IN THE MATTER OF:)
)
Exemptions from the Definitions of VOM,) R96-16
USEPA Amendments (Perchloroethylene)) (Rulemaking - Air)

DISSENTING OPINION (by J. Theodore Meyer):

Perchloroethylene, as a major component in the dry cleaning process, ranks among the most commonly used chemicals in the country. It is highly volatile and as such should not be exempt from the definition of volatile organic materials. For these reasons, I will be respectfully dissenting from this rulemaking.

J. Theodore Meyer
