

ILLINOIS POLLUTION CONTROL BOARD

May 29, 1984

CITY OF O'FALLON,

Petitioner,

v.

ILLINOIS ENVIRONMENTAL
PROTECTION AGENCY,

Respondent.

PCB 84-59

ORDER OF THE BOARD (by J. D. Dumelle):

This matter comes before the Board upon a May 21, 1984 petition for variance filed on behalf of the City of O'Fallon. That petition is deficient in the following respects:

1. The average annual effluent discharge concentrations are given as 24 mg/l BOD and 36 mg/l SS compared to design specifications of 10/12, respectively. What is causing the high discharge levels? Does it have anything to do with the operation of the plant?
2. Variance is requested for one year for the present operator "to refresh himself and to pass the examination for Class I Operator." When will he be eligible to take the exam and when are the exams given? Does he meet all requirements other than passing the exam?
3. How much would it cost to come into compliance by hiring a Class I operator on either a part time or full time basis?
4. What facts support the conclusion that there has been, and will be, no environmental harm?

Unless the City files an amended petition within 45 days of the date of this Order curing the above-noted deficiencies, the petition will be subject to dismissal.

IT IS SO ORDERED.

I, Christan L. Moffett, Clerk of the Illinois Pollution Control Board, hereby certify that the above Order was adopted on the 29th day of May, 1984 by a vote of 6-0.

Christan L. Moffett
Christan L. Moffett, Clerk
Illinois Pollution Control Board
