v.	)	PCB 74-126
	)	
ENVIRONMENTAL PROTECTION AGENCY	)	
	)	

ORDER OF THE BOARD (by Mr. Dumelle):

Petition filed April 2, 1974 is inadequate. Page 7 contains a conclusory statement that "the hydrocarbons emitted from the existing Vapor-Blowdown Quench Drum do not contribute to the formation of photochemical smog". The basis for this statement is not given and additional data as to oxides of nitrogen air quality data, extent of solar insolation or actual oxidant levels achieved is necessary to substantiate this.

Petitioner is directed to supply information on this matter within 45 days from the date of this order. A waiver of the 90-day decision period shall be executed until the date of filing of the needed information.

Failure to timely file the information shall render the petition liable to dismissal for inadequacy.

IT IS SO ORDERED.

I, Christan L. Moffett, Clerk of the Illinois Pollution Control Board, hereby certify the above Order was adopted on the 4<sup>th</sup> day of April, 1974 by a vote of 5-0.

  
 Christan L. Moffett, Clerk  
 Illinois Pollution Control Board
