

ILLINOIS POLLUTION CONTROL BOARD

September 5, 1974

ILLINOIS BRICK COMPANY, a)
Division of Old Fort Industries,)
Inc.,)
)
Petitioner,)
)
vs.) PCB 74-241
)
ENVIRONMENTAL PROTECTION AGENCY,)
)
Respondent.)

ORDER OF THE BOARD (by Mr. Henss):

Petitioner Illinois Brick Company has filed motion requesting an extension of time within which it may file with the Board ambient air quality information regarding hydrogen sulfide, and the entry of an order declaring that the testing procedure described in paragraph 3 of the Motion satisfies the requirements of this Board's Order of June 27, 1974. The Motion is allowed. The time for the filing of the information shall be extended to and including September 25, 1974. We find that no one method of testing the ambient air for hydrogen sulfide has received general and official acceptance but believe that the method described in paragraph 3 of the Motion is a good method and should be acceptable on the facts of this particular case. The procedure discussed in paragraph 3 does meet with the Board approval especially since the Agency has raised no objections to it.

It is ordered that the method described in paragraph 3 of the Motion be approved and that the information be filed on or before September 25, 1974.

I, Christan L. Moffett, Clerk of the Illinois Pollution Control Board, hereby certify the above Order was adopted this 5th day of September 1974 by a vote of 5 to 0.

Christan L. Moffett
