vs. ) PCB 75-251  
 )  
ENVIRONMENTAL PROTECTION AGENCY, )  
 )  
Respondent. )

ORDER OF THE BOARD (by Mr. Henss):

Petitioner filed a Variance Petition on June 24, 1975 requesting one year variance for the emission of particulate matter and sulfur dioxide from boilers at the Central Park Avenue Pumping Station located in Chicago. The variance petition is inadequate because it does not provide the information which would be essential under Train vs. Natural Resources Defense Council, 43 USLW 4467 (U. S. No. 73-1742, April 15, 1975). Under that decision this Board can grant individual variances beyond July 31, 1975 if the variances do not interfere with the attainment and subsequent maintenance of national ambient air quality standards. The additional information to be filed by Petitioner shall address that issue and shall include information regarding the quality of the ambient air which is affected by Petitioner's emissions along with such information as may be available indicating whether the grant of the variance will interfere with attainment and maintenance of national ambient air quality standards. Petitioner is allowed 40 days from the date of this Order for the filing of such information. The hearing on this petition shall not be conducted until at least 20 days after the filing of the additional information.

IT IS SO ORDERED.

I, Christan L. Moffett, Clerk of the Illinois Pollution Control Board, hereby certify the above Order was adopted the 26<sup>th</sup> day of June, 1975 by a vote of 4-0.

  
Christan L. Moffett, Clerk  
Illinois Pollution Control Board
