the NO_x Trading Program and its budget permit is withdrawn under this Section, the account representative may not submit another application for a budget permit under Section 217.774(d) of this Part for the unit prior to the date that is four years after the date on which the budget permit with opt-in conditions is withdrawn.~~

(Source: Repealed at 48 Ill. Reg. _____, effective _____)

Section 217.780 Opt-In Units: Change in Regulatory Status (Repealed)

~~a) Notification. When an opt-in unit becomes a budget opt-in unit under Section 217.754(d) of this Part, the owner or operator shall notify the Agency and USEPA in writing of such change in the opt-in unit's regulatory status within 30 days after such change.~~

~~b) Any permit application that provides for a change in the regulatory status of a unit to a budget opt-in unit pursuant to Section 217.774(d)(1)(B) of this Part and is included in a budget permit is effective on the date on which such opt-in unit becomes a budget opt-in unit under Section 217.754 of this Part.~~

~~c) USEPA action.~~

~~1) USEPA will deduct from the compliance account for the budget opt-in unit under this Section, or the overdraft account of the budget source where the budget opt-in unit is located, allowances equal in number to and allocated for the same or a prior control period as:~~

~~A) Any allowances allocated to the budget unit (as an opt-in unit) under Section 217.782 of this Part for any control period after the last control period during which the unit's budget permit was effective; and~~

~~B) If the effective date of any budget permit under subsection (b) of this Section is during a control period, the allowances allocated to the budget opt-in unit (as an opt-in unit) under Section 217.782 of this Part for the control period multiplied by the ratio of the number of days in the control period, starting with the effective~~

~~date of the budget permit under subsection (b) of this Section, divided by the total number of days in the control period.~~

~~2) The account representative shall ensure that the compliance account of the budget opt-in unit under subsection (b) of this Section, or the overdraft account of the budget source where the budget opt-in unit is located, contains the allowances necessary for completion of the deduction under subsection (c)(1) of this Section. If the compliance account or overdraft account does not contain sufficient allowances, USEPA will deduct the required number of allowances, regardless of the control period for which they were allocated, whenever allowances are recorded in either account.~~

~~3) For every control period during which any budget permit under subsection (b) of this Section is effective, the budget opt-in unit under subsection (b) of this Section will be treated, solely for purposes of allowance allocations under Section 217.764 or 217.768 of this Part, as a unit that commenced operation on the effective date of the budget permit under subsection (b) of this Section and will be allocated allowances in accordance with Section 217.764 or 217.768 of this Part.~~

~~4) Notwithstanding subsection (c)(2) of this Section, if the effective date of any budget permit under subsection (b) of this Section is during a control period, the following number of allowances will be allocated to the budget opt-in unit under subsection (b) of this Section or under Section 217.764 or 217.768 of this Part for the control period: the number of allowances otherwise allocated to the budget opt-in unit under Section 217.764 or 217.768 of this Part for the control period multiplied by the ratio of the number of days in the control period, starting with the effective date of the budget permit under subsection (b) of this Section, divided by the total number of days in the control period.~~

~~d) When the owner or operator of an opt-in unit does not renew the budget permit for the budget opt-in unit issued pursuant to Section 217.774(d), USEPA will deduct from the budget opt-in unit's compliance account, or the overdraft account of the budget source where the budget opt-in unit is located, allowances equal in number to and allocated for the same or a prior control period as any allowances allocated to the budget opt-in unit under Section 217.782 of this Part for any control period after the last control period for which the budget permit is effective. The account representative shall ensure that the budget opt-in unit's compliance account or the overdraft account of the budget source where the budget opt-in unit is located contains the allowances necessary for completion of such deduction. If the compliance account or overdraft account does not contain sufficient allowances, USEPA will deduct the required number of allowances, regardless of the control period for which they were allocated, whenever allowances are recorded in either account.~~

~~e) After the deduction under subsection (d) of this Section is completed, USEPA will close the opt-in unit's compliance account. If any allowances remain in the compliance account after completion of such deduction and any deduction under 40 CFR 96.54, USEPA will close the opt-in unit's compliance account and will establish, and transfer any remaining allowances to, a new general account for the owner or operator of the opt-in unit. The account representative for the opt-in unit shall become the account representative for the general account.~~

(Source: Repealed at 48 Ill. Reg. _____, effective _____)

Section 217.782 Allowance Allocations to Budget Opt-In Units (Repealed)

~~a) Allowance allocations:~~

~~1) By the December 31 immediately before the first control period for which the budget permit is effective, the Agency will allocate allowances to the budget opt-in unit and submit to USEPA the allocation for the control period in accordance with subsection (b) of this Section.~~

~~2) By no later than the December 31 after the first control period for which the budget permit is in effect and the December 31 of each year thereafter, the Agency will allocate allowances to the budget opt-in unit and submit to USEPA allocations for the next control period, in accordance with subsection (b) of this Section.~~

~~b) For each control period for which the budget opt-in unit has a budget permit, the budget opt-in unit will be allocated allowances in accordance with the following procedures:~~

~~1) The heat input (in mmbtu) used for calculating allowance allocations will be the lesser of:~~

~~A) The opt-in unit's baseline heat input determined pursuant to Section 217.776(c) of this Part; or~~

~~B) The opt-in unit's heat input, for the control period in the year prior to the year of the control period for which the allocations are being calculated, as determined in accordance with 40 CFR 96, subpart H.~~

~~2) The Agency will allocate allowances to the budget opt-in unit in an amount equaling the heat input (in mmbtu) determined under subsection (b)(1) of this Section multiplied by the lesser of:~~

~~A) The unit's baseline NO_x emission rate (in lbs/mmbtu) determined pursuant to Section 217.776(c) of this Part; or~~

B) The lowest NO_x emissions limitation (calculated in lbs/mmbtu) under State or federal law that is applicable to the budget opt-in unit for the year of the control period for which the allocations are being calculated during the control period, regardless of the averaging period to which the emissions limitation applies.

SUBPART X: VOLUNTARY NO_x EMISSIONS REDUCTION PROGRAM

Section 217.800 Purpose (Repealed)

The purpose of this Subpart is to implement Section 9.9(d)(3) of the Act by providing a method by which additional NO_x allowances may be generated for use by emission units subject to the requirements of Subparts U or W of this Part. [415 ILCS 5/9.9(d)(3)]

(Source: Repealed at 48 Ill. Reg. _____, effective _____)

Section 217.805 Emission Unit Eligibility (Repealed)

Any owner or operator of a stationary source may submit a proposal, as provided in Section 217.835 of this Subpart, for voluntarily reducing NO_x emissions during the control period, if each emission unit from which NO_x reductions at the source will be obtained meets the following criteria:

a) Discharges through a stack;

b) Is fossil fuel-fired;

c) Is not subject to the requirements of Subparts T, U, V or W of this Part;

d) Is not a retired unit pursuant to 40 CFR 96.5;

e) Has not elected to become an opt-in unit pursuant to Section 217.754 or Section 217.774 of this Part; and

f) Is not a stationary internal combustion engine that emits more than one ton of NO_x per day during the ozone control period.

(Source: Repealed at 48 Ill. Reg. _____, effective _____)

Section 217.810 Participation Requirements (Repealed)

a) Any owner or operator of a source (emission reduction source) with one or more emission units meeting the requirements of Section 217.805 of this Subpart and seeking to make quantifiable, verifiable and federally enforceable voluntary

reductions of NO_x emissions during the control period from one or more emission units (emission reduction units) must comply with the following requirements:

1) Submit a NO_x emission reduction proposal that meets the requirements of Section 217.835 of this Subpart;

2) Request an emission cap on NO_x emissions from all NO_x emission units at the emission reduction source that are not otherwise subject to Subparts U or W of this Part, and that are the same type of emission unit as the emission reduction unit (e.g., if the emission reduction unit is a boiler, combined cycle system or turbine, then the emission cap must include all boilers, combined cycle systems or turbines that are not otherwise subject to Subparts U or W of this Part, or if the emission unit is a cement kiln, then the emission cap must include all cement kilns), provided, however, the owner or operator of the source may submit a demonstration in accordance with Section 217.835 of this Subpart that any like-kind emission unit or units should not be included in the NO_x emission cap;

3) Demonstrate how the NO_x emission cap required by subsection (a)(2) of this Section is to be determined, in accordance with Sections 217.820 and 217.845 of this Subpart, which cap reflects the NO_x emission reduction specified in the proposal;

4) Permit requirements:

A) Obtain a permit, or an amendment to an existing permit, for the source, with federally enforceable conditions containing the commitments in the NO_x emission reduction proposal and the emissions cap by the later of May 1, 2003, or the date on which the reduction in NO_x emissions will commence and operate the source in compliance with such permit; or

B) For each emission unit that will be generating voluntary NO_x emissions by ceasing operation, withdrawing the applicable permit, or requesting a revision to the permit to reflect the shutdown of the emission reduction unit, by the later of May 1, 2003, or the date specified in the NO_x reduction proposal.

5) Submit an emissions baseline determination for each unit subject to the NO_x emission cap in accordance with the requirements of Section 217.820 of this Subpart.

6) Monitoring requirements:

~~A) To the extent applicable, each emission reduction unit at the source shall comply with the monitoring requirements of Section 217.850 of this Subpart.~~

~~B) The emissions measurements recorded and reported in accordance with Sections 217.850 and 217.855 of this Subpart shall be used to determine compliance by the emission reduction unit with the emissions limitation set forth in the NO_x emission reduction proposal and the federally enforceable permit conditions required pursuant to subsection (a)(4) of this Section.~~

~~C) The emissions measurements recorded and reported in accordance with Sections 217.850 and 217.855 of this Subpart shall be used to determine compliance by the emission reduction source with the emissions cap set forth in the NO_x emission reduction proposal and the federally enforceable permit condition required pursuant to subsection (a)(4) of this Section.~~

~~b) The owner or operator of the emission reduction source is required to submit an annual certification to the Agency that the source has complied with the cap on NO_x emissions for the source and that the NO_x emission reductions specified in the approved proposal were made pursuant to the requirements of Section 217.850 of this Subpart.~~

(Source: Repealed at 48 Ill. Reg. _____, effective _____)

Section 217.815 NO_x Emission Reductions and the Subpart X NO_x Trading Budget (Repealed)

~~a) NO_x emission reductions may be recognized under this Subpart if they are quantifiable, verifiable, and federally enforceable, and meet one or more of the following criteria:~~

~~1) Due to the use of any NO_x emission reduction technology (e.g., combustion or post combustion control technology or fuel switching) at the emission reduction unit pursuant to federally enforceable conditions in the permit for the unit addressing such control technology or fuel switching, NO_x emissions from the emission reduction unit for any control period beginning in 2003 are or will be lower than such unit's emissions baseline. The amount of actual NO_x emission reductions shall be determined in accordance with Section 217.820 of this Subpart, and the amount of creditable NO_x emission reductions shall be determined in accordance with Section 217.825 of this Subpart;~~

2) The emission reduction unit is permanently shut down after January 1, 1995, and the owner or operator requests a revision to the relevant operating permit to reflect the shut down of the emission reduction unit. The amount of actual NO_x emission reductions shall be determined in accordance with Section 217.820 of this Subpart, and the amount of creditable NO_x emission reductions shall be determined in accordance with Section 217.825 of this Subpart;

3) During any control period beginning in 2003, the emission reduction unit's control period NO_x emission rate or hours of operation is reduced pursuant to federally enforceable conditions in a permit for such unit, resulting in an actual reduction in NO_x emissions from such unit's emissions baseline. The amount of actual NO_x emission reductions shall be determined in accordance with Section 217.820 of this Subpart, and the amount of creditable NO_x emission reductions shall be determined in accordance with Section 217.825 of this Subpart.

b) USEPA shall adjust the State's trading portion of the statewide NO_x budget, as established in the NO_x SIP Call, 63 Fed. Reg. 57356 (October 27, 1998), and create allowances for the creditable portion, as set forth in Section 217.825 of this Subpart, of verifiable, quantifiable, and federally enforceable NO_x emission reductions meeting the requirements of this Subpart (the Subpart X NO_x Trading Budget), and allowances from the Subpart X NO_x Trading Budget shall be allocated to recipient emission units in accordance with this Subpart.

c) The Agency shall submit an allocation to USEPA for the creditable portion of verifiable, quantifiable, and federally enforceable NO_x emission reductions meeting the requirements of this Subpart, which allocation may be used for the purposes of demonstrating compliance with the requirements of Subparts U and W of this Part.

d) If USEPA adjusts or fails to adjust the Subpart X NO_x Trading Budget as to any individual emission reduction unit, the Subpart X NO_x Trading Budget shall not be adjusted pro rata, and only the allowance allocation for that emission reduction unit will be adjusted.

(Source: Repealed at 48 Ill. Reg. _____, effective _____)

Section 217.820 Baseline Emissions Determination (Repealed)

a) An emission unit's emissions baseline shall be determined as follows:

1) By multiplying the unit's actual emissions during the 1995 calendar year, as reported in the annual emission report submitted in accordance with 35 Ill. Adm. Code 254, by 5/12ths; or

2) If the NO_x emissions from the unit were not included in the emission reduction source's 1995 annual emissions report submitted to the Agency pursuant to 35 Ill. Adm. Code 254, by determining the base case amount included for such unit in the NO_x SIP Call inventory, as specified in the "Technical Support Document for Illinois' Statewide NO_x Budget " (63 Fed. Reg. 17349 (Nov. 7, 1997)).

b) If the NO_x baseline emissions for the 1995 control period cannot be determined by the either of the methods listed in subsection (a)(1) or (2) of this Section, such actual NO_x baseline emissions shall be determined based on the average emission rate multiplied by the average number of hours of operation from two of the three control periods, as selected by the emission reduction source, prior to the year the emission reduction proposal is effective. The unit's emission rate and hours of operation will be determined based on the unit's reported NO_x emission rate and hours of operation in the most recent annual emission reports for such unit submitted in accordance with 35 Ill. Adm. Code 254.

(Source: Repealed at 48 Ill. Reg. _____, effective _____)

Section 217.825 Calculation of Creditable NO_x Emission Reductions (Repealed)

For actual NO_x emission reductions achieved pursuant to Section 217.815(a) of this Subpart, the gross amount of control period actual NO_x emission reductions shall be determined pursuant to Section 217.820 of this Subpart. Eighty percent of the actual NO_x emission reductions achieved pursuant to Section 217.815(a) shall be creditable. Twenty percent of the actual NO_x emission reductions shall be retired for the benefit of air quality.

(Source: Repealed at 48 Ill. Reg. _____, effective _____)

Section 217.830 Limitations on NO_x Emission Reductions (Repealed)

a) Each NO_x allowance issued for NO_x emission reductions meeting the requirements of this Subpart is a limited authorization to emit one ton of NO_x in accordance with the federal NO_x Trading Program as set forth in Subpart U or W of this Part, as applicable. No provision of the federal NO_x Trading Program, the emission reduction proposal, the permit application, the permit, or of law shall be construed to limit the authority of the United States or the State to terminate or limit such authorization.

~~b) Any NO_x allowance issued in accordance with this Subpart does not constitute a property right.~~

(Source: Repealed at 48 Ill. Reg. _____, effective _____)

Section 217.835 NO_X Emission Reduction Proposal (Repealed)

~~a) A NO_x emission reduction proposal shall include the following:~~

~~1) Information identifying each emission unit at the source that emits NO_x, whether the unit is subject to Subpart T, U, V ,W or X of this Part, and the baseline emissions for each emission unit subject to the NO_x emission cap as determined in accordance with Section 217.820 of this Subpart;~~

~~2) Information identifying each emission reduction unit from which the NO_x emission reductions have been or will be achieved;~~

~~3) An explanation of the method used to achieve the NO_x emission reductions;~~

~~4) The amount of the NO_x emission reductions, including supporting calculations and documentation, such as fuel usage information;~~

~~5) The emission units subject to the NO_x emission cap in accordance with Section 217.810(a) of this Subpart, and if all like-kind or same-type emission units are not proposed to be included within the NO_x emission cap, an explanation of how the owner or operator of the emission reduction source will ensure that production shifting will not occur, such that the emission reduction source will achieve real, verifiable, and quantifiable NO_x emission reductions;~~

~~6) The control period NO_x emission cap to be achieved by the emission reduction source, including both the baseline emissions for each recipient unit subject to the NO_x emission cap and the NO_x emission reductions from the emission reduction units included in the proposal;~~

~~7) The name and address of the owner or operator of each emission unit to which the NO_x allowances will be allocated, the Subpart of this Part (i.e, Subpart U or W) to which each unit is subject, including the name, telephone number, and account number of the account representative for each such unit; and~~

8) Certification by the owner or operator of each unit that is the subject of each proposed emission reduction proposal of his/her acceptance of the terms of the proposal and certification that the emission reductions specified in the proposal have been or will be achieved.

b) The owner or operator of a source submitting an emission reduction proposal must notify the Agency in writing within 30 days of any event or circumstance that makes the NO_x emission reduction proposal incorrect or incomplete.

c) The owner or operator of a source with an approved emission reduction proposal may request to withdraw its emission reduction proposal, and cease to create NO_x allowances under this Subpart, as follows:

1) Requesting withdrawal: To withdraw from participation under this Subpart, the owner or operator of an emission reduction unit shall submit to the Agency a written request to withdraw from participation and to withdraw or revise the applicable permit effective as of a specified date between (and not including) September 30 and May 1. The submission shall be made no later than 90 days prior to the requested effective date of withdrawal.

2) Conditions for withdrawal: Before an emission reduction source may withdraw its approved emission reduction proposal, and the federally enforceable permit may be withdrawn under this Section, the owner or operator must submit to the Agency an annual compliance certification report in accordance with Section 217.855 of this Subpart for the control period immediately before the withdrawal is to be effective.

3) An emission reduction source that withdraws from this Subpart shall comply with all requirements under its approved emission reduction proposal and federally enforceable permit conditions addressing such proposal concerning all years for which the emission reduction source was in the program, even if such requirements arise or must be complied with after the withdrawal takes effect.

4) Notification:

A) After the requirements for withdrawal under subsections (a) and (b) of this Section are met, the Agency will revise the permit indicating a specified effective date for the withdrawal that is after the requirements in subsections (a) and (b) of this Section have been met and that is prior to May 1 or after September 30.

B) If the requirements for withdrawal under subsections (a) and (b) of this Section are not met, the Agency will issue a notification to the owner or operator of the emission reduction source that the request

~~to withdraw its permit is denied. If the request to withdraw is denied, the source shall remain subject to the requirements of its approved emission reduction proposal and federally enforceable permit conditions addressing the proposal and the requirements of this Subpart.~~

~~5) Reapplication upon failure to meet conditions of withdrawal: If the Agency denies the request of the owner or operator of the emission reduction source's request to withdraw, the owner or operator of the source may submit another request to withdraw in accordance with subsections (a) and (b) of this Section.~~

~~6) Upon successful withdrawal from the program, the emission reduction source shall no longer be subject to the provisions of this Subpart.~~

(Source: Repealed at 48 Ill. Reg. _____, effective _____)

Section 217.840 Agency Action (Repealed)

~~a) The Agency shall notify the owner or operator submitting a NO_x emission reduction proposal in writing of its decision with respect to the proposal within 90 days after receipt of such proposal and, if applicable, of NO_x emissions data to verify that the specified reductions have occurred. The owner or operator of the emission reduction source may extend the deadline for Agency action in writing. If the Agency disapproves or conditionally approves a proposal, this written notice shall include a statement of the specific reasons for the disapproval or conditional approval of the proposal. The following shall be considered a final Agency action for the purposes of appeal: if the Agency fails to take action within such 90 day period, subject to any extension, or if the Agency disapproves a proposal. If the Agency conditionally approves a proposal, the owner or operator of the emission reduction source has 30 days to submit a modified proposal addressing the specific items listed by the Agency. If the owner and operator of the emission reduction source does not submit a modified emission reduction proposal within such 30 day period, the conditional approval shall be deemed to be a disapproval, and shall be deemed to be a final action for purposes of appeal.~~

~~b) The NO_x emissions reduction proposal will not be effective until:~~

~~1) After the owner or operator of the emission reduction source has obtained or modified a permit with federally enforceable conditions addressing the requirements of this Subpart; or~~

~~2) If NO_x emission reductions are being obtained by the shut down of an emission reduction unit, the owner or operator of the emission reduction unit has either:~~

~~A) Obtained or modified a permit with federally enforceable conditions addressing the requirements of this Subpart; or~~

~~B) Withdrawn the applicable permit and the Agency has:~~

~~i) Provided USEPA with a copy of the proposal and notice of the Agency's proposed approval of the emission reduction proposal, and USEPA has not disapproved such proposal;~~

~~ii) Published notice and offered an opportunity to comment, pursuant to 35 Ill. Adm. Code 252, on such permit withdrawal, its proposed approval of the emission reduction proposal for the shut down of the emission reduction unit and the creditable NO_x emission reductions that will be created by the shut down.~~

~~c) If the Agency approves the proposal, and subject to the provisions of subsection (b) of this Section, the Agency shall submit an allocation to USEPA for the creditable reductions created pursuant to the requirements of this Subpart subject to the following:~~

~~1) Any allowances generated pursuant to this Subpart shall be issued to the recipient emission unit identified in the proposal, for each control period in which the NO_x emissions reductions are verified, and the requirements of this Subpart continue to be met;~~

~~2) The owner or operator of the emission reduction source has, by the November 1 following the control period that the emission reduction unit has reduced NO_x emissions, verified the NO_x emission reductions in accordance with Section 217.845 of this Subpart, and obtained a permit containing federally enforceable conditions addressing the requirements of this Subpart;~~

~~3) The allowances shall be issued by May 1 after the control period in which the reduction has occurred, for use in any future control period.~~

(Source: Repealed at 48 Ill. Reg. _____, effective _____)

Section 217.845 Emissions Determination Methods (Repealed)

~~The owner or operator of an emission reduction source must demonstrate that it has obtained the NO_x emission reductions, and has not exceeded its NO_x emission cap, as specified in its approved NO_x emission reduction proposal, as follows:~~

a) If the NO_x emission reductions are generated pursuant to Section 217.815(a)(1) of this Subpart, the NO_x emission rate for each emission reduction unit shall be determined as follows:

1) Through the use of continuous emissions monitoring in accordance with Section 217.850 of this Subpart; or

2) Through the use of any test methods and procedures provided in 40 CFR 60 and approved by the Agency, or any other method approved by the Agency when included as federally enforceable conditions in a permit issued or revised pursuant to this Subpart.

b) If the NO_x emission reductions are generated pursuant to Section 217.815(a)(3) of this Subpart, submit an initial compliance demonstration plan to the Agency 120 days prior to the control period date that the emission reduction unit will commence NO_x emission reductions in compliance with an approved emissions reduction proposal. Such demonstration shall be based on the actual NO_x emission rate measured in accordance with Section 217.850 of this Subpart.

c) If the emission reduction unit's compliance with the NO_x emission reduction proposal is determined in accordance with subsection (a)(2) of this Section, conducting an initial test 90 days prior to the date the specified emission reductions will be obtained, or within 45 days of the Agency's request for NO_x emission reductions already obtained, and notifying the Agency in writing of any test performed to comply with the requirements of this Subpart at least 30 days prior to the test. The Agency may at any time require annual control period testing of any emission unit at the NO_x emission reduction source, and may require such testing as part of its approval of a NO_x emission reduction proposal.

d) By the November 1 following each control period in which NO_x emission reductions are generated, the owner or operator of an emission reduction source must:

1) Submit a compliance certification, including supporting data, that the NO_x emission cap, as specified in its approved NO_x emission reduction proposal, has not been exceeded; and

2) Monitor and report the NO_x emissions during each control period from all NO_x emission units at the source subject to the NO_x emission cap in accordance with Sections 217.850 and 217.855 of this Subpart.

e) The owner or operator of an emission reduction source shall, 120 days prior to the date that the emission reduction source will commence NO_x emission reductions

~~in compliance with an approved emissions reduction proposal, submit to the Agency a performance evaluation for each CEMS using the applicable performance specifications in 40 CFR 60, Appendix B, as incorporated by reference in Section 217.104 of this Part.~~

(Source: Repealed at 48 Ill. Reg. _____, effective _____)

Section 217.850 Emissions Monitoring (Repealed)

~~a) The owner or operator of an emission reduction source shall install, calibrate, maintain, and operate during the control period on each NO_x emission unit at the source subject to the NO_x emission cap a continuous emission monitoring system (CEMS), or an alternative approved by the Agency and included in a federally enforceable permit condition, for measuring NO_x emissions to the atmosphere.~~

~~b) The CEMS shall be operated and data recorded during all periods of operation of the emission unit at the source during the control period, except for periods of CEMS breakdowns and repairs as provided in subsection (e) of this Section.~~

~~c) CEMS quality assurance data must be recorded during calibration checks and zero and span adjustments.~~

~~d) The 1-hour average NO_x emissions measured by the CEMS shall be:~~

~~1) Expressed in lbs/hr or in lbs/mmbtu and heat input;~~

~~2) Calculated using the data points required under 40 CFR 60.13, as incorporated by reference in Section 217.104 of this Subpart; and~~

~~3) Calculated using at least two data points separated by a minimum of 15 minutes (where the unit operates for more than one quarter of an hour) if data are unavailable as a result of the performance of calibration, quality assurance, or preventive maintenance activities.~~

~~e) The procedures under 40 CFR 60.13, as incorporated by reference in Section 217.104 of this Subpart, shall be followed for installation, evaluation, and operation of each CEMS.~~

~~f) For monitoring systems measuring NO_x in lbs/hr, if NO_x emission data are not obtained because of CEMS breakdown, repairs, calibration checks, or zero and span adjustments, NO_x emission data shall be obtained by using the data substitution procedures contained in 40 CFR 75, subpart D, incorporated by reference in Section 217.104 of this Part.~~

g) For monitoring systems measuring NO_x in lbs/mmbtu, if NO_x emission data are not obtained because of CEMS breakdown, repairs, calibration checks, or zero and span adjustments, NO_x emission data shall be obtained by using the rolling hourly average of emission data recorded for the previous 30 day period of operation if the data capture for such period is 95% or greater and the period of missing data is equal to or less than 24 consecutive hours. If the data capture for such previous 30 day period is less than 95% or the period of missing data is greater than 24 consecutive hours, the data shall be obtained by using the highest hourly average recorded during the previous 30 days of operation.

h) The CEMS shall be subject to the quality assurance procedures and requirements of 40 CFR 60, Appendix F, incorporated by reference in Section 217.104 of this Part.

(Source: Repealed at 48 Ill. Reg. _____, effective _____)

Section 217.855 Reporting (Repealed)

a) By the November 1 of each year beginning in 2003, or the year of the first control period for which NO_x emission reductions were generated in accordance with this Subpart, an owner or operator of an emission reduction source must, as a seasonal component of the annual emission report for the source pursuant to 35 Ill. Adm. Code 254, report to the Agency the total control period NO_x emissions of each NO_x emission unit at the source subject to the NO_x emission cap.

b) Within 30 days after receipt of such data or evaluation, the owner or operator of each emission reduction source shall submit to the Agency the performance test data from the initial performance test for each emission reduction unit and the performance evaluation for each CEMS using the applicable performance specifications in 40 CFR 60, Appendix B, as incorporated by reference in Section 217.104 of this Part.

(Source: Repealed at 48 Ill. Reg. _____, effective _____)

Section 217.860 Recordkeeping (Repealed)

a) The owner or operator of an emission reduction source shall keep and maintain the following records for each NO_x emission unit at the source subject to the NO_x emission cap:

1) Daily, monthly, and control period operating hours;

2) Type and quantity of each fuel used daily during the control period;

3) Control period capacity factor of individual fuels fired and all fuels fired;

4) Monitoring records; and

5) To the extent applicable, the performance test data from the initial performance test for each emission reduction unit and the performance evaluation for each CEMS using the applicable performance specifications in 40 CFR 60, Appendix B, as incorporated by reference in Section 217.104 of this Part.

b) The owner or operator of an emission reduction source shall maintain records of the following information for each operating day for each NO_x emission unit subject to the NO_x emission cap:

1) Calendar date;

2) The average hourly NO_x mass emission rate expressed as lbs/hr;

3) The control period total NO_x mass emissions to date;

4) Identification of times when emission data have been excluded from the calculation of NO_x mass emissions, the reasons for excluding the data, and any corrective actions taken;

5) Identification of the times when the pollutant concentration exceeded full span of the CEMS;

6) Description of any modifications to the CEMS that could affect the ability of the CEMS to comply with the Performance Specifications in 40 CFR 60, Appendix B; and

7) Results of daily CEMS drift tests and quarterly accuracy assessments as required under 40 CFR 60, Appendix F.

c) The owner or operator of any NO_x emission reduction source subject to the continuous monitoring requirements for NO_x under this Subpart, shall submit a compliance certification containing the information recorded under subsection (b) of this Section. All compliance certification reports shall be postmarked by November 1 or the next business day if November 1 falls on a Saturday or Sunday, of each control period in which NO_x emission reductions are generated.

d) Maintenance of records: Unless otherwise provided, the owner or operator of a NO_x emission reduction source shall keep on site at the source, each of the following documents for a period of 5 years from the date the document is created. This period may be extended for cause, at any time prior to the end of 5 years, in writing by the Agency.

~~1) The emission reduction proposal and all documents that demonstrate the accuracy of the statements in the proposal for each year the emission reduction source generates NO_x reductions under this Subpart and for 5 years thereafter.~~

~~2) All emissions monitoring information required pursuant to this Subpart; provided that to the extent that 40 CFR 60 provides for a 3-year period for recordkeeping, the 3-year period shall apply.~~

~~3) Copies of all reports, compliance certifications, and other submissions and all records made or required under this Subpart.~~

~~4) Copies of all documents used to complete any permit application and supporting documents and any other submission to demonstrate compliance with the requirements of this Subpart.~~

(Source: Repealed at 48 Ill. Reg. _____, effective _____)

Section 217.865 Enforcement (Repealed)

~~a) Excess emissions requirements. The owner or operator of an emission reduction source for which NO_x reductions have been recognized pursuant to this Section and that has excess NO_x emissions in any control period for which NO_x allowances have been issued must:~~

~~1) For the first control period during which the emission reduction source has excess NO_x emissions, purchase NO_x allowances in an amount equal to 2 times the excess NO_x emissions in accordance with the federal NO_x Trading Program and surrender the allowances to the Agency by December 31 following the control period in which the emission reduction source had excess emissions;~~

~~2) For the second control period during which the emission reduction source has excess NO_x emissions, purchase allowances in an amount equal to 3 times the excess NO_x emissions in accordance with the federal NO_x Trading Program and surrender the allowances to the Agency by December 31 following the control period in which the emission reduction source had excess emissions;~~

~~3) If the emission reduction source has excess NO_x emissions for 3 control periods, purchase allowances in an amount equal to 4 times the excess NO_x emissions pursuant to the federal NO_x Trading Program and surrender the allowances to the Agency by December 31 following the control period in which the emission reduction source had excess~~

~~emissions, and the NO_x emission reduction proposal shall be automatically revoked. The emission reduction source will thereafter not be able to generate NO_x emission reductions for which NO_x allowances may be issued under this Subpart.~~

~~b) All allowances surrendered to the Agency pursuant to subsections (a)(1) through (a)(3) of this Section shall be retired to benefit air quality.~~

~~c) Nothing in this Subpart limits the authority of the State or the federal government to seek penalties and injunctive relief for any violation of this Subpart or any permit condition. Nothing in this Subpart limits the right of the State or the federal government or any person to directly enforce against actions or omissions which constitute violations of permits required by the Act or regulations promulgated thereunder or the CAA or applicable federal environmental laws and regulations.~~

Section 217.APPENDIX C Compliance Dates

Every owner or operator of a new emission source was required to comply with ~~the standards and limitations of~~ this Part by April 14, 1972.

Except as otherwise provided in the next paragraph, every owner or operator of an existing emission source was required to comply with ~~the standards and limitations of~~ this Part by December 31, 1973.

Every owner or operator of an existing coal fired fuel combustion emission source was required to comply with the applicable standards and limitations of this Part by May 30, 1975.

SUBPART A: GENERAL PROVISIONS

Section 218.100 Introduction

a) This Part contains standards and limitations for emissions of organic material and volatile organic material from stationary sources located in the Chicago area~~,~~ ~~which is~~ comprised of Cook, DuPage, Kane, Lake, McHenry, and Will Counties; ~~and~~ Aux Sable Township and Goose Lake Township in Grundy County; and Oswego Township in Kendall County.

b) Sources subject to this Part may be subject to ~~the following~~:

1) Permits required under 35 Ill. Adm. Code 201 and

2) Air quality standards under 35 Ill. Adm. Code 243.

c) This Part is divided into Subparts ~~which are~~ grouped as follows:

1) Subpart A: General Provisions;

2) Subparts B-F: Emissions from equipment and operations in common to more than one industry;

3) Subpart G: Emissions from use of organic material;

4) Subparts H-RR: Rules for various industry groups~~.~~;

5) Subpart TT: Rules for emission units not otherwise addressed~~.~~; and

6) Subpart UU: Recordkeeping and reporting for equipment and operations addressed by Subparts PP, QQ, RR, and TT.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 218.101 Savings Clause

a) Every owner or operator of an emission unit formerly subject to 35 Ill. Adm. Code 215 ~~shall~~ must have complied with its standards and limitations by the dates and schedules applicable to the emission unit in ~~accordance~~ compliance with 35 Ill. Adm. Code 215 or upon initial start-up. ~~All~~ No compliance dates or schedules

~~found in~~under 35 Ill. Adm. Code 215 are ~~not~~ superseded by this Part and remain in full force and effect.

b) Nothing in this Part ~~shall affect~~affects the responsibility of any owner or operator that is now or has been subject to the FIP to comply with its requirements ~~thereunder~~ by the dates specified in the FIP.

c) ~~Nothing in~~As this Part ~~as it~~ is amended, ~~from time to time shall~~nothing must relieve the owner or operator of a source subject to ~~the requirements of~~ this Part from the obligation to comply with the applicable requirements and compliance dates ~~set forth~~ in Section 218.106 ~~of this Subpart~~ or any specific schedules ~~contained within~~under the applicable Subparts of this Part, even though those compliance dates may have been expressly superseded by subsequent amendments.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 218.102 Abbreviations and Conversion Factors

The abbreviations and conversion factors ~~of~~ at 35 Ill. Adm. Code ~~211~~ 211.102 apply to this Part.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 218.103 Applicability

~~The provisions of this~~This Part ~~shall~~ must apply to all sources located in the Chicago area~~, which is composed~~ comprised of Cook, DuPage, Kane, Lake, McHenry, and Will Counties~~, and~~; Aux Sable Township and Goose Lake Township in Grundy County; and Oswego Township in Kendall County.

a) ~~The provisions of this~~This Part ~~shall~~ must become effective on July 1, 1991, with the following exceptions:

1) ~~The provisions of this~~This Part ~~shall~~ must become effective on September 1, 1991, for each appellant, including the constituents represented by appellants who are associations, who has appealed the federal implementation plan (FIP) for the Chicago area (Illinois Regulatory Group v. USEPA, No. 90-2778 (and consolidated cases) (7th Cir.)).

2) The effectiveness of any provision of this Part applicable to any individual source or category of sources which has appealed the FIP ~~shall~~ must be stayed to the extent that ~~such~~ the individual source or category of sources received a stay of the effectiveness of the FIP, pending reconsideration, from the USEPA or from the court in the FIP appeal cited in subsection (a)(1) ~~218.103(a)(1) above~~. When USEPA has published in the Federal Register final action to revise or affirm the provisions of the FIP

specifically applicable to ~~such~~ the individual source or category of sources or ~~such~~ the stay is otherwise terminated, the Board ~~shall~~ must take corresponding action, and the Agency shall submit ~~such~~ that action to USEPA for approval. Until ~~such time as~~ USEPA approves the corresponding amendment to this Part, the FIP rule ~~shall~~ must remain the applicable implementation plan for that source or category of sources under the Clean Air Act.

3) ~~The provisions of this~~This Part ~~shall~~ must become effective on November 15, 1992, for all sources located in Aux Sable Township or Goose Lake Township in Grundy County or in Oswego Township in Kendall County.

b) ~~The provisions of the~~This Part ~~shall~~ must not apply to Viskase Corporation; Allsteel, Incorporated; Stepan Company; or Ford Motor Company to the extent ~~such~~ that the source has obtained an adjusted standard from the Board or an exclusion from the General Assembly for any Subpart of this Part or ~~of~~ 35 Ill. Adm. Code 215.

(~~Board Note~~BOARD NOTE: ~~Subsection~~ Section 218.103(b) ~~of this Section shall~~must be effective at the federal level only ~~upon approval by~~when USEPA approves it.)

(Source: Amended at 48 Ill. Reg._____, effective _____)

SUBPART A: GENERAL PROVISIONS

Section 218.104 Definitions

The definitions of 35 Ill. Adm. Code 211 apply to this Part.

(Source: Amended at 17 Ill. Reg. 16636, effective September 27, 1993)

Section 218.105 Test Methods and Procedures

a) Coatings, Inks, and Fountain Solutions
The following test methods and procedures ~~shall~~ must be used to determine compliance of as applied coatings, inks, and fountain solutions with the limitations ~~set forth~~ in this Part.

1) Sampling: Samples collected for analyses ~~shall~~ must be one-liter taken into a one-liter container at a location and time such that the sample will be representative of the coating as applied (i.e., the sample ~~shall~~ must include any dilution solvent or other VOM added during the manufacturing process). The container must be tightly sealed immediately after the sample is taken. Any solvent or other VOM added after the sample is taken must be measured and accounted for in the calculations in subsection (a)(3) ~~of this Section~~. For multiple package coatings, separate

samples of each component ~~shall~~ must be obtained. A mixed sample ~~shall~~ must not be obtained as it will cure in the container. Sampling procedures ~~shall~~ must follow the guidelines ~~presented~~ in:

A) ASTM D 3925-81 (1985), ~~standard practice for sampling liquid paints and related pigment coating. This practice is~~"Standard Practice for Sampling Liquid Paints and Related Pigment Coating", incorporated by reference in Section 218.112 ~~of this Part~~.

B) ASTM E 300-86, ~~standard practice for sampling industrial chemicals. This practice is~~"Standard Practice for Sampling Industrial Chemicals", incorporated by reference in Section 218.112 ~~of this Part~~.

2) Analyses: The applicable analytical methods ~~specified below shall~~in this subsection (a)(2) must be used to determine the composition of coatings, inks, or fountain solutions as applied.

A) Method 24 of 40 CFR 60, appendix A, incorporated by reference in Section 218.112 ~~of this Part~~, must be used to determine the VOM content and density of coatings. If it is demonstrated to the satisfaction of the Agency and the USEPA that plant coating formulation data are equivalent to Method 24 results, formulation data may be used. In the event of any inconsistency between a Method 24 test and a facility's formulation data, the Method 24 test will govern.

B) Method 24A of 40 CFR 60, appendix A, incorporated by reference in Section 218.112 ~~of this Part~~, must be used to determine the VOM content and density of rotogravure printing inks and related coatings. If it is demonstrated to the satisfaction of the Agency and USEPA that the plant coating formulation data are equivalent to Method 24A results, formulation data may be used. In the event of any inconsistency between a Method 24A test and formulation data, the Method 24A test will govern.

C) The following ASTM methods are the analytical procedures for determining VOM:

i) ASTM D 1475-85, ~~: Standard test method for density of paint, varnish, lacquer and related products. This test method is~~"Standard Test Method for Density of Paint Varnish, Lacquer, and Related Products", incorporated by reference in Section 218.112 ~~of this Part~~.

ii) ASTM D 2369-87, "Standard Test Method for Volatile

Content of a Coating",~~: Standard test method for volatile content of a coating. This test method is~~ incorporated by reference in Section 218.112~~ of this Part~~.

iii) ASTM D 3792-86, "Standard Test Method for Water Content of Water Reducible Paints by Direct Injection into a Gas Chromatograph",~~: Standard test method for water content of water-reducible paints by direct injection into a gas chromatograph. This test method is~~ incorporated by reference in Section 218.112~~ of this Part~~.

iv) ASTM D 4017-81 (1987), "Standard Test Method for Water Content in Paints and Paint Materials by the Karl Fischer Method",~~: Standard test method for water content in paints and paint materials by the Karl Fischer method. This test method is~~ incorporated by reference in Section 218.112~~ of this Part~~.

v) ASTM D 4457-85, "Standard Test Method for Determination of Dichloromethane and 1,1,1, Trichloroethane in Paints and Coatings by Direct Injection into a Gas Chromatograph", incorporated by reference in Section 218.112~~: Standard test method for determination of dichloromethane and 1,1,1, trichloroethane in paints and coatings by direct injection into a gas chromatograph~~. (The procedure ~~delineated above~~ can be used to develop protocols for any compounds specifically exempted from the definition of VOM.) ~~This test method is incorporated by reference in Section 218.112 of this Part.~~

vi) ASTM D 2697-86, "Standard Test Method for Volume Nonvolatile Matter in Clear or Pigmented Coatings",~~: Standard test method for volume non-volatile matter in clear or pigmented coatings. This test method is~~ incorporated by reference in Section 218.112~~ of this Part~~.

vii) ASTM D 3980-87, "Standrd Practice for Interlaboratory Testing of Paint and Related Materials",~~: Standard practice for interlaboratory testing of paint and related materials. This practice is~~ incorporated by reference in Section 218.112~~ of this Part~~.

viii) ASTM E 180-85, "Standard Practice for Determining the Precision Data of ASTM Methods for Analysis of and Testing of Industrial Chemicals", ~~: Standard practice for determining the precision data of ASTM methods for~~

~~analysis of and testing of industrial chemicals. This practice is~~ incorporated by reference in Section 218.112 ~~of this Part~~.

ix) ASTM D 2372-85, "Standard Method of Separation of Vehicle from Solvent-Reducible Paints", ~~: Standard method of separation of vehicle from solvent-reducible paints. This method is~~ incorporated by reference in Section 218.112 ~~of this Part~~.

D) Use of an adaptation to any of the analytical methods ~~specified~~ in subsections (a)(2)(A), (B), and (C) ~~of this Section~~ may not be used unless approved by the Agency and USEPA. An owner or operator must submit sufficient documentation for the Agency and USEPA to find that the analytical methods ~~specified~~ in subsections (a)(2)(A), (B), and (C) ~~of this Section~~ will yield inaccurate results and that the proposed adaptation is appropriate.

3) Calculations: Calculations for determining the VOM content, water content, and ~~the~~ content of any compounds ~~which are~~ specifically exempted from the definition of VOM of coatings, inks, and fountain solutions as applied ~~shall~~ must follow the guidance ~~provided~~ in the following documents:

A) "A ~~Guide~~ Guideline for Surface Coating Calculation", July 1986, EPA-340/1-86-016, incorporated by reference in Section 218.112 ~~of this Part~~.

B) "Procedures for Certifying Quantity of Volatile Organic Compounds Emitted by Paint, Ink and Other Coatings" (revised June 1986), EPA-450/3-84-019, incorporated by reference in Section 218.112 ~~of this Part~~.

C) "A Guide for Graphic Arts Calculations", August 1988, EPA-340/1-88-003, incorporated by reference in Section 218.112 ~~of this Part~~.

b) Automobile or Light-Duty Truck Test Protocol

1) The protocol for testing, including determining the transfer efficiency of coating applicators, at primer surfacer operations and topcoat operations at an automobile or light-duty truck assembly source ~~shall~~ must follow the procedures in the following:

A) ~~Prior to~~Before May 1, 2012: "Protocol for Determining the Daily Volatile Organic Compound Emission Rate of Automobile and

Light-Duty Truck Topcoat Operations" ("topcoat protocol"), December 1988, EPA-450/3-88-018, incorporated by reference in Section 218.112 ~~of this Part~~.

B) On and after May 1, 2012: "Protocol for Determining the Daily Volatile Organic Compound Emission Rate of Automobile and Light-Duty Truck Primer-Surfacer and Topcoat Operations" ("topcoat protocol"), September 2008, EPA-453/R-08-002, incorporated by reference in Section 218.112 ~~of this Part~~.

2) ~~Prior to~~Before testing ~~pursuant to~~under the applicable topcoat protocol, the owner or operator of a coating operation subject to the topcoat or primer surfacer limit in Section 218.204(a)(1)(B), (a)(1)(C), (a)(2)(B), (a)(2)(C), or (a)(2)(E) ~~shall~~ must submit a detailed testing proposal specifying the method by which testing will be conducted and how compliance will be demonstrated consistent with the applicable topcoat protocol. The proposal ~~shall~~ must include:~~, at a minimum,~~

A) a comprehensive plan (including a rationale) for determining the transfer efficiency at each booth through ~~the use of~~ in-plant or pilot testing~~,~~;

B) the selection of coatings to be tested (for the purpose of determining transfer efficiency), including the rationale for coating groupings~~,~~;

C) the method for determining the analytic VOM content of as applied coatings and the formulation solvent content of as applied coatings~~,~~; and

D) a description of the records of coating VOM content as applied and coating's usage that will be kept to demonstrate compliance.

3) ~~Upon approval of the proposal by~~When the Agency and USEPA approve the proposal, the compliance demonstration for a coating line may proceed.

c) Capture System Efficiency Test Protocols

1) Applicability
~~The requirements of subsection~~Subsection (c)(2) ~~of this Section shall~~must apply to all VOM emitting process emission units employing capture equipment (e.g., hoods, ducts), except those ~~cases noted~~ in this subsection (c)(1).

A) If an emission unit is equipped with ~~(~~or uses~~)~~ a permanent total

enclosure (PTE) that meets Agency and USEPA specifications, and which directs all VOM to a control device, then the emission unit is exempted from the requirements ~~described~~ in subsection (c)(2)~~ of this Section~~. The Agency and USEPA specifications to determine whether a structure is considered a PTE are ~~given~~ in Method 204 of appendix M of 40 CFR 51, incorporated by reference in Section 218.112~~ of this Part~~. In this instance, the capture efficiency is assumed to be 100 percent, and the emission unit is still required to measure control efficiency using appropriate test methods ~~as specified~~ in subsection (d)~~ of this Section~~.

B) If an emission unit is equipped with ~~(~~or uses~~)~~ a control device designed to collect and recover VOM (e.g., carbon adsorber), an explicit measurement of capture efficiency is not necessary ~~provided that~~if the conditions ~~given below~~in this subsection (c)(1)(B) are met. The overall control of the system can be determined by directly comparing the input liquid VOM to the recovered liquid VOM. The general procedure for use in this situation is ~~given~~ in 40 CFR 60.433, incorporated by reference in Section 218.112~~ of this Part~~, with the following additional restrictions:

i) Unless otherwise specified in subsection (c)(1)(B)(ii), the owner or operator ~~shall~~ must obtain data each operating day for the solvent usage and solvent recovery to permit ~~the determination of~~determining the solvent recovery efficiency of the system each operating day using a 7-day rolling period. The recovery efficiency for each operating day is computed as the ratio of the total recovered solvent for that day and the most recent prior 6 operating days to the total solvent usage for the same 7-day period used for the recovered solvent, rather than a 30-day weighted average ~~as given in~~under 40 CFR 60.433, incorporated by reference at Section 218.112~~ of this Part~~. This ratio ~~shall~~ must be expressed as a percentage. The ratio ~~shall~~ must be computed within 72 hours ~~following~~ after each 7-day period. A source that believes that the 7-day rolling period is not appropriate may use an ~~alterative~~ alternative multi-day rolling period not to exceed 30 days, with the approval of the Agency and USEPA. In addition, the criteria in subsection (c)(1)(B)(iii) or subsection (c)(1)(B)(iv) must be met.

ii) The owner or operator of the source engaged in printing located at 350 E. ~~22nd~~ 22nd Street, Chicago, Illinois, ~~shall~~ must obtain data each operating day for the solvent usage

and solvent recovery to permit ~~the determination of~~determining the solvent recovery efficiency of the system each operating day using a 14-day rolling period. The recovery efficiency for each operating day is computed as the ratio of the total recovered solvent for that day and the most recent prior 13 operating days to the total solvent usage for the same 14-day period used for the recovered solvent, rather than a 30-day weighted average ~~as given in~~under 40 CFR 60.433, incorporated by reference in Section 218.112~~ of this Part~~. This ratio ~~shall~~ must be expressed as a percentage. The ratio ~~shall~~ must be computed within 17 days ~~following~~ after each 14-day period. In addition, the criteria in subsection (c)(1)(B)(iii) or subsection (c)(1)(B)(iv) must be met.

iii) The solvent recovery system (i.e., capture and control system) must be dedicated to a single coating line, printing line, or other discrete activity that by itself is subject to an applicable VOM emission standard, or

iv) If the solvent recovery system controls more than one coating line, printing line, or other discrete activity that by itself is subject to an applicable VOM emission standard, the overall control (i.e., the total recovered VOM divided by the sum of liquid VOM input from all lines and other activities venting to the control system) must meet or exceed the most stringent standard applicable to any line or other discrete activity venting to the control system.

2) Capture Efficiency Protocols

The capture efficiency of an emission unit ~~shall~~ must be measured using one of the protocols ~~given below~~in this subsection (c)(2). Appropriate test methods to be ~~utilized~~ used in each of the capture efficiency protocols are ~~described~~ in appendix M of 40 CFR 51, incorporated by reference at Section 218.112~~ of this Part~~. Any error margin associated with a test method or protocol may not be incorporated into the results of a capture efficiency test. If these techniques are not suitable for a particular process, then an alternative capture efficiency protocol may be used~~, pursuant to the provisions of~~ under Section 218.108(b)~~ of this Part~~.

A) Gas/gas method using temporary total enclosure (TTE). The Agency and USEPA specifications to determine whether a temporary enclosure is considered a TTE are ~~given~~ in Method 204 of appendix M of 40 CFR 51, incorporated by reference in Section 218.112~~ of this Part~~. The capture efficiency equation to be used for this protocol is:

$$CE = \frac{G_w}{G_w + F_w}$$

where:

CE = Capture efficiency, decimal fraction;
G_w = Mass of VOM captured and delivered to control device using a TTE;
F_w = Mass of uncaptured VOM that escapes from a TTE.

Method 204B or 204C ~~contained~~ in appendix M of 40 CFR 51, incorporated by reference in Section 218.112~~ of this Part~~, is used to obtain G_w. Method 204D in appendix M of 40 CFR 51, incorporated by reference in Section 218.112~~ of this Part~~, is used to obtain F_w.

B) Liquid/gas method using TTE. The Agency and USEPA specifications to determine whether a temporary enclosure is considered a TTE are ~~given~~ in Method 204 of appendix M of 40 CFR 51, incorporated by reference in Section 218.112~~ of this Part~~. The capture efficiency equation to be used for this protocol is:

$$CE = \frac{L - F_w}{L}$$

where:

CE = Capture efficiency, decimal fraction;
L = Mass of liquid VOM input to process emission unit;
F_w = Mass of uncaptured VOM that escapes from a TTE.

Method 204A or 204F ~~contained~~ in appendix M of 40 CFR 51, incorporated by reference in Section 218.112~~ of this Part~~, is used to obtain L. Method 204 D in appendix M of 40 CFR 51, incorporated by reference in Section 218.112~~ of this Part~~, is used to obtain F_w.

C) Gas/gas method using the building or room (building or room enclosure), in which the affected coating line, printing line, or other emission unit is located, as the enclosure as determined by Method 204 of appendix M of 40 CFR 51, incorporated by reference in Section 218.112~~ of this Part~~, and in which "F_B" and "G" are measured while operating only the affected line or emission unit. All fans and blowers in the building or room must be operated as they would under normal production. The capture

efficiency equation to be used for this protocol is:

$$CE = \frac{G}{G + F_B}$$

where:

CE = Capture efficiency, decimal fraction;
G = Mass of VOM captured and delivered to control device;
F_B = Mass of uncaptured VOM that escapes from building enclosure.

Method 204B or 204C ~~contained~~ in appendix M of 40 CFR 51, incorporated by reference in Section 218.112, ~~of this Part~~ is used to obtain G. Method 204E in appendix M of 40 CFR 51, incorporated by reference in Section 218.112, ~~of this Part~~ is used to obtain F_B.

D) Liquid/gas method using the building or room (building or room enclosure), in which the affected coating line, printing line, or other emission unit is located, as the enclosure as determined by Method 204 of appendix M of 40 CFR 51, incorporated by reference in Section 218.112 ~~of this Part~~, and in which "F_B" and "L" are measured while operating only the affected line or emission unit. All fans and blowers in the building or room must be operated as they would under normal production. The capture efficiency equation to be used for this protocol is:

$$CE = \frac{L - F_B}{L}$$

where:

CE = Capture efficiency, decimal fraction;
L = Mass of liquid VOM input to process emission unit;
F_B = Mass of uncaptured VOM that escapes from building enclosure.

Method 204A or 204F ~~contained~~ in appendix M of 40 CFR 51, incorporated by reference in Section 218.112 ~~of this Part~~ is used to obtain L. Method 204E in appendix M of 40 CFR 51, incorporated by reference in Section 218.112 ~~of this Part~~ is used to obtain F_B.

E) Mass balance using Data Quality Objective (DQO) or Lower Confidence Limit (LCL) protocol. For a liquid/gas input where an owner or operator is using the DQO/LCL protocol and not using an

enclosure as described in Method 204 of appendix M of 40 CFR 51, incorporated by reference in Section 218.112 ~~of this Part~~, the VOM content of the liquid input (L) must be determined using Method 204A or 204F in appendix M of 40 CFR 51, incorporated by reference in Section 218.112 ~~of this Part~~. The VOM content of the captured gas stream (G) to the control device must be determined using Method 204B or 204C in appendix M of 40 CFR 51, incorporated by reference in Section 218.112 ~~of this Part~~. The results of capture efficiency calculations (G/L) must satisfy the DQO or LCL statistical analysis protocol ~~as described~~ in Section 3 of USEPA's "Guidelines for Determining Capture Efficiency," incorporated by reference at Section 218.112 ~~of this Part~~. Where capture efficiency testing is done to determine emission reductions for the purpose of establishing emission credits for offsets, shutdowns, and trading, the LCL protocol cannot be used for these applications. In enforcement cases, the LCL protocol cannot confirm non-compliance; capture efficiency must be determined using a protocol under subsection (c)(2)(A), (B), (C), or (D) ~~of this Section~~, the DQO protocol of this subsection (c)(2)(E), or an alternative protocol ~~pursuant to~~under Section 218.108(b) ~~of this Part~~.

BOARD NOTE: Where LCL was used in testing emission units that are the subject of later requests for establishing emission credits for offsets, shutdowns, and trading, prior LCL results may not be relied upon to determine the appropriate amount of credits. Instead, to establish the appropriate amount of credits, additional testing may be required that would satisfy the protocol of Section 218.105(c)(2)(A), (B), (C) or (D), the DQO protocol of Section 218.105(c)(2)(E), or an alternative protocol ~~pursuant to~~under Section 218.108(b) ~~of this Part~~.

3) Simultaneous testing of multiple lines or emission units with a common control device. If an owner or operator has multiple lines sharing a common control device, the capture efficiency of the lines may be tested simultaneously, subject to the following provisions:

A) Multiple line testing must meet the criteria of Section 4 of USEPA's "Guidelines for Determining Capture Efficiency, " incorporated by reference at Section 218.112 ~~of this Part~~;

B) The most stringent capture efficiency required for any individual line or unit must be met by the aggregate of lines or units; and

C) Testing of all the lines of emission units must be performed with the same capture efficiency test protocol.

4) Recordkeeping and Reporting

A) All owners or operators ~~affected by~~to which this subsection applies must maintain on file a copy of the capture efficiency protocol submitted to the Agency and the USEPA ~~on file~~. All results of the appropriate test methods and capture efficiency protocols must be reported to the Agency within 60 days after the test date. A copy of the results must be kept on file with the source for ~~a period of~~ 3 years.

B) If any changes are made to capture or control equipment, then the source ~~is required to~~must notify the Agency and the USEPA of these changes, and a new test may be required by the Agency or the USEPA.

C) The source must notify the Agency 30 days ~~prior to~~before performing any capture efficiency or control test. At that time, the source must notify the Agency which capture efficiency protocol and control device test methods will be used. Notification of the actual date and expected time of testing must be submitted a minimum of 5 working days ~~prior to~~before the actual date of the test. The Agency may at its discretion accept notification with shorter advance notice ~~provided that such~~if those arrangements do not interfere with the Agency's ability to review the protocol or observe testing.

D) Sources ~~utilizing~~ using a PTE must demonstrate that this enclosure meets the requirements ~~given in~~of Method 204 in appendix M of 40 CFR 51, incorporated by reference in Section 218.112 ~~of this Part~~, for a PTE during any testing of their control device.

E) Sources ~~utilizing~~ using a TTE must demonstrate that their TTE meets the requirements ~~given in~~of Method 204 in appendix M of 40 CFR 51, incorporated by reference in Section 218.112 ~~of this Part~~, for a TTE during testing of their control device. The source must also provide documentation that the quality assurance criteria for a TTE have been achieved.

F) Any source ~~utilizing~~ using the DQO or LCL protocol must submit the following information to the Agency with each test report:

i) A copy of all test methods, Quality Assurance/Quality Control procedures, and calibration procedures to be used from those ~~described~~ in appendix M of 40 CFR 51, incorporated by reference in Section 218.112 ~~of this Part~~;

ii) A table with information on each sample taken, including the sample identification and the VOM content of the sample;

iii) The quantity of material used for each test run;

iv) The quantity of captured VOM for each test run;

v) The capture efficiency calculations and results for each test run;

vi) The DQO and/or LCL calculations and results; and

vii) The Quality Assurance/Quality Control results, including how often the instruments were calibrated, the calibration results, and the calibration gases used.

d) Control Device Efficiency Testing and Monitoring

1) The control device efficiency ~~shall~~ must be determined by simultaneously measuring the inlet and outlet gas phase VOM concentrations and gas volumetric flow rates in ~~accordance~~ compliance with the gas phase test methods ~~specified~~ in subsection (f) ~~of this Section~~.

2) An owner or operator:

A) That uses an afterburner or carbon adsorber to comply with any ~~Section~~ section of Part 218 ~~shall~~ must use Agency and USEPA approved continuous monitoring equipment which is installed, calibrated, maintained, and operated according to vendor specifications at all times the control device is in use except as provided in subsection (d)(3) ~~of this Section~~. The continuous monitoring equipment must monitor the following parameters:

i) For each afterburner which does not have a catalyst bed, the combustion chamber temperature of each afterburner.

ii) For each afterburner which has a catalyst bed, commonly known as a catalytic afterburner, the temperature rise across each catalytic afterburner bed or VOM concentration of exhaust.

iii) For each carbon adsorber, the VOM concentration of each carbon adsorption bed exhaust or the exhaust of the bed next in sequence to be desorbed.

B) Must install, calibrate, operate, and maintain~~,~~ in compliance with manufacturer's specifications~~,~~ a continuous recorder on the temperature monitoring device, such as a strip chart, recorder, or computer, having an accuracy of ± 1 percent of the temperature measured in degrees Celsius or ± ~~0.5° C~~0.5 °C, whichever is greater.

C) Of an automobile or light-duty truck primer surfacer operation or topcoat operation subject to subsection (d)(2)(A), ~~shall~~ must keep a separate record of the following data for the control devices, unless alternative provisions are ~~set forth~~ in a permit ~~pursuant to~~under Title V of the ~~Clean Air Act~~CAA:

i) For thermal afterburners for which combustion chamber temperature is monitored, all 3-hour periods of operation in which the average combustion temperature was more than ~~28°C (50°F)~~28 ° C (50 °F) below the average combustion temperature measured during the most recent performance test that demonstrated that the operation was in compliance.

ii) For catalytic afterburners for which temperature rise is monitored, all 3-hour periods of operation in which the average gas temperature before the catalyst bed is more than ~~28°C (50°F)~~28 ° C (50 °F) below the average gas temperature immediately before the catalyst bed measured during the most recent performance test that demonstrated that the operation was in compliance.

iii) For catalytic afterburners and carbon adsorbers for which VOM concentration is monitored, all 3-hour periods of operation during which the average VOM concentration or the reading of organics in the exhaust gases is more than 20 percent greater than the average exhaust gas concentration or reading measured by the organic monitoring device during the most recent determination of the recovery efficiency of a carbon adsorber or performance test for a catalytic afterburner, which determination or test demonstrated that the operation was in compliance.

3) An owner or operator that uses a carbon adsorber to comply with Section 218.401 ~~of this Part~~ may operate the adsorber during periods of monitoring equipment malfunction~~, provided that~~ if:

A) The owner or operator notifies the Agency in writing ~~the Agency~~ within~~,~~ 10 days after the conclusion of any 72 hour period during

which the adsorber is operated and the associated monitoring equipment is not operational~~,~~ of ~~such~~ the monitoring equipment failure and provides the duration of the malfunction, a description of the repairs made to the equipment, and the total to date of all hours in the calendar year during which the adsorber was operated and the associated monitoring equipment was not operational;

B) During ~~such~~ the period of malfunction the adsorber is operated using timed sequences as the basis for periodic regeneration of the adsorber;

C) The period of such adsorber operation does not exceed 360 hours in any calendar year without the approval of the Agency and USEPA; and

D) The total of all hours in the calendar year during which the adsorber was operated and the associated monitoring equipment was not operational ~~shall~~ must be reported~~,~~ in writing~~,~~ to the Agency and USEPA by January 31 of the following calendar year.

e) Overall Efficiency

1) The overall efficiency of the emission control system ~~shall~~ must be determined as the product of the capture system efficiency and the control device efficiency or by the liquid/liquid test protocol ~~as specified~~ in 40 CFR 60.433, incorporated by reference in Section 218.112 ~~of this Part~~, (and revised by subsection (c)(1)(B) ~~of this Section~~) for each solvent recovery system. ~~In those cases in which~~When the overall efficiency is being determined for an entire line, the capture efficiency used to calculate the product of the capture and control efficiency is the total capture efficiency over the entire line.

2) For coating lines which are both chosen by the owner or operator to comply with Section 218.207(c), (d), (e), (f), (g), (m), or (n) ~~of this Part~~ by the alternative in Section 218.207(b)(2) ~~of this Part~~ and meet the criteria allowing them to comply with Section 218.207 ~~of this Part~~ instead of Section 218.204 ~~of this Part~~, the overall efficiency of the capture system and control device, as determined by the test methods and procedures ~~specified~~ in subsections (c), (d), and (e)(1) ~~of this Section~~, ~~shall~~ must be no less than the equivalent overall efficiency ~~which shall be~~ calculated by the following equation:

$$E = \frac{VOM_a - VOM_l}{VOM_a} \times 100$$

where:

E = Equivalent overall efficiency of the capture system and control device as a percentage;

VOM_a = Actual VOM content of a coating, or the daily-weighted average VOM content of two or more coatings (if more than one coating is used), as applied to the subject coating line as determined by the applicable test methods and procedures ~~specified~~ in subsection (a) ~~of this Section~~ in units of kg VOM/1 (lb VOM/gal) of coating solids as applied;

VOM_l = The VOM emission limit ~~specified~~ in Section 218.204 or 218.205 ~~of this Part~~ in units of kg VOM/ℓ (lb VOM/gal) of coating solids as applied.

f) Volatile Organic Material Gas Phase Source Test Methods.
The methods in 40 CFR 60, appendix A, incorporated by reference in Section 218.112, must ~~of this Part delineated below shall~~ be used to determine control device efficiencies.

1) 40 CFR 60, appendix A, Method 18, 25, or 25A, incorporated by reference in Section 218.112, ~~of this Part~~ as appropriate to the conditions at the site, ~~shall~~ must be used to determine VOM concentration. Method selection ~~shall~~ must be based on ~~consideration of~~considering the diversity of organic species present and their total concentration and ~~on consideration of~~ the potential presence of interfering gases. Except as indicated in subsections (f)(1)(A) and (B) ~~below~~, the test ~~shall~~ must consist of three separate runs, each lasting a minimum of 60 minutes, unless the Agency and the USEPA determine that process variables dictate shorter sampling times.

A) When the method is to be used to determine the efficiency of a carbon adsorption system with a common exhaust stack for all the individual adsorber vessels, the test ~~shall~~ must consist of three separate runs, each coinciding with one or more complete sequences through the adsorption cycles of all the individual absorber vessels.

B) When the method is to be used to determine the efficiency of a carbon adsorption system with individual exhaust stacks for each absorber vessel, each adsorber vessel ~~shall~~ must be tested individually. The test for each absorber vessel ~~shall~~ must consist of three separate runs. Each run ~~shall~~ must coincide with one or more complete adsorption cycles.

2) 40 CFR 60, appendix A, Method 1 or 1A, incorporated by reference in

Section 218.112 ~~of this Part~~, ~~shall~~ must be used for sample and velocity traverses.

3) 40 CFR 60, appendix A, Method 2, 2A, 2C, or 2D, incorporated by reference in Section 218.112 ~~of this Part~~, ~~shall~~ must be used for velocity and volumetric flow rates.

4) 40 CFR 60, appendix A, Method 3, incorporated by reference in Section 218.112 ~~of this Part~~, ~~shall~~ must be used for gas analysis.

5) 40 CFR 60, appendix A, Method 4, incorporated by reference in Section 218.112 ~~of this Part~~, ~~shall~~ must be used for stack gas moisture.

6) 40 CFR 60, appendix A, Methods 2, 2A, 2C, 2D, 3, and 4, incorporated by reference in Section 218.112 ~~of this Part~~, ~~shall~~ must be performed, as applicable, at least twice during each test run.

7) ~~Use of an~~An adaptation to any of the test methods ~~specified~~ in subsections (f)(1), (2), (3), (4), (5), and (6) ~~of this Section~~ may not be used unless approved by the Agency and the USEPA on a case by case basis. An owner or operator must submit sufficient documentation for the Agency and the USEPA to find that the test methods ~~specified~~ in subsections (f)(1), (2), (3), (4), (5) and (6) of this Section will yield inaccurate results and that the proposed adaptation is appropriate.

g) Leak Detection Methods for Volatile Organic Material
Owners or operators required by this Part to carry out a leak detection monitoring program ~~shall~~ must comply with the following requirements:

1) Leak Detection Monitoring

A) Monitoring ~~shall~~ must comply with 40 CFR 60, appendix A, Method 21, incorporated by reference in Section 218.112 ~~of this Part~~.

B) The detection instrument ~~shall~~ must meet the performance criteria of Method 21.

C) The instrument ~~shall~~ must be calibrated before use on each day of its use by the methods ~~specified~~ in Method 21.

D) Calibration gases ~~shall~~ must be:

i) Zero air (less than 10 ppm of hydrocarbon in air); and

ii) A mixture of methane or n-hexane and air at a

concentration of approximately, but no less than, 10,000 ppm methane or n-hexane.

E) The instrument probe ~~shall~~ must be traversed around all potential leak interfaces as close to the interface as possible as described in Method 21.

2) When equipment is tested for compliance with no detectable emissions as required, the test ~~shall~~ must comply with the following requirements:

A) The requirements of subsections (g)(1)(A) through (g)(1)(E) ~~of this Section shall~~must apply.

B) The background level ~~shall~~ must be determined ~~as set forth in~~under Method 21.

3) Leak detection tests ~~shall~~ must be performed consistent with:

A) "APTI Course SI 417 Controlling Volatile Organic Compound Emissions from Leaking Process Equipment", EPA-450/2-82-015, incorporated by reference in Section 218.112 ~~of this Part~~.

B) "Portable Instrument User's Manual for Monitoring VOC Sources", EPA-340/1-86-015, incorporated by reference in Section 218.112 ~~of this Part~~.

C) "Protocols for Generating Unit-Specific Emission Estimates for Equipment Leaks of VOC and VHAP", EPA-450/3-88-010, incorporated by reference in Section 218.112 ~~of this Part~~.

D) "Petroleum Refinery Enforcement Manual", EPA-340/1-80-008, incorporated by reference in Section 218.112 ~~of this Part~~.

h) Bulk Gasoline Delivery System Test Protocol

1) The method for determining the emissions of gasoline from a vapor recovery system ~~are delineated in~~is at 40 CFR 60, Subpart XX, section 60.503, incorporated by reference in Section 218.112 ~~of this Part~~.

2) Other tests ~~shall~~ must be performed consistent with:

A) "Inspection Manual for Control of Volatile Organic Emissions from Gasoline Marketing Operations: Appendix D", EPA-340/1-80-012, incorporated by reference in Section 218.112 ~~of this Part~~.

B) "Control of Hydrocarbons from Tank Truck Gasoline Loading

Terminals: Appendix A", EPA-450/2-77-026, incorporated by reference in Section 218.112 ~~of this Part~~.

i) Notwithstanding other requirements of this Part, upon request of the Agency where it is necessary to demonstrate compliance, an owner or operator of an emission unit ~~which is~~ subject to this Part ~~shall~~must, at ~~his~~ its own expense, conduct tests in ~~accordance~~ compliance with the applicable test methods and procedures ~~specific~~ in this Part. Nothing in this Section ~~shall limit~~limits the authority of the USEPA ~~pursuant to~~under the Clean Air Act, as amended, to require testing.

j) Stage II Gasoline Vapor Recovery Test Methods

The methods for determining the acceptable performance of Stage II Gasoline Vapor Recovery System are ~~delineated~~ in "Technical Guidance-Stage II Vapor Recovery Systems for Control of Vehicle Refueling Emissions at Gasoline Dispensing Facilities," ~~found at~~ EPA 450/3-91-022b and incorporated by reference in Section 218.112 ~~of this Part~~. ~~Specifically, the~~These test methods are ~~as follows~~:

1) Dynamic Backpressure Test is a test procedure used to determine the pressure drop (flow resistance) through balance vapor collection and control systems (including nozzles, vapor hoses, swivels, dispenser piping, and underground piping) at prescribed flow rates.

2) Pressure Decay/Leak Test is a test procedure used to quantify the vapor tightness of a vapor collection and control system installed at gasoline dispensing facilities.

3) Liquid Blockage Test is a test procedure used to detect low points in any vapor collection and control system where condensate may accumulate.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 218.106 Compliance Dates

a) Except as otherwise provided in this Section or ~~as otherwise provided in~~ a specific Subpart of this Part, compliance with ~~the requirements of~~ all rules is required by July 1, 1991, or September 1, 1991, for all sources located in Cook, DuPage, Kane, Lake, McHenry, or Will Counties, consistent with the appropriate provisions of Section 218.103 ~~of this Section~~.

b) Except as otherwise provided in this Section or ~~as otherwise provided in~~ a specific Subpart of this Part, compliance with ~~the requirements of~~ this Part is required by November 15, 1993, for all sources located in Aux Sable Township or Goose Lake Township in Grundy County, or in Oswego Township in Kendall County.

c) All emission units which meet the applicability requirements of Sections 218.402(a)(2), 218.611(b), 218.620(b), 218.660(a), 218.680(a), 218.920(b), 218.940(b), 218.960(b) or 218.980(b) ~~of this Part~~, including emission units at sources ~~which are~~ excluded from the applicability criteria of Sections 218.402(a)(1), 218.611(a), 218.620(a), 218.920(a), 218.940(a), 218.960(a), or 218.980(a) ~~of this Part~~ by virtue of permit conditions or other enforceable means, must comply with ~~the requirements of~~ Subparts H, Z, AA, CC, DD, PP, QQ, RR,, or TT ~~of this Part, respectively,~~ by March 15, 1995. Any owner or operator of an emission unit which has already met the applicability requirements of Sections 218.402(a)(1), 218.611(a), 218.620(a), 218.920(a), 218.940(a), 218.960(a) 218.980(a) ~~of this Part~~ on or by the effective date of this subsection is required to comply with all compliance dates or schedules ~~found~~ in Sections 218.106(a) or 218.106(b), as applicable.

d) Any owner or operator of a source with an emission unit subject to ~~the requirements of~~ Section 218.204(m)(2) or (m)(3) ~~of this Part~~ must comply with those requirements by March 25, 1995.

e) Any owner or operator of a source subject to ~~the requirements of~~ Section 218.204(c)(2), 218.204(g)(2), or 218.204(h)(2) ~~of this Part shall~~must comply with the applicable requirements in the applicable subsections, as well as all applicable requirements in Sections 218.205 through 218.214 and 218.218, by May 1, 2012.

f) Any owner or operator of a source subject to ~~the requirements of~~ Section 218.204(p) ~~of this Part shall~~must comply with the requirements in Section 218.204(p), as well as all applicable requirements in Sections 218.205 through 218.211, 218.214, and 218.217 by August 1, 2010.

g) Any owner or operator of a source subject to ~~the requirements of~~ Section 218.204(a)(2) or 218.204(q) ~~of this Part shall~~must comply with the applicable requirements in those Sections, as well as all applicable requirements in Sections 218.205 through 218.214 and 218.219, by May 1, 2012.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 218.107 ~~Operation of~~Operating Afterburners

~~The operation of~~Operating any natural gas fired afterburner and capture system used to comply with this Part is not required ~~during the period of~~from November 1 of any year to April 1 of the following year ~~provided that the operation of such~~if operating the devices is not required for ~~purposes of~~ occupational safety or health, or for the control of toxic substances, odor nuisances, or other regulated pollutants.

(Source: Amended at 48 Ill. Reg. _____, effective _____)

Section 218.108 Exemptions, Variations, and Alternative Means of Control or Compliance Determinations

Notwithstanding ~~the provisions of~~ any other Sections of this Part:

a) Any exemptions, variations, or alternatives adopted by the Board ~~pursuant to~~under Section 28, 28.1, or 35 of the Act to the control requirements, emission limitations, or test methods ~~set forth~~ in this Part ~~shall~~ must be effective only when approved by the USEPA as a SIP revision.

b) Any equivalent alternative control plan, equivalent device, or other equivalent alternative practice authorized by the Agency where this Part provides for ~~such~~ the alternative or equivalent practice or equivalent variations or alterations to test methods approved by the Agency ~~shall~~ must be effective only when included in a federally enforceable permit or approved as a SIP revision.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 218.109 Vapor Pressure of Volatile Organic Liquids

a) If the VOL consists of only a single compound, the vapor pressure ~~shall~~ must be determined by ASTM Method D2879-86, ~~(~~incorporated by reference in Section 218.112 of this Part~~)~~, or the vapor pressure may be obtained from a publication such as: Boublik, T., V. Fried, and E. Hala, "The Vapor Pressure of Pure Substances," Elsevier Scientific Publishing Co., New York (1973); Perry's Chemical Engineer's Handbook, McGraw-Hill Book Company (1984); CRC Handbook of Chemistry and Physics, Chemical Rubber Publishing Company (1986-87); and Lange's Handbook of Chemistry, John A. Dean, editor, McGraw-Hill Book Company (1985).

b) If the VOL is a mixture, the vapor pressure ~~shall~~ must be determined by ASTM Method D2879-86, ~~(~~incorporated by reference in Section 218.112~~)~~, or by the following equation:

$$P_{vol} = \sum_{i=1}^{n} P_i \; X_i$$

where:

P_{vol} =	Total vapor pressure of the mixture;
n =	Number of components in the mixture;
i =	Subscript denoting an individual component;
P_i =	Vapor pressure of a component determined in ~~accordance~~ compliance with subsection (a) ~~of this Section~~;
X_i =	Mole fraction of the component in the total mixture.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 218.110 Vapor Pressure of Organic Material or Solvent

a) If the organic material or solvent consists of only a single compound, the vapor pressure ~~shall~~ must be determined by ASTM Method D2879-86, ~~(~~incorporated by reference in Section 218.112 of this Part~~)~~ , or the vapor pressure may be obtained from a publication such as: Boublik, T., V. Fried, and E. Hala, "The Vapor Pressure of Pure Substances," Elsevier Scientific Publishing Co., New York (1973); Perry's Chemical Engineer's Handbook, McGraw-Hill Book Company (1984); CRC Handbook of Chemistry and Physics, Chemical Rubber Publishing Company (1986-87); and Lange's Handbook of Chemistry, John A. Dean, editor, McGraw-Hill Book Company (1985).

b) If the organic material or solvent is in a mixture made up of both organic material compounds and compounds which are not organic material, the vapor pressure ~~shall~~ must be determined by the following equation:

$$P_{om} = \frac{\sum_{i=1}^{n} P_i X_i}{\sum_{i=1}^{n} X_i}$$

where:

P_{om} = Total vapor pressure of the portion of the mixture which is composed of organic material;

n = Number of organic material components in the mixture;

i = Subscript denoting an individual component;

P_i = Vapor pressure of an organic material component determined in ~~accordance~~ compliance with subsection (a) ~~of this Section~~;

X_i = Mole fraction of the organic material component of the total organic mixture.

c) If the organic material or solvent is in a mixture made up of only organic material compounds, the vapor pressure ~~shall~~ must be determined by ASTM Method D2879-86, ~~(~~incorporated by reference in Section 218.112, ~~of this Part)~~ or by the ~~above~~ equation in subsection (b).

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 218.111 Vapor Pressure of Volatile Organic Material

a) If the VOM consists of only a single compound, the vapor pressure ~~shall~~ must be determined by ASTM Method D2879-86, ~~(~~incorporated by reference in Section 218.112, ~~of this Part)~~ or the vapor pressure may be obtained from a publication such as: Boublik, T., V. Fried, and E. Hala, "The Vapor Pressure of Pure Substances," Elsevier Scientific Publishing Co., New York (1973); Perry's Chemical Engineer's Handbook, McGraw-Hill Book Company (1984); CRC Handbook of Chemistry and Physics, Chemical Rubber Publishing Company (1986-87); and Lange's Handbook of Chemistry, John A. Dean, editor, McGraw-Hill Book Company (1985).

b) If the VOM is in a mixture made up of both VOM compounds and compounds which are not VOM, the vapor pressure ~~shall~~ must be determined by the following equation:

$$P_{vom} = \frac{\sum_{i=1}^{n} P_i X_i}{\sum_{i=1}^{n} X_i}$$

where:

P_{vom} = Total vapor pressure of the portion of the mixture which is composed of VOM;

n = Number of VOM components in the mixture;

i = Subscript denoting an individual component;

P_i = Vapor pressure of a VOM component determined in ~~accordance~~ compliance with subsection (a) ~~of this Section~~;

X_i = Mole fraction of the VOM component of the total organic mixture.

c) If the VOM is in a mixture made up of only VOM compounds, the vapor pressure ~~shall~~ must be determined by ASTM Method D2879-86, ~~(~~incorporated by reference in Section 218.112 of this Part~~)~~, or by the ~~above~~ equation in subsection (b).

Section 218.113 Monitoring for Negligibly-Reactive Compounds

The requirements of 35 Ill. Adm. Code 215.109, which allows the Agency to require testing and monitoring for negligibly-reactive compound as a precondition to ~~their exemption~~exempting them from the definition of "volatile organic compound", ~~shall apply~~applies to owners and operators of sources subject to this Part.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 218.114 Compliance with Permit Conditions

~~No~~ A person ~~shall~~ must not violate any terms or conditions of a permit reflecting the requirements of this Part, operate any source except in compliance with its permit, or violate any other applicable requirements.

(Source: Amended at 48 Ill. Reg._____, effective _____)

SUBPART B: ORGANIC EMISSIONS FROM STORAGE AND LOADING OPERATIONS

Section 218.119 Applicability for VOL

~~The limitations of~~ Section 218.120 ~~of this Subpart shall~~must apply to all storage containers of volatile organic liquid (VOL) with a maximum true vapor pressure of 0.5 psia or greater in any stationary tank, reservoir, or other container of 151 cubic meters (40,000 gal) capacity or greater, except ~~to vessels as provided below~~:

a) Vessels with a capacity greater than or equal to 40,000 gallons storing a liquid with a maximum true pressure of less than 0.5 psia;

b) Vessels of coke oven by-product plants;

c) Pressure vessels designed to operate in excess of 29.4 psia and without emissions to the atmosphere;

d) Vessels permanently attached to mobile vehicles such as trucks, rail cars, barges, or ships;

e) Vessels storing petroleum liquids; or

f) Vessels used to store beverage alcohol.

g) Vessels with storage capacity less than 40,000 gallons must comply with Section 218.129(f).

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 218.120 Control Requirements for Storage Containers of VOL

a) Every owner or operator storing VOL in a vessel of 40,000 gallons or greater with a maximum true vapor pressure equal to 0.75 psia but less than 11.1 psia ~~shall~~ must reduce VOM emissions from storage tanks, reservoirs, or other containers as follows:

1) Each fixed roof tank ~~shall~~ must be equipped with an internal floating roof that meets the following specifications or that is equipped with a vapor control system that meets the specifications ~~contained~~ in subsection (a)(4) ~~below~~:

A) The internal floating roof ~~shall~~ must rest or float on the liquid surface (but not necessarily in complete contact with it) inside a storage vessel that has a fixed roof. The internal floating roof ~~shall~~ must be floating on the liquid surface at all times, except during initial fill and ~~during those intervals~~ when the storage vessel is completely emptied and subsequently refilled. When the roof is

resting on the leg supports, the process of filling, emptying, or refilling ~~shall~~ must be continuous and ~~shall~~ must be accomplished as rapidly as possible.

B) Each internal floating roof ~~shall~~ must be equipped with one of the following closure devices between the wall of the storage vessel and the edge of the internal floating roof:

i) ~~A foam- or liquid-filled seal mounted in contact with the liquid (liquid-mounted seal).~~ A liquid-mounted seal ~~means~~, which is a foam- or liquid-filled seal mounted in contact with the liquid between the wall of the storage vessel and the floating roof continuously around the circumference of the tank;

ii) Two seals mounted one above the other so that each forms a continuous closure that completely covers the space between the wall of the storage vessel and the edge of the internal floating roof. The lower seal may be vapor-mounted, but both must be continuous; or

iii) A mechanical shoe seal, which is a metal sheet held vertically against the wall of the storage vessel by springs or weighted levers and is connected by braces to the floating roof. A flexible coated fabric (envelope) spans the annular space between the metal sheet and the floating roof.

C) Each opening in a noncontact internal floating roof except for automatic bleeder vents (vacuum breaker vents) and the rim space vents is to provide a projection below the liquid surface.

D) Each opening in the internal floating roof except for leg sleeves, automatic bleeder vents, rim space vents, column wells, ladder wells, sample wells, and stub drains is to be equipped with a cover or lid which is to be maintained in a closed position at all times (i.e., no visible gap) except when the device is in actual use. The cover or lid ~~shall~~ must be equipped with a gasket. Covers on each access hatch and automatic gauge float well ~~shall~~ must be bolted except when they are in use.

E) Automatic bleeder vents ~~shall~~ must be equipped with a gasket and are to be closed at all times when the roof is floating except when the roof is being floated off or is being landed on the roof leg supports.

F) Rim space vents ~~shall~~ must be equipped with a gasket and are to be set to open only when the internal floating roof is not floating or at the manufacturer's recommended setting.

G) Each penetration of the internal floating roof for the purpose of sampling ~~shall~~ must be a sample well. The sample well ~~shall~~ must have a slit fabric cover that covers at least 90 percent of the opening.

H) Each penetration of the internal floating roof that allows for passage of a ladder ~~shall~~ must have a gasketed sliding cover.

2) During the next scheduled tank cleaning or before March 15, 2004, whichever comes first, each internal floating roof tank ~~shall~~ must meet the specifications ~~set forth~~ in subsections (a)(1)(A) through (H) ~~above~~.

3) Each external floating roof tank ~~shall~~ must meet the following specifications:

A) Each external floating roof ~~shall~~ must be equipped with a closure device between the wall of the storage vessel and the roof edge. The closure device is to consist of two seals, one above the other. The lower seal is referred to as the primary seal, and the upper seal is referred to as the secondary seal.

i) Except as provided in Section 218.127(b)(4) ~~of this Subpart~~, the primary seal ~~shall~~ must completely cover the annular space between the edge of the floating roof and tank wall and ~~shall~~ must be either a liquid mounted seal or a shoe seal.

ii) The secondary seal ~~shall~~ must completely cover the annular space between the external floating roof and the wall of the storage vessel in a continuous fashion except as allowed in Section 218.127(b)(4) ~~of this Subpart~~.

iii) The tank ~~shall~~ must be equipped with the closure device after the next scheduled tank cleaning, but no later than March 15, 2004.

B) Except for automatic bleeder vents and rim space vents, each opening in a noncontact external floating roof ~~shall~~ must provide a projection below the liquid surface. Except for automatic bleeder vents, rim space vents, roof drains, and leg sleeves, each opening in the roof is to be equipped with a gasketed cover, seal, or lid that is to be maintained in a closed position at all times (i.e., no visible

gap) except when the device is in actual use. Automatic bleeder vents are to be closed at all times when the roof is floating except when the roof is being floated off or is being landed on the roof leg supports. Rim vents are to be set to open when the roof is being floated off the roof leg supports or at the manufacturer's recommended setting. Automatic bleeder vents and rim space vents are to be gasketed. Each emergency roof drain is to be provided with a slotted membrane fabric cover that covers at least 90 percent of the area of the opening.

C) The roof ~~shall~~ must be floating on the liquid at all times (i.e., off the roof leg supports) except when the tank is completely emptied and subsequently refilled. The process of filling, emptying, or refilling when the roof is resting on the leg supports ~~shall~~ must be continuous and ~~shall~~ must be accomplished as rapidly as possible.

4) A closed vent system and control device ~~respectively shall~~must meet the following specifications:

A) The closed vent system ~~shall~~ must be designed to collect all VOM vapors and gases discharged from the storage vessel and operated with no detectable emissions as indicated by an instrument reading of less than 500 ppm above background and visual inspections, as determined by the methods ~~specified~~ in 40 CFR 60.485(c), incorporated by reference at Section 218.112(d) ~~of this Part~~.

B) The control device ~~shall~~ must be designed and operated to reduce inlet VOM emissions by 95 percent or greater. If a flare is used as the control device, it ~~shall~~ must meet the specifications ~~described~~ in the general control device requirements of 40 CFR 60.18, incorporated by reference at Section 218.112(d) ~~of this Part~~.

5) An alternative emission control plan equivalent to the requirements of subsection (a)(1), (a)(2), (a)(3), or (a)(4) ~~above~~ that has been approved by the Agency and the USEPA in a federally enforceable permit or as a SIP revision.

b) The owner or operator of each storage vessel with a design capacity equal to or greater than 40,000 gallons which contains VOL that, as stored, has a maximum true vapor pressure greater than or equal to 11.1 psia ~~shall~~ must equip each storage vessel with a closed vent system and control device as specified in subsection (a)(4) ~~above~~.

c) Notwithstanding subsection (b) ~~of this Section~~, where an owner or operator can demonstrate that the control device installed on a storage vessel on or before December 31, 1992, was designed to reduce inlet VOM emissions by greater than

or equal to 90 percent but less than 95 percent, the control device ~~shall~~ must be operated to reduce inlet VOM emission by 90 percent or greater.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 218.121 Storage Containers of VPL

~~No~~ A person ~~shall~~ must not cause or allow the storage of any volatile petroleum liquid (VPL) with a vapor pressure of 10.34 kPa (1.5 psia) or greater at ~~294.3°K (70°F)~~294.3 °K (70 °F) or any gaseous organic material in any stationary tank, reservoir, or other container of more than 151 cubic meters (40,000 gal) capacity unless ~~such~~ the tank, reservoir, or other container:

a) Is a pressure tank capable of withstanding the vapor pressure of ~~such~~ the liquid or the pressure of the gas~~, so as~~ to prevent vapor or gas loss to the atmosphere at all times; or

b) Is designed and equipped with one of the following vapor loss control devices:

1) A floating roof which rests on the surface of the VPL and is equipped with a closure seal or seals between the roof edge and the tank wall. ~~Such~~ The floating roof ~~shall~~ must not be permitted if the VPL has a vapor pressure of 86.19 kPa (12.5 psia) or greater at ~~294.3°K (70°F)~~294.3 °K (70 °F). ~~No~~ A person ~~shall~~ must not cause or allow the emission of air contaminants into the atmosphere from any gauging or sampling devices attached to such tanks, except during sampling or maintenance operations.

2) A vapor recovery system consisting of:

A) A vapor gathering system capable of collecting 85% or more of the uncontrolled VOM that would be otherwise emitted to the atmosphere; and

B) A vapor disposal system capable of processing ~~such~~ VOM ~~so as~~ to prevent its emission to the atmosphere. ~~No~~ A person ~~shall~~ must not cause or allow the emission of air contaminants into the atmosphere from any gauging or sampling devices attached to ~~such~~ a tank, reservoir, or other container except during sampling.

3) Other equipment or means of equal efficiency approved by the Agency ~~according to the provisions of~~under 35 Ill. Adm. Code 201~~,~~ and ~~further~~ processed consistent with Section 218.108.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 218.122 Loading Operations

a) ~~No~~ A person ~~shall~~ must not cause or allow the discharge of more than 3.6 kg/hr (8 lbs/hr) of organic material into the atmosphere during the loading of any organic material from the aggregate loading pipes of any loading area having through-put of greater than 151 cubic meters per day (40,000 gal/day) into any railroad tank car, tank truck, or trailer unless ~~such~~ the loading area is equipped with submerged loading pipes or a device that is equally effective in controlling emissions and is approved by the Agency ~~according to the provisions of~~under 35 Ill. Adm. Code 201~~,~~ and ~~further~~ processed consistent with Section 218.108.

b) ~~No~~ A person ~~shall~~ must not cause or allow the loading of any organic material into any stationary tank having a storage capacity of greater than 946 1 (250 gal), unless ~~such~~ the tank is equipped with a permanent submerged loading pipe or an equivalent device approved by the Agency ~~according to the provisions of~~under 35 Ill. Adm. Code 201~~,~~ and ~~further~~ processed consistent with Section 218.108 ~~of this Part~~, or unless ~~such~~ the tank is a pressure tank ~~as described in~~under Section 218.121(a) ~~of this Part~~ or is fitted with a recovery system ~~as described in~~under Section 218.121(b)(2) ~~of this Part~~.

c) Exception: If no odor nuisance exists, ~~the limitations of~~ this Section ~~shall~~ applies only ~~apply~~ to ~~the~~ loading ~~of~~ VOL with a vapor pressure of 17.24 kPa (2.5 psia) or greater at ~~294.3°K (70°F)~~294.3 °K (70 °F).

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 218.123 Petroleum Liquid Storage Tanks

a) ~~The requirements of subsection~~Subsection (b) ~~of this Section shall~~must not apply to any stationary storage tank:

1) Equipped before January 1, 1979, with one of the vapor loss control devices ~~specified~~ in Section 218.121(b) ~~of this Part~~, except Section 218.121(b)(1) ~~of this Part~~;

2) With a capacity of less than 151.42 cubic meters (40,000 gal);

3) With a capacity of less than 1,600 cubic meters (422,400 gal) and used to store produced crude oil and condensate ~~prior to~~before custody transfer;

4) With a capacity of less than 1,430 cubic meters (378,000 gal) and used to store produced oil or condensate in crude oil gathering;

5) Subject to new source performance standards for storage vessels of petroleum liquid, 40 CFR 60, as regulations promulgated by the U.S. Environmental Protection Agency under Section 111 of the Clean Air Act (42 USC 7411), as amended. *The provisions of Section 111 of the federal Clean Air Act . . . are applicable in this State and are enforceable under*

~~*[the Environmental Protection Act]*~~the Environmental Protection Act ~~(Ill. Rev. Stat. 1991, ch. 111 1/2, par. 1009.1(b))~~ [415 ILCS 5/9.1(b)];

6) In which volatile petroleum liquid is not stored; or

7) Which is a pressure tank ~~as described in~~under Section 218.121(a) ~~of this Part~~.

b) Subject to subsection (a), ~~of this Section no~~an owner or operator of a stationary storage tank ~~shall~~ must not cause or allow the storage of any volatile petroleum liquid in the tank unless:

1) The tank is equipped with one of the vapor loss control devices ~~specified in~~under Section 218.121(b) ~~of this Part~~;

2) There are no visible holes, tears, or other defects in the seal or any seal fabric or material of any floating roof;

3) All openings of any floating roof deck, except stub drains, are equipped with covers, lids, or seals such that:

A) The cover, lid, or seal is in the closed position at all times except when petroleum liquid is transferred to or from the tank;

B) Automatic bleeder vents are closed at all times except when the roof is floated off or landed on the roof leg supports; and

C) Rim vents, if provided, are set to open when the roof is being floated off the roof leg supports or at the manufacturer's recommended setting;

4) Routine inspections of floating roof seals are conducted through roof hatches once every six months;

5) A complete inspection of the cover and seal of any floating roof tank is made whenever the tank is emptied for reasons other than the transfer of petroleum liquid during the normal operation of the tank, or whenever repairs are made as a result of any semi-annual inspection or incidence of roof damage or defect; and

6) A record of the results of each inspection conducted under subsection (b)(4) or (b)(5) ~~of this Section~~ is maintained.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 218.124 External Floating Roofs

a) In addition to meeting the requirements of Section 218.123(b) ~~of this Part~~, ~~no~~ an owner or operator of a stationary storage tank equipped with an external floating roof ~~shall~~ must not cause or allow the storage of any volatile petroleum liquid in the tank unless:

1) The tank has been fitted:

A) With a continuous secondary seal extending from the floating roof to the tank wall (rim mounted secondary seal), or

B) With any other equipment or means of equal efficiency approved by the Agency ~~according to the provisions of~~under 35 Ill. Adm. Code 201, and ~~further~~ processed consistent with Section 218.108 ~~of this Part~~;

2) Each seal closure device meets the following requirements:

A) The seal is intact and uniformly in place around the circumference of the floating roof between the floating roof and tank wall; and

B) The accumulated area of gaps exceeding 0.32 centimeter (1/8 inch) in width between the secondary seal and the tank wall ~~shall~~ must not exceed 21.2 square centimeters per meter of tank diameter (1.0 square inches per foot of tank diameter). Compliance with this requirement ~~shall~~ must be determined by:

i) Physically measuring the length and width of all gaps around the entire circumference of the secondary seal in each place where a 0.32 cm (0.125 in.) uniform diameter probe passes freely (without forcing or binding against the seal) between the seal and the tank wall; and

ii) Summing the area of the individual gaps.

3) Emergency roof drains are provided with slotted membrane fabric covers or equivalent covers across at least 90 percent of the area of the opening;

4) Openings are equipped with projections into the tank which remain below the liquid surface at all times;

5) Inspections are conducted ~~prior to~~before May 1 of each year to ~~insure~~ ensure compliance with subsection (a) ~~of this Section~~;

6) The secondary seal gap is measured ~~prior to~~before May 1 of each year and within 30 days ~~of~~ after a written request to demonstrate compliance with subsection (2)(B) ~~of this Section~~;

7) Records of the types of volatile petroleum liquid stored, the maximum true vapor pressure of the liquid as stored, the results of the inspections, and the results of the secondary seal gap measurements are maintained and available to the Agency, upon verbal or written request, at any reasonable time for a minimum of two years after the date on which the record was made.

b) Subsection (a) ~~above~~ does not apply to any stationary storage tank equipped with an external floating roof:

1) Exempted under Section 218.123(a)(2) through 218.123(a)(6) ~~of this Part~~;

2) Of welded construction equipped with a metallic type shoe seal having a secondary seal from the top of the shoe seal to the tank wall (shoe-mounted secondary seal);

3) Of welded construction equipped with a metallic type shoe seal, a liquid-mounted foam seal, a liquid-mounted liquid-filled-type seal, or other closure device of equivalent control efficiency approved by the Agency in which a petroleum liquid with a true vapor pressure less than 27.6 kPa (4.0 psia) at ~~294.3°K (70°F)~~294.3 °K (70 °F) is stored; or

4) Used to store crude oil with a pour point of ~~50°F~~ 50 °F or higher as determined by ASTM Standard D97-66, incorporated by reference in Section 218.112 ~~of this Part~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 218.125 Compliance Dates

Every owner or operator of a VOL or VPL storage vessel subject to ~~the requirements of~~ this Subpart ~~shall~~ must comply with ~~the requirements of~~ this Subpart by the deadline ~~in accordance with the compliance schedule specified~~ in the applicable subsection ~~below~~:

a) Every owner or operator of a VPL storage vessel ~~of the type included in~~under Sections 218.121, 218.123, and 218.124 ~~of this Subpart shall~~must have complied with ~~the requirements of~~ Sections 218.121, 218.123, and 218.124 by the date ~~set forth~~ in Section 218.106(a) or (b) ~~of this Part~~,.

b) Every owner or operator of a VOL storage vessel ~~of the type identified in~~under Section 218.119 ~~of this Subpart shall~~must comply with ~~the requirements of~~ Section 218.120 ~~of this Subpart~~ as follows:

1) For fixed roof tanks (Section 218.120(a)(1) ~~of this Subpart~~), March 15, 1996.

2) For internal floating roof tanks (Section 218.120(a)(2) ~~of this Subpart~~), either during the next scheduled tank cleaning or by March 15, 2004, whichever comes first;

3) For external floating roof tanks (Section 218.120(a)(3) ~~of this Subpart~~), either during the next scheduled tank cleaning or by March 15, 2004, whichever comes first; and

4) For closed vent system and control device equipped tanks (Section 218.120(a)(4) ~~of this Subpart~~), by March 15, 1996.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 218.126 Compliance Plan (Repealed)

(Source: Repealed at 17 Ill. Reg. 16636, effective September 27, 1993)

Section 218.127 Testing VOL Operations

The owner or operator of each storage vessel specified in Section 218.119 ~~of this Subpart shall~~must comply with ~~the requirements of~~ subsection (a), (b), or (c) ~~below~~. The applicable subsection for a particular storage vessel depends on the control equipment installed to meet the requirements of this Subpart.

a) After installing the control equipment necessary for the source to comply with ~~the requirements of~~ Section 218.120(a)(1) or (2) ~~of this Subpart~~ (permanently affixed roof and internal floating roof), each owner or operator ~~shall~~must:

1) Visually inspect the internal floating roof, the primary seal, and the secondary seal (if one is in service) ~~prior to~~before filling the storage vessel with VOL. If there are holes, tears, or other openings in the primary seal, the secondary seal, or the seal fabric or defects in the internal floating roof, or both, the owner or operator ~~shall~~ must repair the items before filling the storage vessel.

2) For vessels equipped with a liquid-mounted or mechanical shoe primary seal, visually inspect the internal floating roof and the primary seal or the secondary seal (if one is in service) through manholes and roof hatches on the fixed roof at least once every 12 months after initial fill. If the internal floating roof is not resting on the surface of the VOL inside the storage vessel, or if there is liquid accumulated on the roof, or if the seal is detached, or if there are holes or tears in the seal fabric, the owner or

operator ~~shall~~ must repair the items or empty and remove the storage vessel from service within 45 days. If a failure that is detected during inspections required in this subsection cannot be repaired within 45 days and if the vessel cannot be emptied within 45 days, the owner or operator may request a 30-day extension from the Agency in the inspection report required in Section 218.129(a)(3) ~~of this Subpart~~. ~~Such a~~The request for an extension must document that alternate storage capacity is unavailable and specify a schedule of actions the owner or operator will take that will assure that the control equipment will be repaired or the vessel will be emptied within 30 days.

3) For vessels equipped with both primary and secondary seals:

A) Visually inspect the vessel as specified in subsection (a)(4) ~~below~~ at least every 5 years; or

B) Visually inspect the vessel as specified in subsection (a)(2) ~~above~~.

4) Visually inspect the internal floating roof, the primary seal, the secondary seal (if one is in service), gaskets, slotted membranes, and sleeve seals (if any) each time the storage vessel is emptied and degassed. If the internal floating roof has defects, the primary seal has holes, tears, or other openings in the seal, or if the seal fabric or the secondary seal has holes, tears, or other openings in the seal, or if the seal fabric or the gaskets no longer close off the liquid surfaces from the atmosphere, or if the slotted membrane has more than 10 percent open area, the owner or operator ~~shall~~ must repair the items as necessary so that none of the conditions ~~specified~~ in this subsection exists before refilling the storage vessel with VOL. In no event ~~shall~~ must inspections conducted in ~~accordance~~ compliance with this ~~provision~~ subsection occur at intervals greater than 10 years in the case of vessels conducting the annual visual inspection ~~as specified in~~under subsections (a)(2) and (a)(3)(B) ~~above~~ and at intervals no greater than 5 years in the case of vessels ~~specified in~~under subsection (a)(3)(A) ~~above~~.

5) Notify the Agency in writing at least 30 days ~~prior to the~~before filling or refilling ~~of~~ each storage vessel for which an inspection is required by subsections (a)(1) and (a)(4) ~~above~~ to afford the Agency the opportunity to have an observer present. If the inspection required by subsection (a)(4) ~~above~~ is not planned and the owner or operator could not have known about the inspection 30 days ~~in advance of~~before refilling the tank, the owner or operator ~~shall~~ must notify the Agency at least 7 days ~~prior to the~~before refilling ~~of~~ the storage vessel. Notification ~~shall~~ must be made by telephone immediately followed by written documentation demonstrating why the inspection was unplanned. Alternatively, this notification including the written documentation may be made in writing

and sent by express mail so that it is received by the Agency at least 7 days ~~prior to the~~before refilling.

b) The owner or operator of external floating roof tanks ~~shall~~must:

1) Determine the gap areas and maximum gap widths between the primary seal and the wall of the storage vessel and between the secondary seal and the wall of the storage vessel.

A) Measurements of gaps between the tank wall and the primary seal (seal gaps) ~~shall~~ must be performed during the hydrostatic testing of the vessel or within 60 days after the initial fill with VOL and then at least once every 5 years ~~thereafter~~.

B) Measurements of gaps between the tank wall and the secondary seal ~~shall~~ must be performed within 60 days after the initial fill with VOL and then at least once per year ~~thereafter~~.

C) If any source ceases to store VOL for ~~a period of 1~~ one year or more, subsequent introduction of VOL into the vessel ~~shall~~ must be considered an initial fill for the purposes of subsections (b)(1)(A) and (b)(1)(B) ~~above~~.

2) Determine gap widths and areas in the primary and secondary seals individually according to the following procedures:

A) Measure seal gaps, if any, at one or more floating roof levels when the roof is floating off the roof leg supports;

B) Measure seal gaps around the entire circumference of the tank in each place where a 1/8 inch in diameter uniform probe passes freely (without forcing or binding against seal) between the seal and the wall of the storage vessel and measure the circumferential distance of each ~~such~~ location; and

C) Determine the total surface area of each gap described in subsection (b)(2)(B) ~~above~~ by using probes of various widths to measure accurately the actual distance from the tank wall to the seal and multiplying each ~~such~~ width by its respective circumferential distance.

3) Add the gap surface area of each gap location for the primary seal and the secondary seal individually and divide the sum for each by the nominal diameter of the tank and compare each ratio to the ~~respective~~ standards in subsection (b)(4) ~~below~~.

4) Make necessary repairs or empty the storage vessel within 45 days after identification in any inspection for seals not meeting the requirements ~~listed~~ in subsections (b)(4)(A) and (B) ~~below~~:

A) The accumulated area of gaps between the tank wall and the mechanical shoe or liquid-mounted primary seal ~~shall~~ must not exceed 10 in.~~(2)~~ per foot of tank diameter, and the width of any portion of any gap ~~shall~~ must not exceed 1.5 in. There ~~are to~~must not be ~~no~~ holes, tears, or other openings in the shoe, seal fabric, or seal envelope.

B) The secondary seal ~~is to~~must meet the following requirements:

i) The secondary seal ~~is to~~must be installed above the primary seal so that it completely covers the space between the roof edge and the tank wall except as provided in subsection (b)(2)(C) ~~above~~.

ii) The accumulated area of gaps between the tank wall and the secondary seal used in combination with a metallic shoe or liquid-mounted primary seal ~~shall~~ must not exceed 1.0 in.~~(2)~~ per foot of tank diameter, and the width of any portion of any gap ~~shall~~ must not exceed 0.5 in. There ~~shall~~ must not be ~~no~~ gaps between the tank wall and the secondary seal when used in combination with a vapor mounted primary seal.

iii) There ~~are to~~must not be ~~no~~ holes, tears, or other openings in the seal or seal fabric.

C) If a failure ~~that is~~ detected during inspections required in Section 218.127(b)(1) ~~of this Subpart~~ cannot be repaired within 45 days and if the vessel cannot be emptied within 45 days, the owner or operator may request a 30-day extension from the Agency in the inspection report required in Section 218.129(b)(4) ~~of this Subpart~~. ~~Such~~ The extension request must include a demonstration of unavailability of alternate storage capacity and ~~a specification of~~ a specific schedule that will assure that the control equipment will be repaired or the vessel will be emptied as soon as possible.

5) Notify the Agency 30 days ~~in advance of~~before any gap measurements required by subsection (b)(1) ~~above~~ to afford the Agency the opportunity to have an observer present.

6) Visually inspect the external floating roof, ~~the~~ primary seal, secondary seal, and fittings each time the vessel is emptied and degassed.

A) If the external floating roof has defects~~,~~; if the primary seal has holes, tears, or other openings in the seal or the seal fabric~~,~~; or if the secondary seal has holes, tears, or other openings in the seal or the seal fabric, the owner or operator ~~shall~~ must repair the items as necessary so that none of the conditions ~~specified~~ in this subsection exist before filling or refilling the storage vessel with VOL.

B) For all the inspections required by subsection (b)(6) ~~above~~, the owner or operator ~~shall~~ must notify the Agency in writing at least 30 days ~~prior to~~before filling or refilling ~~of~~ each storage vessel to afford the Agency the opportunity to inspect the storage vessel ~~prior to~~before the refilling of the storage vessel. Notification ~~shall~~ must be made by telephone immediately followed by written documentation demonstrating why the inspection was unplanned. Alternatively, this notification including the written documentation may be sent by express mail so that it is received by the Agency at least 7 days ~~prior to~~before the refilling.

c) The owner or operator of each source ~~that is~~ equipped with a closed vent system and a flare to meet the requirements of Section 218.120(a)(4) ~~of this Subpart~~ ~~shall~~must meet ~~the requirements specified in~~ the general control device requirements of 40 CFR 60.18(e) and (f), incorporated by reference at Section 218.112(d) ~~of this Part~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 218.128 Monitoring VOL Operations

a) Except as provided in subsection (d), the owner or operator of each storage vessel with a design capacity greater than or equal to 40,000 gallons storing a liquid with a maximum true vapor pressure that is normally less than 0.75 psia ~~shall~~ must notify the Agency within 30 days when the maximum true vapor pressure of the liquid exceeds 0.75 psia.

b) Available data on the storage temperature may be used to determine the maximum true vapor pressure.

1) For vessels operated above or below ambient temperatures, the maximum true vapor pressure is calculated based upon the highest expected calendar-month average of the storage temperature. For vessels operated at ambient temperatures, the maximum true vapor pressure is calculated based upon the maximum local monthly average ambient temperature as reported by the National Weather Service.

2) For other liquids, the vapor pressure must be:

A) Determined by ASTM Method D 879-83, incorporated by reference at Section 218.112(a) ~~of this Part~~;

B) Measured by an appropriate method approved by the Agency and USEPA; or

C) Calculated by an appropriate method approved by the Agency and USEPA.

c) The owner or operator of each vessel storing a mixture of indeterminate or variable composition ~~shall~~ must be subject to the following:

1) ~~Prior to~~Before the initial filling of the vessel, the maximum true vapor pressure for the range of anticipated liquid compositions to be stored ~~will~~ mustbe determined using the methods ~~described~~ in subsection (b).

2) For vessels in which the vapor pressure of the anticipated liquid composition is 0.5 psia or greater but less than 0.75 psia, an initial physical test of the vapor pressure is required; then a physical test is required at least once every 6 months ~~thereafter is required as determined by~~using one of the following methods:

A) ASTM Method D 2879-83, incorporated by reference at Section 218.112(a) ~~of this Part~~;

B) ASTM Method D 323-08, incorporated by reference at Section 218.112(a) ~~of this Part~~; or

C) ~~As measured by an~~An appropriate method approved by the Agency.

d) The owner or operator of each vessel equipped with a closed vent system and control device meeting the specifications of Section 218.120 ~~of this Subpart~~ is exempt from the requirements of subsections (a) and (b).

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 218.129 Recordkeeping and Reporting for VOL Operations

The owner or operator of each storage vessel specified in Section 218.120(a) ~~of this Subpart shall~~must maintain records and furnish reports as required by subsection (a), (b), or (c) ~~below~~ as appropriate for the control equipment installed to meet the requirements of Section 218.120. The owner or operator ~~shall~~ must keep copies of all reports and records required by this Section, except for the records required by subsection (c)(1) ~~below~~, for at least 3 years. The records required by subsection (c)(1) ~~below shall~~must be kept for the life of the control equipment.

a) After installing control equipment in ~~accordance~~ compliance with Section 218.120(a)(1) or (2) ~~of this Subpart~~ (fixed roof and internal floating roof), the owner or operator ~~shall~~must:

1) Furnish the Agency with a report that describes the control equipment and certifies that the control equipment meets the specifications of Section 218.120(a)(1) and 218.127(a)(1) ~~of this Subpart~~;

2) Keep a record of each inspection performed as required by Section 218.127(a)(1), (a)(2), (a)(3), and (a)(4) ~~of this Subpart~~. Each record ~~shall~~ must identify the storage vessel on which the inspection was performed and ~~shall~~ must contain the date the vessel was inspected and the observed condition of each component of the control equipment (seals, internal floating roof, and fittings);

3) If any of the conditions ~~described~~ in Section 218.127(a)(2) ~~of this Subpart~~ are detected during the annual visual inspection required by Section 218.127(a)(2), report to the Agency within 30 days after the inspection the identity of the storage vessel, the nature of the defects, and the date the storage vessel was emptied or the nature of and date the repair was made; and

4) After each inspection required by Section 218.127(a)(3) ~~of this Subpart~~ where holes or tears in the seal or seal fabric, or defects in the internal floating roof, or other control equipment defects ~~listed~~ in Section 218.127(a)(3)(B) ~~of this Subpart~~ are discovered, report to the Agency within 30 days after the inspection the identity of the storage vessel and the reason it did not meet the specifications of Section 218.120(a)(1) or (2) or Section 218.127(a) ~~of this Subpart~~, and list each repair made.

b) After installing control equipment in ~~accordance~~ compliance with Section 218.120(a)(3) ~~of this Subpart~~ (external floating roof), the owner or operator ~~shall~~must:

1) Furnish the Agency with a report that describes the control equipment and certify that the control equipment meets the specifications of Sections 218.120(a)(3) and 218.127(b)(2), (b)(3), and (b)(4) ~~of this Subpart~~;

2) Within 60 days after performing the seal gap measurements required by Section 218.127(b)(1) ~~of this Subpart~~, furnish the Agency with a report that contains:

A) The date of measurement;

B) The raw data obtained in the measurement; and

C) The calculations ~~of this Subpart~~ described in Section 218.127(b)(2) and (b)(3) ~~of this Subpart~~;

3) Maintain records of each gap measurement performed as required by Section 218.127(b) ~~of this Subpart~~. ~~Such~~ The records ~~shall~~ must identify the storage vessel in which the measurement was performed and ~~shall~~ must contain:

A) The date of measurement;

B) The raw data obtained in the measurement; and

C) The calculations described in Section 218.127(b)(2) and (b)(3) ~~of this Subpart~~;

4) After each seal gap measurement that detects gaps exceeding the limitations ~~specified by~~at Section 218.127(b)(4) ~~of this Subpart~~, submit a report to the Agency within 30 days after the inspection identifying the vessel and containing the information ~~specified~~ in subsection (b)(2) ~~above~~ and the date the vessel was emptied or the repairs were made and the date of repair.

c) After installing control equipment in ~~accordance~~ compliance with Section 218.127(a)(4) or (b)(1) ~~of this Subpart~~ (closed vent system and control device other than a flare), the owner or operator ~~shall~~ must maintain ~~the following records~~:

1) A copy of the operating plan; and

2) The measured values of the parameters monitored in ~~accordance~~ compliance with Section 218.127(c)(2) ~~of this Subpart~~.

d) After installing a closed vent system and flare to comply with Section 218.127 ~~of this Subpart~~, the owner or operator ~~shall~~must:

1) Provide the Agency with a report containing the measurements required by 40 CFR 60.18(f)(1), (2), (3), (4), (5), and (6), incorporated by reference at Section 218.112(d) ~~of this Part~~, within 6 months after the initial start-up date;

2) Maintain records of all periods of operation during which the flare pilot flame is absent; and

3) Report semiannually all periods recorded under 40 CFR 60.115b(d)(2), incorporated by reference at Section 218.112(d) ~~of this Part~~, in which the pilot flame was absent.

e) The owner or operator ~~shall~~ must maintain all records required by this Section, except for the records required by subsection (f) ~~below~~, for at least 3 years. The records required by subsection (f) ~~below shall~~must be kept for the life of the source.

f) The owner or operator of each storage vessel specified in Section 218.119 ~~of this Subpart shall~~must maintain readily accessible records of the dimension of the storage vessel and an analysis of the capacity of the storage vessel. Each storage vessel with a design capacity less than 40,000 gallons is not subject to ~~no provisions of~~ this Part other than ~~those required by maintaining~~the requirement to maintain readily accessible records of the dimensions of the storage vessel and analysis of the capacity of the storage vessel.

g) Except as provided in Section 218.128(c) and (d) ~~of this Subpart~~, the owner or operator of each storage vessel subject to ~~the requirements in~~ Section 218.120 with a design capacity greater than or equal to 40,000 gallons storing a liquid with a maximum true vapor pressure greater than or equal to 0.5 psia but less than 0.75 psia ~~shall~~ must maintain a record of the VOL storage, the period of storage, and the maximum true vapor pressure of the VOL during the ~~respective~~ storage period.

(Source: Amended at 48 Ill. Reg._____, effective _____)

SUBPART C: ORGANIC EMISSIONS FROM MISCELLANEOUS EQUIPMENT

Section 218.141 Separation Operations

a) ~~No~~ A person ~~shall~~ must not use any single or multiple compartment effluent water separator which receives effluent water containing 757 1/day (200 gal/day) or more of organic material from any equipment processing, refining, treating, storing, or handling organic material unless ~~such~~ the effluent water separator is equipped with air pollution control equipment capable of reducing by 85 percent or more the uncontrolled organic material emitted to the atmosphere. Exception: If no odor nuisance exists, the limitations of this subsection ~~shall~~ do not apply if the vapor pressure of the organic material is below 17.24 kPa (2.5 psia) at ~~294.3°K (70°F)~~294.3 °K (70 °F).

b) Subsection (a) ~~of this Section shall~~must not apply to water and crude oil separation in the production of Illinois crude oil, if the vapor pressure of ~~such~~ the crude oil is less than 34.5 kPa (5 psia).

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 218.142 Pumps and Compressors

~~No~~ A person ~~shall~~ must not cause or allow the discharge of more than 32.8 ml (2 cu in) of VOL with vapor pressure of 17.24 kPa (2.5 psia) or greater at ~~294.3oK (70oF)~~294.3 ºK (70 ºF) into the atmosphere from any pump or compressor in any 15 minute period at standard conditions.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 218.143 Vapor Blowdown

~~No~~ A person ~~shall~~ must not cause or allow the emission of organic material into the atmosphere from any vapor blowdown system or any safety relief valve, except ~~such~~ safety relief valves not capable of causing an excessive release, unless ~~such~~ the emission is controlled:

a) To 10 ppm equivalent methane (molecular weight 16.0) or less; or,

b) By combustion in a smokeless flare; or,

c) By other air pollution control equipment approved by the Agency ~~according to the provisions of~~under 35 Ill. Adm. Code 201~~,~~ and ~~further~~ processed ~~consistent with~~under Section 218.108 ~~of this Part~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 218.144 Safety Relief Valves

Section 218.143 ~~of this Part shall~~must not apply to any set of unregulated safety relief valves capable of causing excessive releases~~, provided~~ if the owner or operator ~~thereof,~~ by October 1, 1972, supplied the Agency with ~~the following~~:

a) A historical record of each ~~such~~ set (or, if ~~such~~ the records were unavailable, of similar sets which, by virtue of operation under similar circumstances, may reasonably have been presumed to have the same or greater frequency of excessive releases) for a three-year period immediately preceding October 1, 1972, indicating:

1) Dates on which excessive releases occurred from each ~~such~~ set; and

2) Duration in minutes of each ~~such~~ excessive release; and

3) Quantities ~~(~~in pounds~~)~~ of mercaptans and/or hydrogen sulfide emitted into the atmosphere during each ~~such~~ excessive release;

b) Proof, using ~~such~~ three-year historical records, that no excessive release is likely to occur from any ~~such~~ set either alone or in combination with ~~such~~ excessive releases from other sets owned or operated by the same person and located within a ten-mile radius from the center point of any ~~such~~ set, more frequently than ~~3~~ three times in any ~~12 month~~12-month period;

c) Accurate maintenance records ~~pursuant to the requirements of~~under subsection (a) ~~of this Section~~; and

d) Proof, at three-year intervals, using ~~such~~ three-year historical records, that ~~such~~ the set conforms to ~~the requirements of~~ subsection (c) ~~of this Section~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

SUBPART E: SOLVENT CLEANING

Section 218.181 Solvent Cleaning Degreasing Operations

~~The requirements of~~ Sections 218.182, 218.183, 218.184, and 218.186 ~~of this Subpart shall~~must apply to all cold cleaning, open top vapor degreasing, and conveyorized degreasing operations which use volatile organic materials.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 218.182 Cold Cleaning

a) Operating Procedures: ~~No~~ A person ~~shall~~ must not operate a cold cleaning degreaser unless:

1) Waste solvent is stored in covered containers only and not disposed of in such a manner that more than 20% of the waste solvent (by weight) is allowed to evaporate into the atmosphere;

2) The cover of the degreaser is closed when parts are not being handled; and

3) Parts are drained until dripping ceases.

b) Equipment Requirements: ~~No~~ A person ~~shall~~ must not operate a cold cleaning degreaser unless:

1) The degreaser is equipped with a cover which is closed whenever parts are not being handled in the cleaner. The cover ~~shall~~ must be designed to be easily operated with one hand or with the mechanical assistance of springs, counter-weights, or a powered system if:

A) The solvent vapor pressure is greater than 2 kPa (15 mmHg or 0.3 psi) measured at ~~38°C (100°F)~~38 °C (100 °F);

B) The solvent is agitated; or

C) The solvent is heated above ambient room temperature.

2) The degreaser is equipped with a device for draining cleaned parts. The

drainage device ~~shall~~ must be constructed so that parts are enclosed under the cover while draining unless:

A) The solvent vapor pressure is less than 4.3 kPa (32 mmHg or 0.6 psi) measured at ~~38°C (100°F)~~38 °C (100 °F); or

B) An internal drainage device cannot be fitted into the cleaning system, in which case the drainage device may be external.

3) The degreaser is equipped with one of the following control devices if the vapor pressure of the solvent is greater than 4.3 kPa (32 mmHg or 0.6 psi) measured at ~~38°C (100°F)~~38 °C (100 °F) or if the solvent is heated above ~~50°C (120°F)~~50 °C (120 °F) or its boiling point:

A) A freeboard height of 7/10 of the inside width of the tank or 91 cm (36 in), whichever is less; or

B) Any other equipment or system of equivalent emission control as approved by the Agency and ~~further~~ processed ~~consistent with~~under Section 218.108 ~~of this Part~~. ~~Such a~~The system may include a water cover, refrigerated chiller, or carbon adsorber.

4) A permanent conspicuous label summarizing the operating procedure is affixed to the degreaser; and

5) If a solvent spray is used, the degreaser is equipped with a solid fluid stream spray, rather than a fine, atomized, or shower spray.

c) Material and Control Requirements:

1) On and after March 15, 1999, ~~no~~ a person ~~shall~~must not:

A) Cause or allow the sale of solvent with a vapor pressure which exceeds 2.0 mmHg (0.038 psi) measured at ~~20° C (68° F)~~20 °C (68 °F) in units greater than five gallons~~,~~ for use in cold cleaning degreasing operations ~~located~~ in the area ~~covered by~~described in Section 218.103 ~~of this Part~~.

B) Operate a cold cleaning degreaser with a solvent vapor pressure which exceeds 2.0 mmHg (0.038 psi) measured at ~~20° C (68° F)~~20 °C (68 °F).

2) On and after March 15, 2001, ~~no~~ a person ~~shall~~must not:

A) Cause or allow the sale of solvent with a vapor pressure which exceeds 1.0 mmHg (0.019 psi) measured at ~~20° C (68° F)~~20 °C (68

ºF) in units greater than five gallons~~,~~ for use in cold cleaning degreasing operations ~~located~~ in the area ~~covered by~~described in Section 218.103 ~~of this Part~~.

B) Operate a cold cleaning degreaser with a solvent vapor pressure which exceeds 1.0 mmHg (0.019 psi) measured at ~~20º C (68º F)~~20 ºC (68 ºF).

3) On and after May 30, 2007, ~~no~~ a person ~~shall~~must not:

A) Cause or allow the sale of solvent with a vapor pressure which exceeds 1.0 mmHg (0.019 psi) measured at ~~20º C (68º F)~~20 ºC (68 ºF) in units greater than five gallons~~,~~ for use in cold cleaning degreasing operations ~~located~~ in the area ~~covered by~~described in Section 218.103 ~~of this Part~~, unless the purchaser provides a copy of a valid State or federal construction or operating permit or a copy of the Federal Register demonstrating that the purchaser is in compliance with ~~the control requirements of~~ subsection (c)(4) ~~of this Section~~ or is exempt under subsection (f) or (g) ~~of this Section~~.

B) Operate a cold cleaning degreaser with a solvent vapor pressure which exceeds 1.0 mmHg (0.019 psi) measured at ~~20º C (68º F)~~20 ºC (68 ºF), unless the person is in compliance with ~~the control requirements of~~ subsection (c)(4) ~~of this Section~~ or is exempt under subsection (f) or (g) ~~of this Section~~.

4) Control Requirements:

A) A person may operate a cold cleaning degreaser using solvent with a vapor pressure greater than 1.0 mmHg (0.019 psi) but less than 56 mmHg (1.064 psi) measured at ~~20º C (68º F)~~20 ºC (68 ºF) ~~provided~~ if add-on control devices demonstrating at least 95 percent overall capture and control of emissions are used. The add-on controls may include~~, but are not limited to,~~ carbon adsorbers or afterburners.

B) An equivalent alternative control plan may be used to meet the control requirements of this Section ~~pursuant to~~under Section 218.108 ~~of this Part~~. ~~Pursuant to~~Under the material requirements of subsection (c)(3)(B) ~~of this Section~~, a solvent with a vapor pressure of 1.0 mmHg (0.019 psi) measured at ~~20º C (68º F)~~20 ºC (68 ºF) ~~shall~~ must be the basis for assessment of equivalent emissions from any equivalent alternative control plan. If used as an equivalent alternative control plan, an add-on control must demonstrate at least a 95 percent overall capture and control efficiency. A control plan approved by the Agency ~~shall~~ must be

effective only when included in a federally enforceable permit or approved by the USEPA as a SIP revision ~~pursuant to~~under Section 218.108 ~~of this Part~~.

C) Add-on controls operating at a source ~~prior to~~before May 30, 2007, ~~shall~~ must be tested by August 31, 2007. Add-on controls constructed on or after May 30, 2007, ~~shall~~ must be tested within 90 days after initial startup. Testing procedures and recordkeeping for add-on controls and equivalent alternative controls subject to subsections (c)(4)(A) and (B) ~~of this Section~~ are to be performed ~~pursuant to~~under Section 218.105 (c), (d), (e), and (f) ~~of this Part~~.

d) Recordkeeping and Reporting Requirements: On and after March 15, 1999:

1) All persons subject to ~~the requirements of~~ subsections (c)(1)(A), (c)(2)(A), and (c)(3)(A) ~~of this Section~~ must maintain records which include for each sale:

A) The name and address of the solvent purchaser;

B) The date of sale;

C) The type of solvent;

D) The unit volume of solvent;

E) The total volume of solvent; and

F) The vapor pressure of the solvent measured in mmHg at ~~20° C (68° F)~~20 ºC (68 ºF).

2) All persons subject to ~~the requirements of~~ subsections (c)(1)(B), (c)(2)(B), and (c)(3)(B) ~~of this Section~~ must maintain records which include for each purchase:

A) The name and address of the solvent supplier;

B) The date of purchase;

C) The type of solvent;

D) The vapor pressure of the solvent measured in mmHg at ~~20° C (68° F)~~20 ºC (68 ºF); and

E) For any mixture of solvents, the vapor pressure of the mixture, as used, measured in mmHg at ~~20° C (68° F)~~20 ºC (68 ºF).

3) All persons subject to ~~the requirements of~~ subsection (c)(4) ~~of this Section shall~~must maintain records~~,~~ which include for each purchase:

A) The name and address of the solvent supplier;

B) The date of purchase;

C) The type of solvent;

D) The unit volume of solvent;

E) The total volume of solvent;

F) The vapor pressure of the solvent measured in mmHg at ~~20° C (68° F)~~20 ºC (68 ºF); and

G) For any mixture of solvents, the vapor pressure of the mixture, as used, measured in mmHg at ~~20° C (68° F)~~20 ºC (68 ºF).

4) All persons subject to ~~the requirements of~~ subsection (c)(4) ~~of this Section shall~~must maintain records documenting the use of good operating practices consistent with the equipment manufacturer's specifications for the cold cleaning degreasers and add-on control equipment. At a minimum these records ~~shall~~ must include:

A) Records for periodic inspection of the cold cleaning degreasers and add-on control equipment with date of inspection, individual performing the inspection, and nature of inspection;

B) Records for repair of malfunctions and breakdowns with identification and description of incident, date identified, date repaired, nature of repair, and the amount of VOM that escaped into the atmosphere as a result of the incident;

C) Control device monitoring and recording data; and

D) A daily log of operating time for the control device, monitoring equipment, and all associated degreasers.

5) All persons subject to ~~the requirements of~~ subsection (c) ~~of this Section shall~~must notify the Agency at least 30 days before changing the method of compliance between subsection (c)(3) and (c)(4) ~~of this Section~~. ~~Such~~ The notification ~~shall~~ must include a demonstration of compliance with the newly applicable subsection.

6) All persons subject to ~~the requirements of~~ subsection (b) or (c) ~~of this Section shall~~must notify the Agency of any violation of subsection (b) or (c) ~~of this Section~~ by sending a description of the violation and copies of records documenting ~~such~~ the violations to the Agency within 30 days ~~following~~ after the occurrence of the violation.

e) All records required by subsection (d) ~~of this Section shall~~must be retained for three years and ~~shall~~ must be made available to the Agency upon request.

f) The cleaning of electronic components as defined in 35 Ill. Adm. Code ~~Section~~ 211.1885 is exempt from the requirements of subsection(c) ~~of this Section~~.

g) Any cold cleaning taking place in a Detrex cold batch degreaser Model #2D-CC-SPL Size 24-4-10, or substantial equivalent, including automated loading of parts~~,~~ and totally enclosed operation (excluding loading or unloading) and permitted by the Agency, is exempt from the requirements of subsection (c) ~~of this Section~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 218.183 Open Top Vapor Degreasing

a) Operating Requirements: ~~No~~ A person ~~shall~~ must not operate an open top vapor degreaser unless:

1) The cover of the degreaser is closed when workloads are not being processed through the degreaser;

2) Solvent carry out emissions are minimized by:

A) Racking parts to allow complete drainage;

B) Moving parts in and out of the degreaser at less than 3.3 m/min (11 ft/min);

C) Holding the parts in the vapor zone until condensation ceases;

D) Tipping out any pools of solvent on the cleaned parts before removal from the vapor zone; and

E) Allowing parts to dry within the degreaser until visually dry;

3) Porous or absorbent materials, such as cloth, leather, wood, or rope~~,~~ are not degreased;

4) Less than half of the degreaser's open top area is occupied with a workload;

5) The degreaser is not loaded to the point where the vapor level would drop more than 10 cm (4 in) when the workload is removed from the vapor zone;

6) Spraying is done below the vapor level only;

7) Solvent leaks are repaired immediately;

8) Waste solvent is stored in covered containers only and not disposed of in such a manner that more than 20% of the waste solvent (by weight) is allowed to evaporate into the atmosphere;

9) Water is not visually detectable in solvent exiting from the water separator; and

10) Exhaust ventilation exceeding 20 cubic meters per minute per square meter (65 cubic feet per minute per square foot) of degreaser open area is not used, unless necessary to meet the requirements of the Occupational Safety and Health Act (29 ~~U.S.C. Section~~USC 651 et seq.).

b) Equipment Requirements: ~~No~~ A person ~~shall~~ must not operate an open top vapor degreaser unless:

1) The degreaser is equipped with a cover designed to open and close easily without disturbing the vapor zone;

2) The degreaser is equipped with the following switches:

A) One which shuts off the sump heat if the amount of condenser coolant is not sufficient to maintain the designed vapor level; ~~and~~

B) One which shuts off the spray pump if the vapor level drops more than 10 cm (4 in) below the bottom condenser coil; and

C) One which shuts off the sump heat source when the vapor level exceeds the design level;

3) A permanent conspicuous label summarizing the operating procedure is affixed to the degreaser;

4) The degreaser is equipped with one of the following devices:

A) A freeboard height of 3/4 of the inside width of the degreaser tank or 91 cm (36 in), whichever is less; and if the degreaser opening is

greater than 1 square meter (10.8 square feet), a powered or mechanically assisted cover; or

B) Any other equipment or system of equivalent emission control ~~as~~ approved by the Agency and ~~further~~ processed ~~consistent with~~under Section 218.108 ~~of this Part~~. ~~Such~~ The equipment or system may include a refrigerated chiller, an enclosed design, or a carbon adsorption system.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 218.184 Conveyorized Degreasing

a) Operating Requirements: ~~No~~ A person ~~shall~~ must not operate a conveyorized degreaser unless:

1) Exhaust ventilation exceeding 20 cubic meters per minute per square meter (65 cubic feet per minute per square foot) of area of loading and unloading opening is not used, unless necessary to meet the requirements of the Occupational Safety and Health Act (29 ~~U.S.C. Section~~USC 651 et seq.);

2) Solvent carryout emissions are minimized by:

A) Racking parts for best drainage; and

B) Maintaining the vertical conveyor speed at less than 3.3 m/min (11 ft/min);

3) Waste solvent is stored in covered containers only and not disposed of in such a manner that more than 20% of the waste solvent (by weight) is allowed to evaporate into the atmosphere;

4) Solvent leaks are repaired immediately;

5) Water is not visually detectable in solvent exiting from the water separator; and

6) Downtime covers are placed over entrances and exits of conveyorized degreasers immediately after the conveyors and exhausts are shut down and not removed until just before start-up.

b) Equipment Requirements: ~~No~~ A person ~~shall~~ must not operate a conveyorized degreaser unless:

1) The degreaser is equipped with a drying tunnel, rotating (tumbling) basket, or other equipment sufficient to prevent cleaned parts from carrying out solvent liquid or vapor;

2) The degreaser is equipped with the following switches:

A) One which shuts off the sump heat source if the amount of condenser coolant is not sufficient to maintain the designed vapor level;

B) One which shuts off the spray pump or the conveyor if the vapor level drops more than 10 cm (4 in) below the bottom condenser coil; and

C) One which shuts off the sump heat source when the vapor level exceeds the design level.

3) The degreaser is equipped with openings for entrances and exits that silhouette workloads so that the average clearance between the parts and the edge of the degreaser opening is less than 10 cm (4 in) or less than 10 percent of the width of the opening;

4) The degreaser is equipped with downtime covers for closing off entrances and exits when the degreaser is shut down; and

5) The degreaser is equipped with one of the following control devices, if the air/vapor interface is larger than 2.0 square meters (21.6 square feet):

A) A carbon adsorption system with ventilation greater than or equal to 15 cubic meters per minute per square meter (50 cubic feet per minute per square foot) of air/vapor area when downtime covers are open, and exhausting less than 25 ppm of solvent by volume averaged over a complete adsorption cycle; or

B) Any other equipment or system of equivalent emission control ~~as~~ approved by the Agency~~,~~ and ~~further~~ processed ~~consistent with~~under Section 218.108 ~~of this Part~~. ~~Such~~ The equipment or system may include a refrigerated chiller.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 218.185 Compliance Schedule (Repealed)

(Source: Repealed at 17 Ill. Reg. 16636, effective September 27, 1993)

Section 218.186 Test Methods

The following test methods ~~shall~~ must be used to demonstrate compliance with this Subpart:

a) Vapor pressures ~~shall~~ must be determined by using the procedure ~~specified~~ in Section 218.110 ~~of this Part~~.

b) Exhaust ventilation rates ~~shall~~ must be determined by using the procedures ~~specified~~ in Section 218.105(f)(3) ~~of this Part~~.

c) The performance of control devices ~~shall~~ must be determined by using the procedures ~~specified~~ in Section 218.105(f) ~~of this Part~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 218.187 Other Industrial Solvent Cleaning Operations

a) Applicability. On and after January 1, 2012:

1) Except as provided in subsection (a)(2) ~~of this Section~~, the requirements of this Section ~~shall~~ apply to all cleaning operations that use organic materials at sources that emit a total of 226.8 kg per calendar month (500 lbs per calendar month) or more of VOM~~,~~ in the absence of air pollution control equipment~~,~~ from cleaning operations at the source other than cleaning operations identified in subsection (a)(2) ~~of this Section~~. For purposes of this Section, "cleaning operation" means the process of cleaning products, product components, tools, equipment, or general work areas during production, repair, maintenance, or servicing, including ~~but not limited to~~ spray gun cleaning, spray booth cleaning, large and small manufactured components cleaning, parts cleaning, equipment cleaning, line cleaning, floor cleaning, and tank cleaning~~,~~ at sources with emission units;

2) Notwithstanding subsection (a)(1) ~~of this Section~~:

A) The following cleaning operations ~~shall be~~are exempt from the requirements of subsections (b), (c), (d), (e), (f), and (g) ~~of this Section~~:

i) Cleaning operations subject to ~~the limitations in~~ Sections 218.182, 218.183, or 218.184;

ii) Janitorial cleaning;

iii) Stripping of cured coatings, inks, or adhesives;

iv) Cleaning operations in printing pre-press areas, including the cleaning of film processors, color scanners, plate processors, film cleaning, and plate cleaning;

B) Cleaning operations for emission units within the following categories ~~shall be~~are exempt from the requirements of subsections (b), (c), (d), (e), (f), and (g) ~~of this Section~~:

i) Flexible package printing;

ii) Lithographic printing;

iii) Letterpress printing;

iv) Flat wood paneling coating;

v) Large appliance coating;

vi) Metal furniture coating;

vii) Paper, film, and foil coating;

viii) Wood furniture coating;

ix) Plastic parts coating;

x) Miscellaneous metal parts coating;

xi) Fiberglass boat manufacturing;

xii) Miscellaneous industrial adhesives; and

xiii) Auto and light-duty truck assembly coating;

C) The following cleaning operations ~~shall be~~are exempt from the requirements of subsections (b), (c), (f), and (g) ~~of this Section~~:

i) Cleaning of solar cells, laser hardware, scientific instruments, and high-precision optics;

ii) Cleaning conducted as part of performance laboratory tests on coatings, adhesives, or inks; research and development operations; or laboratory tests in quality assurance laboratories;

iii) Cleaning of paper-based gaskets and clutch assemblies where rubber is bonded to metal by means of an adhesive;

iv) Cleaning of cotton swabs to remove cottonseed oil before cleaning of high-precision optics;

v) Cleaning of medical device and pharmaceutical manufacturing operations if the facility uses no more than 5.7 liters (1.5 gallons) per day of solvents for ~~such~~ that cleaning;

vi) Cleaning of adhesive application equipment used for thin metal laminating;

vii) Cleaning of electronic or electrical cables;

viii) Touch-up cleaning performed on printed circuit boards where surface mounted devices have already been attached;

ix) Cleaning of coating and adhesive application processes ~~utilized~~ used to manufacture transdermal drug delivery products using no more than three gallons per day of ethyl acetate;

x) Cleaning of application equipment used to apply coatings on satellites and radiation effect coatings;

xi) Cleaning of application equipment used to apply solvent-borne fluoropolymer coatings;

xii) Cleaning of ultraviolet or electron beam adhesive application;

xiii) Cleaning of sterilization indicating ink application equipment if the facility uses no more than 5.7 liters (1.5 gallons) per day of solvents for ~~such~~ that cleaning;

xiv) Cleaning of metering rollers, dampening rollers, and printing plates;

xv) Cleaning of numismatic dies;

xvi) Cleaning operations associated with digital printing;

xvii) Cleaning with aerosol products if the facility uses no more than 4.7 liters (1.25 gallons) per day of ~~such~~ those products;

xviii) Cleaning of plastic-based or vinyl-based substrates for use in the screen printing process when using UV curable ink and coating systems;

xix) Cleaning conducted as part of performance tests on coatings, adhesives, or inks that are in research and development and that are not yet commercially used for the applications for which they are being tested. This exemption is limited to the use of up to a total of 90.9 liters (24 gallons) of cleaning solvent per calendar month and 416.3 liters (110 gallons) per calendar year for such cleaning.

b) Material and Control Requirements. ~~No~~ An owner or operator of a source subject to this Section, other than manufacturers of coatings, inks, adhesives, or resins, ~~shall~~ must not perform any cleaning operation subject to this Section unless the owner or operator meets the requirements in subsection (b)(1), (b)(2), or (b)(3). ~~No~~ An owner or operator of a source that manufactures coatings, inks, adhesives, or resins ~~shall~~ must not perform any cleaning operation subject to this Section unless the owner or operator meets the requirements in at least one of the following subsections: (b)(1), (b)(2), (b)(3), (b)(4), or (b)(5).

1) The VOM content of the as-used cleaning solutions does not exceed the following emissions limitations:

A) Product cleaning during manufacturing process or surface preparation for coating, adhesive, or ink application:

		kg/l	lb/gal
i)	Electrical apparatus components and electronic components	0.10	0.83
ii)	Medical device and pharmaceutical manufacturing	0.80	6.7

B) Repair and maintenance cleaning:

		kg/l	lb/gal
i)	Electrical apparatus components and electronic components	0.10	0.83
ii)	Medical device and pharmaceutical manufacturing tools, equipment, and machinery	0.80	6.7

iii)	Medical device and pharmaceutical manufacturing general work surfaces	0.60	5.0

C) Cleaning of ink application equipment:

		kg/l	lb/gal
i)	Rotogravure printing that does not print flexible packaging	0.10	0.83
ii)	Screen printing, including screen reclamation activities	0.50	4.2
iii)	Ultraviolet ink and electron beam ink application equipment, except screen printing	0.65	5.4
iv)	Flexographic printing that does not print flexible packaging	0.10	0.83

		kg/l	lb/gal
D)	Cleaning of equipment used in the manufacture of coatings, inks, adhesives, or resins	0.20	~~1.67~~1.67

		~~kg/l~~kg/l	lb/gal
E)	All other cleaning operations not subject to a specific limitation in subsections (b)(1)(A) through (b)(1)(D) ~~of this Section~~	0.050	0.42

2) The VOM composite vapor pressure of each as-used cleaning solution used does not exceed 8.0 mmHg measured at ~~20°C (68°F)~~20 ºC (68 ºF);

3) An afterburner or carbon adsorber is installed and operated that reduces VOM emissions from the subject cleaning operation by at least 85 percent overall, or for sources that manufacture coatings, inks, adhesives, or resins, an afterburner or carbon adsorber is installed and operated that reduces VOM emissions from the subject cleaning operation by at least 80 percent overall and has a 90 percent efficiency. The owner or operator may use an emissions control system other than an afterburner or carbon adsorber if ~~such~~ the device reduces VOM emissions from the subject cleaning operation in compliance with the applicable capture and control requirements of this subsection (b)(3), the owner or operator submits a

plan to the Agency detailing appropriate monitoring devices, test methods, recordkeeping requirements, and operating parameters for ~~such~~ the control device, and ~~such~~ the plan is approved by the Agency and USEPA within federally enforceable permit conditions;

4) For sources that manufacture coatings, inks, adhesives, or resins, the owner or operator complies with the following work practices:

A) Equipment being cleaned is maintained leak-free;

B) VOM-containing cleaning materials are drained from the cleaned equipment upon ~~completion of~~completing cleaning;

C) VOM-containing cleaning materials, including waste solvent, are not stored or disposed of in ~~such~~ a manner that will cause or allow evaporation into the atmosphere; and

D) VOM-containing cleaning materials are stored in closed containers;

5) Sources that manufacture coatings, inks, adhesives, or resins may ~~utilize~~ use solvents that do not comply with subsection (b)(1) or (b)(2) ~~of this Section provided that~~if all of the following requirements are met:

A) No more than 228 l (60 gal) of fresh solvent is used per calendar month. Solvent that is reused or recycled, either onsite or offsite, for further use in equipment cleaning or in the manufacture of coatings, inks, adhesives, or resins, ~~shall~~ must not be included in this limit;

B) Solvents, including cleanup solvents, are collected and stored in closed containers; and

C) Records are maintained in ~~accordance~~ compliance with subsection (e)(6).

c) The owner or operator of a subject source ~~shall~~ must demonstrate compliance with this Section by using the applicable test methods and procedures ~~specified~~ in subsection (g) ~~of this Section~~ and by complying with the recordkeeping and reporting requirements ~~specified~~ in subsection (e) ~~of this Section~~.

d) Operating Requirements. The owner or operator of a source subject to ~~the requirements of~~ this Section ~~shall~~ must comply with the following for each subject cleaning operation. ~~Such~~ These requirements are in addition to work practices ~~set forth~~ in subsections (b)(4) and (b)(5) ~~of this Section~~, as applicable:

1) Cover open containers and properly cover and store applicators used to apply cleaning solvents;

2) Minimize air circulation around the cleaning operation;

3) Dispose of all used cleaning solutions, cleaning towels, and applicators used to apply cleaning solvents in closed containers;

4) ~~Utilize~~ Use equipment practices that minimize emissions;

5) When using cleaning solvent for wipe cleaning, sources that manufacture coatings, inks, adhesives, or resins shall:

A) Cover open containers used for the storage of spent or fresh organic compounds used for cleanup or coating, ink, adhesive, or resin removal; and

B) Cover open containers used for the storage or disposal of cloth or paper impregnated with organic compounds that are used for cleanup or coating, ink, adhesive, or resin removal.

e) Recordkeeping and Reporting Requirements

1) The owner or operator of a source exempt from ~~the limitations of~~ this Section because of the criteria in subsection (a)(1) ~~of this Section shall~~must comply with the following:

A) By January 1, 2012, or upon initial start-up of the source, whichever is later, submit a certification to the Agency that includes:

i) A declaration that the source is exempt from ~~the requirements of~~ this Section because of the criteria in subsection (a)(1);

ii) Calculations that demonstrate that combined emissions of VOM from cleaning operations at the source, other than cleaning operations ~~identified~~ in subsection (a)(2) ~~of this Section~~, never equal or exceed 226.8 kg/month (500 lbs/month)~~,~~ in the absence of air pollution control equipment. An emission adjustment factor of 0.50 ~~shall~~ must be used in calculating emissions from used shop towels if the VOM composite vapor pressure of each associated cleaning solution is demonstrated to be less than 10 mmHg at 20 ºC (68 ºF)~~20ºC (68°F)~~ and the used shop towels are kept in closed containers. For cleaning solutions

with VOM composite vapor pressures ~~of~~ equal to or greater than 10 mmHG measured at 20 ºC (68 ºF)~~20ºC (68°F)~~ and for shop towels that are not kept in closed containers, ~~no~~ an emission adjustment factor ~~shall~~ must not be used;

B) On and after January 1, 2012, collect and record the following information each month for each cleaning operation, other than cleaning operations ~~identified~~ in subsection (a)(2)~~ of this Section~~:

i) The name and identification of each VOM-containing cleaning solution as applied in each cleaning operation;

ii) The VOM content of each cleaning solution as applied in each cleaning operation;

iii) The weight of VOM per volume and the volume of each as-used cleaning solution; and

iv) The total monthly VOM emissions from cleaning operations at the source;

C) Notify the Agency of any record that shows that the combined emissions of VOM from cleaning operations at the source, other than cleaning operations ~~identified~~ in subsection (a)(2)~~ of this Section~~, ever equal or exceed 226.8 kg/month (500 lbs/month), in the absence of air pollution control equipment, within 30 days after the event occurs.

2) All sources subject to ~~the requirements of~~ this Section ~~shall~~must:

A) By January 1, 2012, or upon initial start-up of the source, whichever is later, submit a certification to the Agency that includes:

i) A declaration that all subject cleaning operations are in compliance with the requirements of this Section;

ii) Identification of each subject cleaning operation and each VOM-containing cleaning solution used as of the date of certification in ~~such~~ the operation;

iii) If complying with the emissions control system requirement, what type of emissions control system will be used;

iv) Initial documentation that each subject cleaning operation will comply with the applicable limitation, including copies of manufacturer's specifications, test results (if any), formulation data, and calculations;

v) Identification of the methods that will be used to demonstrate continuing compliance with the applicable limitations;

vi) A description of the practices and procedures that the source will follow to ensure compliance with ~~the limitations in~~ subsection (d)~~,~~ and, if applicable, subsection (b)(4); and

vii) A description of each cleaning operation exempt ~~pursuant to~~under subsection (a)(2), if any, and a listing of the emission units on which the exempt cleaning operation is performed;

B) At least 30 calendar days before changing the method of compliance between subsections (b)(1), (b)(2), (b)(4), or (b)(5) and subsection (b)(3) ~~of this Section~~, notify the Agency in writing of ~~such~~ the change. The notification ~~shall~~ must include a demonstration of compliance with the newly applicable subsection;

3) All sources complying with this Section ~~pursuant to the requirements of~~under subsection (b)(1) ~~of this Section shall~~must collect and record the following information for each cleaning solution used:

A) For each cleaning solution that is prepared at the source with automatic equipment:

i) The name and identification of each cleaning solution;

ii) The VOM content of each cleaning solvent in the cleaning solution;

iii) Each change to the setting of the automatic equipment, with date, time, description of changes in the cleaning solution constituents (e.g., cleaning solvents), and a description of changes to the proportion of cleaning solvent and water (or other non-VOM);

iv) The proportion of each cleaning solvent and water (or other non-VOM) used to prepare the as-used cleaning solution;

v) The VOM content of the as-used cleaning solution, with supporting calculations; and

vi) A calibration log for the automatic equipment, detailing periodic checks;

B) For each batch of cleaning solution that is not prepared at the source with automatic equipment:

i) The name and identification of each cleaning solution;

ii) Date, time of preparation, and each subsequent modification of the batch;

iii) The VOM content of each cleaning solvent in the cleaning solution;

iv) The total amount of each cleaning solvent and water (or other non-VOM) used to prepare the as-used cleaning solution; and

v) The VOM content of the as-used cleaning solution, with supporting calculations. For cleaning solutions that are not prepared at the site but are used as purchased, the manufacturer's specifications for VOM content may be used if ~~such~~ the manufacturer's specifications are based on results of tests of the VOM content conducted in ~~accordance~~ compliance with methods ~~specified~~ in Section 218.105(a) ~~of this Part~~;

4) All sources complying with this Section ~~pursuant to the requirements of~~under subsection (b)(2) ~~of this Section shall~~must collect and record the following information for each cleaning solution used:

A) The name and identification of each cleaning solution;

B) Date, time of preparation, and each subsequent modification of the batch;

C) The molecular weight, density, and VOM composite partial vapor pressure of each cleaning solvent, as determined in ~~accordance~~ complianxw with the applicable methods and procedures ~~specified~~ in Section 218.110 ~~of this Part~~;

D) The total amount of each cleaning solvent used to prepare the as-used cleaning solution; and

E) The VOM composite partial vapor pressure of each as-used cleaning solution, as determined in ~~accordance~~ compliance with the applicable methods and procedures ~~specified~~ in Section 218.110 ~~of this Part~~;

5) All sources complying with this Section ~~pursuant to the requirements of~~under subsection (b)(3) ~~of this Section shall~~must comply with the following:

A) By January 1, 2012, or upon initial start-up of the source, whichever is later, and upon initial start-up of a new emissions control system, include in the certification required by subsection (e)(3) ~~of this Section~~ a declaration that the monitoring equipment required under subsection (f) ~~of this Section~~ has been properly installed and calibrated according to manufacturer's specifications;

B) If testing of an emissions control system is conducted ~~pursuant to~~under subsection (g) ~~of this Section~~, the owner or operator ~~shall~~must, within 90 days after conducting ~~such~~ the testing, submit a copy of all test results to the Agency and ~~shall~~ must submit a certification to the Agency that includes the following:

i) A declaration that all tests and calculations necessary to demonstrate compliance with subsection (b)(3) ~~of this Section~~ have been properly performed;

ii) A statement whether the subject cleaning operation is or is not in compliance with subsection (b)(3) ~~of this Section~~; and

iii) The operating parameters of the emissions control system during testing, as monitored in ~~accordance~~ compliance with subsection (f) ~~of this Section~~;

C) Collect and record daily the following information for each cleaning operation subject to ~~the requirements of~~ subsection (b)(3) ~~of this Section~~:

i) Emissions control system monitoring data in ~~accordance~~ compliance with subsection (f) ~~of this Section~~, as applicable;

ii) A log of operating time for the emissions control system, monitoring equipment, and the associated cleaning equipment;

iii) A maintenance log for the emissions control system and monitoring equipment detailing all routine and non-routine maintenance performed, including dates and duration of any outages;

D) Maintain records documenting the use of good operating practices consistent with the equipment manufacturer's specifications for the cleaning equipment being used and the emissions control system equipment. At a minimum, these records ~~shall~~ must include:

i) Records for periodic inspection of the cleaning equipment and emissions control system equipment with date of inspection, individual performing the inspection, and nature of inspection;

ii) Records for repair of malfunctions and breakdowns with identification and description of incident, date identified, date repaired, nature of repair, and the amount of VOM released into the atmosphere as a result of the incident;

6) All sources complying with this Section ~~pursuant to the requirements of~~under subsection (b)(5) ~~of this Section shall~~must collect and record monthly the following information for each cleaning operation subject to ~~the requirements of~~ subsection (b)(5) ~~of this Section~~:

A) The name, identification, and volume of each VOM-containing cleaning solution as applied in each cleaning operation;

B) The volume of each fresh cleaning solvent used for cleaning coating, ink, adhesive, or resin manufacturing equipment;

C) The volume of cleaning solvent recovered for either offsite or onsite reuse or recycling for further use in the cleaning of coating, ink, adhesive, or resin manufacturing equipment;

7) The owner or operator of a source with cleaning operations that fall under one or more of the exclusions ~~set forth~~ in subsection (a)(2)(C)(v), (a)(2)(C)(xiii), or (a)(2)(C)(xvii), including sources exempt from ~~the limitations of~~ this Section ~~because of the criteria in~~under subsection (a)(1), ~~shall~~must:

A) By January 1, 2012, or upon initial start-up of the source, whichever is later, submit a certification to the Agency that includes a declaration that the source has cleaning operations that fall under one or more of the exclusions ~~set forth~~ in subsection

(a)(2)(C)(v), (a)(2)(C)(xiii), or (a)(2)(C)(xvii) and a statement identifying each such cleaning operation and the exclusion applicable to each cleaning operation;

B) Collect and record the name, identification, and volume of each cleaning solvent as applied each day in each cleaning operation that falls under one or more of the exclusions ~~set forth~~ in subsection (a)(2)(C)(v), (a)(2)(C)(xiii), or (a)(2)(C)(xvii); and

C) Notify the Agency in writing if the amount of cleaning solvent used in the cleaning of medical device and pharmaceutical manufacturing operations or of sterilization indicating ink application equipment at the source ever exceeds 5.7 liters (1.5 gallons) per day, or if the amount of aerosol cleaning products used at the source ever exceeds 4.7 liters (1.25 gallons) per day, within 30 days after the exceedance occurs;

8) The owner or operator of a source with cleaning operations that fall under one or more of the exclusions ~~set forth~~ in subsection (a)(2)(C)(xviii) or (a)(2)(C)(xix), including sources exempt from ~~the limitations of~~ this Section ~~because of the criteria in~~under subsection (a)(1), ~~shall~~must:

A) By January 1, 2012, or upon initial start-up of the source, whichever is later, submit a certification to the Agency that includes a declaration that the source has cleaning operations that fall under one or more of the exclusions ~~set forth~~ in subsection (a)(2)(C)(xviii) or (a)(2)(C)(xix), and a statement identifying each such cleaning operation and the exclusion applicable to each cleaning operation;

B) Collect and record the name, identification, volume, and VOM content of each cleaning solvent as applied each month in each cleaning operation that falls under one or more of the exclusions ~~set forth~~ in subsection (a)(2)(C)(xviii) or (a)(2)(C)(xix);

C) For cleaning operations that fall under the exclusion ~~set forth~~ in subsection (a)(2)(C)(xviii), collect and record each month information demonstrating that the exempt cleaning solvent is being used exclusively for the cleaning of plastic-based or vinyl-based substrates for use in the screen printing process when using UV curable ink and coating systems; and

D) For cleaning operations that fall under the exclusion ~~set forth~~ in subsection (a)(2)(C)(xix), collect and record each month information demonstrating that the exempt cleaning solvent is being used exclusively for production line performance testing of

coatings that are in research and development and are not yet commercially used for the applications for which they are being tested;

9) All sources subject to ~~the requirements of~~ subsections (b) and (d) ~~of this Section shall~~must notify the Agency of any violation of subsection (b) or (d) by providing a description of the violation and copies of records documenting the violation to the Agency within 30 days ~~following~~ after the occurrence of the violation;

10) All records required by this subsection (e) ~~shall~~ must be retained by the source for at least three years and ~~shall~~ must be made available to the Agency upon request.

f) Monitoring Requirements

1) If an afterburner is used to demonstrate compliance, the owner or operator of a source subject to subsection (b)(3) ~~of this Section shall~~must:

A) Install, calibrate, operate, and maintain temperature monitoring devices with an accuracy of 3 °C~~3°C~~ or 5 °F~~5°F~~ on the emissions control system in ~~accordance~~ compliance with Section 218.105(d)(2) ~~of this Part~~ and in ~~accordance~~ compliance with the manufacturer's specifications. Monitoring ~~shall~~ must be performed at all times when the emissions control system is operating; and

B) Install, calibrate, operate, and maintain~~,~~ in ~~accordance~~ compliance with manufacturer's specifications~~,~~ a continuous recorder on the temperature monitoring devices, such as a strip chart, recorder, or computer~~,~~ with at least the same accuracy as the temperature monitor;

2) If a carbon adsorber is used to demonstrate compliance, the owner or operator of a source subject to subsection (b)(3) ~~shall~~ must use Agency and USEPA approved continuous monitoring equipment that is installed, calibrated, maintained, and operated according to vendor specifications at all times the control device is in use. The continuous monitoring equipment ~~shall~~ must monitor the VOM concentration of each carbon adsorption bed or the exhaust of the bed next in sequence to be desorbed;

3) If an emissions control system other than an afterburner or carbon adsorber is used to demonstrate compliance, the owner or operator of a source subject to subsection (b)(3) ~~of this Section shall~~must install, maintain, calibrate, and operate ~~such~~ the monitoring equipment ~~as set forth in~~under the owner's or operator's plan approved by the Agency and USEPA ~~pursuant to~~under subsection (b)(3).

g) Testing Requirements

1) Testing to demonstrate compliance with ~~the requirements of~~ this Section ~~shall~~ must be conducted by the owner or operator within 90 days after a request by the Agency, or as otherwise specified in this Section. ~~Such~~ The testing ~~shall~~ must be conducted at the expense of the owner or operator, and the owner or operator ~~shall~~ must notify the Agency in writing 30 days ~~in advance of~~before conducting the testing to allow the Agency to be present during the testing;

2) Testing to demonstrate compliance with the VOM content limitations in subsection (b)(1) ~~of this Section,~~ and to determine the VOM content of cleaning solvents and cleaning solutions~~, shall~~ must be conducted as follows:

A) The applicable test methods and procedures ~~specified~~ in Section 218.105(a) ~~of this Part shall~~must be used~~, provided~~; however, Method 24, incorporated by reference in Section 218.112 ~~of this Part~~, ~~shall~~ must be used to demonstrate compliance; or

B) The manufacturer's specifications for VOM content for cleaning solvents may be used if ~~such~~ the manufacturer's specifications are based on results of tests of the VOM content conducted in ~~accordance~~ compliance with methods ~~specified~~ in Section 218.105(a) of this Part; ~~provided,~~ however, Method 24 ~~shall~~ must be used to determine compliance. In the event of any inconsistency between a Method 24 test and the manufacturer's specifications, the Method 24 test ~~shall~~ must govern;

3) Testing to determine the VOM composite partial vapor pressure of cleaning solvents, cleaning solvent concentrates, and as-used cleaning solutions ~~shall~~ must be conducted in ~~accordance~~ compliance with the applicable methods and procedures ~~specified~~ in Section 218.110 ~~of this Part~~;

4) For afterburners and carbon adsorbers, the methods and procedures of Section 218.105(d) through (f) ~~shall~~ must be used for testing to demonstrate compliance with ~~the requirements of~~ subsection (b)(3) ~~of this Section~~, as follows:

A) To select the sampling sites, Method 1 or 1A, as appropriate, 40 CFR 60, appendix A, incorporated by reference in Section 218.112 ~~of this Part~~;

B) To determine the volumetric flow rate of the exhaust stream, Method 2, 2A, 2C, or 2D, as appropriate, 40 CFR 60, appendix A, incorporated by reference in Section 218.112 ~~of this Part~~;

C) To determine the VOM concentration of the exhaust stream entering and exiting the emissions control system, Method 25 or 25A, as appropriate, 40 CFR 60, appendix A, incorporated by reference in Section 218.112 ~~of this Part~~. For thermal and catalytic afterburners, Method 25 must be used except under the following circumstances, in which case Method 25A must be used:

i) The allowable outlet concentration of VOM from the emissions control system is less than 50 ppmv, as carbon;

ii) The VOM concentration at the inlet of the emissions control system and the required level of control result in exhaust concentrations of VOM of 50 ppmv, or less, as carbon; and

iii) Due to the high efficiency of the emissions control system, the anticipated VOM concentration at the emissions control system exhaust is 50 ppmv or less, as carbon, regardless of inlet concentration. If the source elects to use Method 25A under this option, the exhaust VOM concentration must be 50 ppmv or less, as carbon, and the required destruction efficiency must be met for the source to have demonstrated compliance. If the Method 25A test results show that the required destruction efficiency apparently has been met, but the exhaust concentration is above 50 ppmv, as carbon, a retest is required. The retest ~~shall~~ must be conducted using either Method 25 or Method 25A. If the retest is conducted using Method 25A and the test results again show that the required destruction efficiency apparently has been met, but the exhaust concentration is above 50 ppmv, as carbon, the source must retest using Method 25;

D) During testing, the cleaning equipment ~~shall~~ must be operated at representative operating conditions and flow rates;

5) An owner or operator using an emissions control system other than an afterburner or carbon adsorber ~~shall~~ must conduct testing to demonstrate compliance with ~~the requirements of~~ subsection (b)(3) ~~of this Section as set forth in~~under the owner's or operator's plan approved by the Agency and USEPA as federally enforceable permit conditions ~~pursuant to~~under subsection (b)(3).

(Source: Amended at 48 Ill. Reg._____, effective _____)

SUBPART F: COATING OPERATIONS

Section 218.204 Emission Limitations

Except as provided in Sections 218.205, 218.207, 218.208, 218.212, 218.215, and 218.216 ~~of this Subpart~~, ~~no~~ an owner or operator of a coating line ~~shall~~ must not apply at any time any coating in which the VOM content exceeds the following emission limitations for the specified coating. Except as otherwise provided in subsections (a), (c), (g), (h), (j), (l), (n), (p), and (q) ~~of this Section~~, compliance with the emission limitations marked with an asterisk in this Section is required on and after March 15, 1996, and compliance with emission limitations not marked with an asterisk is required until March 15, 1996. The following emission limitations are expressed in units of VOM per volume of coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied at each coating applicator, except where noted. Compounds which are specifically exempted from the definition of VOM should be treated as water for the purpose of calculating the "less water" part of the coating composition. Compliance with this Subpart must be demonstrated through the applicable coating analysis test methods and procedures ~~specified~~ in Section 218.105(a) ~~of this Part~~ and the recordkeeping and reporting requirements ~~specified~~ in Section 218.211(c) ~~of this Subpart~~ except where noted. (Note: The equation ~~presented~~ in Section 218.206 ~~of this Part shall~~must be used to calculate emission limitations for determining compliance by add-on controls, credits for transfer efficiency, emissions trades, and cross-line averaging.) The emission limitations are as follows:

			kg/l	lb/gal
a)	Automobile or Light-Duty Truck Coating			
	1)	~~Prior to~~Before May 1, 2012:		
		A) Prime coat	0.14 0.14*	(1.2) (1.2)*
		B) Primer surface coat	1.81 1.81*	(15.1) (15.1)*

BOARD NOTE: The primer surface coat limitation is in units of kg (lbs) of VOM per l (gal) of coating solids deposited. Compliance with the limitation ~~shall~~ must be based on the daily-weighted average from an entire primer surfacer operation. Compliance ~~shall~~ must be demonstrated in ~~accordance~~ compliance with the topcoat protocol ~~referenced~~ in Section 218.105(b)(1)(A) and the recordkeeping and reporting requirements ~~specified~~ in Section 218.211(f). Testing to demonstrate compliance ~~shall~~ must be performed in ~~accordance~~ complaince with the topcoat protocol and a detailed testing proposal approved by the Agency and USEPA specifying the method of demonstrating compliance with the protocol. Section 218.205 does not apply to the primer surfacer limitation.

		kg/l	lb/gal
	C) Topcoat		

1.81	(15.1)
1.81*	(15.1)*

BOARD NOTE: The topcoat limitation is in units of kg (lbs) of VOM per l (gal) of coating solids deposited. Compliance with the limitation ~~shall~~ must be based on the daily-weighted average from an entire topcoat operation. Compliance ~~shall~~ must be demonstrated in ~~accordance~~ compliance with the topcoat protocol ~~referenced~~ in Section 218.105(b)(1)(A) ~~of this Part~~ and the recordkeeping and reporting requirements ~~specified~~ in Section 218.211(f). Testing to demonstrate compliance ~~shall~~ must be performed in ~~accordance~~ compliance with the topcoat protocol and a detailed testing proposal approved by the Agency and USEPA specifying the method of demonstrating compliance with the protocol. Section 218.205 ~~of this Part~~ does not apply to the topcoat limitation.

D)	Final repair coat	kg/l	lb/gal
		0.58	(4.8)
		0.58*	(4.8)*

2) On and after May 1, 2012, subject automobile and light-duty truck coating lines ~~shall~~ must comply with the following limitations. These limitations ~~shall~~ must not apply to materials supplied in containers with a net volume of 0.47 liters (16 oz) or less, or a net weight of 0.45 kg (1 lb) or less:

A) Electrodeposition primer (EDP) operations. For purposes of this subsection (a)(2)(A), "electrodeposition" means a water-borne dip coating process in which opposite electrical charges are applied to the substrate and the coating. The coating is attracted to the substrate due to the electrochemical potential difference that is created.

		kg VOM/l coating solids applied	lb VOM/gal coating solids applied
i)	When solids turnover ratio (R_T) is greater than or equal to 0.160	0.084	(0.7)
ii)	When R_T is greater than or equal to 0.040 and less than 0.160	$0.084 \times 350^{0.160-R_T}$	$(0.084 \times 350^{0.160-R_T} \times 8.34)$

B)	Primer surfacer operations	kg VOM/l coating	lb VOM/gal coating solids deposited

			solids deposited	
	i)	VOM content limitation	1.44	(12.0)

ii) Compliance with the limitation ~~set forth~~ in subsection (a)(2)(B)(i) ~~shall~~ must be based on the daily-weighted average from an entire primer surfacer operation. Compliance ~~shall~~ must be demonstrated in ~~accordance~~ compliance with the topcoat protocol ~~referenced~~ in Section 218.105(b)(1)(B) and the recordkeeping and reporting requirements ~~specified~~ in Section 218.211(f). Testing to demonstrate compliance ~~shall~~ must be performed in ~~accordance~~ compliance with the topcoat protocol and a detailed testing proposal approved by the Agency and USEPA specifying the method of demonstrating compliance with the protocol. Section 218.205 does not apply to the primer surfacer limitation.

C)	Topcoat operations		kg VOM/l coating solids deposited	lb VOM/gal coating solids deposited
	i)	VOM content limitation	1.44	(12.0)

ii) Compliance with the limitation ~~set forth~~ in subsection (a)(2)(C)(i) ~~shall~~ must be based on the daily-weighted average from an entire topcoat operation. Compliance ~~shall~~ must be demonstrated in ~~accordance~~ compliance with the topcoat protocol ~~referenced~~ in Section 218.105(b)(1)(B) and the recordkeeping and reporting requirements ~~specified~~ in Section 218.211(f). Testing to demonstrate compliance ~~shall~~ must be performed in ~~accordance~~ compliance with the topcoat protocol and a detailed testing proposal approved by the Agency and USEPA specifying the method of demonstrating compliance with the protocol. Section 218.205 does not apply to the topcoat limitation.

D)	Combined primer surfacer and topcoat operations		kg VOM/l coating solids deposited	lb VOM/gal coating solids deposited
	i)	VOM content limitation	1.44	(12.0)

ii) Compliance with the limitation ~~set forth~~ in subsection (a)(2)(D)(i) ~~shall~~ must be based on the daily-weighted average from the combined primer surfacer and topcoat operations. Compliance ~~shall~~ must be demonstrated in ~~accordance~~ compliance with the topcoat protocol ~~referenced~~ in Section 218.105(b)(1)(B) and the recordkeeping and reporting requirements ~~specified~~ in Section 218.211(f). Testing to demonstrate compliance ~~shall~~ must be performed in ~~accordance~~ compliance with the topcoat protocol and a detailed testing proposal approved by the Agency and USEPA specifying the method of demonstrating compliance with the protocol. Section 218.205 does not apply to the combined primer surfacer and topcoat limitation.

E)	Final repair coat operations	kg/l coatings	lb/gal coatings
	i) VOM content limitation	0.58	(4.8)

ii) Compliance with the final repair operations limitation ~~set forth~~ in subsection (a)(2)(E)(i) ~~shall~~ must be on an occurrence-weighted average basis, calculated in ~~accordance~~ compliance with the equation below, in which clear coatings ~~shall~~ must have a weighting factor of 2 and all other coatings ~~shall~~ must have a weighting factor of 1. For purposes of this subsection (a)(2)(E)(ii), an "occurrence" is the application of the combination of coatings that constitute a final repair coat for a single automobile or light-duty truck. Section 218.205 does not apply to the final repair coat limitation.

$$VOM_{tot} = \frac{2VOM_{cc} + \sum_{i=1}^{n} VOM_i}{n+2}$$

where:

VOM_{tot} = Total VOM content of all coatings, as applied, on an occurrence weighted average basis, and used to determine compliance with this subsection (a)(2)(E).

i = Subscript denoting a specific coating applied.

n = Total number of coatings applied in the final repair operation, other than clear coatings.

VOM_{cc} = The VOM content, as applied, of the clear coat used in the final repair operation.

VOM_i = The VOM content of each coating used in the final repair operation, as applied, other than clear coatings.

F) Miscellaneous Materials. For reactive adhesives subject to this subsection (a)(2)(F), compliance ~~shall~~ must be demonstrated in ~~accordance~~ compliance with the methods and procedures ~~set forth~~ in appendix A to Subpart PPPP of 40 CFR 63, incorporated by reference in Section 218.112 ~~of this Part~~.

		kg/l	lb/gal
i)	Glass bonding primer	0.90	(7.51)
ii)	Adhesive	0.25	(2.09)
iii)	Cavity wax	0.65	(5.42)
iv)	Trunk sealer	0.65	(5.42)
v)	Deadener	0.65	(5.42)
vi)	Gasket/gasket sealing material	0.20	(1.67)
vii)	Underbody coating	0.65	(5.42)
viii)	Trunk interior coating	0.65	(5.42)
ix)	Bedliner	0.20	(1.67)
x)	Weatherstrip adhesive	0.75	(6.26)
xi)	Lubricating wax/compound	0.70	(5.84)

			kg/l	lb/gal
b)	Can Coating			
	1)	Sheet basecoat and overvarnish		
		A) Sheet basecoat	0.34 0.26*	(2.8) (2.2)*

	B)	Overvarnish	0.34 0.34	(2.8) (2.8)*
2)	Exterior basecoat and overvarnish		0.34 0.25*	(2.8) (2.1)*
3)	Interior body spray coat			
	A)	Two piece	0.51 0.44*	(4.2) (3.7)*
	B)	Three piece	0.51 0.51*	(4.2) (4.2)*
4)	Exterior end coat		0.51 0.51*	(4.2) (4.2)*
5)	Side seam spray coat		0.66 0.66*	(5.5) (5.5)*
6)	End sealing compound coat		0.44 0.44*	(3.7) (3.7)*

c) Paper Coating

1)	~~Prior to~~Before May 1, 2011:		kg/l 0.28	lb/gal (2.3)
2)	On and after May 1, 2011, the owner or operator must comply with either the limit in weight of VOM per weight of solids applied or weight of VOM per weights of coatings applied:		kg VOM/kg (lb VOM/lb) solids applied	kg VOM/kg (lb VOM/lb) coatings applied
	A)	Pressure sensitive tape and label surface coatings	0.20 (0.20)	(0.067) (0.067)
	B)	All other paper coatings	0.40 (0.40)	(0.08) (0.08)

3) The paper coating limitation ~~set forth~~ in this subsection (c) ~~shall~~ does not apply to any owner or operator of any paper coating line on which flexographic, rotogravure, lithographic, or letterpress printing is performed if the paper coating line complies with the applicable

emissions limitations in Subpart H ~~of this Part~~. In addition, screen printing on paper is not regulated as paper coating~~,~~ but is regulated under Subpart TT ~~of this Part~~. On and after May 1, 2011, the paper coating limitation ~~shall~~ also does not apply to coating performed on or in-line with any digital printing press, or to size presses and on-machine coaters on papermaking machines applying sizing or water-based clays.

		kg/l	lb/gal
d)	Coil Coating	0.31 0.20*	(2.6) (1.7)*
e)	Fabric Coating	0.35 0.28*	(2.9) (2.3)*
f)	Vinyl Coating	0.45 0.28*	(3.8) (2.3)*
g)	Metal Furniture Coating		
	1) ~~Prior to~~Before May 1, 2011:	kg/l	lb/gal
	A) Air dried	0.34	(2.8)
	B) Baked	0.28	(2.3)
	2) On and after May 1, 2011, the owner or operator must comply with either the limit in weight of VOM per volume of coatings applied or weight of VOM per volume of solids applied:	kg/l (lb/gal) (coatings applied)	kg/l (lb/gal) solids applied
	A) General, One-Component	0.275 (2.3)	0.40 (3.3)
	B) General, Multi-Component		
	i) Air dried	0.340 (2.8)	0.55 (4.5)
	ii) Baked	0.275 (2.3)	0.40 (3.3)
	C) Extreme High Gloss		

i) Air dried	0.340 (2.8)	0.55 (4.5)
ii) Baked	0.360 (3.0)	0.61 (5.1)
D) Extreme Performance		
i) Air dried	0.420 (3.5)	0.80 (6.7)
ii) Baked	0.360 (3.0)	0.61 (5.1)
E) Heat Resistant		
i) Air dried	0.420 (3.5)	0.80 (6.7)
ii) Baked	0.360 (3.0)	0.61 (5.1)
F) Metallic	0.420 (3.5)	0.80 (6.7)
G) Pretreatment Coatings	0.420 (3.5)	0.80 (6.7)
H) Solar Absorbent		
i) Air dried	0.420 (3.5)	0.80 (6.7)
ii) Baked	0.360 (3.0)	0.61 (5.1)

3) On and after May 1, 2011, the limitations ~~set forth~~ in this subsection (g) ~~shall~~ do not apply to stencil coatings, safety-indicating coatings, solid-film lubricants, electric-insulating and thermal-conducting coatings, touch-up and repair coatings, or coating applications ~~utilizing~~ using hand-held aerosol cans.

h) Large Appliance Coating

1) ~~Prior to~~Before May 1, 2011:	kg/l	lb/gal

	A)	Air dried	0.34	(2.8)
	B)	Baked	0.28	(2.3)
2)	On and after May 1, 2011, the owner or operator must comply with either the limit in weight of VOM per volume of coatings applied or weight of VOM per volume of solids applied:		kg/l (lb/gal) (coatings applied)	kg/l (lb/gal) solids applied
	A)	General, One Component	0.275 (2.3)	0.40 (3.3)
	B)	General, Multi-Component		
		i) Air dried	0.340 (2.8)	0.55 (4.5)
		ii) Baked	0.275 (2.3)	0.40 (3.3)
	C)	Extreme High Gloss		
		i) Air dried	0.340 (2.8)	0.55 (4.5)
		ii) Baked	0.360 (3.0)	0.61 (5.1)

	B)	Baked	0.36 0.36	(3.0) (3.0)*

7) Definitions

A) For purposes of subsection (j)(5) ~~of this Section~~, the following terms are defined:

i) "Corrosion resistant basecoat" means, for purposes of subsection (j)(5)(B)(ii) ~~of this Section~~, a water-borne epoxy coating applied via an electrodeposition process to a metal surface ~~prior to~~before spray coating~~,~~ for the purpose of enhancing corrosion resistance.

ii) "Electrodeposition process" means, for purposes of subsection (j)(5) ~~of this Section~~, a water-borne dip coating process in which opposite electrical charges are applied to the substrate and the coating. The coating is attracted to the substrate due to the electrochemical potential difference that is created.

iii) "Marine engine coating" means, for purposes of subsection (j)(5) ~~of this Section~~, any extreme performance protective, decorative, or functional coating applied to an engine that is used to propel watercraft.

B) For purposes of subsection (j)(6) ~~of this Section~~, "metallic coating" means a coating which contains more than ¼ lb/gal of metal particles, as applied.

BOARD NOTE: On and after May 1, 2012, the limitations in Section 218.204(q) ~~shall~~ apply to this category of coating.

		kg/l	lb/gal
k)	Heavy Off-Highway Vehicle Products Coating		
1)	Extreme performance prime coat	0.42	(3.5)
		0.42*	(3.5)*
2)	Extreme performance topcoat (air dried)	0.42	(3.5)
		0.42*	(3.5)*
3)	Final repair coat (air dried)	0.42	(3.5)
		0.42*	(3.5)*

4) All other coatings are subject to the emission limitations for miscellaneous metal parts and products coatings in subsection (j).

l) Wood Furniture Coating

			kg/l	lb/gal
1)	Limitations before March 15, 1998:			
	A)	Clear topcoat	0.67	(5.6)
	B)	Opaque stain	0.56	(4.7)
	C)	Pigmented coat	0.60	(5.0)
	D)	Repair coat	0.67	(5.6)
	E)	Sealer	0.67	(5.6)
	F)	Semi-transparent stain	0.79	(6.6)
	G)	Wash coat	0.73	(6.1)

BOARD NOTE: ~~Prior to~~Before March 15, 1998, an owner or operator of a wood furniture coating operation subject to this Section ~~shall~~ must apply all coatings, with the exception of no more than 37.8 l (10 gal) of coating per day used for touch-up and repair operations, using one or more of the following application systems: airless spray application system, air-assisted airless spray application system, electrostatic spray application system, electrostatic bell or disc spray application system,

heated airless spray application system, roller coating, brush or wipe coating application system, dip coating application system, or high volume low pressure (HVLP) application system.

2) On and after March 15, 1998, wood furniture sealers and topcoats must comply with one of the limitations specified in subsections (l)(2)(A) through (E):

		kg VOM/ kg solids	lb VOM/ lb solids
A)	Topcoat	0.8	(0.8)
B)	Sealers and topcoats with the following limits:		
i)	Sealer other than acid-cured alkyd amino vinyl sealer	1.9	(1.9)
ii)	Topcoat other than acid-cured alkyd amino conversion varnish topcoat	1.8	(1.8)
iii)	Acid-cured alkyd amino vinyl sealer	2.3	(2.3)
iv)	Acid-cured alkyd amino conversion varnish topcoat	2.0	(2.0)

C) Meet the provisions of Section 218.215 ~~of this Subpart~~ for use of an averaging approach;

D) Achieve a reduction in emissions equivalent to the requirements of subsection (l)(2)(A) or (B) ~~of this Section~~, as calculated using Section 218.216 ~~of this Subpart~~; or

E) Use a combination of the methods ~~specified~~ in subsections (l)(2)(A) through (D) ~~of this Section~~.

3) Other wood furniture coating limitations on and after March 15, 1998:

		kg/l	lb/gal
A)	Opaque stain	0.56	(4.7)

B)	Non-topcoat pigmented coat	0.60	(5.0)
C)	Repair coat	0.67	(5.6)
D)	Semi-transparent stain	0.79	(6.6)
E)	Wash coat	0.73	(6.1)

4) Other wood furniture coating requirements on and after March 15, 1998:

A) ~~No~~ A source subject to the limitations of subsection (l)(2) or (3) ~~of this Section~~ and ~~utilizing~~ using one or more wood furniture coating spray booths ~~shall~~ must not use strippable spray booth coatings containing more than 0.8 kg VOM/kg solids (0.8 lb VOM/lb solids), as applied.

B) Any source subject to the limitations of subsection (l)(2) or (3) ~~of this Section shall~~must comply with ~~the requirements of~~ Section 218.217 ~~of this Subpart~~.

C) Any source subject to the limitations of subsection (l)(2)(A) or (B) ~~of this Section~~ and ~~utilizing~~ using one or more continuous coaters ~~shall~~must, for each continuous coater, use an initial coating which complies with the limitations of subsection (l)(2)(A) or (B) ~~of this Section~~. The viscosity of the coating in each reservoir ~~shall~~ must always be greater than or equal to the viscosity of the initial coating in the reservoir. The owner or operator ~~shall~~must:

i) Monitor the viscosity of the coating in the reservoir with a viscosity meter or by testing the viscosity of the initial coating and retesting the coating in the reservoir each time solvent is added;

ii) Collect and record the reservoir viscosity and the amount and weight of VOM per weight of solids of coating and solvent each time coating or solvent is added; and

iii) Maintain these records at the source for ~~a period of~~ three years.

m)	Existing Diesel-Electric Locomotive Coating Lines in Cook County	kg/l	lb/gal

		iv) Color coat (others)	0.61*	(5.1)*
	3)	Specialty		
		A) Vacuum metallizing basecoats, texture base coats	0.66*	(5.5)*
		B) Black coatings, reflective argent coatings, air bag cover coatings, and soft coatings	0.71*	(5.9)*
		C) Gloss reducers, vacuum metallizing topcoats, and texture topcoats	0.77*	(6.4)*
		D) Stencil coatings, adhesion primers, ink pad coatings, electrostatic prep coatings, and resist coatings	0.82*	(6.8)*
		E) Headlamp lens coatings	0.89*	(7.4)*

BOARD NOTE: On and after May 1, 2012, the limitations in Section ~~218.240(q) shall~~218.204(q) apply to this category of coating.

o)		~~Prior to~~Before May 1, 2012: Plastic Parts Coating: Business Machine	kg/l	lb/gal
	1)	Primer	0.14*	(1.2)*
	2)	Color coat (non-texture coat)	0.28*	(2.3)*
	3)	Color coat (texture coat)	0.28*	(2.3)*
	4)	Electromagnetic interference/radio frequency interference (EMI/RFI) shielding coatings	0.48*	(4.0)*
	5)	Specialty coatings		
		A) Soft coat	0.52*	(4.3)*
		B) Plating resist	0.71*	(5.9)*

C)	Plating sensitizer	0.85*	(7.1)*

BOARD NOTE: On and after May 1, 2012, the limitations in Section 218.204(q) ~~shall~~ apply to this category of coating.

p) Flat Wood Paneling Coatings. On and after August 1, 2010, flat wood paneling coatings ~~shall~~ muist comply with one of the following limitations:

1) 0.25 kg VOM/1 of coatings (2.1 lb VOM/gal coatings); or

2) 0.35 kg VOM/1 solids (2.9 lb VOM/gal solids).

q) Miscellaneous Metal Parts and Products Coatings and Plastic Parts and Products Coatings On and After May 1, 2012. On and after May 1, 2012, the owner or operator of a miscellaneous metal or plastic parts coating line ~~shall~~ must comply with the limitations in this subsection (q). The limitations in this subsection (q) ~~shall~~ do not apply to ~~aerosol coating products, powder coatings, or~~ primer sealants and ejection cartridge sealants used in ammunition manufacturing, aerosol coating products, or powder coatings. Primer sealants and ejection cartridge sealants ~~shall instead be~~are regulated under Subpart TT ~~of this Part~~.

1) Metal Parts and Products. For purposes of this subsection (q)(1), "corrosion resistant basecoat" means a water-borne epoxy coating applied via an electrodeposition process to a metal surface ~~prior to~~before spray coating~~,~~ for the purpose of enhancing corrosion resistance. The limitations in this subsection (q)(1) ~~shall~~ do not apply to stencil coats, safety-indicating coatings, solid-film lubricants, electric-insulating and thermal-conducting coatings, magnetic data storage disk coatings, and plastic extruded onto metal parts to form a coating. The limitations in Section 218.219~~, however, shall~~ apply to these coatings unless specifically excluded in Section 218.219. The owner or operator must comply with either the limit in weight of VOM per volume of coatings applied or weight of VOM per volume of solids applied.

2) Plastic Parts and Products: Miscellaneous. For purposes of this subsection (q)(2), miscellaneous plastic parts and products are plastic parts and products that are not subject to subsection (q)(3), (q)(4), (q)(5), or (q)(6) ~~of this Section~~. The limitations in subsection (q)(2) ~~shall~~ do not apply to touch-up and repair coatings; stencil coats applied on clear or transparent substrates; clear or translucent coatings; coatings applied at a paint manufacturing facility while conducting performance tests on the coatings; any individual coating category used in volumes less than 189.2 liters (50 gallons) in any one calendar year, if the total usage of all such coatings does not exceed 756.9 liters (200 gallons) per calendar year per source and substitute compliant coatings are not available; reflective coatings applied to highway cones; mask coatings that are less than 0.5 mm thick (dried) if the area coated is less than 25 square inches; electromagnetic interference/radio frequency interference (EMI/RFI) shielding coatings; and heparin-benzalkonium chloride (HBAC)-containing coatings applied to medical devices if the total usage of all such coatings does not exceed 378.4 liters (100 gallons) per calendar year per source. The limitations in Section 218.219~~, however, shall~~ apply to ~~such~~ these coatings unless specifically excluded in Section 218.219. The owner or operator must comply with either the limit in weight of VOM per volume of coatings applied or weight of VOM per volume of solids applied.

Section 218.205 Daily-Weighted Average Limitations

~~No~~ An owner or operator of a coating line subject to the limitations of Section 218.204 ~~of this Subpart~~ and complying by means of this Section ~~shall~~ must not operate the subject coating line unless the owner or operator has demonstrated compliance with subsection (a), (b), (c), (d), (e), (f), (g), (h), (i), (j), or (k) ~~of this Section~~ (depending upon the category of coating) through the applicable coating analysis test methods and procedures ~~specified~~ in Section 218.105(a) ~~of this Part~~ and the recordkeeping and reporting requirements ~~specified~~ in Section 218.211(d) ~~of this Subpart~~:

a) ~~No~~ An owner or operator of a coating line subject to only one of the limitations from among Section 218.204(a)(1)(A), (a)(1)(D), (a)(2)(A), (a)(2)(E), (a)(2)(F), (c)(1), (d), (e), (f), (i), or (p) ~~of this Subpart shall~~must not apply coatings on any such coating line~~,~~ during any day~~,~~ whose daily-weighted average VOM content exceeds the emission limitation to which the coatings are subject.

b) ~~Prior to~~Before May 1, 2012, ~~no~~ an owner or operator of a miscellaneous metal parts and products coating line subject to the limitations of Section 218.204(j) ~~of this Subpart shall~~must not apply coatings to miscellaneous metal parts or products on the subject coating line unless the requirements in subsection (b)(1) or (b)(2) ~~of this Section~~ are met.

1) For each coating line which applies multiple coatings, all of which are subject to the same numerical emission limitation within Section 218.204(j) during the same day (e.g., all coatings used on the line are subject to 0.42 kg/l (3.5 lbs/gal)), the daily-weighted average VOM content ~~shall~~ must not exceed the coating VOM content limit corresponding to the category of coating used; or

2) For each coating line which applies coatings subject to more than one numerical emission limitation in Section 218.204(j) ~~of this Subpart~~, during the same day, the owner or operator ~~shall~~ must have a site-specific proposal approved by the Agency and approved by the USEPA as a SIP revision. To receive approval, the requirements of USEPA's Emissions Trading Policy Statement (and related policy), 51 Fed. Reg. 43814 (December 4, 1986), must be satisfied.

c) ~~No~~ An owner or operator of a can coating line subject to the limitations of Section 218.204(b) ~~of this Subpart shall~~must not operate the subject coating line using a coating with a VOM content in excess of the limitations ~~specified~~ in Section 218.204(b) ~~of this Subpart~~ unless all of the following requirements are met:

1) An alternative daily emission limitation ~~shall be determined~~ for the can coating operation, i.e., for all of the can coating lines at the source, must be determined according to subsection (c)(2) ~~of this Section~~. Actual daily emissions ~~shall~~ must never exceed the alternative daily emission limitation and ~~shall~~ must be calculated by use of the following equation.

$$E_d = \sum_{i=1}^{n} V_i C_i$$

where:

E_d = Actual VOM emissions for the day in units of kg/day (lbs/day);

i = Subscript denoting a specific coating applied;

n = Total number of coatings applied in the can coating operation, i.e., all can coating lines at the source;

V_i = Volume of each coating applied for the day in units of l/day (gal/day) of coating (minus water and any compounds that are specifically exempted from the definition of VOM);

C_i = The VOM content of each coating as applied in units of kg VOM/l (lbs VOM/gal) of coating (minus water and any compounds that are specifically exempted from the definition of VOM).

2) The alternative daily emission limitation (A_d) ~~shall~~ must be determined for the can coating operation, i.e., for all of the can coating lines at the source, on a daily basis as follows:

$$A_d = \sum_{i=1}^{n} V_i L_i \left(\frac{D_i - C_i}{D_i - L_i} \right)$$

where:

A_d = The VOM emissions allowed for the day in units of kg/day (lbs/day);

i = Subscript denoting a specific coating applied;

n = Total number of surface coatings applied in the can coating operation;

C_i = The VOM content of each surface coating as applied in units of kg VOM/l (lbs VOM/gal) of coating (minus water and any compounds that are specifically exempted from the definition of VOM);

D_i = The density of VOM in each coating applied. For the purposes of calculating A_d, the density is 0.882 kg VOM/l VOM (7.36 lbs VOM/gal VOM);

V_i = Volume of each surface coating applied for the day in units of l (gal) of coating (minus water and any compounds that are specifically exempted from the definition of VOM);

L_i = The VOM emission limitation for each surface coating applied as specified in Section 218.204(b) ~~of this Subpart~~ in units of kg VOM/l (lbs VOM/gal) of coating (minus water and any compounds that are specifically exempted from the definition of VOM).

d) ~~No~~ An owner or operator of a heavy off-highway vehicle products coating line subject to the limitations of Section 218.204(k) ~~of this Subpart shall~~must not apply coatings to heavy off-highway vehicle products on the subject coating line unless the requirements of subsection (d)(1) or (d)(2) ~~of this Section~~ are met.

1) For each coating line which applies multiple coatings, all of which are subject to the same numerical emission limitation within Section 218.204(k) ~~of this Subpart,~~ during the same day (e.g., all coatings used on the line are subject to 0.42 kg/l (3.5 lbs/gal)), the daily-weighted average VOM content ~~shall~~ must not exceed the coating VOM content limit corresponding to the category of coating used: or

2) For each coating line which applies coatings subject to more than one numerical emission limitation in Section 218.204(k) ~~of this Subpart~~, during the same day, the owner or operator ~~shall~~ must have a ~~site~~

~~specific~~site-specific proposal approved by the Agency and approved by the USEPA as a SIP revision. To receive approval, the requirements of USEPA's Emissions Trading Policy Statement (and related policy), 51 Fed. Reg. 43814 (December 4, 1986), must be satisfied.

e) ~~No~~ An owner or operator of a wood furniture coating line subject to the limitations of Section 218.204(l)(1) or (l)(3) ~~of this Subpart shall~~must not apply coatings to wood furniture on the subject coating line unless the requirements of subsection (e)(1) or subsection (e)(2) ~~of this Section~~, in addition to the requirements ~~specified~~ in the note to Section 218.204(l)(1) ~~of this Subpart~~, are met.

1) For each coating line which applies multiple coatings, all of which are subject to the same numerical emission limitation within Section 218.204(l)(1) or (l)(3) ~~of this Subpart,~~ during the same day (e.g., all coatings used on the line are subject to 0.67 kg/l (5.6 lbs/gal)), the daily-weighted average VOM content ~~shall~~ must not exceed the coating VOM content limit corresponding to the category of coating used; or

2) For each coating line which applies coatings subject to more than one numerical emission limitation in Section 218.204(l)(1) or (l)(3) ~~of this Subpart~~, during the same day, the owner or operator ~~shall~~ must have a ~~site specific~~site-specific proposal approved by the Agency and approved by the USEPA as a SIP revision. To receive approval, the requirements of USEPA's Emissions Trading Policy Statement (and related policy), 51 Fed. Reg. 43814 (December 4, 1986), must be satisfied.

f) ~~No~~ An owner or operator of an existing diesel-electric locomotive coating line in Cook County, subject to the limitations of Section 218.204(m) ~~of this Subpart shall~~must not apply coatings to diesel-electric locomotives on the subject coating line unless the requirements of subsection (f)(1) or (f)(2) ~~of this Section~~ are met.

1) For each coating line which applies multiple coatings, all of which are subject to the same numerical emission limitation within Section 218.204(m) ~~of this Subpart,~~ during the same day (e.g., all coatings used on the line are subject to 0.42 kg/l (3.5 lbs/gal)), the daily-weighted average VOM content ~~shall~~ must not exceed the coating VOM content limit corresponding to the category of coating used; or

2) For each coating line which applies coatings subject to more than one numerical emission limitation in Section 218.204(m) ~~of this Subpart~~, during the same day, the owner or operator ~~shall~~ must have a ~~site specific~~site-specific proposal approved by the Agency and approved by the USEPA as a SIP revision. To receive approval, the requirements of USEPA's Emissions Trading Policy Statement (and related policy), 51 Fed. Reg. 43814 (December 4, 1986), must be satisfied.

g) ~~Prior to~~Before May 1, 2012, ~~no~~ an owner or operator of a plastic parts coating line, subject to the limitations of Section 218.204(n) or (o) ~~of this Subpart shall~~must not apply coatings to business machine or automotive/transportation plastic parts on the subject coating line unless the requirements of subsection (g)(1) or (g)(2) ~~of this Section~~ are met:

1) For each coating line which applies multiple coatings, all of which are subject to the same numerical emission limitation within Section 218.204(n) or (o) ~~of this Subpart,~~ during the same day (e.g., all coatings used on the line are subject to 0.42 kg/l (3.5 lbs/gal)), the daily-weighted average VOM content ~~shall~~ must not exceed the coating VOM content limit corresponding to the category of coating used; or

2) For each coating line which applies coatings subject to more than one numerical emission limitation in Section 218.204(n) or (o) ~~of this Subpart~~, during the same day, the owner or operator ~~shall~~ must have a ~~site specific~~site-specific proposal approved by the Agency and approved by the USEPA as a SIP revision. To receive approval, the requirements of USEPA's Emissions Trading Policy Statement (and related policy), 51 Fed. Reg. 43814 (December 4, 1986), must be satisfied.

h) ~~No~~ An owner or operator of a metal furniture coating line~~,~~ subject to the limitations of Section 218.204(g) ~~of this Subpart shall~~must not apply coatings on the subject coating line unless the requirements of subsection (h)(1) or (h)(2) ~~of this Section~~ are met:

1) For each coating line which applies multiple coatings, all of which are subject to the same numerical emission limitation within Section 218.204(g) ~~of this Subpart,~~ during the same day (e.g., all coatings used on the line are subject to 0.34 kg/l (2.8 lbs/gal)), the daily-weighted average VOM content ~~shall~~ must not exceed the coating VOM content limit corresponding to the category of coating used; or

2) For each coating line which applies coatings subject to more than one numerical emission limitation in Section 218.204(g) ~~of this Subpart~~, during the same day, the owner or operator ~~shall~~ must have a ~~site specific~~site-specific proposal approved by the Agency and approved by the USEPA as a SIP revision. To receive approval, the requirements of USEPA's Emissions Trading Policy Statement (and related policy), 51 Fed. Reg. 43814 (December 4, 1986), must be satisfied.

i) ~~No~~ An owner or operator of a large appliance coating line, subject to the limitations of Section 218.204(h) ~~of this Subpart shall~~must not apply coatings on the subject coating line unless the requirements of subsection (i)(1) or (i)(2) ~~of this Section~~ are met:

1) For each coating line which applies multiple coatings, all of which are subject to the same numerical emission limitation within Section 218.204(h) ~~of this Subpart,~~ during the same day (e.g., all coatings used on the line are subject to 0.34 kg/l (2.8 lbs/gal)), the daily-weighted average VOM content ~~shall~~ must not exceed the coating VOM content limit corresponding to the category of coating used; or

2) For each coating line which applies coatings subject to more than one numerical emission limitation in Section 218.204(h) ~~of this Subpart~~, during the same day, the owner or operator ~~shall~~ must have a ~~site specific~~site-specific proposal approved by the Agency and approved by the USEPA as a SIP revision. To receive approval, the requirements of USEPA's Emissions Trading Policy Statement (and related policy), 51 Fed. Reg. 43814 (December 4, 1986), must be satisfied.

j) On and after May 1, 2011, ~~no~~ an owner or operator of a paper coating line subject to the limitations of Section 218.204(c) ~~of this Subpart shall~~must not apply coatings on the subject coating line unless the requirements in subsection (j)(1) or (j)(2) ~~of this Section~~ are met:

1) For each coating line that applies multiple coatings, all of which are subject to the same numerical emission limitation within Section 218.204(c) during the same day (e.g., all coatings used on the line are subject to 0.40 kg/kg solids (0.08 kg/kg coatings)), the daily-weighted average VOM content ~~shall~~ must not exceed the coating VOM content limit corresponding to the category of coating used; or

2) For each coating line that applies coatings subject to more than one numerical emission limitation in Section 218.204(c) during the same day, the owner or operator ~~shall~~ must have a site-specific proposal approved by the Agency and approved by USEPA as a SIP revision. To receive approval, the requirements of USEPA's Emissions Trading Policy Statement (and related policy), 51 Fed. Reg. 43814 (December 4, 1986), must be satisfied.

k) On and after May 1, 2012, ~~no~~ an owner or operator of a miscellaneous metal parts and products coating line, plastic parts or products coating line, pleasure craft surface coating line, or motor vehicle materials coating line subject to the limitations of Section 218.204(q) ~~of this Subpart shall~~must not apply coatings on the subject coating line unless the requirements of subsection (k)(1) or (k)(2) ~~of this Section~~ are met:

1) For each coating line that applies multiple coatings, all of which are subject to the same numerical emission limitation within Section 218.204(q) ~~of this Subpart,~~ during the same day (e.g., all coatings used on

the line are subject to 0.42 kg/l (3.5 lbs/gal)), the daily-weighted average VOM content ~~shall~~ must not exceed the coating VOM content limit corresponding to the category of coating used; or

2) For each coating line that applies coatings subject to more than one numerical emission limitation in Section 218.204(q) ~~of this Subpart~~, during the same day, the owner or operator ~~shall~~ must have a ~~site specific~~site-specific proposal approved by the Agency and approved by USEPA as a SIP revision. To receive approval, the requirements of USEPA's Emissions Trading Policy Statement (and related policy), 51 Fed. Reg. 43814 (December 4, 1986), must be satisfied.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 218.206 Solids Basis Calculation

Limitations in terms of kg (lbs) of VOM emissions per ~~l~~l (gal) of solids as applied at each coating applicator ~~shall~~ must be determined by the following equation:

$$S = \frac{C}{1-(C/D)}$$

where:

S = The limitation on VOM emissions in terms of kg VOM/1 (lbs VOM/gal) of solids;

C = The limitation on VOM emissions in terms of kg/1 (lbs/gal) of coating (minus water and any compounds which are specifically excluded from the definition of VOM) ~~specified~~ in Section 218.204 ~~of this Part~~;

D = The density of VOM in the coating. For the purposes of calculating S, the density is 0.882 kg VOM/1 VOM (7.36 lbs VOM/gal VOM)

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 218.207 Alternative Emission Limitations

a) Any owner or operator of a coating line subject to Section 218.204 ~~of this Subpart~~, except coating lines subject to Section 218.204(q)(6), may comply with this Section~~,~~ rather than with Section 218.204 ~~of this Subpart,~~ if a capture system and control device are operated at all times the coating line is in operation and the owner or operator demonstrates compliance with subsections (c), (d), (e), (f), (g), (h), (i), (j), (k), (l), (m), or (n) ~~of this Section~~ (depending upon the source category) through the applicable coating analysis and capture system and control device efficiency test methods and procedures ~~specified~~ in Section 218.105 ~~of this~~

~~Part~~ and the recordkeeping and reporting requirements ~~specified~~ in Section 218.211(e) ~~of this Subpart~~; and the control device is equipped with the applicable monitoring equipment ~~specified~~ in Section 218.105(d) ~~of this Part~~ and the monitoring equipment is installed, calibrated, operated, and maintained according to vendor specifications at all times the control device is in use. A capture system and control device~~,~~ which does not demonstrate compliance with subsection (c), (d), (e), (f), (g), (h), (i), (j), (k), (l), (m), or (n) ~~of this Section~~ may be used as an alternative to compliance with Section 218.204 ~~of this Subpart~~ only if the alternative is approved by the Agency and approved by the USEPA as a SIP revision.

b) Alternative Add-On Control Methodologies

1) The coating line is equipped with a capture system and control device that provides 81 percent reduction in the overall emissions of VOM from the coating line and the control device has a 90 percent efficiency; or

2) The system used to control VOM from the coating line is demonstrated to have an overall efficiency sufficient to limit VOM emissions to no more than what is allowed under Section 218.204 ~~of this Subpart~~. Use of any control system other than an afterburner, carbon adsorption, condensation, or absorption scrubber system can be allowed only if approved by the Agency and approved by the USEPA as a SIP revision. The use of transfer efficiency credits can be allowed only if approved by the Agency and approved by the USEPA as a SIP revision. Baseline transfer efficiencies and transfer efficiency test methods must be approved by the Agency and the USEPA. ~~Such~~ The overall efficiency is to be determined as follows:

A) Obtain the emission limitation from the appropriate subsection in Section 218.204 ~~of this Subpart~~;

B) Unless complying with an emission limitation in Section 218.204 that is already expressed in terms of weight of VOM per volume of solids, calculate "S" according to the equation in Section 218.206 ~~of this Subpart~~. For coating lines subject to an emission limitation in Section 218.204 that is already expressed in terms of weight of VOM per volume of solids, "S" is equal to ~~such~~ the emission limitation;

C) Calculate the overall efficiency required according to Section 218.105(e) ~~of this Part~~. For the purposes of calculating this value, according to the equation in Section 218.105(e)(2) ~~of this Part~~, VOM_I is equal to the value of "S" as determined in subsection (b)(2)(B) ~~of this Section~~. If the coating line is subject to an emission limitation in Section 218.204 ~~of this Subpart~~ that is already expressed in terms of weight of VOM per volume of

solids, VOM_1 is equal to that emission limitation.

c) ~~No~~ An owner or operator of a coating line subject to only one of the emission limitations from among Section 218.204(a)(1)(A), (a)(1)(D), (a)(2)(A), (a)(2)(E), (a)(2)(F), (c)(1), (d), (e), (f), or (i) ~~of this Subpart~~ and equipped with a capture system and control device ~~shall~~ must not operate the subject coating line unless the requirements in subsection (b)(1) or (b)(2) ~~of this Section~~ are met. ~~No~~ An owner or operator of a coating line subject to Section 218.204(a)(1)(B), (a)(1)(C), (a)(2)(B), (a)(2)(C), or (a)(2)(D) ~~of this Subpart~~ and equipped with a capture system and control device ~~shall~~ must not operate the coating line unless the owner or operator demonstrates compliance with ~~such~~ the limitation in compliance with the topcoat protocol ~~referenced~~ in Section 218.105(b)(1)(A) or (b)(1)(B), as applicable.

d) ~~No~~ An owner or operator of a miscellaneous metal parts and products coating line that applies one or more coatings during the same day, all of which are subject to the same numerical emission limitation within Section 218.204(j) ~~of this Subpart~~ (e.g., all coatings used on the line are subject to 0.42 kg/l (3.5 lbs/gal)), and that is equipped with a capture system and control device ~~shall~~ must not operate the subject coating line unless the requirements in subsection (b)(1) or (b)(2) ~~of this Section~~ are met.

e) ~~No~~ An owner or operator of a heavy off-highway vehicle products coating line that applies one or more coatings during the same day, all of which are subject to the same numerical emission limitation within Section 218.204(k) ~~of this Subpart~~ (e.g., all coatings used on the line are subject to 0.42 kg/1 (3.5 lbs/gal)), and that is equipped with a capture system and control device ~~shall~~ must not operate the subject coating line unless the requirements in subsection (b)(1) or (b)(2) ~~of this Section~~ are met.

f) ~~No~~ An owner or operator of an existing diesel-electric locomotive coating line in Cook County that applies one or more coatings during the same day, all of which are subject to the same numerical emission limitation within Section 218.204(m) ~~of this Subpart~~ (e.g., all coatings used on the line are subject to 0.42 kg/1 (3.5 lbs/gal)), and that is equipped with a capture system and control device ~~shall~~ must not operate the subject coating line unless the requirements in subsection (b)(1) or (b)(2) ~~of this Section~~ are met.

g) ~~No~~ An owner or operator of a wood furniture coating line that applies one or more coatings during the same day, all of which are subject to the same numerical emission limitation within Section 218.204(l) ~~of this Subpart~~ (e.g., all coatings used on the line are subject to 0.67 kg/l (5.6 lbs/gal)), and that is equipped with a capture system and control device ~~shall~~ must not operate the subject coating line unless the requirements in subsection (b)(1) or (b)(2) ~~of this Section~~ are met. If compliance is achieved by meeting the requirements in subsection (b)(2) ~~of this Section~~, then the provisions in the note to Section 218.204(l) ~~of this Subpart~~ must

also be met.

h) ~~No~~ An owner or operator of a can coating line ~~that is~~ equipped with a capture system and control device ~~shall~~ must not operate the subject coating line unless the requirements in subsection (h)(1) or (h)(2) ~~of this Section~~ are met.

1) An alternative daily emission limitation ~~shall be determined~~ for the can coating operation, i.e., for all of the can coating lines at the source, must be determined according to Section 218.205(c)(2) ~~of this Subpart~~. Actual daily emissions ~~shall never~~must not exceed the alternative daily emission limitation and ~~shall~~ must be calculated by use of the following equation:

$$E_d = \sum_{i=1}^{n} V_i C_i (1 - F_i)$$

where:

E_d = Actual VOM emissions for the day in units of kg/day (lbs/day);

i = Subscript denoting the specific coating applied;

n = Total number of surface coatings as applied in the can coating operation;

V_i = Volume of each coating as applied for the day in units of l/day (gal/day) of coating (minus water and any compounds that are specifically exempted from the definition of VOM);

C_i = The VOM content of each coating as applied in units of kg VOM/l (lbs VOM/gal) of coating (minus water and any compounds that are specifically exempted from the definition of VOM); and

F_i = Fraction, by weight, of VOM emissions from the surface coating, reduced or prevented from being emitted to the ambient air. This is the overall efficiency of the capture system and control device.

2) The coating line is equipped with a capture system and control device that provide 75 percent reduction in the overall emissions of VOM from the coating line, and the control device has a 90 percent efficiency.

i) ~~No~~ An owner or operator of a plastic parts coating line~~,~~ that applies one or more coatings during the same day, all of which are subject to the same numerical emission limitation within Section 218.204(n) or (o) ~~of this Subpart~~ (e.g., all

coatings used on the line are subject to 0.42 kg/l (3.5 lbs/gal)), and that is equipped with a capture system and control device ~~shall~~ must not operate the subject coating line unless the requirements in subsection (b)(1) or (b)(2) ~~of this Section~~ are met.

j) ~~Prior to~~Before May 1, 2011, ~~no~~ an owner or operator of a metal furniture coating line that applies one or more coatings during the same day, all of which are subject to the same numerical emission limitation within Section 218.204(g) ~~of this Subpart~~ (e.g., all coatings used on the line are subject to 0.34 kg/l (2.8 lbs/gal)), and that is equipped with a capture system and control device ~~shall~~ must not operate the subject coating line unless the requirements in subsection (b)(1) or (b)(2) ~~of this Section~~ are met.

k) ~~Prior to~~Before May 1, 2011, ~~no~~ an owner or operator of a large appliance coating line that applies one or more coatings during the same day, all of which are subject to the same numerical emission limitation within Section 218.204(h) ~~of this Subpart~~ (e.g., all coatings used on the line are subject to 0.34 kg/l (2.8 lbs/gal)), and that is equipped with a capture system and control device ~~shall~~ must not operate the subject coating line unless the requirements in subsection (b)(1) or (b)(2) ~~of this Section~~ are met.

l) On and after May 1, 2011, ~~no~~ an owner or operator of a paper coating line, metal furniture coating line, or large appliance coating line that is equipped with a capture system and control device ~~shall~~ must not operate the subject coating line unless either:

1) The capture system and control device provide at least 90 percent reduction in the overall emissions of VOM from the coating line; or

2) The owner or operator complies with the applicable limitation ~~set forth~~ in Section 218.204 ~~of this Subpart~~ by ~~utilizing~~ using a combination of low-VOM coatings and a capture system and control device.

m) ~~No~~ An owner or operator of a flat wood paneling coating line that is equipped with a capture system and control device ~~shall~~ must not operate the subject coating line unless either:

1) The capture system and control device provide at least 90 percent reduction in the overall emissions of VOM from the coating line; or

2) The owner or operator of the flat wood paneling coating line complies with all requirements ~~set forth~~ in subsection (b)(2) ~~of this Section~~.

n) On and after May 1, 2012, ~~no~~ an owner or operator of a miscellaneous metal parts and products coating line, plastic parts and products coating line, or pleasure craft

surface coating line that is equipped with a capture system and control device ~~shall~~ must not operate the subject coating line unless:

1) The capture system and control device provide at least 90 percent reduction in the overall emissions of VOM from the coating line; or

2) The owner or operator of the coating line complies with all requirements ~~set forth~~ in subsection (b)(2) ~~of this Section~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 218.208 Exemptions from Emission Limitations

a) Exemptions for all coating categories except wood furniture coating. The limitations of this Subpart ~~shall~~ do not apply to coating lines within a source~~,~~ that otherwise would be subject to the same subsection of Section 218.204 (because they belong to the same coating category, e.g., can coating), ~~provided that~~if combined actual emissions of VOM from all lines at the source subject to that subsection never exceed 6.8 kg/day (15 lbs/day) before ~~the application of~~applying capture systems and control devices. (For example, can coating lines within a source would not be subject to the limitations of Section 218.204(b) ~~of this Subpart~~ if the combined actual emissions of VOM from the can coating lines never exceed 6.8 kg/day (15 lbs/day) before ~~the application of~~applying capture systems and control devices.) ~~Prior to~~Before May 1, 2012, volatile organic material emissions from heavy off-highway vehicle products coating lines must be combined with VOM emissions from miscellaneous metal parts and products coating lines to determine applicability. On and after May 1, 2012, VOM emissions from heavy off-highway vehicle products coating lines ~~shall~~ must be combined with VOM emissions from miscellaneous metal parts and products coating lines and plastic parts and products coating lines to determine applicability. Any owner or operator of a coating source ~~shall~~ must comply with the applicable coating analysis test methods and procedures ~~specified~~ in Section 218.105(a) ~~of this Part~~ and the recordkeeping and reporting requirements ~~specified~~ in Section 218.211(a) ~~of this Subpart~~ if total VOM emissions from the subject coating lines are always less than or equal to 6.8 kg/day (15 lbs/day) before ~~the application of~~applying capture systems and control devices and~~,~~ ~~therefore,~~ are not subject to the limitations of Section 218.204 ~~of this Subpart~~. Once a category of coating lines at a source is subject to the limitations in Section 218.204~~,~~ ~~of this Subpart~~ the coating lines are always subject to the limitations in Section 218.204 ~~of this Subpart~~.

b) Applicability for wood furniture coating

1) The limitations of this Subpart ~~shall~~ apply to a source's wood furniture coating lines if the source contains process emission units~~,~~ not regulated by Subparts B, E, F (excluding Section 218.204(l) ~~of this Subpart~~), H

(excluding Section 218.405 ~~of this Part~~), Q, R, S, T (excluding Section 218.486 ~~of this Part~~), V, X, Y, or BB ~~of this Part,~~ which as a group both:

A) Have ~~a~~ maximum theoretical emissions of 91 Mg (100 tons) or more per calendar year of VOM if no air pollution control equipment were used; and

B) Are not limited to less than 91 Mg (100 tons) of VOM per calendar year if no air pollution control equipment were used, through production or capacity limitations ~~contained~~ in a federally enforceable permit or SIP revision.

2) The limitations of this Subpart ~~shall~~ apply to a source's wood furniture coating lines~~,~~ on and after March 15, 1996, if the source contains process emission units~~,~~ which, as a group, have a potential to emit 22.7 Mg (25 tons) or more of VOM per calendar year and have not limited emissions to less than 22.7 Mg (25 tons) of VOM per calendar year through production or capacity limitations ~~contained~~ in a federally enforceable operating permit or SIP revision, and that:

A) Are not regulated by Subparts B, E, F (excluding Section 218.204(l) ~~of this Subpart~~), H, Q, R, S, T (excluding Section 218.486 ~~of this Part~~), V, X, Y, Z or BB ~~of this Part~~; and

B) Are not included in any of the following categories: synthetic organic chemical manufacturing industry (SOCMI) distillation, SOCMI reactors, plastic parts coating (business machines), plastic parts coating (other), offset lithography, industrial wastewater, autobody refinishing, SOCMI batch processing, volatile organic liquid storage tanks and clean-up solvents operations.

3) If a source ceases to fulfill the criteria of subsection (b)(1) or (b)(2) ~~of this Section~~, the limitations of Section 218.204(l) ~~of this Subpart shall~~ continue to apply to any wood furniture coating line which was ever subject to the limitations of Section 218.204(l) ~~of this Subpart~~.

4) For the purposes of this subsection (b) ~~of this Section~~, an emission unit ~~shall be~~is considered to be regulated by a Subpart if it is subject to the limitations of that Subpart. An emission unit is not considered regulated by a Subpart if it is not subject to the limits of that Subpart, e.g., the emission unit is covered by an exemption in the Subpart or the applicability criteria of the Subpart are not met.

5) Any owner or operator of a wood furniture coating line to which the limitations of this Subpart are not applicable due to the criteria in this subsection (b) ~~of this Section shall~~must, upon request by the Agency or

the USEPA, submit records to the Agency and the USEPA within 30 calendar days ~~from~~ after the date of the request that document that the coating line is exempt from the limitations of this Subpart.

c) On and after March 15, 1996, the limitations of this Subpart ~~shall~~ do not apply to touch-up and repair coatings used by a coating source described by Section 218.204(b), (d), (f), (g), (i), and (q)(5) ~~of this Subpart; provided that~~if the source-wide volume of ~~such~~ these coatings used does not exceed 0.95 l (1 quart) per eight-hour period or exceed 209 l/yr (55 gal/yr) for any rolling ~~12 month~~12-month period. Recordkeeping and reporting for touch-up and repair coatings ~~shall~~ must be consistent with subsection (e) ~~of this Section~~.

d) ~~Prior to~~Before May 1, 2012, the limitations of this Subpart ~~shall~~ do not apply to touch-up and repair coatings used by a coating source described by Section 218.204(j), (n), and (o) ~~of this Subpart, provided that~~if the source-wide volume of the coatings used does not exceed 0.95 l (1 quart) per eight-hour period or exceed 209 l/yr (55 gal/yr) for any rolling ~~12 month~~12-month period. Recordkeeping and reporting for touch-up and repair coatings ~~shall~~ must be consistent with subsection (e) ~~of this Section~~.

e) On and after March 15, 1996, the owner or operator of a coating line or a group of coating lines using touch-up and repair coatings that are exempted from the limitations of Section 218.204(b), (d), (f), (g), (i), (j), (n), (o), and (q)(5) ~~of this Subpart because of the provisions of subsection 218.208~~by subsection (c) or (d) ~~of this Section shall~~must:

1) Collect and record the name, identification number, and volume used of each touch-up and repair coating, as applied on each coating line, per eight-hour period and per month;

2) Perform calculations on a daily basis, and maintain at the source records of ~~such~~ the calculations, of the combined volume of touch-up and repair coatings used source-wide for each eight-hour period;

3) Perform calculations on a monthly basis, and maintain at the source records of ~~such~~ the calculations, of the combined volume of touch-up and repair coatings used source-wide for the month and the rolling 12 month period;

4) Prepare and maintain at the source an annual summary of the information required to be compiled ~~pursuant to~~under subsections (e)(1) and (e)(2) ~~of this Section~~ on or before January 31 of the following year;

5) Maintain at the source for a minimum ~~period~~ of three years all records required to be kept under this subsection (e) and make such records available to the Agency upon request;

6) Notify the Agency in writing if the use of touch-up and repair coatings at the source ever exceeds a volume of 0.95 l (1 quart) per eight-hour period or exceeds 209 l/yr (55 gal/yr) for any rolling ~~12 month~~12-month period within 30 days after any such exceedance. ~~Such~~ The notification ~~shall~~ must include a copy of any records of ~~such~~ the exceedance; and

7) "Touch-up and repair coatings" means, for purposes of ~~35 Ill. Adm. Code~~Section 218.208, any coating used to cover minor scratches and nicks that occur during manufacturing and assembly processes.

Section 218.209 Exemption From General Rule on Use of Organic Material

No owner or operator of a coating line subject to the limitations of Section 218.204 ~~of this Part~~ is required to meet the limitations of ~~Subpart G (~~Section 218.301 or 218.302~~) of this Part,~~ after the date by which the coating line is required to meet Section 218.204 ~~of this Part~~.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 218.210 Compliance Schedule

Every owner or operator of a coating line (of a type included within Section 218.204 ~~of this Subpart~~) ~~shall~~ must comply with the requirements of Section 218.204, 218.205, 218.207, or 218.208 and Section 218.211 or Sections 218.212 and 218.213 ~~of this Subpart~~ in compliance with the appropriate compliance schedule ~~as specified~~ in subsection (a), (b), (c), (d), (e), (f), (g), or (h) ~~of this Section~~:

a) ~~No~~ An owner or operator of a coating line that is exempt from the limitations of Section 218.204 ~~of this Subpart~~ because of the criteria in Section 218.208(a) or (b) ~~of this Subpart shall~~ must not operate ~~said~~ the coating line on or after a date consistent with Section 218.106 ~~of this Part~~, unless the owner or operator has complied with, and continues to comply with, Section 218.211(b) ~~of this Subpart~~.

b) ~~No~~ An owner or operator of a coating line complying by means of Section 218.204 ~~of this Subpart shall~~must not operate ~~said~~ the coating line on or after a date consistent with Section 218.106 ~~of this Part~~, unless the owner or operator has complied with, and continues to comply with, Sections 218.204 and 218.211(c) ~~of this Subpart~~.

c) ~~No~~ An owner or operator of a coating line complying by means of Section 218.205 ~~of this Subpart shall~~must not operate ~~said~~ the coating line on or after a date consistent with Section 218.106 ~~of this Part~~, unless the owner or operator has complied with, and continues to comply with, Sections 218.205 and 218.211(d) ~~of this Subpart~~.

d) ~~No~~ An owner or operator of a coating line complying by means of Section 218.207 ~~of this Subpart shall~~must not operate ~~said~~ the coating line on or after a date consistent with Section 218.106 ~~of this Part~~, unless the owner or operator has complied with, and continues to comply with, Sections 218.207 and 218.211(e) ~~of this Subpart~~.

e) ~~No~~ An owner or operator of a coating line subject to one or more of the emission limitations ~~contained~~ in Section 218.204 ~~of this Subpart~~ on or after March 15, 1996, choosing to comply ~~by means of~~under Section 218.204, 218.205, or 218.207 ~~of this Subpart, shall~~must not operate ~~said~~ the coating line on or after March 15, 1996, unless the owner or operator complies with and continues to comply with~~, respectively,~~ the applicable requirements in Section 218.204~~,~~ or the alternative control options in Section 218.205 or 218.207 and the requirements of Section 218.211.

f) ~~No~~ An owner or operator of a coating line subject to one or more of the emission limitations ~~contained~~ in Section 218.204 ~~of this Subpart~~ on or after March 15, 1996, choosing to comply ~~by means of~~under Section 218.212 ~~of this Subpart, shall~~must not operate ~~said~~ the coating line on or after March 15, 1996, unless the owner or operator complies with and continues to comply with the requirements of Sections 218.212 and 218.213 ~~of this Subpart~~.

g) ~~No~~ An owner or operator of a coating line subject to the emission limitations in Section 218.204(c)(2), (g)(2), or (h)(2) ~~of this Subpart shall~~must not operate that coating line on or after a date consistent with Section 218.106(e) ~~of this Part~~, unless the owner or operator has complied with, and continues to comply with, Section 218.204(c)(2), (g)(2), or (h)(2), as applicable, or the alternative control options in Section 218.205 or 218.207, and all applicable requirements in Sections 218.211 and 218.218 ~~of this Subpart~~.

h) ~~No~~ An owner or operator of a coating line subject to the emission limitations ~~contained~~ in Section 218.204(p) ~~of this Subpart shall~~must not operate that coating line on or after a date consistent with Section 218.106(e) ~~of this Part~~, unless the owner or operator has complied with, and continues to comply with, Section 218.204(p) or the alternative control options in Section 218.205 or 218.207, and the requirements of Sections 218.211 and 218.217 ~~of this Subpart~~, as applicable.

(Source: Amended at 48 Ill. Reg._____, effective _____)

Section 218.211 Recordkeeping and Reporting

a) The VOM content of each coating and the efficiency of each capture system and control device ~~shall~~ must be determined by the applicable test methods and procedures ~~specified~~ in Section 218.105 ~~of this Part~~ to establish the records required under this Section.

b) Any owner or operator of a coating line that is exempted from the limitations of Section 218.204 ~~of this Subpart~~ because of Section 218.208(a) or (b) ~~of this Subpart shall~~must comply with the following:

1) For sources exempt under Section 218.208(a) ~~of this Subpart~~, by a date consistent with Section 218.106 ~~of this Part~~, the owner or operator of a coating line or a group of coating lines referenced in subsection (b) ~~of this Section shall~~must certify to the Agency that the coating line or group of coating lines is exempt under ~~the provisions of~~ Section 218.208(a) ~~of this Subpart~~. ~~Such~~ The certification ~~shall~~ must include:

A) A declaration that the coating line or group of coating lines is exempt from the limitations of Section 218.204 ~~of this Subpart~~ because of Section 218.208(a) ~~of this Subpart~~; and

B) Calculations that demonstrate that the combined VOM emissions from the coating lines or group of coating lines never exceed 6.8 kg (15 lbs) per day before the application of capture systems and control devices. The following equation ~~shall~~ must be used to calculate total VOM emissions:

$$T_e = \sum_{j=1}^{m} \sum_{i=1}^{n} \left(A_i B_i \right)_j$$

where:

T_e = Total VOM emissions from coating lines each day before the application of capture systems and control devices in units of kg/day (lbs/day);

m = Number of coating lines at the source that otherwise would be subject to the same subsection of Section 218.104 ~~of this Part~~ (because they belong to the same category, e.g., can coating);

j = Subscript denoting an individual coating line;

n = Number of different coatings as applied each day on each coating line;

i = Subscript denoting an individual coating;

A_i = Weight of VOM per volume of each coating (minus water and any compounds that are specifically exempted from the definition of VOM) as applied each day on each coating line in units of kg VOM/l (lbs VOM/gal); and

B_i = Volume of each coating (minus water and any compounds that are specifically exempted from the definition of VOM) as applied each day on each coating line in units of l/day (gal/day). The instrument or method by which the owner or operator accurately measured or calculated the volume of each coating as applied on each coating line each day ~~shall~~ must be described in the certification to the Agency.

2) For sources exempt under Section 218.208(b) ~~of this Subpart~~, by March 15, 1998, or upon initial start-up, the owner or operator of a coating line or a group of coating lines referenced in subsection (b) ~~of this Section shall~~must certify to the Agency that the source is exempt under ~~the provisions of~~ Section 218.208(b) ~~of this Subpart~~. ~~Such~~ The certification shall include:

A) A declaration that the source is exempt from the limitations of Section 218.204(l) ~~of this Subpart~~ because of Section 218.208(b) ~~of this Subpart~~; and

B) Calculations that demonstrate that the source meets the criteria for exemption because of Section 218.208(b) ~~of this Subpart~~.

3) For sources exempt under Section 218.208(a) ~~of this Subpart~~, on and after a date consistent with Section 218.106 ~~of this Part~~, the owner or operator of a coating line or group of coating lines referenced in this subsection ~~shall~~ must collect and record all of the following information each day for each coating line and maintain the information at the source for ~~a period of~~ three years:

A) The name and identification number of each coating as applied on each coating line; and

B) The weight of VOM per volume and the volume of each coating (minus water and any compounds that are specifically exempted from the definition of VOM) as applied each day on each coating line.

4) For sources exempt under Section 218.208(b) ~~of this Subpart~~, on and after March 15, 1998, the owner or operator of a coating line or group of coating lines referenced in this subsection (b) ~~shall~~ must collect and record

all of the following information for each coating line and maintain the information at the source for ~~a period of~~ three years:

A) The name and identification number of each coating as applied on each coating line; and

B) The weight of VOM per volume and the volume of each coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied on each coating line on a monthly basis.

5) On and after a date consistent with Section 218.106 ~~of this Part~~, the owner or operator of a coating line or group of coating lines exempted from the limitations of Section 218.204 ~~of this Subpart~~ because of Section 218.208(a) ~~of this Subpart shall~~must notify the Agency of any record showing that total VOM emissions from the coating line or group of coating lines exceed 6.8 kg (15 lbs) in any day before the application of capture systems and control devices by sending a copy of ~~such~~ the record to the Agency within 30 days after the exceedance occurs.

6) On and after March 15, 1998, any owner or operator of a source exempt from the limitations of Section 218.204(l) ~~of this Subpart~~ because of Section 218.208(b) ~~of this Subpart shall~~must notify the Agency if the source's VOM emissions exceed the limitations of Section 218.208(b) of this Subpart by sending a copy of calculations showing ~~such an~~the exceedance within 30 days after the change occurs.

c) Any owner or operator of a coating line subject to the limitations of Section 218.204 ~~of this Subpart~~ other than Section 218.204(a)(1)(B), (a)(1)(C), (a)(2)(B), (a)(2)(C), or (a)(2)(D) ~~of this Subpart~~ and complying by means of Section 218.204 ~~of this Subpart shall~~must comply with the following:

1) By a date consistent with Section 218.106 ~~of this Part~~, or upon initial start-up of a new coating line, or upon changing the method of compliance from an existing subject coating line from Section 218.205, Section 218.207, Section 218.215, or Section 218.216 ~~of this Subpart~~ to Section 218.204 ~~of this Subpart~~; the owner or operator of a subject coating line ~~shall~~ must certify to the Agency that the coating line will be in compliance with Section 218.204 ~~of this Subpart~~ on and after a date consistent with Section 218.106 ~~of this Part~~, or on and after the initial start-up date. The certification ~~shall~~ must include:

A) The name and identification number of each coating as applied on each coating line;

B) The weight of VOM per volume of each coating (minus water and

any compounds that are specifically exempted from the definition of VOM) as applied each day on each coating line;

C) On and after March 15, 1998, for coating lines subject to the limitations of Section 218.204(l)(2)(A) or (B) ~~of this Subpart~~, the weight of VOM per weight of solids in each coating as applied each day on each coating line;

D) For coating lines subject to the limitations of Section 218.204(c)(2) ~~of this Subpart~~, the weight of VOM per weight of solids (or the weight of VOM per weight of coatings, as applicable) in each coating as applied each day on each coating line;

E) For coating lines subject to the limitations of Section 218.204(g)(2) or (h)(2) ~~of this Subpart~~, the application methods used to apply coatings on the subject coating line and the weight of VOM per volume of each coating (or the weight of VOM per volume of solids in each coating, as applicable) as applied each day on each coating line;

F) For coating lines subject to the limitations of Section 218.204(p) ~~of this Subpart~~, the weight of VOM per volume of coatings or solids, as applicable, for each coating, as applied each day on each coating line;

G) For coating lines subject to the limitations of Section 218.204(a)(2)(A) ~~of this Subpart~~, the weight of VOM per volume of solids in each coating as applied each day on each coating line, and the solids turnover ratio of the EDP operation, with supporting calculations;

H) For coating lines subject to the limitations of Section 218.204(a)(2)(E), the weight of VOM per volume and volume of each coating used in the final repair coat operation, and the weight of VOM per volume of the final repair coat as applied, calculated on an occurrence weighted average basis;

I) For coating lines subject to the limitations of Section 218.204(q) ~~of this Subpart~~, the weight of VOM per volume of each coating, or the weight of VOM per volume of solids in each coating, as applicable, as applied each day on each coating line.

2) On and after a date consistent with Section 218.106 ~~of this Part~~, or on and after the initial start-up date, the owner or operator of a subject coating line ~~shall~~ must collect and record all of the following information each day, unless otherwise specified, for each coating line and maintain the

information at the source for ~~a period of~~ three years:

A) The name and identification number of each coating as applied on each coating line;

B) The weight of VOM per volume of each coating (minus water and any compounds that are specifically exempted from the definition of VOM) as applied each day on each coating line;

C) On and after March 15, 1998, for coating lines subject to the limitations of Section 218.204(l)(2)(A) or (B) ~~of this Subpart~~, the weight of VOM per weight of solids in each coating as applied each day on each coating line and certified product data sheets for each coating;

D) On and after March 15, 1998, for wood furniture coating spray booths subject to the limitations of Section 218.204(l)(4)(A) ~~of this Subpart~~, the weight of VOM per weight of solids in each strippable spray booth coating as applied each day on each spray booth and certified product data sheets for each coating;

E) For coating lines subject to the limitations of Section 218.204(c)(2) ~~of this Subpart~~, the weight of VOM per weight of solids (or the weight of VOM per weight of coatings, as applicable) in each coating as applied each day on each coating line, and certified product data sheets for each coating;

F) For coating lines subject to the limitations of Section 218.204(g)(2) or 218.204(h)(2) ~~of this Subpart~~, the weight of VOM per volume of each coating (or the weight of VOM per volume of solids in each coating, as applicable) as applied each day on each coating line, and certified product data sheets for each coating;

G) For coating lines subject to the limitations of Section 218.204(p) ~~of this Subpart~~, the weight of VOM per volume of coatings or solids, as applicable, for each coating, as applied each day on each coating line;

H) For coating lines subject to the limitations of Section 218.204(a)(2)(A) ~~of this Subpart~~, the weight of VOM per volume of solids in each coating as applied each day on each coating line, certified product data sheets for each coating, and the solid turnover ratio for the EDP operation, calculated on a calendar monthly basis, with supporting calculations;

I) For coating lines subject to the limitations of Section 218.204(a)(2)(E), the weight of VOM per volume and volume of each coating used in the final repair coat operation, the weight of VOM per volume of the final repair coat as applied, calculated on an occurrence weighted average basis, and certified product data sheets for each coating;

J) For coating lines subject to the limitations of Section 218.204(q) ~~of this Subpart~~, the weight of VOM per volume of each coating, or the weight of VOM per volume of solids in each coating, as applicable, as applied each day on each coating line, and certified product data sheets for each coating.

3) On and after a date consistent with Section 218.106 ~~of this Part~~, the owner or operator of a subject coating line ~~shall~~ must notify the Agency in the following instances:

A) Any record showing violation of Section 218.204 ~~of this Subpart shall~~must be reported by sending a copy of ~~such~~ the record to the Agency within 30 days ~~following the occurrence~~after of the violation.

B) At least 30 calendar days before changing the method of compliance from Section 218.204 ~~of this Subpart~~ to Section 218.205 or Section 218.207 ~~of this Subpart~~, the owner or operator shall comply with all requirements of subsection (d)(1) or (e)(1) ~~of this Section~~, as applicable. Upon changing the method of compliance from Section 218.204 ~~of this Subpart~~ to Section 218.205 ~~of this Subpart~~ or Section 218.207 ~~of this Subpart~~, the owner or operator ~~shall~~ must comply with all requirements of subsection (d) or (e) ~~of this Section~~, as applicable.

d) Any owner or operator of a coating line subject to the limitations of Section 218.204 ~~of this Subpart~~ and complying by means of Section 218.205 ~~of this Subpart shall~~must comply with the following:

1) By a date consistent with Section 218.106 ~~of this Part~~, or upon initial start-up of a new coating line, or upon changing the method of compliance for an existing subject coating line from Section 218.204 or Section 218.207 ~~of this Subpart~~ to Section 218.205 ~~of this Subpart~~; the owner or operator of the subject coating line ~~shall~~ must certify to the Agency that the coating line will be in compliance with Section 218.205 ~~of this Subpart~~ on and after a date consistent with Section 218.106 ~~of this Part~~, or on and after the initial start-up date. The certification ~~shall~~ must include:

A) The name and identification number of each coating line which

will comply by means of Section 218.205 ~~of this Subpart~~.

B) The name and identification number of each coating as applied on each coating line.

C) The weight of VOM per volume and the volume of each coating (minus water and any compounds which are specifically exempted from the definition of VOM) as applied each day on each coating line.

D) On and after March 15, 1998, for coating lines subject to the limitations of Section 218.204(l)(2)(A) or (B) ~~of this Subpart~~, the weight of VOM per weight of solids in each coating as applied each day on each coating line.

E) For coating lines subject to the limitations of Section 218.204(a)(2)(A) ~~of this Subpart~~, the weight of VOM per volume of solids in each coating as applied each day on each coating line.

F) For coating lines subject to the limitations of Section 218.204(c)(2) ~~of this Subpart~~, the weight of VOM per weight of solids (or the weight of VOM per weight of coatings, as applicable) in each coating as applied each day on each coating line.

G) For coating lines subject to the limitations of Section 218.204(g)(2) or (h)(2) ~~of this Subpart~~, the weight of VOM per volume of each coating (or the weight of VOM per volume of solids in each coating, as applicable) as applied each day on each coating line.
