PROTECTION AGENCY,)
)
Respondent.)

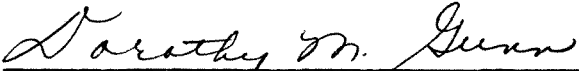

ORDER OF THE BOARD (by J. Anderson):

Interstate Pollution Control, Inc. (IPC) operates an on-premises oil/water separation facility as well as a licensed waste hauling facility in Rockford. On February 3, 1986, IPC filed an appeal of decisions of the Agency's Division of Land Pollution Control which, on December 27, 1985, denied renewal of the site's operating permit, and also, on January 8, 1986, deemed the application for renewal of 175 supplemental waste stream permits incomplete. Interstate also filed a motion to consolidate these appeals with PCB 85-155, involving denial of air and water permits, as well as an emergency motion for stay of the effect of these denials.

The day-old motions are not ripe for decision. However, given the fact that the next Board meeting is scheduled for February 26, nearly three weeks away, given IPC's pleadings, and given the Board's unchallenged findings in PCB 85-155 that economic harm to IPC outweighs any apparent harm to the environment, the Board will at this time grant a temporary stay until February 26. At that time, when the Board has the benefit of the Agency's responses as well as its permit records, the Board will address the motion to consolidate as well as the issue of a longer term stay. During the life of this short term stay, IPC shall comply with the conditions of the expired permits.

IT IS SO ORDERED.

I, Dorothy M. Gunn, Clerk of the Illinois Pollution Control Board, hereby certify that the above Order was adopted on the 6th day of February, 1986, by a vote of 7-0.

Dorothy M. Gunn, Clerk
Illinois Pollution Control Board
