ORDER OF THE BOARD (by G.T. Girard):

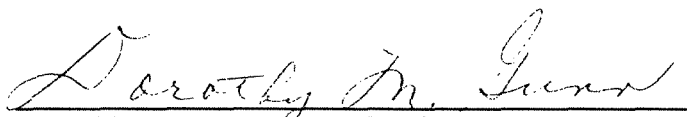

Pursuant to the Board's Order of June 15, 1992, petitioner filed a status report on June 15, 1992. R. Lavin states that it has been conducting a stormwater study of the stormwater discharges from its plant in order to ascertain whether the parties would be able to reach an agreement with regard to the issues raised in this permit appeal. However, R. Lavin reports that the unusually dry spring has made it difficult to complete the study as envisioned by the parties.

The parties are trying to schedule a meeting for late June to discuss the status of the stormwater study and other issues between the parties unrelated to this appeal. If the site has not experienced significant rainfall by that time, R. Lavin & Sons is considering extending the stormwater study until such time as there have been sufficient rain events to provide representative data for analysis of the stormwater discharges from the site. Accordingly, R. Lavin & Sons, Inc. suggests that the Board set this matter for another status report in approximately 90 days.

The Board accepts the parties suggestion, and directs that a status report be filed on or before September 15, 1992. The report shall include an estimated date for the completion of this action.

IT IS SO ORDERED.

I, Dorothy M. Gunn, Clerk of the Illinois Pollution Control Board, hereby certify that the above order was adopted on the 23rd day of June, 1992, by a vote of 7-0.

Dorothy M. Gunn, Clerk
Illinois Pollution Control Board
