ORDER OF THE BOARD (by Mr. Dumelle):

On December 7, 1979 Petitioner requested a variance from the ammonia nitrogen limitations in NPDES Permit #IL 0052621. The Petition is deficient in several respects. First, it fails to state whether relief is sought from a monitoring requirement or an effluent limitation as required by Procedural Rule 401(a)(1). Second, it fails to describe the extent of Petitioner's inability to meet its present NPDES limitations and to explain why compliance cannot be achieved as required by Procedural Rule 401(a)(5). Third, it fails to describe a compliance program as required by Procedural Rule 401(a)(6). Fourth, it fails to list Petitioner's past efforts toward compliance as required by Procedural Rule 401(a)(8). Fifth, it fails to discuss alternate methods of compliance as required by Procedural Rule 401(a)(9). Sixth, it fails to specifically request or waive a hearing as required by Procedural Rule 401(b). Consequently, this matter is hereby dismissed without prejudice. If Petitioner should like to refile this matter with the corrections noted here it should feel free to do so.

IT IS SO ORDERED.
