Don,

The BOW has reached out again specifically to ask for a drawing with the dimensions on it. We were very clear this time. Hopefully they send it shortly.

Joshua Leopold

Here is the response I got:

“Joshua is right, the pit drain drawing is not what we were looking for.

The Agency’s recommendation does not include drawings to confirm the dimensions of the facilities for which the petitioner is seeking a tax certification from the Board. The recommendation is for a manure pit measuring 163.33 ft. length, 65.33 ft. width and 10 ft. depth and includes 4 pumpout pits (6 ft. x 6 ft. x 10 ft. depth). So, what we are looking for is diagram or plan view of the pit showing the pit and pumpouts with the dimensions for us to confirm what is included in the recommendation. Ideally we expect the application to include engineering drawings of the facilities for which tax certification is sought, but at a minimum the application must include drawings showing the dimensions of the facility. “

Don,

We have been in communication with the applicant over the last week. Yesterday, they sent along the attached diagram. I am not certain if this is what the board needs so let me know if you need more.

Thanks,

Joshua, we have a request for additional information. The Agency's recommendation does not include drawings to confirm the dimensions of the facilities for which the petitioner is seeking a tax certification from the Board. Can you reach out for the drawings of the facilities? Thank you
