ORDER OF THE BOARD (by C.A. Manning):

On September 5, 1991, General Motors Corporation, Electro-Motive Division ("GM") filed a petition for an air variance for its facility located in LaGrange, Illinois. Pursuant to our order of January 20, 1994, GM and the Illinois Environmental Protection Agency ("Agency") filed a joint status report on April 14, 1994.

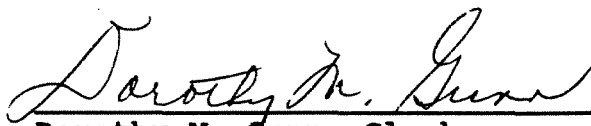

On September 15, 1992, GM submitted comments to the U.S. EPA regarding the proposed federal rule applicable to GM's locomotive coating operations. Since that time, the parties have been submitting reports to us on the status of this case while U.S. EPA considers GM's comments. On March 25, 1994, U.S. EPA published the final rule in the federal register with an effective date of April 25, 1994.

Previously, the parties have stated that a hearing in this matter may be unnecessary; they still believe this to be the case. The parties request until May 16, 1994 to file a status report while they determine the next step.

Accordingly, the parties are directed to file a status report on or before May 16, 1994. In addition to reporting the parties' status on this matter, they shall also indicate whether a hearing will be necessary.

IT IS SO ORDERED.

I, Dorothy M. Gunn, Clerk of the Illinois Pollution Control Board, hereby certify that the above order was adopted on the 21<sup>st</sup> day of April, 1994, by a vote of 6-0.
