ORDER OF THE BOARD (by Dr. Odell)

On September 5, 1974, the Grain and Feed Association, through its attorney, Richard J. Kissel, filed with the Pollution Control Board (Board) a Motion To Extend Time "to and including September 12, 1974, for the Grain and Feed Association to respond" to a proposal by the Environmental Protection Agency (Agency) in connection with proposed Grain Handling Regulations, R72-18. The Agency proposal relates to the control efficiency to be required for certain emissions in handling grain under the proposed Grain Handling Regulations that are now being considered by the Board. In support of this Motion, Petitioner states that:

"1. The final Agency proposal was made at the last day of hearing on said proposed regulations.

"2. At the last hearing, the Grain and Feed Association agreed to meet with the Attorney General and Agency to discuss the control efficiency.

"3. Such a meeting was held on Thursday, August 29, 1972, in the Agency offices in Chicago, Illinois.

"4. The Grain and Feed Association made a proposal that the control efficiency should be 98% instead of 99%, and the Agency stated they would take the proposal under consideration.

"5. The Agency informed the Association of its position on September 3, 1974, and there is not sufficient time for the Association to prepare the documentation necessary to support the Association's position."

The Board believes that this request is reasonable and desirable in order to develop a full record in this proceeding. Petitioner's Motion is hereby granted to extend the date of closing the record in this proceeding to September 12, 1974.

IT IS SO ORDERED.

I, Christan L. Moffett, Clerk of the Illinois Pollution Control Board, hereby certify that the above Opinion and Order was adopted on the 5<sup>th</sup> day of September, 1974, by a vote of 5 to 0.

*Christan L. Moffett*
