)
) ILLINOIS ENVIRONMENTAL PROTECTION AGENCY,)
)
) Respondent.)

ORDER OF THE BOARD (by D. Anderson):

On October 26, 1981 Reilly Tar & Chemical Corporation filed a petition for a variance from Rule 702 of Chapter 3: Water Pollution, the sewer discharge criteria for mercury. Pending before the Board is a proposal to modify Rule 702 (R76-21, Second Notice Order, August 20, 1981). The proposal would change the discharge standard to 0.003 mg/l under certain conditions which may be applicable to Petitioner. It is possible that this will be adopted and effective prior to final action on this variance request. The Board asks that Petitioner review the proposed rules and indicate the effect on the variance request if adopted. The petition includes a waiver of hearing but not the affidavit attesting to material facts required by Procedural Rule 401(b). The matter will be subject to dismissal unless an amended petition addressing the noted deficiency is filed within 45 days of the date of this Order. The decision period will commence with the filing of a sufficient amendment.

IT IS SO ORDERED.

I, Christan L. Moffett, Clerk of the Illinois Pollution Control Board, hereby certify that the above Order was adopted on the 5th day of November, 1981 by a vote of 5-0.

Christan L. Moffett, Clerk
Illinois Pollution Control Board
