Dear Don Brown,

Please docket this email as a public comment for R2024-017 in the Matter of Proposed Clean Car and Truck Standards: Proposed Section 35 III. Admin Code 242.

Thank you for receiving my public comment. I am a Chicago resident and live in 60613/Lakeview area. I support the Illinois Pollution Control Board adopting the Proposed Clean Car and Truck Standards! These standards are important because city is filled with diesel-guzzling mobile sources that increase the rate of asthma and other respiratory diseases, increasing hospitalization and other medical bills and hurting people, work attendance, and the economy.

These rules are so incredibly important. I work in air pollution and understand that the federal rules only go SO FAR. We need the State of Illinois to be a fearless leader now more than ever. Local and state policy will be driving essential positive change these next four years, so I implore you to please help your constituents achieve state-level climate and air pollution successes.

Thank you for your time,
Tess Russell
