Thank you for considering adopting the Clean Car and Truck rules.

I am enthusiastically in favor of these emission standards. We will not make progress in cleaning up vehicle emissions unless governments increase pressure on industries that will not self-govern in a sustainable manner under this government.

As an early adopter of electric vehicles, I can attest that they are well capable of replacing fuel burning engines and becoming ever more so.

Please adopt the clean car and truck rules outlined in R24-17.

Thank you,

Natalie Gillespie
