

ILLINOIS POLLUTION CONTROL BOARD
February 15, 1979

PPG INDUSTRIES, INC.,)
)
 Petitioner,)
)
 v.) PCB 78-210
)
 ILLINOIS ENVIRONMENTAL)
 PROTECTION AGENCY,)
)
 Respondent.)

ORDER OF THE BOARD (by Mr. Werner):

The Petitioner's Motion to Reopen the Hearing and Supplement the Record in this case is hereby granted. The Hearing Officer is directed to convene a hearing as soon as possible for the purposes set forth herein. The Respondent's Objection to the Motion to Reopen the Record has been duly considered, and Respondent's request that the Board deny Petitioner's Motion to Reopen the Record is hereby denied.

When the Petitioner introduces additional evidence concerning the effect of its emissions on ambient air quality standards, it may well be advisable to also address those questions and issues raised by the Illinois Environmental Protection Agency. Similarly, when modeling studies are performed in the Decatur area to determine the effect of a possible increase of emissions at the Mt. Zion glass plant, the current United States Environmental Protection Agency Guidelines on Air Quality Models should be taken into consideration.

In addition to the foregoing, in reference to the float glass manufacturing process, it would be appreciated if the Petitioner could make it crystal clear as to the flow of gases from the various components to the stack outlet, showing temperatures, weight flows in pounds per hour, and draft losses at the various critical points. It would also be appreciated if these data (as well as the data used in the modeling studies) were calculated in the English (foot-pound-second) system, instead of the metric (cgs) system, for our evaluation.

IT IS SO ORDERED.

I, Christan L. Moffett, Clerk of the Illinois Pollution Control Board, hereby certify the above Order was adopted on the 15th day of February, 1979 by a vote of 3-0.

Christan L. Moffett /ss
Christan L. Moffett, Clerk
Illinois Pollution Control Board
